SCR 99 – REQUESTING THE DEPARTMENT OF HEALTH, DEPARTMENT OF HUMAN SERVICES, AND DEPARTMENT OF EDUCATION TO CONVENE AN INTERDEPARTMENTAL WORKING GROUP TO ADDRESS THE LACK OF CONSOLIDATED, CONSISTENT HEALTH SCREENING PROGRAMS IN PUBLIC SCHOOLS FOR CHILDREN IN THE STATE.

Chairs Baker, Ruderman and Kidani, Vice Chairs Chang, Rhoads and Kim, and members of the Committees:

Thank you for this opportunity to provide testimony in strong support of SCR 99.

This resolution recognizes that chronic absenteeism, poor health, and delayed or limited access to healthcare and preventive health services hinder students’ academic success and schools’ ability to meet the needs of the whole child. To address these challenges, this resolution establishes an interdepartmental working group to address the lack of consolidated, consistent health screening programs in public schools for children in the state and to submit a report to the Legislature no later than 20 days prior to the convening of the regular session of 2020.

National evidence shows the presence of school-based licensed health care professionals, including APRNs and registered nurses (RNs), decreases absenteeism and time away from class of children with acute and chronic conditions, increases parents’ and caregivers’ time at work, and principals’ and teachers’ instructional time (Wong, 2014).

The 2015 Legislature, in its wisdom, recognized that students must come to school healthy and ready to learn. Through Act 139, you provided fiscal support for school-based health services through a Department of Education (DOE) partnership with the
University of Hawai‘i at Mānoa School of Nursing and Dental Hygiene (UHMSONDH) that enabled Hawai‘i Keiki (UHM SONDH) to provide at least one school-based APRN to each of the 15 Complex Areas and 3 RNs to selected high need schools on four islands.

We are pleased to report the program has nurses on O‘ahu, Maui, Kaua‘i, and Hawai‘i Island. In the three-month period from October through December 2018 the program documented, with the school health aides (SHAs), that 5,300 students made 14,090 visits to the health rooms. Eighty-seven percent (87%) of students were able to return to class with an average time in the health room of 15 minutes for care for illness, injury or health guidance. Hawai‘i Keiki provided 85 consultations to DOE staff and parents regarding keiki with new or existing health conditions.

Since beginning this work, Hawai‘i Keiki has engaged with DOE, interdepartmental, and community partners to enrich, expand and coordinate the school-based health services available to students. Nurses engaged with DOE administrators, staff, and district-level Parent-Community Networking Centers (PCNC) to support wellness goals and with Parent-Teacher Associations (PTA) to develop emergency response protocols and to facilitate requisition of Automated External Defibrillators (AED) for schools. Other highlights include partnering with DOH for Stop Flu at School, Project Vision for vision screening, and leading a school-based UH health sciences team of child psychiatry, clinical pharmacy, and dental hygienists at one middle school.

Additionally, the project is supporting the successful statewide launch of a web-based school health record system that is capturing data to create school health profiles, ensure student health records are current (FERPA and HIPAA compliant), provide data to guide State planning and resource allocation, and share data across public agencies (via data sharing agreements). Hawai‘i Keiki has also identified the elements of Essential School Based Health Services.

UHM SONDH recognizes that more progress is needed to ensure that all keiki in Hawai‘i are healthy and ready to learn and is honored to serve on this interdepartmental working group. Therefore, the UHM SONDH respectfully requests that SCR 99 be adopted by this committee. Additionally, UHM SONDH asks the Committees to clarify the convener of this interdepartmental working group. We appreciate your continuing support for keiki, nursing, and school-based health care services.
