How to switch between input languages.

1. You need to enable Thai language in Window Operating System first. If you are not done so, please refer to How to enable Thai language document.
2. Go to “Control Panel”
3. Locate the “Regional and Language Options” icon
4. Double click to open it
1. Go to the tab “Languages”
2. Check “Details…”
3. At the tap Setting under Preferences section, click “Key Settings…”
4. Under the Advances Key Settings window, click “Change Key Sequence”

5. Select options how you want to switch between input languages, then click “OK” to apply the settings.
