Welcome to the LCC Student Health Center!

The Health Center is managed by the University Health Services at Manoa under an agreement between UH Manoa and LCC.

We provide high quality, low cost medical care on campus.

Our goal is to help students, faculty and staff achieve and maintain good health. We offer a variety of medical services.

Fees for services are reasonable. Please provide your health insurance information. Insurance claims submissions will be made for physician visits and other services.

If you do not have insurance, there will be charges for physician services, tests and immunizations.

Out-of-pocket payments are expected at the time of service, to be paid at the LCC Cashier’s Office. Statements for balances due will be sent from the Manoa office.

A financial “hold” will be placed on your records for outstanding balances over 30 days.

Come in or call for more information or an appointment. We look forward to serving you!

**HOURS OF OPERATION**

**LCC Student Health Center is open:**
