Welcome

Your Nortel IP Phone 1220 brings voice and data to your desktop. IP Phone 1220 can directly connect to a Local Area Network (LAN) through an Ethernet connection.

This guide contains the following topics:

- “Using your IP Phone 1220” on page 23
- “Installing your IP Phone 1220” on page 31
- “Customizing your IP Phone 1220—basic features” on page 37
- “Customizing your IP Phone 1220—advanced features” on page 60
- “Operating your IP Phone 1220” on page 80
- “Troubleshooting Your IP Phone 1220” on page 146
- “IP Phone 1200 Expansion Module” on page 151

In this guide, self-labeled line or programmable feature key labels appear beside the keys, and context-sensitive soft key labels appear directly above the keys.

Figure 1 on page 9 shows the IP Phone 1220 key labels.

**Figure 1: Programmable feature keys and context-sensitive soft keys**
Your IP Phone 1220 supports the following features:

- four context-sensitive soft keys (self-labeled)

  *Note:* Context-sensitive soft keys are Nortel Communication Server dependent. Some IP Phones are not configured to support context-sensitive soft key functionality. Contact your system administrator for further details.

- six specialized fixed keys
  - Quit
  - Directory
  - Message (Inbox)
  - Redial
  - Services
  - Conference

- six fixed call-processing keys
  - Mute
  - Handsfree
  - Goodbye
  - Applications
  - Headset
  - Hold

- wall-mountable
- LCD display screen
- high-quality speaker phone
- volume control keys to adjust the ringer, speaker, handset, and headset volume
- hearing aid compatibility
- Second Page Functionality to access a second page of features using the left and right keys
- eight programmable feature keys:
  - four keys for user-defined feature key labels
  - four lines or features you can access through Second Page Functionality
- headset jack
• handset jack
• 10/100 Ethernet ports
  • one Ethernet port for LAN connection
  • one Ethernet port for optional PC connection
• Power over Ethernet (PoE) or power through a supported AC adapter
• support to Network Diagnostic Utility
• Accessory Expansion Module (AEM) port to connect the Expansion Module

Figure 2 on page 11 shows the IP Phone 1220.

**Figure 2: IP Phone 1220**
Regulatory and safety information

This equipment has been tested and complies with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used according to the instructions, can cause harmful interference to radio communications. However, there is no guarantee that interference cannot occur in a particular installation. If this equipment causes harmful interference to radio or television reception, which you can determine by turning the equipment off and on, you are encouraged to try to correct the interference by performing one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced technician for help.

This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Warnings

- This is a Class B product. In a domestic environment this product can cause radio interference; in which case, you must take adequate measures.
- Operation is subject to the following two conditions: (1) this device cannot cause interference, and (2) this device must accept interference, including interference that can cause undesired operation of the device.

**Note:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.
The user should not make changes or modifications not expressly approved by Nortel Networks. Any such changes could void the user’s authority to operate the equipment

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Note:** The user should not make changes or modifications not expressly approved by Nortel Networks. Any such changes could void the user’s authority to operate the equipment.

This Class A digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

**Warnings:**

- This is a Class A product. In a domestic environment this product can cause radio interference in which case the user must take adequate measures.
- Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
- Privacy of communications may not be ensured when using this telephone.
- Use the following procedure to prevent radio interference to the licensed service, this device must be operated indoors only and should be kept away from windows to provide maximum shielding.

Other

**US/Canada:** Hearing Aid Compatibility (HAC) as per FCC Part 68
This equipment complies with the CE Marking requirements.

**EU Countries:** This device complies with the essential requirements and other relevant provisions of Directive 1999/5/EC. A copy of the Declaration may be obtained from Nortel Networks GmbH address: Ingolstaedter Strasse 14-18, 80807 Munich Germany
**Connecting Power**

Use only Nortel-approved Limited Power Source 48 VDC 520 mA (FSP Group Inc. Model: FSP025-1AD207A) with the IP Phone.

**Connecting to the Local Area Network**

Severe damage to your IP Phone can occur if you plug the phone into an ISDN connection. Consult your system administrator to ensure you plug your IP Phone 1220 into a 10/100 BaseT Ethernet jack.

**Operation**

The earpiece and mouthpiece of the handset can attract and retain small objects.
Location
Nortel recommends that you install your IP Phone 1220 away from direct sunlight.
How to get help

This section explains how to get help for Nortel products and services.

Getting Help from the Nortel Web site

The best way to get technical support for Nortel products is from the Nortel Technical Support Web site:

www.nortel.com/support

This site provides quick access to software, documentation, bulletins, and tools to address issues with Nortel products. More specifically, you can:

• download software, documentation, and product bulletins
• search the Technical Support Web site and the Nortel Knowledge Base for answers to technical issues
• sign up for automatic notification of new software and documentation for Nortel equipment
• open and manage technical support cases

Getting Help over the phone from a Nortel Solutions Center

If you do not find the required information on the Nortel Technical Support Web site, and you have a Nortel support contract, you can obtain help over the phone from a Nortel Solutions Center.

In North America, call 1-800-4NORTEL (1-800-466-7835).

Outside North America, to obtain the phone number for your region go to www.nortel.com/callus

Getting Help from a specialist by using an Express Routing Code

Use the following procedure to access some Nortel Technical Solutions Centers, you can use an Express Routing Code (ERC). Your call is routed to a specialist in your Nortel product or service. Use the following procedure to locate the ERC for your product or service, go to

www.nortel.com/erc
Getting Help through a Nortel distributor or reseller

If you purchase the service contract for your Nortel product from a distributor or an authorized reseller, contact the technical support staff of the distributor or reseller.
Using your IP Phone 1220

After you familiarize yourself with the IP Phone 1220 features, you can start to use the phone. This section describes how to use the IP Phone 1220.

Getting started

The following section introduces the important details of the IP Phone 1220. Carefully read every section before you operate the new IP Phone 1220.

• “Before you begin” on page 23
• “IP Phone 1220 controls” on page 24
• “IP Phone 1220 display” on page 29
• “Installing your IP Phone 1220” on page 31

Before you begin

Take the appropriate precautionary measures before you connect the IP Phone 1220.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consult your system administrator to ensure that you plug your IP Phone into a 10/100BaseT Ethernet jack. To avoid severe damage to your IP Phone, do not plug your IP Phone 1220 into a regular phone jack.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use your IP Phone 1220 in an indoor environment only.</td>
</tr>
</tbody>
</table>
Using your IP Phone 1220

IP Phone 1220 controls

This section describes the controls on the IP Phone 1220. Depending on your geographic region, the IP Phone 1220 includes key caps with English text labels. In this document, text in parentheses indicates the labels that appear on the key caps, for example, (Services).

Context-sensitive soft keys are below the LCD. The soft key label is dynamic and depends on the active feature. The label length is a maximum of six characters.

A triangle before a soft key label, indicates the feature is active.

Press the More key to access the next layer of context-sensitive soft keys (self-labeled).

The four keys on either side of the LCD are self-labeled line or programmable feature keys, with labels on the LCD. These keys also function as line (DN) keys.

A steadily lit icon beside a line (DN) key indicates the line is active. A flashing icon indicates the line is on hold. When a call arrives on a DN key which is not on the currently displayed page of keys, the IP Phone automatically displays the page with the active key.
A steadily lit icon beside a feature key indicates the feature is active. A flashing icon indicates the feature is being programmed. When a call arrives on a feature key that is not on the currently displayed page of keys, the IP Phone automatically displays the page with the active key.

Use the Volume control buttons to adjust the volume of the ringer, handset, headset, speaker, and Handsfree features. Press the upper button to increase the volume, and press the lower button to decrease the volume.

Press the Mute key to listen to the calling party without transmitting voice from your phone. Press the Mute key again to return to a two-way conversation. Mute key functionality applies to handsfree, handset, and headset modes.

The Mute indicator LED, embedded in the Mute key, flashes to indicate the sound is muted.

Press the Handsfree key to activate handsfree mode.

Note: The Handsfree LED indicator, located on the Handsfree key, lights to indicate that the handsfree is in use.
Use the **Navigation** keys to scroll through menus and lists that appear on the LCD screen. The outer part of this key cluster is used for up, down, left, and right movements.

Use the **Up** and **Down** keys to scroll up and down the menu, and the **Left** and **Right** keys to position the cursor. In some dialog boxes that appear on your IP Phone, you can also use the **Left** and **Right** keys to select editable fields. Press the **Right** key to select the field below the current selection, or the **Left** key to select the field above the current selection.

Press the **Enter** key, at the center of the Navigation key cluster, to confirm menu selections.

In most menus, you can use the **Enter** key instead of the **Select** or **OK** soft key.

Press the **Hold** key to place an active call on hold. Press the **Hold** key again or the press flashing line (DN) key to return to the caller on hold.

Press the **Applications** key to access external server applications.
Press the **Headset** key to answer a call using the headset or to switch a call from the handset or handsfree to the headset.

*Note:* The Headset LED indicator, located on the **Headset** key, lights to indicate that the headset is in use.

Press the **Goodbye** key to terminate an active call.

When a message is waiting, the red **Visual Alerter/Message Waiting** indicator LED at the top center of the phone flashes. The indicator also flashes to indicate an incoming call. Each alert has a unique flash cadence.

Press the **Conference** Key (programmable memory button) to initiate conference.

Press the **Quit** key to exit an active menu or dialog box. The status of the active call remains unaffected if you press the **Quit** key.

Press the **Redial key** to access the redial list.

Press the **Message** key to access your voice mailbox when the message waiting indicator flashes.
Press the **Directory** key to access directory services.

Press the **Services** key (programmable memory button) and use the navigation keys to access the following items:

- **Telephone Options**
  - Volume adjustment
  - Contrast adjustment
  - Language
  - Date/Time
  - Display diagnostics
  - Local Dialpad Tone
  - Set Info
  - Diagnostics
  - Call Log Options
  - Ring type
  - Call Timer
  - On-hook default path
  - Change Feature Key Label
  - Name Display Format
  - Live Dialpad

- **Password Admin**
  - Station Control Password
Note: The Password Admin menu is not available on all IP Phone 1220 phones. Consult your system administrator.

- Display Network Diagnostics Utilities
  Only your system administrator or service provider can use Display Network Diagnostics Utilities to perform Internet diagnostics.

- Virtual Office Login and Virtual Office Logout (if Virtual Office is configured)

Press the Services key twice to access the Local Tools menu, and use the navigation keys to access the following items:

- 1. Preferences
- 2. Local Diagnostics
- 3. Network Configuration
- 4. Lock Menu

If you attempt to access the Local Tools menu and a dialog box appears that prompts you for a password, contact your system administrator.

**IP Phone 1220 display**

Your IP Phone 1220 display is divided into two display areas:

- Four user-defined feature key labels appear on the upper section.
- Single-line information for items such as Date and Time, Calling Party Information, Feature Status Information, Options Information, and Directory Information appear in the middle section.
- The lower display area provides labels for the four context-sensitive soft keys.
Figure 3 on page 30 shows the IP Phone 1220 LCD screen.

**Figure 3: IP Phone 1220 display**

---

**Call features and Flexible Feature Codes**

Some features are not available on all telephones. Call features and Flexible Feature Codes (FFCs) must be assigned to your telephone and supported by system software. Contact your system administrator to configure these features and codes on your telephone.

Use Table 11 on page 149 to record the FFCs that your system administrator assigns to your phone.
Installing your IP Phone 1220

This section details the steps and precautionary measures to perform during IP Phone installation. The standard IP Phone 1220 package includes the following accessories:

- foot stand
- handset
- handset cord
- 2.1 m (7 ft) CAT5 Ethernet cable
- number plate and lens

![CAUTION]
Ensure that the protective rubber cap on the Accessory Expansion Module (AEM) port is in place when the port is not in use. An improper connector can damage the IP Phone. Consult your system administrator for additional details.

Figure 4 on page 32 displays the connections on an IP Phone 1220.
Perform the following steps to connect the components of the phone and to install the phone.

- “Attaching the foot stand (optional)” on page 33
- “Connecting the handset” on page 33
- “Connecting the headset (optional)” on page 33
- “Connecting the power (optional)” on page 34
- “Connecting the LAN Ethernet cable” on page 35
- “Connecting the PC Ethernet cable” on page 35
- “Wall-mounting the IP Phone (optional)” on page 36
Attaching the foot stand (optional)

Attach the foot stand in the appropriate slots depending on the desired angle for your IP Phone. If you insert the foot stand into the upper slots, your IP Phone sits at a 25-degree angle. If you insert the foot stand into the lower slots, your IP Phone sits at a 55-degree angle.

If you install your IP Phone on a wall, do not attach the foot stand.

1. Align the bottom tabs on the foot stand with the position 1 slots or the position 2 slots on the back of your IP Phone.
   In position 1 the IP Phone sits at a 25-degree angle.
   In position 2 the IP Phone sits at a 55-degree angle.
   Figure 4 on page 32 shows the slots on the back of the IP Phone.

2. Press the foot stand into the slots until it snaps into place.

Connecting the handset

Use the following procedure to connect the handset to the IP Phone.

1. Plug the end of the handset cord with the short straight section into the handset.

2. Plug the other end of the handset cord with the long straight section into the handset jack marked with the symbol on the back of the IP Phone.

3. (Optional) Thread the cord through the channel in the foot stand (if installed) so that it exits on the side of the foot stand.
   Figure 4 on page 32 shows the connections on the back of the IP Phone 1220.

Connecting the headset (optional)

If you have a headset, you can connect the headset to the IP Phone. For information on how to use your headset with your IP Phone, see “Using a headset” on page 89.
1. Plug the headset cord into the headset jack on the back of the IP Phone marked with the symbol.

Figure 4 on page 32 shows the connections on the back of the IP Phone 1220.

2. Thread the cord through the channel in the side of the foot stand.

3. Set up the headset according to the headset instructions.

**Connecting the power (optional)**

Your IP Phone 1220 supports AC power and Power over Ethernet (PoE). For AC power, use only the Nortel-approved Global Power Supply (N0146475) and the country-specific IEC cable that you can order separately. To use PoE, your connected LAN must support PoE.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Use your IP Phone 1220 with the approved Nortel AC Adapter (model #N0089601).</td>
</tr>
</tbody>
</table>

*Note:* Your IP Phone 1220 supports AC power and PoE options, including IEEE 802.3 standard power. To use local AC power, you can order separately the optional AC adapter. To use PoE, where power is delivered over the CAT5 cable, the LAN must support PoE, and you do not need an AC adapter.

1. Connect the DC barrel connector to the power jack on the back of the IP Phone.

2. Thread the cable through the channel in the foot stand to secure the cable.

3. Plug the country-specific IEC cable into the Global Power Supply, and then plug the Global Power Supply into the nearest AC power outlet.

Figure 4 on page 32 shows the connections on the back of the IP Phone 1220.
Connecting the LAN Ethernet cable

*Note:* Your IP Phone 1220 supports both AC power and PoE options, including IEEE 802.3 standard power. To use local AC power, you can order separately the optional AC adapter. To use PoE, where power is delivered over the CAT5 cable, the LAN must support PoE, and you do not need an AC adapter.

Connect your IP Phone to your LAN using a CAT5e Ethernet cable to enable full functionality of your IP Phone. If your Ethernet port is equipped with Power over Ethernet (PoE), your IP Phone can be powered through the LAN port. Do not extend the LAN Ethernet cable outside the building.

1. Plug one end of the supplied LAN Ethernet cable into the LAN Ethernet port on the back of your IP Phone marked with the ⚡ symbol.
2. Thread the cable through the channel in the foot stand.
3. Connect the other end of the cable to your LAN Ethernet connection. The LAN LED on the back of the IP Phone lights when a LAN connection is established.

Figure 4 on page 32 shows the connections on the back of the IP Phone.

Connecting the PC Ethernet cable

Connect the CAT5e PC Ethernet cable between your IP Phone and your computer to enable your computer to access the LAN.

1. Plug one end of the PC Ethernet cable (not supplied) into the PC Ethernet port on the back of your IP Phone marked with the 🌐 symbol.
2. Thread the cable through the channel in the foot stand.
3. Connect the other end of the cable to the LAN port on your computer.
Wall-mounting the IP Phone (optional)

You can install your IP Phone on a wall. Wall-mount the IP Phone using the two keyholes on the back of the IP Phone. You do not need the foot stand for wall-mounted applications.

1. Remove the foot stand.
2. Ensure all cables are properly routed and the IP Phone is functioning.
3. Make small marks on the wall where you want to align each keyhole slot.
4. Insert the screws (not provided) so that they protrude slightly from the wall.
5. Align the keyholes on the back of the IP Phone with the screws in the wall.
6. Slide the IP Phone onto the screws to secure the IP Phone in position.
This section explains how you can customize the features on your IP Phone 1220 to meet your requirements.

**Note:** Call features and Flexible Feature Codes (FFC) must be assigned to your IP Phone and supported by system software. Contact your system administrator to configure these features and codes on your IP Phone.

Your IP Phone 1220 has both server-based telephone features and local (telephone-based) tools. Server-based telephone features are accessed through the **Telephone Options** menu item on the Services menu. Press the **Services** key once to access the Services menu, which has the following menu items:

- **Telephone Options**
  You or your system administrator can use the Telephone Options menu to configure telephone preferences. For more information, see “Telephone Options” on page 38.

- **Password Admin**
  You or your system administrator can use the Password Admin menu to assign or modify the Station Control Password. For more information, see “Managing your Station Control Password” on page 61.

- **Virtual Office Login**
  The Virtual Office Login menu is available on the IP Phone 1220. You must configure the Class of Service for Virtual Office.

**Note:** The Password Admin, Virtual Office Login, and Test Local Mode menus are not available on every IP Phone 1220. Consult your system administrator.
The Telephone Options menu item provides you with access to the following features on your IP Phone 1220:

- “Adjusting volume” on page 40
- “Adjusting the display screen contrast” on page 41
- “Selecting a language” on page 42
- “Selecting date and time format” on page 43
- “Accessing display diagnostics” on page 43
- “Selecting a local dialpad tone” on page 44
- “Viewing IP Phone information” on page 45
- “Performing diagnostics” on page 46
- “Configuring Call Log Options” on page 47
- “Selecting a ring type” on page 53
- “Enabling or disabling Call Timer” on page 54
- “Enabling OnHook Default Path” on page 55
- “Changing feature key labels” on page 55
- “Configuring the name display format” on page 57
- “Configuring Live Dialpad” on page 58

<td></td>
</tr>
</tbody>
</table>
Note: If a menu includes a submenu, an ellipsis (…) appears after the command.

Use the following procedure to use the Telephone Options menu.

1. Press the Services key.

2. Press the Up or Down keys to scroll and select Telephone Options.

3. Press the Enter key.

4. Press the Up or Down keys to scroll, and select an option (for example, Language).

5. Press the Enter key. The display provides information required to adjust your selection.

6. Press the Select soft key to save changes and return to the Telephone Options menu. or

   Press the Cancel soft key to cancel the modifications.
Adjusting volume

Use the following procedure to adjust the volume.

1. Press the Services key, select Telephone Options, and select Volume adjustment.

2. Press the Up or Down keys to scroll, and select one of the following:
   — Ringer
   — Handset listen
   — Handsfree listen
   — Headset listen
   — Buzzer

3. Press the Enter key.

4. To increase or decrease the volume, perform one of the following actions:
   — Press the Up or Down soft keys.
   — Press the Up or Down navigation keys.
Adjusting the display screen contrast

You can adjust the contrast using the **Local Tools** menu. Nortel recommends that you use the **Telephone Options** menu.

*Note:* If an Expansion Module is attached to your IP Phone 1220, changes that you make to the LCD screen contrast of the IP Phone 1220 also apply to the display screen contrast configuration of the Expansion Module.

Use the following procedure to adjust the display screen contrast.

1. Press the **Services** key, select **Telephone Options**, and select **Contrast adjustment**

2. To increase or decrease the display contrast level, press the **Left** or **Right** keys.

3. Press the **Select** soft key to save the changes and return to the **Telephone Options** menu. or

Press the **Cancel** soft key to cancel the modifications.
Selecting a language

Information that appears on the display is available in multiple languages. This language setting controls the language only for IP Phone 1220 features.

Use the following procedure to configure the language.

1. Press the Services key, select Telephone Options, and select Language

2. Press the Up or Down keys to scroll, and select the desired language (for example, German [Deutsche]).

   Note: You cannot install some languages on your IP Phone. Contact your system administrator for additional information about available languages.

3. Press the Select soft key to save the desired language and return to the Telephone Options menu.
   
   or

   Press the Cancel soft key to cancel the modifications.
Selecting date and time format

Several date and time formats are available. Formats are based on the 12-hour and 24-hour clocks.

Use the following procedure to select a date and time format.

1. Press the Services key, select Telephone Options, and select Date/Time.

2. Press the up or down keys to scroll, and select the desired date/time format. Sample date/time formats appear on the upper-right side of the display area.

3. Press the Select soft key to save the format and return to the Telephone Options menu. or
   Press the Cancel soft key to cancel the modifications.

Accessing display diagnostics

The Display diagnostics command tests the IP Phone display screen and indicator lights.

Use the following procedure to use Display diagnostics.

1. Press the Services key, select Telephone Options, and select Display Diagnostics.
Selecting a local dialpad tone

When you press a key, the response can be a Dual-Tone Multi-Frequency (DTMF) sound, a single tone, or no sound. This is known as the Local Dialpad Tone.

Use the following procedure to choose a local dialpad tone.

1. Press the Services key, select Telephone Options, and select Local DialPad Tone.

2. Press the up or down keys to scroll, and select one of the following dialpad tones:
   - None to disable all tones.
   - Short Click to enable a single tone for all keys.
   - DTMF to turn on a different DTMF tone for each key.
Viewing IP Phone information

The Local Set Info option displays the following phone-specific information:

- General Info
- Set IP Info
- Ethernet Info
- Server Info
- Encryption Info
- Location Info

Use the following procedure to view IP Phone information:

1. Press the Services key, select Telephone Options, and select Local Set Info.

2. Press the Up or Down keys to scroll through the list and view IP Phone information.

3. Press the Cancel soft key to cancel the modifications.
Performing diagnostics

The Diagnostics command displays the following phone-specific information:

- Diag Tools (Ping, do Route Traces)
- EtherStats (Speed, Auto Neg, CRC Errors, Collision)
- IP Stats (Packet Info)
- RUDP Stats (Message receive or transmit)
- QoS Stats

Use the following procedure to view diagnostic information.

1. Press the Services key, select Telephone Options, and select Local Diagnostics.

2. Press the Up or Down keys to scroll through the list of diagnostic information.

3. Press the Cancel soft key to return to the Telephone Options menu.
Configuring Call Log Options

Use the call log option to configure the following preferences:

- “Configuring the Callers List log” on page 47
- “Configuring New Call Indication” on page 48
- “Configuring Preferred Name Match” on page 49
- “Configuring the Area Codes” on page 50

**Configuring the Callers List log**

You can configure the Callers List to log all incoming calls or to log only unanswered calls. The default configuration is to log all calls.

Use the following procedure to configure the Callers List.

1. Press the Services key, select Telephone Options, and select Call Log Options.

2. Press the Up or Down keys to scroll, and select the Incoming Calls option.

3. Press the Up or Down keys to scroll, and select the Log Mode option.

4. Press the Enter key.

5. Press the Up or Down keys to scroll, and select Log Unanswered Calls.
Configuring New Call Indication

You can configure your IP Phone 1220 to display a message that indicates a new call. By default, this option is on.

Use the following procedure to configure New Call Indication.

1. Press the Services key, select Telephone Options, and select Call Log Options.

2. Press the Up or Down keys to scroll, and select the Incoming Calls option.

3. Press the Up or Down keys to scroll, and select the New Call Indication option.

4. Press the Enter key.

5. Press the Up or Down keys to scroll, and select one of the following:
   - New call indication: Off
   - New call indication: On
Configuring Preferred Name Match

You can configure your IP Phone 1220 to display the name of the caller as defined in your Personal Directory. By default, the option is Off.

Use the following procedure to configure Preferred Name Match.

1. Press the Services key, select Telephone Options, and select Call Log Options.

2. Press the Up or Down keys to scroll, and select Preferred Name Match.

3. Press the Enter key.

4. Press the Up or Down keys to scroll, and select one of the following:
   — Preferred name match: On
   — Preferred name match: Off

6. Press the Select soft key to save the configuration.
   or
   Press the Cancel soft key to keep existing configurations.
Configuring the Area Codes

Use the Area Code Setup menu to save up to three area codes. When a call arrives with an area code that matches one of the saved area codes, the calling number is reordered to display the phone number followed by the area code (as opposed to the area code followed by the phone number).

This reordering applies when you scroll through your Callers List.

Use the following procedure to configure default area codes (maximum of three).

1. Press the Services key, select Telephone Options, and select Call Log Options.

2. Press the Up or Down keys to scroll, and select Area Code Setup.

3. Press the Enter key.

5. Press the Select soft key to save the configuration.

or

5. Press the Cancel soft key to keep existing configurations.
4. Press the **Up or Down** keys to scroll, and select one of the following:
   - 1st Code
   - 2nd Code
   - 3rd Code

5. Press the **Enter** key.

6. Use the dialpad to enter the number at the prompt.

7. Press the **Select** soft key to save the configuration.
   or
   Press the **Cancel** soft key to keep existing configurations.

Use the following procedure to edit area code display.

1. Press the **Services** key, select **Telephone Options**, and select **Call Log Options**.

2. Press the **Up** or **Down** keys to scroll, and select **Area Code Setup**.
3. Press the **Enter** key.

4. Press the **Up or Down** keys to scroll, and select one of the following:
   - 1st Code
   - 2nd Code
   - 3rd Code

5. Press the **Enter** key.

6. Use the dialpad to edit the number.

7. Press the **Select** soft key to save the configuration.
   or
   Press the **Cancel** soft key to keep existing configurations.
Selecting a ring type

Use the Ring type option to configure the IP Phone ring tone.

Use the following procedure to select a ring type:

1. Press the Services key, select Telephone Options, and select Ring type.

2. Press the Up or Down keys to scroll, and select one of the ring types.

3. Press the Play soft key to sample the ring tone.

4. Press the Select soft key to save the ring type and return to the Telephone Options menu.
   or

   Press the Stop soft key and use the Up or Down keys to select a different ring type.
   or

   Press the Cancel soft key to cancel the modifications.
Enabling or disabling Call Timer

The call timer measures the call duration.

Use the following procedure to enable or disable Call Timer.

1. Press the Services key, select Telephone Options, and select Call timer.

2. Press the Up or Down keys to enable or disable the Call Timer.

3. Press the Select soft key to save the configuration and return to the Telephone Options menu.
   or
   Press the Cancel soft key to cancel the modifications.
Enabling OnHook Default Path

Use OnHook Default Path option to choose either the Headset or the Handsfree to operate your IP Phone.

Use the following procedure to enable OnHook Default Path.

1. Press the Services key, select Telephone Options, and select On Hook default path.

2. Press the Up or Down keys to select one of the following:
   - Handsfree Enabled
   - Headset Enabled

3. Press the Select soft key to save the default path and return to the Telephone Options menu.
   or
   Press the Cancel soft key to cancel the modifications.

Changing feature key labels

Use the Change feature key label option to rename the label that corresponds to the feature key. You can define labels with a maximum of nine characters. You can also restore the default labels (collectively or individually).

Note: If a feature key is configured as an autodial key, the label does not change if the autodial key configuration changes.
Use the following procedure to rename the labels.

1. Press the Services key, select Telephone Options, and select Change Feature Key label.

2. Press the Enter key.

3. Press the feature key to change the label.

   If you press a prime DN key, an error message appears.

4. Enter the new information for the feature key label. To enter special characters, press the Up key. For information about entering text, see “Using the telephone dialpad” on page 80.

5. Press the Select soft key to save the changes and return to the Telephone Options menu.

   or

   Press the Cancel soft key to cancel the modifications.

Use the following procedure to restore the default labels.

1. Press the Services key, select Telephone Options, and select Change Feature Key label.
Customizing your IP Phone 1220—basic features

Configuring the name display format

You can configure your IP Phone 1220 to display the name of the calling party in one of the following formats:

- first name, last name
- last name, first name

Use the following procedure to configure name display format.

1. Press the Services key, select Telephone Options, and select Name Display Format.

2. Press the Enter key.

3. Use the Up or Down keys to scroll, and select one of the following:

   a. To restore all key labels, Press the Yes soft key.

   b. To restore one key label:

      — Press the Select soft key.

      — Press the feature key.

      — Press the Yes soft key to change the selected feature key label to the default value.

Note: If you change the labels to default values, you cannot undo the change. You must redefine the custom labels.
Configuring Live Dialpad

The Live Dialpad option activates the Primary DN key when you make a call by dialing a directory number on the dialpad without picking up the handset or pressing the Handsfree key.

Use the following procedure to configure Live Dialpad.

1. Press the Services key, select Telephone Options, and select Live Dial Pad.

2. Press the Up or Down keys to scroll, and select one of the following:
   — On
   — Off (default)
3. Press the **Select** soft key to save the configuration.

or

Press the **Cancel** to cancel the modifications.
Customizing your IP Phone 1220—advanced features

You can customize features on your IP Phone 1220 to meet your requirements. This section describes how to customize the advanced features.

<table>
<thead>
<tr>
<th>CAUTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>Many of the options discussed in this section are for the system administrator only. Do not make changes unless an administrator instructs you to do so.</td>
</tr>
</tbody>
</table>

You and the system administrator can customize the following advanced features:

- **Password Admin**
  Use the Password Admin menu to assign or modify the Station Control Password. See “Managing your Station Control Password” on page 61.

- **Electronic Lock**
  Assign a lock on your IP Phone to secure your phone and avoid misuse. See “Configuring an Electronic Lock on your IP Phone” on page 63.

- **Personal Directory**
  Customize the Personal Directory to store names of your choice. See “Customizing the Personal Directory” on page 65.

- **Local Tools**
  Use the Local Tools menu to configure personal preferences. See “Configuring the Local Tools menu” on page 70.

- **Virtual Office Login**
  The Virtual Office Login menu can be configured on IP Phone 1220. Class of Service must be configured for the Virtual Office. See “Using Virtual Office” on page 75.
Note: The Password Admin and Virtual Office Login menus are not available on every IP Phone 1220. Consult your system administrator.

Managing your Station Control Password

You can assign a Station Control Password (SCPW) to
• lock your IP Phone and prevent the misuse of your IP Phone
• use password-protected features such as customizing the Personal Directory, using the Redial List, and using the Callers List

Note: Your system administrator defines your initial SCPW. Contact your system administrator for detailed information.

Assigning an SCPW

Use the following procedure to assign an SCPW.

1. Press the Services key.

2. Press the Up or Down keys to scroll, and select Password Admin.

3. Press the Enter key.

4. Press the Up or Down keys to scroll, and select New Password.
5. Press the Enter key.

6. Enter your new password using the dialpad. To enter special characters, press the Up key. For information about entering text, see “Using the telephone dialpad” on page 80.

7. Press the Select soft key to accept the new password.

Note: If you are locked out of your IP Phone, or if you forget your SCPW, contact your system administrator.

**Turning Password Protection on or off**

Use the following procedure to turn Password Protection on or off.

1. Press the Directory key.

2. Press the Up or Down keys to scroll, and select Change Protection Mode.

3. Enter your new password using the dialpad. (if Password Protection is enabled)

   To enter special characters, press the Up key. For information about entering text, see “Using the telephone dialpad” on page 80.
Enter 4. Press the Enter soft key.

5. Press the Up or Down keys to scroll, and select one of the following:
   — Enable Password Protection
   — Disable Password Protection

6. Choose Yes to accept the selection or No to return to the Directory menu

7. Press the Done soft key.

Note: The default configuration for Password Protection is off.

Configuring an Electronic Lock on your IP Phone

Use the Electronic Lock feature to prevent others from making calls from your IP Phone. Your SCPW controls the Electronic Lock feature. To change your Station Control Password, see “Managing your Station Control Password” on page 61.

Locking your IP Phone 1220

Use the following procedure to lock your IP Phone 1220.

1. Lift the handset.
Customizing your IP Phone 1220—advanced features

Unlocking your IP Phone 1220

Use the following procedure to unlock your IP Phone 1220.

1. Lift the handset.

2. Dial the Electronic Lock Deactivate FFC.

3. Dial your Station Control Password.

4. If you dial locally, press the Goodbye key.
   or
   If you dial the FCC remotely, dial your DN.

2. Dial the Electronic Lock Activate FFC.
Customizing the Personal Directory

Use the Personal Directory feature to create and store up to 100 contacts of your choice. A Personal Directory entry can contain

- last name (up to 24 characters)
- first name (up to 24 characters)
- phone numbers (up to 31 characters)

To use the Personal Directory, press the Directory key and select Personal Directory.

**Adding an entry**

Use the following procedure to add an entry to the Personal Directory.

1. Press the Directory key and select Personal Directory.
Editing an entry

Use the following procedure to edit an entry in the Personal Directory.

1. Press the **Directory** key and select **Personal Directory**.

2. Press the **Add** soft key.
   - If the message “Directory is full” appears, delete one or more entries to accommodate a new entry.

3. Use the dialpad to enter the name.
   - To enter special characters, press the Up navigation key. For information about entering text, see “Using the telephone dialpad” on page 80.

4. Press the **Next** soft key.

5. Use the dialpad to enter the phone number.

6. Press the **Done** soft key to save the new entry.
   - or
   - Press the **Cancel** soft key to return to the Add screen without saving the new entry.
Deleting an entry

Use the following procedure to delete an entry in the Personal Directory.

1. Press the Directory key and select Personal Directory.
2. Press the Up or Down keys to scroll, and select the desired entry.
3. Press the Del soft key.
4. Press the Yes soft key to delete the entry.

or

Press the No soft key to return to the Personal Directory without deleting the entry.
Copying an entry

Use the following procedure to copy an entry in the Personal Directory.

1. Press the Directory key and select Personal Directory.

2. Press the Up or Down keys to scroll, and select the desired entry.

3. Press the More soft key.

4. Press the Copy soft key to configure the new entry.

5. Use the dialpad to enter the name. To enter special characters, press the Up navigation key. For information about entering text, see “Using the telephone dialpad” on page 80.
Searching for an entry

Use the following procedure to search for an entry in the Personal Directory.

1. Press the Directory key and select **Personal Directory**.

2. Press the Up or Down keys to scroll, and select the desired entry.

3. Press the Dial soft key to call the number.

6. Press the Done soft key to save the changes.

   or

   Press the Cancel soft key to return to the Personal Directory without saving your changes.

   or

   Press the Directory soft key to exit without calling.
Configuring the Local Tools menu

Your IP Phone 1220 has both local and server-based telephone tools and features. This section discusses the various tools and features available locally on your IP Phone 1220.

CAUTION
Many of the options discussed in this section are for administrator use only. Do not make changes unless you are instructed by an administrator.

Note: Your system administrator can establish a password for the Local Tools menu. When the password is enabled, a password prompt dialog box appears when you attempt to access this menu. If this happens, contact your system administrator.

Local tools and features are accessed through the Local Tools menu. Press the Services key twice to access this menu. Your system administrator can establish a password for the Local Tools menu. When the password is enabled, a password prompt appears when you attempt to access this menu. If this happens, contact your system administrator.

The Local Tools menu has the following menu options:

- “1. Preferences” on page 72
- “2. Local Diagnostics” on page 74
- “3. Network Configuration” on page 75
- “4. Lock Menu” on page 75

If a menu command has a number in front of it, you can select the command by pressing the associated key on the dialpad. For example, in the Local Tools menu, access Local Diagnostics by pressing the 2 key on the dialpad.
The function of some keys on the IP Phone differs based on the situation. **Table 5 on page 71** describes the function of each key for navigating and using menus.

**Table 5: Navigation key functions in menus**

<table>
<thead>
<tr>
<th>Key</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Down arrow keys</td>

</tr>
</tbody>
</table>
| Enter characters or digits on the dialpad | Insert characters or digits at the current cursor position  
**Note:** Press the star (*) key to insert a period (·). |

**Note:** Special characters are under 1 digit key. By repeatedly pressing 1, the characters circle in the following sequence: 1, _, -, ., !, @, $, %, &, +, :: /, \.

### 1. Preferences

Use the **1. Preferences** menu to alter the following local preferences:

- “1. Contrast” on page 72
- “2. Language” on page 73

#### 1. Contrast

Use the **Contrast** tool to alter the physical settings of the display.
Note: Changes made to the display Contrast using this method are lost if you reset the phone. To avoid this situation, Nortel recommends that you use the Contrast Adjustment control in the Telephone Options menu for contrast adjustment.

Use the following procedure to adjust Contrast setting.

1. Press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select Preferences, and press the 1 key to select Contrast.

2. Press the right or left arrow keys to increase or decrease the contrast value.

3. Press the Enter key to save the changes.

2. Language
Information that appears on the display is available in multiple languages.

Use the following procedure to select a language.

1. Press the Services key twice to open the Local Tools menu, press the 1 key on the dialpad to select 1. Preferences, and press the 2 key to select 2. Language.

2. Press the up or down keys to scroll, and select the desired language (for example, German [Deutsche]).
3. Press the **Enter** key to save the changes.

4. Press the **Cancel** key to exit the **Preferences** menu without saving the changes.

**Note:** This language setting only controls the language used in the local menus on your phone. Use the following procedure to select the language for features on your phone, press the **Services** key, press the **Telephone Options**, and select **Language**...

### 2. Local Diagnostics

The **2. Local Diagnostics** submenu offers the following choices:

- **IP Set and DHCP Information** - View reports about IP Phone 1220 and DHCP operation.
- **Network Diagnostic Tools** - Diagnose network problems using ping and trace route tools.
- **Ethernet Statistics tool** - View reports about Ethernet operation.
- **IP Network Statistics** - View reports about network operation.

**CAUTION**

Local Diagnostics, Network Configuration, and the Lock Menu items are for system administrator use only.

Press the **Return** soft key at any time while you customize the phone using the Local Diagnostics submenu options to return to the previous Local Diagnostics submenu. You can gather information and run tests without exiting and re-entering the Local Tools menu. For example, you can check the Ethernet Statistics, and then press **Return** to enter the Network Diagnostics Tools to ping an IP address.
3. Network Configuration

The Network Configuration tool displays information that was configured when you installed the IP Phone. This tool is for administrator use only.

4. Lock Menu

Your system administrator can use the lock menu tool to protect the Local Tools menu items from accidental or unwanted changes. This tool is for administrator use only.

Using Virtual Office

Use the Virtual Office feature to transfer calls and office IP Phone settings to a remote IP Phone. You can use the remote IP Phone as if it were your office Phone when you are out of the office. You can use another IP Phone (the remote phone) to log on to your Office IP Phone. After you log on, you can access the DNs, and autodial numbers, and you have the same key layout, feature keys, and voice mail features that are configured on your home or office IP Phone.

To use Virtual Office, you need your DN and a preconfigured SCPW. You must activate Virtual Office on your office IP Phone before you can connect to it from a remote IP Phone. See “Logging on to Virtual Office” on page 76.

Consult your system administrator to confirm the availability of the Virtual Office feature on your IP Phone.

The IP Phone used as a remote phone to connect to your IP Phone 1220 does not have to be an IP Phone 1220. Table 8 on page 75 shows the IP Phones on which you can use Virtual Office to connect to your IP Phone 1220.

### Logging on to Virtual Office

Use the following procedure to activate Virtual Office on your Office IP Phone from your Remote IP Phone.

1. Press the **Services** key.

(Services)

2. Press the **Up or Down** keys to scroll, and select **Virtual Office Login**.
A successful logon transfers all the features, time, date, and tones of your Office IP Phone to your Remote IP Phone. Your Virtual Office session expires after a fixed period of time, which your system administrator determines.

Using Virtual Office on your remote IP Phone

The display characteristics, including size of the display area, differ with IP Phone models. Your Virtual Office display depends on the remote phone that you use to log on to your Virtual Office. All features are as they appear on your Office IP Phone 1220.
An IP Phone 1120E, that is logged on as a remote phone to an IP Phone 1220 Office phone, provides less information than the IP Phone 1220 because it has fewer display lines.

When an IP Softphone 2050 logs on as a remote phone to an IP Phone 1220 office phone, the information display is arranged differently, but all the information is visible at one time.

Regardless of the IP Phone model that you use as a remote phone, a user information line appears that lists the number of your Office IP Phone.

**Using Virtual Office on your office IP Phone**

When activated for Virtual Office by a remote IP Phone, your office IP Phone logs off and is no longer operational. When you return to the office, disconnect the remote logon and regain control of your office phone. If you do not explicitly disconnect the remote logon, your Virtual Office session expires after a fixed period of time, which your system administrator determines.

**Disconnecting your office IP Phone from a remote IP Phone**

Use the following procedure to disconnect your office IP Phone from a remote IP Phone.

To disconnect your office IP Phone from the remote IP Phone

a. Press the **Home** key.

b. Enter your User ID and password (this logs on the Office IP Phone to your office network).

or

Press the **Virtual** soft key to log on to another IP Phone, and your IP Phone becomes a Remote IP Phone.
Logging off Virtual Office
While working on a remote phone, you can log off of Virtual Office using the following steps.

1. Press the Services key.

2. Press the Up or Down keys to scroll, and select Virtual Office Logout.

3. Press the Enter key.
Operating your IP Phone 1220

This section describes how to operate your IP Phone 1220. It describes operations such as entering text, making a call, using the Corporate directory, and using the Redial List.

Entering and editing text

You can enter and edit text on your IP Phone 1220 using the following methods:

- “Using the telephone dialpad” on page 80
- “Using the soft keys” on page 80

Using the telephone dialpad

You can use the dialpad to enter text when you use features such as Personal Directory, Redial List, and Callers List.

For example, to enter the letter A, press the 2 key once. To enter the letter C, press the 2 key three times.

**Note:** No letters are associated with the 1 or the 0 keys.

Using the soft keys

You can use soft keys to edit text when you use features such as Personal Directory, Redial List and Callers List.

Use the following procedure to edit an entry in your Personal Directory.

1. Press the **Directory** key.
2. Select the desired entry from Personal Directory.
3. Press the **Edit** soft key.
4. Press the **Left** or **Right** keys to move through the text.
5. Select the appropriate editing soft key for the operation you want to perform.
6. If the key you want is not visible, press the **More** soft key to access the next layer of soft keys.

7. Press the **Up** key to access the symbols.

8. Press the **Left** or **Right** keys to move to a specific symbol.

9. Press the **Choose** soft key to select a symbol.

10. Press the **Next** soft key to submit your changes.

Table 9 on page 81 describes the soft key editing functions on the IP Phone 1220.

**Making a call**

This section describes the various ways you can make a call from your IP Phone 1220.

- “Using the Callers List” on page 82
- “Using the Redial List” on page 84
- “Using Off-hook dialing” on page 86
- “Using On-hook dialing” on page 87
- “Using Handsfree dialing” on page 88
- “Using the Corporate Directory” on page 90
Using the Callers List

The Callers List logs all incoming calls. The Callers List can store up to 100 entries. When the list is full, the oldest entry is overwritten. Use the Callers List to review missed calls and make a call if required. The Callers List contains the following components:

- the caller’s last and first name (if available)
- the DN of the caller
- the time and date of the call
- the number of times the caller called

Callers List entries are sorted on call arrival time.

The format of names in the Callers List depends on the configuration of Preferred Name Match. The Calling Party Name Display (CPND) appears according to the configuration settings on your phone if Preferred Name Match is active on your phone. If Preferred Name Match is off, the CPND appears according to the system configuration.

To access the Callers List, press the Directory key, and select Callers List. If password control is enabled, you must enter your SCPW at the prompt.
Dialing an entry
Use the following procedure to dial an entry.

1. Press the **Up or Down** keys to scroll, and select the desired entry.

2. Press the **Dial** soft key.

Deleting an entry
Use the following procedure to delete an entry.

1. Press the **Up or Down** keys to scroll, and select the desired entry.

2. Press the **Del** soft key.

3. Press the **Yes** soft key to confirm the entry deletion.
   or
   Press the **No** soft key to return to the Callers List without deleting the entry.
Dear [Name],

I am writing to express my concerns regarding the recent events that occurred during the meeting. It seems that there was a misunderstanding or miscommunication that led to a disagreement.

I believe that open and honest communication is crucial for the success of our organization. If there is a specific area of concern or conflict, I would appreciate it if we could schedule a meeting to discuss it further.

Please let me know if there is anything else I can do to assist in resolving this matter.

Thank you for your time and understanding.

Sincerely,
[Your Name]
Dialing an entry
Use the following procedure to dial an entry.

1. Press the **Up or Down** keys to scroll, and select the desired entry.

2. Press the **Dial** soft key.

Deleting an entry
Use the following procedure to delete an entry.

1. Press the **Up or Down** keys to scroll, and select the desired entry.

2. Press the **Del** soft key.

3. Choose **Yes** to confirm the entry deletion. 

or

Choose **No** to return to the previous screen without entry deletion.
Deleting the entire Redial List

Use the following procedure to delete the entire Redial List.

1. Press the Del soft key.

2. Choose Yes to confirm the deletion of the entire Redial List. or Choose No to return to the previous screen without deletion.

Using Off-hook dialing

Perform the following steps to make a call by using the handset.

1. Lift the handset.

2. Dial the number.

3. To end the call, return the handset to the cradle or Press the Goodbye key.
Using On-hook dialing

Perform the following steps to make a call without lifting the handset.

1. Leave the handset in the cradle.

2. Press the line (DN) key.

3. Listen for the dial tone and dial the number.

4. When the called party answers, lift the handset.

5. To end the call, return the handset to the cradle or Press the Goodbye key.
Using Handsfree dialing

Use handsfree dialing to make a call using the built-in microphone and speaker, or a headset.

1. Press the **Handsfree** key.
   
   or
   
   If a headset is connected, press the **Headset** key.

2. Dial the number.

During a call, you can perform the following tasks:

- “Terminating a handsfree call” on page 88
- “Muting a handsfree call” on page 89
- “Switching from handsfree to handset mode” on page 89
- “Switching from handset mode to handsfree” on page 89
- “Using a headset” on page 89
- “Switching from handsfree to headset” on page 90

**Terminating a handsfree call**

Use the following procedure to terminate a handsfree call.

1. Press the **Goodbye** key.

   (Goodbye)
Muting a handsfree call
Use the following procedure to mute a handsfree call.

1. Press the Mute key.
   The LED indicator flashes.

2. Press the Mute key again to return to a two-way handsfree conversation.

Switching from handsfree to handset mode
Use the following procedure to switch from handsfree to handset mode.

1. Lift the handset.

Switching from handset mode to handsfree
Use the following procedure to switch from handset mode to handsfree.

1. Press the Handsfree key.

2. Replace the handset.

Using a headset
Use the following procedure to use a handset.

1. Connect the headset to the headset jack.
2. Press the **Headset** key.

**Switching from handsfree to headset**

Use the following procedure to switch from handsfree to headset.

1. Press the **Headset** key.

**Using the Corporate Directory**

The Corporate Directory feature provides an alphabetic list of entries using last names. You can search by name, view additional information on each entry, and dial Corporate Directory numbers. To use the Corporate Directory, press the **Directory** key and select **Corporate Directory**.

**Searching for a specific number**

Use the following procedure to search for a specific number.

1. When prompted, use the dialpad to enter the desired name in last name, first name format.

2. Press the **Search** soft key to find the desired name.
   
   The first match appears on the screen.
Operating your IP Phone 1220

Making a call using the Corporate Directory

Use the following procedure to make a call using the Corporate Directory.

**Note:** This feature is not available on all phones. Contact your system administrator to find out if this feature is available for your use.

1. Press the **Up or Down** keys to scroll, and select a name in the Corporate Directory.

2. Press the **Dial** soft key to dial the resulting number.

3. Press the **Dial** soft key to dial the resulting number.

   **Note:** If no match occurs to the search query, start a new search or change the information in the initial search.

   or

   Press the **Cancel** soft key to exit without dialing.
Using the Personal Directory

You can use the Personal Directory feature to store a maximum of 100 entries that comprise of names and numbers. To use the Personal Directory, press the Directory key, and select Personal Directory.

1. Press the Up or Down keys to scroll, and select a name in the Personal Directory.

2. Press the Dial soft key to dial the resulting number.

or

Press the Directory soft key to exit without dialing.

Using Predial

Use the Predial feature to enter, preview, and edit numbers before you make a call.

Making a call

Use the following procedure to make a call using the Predial feature.

1. Enter the number to be dialed without selecting the line key.

2. Press a line key to dial the number.

3. Lift the Handset when the called party answers or begin to speak if you are in handsfree mode.
Editing a Predial number

Use the following procedure to edit a Predial number.

1. Use the dialpad to enter the number.

2. To erase all numbers, press the **Clear** soft key.

   Reenter the numbers to dial.

   or

   To change one number at a time, press the **Delete** soft key to backspace. Re-enter the number.

3. Press a line key to dial the number.

Using AutoDial

Use the AutoDial feature to display, store, and automatically dial phone numbers.

**Using AutoDial to make a call**

Use the following procedure to make a call using the Autodial feature.

1. Lift the handset.

2. Press an **AutoDial** key in the upper display area to dial the number associated with that key.
Storing an AutoDial number
Use the following procedure to store an Autodial number.

1. Without lifting the handset, press the AutoDial key.
   
   The screen displays the word Autodial next to the appropriate key.

2. Using the dialpad, dial the phone number (including access code) to store on the selected AutoDial key.

3. Press the AutoDial key a second time to store the number on the selected key.
   
   After you store a number, the word Autodial disappears, and the stored number appears.

4. Assign a label to the key.
   
   After you assign the label, the number disappears and only the label appears on the screen next to the key.

Displaying an AutoDial number
Use the following procedure to display an AutoDial number.

1. Press the Display key.

2. Press an AutoDial key in the upper display area to display the number associated with that key.
Using Ring Again

Use the Ring Again feature to automatically redial the number if you receive a busy tone, or if your called party does not answer. Your IP Phone rings when the person you called becomes available.

Activating Ring Again

Use the following procedure to activate Ring Again.

1. Dial a number.
   
   The called party does not answer or you receive a busy tone.

   2. Press the Ring Again soft key.
      
      or

      Enter the Ring Again Activate Flexible Feature Code.

Calling a Ring Again party after notification

Use the following procedure to call a Ring Again party after notification.

1. After you receive the notification ring, lift the handset; or, if you use the headset or are in handsfree mode, go to step 2.
Deactivating Ring Again before notification
Use the following procedure to deactivate Ring Again.

1. Press the Ring Again soft key a second time.
   or
   Press the Ring Again Deactivate FFC.

Using Last Number Redial
Use the Last Number Redial feature to automatically redial the most recently dialed number.

1. To redial using the handset, lift the handset and press the line (DN) key.
   or
   2. To redial without lifting the handset, press the line (DN) key twice.
Using Speed Call

Use the Speed Call feature to place internal and external calls by dialing a one-, two-, or three-digit code. You can store, edit, and automatically dial frequently called phone numbers.

Storing a Speed Call number

Use the following procedure to store a Speed Call number.

1. Press the SpcCtl soft key.
   The triangular icon flashes to indicate programming mode.

2. At the prompt, enter a one-, two-, or three-digit code (0-999).

3. If required, dial the access code.

4. Enter the phone number (internal, external, or long-distance number).

5. Press the SpcCtl soft key again to save the code and number.
   The flashing icon turns off.

Making a call using Speed Call

Use the following procedure to make a call using Speed Call.

1. Lift the handset.

2. Press the SpcCtl soft key.
3. Dial the **Speed Call** code to automatically dial the number.

---

**Using System Speed Call**

Use the System Speed Call feature to dial Speed Call codes that override dialing restrictions placed on your IP Phone.

1. Lift the handset.

2. Press the **System Speed Call** soft key. 

   *or*

   Press the **System Speed Call Controller (SScCtl)** soft key.

3. Dial the **Speed Call** code to automatically dial the number.

---

**Using HotLine**

Use the Hot Line feature to automatically dial a number.

1. Press the **HotLine** soft key to automatically dial the number.
Using Intercom Calling

Use the Intercom feature to call a member of your intercom group by pressing the code assigned to that member.

Making an intercom call

Use the following procedure to make an intercom call.

1. Lift the handset.

2. Press the Intrcm key.

3. Dial the one- or two-digit code for the intercom group member.

Answering an intercom call during a call (Non-intercom group line)

Use the following procedure to answer an intercom call during a call.

1. Press the Hold key to put the current call on hold.
   or
   Press the Goodbye key to end the call.

2. Press the Intrcm key and begin to speak.
Answering a call

Each incoming call causes the IP Phone to ring, the LCD indicator beside the line (DN) key to flash, and the Message Indicator lamp to flash.

1. Lift the handset.

or

Press the Handsfree button on the left side of the handset.

or

Press the line (DN) key beside the LCD indicator as it flashes.

or

Press the Headset key if a headset is connected to your IP Phone.

Managing calls while not on a call

Other than answering a call (“Answering a call” on page 100), you can efficiently handle an incoming call using one of the following methods:

- “Using Automatic Answerback” on page 100
- “Using Call Pickup” on page 101

Using Automatic Answerback

When the Automatic Answerback feature is active, your IP Phone automatically answers the call in Handsfree mode after one ring.
Activating Automatic Answerback
Use the following procedure to activate Automatic Answerback.

AutoAns  

1. Press the **AutoAns** key.

Deactivating Automatic Answerback
Use the following procedure to deactivate Automatic Answerback.

AutoAns  

1. Press the **AutoAns** key.

*Note:* Calls are not forwarded to the voice message service.

Using Call Pickup
Use the Call Pickup feature to pick up calls in your pickup group or another pickup group from your IP Phone.

Answering a call in your own call pickup group
Use the following procedure to answer a call in your own call pickup group.

1. Lift the handset.

2. Press the **Pickup** key.

   or

   Enter the **Pickup Ringing Number** FFC.
Answering a call in another call pickup group

Use the following procedure to answer a call in another call pickup group.

1. Lift the handset.

2. Press the GrpPkp soft key.
   or
   Enter the Pickup Group FFC.

3. Dial the pickup group number of the ringing IP Phone.

Answering a call at a specific extension in any pickup group

Use the following procedure to answer a call at a specific extension in any call pickup group.

1. Lift the handset.

2. Press the DN Pickup key.
   or
   Enter the Pickup Directory Number Flexible Feature Code.
Using Call Hold

Use the Hold feature to retain your current call and answer another call. Place the original call on hold and then answer the second call.

Managing calls during a call

You can use the following features during a call:

- “Using Call Hold” on page 103
- “Using Call Waiting” on page 104
- “Transferring a call” on page 105
- “Using Timed Reminder Recall” on page 106
- “Using Attendant Recall” on page 107
- “Using Call Park” on page 108
- “Recording a Calling Party (Caller) Number” on page 110
- “Displaying call details” on page 111

3. Dial the DN of the IP Phone that is ringing (and does not belong to your call pickup group). If the pickup DN or group number is invalid (you hear an overflow burst tone and the screen displays *Goodbye and try again*); press the *Goodbye* key.
Placing a call on hold
Use the following procedure to place a call on hold.

1. Press the Hold key.

   The LCD indicator flashes beside the line on hold.

   **Note:** Enabling **Automatic Hold** automatically places the active call on hold when you answer the second call.

Retrieving a call on hold
Use the following procedure to retrieve a call on hold.

1. Press the Hold key to place an active call on hold. Press the Hold key again or the press flashing line (DN) key to return to the caller on hold.

Using Call Waiting
The Call Waiting feature produces a tone to alert you to an incoming call when you are already on a call. Call Waiting also places the current call on hold while you answer the new call.

Answering an call during another call
Use the following procedure to answer a call during another call.

1. Upon receiving a call, press the Hold key to place the current call on hold.

   **Note:** Enabling **Automatic Hold** automatically puts the active call on hold when you answer the second call.
Returning to the original call
Use the following procedure to return to the original call.

1. Press the Hold key to place the second call on hold.
   or
2. Press the Goodbye key to end the second call.

2. Press the line (DN) key associated with the first call.

Transferring a call
Use the Transfer feature to redirect a call to the appropriate person.

Transferring a call to a third party
Use the following procedure to transfer a call to a third party.

1. Press the Trans soft key during an active call.
   The calling party is placed on hold. You hear a dial tone. The indicator icon flashes steadily.

2. Dial the number to which you are transferring the call.
Operating your IP Phone 1220

Returning to the original call if the transfer is incomplete
Use the following procedure to return to the original call if the transfer is incomplete.

1. If the called party does not answer the transferred call, press the line (DN) key (next to the LCD indicator) to reconnect to the calling party.

Using Timed Reminder Recall
Use the Timed Reminder Recall feature to receive an automatic reminder tone when a transferred call is not answered.

Transferring a call using Timed Reminder Recall
Use the following procedure to transfer a call using Timed Reminder Recall.

1. Press the Trans soft key.
   The call is placed on hold.

2. Dial the number to which you are transferring the call.
Returning to the original call if the transferred call is unanswered

Use the following procedure to return to the original call if the transferred call is unanswered.

1. Lift the handset to reconnect to the calling party.
2. Press the Transfer soft key and retry call transfer. or
If the called party answers, press the Goodbye key to complete the transfer.

Using Attendant Recall

Use the Attendant Recall feature to contact an attendant during a call and to connect the caller to the attendant.

1. Press the Attendant Recall key and stay on the line until the attendant answers.
Using Call Park

Use the Call Park feature to hold (park) your active call temporarily and retrieve a call from any IP Phone. Using Call Park does not tie up a line.

Parking a call on the System Park DN
To park a call on the System Park DN or your own DN, perform the following procedure.

1. During an active call, press the Park soft key twice.
   The call is parked on your DN.
   Note: Enabling System Park DN automatically parks the calls on the system park DN.

Parking a call on a DN (Not System Park DN or own DN)
To park a call on a DN (Not System Park DN or own DN), perform the following procedure.

1. Press the Park soft key.

2. Dial the DN on which to park the call.
Parking a call using the SPRE code or FFC

To park a call using the SPRE code or FFC, perform the following procedure.

1. Press the **Trans** soft key.

2. Dial the **Call Park** FFC.

3. To use an alternative DN from the **System Park** DN or your own DN, dial the DN where you want to park the call. Otherwise, proceed to step 4.

4. Press the **Transfer** soft key.

Retrieving a parked call

Use the following step to retrieve a parked call.
**Note:** When Call Park is configured network-wide, you can use this feature across networks. You can configure a System Park extension to automatically park most calls.

1. Lift the handset.

2. Press the **Park** soft key.

3. Dial the DN where you parked the call.

   If a parked call is not retrieved within a specific time, it rings back to your IP Phone or to the attendant.

**Recording a Calling Party (Caller) Number**

During a call use the Calling Party Number feature to record the calling party number, or to charge the call to an account number.

1. Press the **CParty** soft key.

   The caller is placed on hold.

2. Dial a charge account number or the caller number.

   **Note:** For information about using the **Charge** soft key, see “Using AutoDial Transfer” on page 138.

3. Press the **Call Party** soft key to return to the call.
Displaying call details

During an active call, use the Display feature to display the caller’s number and name (if available) without interfering with the call.

1. Press the Display key.
2. Press the flashing line (DN) key.

The call waiting information appears.

If you use another feature, you can use the Display key to access information associated with those feature keys.

Managing calls while away from your desk

You can use the following features when you are away from your desk to manage an incoming call and to ensure you do not miss a call:

- “Using Call Forward” on page 111
- “Using Internal Call Forward” on page 113
- “Using Remote Call Forward” on page 114

Using Call Forward

Use the Call Forward feature to direct incoming calls to ring on another line (DN). A call already on your IP Phone cannot be forwarded.
Activating Call Forward
Use the following procedure to activate Call forward or change the call follow number.

1. Press the Fwd soft key.
   or
   Lift the handset and enter the **Call Forward All Calls Activate** FFC.

2. Dial the DN to which you want to forward your calls.

3. Press the Fwd soft key.

Deactivating Call Forward
Use the following procedure to deactivate Call Forward.

1. Press the Fwd soft key.
   or
   Lift the handset and enter the **Call Forward All Calls Deactivate** FFC.
Reinstating a Call Forward number

Use the following procedure to reinstate Call Forward number.

1. Press the Fwd soft key twice.

Using Internal Call Forward

Use Internal Call Forward to forward only those calls that originate from internal DNs. Calls that originate outside your IP Phone system (External Calls) ring at your IP Phone. You cannot forward the currently active call.

Forwarding internal calls only

Use the following procedure to forward internal calls only.

1. Press the IntForward key.
   or
   Lift the handset and enter the Internal Call Forward Activate FFC.

2. Dial the DN to which you want to forward your internal calls.

3. Press the IntForward key.
Deactivating Internal Call Forward
Use the following procedure to deactivate Internal Call Forward.

1. Press the IntForward key.
   or
   Lift the handset and enter the Internal Call Forward Deactivate FFC.

Reinstating Internal Call Forward number
Use the following procedure to reinstate Internal Call Forward number.

1. Press the IntForward key twice.

Using Remote Call Forward
Use the Remote Call Forward feature to forward calls on your IP Phone to another from a remote IP Phone.

Activating Remote Call Forward
Use the following procedure to activate Remote Call Forward.

1. Lift the handset.

2. If you call from an IP Phone outside the system, dial your direct system access number and wait for the dial tone.
Deactivating Remote Call Forward

Use the following procedure to activate Remote Call Forward.

1. Lift the handset.
2. If you call from an IP Phone outside the system, dial the direct system access number and wait for the dial tone.

3. Dial the Remote Call Forward Deactivate FFC.

4. Dial your Station Control Password.

5. After you hear the dial tone, dial your DN.

6. Press the # key.
Managing multiparty calls

Use the following features to enable multiparty conversations:

- “Using Call Join” on page 117
- “Setting up a Conference Call” on page 117
- “Using Conferee Selectable Display” on page 118
- “Using Group Call” on page 120

Using Call Join

Use the Call Join feature to connect a new caller to an active call. This connection creates a conference (conversation involving more than two parties) between the two callers and yourself.

1. To connect a call on hold to your current call, press the **Conf** soft key.

2. Press the line key of the caller you want to connect to your current call.

3. Press the **Conf** soft key again to join the person on hold to your conversation.

Setting up a Conference Call

Use the Conference feature to initiate a conference call for a group of three to six people including yourself. The maximum number of people supported in a conference call depends on the IP Phone configuration.

1. During a call, press the **Conference** key to place the party on hold.

   You hear a dial tone.
2. Dial the number of the person to add to the conference call.

You can talk to the person without intervention from the party on hold. Instead of dialing a number, you can press the Directory key, and use the Corporate Directory or Personal Directory, Redial List, and Callers List to find and dial the number of the person you want to add to the conference call.

You can talk to the called person privately without being heard by the party on hold.

3. Press the Conference key again to connect all parties.

4. If the party you attempt to add to the conference is unavailable, press the Goodbye key.

The attempted call ends.

5. Press the line (DN) key beside the flashing icon to return to your original call.

Using Conferee Selectable Display

Use the Conferee Selectable Display feature to list active conferees and to disconnect a conferee from the conference call.
**Viewing active conferees**

Use the following procedure to view active conferees.

1. During a conference call, press the **ConfDsp** key to turn on the LCD indicator. Each key press changes the screen to show a different active conferee.

   This action has no effect on the display of other IP Phones involved in the conference.

2. Press the **Goodbye** key.

   If configured, the Conference Count Display returns an updated count of conferees. The LCD indicator turns off.

**Disconnecting a conferee**

Use the following procedure to disconnect a conferee.

1. During a conference call, press the **ConfDsp** key until the conferee to disconnect appears on the screen.

2. Press the **DN** key on which the conference call is established.
Operating your IP Phone 1220

Using Group Call

Use the Group Call feature to automatically call members of a predefined group, one at a time, until all members answer.

Calling group members

Use the following procedure to call group members.

1. Lift the handset.

2. Press the GrpCl key or enter the Group Call FFC.

   The feature automatically calls all group members. The icon flashes until all members answer. The phone numbers of the group members appear on the display as they answer. When the last person answers, the Group Call icon lights steadily.

   Note: When a person in your group is on a conference call or another group call, they are not connected to your group call.

3. For a single conferee, press the Goodbye key. If configured, the Conference Count Display returns an updated total count of conferees. The LCD indicator turns off.

   or

   For multiple conferees, repeat steps 1 and 2 until all conferees are disconnected. Then press the Goodbye key.
Operating your IP Phone

Answering a group call

Use the following procedure to answer a group call.

1. Lift the handset.
   Note the following about notification tones:
   - If you are on a call and receive three 10-second tones, this is the notification of a group call on your IP Phone.
   - If you are on a call on another line when a group call is made, you receive a long tone through the handset or speaker.
   - If you are already on a conference call or another group call, you do not receive notification of a group call.

Ending a group call

Use the following procedure to end a group call.

1. Press the Goodbye key.

   Note: When the person who made the group call disconnects, the call terminates for all members of the group. However, the members of the group call can disconnect from the call and not affect other members on the call.
Operating your IP Phone 1220

Managing calls while busy at work

Using Make Set Busy
Use the Make Set Busy feature to make your IP Phone appear busy to all callers.

Activating Make Set Busy
Use the following procedure to activate Make Set Busy.

1. Press the MakeSetBsy key.
   or
1. Lift the handset, and enter the Make Set Busy Activate FFC.

Deactivating Make Set Busy
Use the following procedure to deactivate Make Set Busy.

1. Press the MakeSetBsy key a second time to deactivate the feature.
   or
1. Lift the handset and enter the Make Set Busy Deactivate FFC.
**Hotel applications**

Hotel applications are a group of hospitality features that increase the value of the IP Phone 1220. In a hotel environment guests can access the following services:

- “Configuring Automatic Wake-Up” on page 123
- “Activating Message Registration” on page 125
- “Using Maid Identification” on page 127
- “Using Room Status” on page 129

**Configuring Automatic Wake-Up**

Use the Automatic Wake-Up feature to receive a timed reminder call. You can program your IP Phone to automatically place a call at a predetermined time. When you answer the call, prerecorded music plays for 30 seconds followed by a prerecorded announcement or the attendant on the line.

**Entering Automatic Wake-Up call**

Use the following procedure to enter Automatic Wake-Up call.

1. Lift the handset.

2. Dial the **Automatic Wake-Up Request** FFC.

Cancelling Automatic Wake-Up call

Use the following procedure to cancel Automatic Wake-Up call.

1. Lift the handset.

2. Dial the **Automatic Wake-Up Quit** FFC.

3. Press the **Goodbye** key.
Verifying Automatic Wake-Up call
Use the following procedure to verify Automatic Wake-Up call.

1. Lift the handset.

2. Dial the **Automatic Wake-Up Verify** FFC.

3. Dial the **Automatic Wake-Up** time in a 24-hour time format (hhmm).
   
   You hear a confirmation tone if your query matches the preset time.
   
   To enter the time in a 24-hour time format, enter the hours followed by the minutes. For example, to configure the time to 7:30 a.m., enter 0730; to configure it to 9:45 p.m., enter 2145.

4. Press the **Goodbye** key.

Activating Message Registration
Use the Message Registration feature to read, change, or reset meters that log your IP phone calls.

Reading meters
Use the following procedure to read meters.

MRK

1. Press the **MRK** key.
2. Dial the Directory Number (DN) of the IP Phone in the hotel room.

3. Press the MRK key.

Changing meter

Use the following procedure to change a meter.

1. Press the MRK key.

2. Dial the Directory Number (DN) of the IP Phone in the hotel room.

3. Dial the correct meter count.

4. Press the * key.

5. Press the MRK key.
Resetting a meter to zero
Use the following procedure to reset a meter to zero.

1. Press the MRK key.
2. Dial the Directory Number (DN) of the IP Phone in the hotel room.
3. Press the * key.
4. Press the MRK key.

Using Maid Identification
Use the Maid Identification feature to track the cleaning status of rooms. The maid enters the information from the IP Phone in your room.

Entering cleaning status
Use the following procedure to enter cleaning status.

1. Press the RMK key.
2. Dial the Directory Number (DN) of the room.
3. Dial one of the following cleaning status codes:
   1 = Cleaning requested
   2 = Cleaning in progress
   3 = Room cleaned
   4 = Room passed inspection
   5 = Room failed inspection
   6 = Cleaning skipped
   You hear the interrupted dial tone.

4. Press the * key.

5. Dial the Maid ID.
   If you dial the wrong Maid ID, press the * key and redial the ID.

6. Press the RMK key.
Using Room Status
Use the Room Status feature to display the status of a room.

Displaying room status
Use the following procedure to enter cleaning status.

1. Press the **RMK** key.

2. Dial the **Directory Number** (DN) for the room.
   The DN appears followed by a two-digit code.
   The first digit indicates the occupancy status:
   - 0 = Room vacant
   - 1 = Room occupied
   The second digit indicates the cleaning status of the room:
   - 1 = Cleaning requested
   - 2 = Cleaning in progress
   - 3 = Room cleaned
   - 4 = Room passed inspection
   - 5 = Room failed inspection
   - 6 = Cleaning skipped

3. Press the **RMK** key.
Changing the status of a room

Use the following procedure to change the status of a room.

1. Press the **RMK** key.

2. Dial the **Directory Number** (DN) for the room.

   The DN appears followed by a two-digit code.
   The first digit indicates the occupancy status:
   - 0 = Room vacant
   - 1 = Room occupied
   The second digit indicates the cleaning status of the room:
   - 1 = Cleaning requested
   - 2 = Cleaning in progress
   - 3 = Room cleaned
   - 4 = Room passed inspection
   - 5 = Room failed inspection
   - 6 = Cleaning skipped

3. Dial the status code for the room.

   A three-digit code appears. The first digit indicates the occupancy status, the second is the previous cleaning status, and the third is the new status.

4. Press the **RMK** key.
Paging Features

The IP Phone 1220 supports the following paging voice call features:

- “Using Call Page Connect to make an announcement” on page 131
- “Using Radio Page” on page 131
- “Using Voice Call” on page 134

Using Call Page Connect to make an announcement

Use the Call Page Connect feature to make an announcement over a paging system.

**Note:** A Page key on an attendant console overrides and disconnects the IP Phones. The IP Phones must reaccess the page trunk.

1. Lift the handset.

2. Dial the Page Trunk Access Code to complete the connection to the page system.

3. Make your announcement.

4. Press the Goodbye key.

Using Radio Page

Use the Radio Page feature to page a user and stay on the line until the called party answers. The paged user answers the call after entering a special Page Meet-Me code from any IP Phone.
UsingAutomaticPreselection(Meet-Me page)
PerformthefollowingproceduretouseAutomaticPreselection.

1. Liftthehandset.

2. Dial the **RadioPagingAccess** FFC.
   You hear the paging tone (two beeps followed by a dial tone).

3. Dial thenumber ofthepartyyouwanttopage.
   After dialing, you hear theringback tone.
   The pagedparty can use any IP Phonetoeentera **RadioPagingAnswer** FFC andtheir own DN number.

4. If your callremains unanswered for apreset time period, during which you hear a 15-second high-pitched tonesoundsfollowed by silence, press the **Goodbye** keyorreplacethehandset.

UsingAutomaticPost-selection
The calledparty is either busy on the IP Phone or away from their desk.
To page the calledparty, youneed not redialthenumber ofthecalledparty.

1. Press the **RadPag** soft key.
   You hear a special dial tone.
Answering a Radio Page

If you carry a Radio Pager, a page indicates that a caller tried to reach you by dialing your DN. If the Radio Page system is configured to function in Meet-me mode, you can answer the page call from any IP Phone.

1. Lift the handset.

2. Dial the **Radio Page Answer** FFC.
   
   You hear the paging tone.

3. Dial your own DN to connect to the paging caller.
   
   If the caller disconnects, you hear a steadily lit high-pitched (number unavailable) tone.

### Answering a Radio Page

If you carry a Radio Pager, a page indicates that a caller tried to reach you by dialing your DN. If the Radio Page system is configured to function in Meet-me mode, you can answer the page call from any IP Phone.

1. Lift the handset.

2. Dial the **Radio Paging Access** FFC.
   
   You hear the ringback tone.
   
   The paged party can use any IP Phone to enter a **Radio Paging Answer** FFC, and their own DN number.

3. If your call remains unanswered for a preset time period, during which you hear a 15-second high-pitched tone, followed by silence, press the **Goodbye** key or replace the handset.
Using Voice Call

Use the Voice Call feature to make an announcement from another IP Phone speaker.

Making a voice call

Use the following procedure to make a voice call.

1. Lift the handset.

2. Press the VceCall key and make the announcement.

3. Press the Goodbye key.

Responding to a voice call

Use the following procedure to respond a voice call.

1. Your IP Phone rings once and the caller’s voice transmits through your speaker. Lift the handset to respond.

Call Override Features

Use the Call Override features to connect to a busy user. You can connect to a user immediately or after their current call. Some call override features are available only if your system administrator configures them. Contact your system administrator to determine if the following call override features are available:

- “Overriding a busy signal” on page 135
- “Using Forced Camp-on feature” on page 135
Overriding a busy signal

Use the Override feature to override a busy signal and interrupt another call.

1. Dial a number.
   You receive busy tone.

2. Press the EnhOvr key.
   or
   Enter the Override FFC.
   The person in the targeted call receives a tone for approximately 1 second. After the Override feature joins you to the call, a short tone repeats every 16 seconds.

3. To terminate the call, press the Goodbye key.

Using Forced Camp-on feature

Use the Forced Camp-on feature to automatically call a busy IP Phone (internal or external) immediately after the IP Phone disconnects from the current call.
Using Forced Camp-on
Follow the given procedure to use Forced Camp-on.

1. Dial a number.
   You receive busy tone.

2. Press the EnhOvr key.
   or
   Enter the Override FFC to initiate a Forced Camp-on.
   The called party receives a tone. You receive a ring signal or a busy signal, depending on the options chosen. You are now camped-on to the number you dialed.

3. Return the handset to the cradle.

4. When the called party finishes the call, your IP Phone automatically dials the number and both IP Phones ring.

Answering a call camped-on to your extension
Use the following procedure to answer a call camped-on to your extension.

1. When your IP Phone rings, lift the handset.

   Note: You can program your IP Phone for either Camp-on or Call Waiting, but not both.
Using Enhanced Override

Use the Enhanced Override feature to override an active call after you attempt a Forced Camp-on.

1. Dial a number.
   You receive a busy signal.

2. Press the **EnhOvr** key.
   or
   Enter the **Override** FFC to initiate a Forced Camp-on.
   If either person on the call disconnects at this time, you receive an overflow (fast busy or engaged) signal.

3. Press the **EnhOvr** key again.
   or
   Enter the **Override** FFC again.
   The other two people on the call receive an override tone and a conference call is established between the three of you. If anyone disconnects, the other two people remain connected.

4. To terminate the call, press the **Goodbye** key.
Using Centrex Services

You can use a few Centrex services from your IP phone. Contact your system administrator to determine if the following features are available:

- “Using Centrex or Exchange Line Switchhook Flash” on page 138
- “Using AutoDial Transfer” on page 138

Using Centrex or Exchange Line Switchhook Flash

Use the Centrex or Exchange Line Switchhook Flash feature during an active call to use Call Transfer or Three-Way Calling.

1. During a call, press the CentrexSHF key.
   You hear a special dial tone.

2. Dial the codes for your custom Centrex feature.

3. Press the Goodbye key to end the call.

Using AutoDial Transfer

Use the AutoDial Transfer feature to transmit digits to the Central Office after a Trunk Switchhook Flash. You must be on a Central Office/Exchange (CO) trunk call from, or connected to, a CO that offers Centrex or exchange line-type features.

1. Press the CentrexSHF key, and wait for an interrupted dial tone.
2. Press the **AutoDial** key to call the number desired.

3. Press the **Goodbye** key to end the call.

**Miscellaneous call features**

Some call features are available only if your system administrator configures them. Contact your system administrator to determine if the following call features are available.

- “Tracing calls” on page 139
- “Charging a call or charging a forced call” on page 140
- “Using the Buzz signal” on page 145
- “Using Privacy Release” on page 145

**Tracing calls**

Use the Call Trace feature to trace malicious calls within your system.

**Tracing with the Call Trace key**

Use the following step to trace with the Call Trace key.

Press the **CallTrace** key.
Using Call Trace without a Call Trace key
Use the following procedure to use Call Trace without a Call Trace key.

1. Press the Trans soft key.
   or
2. Press the Conf key.
   
   Dial the SPRE code followed by 83, or dial the Call Trace FFC to automatically reconnect.

Charging a call or charging a forced call
Use the Call Charge feature to charge a call to a specific account. The Forced Charge feature charges long-distance calls from an IP Phone that is restricted to local calls.

Charging a local or long-distance call to an account before you dial
Use the following procedure to charge a local or long-distance call to an account before you dial.

1. Lift the handset.
2. Press the Charge soft key.
Charging a call in progress
Use the following procedure to charge a call in progress.

1. Press the **Trans** soft key.
   or
   Press the **Conf** soft key.
   The call is placed on hold.

2. Press the **Charge** soft key.
Charging a transferred call to an account

Use the following procedure to charge a transferred call to an account.

1. Press the **Transfer** soft key.
   - The call is placed on hold.

2. Press the **Charge** soft key.
   - or
   - Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. Press the line (DN) key to return to the call.
3. Dial the charge account number.

4. After you hear the dial tone, dial the number to which you are transferring the call.

5. Press the **Transfer** soft key when you hear the IP Phone ring.

   You can talk privately to the person at the transfer number before you press the **Transfer** soft key.

### Charging a conference call to an account

Use the following procedure to charge a call to an account when you add someone to a conference call

1. Press the **Conf** soft key.

   The call is placed on hold.
2. Press the **Charge** soft key.
   or
   Dial the **Call Detail Recording** FFC.

3. Dial the charge account number.

4. Dial the number of the person you want to add to the conference.

5. Press the **Conference** soft key.
**Using the Buzz signal**

Use the Buzz feature to notify another person of a call, a visitor, or a request. Two linked IP Phones enable one person to signal the other. The person signaled hears a buzz.

1. Press the **Buzz** key.
   
The IP Phone linked to your IP Phone buzzes as long as you press the key.

**Using Privacy Release**

Use the Privacy Release feature to enable one or more people who share your DN to join a call.

1. Press the **PrvRls** soft key during a call.
   
   People can join the call by pressing the shared number (DN) key on their IP Phone (Multiple Appearance DN feature).

**Using External Server Applications**

Use External Server Applications to directly access a variety of applications from your IP Phone 1220.

To learn more about the available features and services, contact your system administrator. Depending on which features are available on your system, your phone can provide information; for example, local news and weather, stock market information, or traffic reports.

For more information about the External Server Applications, see the *Nortel IP Phone External Server Applications User Guide* (NN43100-100).
This section provides basic information about troubleshooting your
IP Phone 1220 if Virtual Office causes a problem. For additional help, see
“How to get help” on page 21.

IP Phone 1200 Expansion Module

This section provides information about the LCD Expansion Module (12-key self-labeling) supported by IP Phone 1220.

The LCD Expansion Module is a hardware accessory that connect to the IP Phone and provides additional line appearances and feature keys.

Basic features

The LCD Expansion Module supports the following features:

• 12 user-defined feature keys
• wall or desk mountable
• a maximum of seven LCD Expansion Modules (12-key self-labeling)

Keys and descriptions

For the location of the keys and components on the LCD Expansion Module, see the “LCD Expansion Module (12-key self-labeling)” on page 152.
Figure 6: LCD Expansion Module (12-key self-labeling)
Table on page 153 provides a description of the keys and components of the LCD Expansion Module.

**Table 12: LCD Expansion Module keys descriptions**

<table>
<thead>
<tr>
<th>Key or components</th>
<th>Description</th>
</tr>
</thead>
</table>
| User-defined feature keys | The keys on the Expansion Modules are programmable, with LCD labels. The system administrator programs these keys as either memory, line, or intercom keys.  
A steadily lit icon beside a programmable line key indicates that the line is active. A flashing icon indicates the line is on hold or that the feature is being programmed.  
A steadily lit icon beside a feature key indicates that the feature is active. A flashing icon indicates that the feature is being programmed. |
| Display               | The LCD display provides labels for the programmed keys and icons that show the feature state.                                               |

For information about installing the Expansion Module, see *Expansion Modules for IP Phone 1200 Series Quick Installation Guide* (NN40050-303).
Terms you should know

Calling Party Name Display

Information appearing on the LCD display screen, such as the caller’s name and phone number. The system must have CPND enabled.

Category 5 (Cat5)

Cable and associated connecting hardware capable of transmitting at speeds up to 100 MHz, used by 10BaseT, 100BaseT4, 100BaseTX.

Category 5e (Cat5e)

Most Cat5 cable manufactured after 1996 also supports 1000BaseT (GigE) installations, and is designated Cat 5e. Cat5e cable normally has four pairs of copper wire.

Category 6 (Cat6)

Cable and associated connecting hardware capable of transmitting at speeds up to 200 MHz. Designed specifically to support 1000BaseT (GigE), it is also compatible with 10BaseT, 100BaseT4, and 100BaseTX installations. The cable normally has four pairs of copper wire.

Communication Server 1000

Your office communication system.

Date/time display

The current date and time when the IP Phone is in an idle state.

Directory Number (DN)

A number consisting of one to seven digits for an IP Phone, and also known as an extension number.
Terms you should know

Feature display
An area that shows status information about the feature in use. It also displays the name and status of the active session.

Feature Status Lamp indicator
An LCD or an LED that indicates a data message, contact, or feature status by a flash, wink, steady on, or off.

Fixed key
The hard-labeled keys on your IP Phone.

Flexible Feature Codes (FFCs)
Specialized codes entered using the dialpad that enable features (for example, Ring Again).

Goodbye key
A fixed key used to end an active call.

Indicator
An LCD or an LED that indicates the status of a feature by the flash, wink, steady on, or off.

Information display
Any display of call activity, lists, prompts, and status of calls. If the text message exceeds the available display area, a scroll arrow icon indicates that you must use the scroll keys to view the remaining text.

Interrupted dial tone
A broken or pulsed dial tone that sounds when you access some features on your IP Phone.

Message/Inbox
A fixed key on your IP Phone 1140E that connects to your voice messaging system when the key is pressed.
Navigation keys

Keys used to scroll through menus and lists appearing on the LCD display screen.

Off-hook

Any line selected to make a call or receive a call. The term off-hook is applied whether (a) the end user lifts up the handset, (b) the end user presses a line key, (c) the call is automatically answered at the IP Phone, or (d) a line is automatically selected for an outgoing call.

Paging tone

A special tone (two beeps followed by dial tone) that sounds when you use the Radio Paging feature.

Ringback/ring tone

A sound indicating that a call you have made is ringing at its destination.

Services key

A fixed key used to access options such as Telephone Options, Password Admin, Virtual Office Login, Virtual Office Logout, Test Local Mode, and Resume Normal Mode.

Shared Directory Number

A DN (extension) that is shared by two or more persons.

Special Prefix code (SPRE)

Special codes entered using the dialpad, followed by a two-digit access code, that enable features (for example, Call Forward All Calls requires entry of SPRE code + 74).

Soft keys

A set of keys programmed by your system administrator. These four keys, directly below the display area, have four
programmable layers. These keys are also used to configure parameters in the Telephone Options menu.

**Special dial tone**

The three consecutive tones followed by dial tone that you hear when accessing IP Phone features.

**Station Control Password (SCPW)**

Enables security features on your phone to prevent others from making calls from your IP Phone and to prevent access to protected features (for example, Remote Call Forward).

**Status messages**

A message displayed to inform the user of important information. A right arrow appears if more than one Status Message is present. Examples of Status Messages include: Message Waiting, All Lines Forwarded to: 6453, Do Not Disturb On, Ring Again active, and Ringer is OFF.

**System or Switch**

Your office communication system.

**Switchhook**

A button on which the handset presses down, disconnecting your call when you replace the handset. The handset (when lifted) releases the switchhook, and you either answer a call or you receive a dial tone to make a call.

**User interface**

Screen displays that interact with the end user as a result of an action or event.

**Visual Alerter/Message Waiting indicator**

An LCD or an LED that flashes to indicate that a message is waiting or when the ringer is on.
