To access the UHM wireless network, you need a valid UHM ITS username and password.

If you are a visiting researcher, you may be eligible for wireless internet access. For further information, read the instructions for “Visitors Internet Access (VIA) for UH” at http://www.hawaii.edu/via/

Each wireless card manufacturer may have a different configuration setup. If you need help beyond this generic "how-to" guide, seek technical assistance from the UH ITS Help staff.

Procedure for Enabling Wireless Access

Step 1: Enter the following into your laptop’s wireless settings:
(See other side for some examples on how to configure your wireless settings.)

Network (SSID) Name: uh (all lowercase)
Password: Aloha (capital A) for text
(key/passphrase) 41 6C 6F 68 61 for hexadecimal

Note:
• Use WEP encryption key
• Your wireless card may want the key in text (ASCII) or hexadecimal format.

Step 2: Open your web browser (e.g., Firefox, Safari, Internet Explorer) to connect to the UH authentication login prompt.

Step 3: Enter your UH username and password at the login prompt.

Need Help? Contact UH ITS (aka “the computing center”)

• Help Desk: (808) 956-8883

• ITS Labs: Keller Hall 105 and 213
Hamilton Library Addition, 2nd floor
Sinclair Library, 1st floor

• Wireless information: http://www.hawaii.edu/wireless/
Includes wireless coverage maps, printed guides, troubleshooting information, etc.
