ENROLLMENT PROJECTIONS
THE UNIVERSITY OF HAWAIʻI
FALL 2007 TO FALL 2013

INTRODUCTION

This report provides a summary of the enrollment projections for the campuses of the University of Hawaiʻi system: the University of Hawaiʻi at Mānoa, the University of Hawaiʻi at Hilo, the University of Hawaiʻi-West Oʻahu, and the University of Hawaiʻi Community Colleges: Hawaiʻi, Honolulu, Kapiʻolani, Kauaʻi, Leeward, Maui, and Windward. Details of the enrollment projections by campus may be found in the separate reports by UH unit, published annually by the University of Hawaiʻi Institutional Research Office as a part of the Management and Planning Support (MAPS) series.

The projections are statistical extrapolations of current trends in enrollment by campus. They do not set enrollment targets and, in general, do not take into consideration planned or potential changes in University or campus policies or procedures. They should be considered as an extension into the future of current enrollment trends.

The enrollment projections are based upon unduplicated headcounts of students enrolled in credit courses. Included are classified students in programs leading to a degree as well as unclassified students. Special students (concurrent registrants and early admits) have been included for all years, both historical and projected. Historical data are included in the tables and charts to facilitate comparison and analysis. They were extracted from the student enrollment, academic crossover and course registration data files.

PROJECTION METHODOLOGY

The projections for classified undergraduates are sub-divided by registration status: first-time, transfer, returning and continuing. Graduate and unclassified student enrollments are forecast separately. The projection methodology makes use of continuation rates as well as various other ratios, trends and constants. The specific methods used and assumptions made in forecasting enrollments vary for each campus. Details are found in the separate enrollment projection reports by UH unit (UH Mānoa, UH Hilo, UH-West Oʻahu and the UH Community Colleges).

The Fall 2007 UH system projection report offers three forecast series - high, middle and low. The counts in the separate series were produced by varying the input values used from among the range of available values. Otherwise, the same general methodology is employed for all three series, per campus. The input values are averages (either simple averages or rates) calculated using data measured over the last one to seven years. In some cases, linear trends are used. The low series uses calculated values on the low end of the range of available values, the high series uses calculated values on the high end, and the middle series uses calculated values in between the two extremes.

The high, middle and low projection series, with breakout by registration status, are shown in Table 1. **The data in all subsequent tables are based upon the middle series forecast presented in Table 1.** Historical and projected enrollments for each campus and for the UH system are summarized in Table 2. Historical and projected enrollments by registration status are presented in Table 3. Annual percentage changes in enrollment by campus are shown in Table 4. Table 5 provides enrollment indexes, useful for comparing across campuses, calculated using Fall 2006 as the base year (i.e. Fall 2006 = 100). (An enrollment index is illustrated for the UH system in Figure 2 and for each UH unit in Figures 5 to 8.) Tables 6 and 7 show projected student semester hours (SSH) offered and full-time equivalent (FTE) course enrollments, respectively. Projected enrollments by attendance status (full-time / part-time) are given in Table 8.

ANALYSIS AND DISCUSSION

- Headcount enrollment for the University of Hawai‘i measured 49,990 in Fall 2006, a slight decrease from the previous fall semester (Tables 2 & 4 and Figure 1). Enrollment increased at five of the ten campuses in the UH system. Kaua‘i CC had the largest increase in percentage terms at 5.7%, followed by Windward CC at 4.0%, UH Hilo at 2.5%, UH-West O‘ahu at 0.9% and Leeward CC at 0.6%. Enrollment declined 0.2% at Kapi‘olani CC, 0.8% at Hawai‘i CC, 1.0% at Honolulu CC, 1.4% at UH Mānoa and 2.1% at Maui CC.

- ***The middle series forecast for the UH system projects a 0.3% increase for Fall 2007, to 50,119 students, with subsequent annual growth averaging 0.6% through Fall 2013, when enrollment will measure just under 52,000.***

- The high series enrollment projection provides for a 2.3% increase in enrollment in Fall 2007, to 51,157 students, while the low series provides for a 2.1% decline in enrollment, to 48,936 (Table 1 & Figure 3). Many of the University campuses are at historically high levels of enrollment, with further growth taxing available resources. In addition, although the tuition increases which went into effect in Fall 2006 appear to have had no adverse affects upon enrollment to date, the long-term affects are uncertain. Finally, further increases in non-resident enrollment at the four-year campuses are constrained by statutory limits. These factors combine to create an environment conducive to stable or low growth in enrollment.

- The Fall 2007 enrollment projection report series includes the addition of lower division enrollment at the UH-West O‘ahu campus (see the enrollment projections report for UH-West O‘ahu, Fall 2007 to Fall 2013, for more detail). Most of the enrollment growth forecast for the UH system is due to this addition. To what extent the addition of program offerings and new facilities at UH-West O‘ahu can attract students to the UH system who otherwise would not have enrolled in college is a critical question. If students new to the UH system constitute a high proportion of the overall enrollment increase, then the expansion at UH-West O‘ahu will have little impact on enrollment at the other campuses in the system. The projections shown here assume this result, with enrollment at the other UH campuses showing no ill affects from the UH-West O‘ahu expansion.

- According to information from the Hawai‘i Department of Education, enrollment of Hawai‘i public high school seniors is expected to grow moderately through Academic Year 2007-08, then decline. Similarly, growth in Hawai‘i private high school graduates is expected to peak in AY 2007-08, according to the most recent projections from WICHE. If the going rates of these students into the UH campuses remain unchanged, at best only slight increases in first-time students from Hawai‘i high schools may be anticipated. In addition, further growth may be limited in the short term by resource constraints, especially housing. The overall outlook for first-time students is for modest growth through Fall 2008 and then stable for the remainder of the projection period.

- Classified graduate enrollment declined slightly in Fall 2006, ending five semesters of growth. Given that the rate of growth has been slowing since Fall 2003, we may anticipate stable to slightly declining enrollment for the next several years. Increasing tuition costs and a robust economy may also work to constrain growth. Classified graduate enrollment has been forecast to decline mildly through Fall 2008, then to increase at an average annual rate of 0.6% through Fall 2013.

SUMMARY AND CONCLUSION

Enrollment for the UH system grew slowly but steadily from the founding of the UH Mānoa campus in 1907 through 1960, when total UH system enrollment measured 7,771 (Figure 4). Through the 1960s and into the early 1970s, enrollment boomed, increasing more than 470% from 1960 to 1975. Enrollment then leveled off and, despite a surge in the early 1980s, held steady at around 44,000 students from Fall 1975 to Fall 1989. From 1989 to 1994, enrollment increased by 18%, reaching a historical peak of 51,667 in Fall 1994. Enrollment then declined for several years, before stabilizing in Fall 1998 at around 45,000.

From Fall 2001 to Fall 2004, enrollment increased 13.4%, to reach 50,569, the highest system total since Fall 1994. Despite the slight declines in Fall 2005 and Fall 2006, enrollment for the UH system remains at historically high levels. Two campuses, UH Hilo and UH-West O‘ahu, reached all-time high levels of enrollment in Fall 2006. Given this recent growth, a period of consolidation, with stable enrollment or only modest enrollment growth, may be expected. The enrollment forecast (middle series) projects a slight increase in enrollment for the UH system in Fall 2007, followed by moderate growth at an annual rate of 0.6% through Fall 2013. The high series provides for more robust growth, at an average annual rate of 1.3%, while the low series allows for slight decline in Fall 2007 with continued decline at an average annual rate of 0.2%.

Two recent developments add interest to the forecast: the addition of lower division enrollment at UH-West O‘ahu and the implementation of a new tuition schedule, with higher rates at all campuses, through academic year 2011-2012. The affects that these developments may have on overall UH system enrollment and on the distribution of enrollment among the individual campuses are difficult to estimate. However, the assumption is that the overall impact on enrollment will be minimal, with perhaps some redistribution of enrollment from the four-year campuses to the UH Community Colleges.
