California State University, Monterey Bay offers a 10-week, Summer Ocean Science Research Experiences for Undergraduates (REU) Program in the Monterey Bay Region. Over the summer, students complete their own independent research project under the supervision of their research mentor, as well as complete a suite of professional development workshops and training.

Choose from Research Themes within: Oceanography, Marine Biology and Ecology, Ocean Engineering, and Marine Geology!

**Program Benefits**
- $5000 stipend
- Room and board provided
- Professional development workshops and technical skills training
- Research Supply Account
- Funding to present research at a conference

**Application Dates:**
