About UHSHC

For over the past 45 years the University of Hawai‘i Department of Communication Sciences and Disorders has been training skilled clinicians to serve the Hawai‘i community. The program is part of the John A Burns School of Medicine (JABSOM).

The University of Hawaii Speech and Hearing Clinic (UHSHC) serves as an on-site teaching facility for speech pathology graduate students enrolled in the University of Hawaii Department of Communication Sciences and Disorders. Graduate students work directly with patients under the close supervision of UH faculty who are certified speech language pathologists and audiologists.

Our clinic is equipped with advanced technologies for both speech and hearing services, including a state-of-the-art audio-visual monitoring system.

Our clinic is part of the University Health Partners (UHP) which is the faculty practice organization created to support the clinical, academic and research activities of the University of Hawai‘i John A Burns School of Medicine (JABSOM).
