Do you want to know what **PARALLEL COMPUTING** is all about?

Apply for this 2-week session, and you will:

- Build a mini-cluster with 4 desktop PCs
- Learn to parallelize serial code
- Visit Maui High Performance Computing Center
- Parallelize & run code on Maui’s 32-processor supercomputer
- Visualize large data sets with state-of-the-art software

Open to all undergraduates in Computer Science, Engineering, Mathematics, or related fields. Some graduate slots available.

Expenses will be covered for students who are accepted into the program. Space is limited to apply early!
