Aloha,

My name is Mike and I am fortunate enough to live here in Hawai'i. I am writing this to you because I oppose the further desecration of Mauna Kea. It is a shame that Mauna Kea already has 12 telescopes atop it's summit, many of them are currently non functioning. Those were supposed to come down already and now we are thinking of putting another telescope up there? Why are we not protecting our land, we have finite resources and yet we still try to find ways to reduce even those. Please listen to all those who live here in Hawai'i and those lending their voices all over the world. We must preserve our island for future generations, just like those who came before us.

Aloha aina
Mike
