

Centralized Transcript Evaluation
UH System wide Task Force
Thursday, April 4, 2013, 11:00 am

Composition of the Task-Force: We had a good representation. As an Ad Hoc Committee, it was best that we limit it to a small group first.

Do we need additional members: Additional members identified from UHH will join when needed.

Task of the Centralized Transcript Evaluation Task Force, Visioning – What is the perfect Transcript Evaluation system for our students?: The committee had a general discussion of the tasks and the focus. Given the current initiatives like Ka `ie `ie between UHM and KapCC, it is best that we do not try to start something new. Within the Ka `ie `ie discussion, several good points came about such as the benefit of having counselors from UHM at KapCC, the discussion between programs, advising, and others. We thought these were also in line with best practices for transfer. There was general discussion of the impact of ZipTran or any automation system is implementing and where the coordination of this project may happen.

What are the current gaps to this perfect system? We had a general discussion of what's in place such as foundations that help with articulation, general articulation issues and how updated various campuses' tables were...talked about the push and pull between UHM and UHH.

Mapping: Talked in general about the impact of the CC to UHM degree overlay. Talked about how the study would help see how CC degrees fit at UHH, which is the current overlay project.

What resources do we need to accomplish this task? Who will be responsible for accomplishing the respective tasks? In what time frame will we accomplish this task? We talked about the tasks and goals being clarified at the next meeting so that we can be clear on what is needed, what structure, and how feasible it will be to implement any strategy.
