Aloha,

1) You are putting waste, garbage on natural, sacred, resourceful land (water, etc). It environmentally unstable land. Is it not volcanic? 500 years from now it's a good possibility it will be melted into rock.

2) This is a National Treasure. It's a disrespect to US and Hawaiian History.

3) Hawaiians, cultured Hawaiians were banned from their practices. In my family it was taught not to be niele (nosey). I was taught to care for my surrounding and provide. In the sake of science they plot to destroy our culture and our being as Hawaiians it's a deep pain. Our souls hurt.

Thank You,

Brittany Tiare Louise Kehaulani Bertolucci
