ACADEMIC CROSSOVER STUDY  
UNIVERSITY OF HAWAII, COMMUNITY COLLEGES  
FALL 2000

The academic crossover study report was developed primarily to answer two questions: (1) what is the course-taking pattern of the different groups of student majors? e.g., what proportion of the liberal arts majors' academic load is in the humanities? in the natural sciences? in vocational courses? (2) what is the "client"-serving pattern of the different subject disciplines? e.g., what proportion of the student semester hours in the humanities is generated by liberal arts majors? business majors? health services majors? Such information has been found especially helpful for physical facilities planning, for estimating staffing needs and for academic planning, in general.

Computer reports 2524B and 2524C, based upon the student registrations as of November 30, 2000, were used as the primary sources of data. Included in this report are the student semester hours (SSH) generated by early admits and concurrent students as well as by regular credit students.

### **Highlights**

The data show that the course-taking, client-serving patterns have generally remained stable over the past five years.

- I. What is the course-taking pattern of students?
  - A. By educational objective (Table 1):
    1. Certificate of Completion (CC) students took 54 percent of their work in career and technical courses; Certificate of Achievement (CA) students, 69 percent in career and technical courses; Associate in Arts (AA) students, 90 percent in general education courses; Associate in Science-College Transfer (AS) students, 64 percent in career and technical courses; Associate in Applied Science (AAS), Associate in Science (AS) and Associate in Technical Studies (ATS) students, 60 percent in career and technical courses; and "other" students (special and unclassified), 77 percent in general education.
    2. CC and CA students took 55 and 59 percent of their work, respectively, in courses numbered 100-199. AAS, AS and ATS students took 47 percent of their work in courses numbered below 100. AA, AS-College Transfer, and "other" students took 83, 87 and 83 percent, respectively, of their work in courses numbered 100 and above.
  - B. By majors (Table 2 and Chart 1) (see Appendix A for major groupings):
    1. Liberal arts majors continued to take the bulk of their work (90 percent) in general education courses.

2. Career/technical majors continued to take most of their work (62 percent) in career and technical education courses.
3. Unclassified and other students continued to take the bulk of their work (78 percent) in general education.

II. What groups of student majors do the different "departments" serve? (Table 2, Chart 2):

- A. General Education Courses: As in past years, liberal arts majors were the largest consumers of general education courses (73 percent). However, in recent years, more of the student semester hours in general education courses have been generated by vocational education and unclassified students.
- B. Career and Technical Education Courses: Career/technical students continued to generate the bulk of the vocational SSH (77 percent), followed by liberal arts majors (19 percent) and unclassified students (4 percent).

III. Other observations:

- A. As in past years, the proportion of SSH generated in the general education area was over two-thirds (70 percent) of the total. The range was from 57 percent at Honolulu Community College to 94 percent at Windward Community College. Thirty-eight percent of all SSH generated was in the humanities.
- B. Seventy-six percent of the total SSH was generated in courses numbered over 100. Eighty-three percent of the SSH taken by liberal arts students was in courses numbered over 100; 65 percent of the SSH taken by career/technical students was in courses numbered over 100.
- C. Fifty-six percent of all SSH generated in courses numbered below 100 were taken by career/technical education majors (28,951 of 51,553 SSH).
- D. Seventy-eight percent of the SSH taken by early admits was in general education courses. The 464 SSH attributed to early admits constituted less than one percent of total SSH.
- E. Eighty-seven percent of the 431 SSH taken by concurrent registrants was in general education courses.
