

# UNIVERSITY OF HAWAII SYSTEM

## Legislative Testimony

---

Written Testimony Submitted to the  
Senate Committee on Ways and Means  
Friday, February 24, 2017 at 9:30 a.m.

By

Richard Rocheleau, Director  
Hawai'i Natural Energy Institute  
School of Ocean and Earth Science and Technology  
University of Hawai'i at Mānoa

### SB 909 SD1 – RELATING TO ENERGY ASSURANCE

Chair Tokuda, Vice Chair Dela Cruz, and members of the committee:

My name is Richard Rocheleau, Director of the Hawai'i Natural Energy Institute (HNEI) at the University of Hawai'i at Mānoa. While we spend much time in the design of innovative solutions for energy policy and technology necessary to drive Hawaii's clean energy transformation agenda, an often understated objective is to ensure the resiliency, safety and security of Hawaii's critical energy infrastructure. Energy assurance planning for natural and man-made disasters and disturbances remains one of the most important tasks of key energy stakeholders. HNEI supports SB 909 SD1 because it appropriately addresses a number of housekeeping and substantive improvements to Hawaii's statutes regarding fuel storage and response and energy emergency management.

SB 909 SD1 effectively establishes chapter 125C to clarify the State's roles in energy assurance for overseeing all forms of energy shortage, disruption and emergencies. While the existing plan is heavily focused on petroleum, SB 909 SD1 provides a broader view that affords residents and critical energy consumers with greater coverage and protection potential.

Also addressed in SB 909 SD1 is a greater alignment of state policies on energy assurance with applicable federal, state, county and private sector energy resources, emergency management and energy assurance plans and programs. It brings stark attention to access and confidentiality of crucial energy data essential for energy assurance and response teams to effectively perform, particularly those with Emergency Support Function #12 (energy) responsibilities. SB 909 SD1 also incorporates recommendations found in the most recent federal Quadrennial Energy Review and other federal and state strategic and operational guidance documents.

Thank you for the opportunity to testify in support of SB 909 SD1.
