

# Wireless Printing

Follow these instructions to setup your Windows XP Professional laptop to print wirelessly to the Mo'o computer lab printer in Wist Hall 134.

## Why Wireless

The current market trend is for an increasing amount of laptops to be wireless enabled. We would like to leverage this new technology to improve the usability of our existing resources. Pairing the Mo'o lab printer with existing wireless network creates an improved user experience. Wireless mobility allows users to access the printer from outside the limited space of the computer lab.

## Requirements

Windows XP Professional laptop

Must Have an active Mo'o Lab user account (Mo'o lab quota & user guidelines apply)

Able to connect to the UH Wireless network

<http://www.hawaii.edu/wireless>

## Setup

Start menu > Printers and Faxes

Add a printer > Add Printer Wizard

Select "A network printer..."

Select "Connect to this printer..."

Enter in the name:

Enter your Mo'o User name and Password

Do not set it up as your default printer.

Click on Finish

## Assistance
