15 April, 2015

Aloha University of Hawaii Board of Regions I strongly appose the building of the Thirty Meter Telescope (TMT) because its being built on top the most sacred mountain in the world, my kupunas’ Mauna and many others. This issue is huge to not only to the aina warriors of Hawaii but to People all over the world. I honestly don't get how you guys don't see this will affect the world if this goes through all native people, not only in Hawaii will become a voice no more or lose most of it. If you guys didn't know already under Mauna kea is Hawaii islands water source and while you guys dig and stuff all those poisons seeps into the aquifer and into our people. There's already 13 telescopes up there and some are not even being used so please stop this desecration on the worlds most sacred Mountain.

Kapu Aloha, Kona Kelekolio
