HAZARDOUS WASTE SATELLITE ACCUMULATION AREA

Reminders:

Location: Post this sign as a means of establishing a Hazardous Waste Satellite Accumulation Area in each lab.

Labels: Provide complete labels on waste containers – this includes full chemical names, relative % of each item and the word “Waste.” Abbreviations and chemical formulas are not allowed on waste containers! Intact manufacturer labels on pure materials designated for disposal are acceptable as-is.

Leak Prevention: Provide secondary containment to prevent large spills and to segregate incompatible wastes.

Lids on Good Containers: Keep lids on waste containers at all times unless actively filling.

Contact UH EHSO Haz Waste Management Program with any questions: 956-3198 <http://www.hawaii.edu/ehso/HAZMAT>
