ENROLLMENT PROJECTIONS
UNIVERSITY OF HAWAIʻI AT MĀNOA
FALL 2013 TO FALL 2018

INTRODUCTION

This report presents information on historical and projected headcount enrollment at the University of Hawaiʻi at Mānoa. The projections are statistical extrapolations of current trends in enrollment. They are based upon unduplicated headcounts of students enrolled in credit courses. Included are students enrolled in regular day courses, as well as students enrolled in continuing education credit courses offered by Outreach College. Unclassified students are also included for all years shown, both historical and projected. Note that these projections do not set enrollment targets and, in general, do not take into consideration planned or potential changes in University policies or procedures.

Beginning this year, the projection reports also make use of a time series analysis conducted by UH IRAO office staff that incorporates a variety of economic and demographic factors. This model has been used to guide and validate the projection methodology for the system-wide enrollment projections. Additionally, ARIMA (time series) projections were made for UH Mānoa.

Historical data are included in the figures and tables to facilitate comparison and analysis. They were extracted from student enrollment, academic crossover, and course registration data files. Information on Hawai'i public high school seniors was provided by the Hawai'I Department of Education. Information on Hawaiʻi public and private high school graduates was obtained from the Western Interstate Commission for Higher Education (WICHE).

METHODOLOGY

The projections are broken down into three broad groups of students: classified undergraduate, classified graduate and unclassified. Classified undergraduate enrollment is sub-divided by registration status: first-time, transfer, returning and continuing. Within each registration status category, counts are shown by education level. Classified graduate enrollment is sub-divided by degree objective. Unclassified enrollment is divided by academic level (undergraduate and graduate). (Note that historical data on first-time freshmen, returning and continuing undergraduate students have been revised from prior reports due to a change in the data definitions and processing routines.)

First-time freshmen are sub-divided by the sector and geographic location of the high school attended. Each category is forecast separately: direct entrants from Hawaiʻi public high schools, direct entrants from Hawaiʻi private high schools, freshmen from the U.S. mainland, freshmen from foreign countries (including U.S. related areas) and other first-

time freshmen. U.S. related areas include territorial possessions (e.g. American Samoa), commonwealths (e.g. Northern Marianas) and republics within the compact of free association (e.g. Federated States of Micronesia).

Direct entrants are students from Hawai‘i public and private high schools who entered UH Mānoa in the fall semester immediately following graduation from high school. These students represent the traditional core group of first-time freshmen. The enrollment projections of **direct public entrants** are based upon the forecast of public high school seniors provided by the Hawai‘i Department of Education (see Appendix A). Historical ratios of direct public entrants to public high school senior enrollment are calculated by school district. Enrollment for each year is projected by applying averages of these ratios (by district) to the annual DOE senior enrollment forecast (ending in June of each year). The DOE forecast used in these projections was updated in May 2013.

The projection of **direct private entrants** relies upon the private high school graduate forecast for Hawai‘i published by the Western Interstate Commission for Higher Education (WICHE), most recently updated in December 2012 (see Appendix B). Historical ratios of direct private entrants to total Hawai‘i private high school graduates are first calculated. An average ratio is then applied to the WICHE annual private high school graduate forecast to yield the projected number of first-time freshmen from Hawai‘i private high schools.

First-time freshmen from the **U.S. mainland** have increased since Fall 2006 and are forecast using an annual percentage increase. First-Time freshmen from **foreign countries and U.S. related areas** have declined in recent years and are forecast using an average percentage change. **Other first-time freshmen** include those who completed high school via the General Education Development (GED) examination, home-schooled students and those who graduated from Hawai‘i high schools prior to the 2011-12 academic year. The total number is both small in absolute terms and relatively stable and has been set to an average number. Distribution by education level is made using the three year average ratios.

Classified undergraduate transfer enrollment is forecast using a combination of trends and constants. Transfers from other UH campuses and U.S. mainland institutions are forecast using trends. The other transfer types are set to constants, based upon calculated averages. Distribution by education level is made using current year (Fall 2012) ratios.

Classified undergraduate returning enrollment has shown a long-term downward trend since the late 1980s, with some upturn recorded in Fall 2012. Given the uncertainty in the future direction of this category and for simplicity, the number has been set to a constant. Distribution by education level is made using the current year (Fall 2012) ratios.

Classified undergraduate continuing enrollment is forecast using continuation rates. In general, a continuation rate is the ratio of continuing enrollment at a given education level to the previous fall semester's total enrollment at the next lower level. In this report, freshmen are projected using the previous year's first-time freshmen, sophomores using the previous year's total freshmen, juniors using the previous year's sophomores, and seniors using the previous year's upper division total (juniors plus seniors). Average continuation rates are applied to the historical or projected total enrollment by education level to forecast the following year's continuing enrollment at the next higher level.

Classified graduate enrollment is sub-divided by degree objective, with each category forecast separately: master, doctorate, first-professional, post-baccalaureate and graduate special. **Doctorate, post-baccalaureate and graduate special** enrollments have been set to constants, as have **first-professiona**l enrollments in Law and Medicine. **Master** degree enrollment, along with the **first-professional** counts in architecture, have been modeled using an annual percentage change that makes the numbers decline for a few years before increasing again toward the end of the projection period. Enrollment counts for the new programs in Nursing Practice (DNP) and Education Practice (EdD) have been based upon the estimated headcounts presented in the program proposals.

Unclassified enrollment is broken out by academic level (undergraduate / graduate), and includes students whose home-campus is not UH Mānoa. Overall unclassified enrollment has shown a long-term downward trend since Fall 2002, but leveled off in Fall 2012. The forecast for unclassified graduates makes use of an annual percentage decrease which slows annually, leveling off by Fall 2016. Undergraduate unclassified headcounts have been set to a constant, while the headcount for students home-based at other UH campus has been forecast using a modest annual numerical increase.

Table 1 presents six years of historical data with detailed forecasts by registration status and education level. Table 2 presents headcount enrollment by college, broken out by lower division, upper division and graduate level. Student semester hours offered are shown in Table 3 and full-time equivalent (FTE) course enrollment served is given in Table 4. Tables 2, 3 and 4 utilize Fall 2012 enrollment data plus the projected enrollments from 2013 to 2018 as input, then provide enrollment forecasts by college / school using the Fall 2012 proportions to distribute enrollment totals across subunits. Headcount enrollment by attendance status is provided in Table 5. The Fall 2012 proportions have been used to allocate the projected headcounts between full-time and part-time. Appendix A shows historical and projected enrollments of Hawai‘i public high school seniors by geographic district through academic year 2018-19. Appendix B gives forecasts of Hawai‘i public and private high school graduates through the 2027-2028 school year.

ANALYSIS AND DISCUSSION

- Headcount enrollment at the University of Hawai‘i at Mānoa was unchanged in Fall 2012 from the prior fall semester, measuring 20,426 students (Table 1 and Figures 1 & 2). Enrollment has been very stable for the last four years, and has remained above 20,000 for the nine consecutive fall semesters. **Headcount enrollment is forecast to increase slightly in Fall 2013, to measure 20,437. Subsequent mild growth will bring the campus total to 20,888 students by Fall 2018.**

- First-time freshmen enrollment has been on a mild upward trend since Fall 2006, and has rebounded from the rather sharp 12.2% decline realized in Fall 2006 (Figure 5). However, since the number of Hawai‘i high school graduates is expected to decline through Fall 2018 (Appendix A), only very mild growth has been forecast, based largely upon potential increases in first-time freshmen from mainland high schools.

- Undergraduate transfer enrollment increased in Fall 2012 and has shown an upward trend since Fall 2008 (Figure 6). Recent increases in enrollment at the UH Community Colleges should contribute to further growth in transfers at the UH four-year campuses, including UH Mānoa. On the basis of this expected growth trend, transfers are forecast to increase at about 1.2% annually through Fall 2018.

- Undergraduate returning enrollment has shown a long-term downward trend since the late 1980s (Figure 7). However, the enrollment has see-sawed quite a bit over this period, posting a gain in Fall 2012. For simplicity, the number has been set constant at the Fall 2012 level. Continuing enrollment has been increasing since Fall 2009 (Figure 8). Continuation rates have been chosen to yield increases in line with recent growth.

- Graduate enrollment has begun to decline from the peak measured in 2009-10 (Figure 9). Masters program enrollment has declined since Fall 2009 while doctoral enrollment has leveled off. Most professional practice programs are at or near capacity. The new programs in Nursing and Education will contribute only small additional enrollments. Graduate level enrollment is forecast to decline through 2016, then to recover slowly.

SUMMARY AND CONCLUSION

The University of Hawai‘i at UH Mānoa is in a period of stable enrollment that began around Fall 2004. Since these projections are trend based, only very mild growth has been forecast for UH Mānoa through Fall 2018. Growth in undergraduate transfer enrollment is likely, as those students completing study at the UH Community Colleges elect to further their education at the UH system’s flagship campus. On the other hand, graduate level enrollment has begun to decline.

1/ Breakouts by Student Type and by Education Level have been revised.

2/ Includes U.S. Possessions, Commonwealths and republics within the Compact of Free Association.

3/ Includes GED, students from Hawaiʻi who are not recent high school graduates and records with invalid data on high school.

4/ Includes new Doctor of Nursing Practice beginning Fall 2012.

5/ Post-baccalaureate in education was changed from graduate to undergraduate level in Fall 2011. However, in this table counts are included with graduate level for continuity.

6/ Students whose primary (home) campus, as identified in Banner / ODS, is a UH campus other than UH Mānoa.

Pre-Law, Non-Degree (Unclass)	1											

1/ Includes Unclassified Undergraduates and records with invalid data on education level.

2/ Includes Unclassified Graduates.

3/ Students whose primary (home) campus, as identified in Banner / ODS, is a UH campus other than UH Mānoa.

4/ Post Baccalaureate changed to undergraduate education level for financial aid purposes in Fall 2011; however, included here with graduate level for consistency in reporting.

5/ Educational Practice program approved by the UH Board of Regents in January 2011, effective Spring 2011.

6/ Nursing Practice program approved in May 2011, effective Fall 2012; enrollments forecast per program proposal.
