Today it is near impossible to gain access to college without computer access. Everything from admissions applications, program information, orientations, and student services programs, including advising services are relying more on the effective use of technology by students and faculty. We will explore how accessible emerging technologies are for students with a wide range of disabilities - including visual, hearing, physical, and learning; recent Department of Justice rulings regarding technology access at the post-secondary level, and suggestions for improving access.

- **Engage Students by Creating Online Tutorials**  
  Wayne Aguiran, Maui College  
  Crystal Alberto, Maui College  
  Rm. 505

How can your students be better prepared for advising appointments? This workshop will show advisors how to use video editing software to create effective online tutorials for a productive advising session.

- **Make the Most out of Your Academic Advising Website!!!**  
  Kiana Shiroma, University of Hawai‘i at Mānoa  
  Rm. 201

In this session, we will examine, reflect, and discuss how academic advisors can make the most out of their website using tools readily available through the internet.

Breakout Session III
2:30 pm – 3:15 pm

- **Social Media and Advising Today**  
  Jonathan Wong, Kapi‘olani Community College  
  Rm. 214

This presentation will provide a broad overview of social media and how it can be used to augment advising practices in today’s college institution.
• **Online Career Assessment: A Step in the Academic Advising Process**  
  *Gemma Williams, Kapi‘olani Community College*  
  Rm. 216

Participants will learn how an online career assessment, the FOCUSCAREER2 is utilized to assist exploratory students in developing options to discuss with their academic advisor—improving efficiency in advising.

• **Communication 2.0: Engaging Students Online, Where They Are!**  
  *Laura Pasquini, University of North Texas*  
  Rm. 201

Blogs, Microblogs, RSS, podcasts and several other forms of social media are all components to today’s advising communication plans. Communication and technology plans articulate what you want to accomplish, the ways in which you will accomplish it, with whom you will communicate, how communications help accomplish your goals, and how you will measure the results. This session will feature examples of social media and Web 2.0 tools that can enable advisors to reach students where they are. Participants will see examples of how to incorporate technology to produce a communication and technology plan that is user-friendly, cost effective, accessible, and assessable.
