

AUTOMATIC ADMISSIONS

UHCC TO UH FOUR-YEAR CAMPUSES

SPRING 2010, FALL 2010 & SPRING 2011

AUTOMATIC ADMISSIONS

UH COMMUNITY COLLEGES TO UH FOUR-YEAR CAMPUSES

SPRING 2010, FALL 2010 AND SPRING 2011 GROUPS

This brief provides information on three groups of students who were auto-admitted from the UH Community Colleges to the UH four-year campuses (Manoa, Hilo and West Oahu). The enrollment and persistence patterns of these groups are elucidated in the tables that follow. This narrative provide overview and summary analysis.

Of the 372 students in the automatic admissions group for spring 2010, 246 (66%) were enrolled at the intended four-year campus in fall 2010, 77 (21%) were enrolled at a UH Community College, 5 were enrolled at a 4-year campus other than the intended campus and 44 (12%) were not enrolled at any UH campus (Table 1). Of the 246 students enrolled in fall 2010 at the intended four-year campus, 235 (96%) persisted to Spring 2011 (Table 2).

Of the 325 students in the automatic admissions group for fall 2010, 208 (64%) were enrolled at the intended four-year campus in spring 2011, 59 (18%) were enrolled at a UH Community College, 4 were enrolled at a 4-year campus other than the intended campus and 55 (17%) were not enrolled at any UH campus. Of the 208 students enrolled in spring 2011 at the intended four-year campus, 186 (90%) persisted to Fall 2011.

Of the 537 students in the automatic admissions group for spring 2011, 366 (68%) were enrolled at the intended four-year campus in fall 2011, 80 (15%) were enrolled at a UH Community College, 8 were enrolled at a 4-year campus other than the intended campus and 83 (15%) were not enrolled at any UH campus. Persistence data are not yet available for this auto admissions group.

Most students who enroll at a four-year campus in the semester following admission do so at the intended campus. A few enroll at another four-year campus. Perhaps surprisingly, many students continue to be enrolled at a UH Community College, though the percentage has declined over the three groups so far examined, from 21% for the spring 2010 group to 15% for the spring 2011 group. Furthermore, a number of students who did not enroll immediately did so later. Of the 44 students from the spring 2010 group who did not enroll in fall 2010, 4 (9%) enrolled in Spring 2011. However, for the 55 students in the fall 2010 group who did not enroll in spring 2011, 22 (40%) enrolled in fall 2011.
