

# ALOHA BOWL

## HAWAI'I OCEAN SCIENCES BOWL

University of Hawai'i Sea Grant College Program

The National Ocean Sciences Bowl was created in 1998 in honor of the International Year of the Ocean. Since its inception, the competition has grown to include 25 regional competition locations with 300 schools and over 2,000 students participating annually.

The University of Hawai'i Sea Grant College Program is proud to be the organizer of the 2012 regional Ocean Sciences Bowl for Hawai'i, also known as the Aloha Bowl. This educational program is a nationally recognized and highly acclaimed high school academic competition that provides a forum for talented students to test their knowledge of the marine sciences including biology, chemistry, physics, and geology. One of the long-term goals of the program is to foster the next generation of marine scientists, educators, and policy makers.

This year we will be hosting 16 high school teams from schools throughout the state of Hawai'i and Guam. The members of the winning team will represent their school in the National Ocean Science Bowl competition held this year in Baltimore, Maryland.

Please contact the regional coordinators if you would like to attend this exciting competition or for more information.
