To whom it may concern:

I am writing this letter as my testimony in opposition of the proposed thirty meter telescope to be built on the summit of Mauna Kea. Please consider the detrimental environment and cultural effects that this construction will have on this pristine mountain. This is sacred land to the native Hawaiian people and should be treated with respect and regard. The advancement of science should not take precedent over the preservation of the environment and existing culture.

Mahalo Nui Loa,

Marissa Lebo
