

PILOT ASSESSMENT RESULTS

Institution:

Course Title:

Did you carry out the assessment(s) as planned and reported on the Pilot Assessment Plan? (If the assessment(s) you actually performed differed from what you previously reported, please complete a revised version and submit it with this report.)

Please complete a separate chart for each comparison made (for example, if you conducted more than one pilot or if you used more than one assessment method.)

1. Please report the results of your assessments using the appropriate summary chart below.

Measures:

In the performance sections of the chart, report the mean score and standard deviation for each group of students assessed.

	Total # of Students	Performance on Pre-Assessment (if applicable)	Performance on Post-Assessment
Traditional Course:			
Timeframe:			
Redesigned Course:			
Timeframe:			

In the performance sections of the chart, report the percentage of students at each level of performance (for example, the percent earning a grade of "a", percent "b", etc.: or the percent rated at each level of a scoring rubric.)

Traditional Course

Timeframe:			
	Score/Grade	Number	Percentage
Total			100%

Redesigned Course

Timeframe:			
	Score/Grade	Number	Percentage
Total			100%

2. Were any difference in performance between the two groups statistically significant?

<---Yes. At what level of confidence?

<---No

3. Did the two groups of students assessed differ from one another in any important ways (e.g. gender balance, prior preparation levels, motivation, etc.)? If so, please describe these briefly:

4. Did you learn anything else about the impact of the redesign on students (e.g. changes in student attitudes toward the subject, better performance in downstream courses in the same discipline, etc.)? If so, please describe these differences briefly:
