Aloha e Board of Regents,

I would like to submit my testimony against the construction of the Thirty Meter Telescope atop Mauna Kea. It is not too late to turn back previous decisions. It is not too late to do what is pono. Please do not ignore this out-pouring from community members nor the recent findings of the higher water table. Please do not ignore the undeniable genealogical connections of the kanaka maoli to Mauna Kea nor the cultural and environmental sanctity of this mountain. Please listen.

Mahalo nui,

Emily Leucht
