# ENROLLMENT PROJECTIONS
# THE UNIVERSITY OF HAWAIʻI
# FALL 1999 TO FALL 2005

This report provides a summary of enrollment projections for the University of Hawaiʻi system: the University of Hawaiʻi at Mānoa, the University of Hawaiʻi at Hilo, the University of Hawaiʻi-West Oʻahu, and the University of Hawaiʻi Community Colleges (Hawaiʻi, Honolulu, Kapiʻolani, Kauaʻi, Leeward, Maui, and Windward). Detailed data on the individual campuses may be found in the separate enrollment projections reports by unit, published annually by the Institutional Research Office as a part of the Management and Planning Support (MAPS) series.

The projections are statistical extrapolations of current trends in enrollment by campus. In general, they reflect neither planned changes in campus policies or procedures nor external socio-economic trends. In addition, these projections do not set enrollment targets or goals. They should be considered only as a first step in the planning and budgeting process, and as a signal to administrators and other interested individuals of what might occur given recent enrollment trends.

The enrollment projections are based upon unduplicated headcounts of full-time and part-time students enrolled in credit courses. Included are students in programs leading to a bachelor's degree or higher, students in programs leading to associate degrees or certificates, and unclassified students. **For the first time, these projections include headcounts in continuing education credit courses offered at UH Mānoa, UH Hilo and Honolulu CC, beginning in Fall 1999. Special students (auditors, concurrent registrants and early admits) have also been included, for all campuses and for all years shown, both historical and projected.**

Historical data are included in the tables and charts to facilitate comparison and analysis. They were compiled from the Student Enrollment Reports, the Academic Crossover Studies and the Course Registration Reports.

## METHODOLOGY AND ASSUMPTIONS

The projections for undergraduates (freshmen through seniors) are broken down by registration status: first-time, transfer and continuing / returning students. Within each registration status category, enrollments are projected by educational level (freshmen through seniors) for UH-Mānoa, UH-Hilo, and UH-West Oʻahu. For the UH Community Colleges, enrollments for each registration status category are projected by program area. Graduate student enrollments are projected separately. The projections make use of continuation rates as well as various other ratios. The specific methods used may vary among units and from year to year. Detailed descriptions of the methods used and assumptions made in projecting enrollments by campus are found in the separate enrollment projections reports published by unit (UH Mānoa, UH Hilo, UH-West Oʻahu and the UH Community Colleges).

Historical and projected enrollments for each campus and for the UH system total are summarized in Table 1 (see also Figures 1 & 3). Enrollment by registration status is summarized in Table 2. Annual percentage changes in enrollment are shown in Table 3. Table 4 provides an enrollment index, useful for comparing across campuses, using Fall 1998 as the base year (Fall 1998 = 100). Enrollment indexes are illustrated for the UH system in Figure 2 and for each campus in Figures 4 to 14. Tables 5 and 6 show projected student semester hours (SSH) offered and full-time equivalent (FTE) course enrollments, respectively. Projected headcount enrollments by attendance status (full-time / part-time) are given in Table 7.

## HIGHLIGHTS

Enrollment of credit students for the University of Hawai‘i measured 45,337 in Fall 1998, a 0.5% decline from Fall 1997 and the fourth consecutive year of decrease (Table 1 and Figure 1). Enrollment has declined 12% since the peak of 51,677 students measured in Fall 1994. However, the rate of decrease has slowed the last two years, suggesting that enrollment levels are stabilizing (Table 3). ***For Fall 1999, headcount enrollment is forecast to increase 2.7%, to about 46,500. However, a good portion of this increase (about 1,000 students) is due to the addition of continuing education credit students to the general enrollment headcounts, beginning in Fall 1999. Without this addition, enrollment would be forecast to increase very slightly (0.6%).*** Enrollment is forecast to increase modestly through the projection period, at an annual rate of slightly less than 1%.

Historical headcount enrollment for the UH system from 1907 through 1998, along with projected enrollment through 2005, is illustrated in Figure 3. Enrollment grew slowly but steadily from the founding of the UH Mānoa campus in 1907 through 1960, when total UH system enrollment measured 7,771. Through the 1960s and into the early 1970s, enrollment boomed, increasing by more than five-fold from 1960 to 1975. From 1975 to 1989 enrollment held steady at around 43,500 students. From 1989 to 1994 enrollment grew by over 18%, reaching an historical peak of 51,667 in Fall 1994. Since then, total UH system headcount enrollment has declined 12.3% and in Fall 1998 stood at its lowest level this decade.

Enrollment at the **University of Hawai‘i at Mānoa** measured 17,013 in Fall 1998, a 2.0% decline from Fall 1998 and the fifth consecutive year of decrease in fall enrollment. Enrollment is projected to increase in Fall 1999 to about 17,400 students, though much of this increase is apparent rather than real, due to the addition of Outreach College continuing education credit students. These students were already being served by the University prior to Fall 1999. Without this addition, UH Mānoa enrollment would be forecast to decline slightly (1.0%).

Enrollment at the **University of Hawai‘i at Hilo** measured 2,730 in Fall 1998, a 3.4% increase over Fall 1998 and the first increase in enrollment since Fall 1993. Enrollment is forecast to increase 4.5% in Fall 1999 to about 2,850 students. However, part of this increase is due to the addition of continuing education credit counts to the general

enrollment headcounts, beginning in Fall 1999. Without this addition, UH Hilo enrollment would be forecast to increase very slightly.

Enrollment at the **University of Hawai‘i-West O‘ahu** measured 685 in Fall 1998, a 5.7% increase in enrollment over Fall 1998. Enrollment is projected to increase 1.5% in Fall 1999 to about 695 students.

Enrollment for the **University of Hawai‘i Community Colleges** totaled 24,909 in Fall 1998, a count virtually the same as the previous fall semester. Enrollment in Fall 1999 is forecast to increase 2.8% to about 25,600 students, although some of this increase is due to the addition of continuing education (SOCAD) credit students at Honolulu CC to the general enrollment counts, beginning in Fall 1999. (See the enrollment projections for the UH Community Colleges for more information about individual campuses.)

The Hawai‘i Department of Education has revised its forecast for public high school seniors downward each of the last two years. The result is that enrollment of **first-time** students is expected to grow modestly over the next three years and then flatten out (Table 2). The projections offered here are admittedly conservative, and do not take account of possible trends in enrollment in Hawai‘i private high schools or efforts by the University to recruit more local high school students.

**Continuing / Returning** enrollment has declined in recent years, perhaps due in some measure to student response to increasing college costs. The rate of decline in continuing / returning enrollment decreased in Fall 1998, however, which may indicate that the enrollments will stabilize in the near future. Continuing / Returning enrollment has been forecast to decrease slightly in Fall 1999 and then level off.

**Transfer** enrollment is very difficult to model and has been forecast to follow the trend for first-time freshmen for most campuses.

## CONCLUSION

In conclusion, enrollment in the University of Hawai‘i system seems to be in a protracted phase of little or no overall growth. Enrollment in 1998 was only slightly higher (3%) than in 1975. This enrollment pattern experienced at the University of Hawai‘i reflects national trends in higher education enrollment. One might describe the higher education industry as being in a “mature market” phase. Continued growth will require more sophisticated market-oriented analysis and initiative, especially for public institutions for which such activities are less familiar.

Certain campuses experienced increases in enrollment in Fall 1998 for the first-time in several years, including UH Hilo, UH-West O‘ahu, Hawai‘i CC, Honolulu CC, and Kapi‘olani CC. Maui CC experienced a second consecutive year of enrollment increase. For other campuses, notably UH Mānoa and Kaua‘i CC, enrollments continued to decline. This environment represents an improvement over the last few years, in that recovery is beginning to affect some campuses. These enrollment projections reflect guarded optimism that increases in enrollment will spread to all campuses in the near future.
