Testimony Presented Before the
Senate Committee on Water and Land
Wednesday, February 6, 2019 at 1:15 p.m., Conference Room 229
By
Judy Lemus, Interim Director
Hawai‘i Institute of Marine Biology
And
Michael Bruno
Vice Chancellor for Research
University of Hawai‘i at Mānoa

SB 1134 – RELATING TO HEEIA STATE PARK

Chair Kahele, Vice Chair Keith-Agaran and members of the committee:

As a unit of the University of Hawai‘i at Mānoa, the Hawai‘i Institute of Marine Biology is an official site partner of the He‘eia National Estuarine Research Reserve (HeNERR), and we support SB 1134.

Now that He‘eia has been designated as the 29th member of the NERRS in the Nation, the site partners have been working together with the recently-hired staff to implementing the HeNERR master plan. A key component of that master plan is to construct an education center in He‘eia State Park, but doing so will require legislative support to provide for a community-based long-term plan for the park, and design plans for the education center.

As such, we are fully in support of SB 1134.

Thank you for the opportunity to present this testimony.
