Abstract

The mission of Martin Defense Group (MDG) is to convert research into products by leveraging emerging technologies and applying them to National problem sets with speed, trust, and expertise. We are built upon core engineering expertise that utilizes the latest design tools including: CFD analysis, finite element analysis, sea-keeping analysis, mechanical systems design, hydro-mechanical simulation, and concept design. This presentation will dive into MDG's technology portfolio of Platform Design & Prototyping, Autonomy & Data Science, Power & Energy, Advanced Materials & Manufacturing.
