Specific Outcomes from UHM Proposal:		
1) Development of better institutional data gathering and analysis capability using information technology tools that can deliver data to every desktop 2) Enhanced staffing, fiscal support and functionality of the academic and physical infrastructure in support of student learning 3) A deeper understanding of student learning at the institutional level 4) A better departmental and campus-wide assessment process 6) Establishment of community building infrastructure including first year programs, better advising support, a student success center and realigned faculty development office 7) Significant progress towards our campus master plan, expansion of dorm space, classroom renovations	1) Development of better institutional data gathering and analysis capability using information technology tools that can deliver data to every desktop 2) Enhanced staffing, fiscal support and functionality of the academic and physical infrastructure in support of student learning 6) Establishment of community building infrastructure including first year programs, better advising support, a student success center and realigned faculty development office 7) Significant progress towards our campus master plan, expansion of dorm space, classroom renovations	1) Development of better institutional data gathering and analysis capability using information technology tools that can deliver data to every desktop 2) Enhanced staffing, fiscal support and functionality of the academic and physical infrastructure in support of student learning 3) A deeper understanding of student learning at the institutional level 4) A better departmental and campus-wide assessment process 5) Development of core competencies and methods of assessing campus wide learning outcomes
WASC Special Visit Final Report Recommendations October 29-30, 2007		
4) Significant progress made in articulating and assessing student learning outcomes, particularly general education, and a structure is now in place to support faculty in their work with assessment. The campus rightfully stresses importance of advising, and plans to expand the number of advisors should be pursued expeditiously 5) Mānoa should continue to focus on and clarify the Mānoa experience, particularly valuing diversity and the Hawaiian culture, and should incorporate this area into the campus’ research enterprise.	2) Chancellor ensures that Mānoa’s planning is fully comprehensive, incorporating library, graduate student, and research issues the other essential matters now covered by the Institutional Proposal. 3) Adequacy of financial resources is a serious matter especially with regard to campus facilities, library support, program assessment and student support (including graduate students), and upcoming faculty renewal.	1) President and Chancellor continue to define and communicate the respective roles and responsibilities of the UH System and Mānoa, and maximum authority should be delegated to the Chancellor, especially with regard to continuing devolution of responsibilities to Mānoa.
