

# Digging for Gold:

## Evaluating the Impact of Your Early College Program

Dan Rempala, Hawaii P-20 Evaluation Specialist

# What will happen in the next 60 minutes?

- I will first talk about how Early College has been evaluated in the past, including:
  - Ongoing evaluation from the Data Exchange Partnership
  - An external evaluation paid for by Hawai'i P-20
- I will then discuss options for evaluating your programs and respond to your many, many questions

# Dual Credit Students: Increasing in Participation

# Dual Credit High School Graduates: Enrolling in College at Much Higher Rates

# Dual Credit High School Graduates: Remaining in college at higher rates (First fall to second fall college persistence)

# Impact of Dual Credit on Low Income Students

**Economically Disadvantaged Graduates with Dual Credits attend College at Higher Rates (than those without Dual Credits)**

Class of 2016 College Enrollment Rate

# Impact of Dual Credit on Low Income Students (Cont'd)

## Economically Disadvantaged Graduates With Dual Credits Remain in College At Higher Rates

Class of 2015 One Year College Persistence Rate

HAWAI'I P-20  
Partnerships for Education  
Spark. Transform. Excel.

# College Enrollment Rate Disaggregated by Gender, Race/Ethnicity, Economic Status

Class of 2016 college enrollment rate

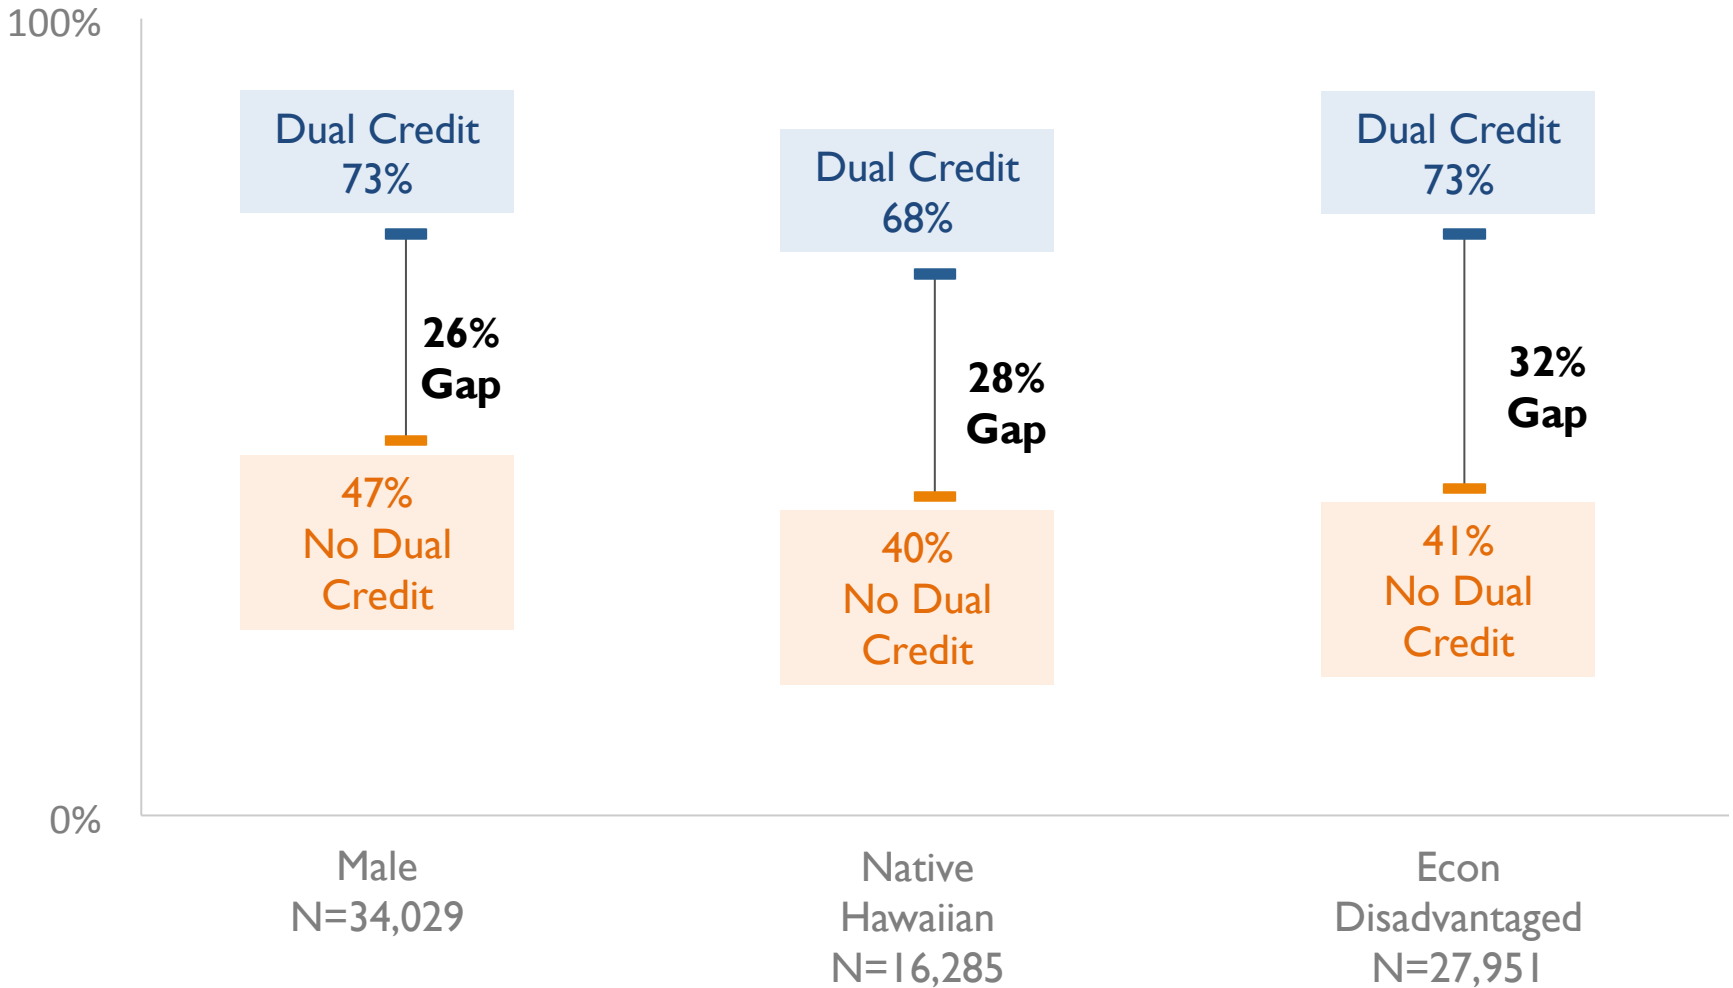

HAWAI'I P-20  
Partnerships for Education  
Spark. Transform. Excel.

# College Enrollment Rate Disaggregated by DC Participation & Gender, Ethnicity, Economic Status

## College enrollment rate for high school completers

# Early College Classes Increase

## Number of Early College Classes Offered by UH System

*Only includes courses offered at public and charter schools*

*Course totals from Summer 2018 have not been finalized*

# Evaluation of Hawaii's Early College High School Program

Preliminary Findings: 2014-15 Cohort

---

# Research Question Addressed

---

What is the impact of participating in Hawai'i P-20 funded Early College courses on student academic outcomes?

These include:

## **High School Outcomes**

- High School GPA
- Dual Credits Attempted and Earned

## **Postsecondary Outcomes**

- College Credits Attempted and Earned
- College Enrollment
- College Persistence

# Data Sources

---

Data for this portion of the evaluation were provided by the Hawaii State Department of Education in a two-step process:

1. We identified 2014-15 graduates who had participated in a Hawai'i P-20 funded Early College course and examined student characteristics prior to participating in the programs (i.e. demographic data and academic data).
2. After conducting a matching process, we requested outcomes data for the 2014-15 cohort and their matched comparisons.

# Matching Design

---

AIR considered several matching approaches to find the students that were most similar to Hawai'i P-20 funded Early College students but did not participate in the programs.

- Ultimately, we chose to match Hawai'i P-20 funded Early College students to other students who graduated from the same school but did not participate in the program.
- Matching was based on 8<sup>th</sup> grade academic achievement in reading and mathematics, attendance and student demographic characteristics.

# Matching Design

Prior Achievement

Absences

# Matching Design

Demographics

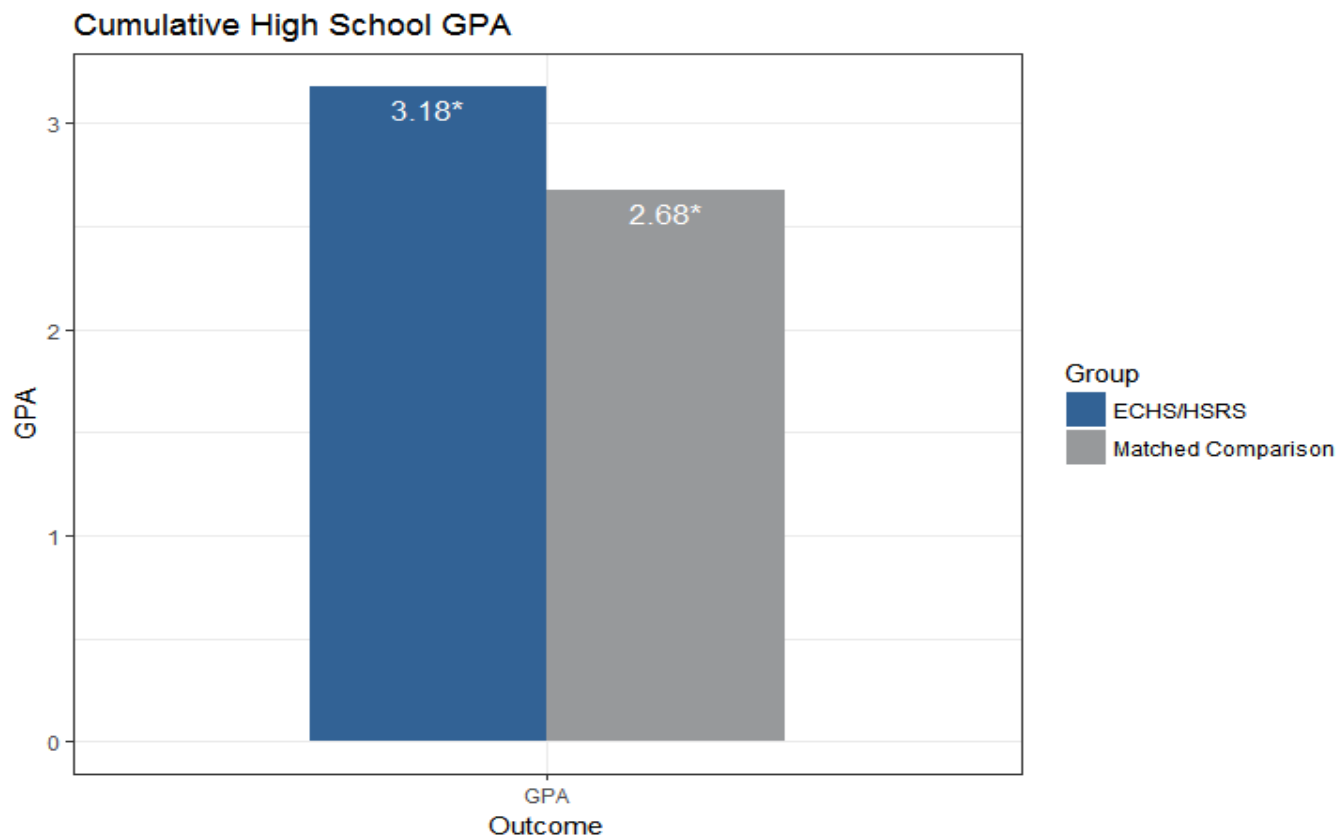

# Outcomes

---

# High School Outcomes

The Hawai'i P-20 funded Early College students outperformed their matched comparisons in cumulative high school grade point average.

# Outcomes

---

Preliminary results indicate a statistically significant effect of Early College participation in terms of:

- **High School Outcomes**
  - High School GPA
  - Dual Credits Attempted and Earned by High School Graduation
- **Postsecondary Outcomes**
  - College Credits Attempted and Earned Within First Year of College
  - College Enrollment
  - College Persistence

# Postsecondary Outcomes

Hawai'i P-20 funded Early College students were more likely to enroll in college the first semester after high school graduation.

# What does all this mean for you?

- First, why bother conducting a program evaluation?
- Examples:
  - Tracking successes
  - Proving efforts/time commitment/financial investments
  - Justifying need for more resources
  - Program improvement

# Research Questions

## Second, what is your research question?

- If you're interested in program growth, you have to establish a baseline
- Examples:
  - # of courses offered
  - #/% of students participating
  - #/% of students participating to a specific degree (e.g. 6 credits)
  - #/% of students taking specific courses
  - #/% of specific students participating (e.g. gender, ethnicity)

# Research Questions (cont.)

- If you are interested in the impact of dual credit, you might want a comparison group.
- Examples:
  - Identify a matching group based on specific characteristics
  - Compare to the rest of the student body
  - Compare subgroups within a larger sample (e.g. 3 credits vs. 6 credits)

## Research Questions (cont.)

- Alternatively, one could conduct a pre-test/post-test comparison with the group of interest
  - For example, if I thought that EC participation promoted particular soft skills, I could measure those before and after the first semester of EC.

# Research Questions (cont.)

Third, what impact do you think your program is going to have on participants?

- Be sure that you can actually obtain the outcomes you are interested in.
- Examples:
  - HS GPA
  - HS on-time graduation
  - Passing a “gateway” course
  - College enrollment
  - College persistence
  - College graduation

# Do you get cross-sector data?

Contact Hawaii DXP (<http://hawaiidxp.org/index>):

“The Hawai'i Data eXchange Partnership, or Hawai'i DXP is a statewide cross-agency, longitudinal data system that links information from infancy through early learning, K-12 and postsecondary education, and into the workforce. Hawai'i DXP will help guide decisions and policies to improve learner and workforce outcomes for the benefit of our community.”

- The “Resources” page on the DXP website contains a Confidentiality Form and a Data Request form.
- You can also email or call them if you have any questions.
