

ANTHROPOLOGY COURSES 100 - 215

Campus	Course Alpha	Course No.	Title	Credits	Description
UHH	Anth	100	Cultural Anthropology	3	Man as a cultural and social being. The major concepts and conclusions of cultural anthropology. Biological, social, and linguistic foundations of culture. Basic research methodology.
UHH	Anth	110	Archaeology	3	Prehistoric archaeology; methods and techniques of excavation and analysis; brief survey of man's cultural growth in prehistoric times.
UHH	Anth	115	Human Evolution	3	The evolution of humans and their position among the primates. Human adaptation to the environment both in the past and present. Human biology with an emphasis on variation and its sources.
HawCC	Anth	121	Intro to Language	3	An introduction to the study of language from an anthropological perspective. Broad topics include ethnolinguistics (language and culture), sociolinguistics (language and society), psycholinguistics (language and cognition) and core subfields in linguistics, phonology (sound system), morphology (word structure) and syntax (sentence structure).
UHH	Anth	121	Intro to Language	3	Linguistically oriented approaches to human behavior, including ethnolinguistics, sociolinguistics, and psycholinguistics. The way language functions in culture, society, and the cognitive processes.
HonCC	Anth	135	Pacific Island Peoples	3	Introduction to the peoples and cultures of the Pacific Islands. Emphasis is on cultural change and comparisons with the Hawaiian ancient and modern cultures.
HawCC	Anth	150	Human Adaptations	3	A survey course of physical anthropology. Major topics include primate, human evolution, human adaptations to the present and future world and global variations in human cultural adaptations.
Hon CC	Anth	150	Human Adaptations	3	Human variation, physical and cultural, examined for its possible survival value under particular conditions from prehistoric times to present. How various ways of life and physical characteristics are adaptive or maladaptive. Implications for the future.
KapCC	Anth	150	Human Adaptations	3	examines the processes and stages of human evolution and analyzes human biological and cultural variation.
KauaiCC	Anth	150	Human Adaptations	3	Students explore the science of humanity: the evolution, distribution, and development of human beings and their culture through fossil, archaeological, and ethnographic records.
MauiCC	Anth	150	Human Adaptation	3	Examines prehistoric and recent developments of culture and common features and principle variations in cultural behavior.
WCC	Anth	150	Human Adaptation	3	Human variation, physical and cultural, examined for its adaptiveness. Alternative explanations of human behavior, with implications for the future.
LCC	Anth	150	Human Adaptations	3	A survey of physical and cultural anthropology. Major topics include human evolution, prehistoric development of culture, recent and contemporary human cultures, common features and principal variations in cultural behavior. [SS]
HonCC	Anth	151	Emerging Humanity	3	Introduction to the paleontology of human biological evolution and the archaeology of culture in the world prior to AD 1500
KapCC	Anth	151	Emerging Humanity	3	Introduces students to human biological evolution and the development of the human species. technology, language, and sociopolitical institutions

Campus	Course Alpha	Course No.	Title	Credits	Description
					across the world prior to circa AD 1500. Archaeology and physical anthropology provide a long-term global perspective on the emergence and development of humanity over the last 5 million years. Specific topics include (but are not limited to) the origins of plant and animal domestication, the genesis of cities and urbanism, and the political and ecological consequences of human impact on the natural environment.
UHM	Anth	151	Emerging Humanity	3	Introduction to the paleontology of human biological evolution and the archaeology of culture in the world prior to AD 1500. FG
LCC	Anth	151	Emerging Humanity	3	Introduction to the paleontology of human biological evolution and the archaeology of culture in the world prior to AD 1500. [SS]
HonCC	Anth	152	Culture and Humanity	3	Introduction to cultural anthropology. How human groups have come to terms with, modified, and even created their physical, social, natural, and supernatural environments, and endowed their lives with meaning and order.
KapCC	Anth	152	Global Perspectives on Humanity	3	is a critical examination of the modern era through the discipline of Anthropology. In this course, students will investigate the movements of European nations and the impact of colonization on Asia, North and South America and vast expanse of the Pacific Islands. We will study the progress of the great civilizations on earth and follow trends in globalization and cultural development in the post-1500 world. The course will provide students with a multicultural perspective on the world, and deepen their understanding from a global perspective.
UHM	Anth	152	Culture and Humanity	3	Introduction to cultural anthropology. How human groups have come to terms with, modified, and even created their physical, social, natural, and supernatural environments, and endowed their lives with meaning and order. Open to non-majors. A-F only. FG
UHM	Anth	165	Heritage Sites in Archeology	V	Combined lecture-lab-fieldwork course to introduce the concepts and practices of archeology, historical research, historic site preservation, and heritage management. Repeatable one time. A-F only. DS
HawCC	Anth	200	Cultural Anthropology	3	Humans as cultural and social beings. The major concepts and conclusions of cultural anthropology. Biological, social and linguistic foundations of culture. Research methods.
HonCC	Anth	200	Cultural Anthropology	3	This course is concerned with the nature of culture; an introduction to basic concepts of analyzing cultural behavior; patterning, integration, and dynamics of culture; culture and the individual and cultural change.
KapCC	Anth	200	Cultural Anthropology	3	examines the concept of culture with a focus on culture as an adaptive strategy developed by human populations in response to their environment
KauaiCC	Anth	200	Cultural Anthropology	3	offers an orientation to the nature of human culture. It includes basic concepts for analyzing cultural behavior.

Campus	Course Alpha	Course No.	Title	Credits	Description
MauiCC	Anth	200	Cultural Anthropology	3	Studies the concept of culture and basic tools for analyzing cultural behavior. Topics include patterning and integration, dynamics of culture, culture and the individual, cultural change, and anthropology and the future
UHM	Anth	200	Cultural Anthropology	3	Nature of culture; introduction to basic concepts for analyzing cultural behavior; culture and the individual. Required for anthropology majors. DS
WCC	Anth	200	Cultural Anthropology	3	Nature of culture, introduction to basic concepts for analyzing cultural behavior; patterning, integration, and dynamics of culture; culture and the individual.
LCC	Anth	200	Cultural Anthropology	3	A survey of cultural anthropology designed to provide an understanding of the concept of culture, the principles of field methodology, cultural diversity, some of the factors underlying this diversity and the universal aspects of culture. Aims at assisting the student to view objectively his/her own as well as other cultures. Additional topics include: the history and theory of cultural anthropology; culture and personality; processes of cultural change; and applied anthropology. [SS]
UHH	Anth	200	Cultures of the World: Regional Survey	3	The traditional cultures of various geographic areas of the world. Specific regions to be announced each semester: (b) Oceania, (c) East Asia, (d) South East Asia, (e) South Asia, (f) North America, (g) Africa, (h) South America, (i) Other. Repeatable
KauaiCC	Anth	205	Legends and Myths	3	course involves students in the study of folklore and investigation of the function of folktales, legends, and myths
HonCC	Anth	210	Archeology	3	An introduction to the methods and problems of archaeology. The course covers methods of excavation and examines famous prehistoric sites and the contributions they have made to an understanding of the origins and development of civilization.
KapCC	Anth	210	Archeology	3	introduces prehistoric archaeology, the methods and techniques of excavation and laboratory analysis, and a brief survey of man's culture growth in prehistoric times.
KauaiCC	Anth	210	Archaeology	3	Students explore the prehistory of the human species. The course surveys methods and techniques used in the study of prehistoric culture.
MauiCC	Anth	210	Archaeology	3	Introduces prehistoric archaeology. Surveys cultural growth in prehistoric times. Explains methods and techniques of excavation and laboratory analysis
UHM	Anth	210	Archeology	3	Introduction to prehistoric archaeology; methods and techniques of excavation and laboratory analysis; brief survey of theory in relation to change and diversity in prehistoric human groups. DS
LCC	Anth	210	Archaeology	3	Intro to prehistoric archaeology, methods and techniques of excavation and laboratory analysis, as well as a survey of human cultural growth and prehistoric times.
KauaiCC	Anth	212	Archaeological Field Methods	3	:Students gain practical field experience in archaeological methodology: surveying, mapping, illustration, excavation, and artifact retrieval.

Campus	Course Alpha	Course No.	Title	Credits	Description
HonCC	Anth	215	Physical Anthropology	3	An introduction to human evolution, heredity, primatology, early human populations, human growth and development, differences in modern people, and the development and differentiation of culture.
KapCC	Anth	215	Physical Anthropology	3	introduces physical anthropology: modern methods, techniques, and theories of the study of human evolution, primates, and physical adaptations of modern humans to their environment
KauaiCC	Anth	215	Physical Anthropology	3	explores the genetic heritage of human beings and their relationship to other animals, fossil antecedents, and status as Homo Sapiens in today's world.
MauiCC	Anth	215	Physical Anthropology	3	Introduces students to the study of human biological make-up, origins of that make-up, and the pre-history of human biological and cultural development
UHM	Anth	215	Physical Anthropology	3	Human evolution, primatology, human genetics, biological variation, human adaptability, growth and development. Co-requisite: 215L. DB
UHM	Anth	215L	Physical Anthropology Lab	1	Laboratory to accompany 215. Co-requisite: 215. DY
LCC	Anth	215	Physical Anthropology	3	Introduction to the methodology and principles of physical anthropology. Topics covered include: heredity, evolution, human variation, primatology, fossil (humans), and eugenics.
LCC	Anth	215L	Physical Anthropology Lab	3	This lab course is designed to accompany ANTH 215, Introduction to Physical Anthropology. Concurrent registration is required. The course provides additional experience and laboratory exercises in human and population genetics, human osteology, human variability, forensic anthropology, primatology, and paleoanthropology.
KauaiCC	Anth	220	Prehistory of Hawaii	3	development of prehistoric Hawaiian culture is explored through legendary, archaeological, ethnographic, and historical resources.
UHH	Anth	220	Archaeastronomy	3	The use of astronomical observation and mathematics for navigation agriculture, time keeping and calendar-making and their role in ancient cosmologies, mythology and religion. Astronomical theories of antiquity, etc.
KapCC	Anth	235	Intro to Pacific Island Peoples	3	introduces the traditional and contemporary cultures of the Pacific. Emphasis is placed on cultural change and comparisons between Hawai'i and other Pacific Island societies
MauiCC	Anth	235	Peoples of the Pacific	3	Surveys the cultural areas of the Pacific from pre-contact to present day. Covers prehistoric migrational patterns, historical movements, and present day distributions, including western colonization and current problems.
