

Behavioral Health in Hawai'i during the Pandemic - Update

In 2020, Hawaii had the
highest suicide contemplation
response in the nation

Of those who took an online
depression screening from
Jan - Dec 2020, **41%**
reported frequent thoughts
of suicide

The state has seen increases
in anxiety related to:

- COVID-19
- Finances
- Employment

~ **40%** of people
in quarantine or isolation
centers had a SUD or a
co-occurring SUD and
mental health disorder

The Hawaii Cares Program
experienced a **50%**
increase in call volume in
2020 than 2019

About **75%** of resources
from the Alcohol and
Drug Abuse Division are
spent on SUD-specific
treatment
