Notes: The certificate in Dental Hygiene is classified in IPEDS as a credential of "at least 2 years, but less than 4 years" (level 04). The certificate program was stopped-out in May 1996 and terminated effective Spring 1998.

The Architecture doctorate degree (Arch.D.) was established in July 1999. The University of Hawai'i at Manoa recognizes the Arch.D. as a first professional degree. However, IPEDS categorizes the Arch.D. as a doctorate. Therefore, doctorate and professional degree totals listed here reflect IPEDS requirements.

Degrees that were granted but were missing data (e.g., degree type, degree program, etc.) are listed as "no data" and are not reported during IPEDS collection. The data are provided here, but have not been included in the total degree count.
