Aloha,
I am writing to ask that you vote in opposition of the TMT project on Mauna Kea. At first I was undecided on how I felt about the topic. I am a big fan of Astronomy and science of the future. At the same time I am a big advocate of preserving the undeveloped land of Hawaii. And after much thought, I believe that building the TMT would not be worth it. Not only would it cause desecration to Sacred Lands but it would also potentially cause long term pollution to our island. I feel that there is already too many Telescopes up there that need to be removed. I do appreciate the discoveries that are made, but I feel that we need to focus on the earth right now. With all of the environmental problems now days we need to get back to the ways of old Hawaiians and re-learn to live in harmony with nature as they did. If we don't our grandchildren are gonna be living in a very different Hawaii from the one that we grew up in.

Thank You,
Remy Derochemont
