I Will Survive!

All organisms need specific environmental conditions to survive. For example, we know that plants need water and sunlight. We also learned that different species of ants eat different kinds of food, and live in different habitats.

For this homework assignment, we want you to think about the things YOU need to survive. To do so, draw a picture of yourself in your "ideal habitat". This should be a place that has everything you need to survive. Be as creative as you want, but make sure that your ideal habitat provides you with plenty of food and a safe place to sleep, as these things are necessary for survival. What else do you need to survive?

1. Describe the habitat you chose.

2. List 5 things you think are necessary for humans to live happy, healthy lives.

- 1.
- 2.
- 3.
- 4.
- 5.

3. Choose one of the following animals that lives on Oahu's offshore islands, and list 5 things you think it needs to survive. Circle the animal you choose.

Yellow-faced Bee

Wedge-Tailed Shearwater

Naupaka

- 1.
- 2.
- 3.
- 4.
- 5.

4. Do humans and the animal you chose have similar or different requirements? Why?
