

## STRIDE Request for TB Test Results

### Tuberculosis Testing Information Sheet

Hawai'i has one of the highest rates of tuberculosis in the nation. In 2004, Hawai'i reported 9.2 cases of TB per 100,000 population (the national rate is 4.9 cases per 100,000 population). Because mentors will be working directly with young adults, they are required to take a TB test before being matched with a mentee. **The results must be provided to STRIDE for your file.**

You may get tested at your primary care physician **OR**

You may get tested for free at the following locations:
