University of Hawai‘i at Mānoa Children’s Center

POLICY FOR MILK INTOLERANCE

An Early Childhood Pre-K Health Record Supplement form (DHS 908) & UHMCC Chronic Illness/Allergies Health Record form must be submitted at the beginning of every school year.

Physician may state that soymilk may be substituted for cow’s milk; UHMCC will not be able to provide this alternative. Student’s families may bring soymilk for their child under these conditions:

1. Only a one-week supply of product will be stored at UHMCC. Any left over product will be returned to family or discarded at the end of the week.
2. The product must be in its original container and commercially sealed.
3. The container must be labeled with your child’s name.

UHMCC will provide water for those children’s families who submit a physician’s note for their child’s milk intolerance.
