Aloha University Board of Regents,

I am an avid amateur astronomer. I admit to loving so many images that Keck has produced.

I oppose the TMT being located where it is presently slated to be for these reasons:

- Watershed pollution
- Sacred burial grounds
- Tallest mountain in the world measured from foot to head shouldn’t have so many buildings on top, would flattening 4-5 acre spots of Everest for Telescopes be acceptable?

Is there any possibility that the TMT could be relocated?

Thanks for hearing me out,
thorn
