Quantitative Reasoning:

Quantitative reasoning requirements will be implemented over several years. We plan to have UHM start offering quantitative reasoning courses in 2016-2017 alongside Foundations Symbolic Reasoning (FS) courses. The UHM Foundations Symbolic Reasoning (FS) courses have been approved until summer 2018 and UHM departments can continue to offer them as FS until then. In fall 2018, all entering students will be required to fulfill the new general education requirements. Starting in fall 2018, students who entered UHM prior to fall 2018 will have the option of fulfilling the current general education requirements or “moving up” to the new general education requirements with the quantitative reasoning requirement(s). In fall 2018 and later, students under the previous general education requirements will satisfy the Foundations requirement with a Foundations quantitative reasoning course.

We had our first CAA meeting on Tuesday September 22 so we are still discussing issues.

Registration through STAR

Registration through STAR for transfer students is looking to pilot for the Fall 2016 semester with a small pilot group.

New Programs

Astrophysics
Astronomy
Atmospheric Sciences (Replaces Meteorology)
Environmental Design (Replaces Architecture)

New Exploratory codes are going into Banner. We are discussing how the implementation will be on campus.

EX-BA (Exploratory)
EXAH-BA (Exploratory Arts & Humanities)
EXB-BA (Exploratory Business)
EXED-BA (Exploratory Education)
EXHS-BA (Exploratory Health Sciences)
EXSS-BA (Exploratory Social Sciences)
EXST-BA (Exploratory STEM)

CTAHR Central Advising

CTAHR has a new “centralized” advising office with 3 new advisors. They have moved away from the department/faculty advisors to one central location for all CTAHR Majors to receive advising. Here is the website for contact information:
