College of Engineering  
University of Hawaii

**Request for the Authorization to Plan an Academic Program at Manoa: ATP 2**

**Degree proposed:** Bachelor of Science in Engineering Science

The ATP1 was approved on April 10, 2017.

A. **If a similar program exists, consult with other campus(es)**

As discussed in ATP-1, there is no similar program in the system.

B. **Impact on accreditation**

We will seek ABET accreditation for this new program. For BS in Engineering Science, ABET only requires the general criteria be satisfied. ABET has no additional program-specific criteria for Engineering Science, as they do for some other programs. The accreditation of this program does not affect in any way the accreditation of other engineering programs. Therefore, there is no adverse impact on the accreditation of any other programs or the university.

C. **Timeline for submission of new program proposal to:**
   a. Council of Chief Academic Officers (CCAO): Spring 2018
   b. BOR Committee on Academic and Student Affairs: Spring 2018
   c. Board of Regents: Spring 2018
