SB 2379 – RELATING TO INVASIVE SPECIES

Chairs Wakai and Gabbard, Vice Chairs Slom and Nishihara, and members of the committees, thank you for the opportunity to testify in support of SB 2379, which mandates the Department of Agriculture to establish a little fire ant Pesticide Treatment Coupon Pilot Project for Hawai'i County, and a site map of little fire ant infestations on the Island of Hawai'i, and appropriates funds for these purposes.

SB 2379 points out the problem of people “left behind” in the wake of an invasive pest moving across the State, and offers a creative approach to assist them, and to collect current information on the distribution of that pest. Involvement of the public in efforts to control invasive species, given the limited resources available to government agencies, is a useful approach, and the pilot project could create a model for management of other persistent invasive species in the state.

We defer to the Department of Agriculture on fiscal and management implications of SB 2379, but we support the intent of the bill involve the public in efforts to control invasive pests.
