

## **Resolution**

Whereas the University of Hawaii has initiated consultations with affected parties including the Manoa Faculty Senate about establishing an Applied Research Laboratory at UHM (APL-UHM),

And whereas these consultations are ongoing,

And whereas there are significant issues of institutional structure and research integrity still outstanding,

Therefore, be it resolved, the Manoa Faculty Senate requests that the Board of Regents make permanent status for any ARL-UHM contingent upon acceptance by the Manoa Faculty Senate.

CPM: Classified Research Issue

A resolution on the conduct of classified research at the University of Hawaii.

1. WHEREAS: The conduct of certain acceptable types of classified research, in the presence of proper governance and oversight, can benefit both the University of Hawaii and the polities of which we are a part;
2. WHEREAS: The conduct of classified research, in the absence of proper governance and oversight, can also significantly degrade the academic ambience of a university by, for example:
  - A. Allowing external agencies to bar certain students from research activities for which they cannot obtain clearance;
  - B. Permitting faculty and student research that may not be examined and properly taken into account in tenure and promotion decisions and in certification for academic degrees;
  - C. Permanently preventing the publication of research findings and even wholly concealing the existence of research activities;
  - D. Compromising the approval and review procedures routinely used to ensure that proper academic standards are observed: i.e., human studies, research ethics, animal care, hazardous materials, etc.
3. WHEREAS: There may be opportunities to support the conduct of classified research in ways that respect the four areas of concern listed above as A-D;
4. BE IT RESOLVED: That the UH Administration submit to the Manoa Faculty Senate, for its approval, a draft of policies and procedures that adequately address the four areas of concern listed above.
5. BE IT RESOLVED: That the Manoa Faculty Senate stands ready to cooperate with the Administration in drafting a satisfactory policy.
