## Legislative Testimony

---

Written Testimony Submitted to the  
House Committee on Energy and Environmental Protection  
February 9, 2017 at 8:30 a.m.

By  
Richard Rocheleau, Director  
Hawai'i Natural Energy Institute  
School of Ocean and Earth Science and Technology  
University of Hawai'i at Mānoa

### HB 1043 – RELATING TO ENERGY ASSURANCE

Chair Lee, Vice Chair Lowen, and members of the committees:

My name is Richard Rocheleau, Director of the Hawai'i Natural Energy Institute (HNEI) at the University of Hawai'i at Mānoa. While we spend much time in the design of innovative solutions for energy policy and technology necessary to drive Hawaii's clean energy transformation agenda, an often understated objective is to ensure the resiliency, safety and security of Hawai'i's critical energy infrastructure. Energy assurance planning for natural and man-made disasters and disturbances remains one of the most important tasks of key energy stakeholders. HNEI supports HB 1043 because it appropriately addresses a number of housekeeping and substantive improvements to Hawai'i's statutes regarding fuel storage and response and energy emergency management.

HB 1043 effectively establishes chapter 125C to clarify the State's roles in energy assurance for overseeing all forms of energy shortage, disruption and emergencies. While the existing plan is heavily focused on petroleum, SB 909 provides a broader view that affords residents and critical energy consumers with greater coverage and protection potential.

Also addressed in HB 1043 is a greater alignment of state policies on energy assurance with applicable federal, state, county and private sector energy resources, emergency management and energy assurance plans and programs. It brings stark attention to access and confidentiality of crucial energy data essential for energy assurance and response teams to effectively perform, particularly those with Emergency Support Function #12 (energy) responsibilities. The bill also incorporates recommendations found in the most recent federal Quadrennial Energy Review and other federal and state strategic and operational guidance documents.

Thank you for the opportunity to testify in support of HB 1043.
