GRADUATION AND RETENTION RATES
PEER AND BENCHMARK GROUP COMPARISONS
UNIVERSITY OF HAWAIʻI, COMMUNITY COLLEGES
FALL 1998 TO FALL 2001 COHORTS, AS OF 2004

This report summarizes graduation and retention rates at the University of Hawaiʻi community college campuses and compares graduation rates with those of its peer and benchmark institutions. Peer and benchmark graduation rates are collected from the Integrated Postsecondary Education Data System (IPEDS) peer analysis system.

Three rates are looked at in this report:

- Retention/Continuation Rate: The percentage of full-time, first-time, degree-seeking freshmen in a given fall semester who returned to the campus in a subsequent fall semester.

- Graduation Rate: The cumulative percentage of full-time, first-time, degree-seeking freshmen in a given fall semester who graduated within a designated period of time, measured as of the summer term. The designated period of time is 150% of the normal time to completion. In other words, 150% of the amount of time necessary for a student to complete all requirements for a degree or certificate according to the institution's catalog. For example, students in a 2-year program would graduate within 150% time if they graduate within 3 years.

- Success Rate: The percentage of full-time, first-time, degree-seeking freshmen in a given fall semester who have either graduated or are still enrolled. The success rate is calculated by adding the graduation and continuation rates together.

Rates in this report are the result of tracking first-time freshmen at specific community college campuses and not across the campuses. For example, a first-time freshman entering Honolulu Community College is tracked at that campus only.

Continuation, graduation, and success rates are provided for the each of the University of Hawaiʻi community colleges. However, since federal reporting rules do not require the collection of retention/continuation rates, only graduation rates are available for peer and benchmark institutions.

Appendices 1 through 1G show which schools are included in each benchmark or peer group, as well as the 150% graduation rates for the Fall 2001 cohort.

Due to differing methodologies and databases, data reported here differ from previously reported data from the NCHEMS/University of Hawaiʻi Longitudinal Database Project.

Graduation Rates

The community colleges have an average 150% graduation rate of 14%. Hawaiʻi Community College has the highest graduation rate (19%) of the 7 campuses, followed by Maui (17%), Honolulu and Kauaʻi (14%), Leeward (13%), Kapiʻolani (12%), and Windward (11%).

The average 150% graduation rate is 6 percentage points less than that of its benchmark average of 20%. Graduation rates at each campus are also lower than those of its peer averages:

- Hawai‘i’s rate is 4 percentage points lower than that of its peer average of 23%.
- Honolulu’s rate is 9 percentage points lower than that of its peer average of 23%.
- Kapi‘olani’s rate is 6 percentage points lower than that of its peer average of 18%.
- Kaua‘i’s rate is 11 percentage points lower than that of its peer average of 26%.
- Leeward’s rate is 13 percentage points lower than that of its peer average of 26%.
- Maui’s rate is 7 percentage points lower than that of its peer average of 24%.
- Windward’s rate is 13 percentage points lower than that of its peer average of 24%.

Graduation rates of women are higher than those of men at all campuses except Hawai‘i. The average UHCC 150% graduation rate is 16% for women and 13% for men.

Nonresident aliens, Hispanics, Caucasians, and Asian/Pacific Islanders have the highest average UHCC graduation rates, 31%, 15% (Hispanics and Caucasians), and 14% respectively.

Continuation Rates

The community colleges have an average continuation rate of 25%. Kapi‘olani Community College has the highest continuation rate (26%) of the 7 campuses, followed by Leeward (25%), Honolulu, Kaua‘i and Windward (19%), and Hawai‘i and Maui (15%)

Continuation rates of women are higher than those of men at Hawai‘i, Kaua‘i, Maui, and Windward. Men have higher continuation rates at Honolulu, Kapi‘olani and Leeward. The average UHCC continuation rate is 21% for men and women.

Asians and mixed-ethnicity students have the highest average UHCC continuation rates, 23% and 21% respectively.

Success Rates

Success rates are the sum of graduation and continuation rates, and reflect the percentage of students who have not dropped out at an individual campus. The average UHCC 150% success rate is 35%. Kapi‘olani and Leeward Community Colleges have the highest success rates (38%), followed by Hawai‘i (34%), Honolulu (33%), Kaua‘i and Maui (32%), and Windward (30%).

Success rates of women are higher than those of men at all campuses, except Honolulu. The average UHCC success rate is 37% for women and 33% for men. Non-resident aliens have the highest average UHCC success rate (39%).

Summary

- The UHCC average 150% graduation rate is 14%.
- An average of 35% of UHCC students either graduate within 150% of the normal time to completion or remain at the individual campus past the 150% completion period.
- Women have higher graduation and success rates at most of the campuses. Continuation rates by gender vary at each campus.
- Nonresident aliens, Hispanics, Caucasians, and Asian/Pacific Islanders have the highest average UHCC graduation rates.
- Asians have the highest average UHCC continuation rate.
- Non-resident aliens have the highest average UHCC success rate.

17	Brookhaven College	5.9%	Data not available	
18	Palo Alto College	5.8%	Data not available	

Note: Graduation rates are as of summer term, continuation rates are as of fall census. Peer average excludes Leeward CC. List is sorted by graduation rates in descending order. Success rate = graduation rate + continuation rate.

1/ 150% of the normal time to completion defined as 150% of the amount of time necessary for a student to complete all requirements for a degree or certificate according to the institution's catalog. For example, students enrolled in a 2-year program would complete within 150% time if they complete the program within 3 years. Rates shown include students in 2-year programs or less-than-2-year programs who completed within 150% of the normal time to completion.

2/ Federal reporting guidelines do not require continuation rate data. Therefore, peer group data are not available.
