This report presents information on total enrollment at the University of Hawai'i. Enrollment counts are given for each campus and include both headcount and full-time equivalent (FTE) numbers. Included in the report are enrollment counts in both regular credit and continuing education programs. Historical data are provided for the period from Summer 1987 to Summer 1997.

REPORTING METHODOLOGY

Enrollment counts in regular credit programs are unduplicated headcounts within each campus. Aggregate counts for the University of Hawai'i for regular credit students are duplicated only to the extent that a given student may be enrolled at more than one campus. However, with the exception of continuing education credit courses at UH Mānoa and Honolulu CC and certain non-credit programs offered by the College of Continuing Education at UH Mānoa, continuing education enrollment counts are registration counts - that is, a given student is counted each time he/she enrolls in a course. Although generally lower, unduplicated counts are preferred and are used whenever available. Since the tables in this report combine unduplicated and duplicated counts, the reader is strongly advised to exercise caution when drawing conclusions based upon the aggregate totals.

In compiling the historical series shown in Table 3, adjustments were made to standardize the data reporting and to correct for late additions. The numbers shown may therefore differ from those reported previously. While reporting for regular credit programs has been standardized for all campuses, reporting for continuing education courses has not. The reader is further advised to exercise caution when drawing conclusions based upon this historical series.

HIGHLIGHTS

Total enrollment at the University of Hawai'i reached 68,141 for Summer 1997, down 9% from Summer 1996 (Tables 1 & 3 and Figure 1). Increases were registered at UH Hilo (18%), Hawai'i CC (97%), Kapi'olani CC (3%), Leeward CC (17%), Maui CC (9%) and Windward CC (40%). Decreases were measured at UH Mānoa (-17%), UH-West O'ahu (-28%), Honolulu CC (-39%), Kaua'i CC (-27%) and the Employment Training Center (-37%).

Due to the nature of continuing education reporting, however, the reader is advised to compare these figures with those given for regular students in Table 1 of the Summer Enrollment Report for the University of Hawai'i, Summer 1997. Continuing Education counts tend to vary greatly from one term to the next, and year to year, and the noted percentage changes may be misleading.
Enrollment counts for continuing education programs made up the majority of all enrollment for Summer 1997 (Table 4 and Figure 4). For the University of Hawai‘i system, continuing education enrollment accounted for 74.5% of all enrollment, while regular credit programs accounted for 25.5%. Continuing education credit enrollment accounted for 5.9% of all enrollment, while continuing education non-credit enrollment accounted for 68.6%. With the exception of UH-West O‘ahu (which offered no continuing education courses), all the campuses reported more continuing education enrollment than regular credit enrollment. The reader is cautioned that continuing education counts are duplicated registration counts, and greater numbers do not necessarily imply greater commitment of resources.

Total enrollment at the University of Hawai‘i grew from Summer 1987 through Summer 1991, when it exceeded 91,000 (Table 3 and Figure 1). Thereafter, total enrollment declined through 1995 to just under 72,000. The increase measured in Summer 1996, to just under 75,000, was the first increase in five years. For Summer 1997, total enrollment dropped again. Both regular credit and continuing education declined from Summer 1996 to Summer 1997 (Figure 2).

Regular credit enrollment declined as a proportion of total enrollment from 37.0% in Summer 1987 to 22.3% in Summer 1991 (Table 4). Since then it has risen to 25.5%. Continuing Education enrollment increased as a proportion of total enrollment from 63.0% in Summer 1987 to 77.7% in Summer 1991. Since then it has declined to 74.5%. Regular credit enrollment in Summer 1997 was about the same as in Summer 1987. In contrast, continuing education enrollment has grown by 67% since Summer 1987, almost all of this growth occurring in non-credit course enrollments. The reader is cautioned that continuing education non-credit enrollment counts are subject to greater variability and reporting irregularities than are regular credit and continuing education credit enrollment counts.

1/ These counts are duplicated to the extent that students enrolled at two or more campuses / programs are counted at both campuses / programs.

2/ UH Manoa and Honolulu CC continuing education credit counts are unduplicated headcounts; all other counts are registration counts.

3/ The total for UH Manoa regular students is the sum of Summer Session I and Summer Session II enrollment. This number is a duplicated count to the extent that any students attend both summer sessions.

1/ The counts given here are a sum of unduplicated headcounts in regular credit courses at each campus and unduplicated headcounts and duplicated registration counts in both credit and non-credit courses in continuing education. Since non-credit counts are not as rigorously audited as regular credit counts, the reader is advised to exercise caution when drawing conclusions based upon this historical series.

2/ Beginning in Fall 1991, Hawai'i Community College was transferred organizationally from UH Hilo to the UH Community Colleges. Data for prior years have been adjusted accordingly.
