LIBRARY SERVICES

FUNCTIONAL STATEMENT

The Library Services program is an academic support organization. The Library is an active participant in the teaching, research and service missions of the University. Its resources and services are designed to nourish and enhance all University programs, particularly those programs which take advantage of Hawai'i's unique location, physical and biological environment and rich cultural setting. In fulfilling this mission, the Library selects, acquires, organizes, preserves and provides intellectual and physical access to collections in a wide range of formats. The library fosters the sharing of its resources among all UH system campus libraries. It facilitates access to collections held by other academic institutions, government agencies and commercial providers of information. Electronically connected to information resources throughout the world, the Library contributes to global networked information resources and provides assistance and education in information retrieval.

The Library Services program encompasses traditional reference and circulation services, electronic bibliographical and information retrieval services, bibliographic instruction services, responsibility for the book, journal and non-print collections, acquisitions, cataloging and other processing activities, responsibility for the UH system wide Hawai'i Voyager library online management system, and direct service to the academic and research programs.

The program is administered by the University Librarian. The University Librarian reports to the Vice Chancellor for Academic Affairs, University of Hawai'i at Mānoa.

The Functional Statement describes the organizational units in the Library. Additionally, it outlines the relationships between the various organizational units which are typically organized around: 1) the type of function(s) performed (e.g. services to the public or processing operations); 2) the format of materials dealt with, (e.g. serials, monographs, audiovisual) and/or the languages of the materials involved. Thus the Library organization is a multi-faceted structure having hierarchical features combined with matrices of inter-related activities.
