

Hawai'i Natural Energy Institute

School of Ocean & Earth Science & Technology

Water, Energy, and Soil Sustainability

This seminar will introduce a new research program that promotes the integrated effort of UH faculty, Hawaii industry, State government, venture capital, legal/regulatory authorities. and private sector persons with an interest in providing for the

water, energy, and soil sustainability (WESS) of Hawaii. In addition to presenting the long-term vision and goals of the program, an overview of current projects will be presented, along with preliminary results.

Michael J. Cooney

Associate Researcher Hawai'I Natural Energy Institute
