Professor, Urban and Regional Planning
Director, Institute for Sustainability and Resilience
Chair, Honolulu Climate Change Commission

And

Michael Bruno, PhD
Vice Chancellor for Research and Interim Chancellor for Academic Affairs
University of Hawai'i at Mānoa

HB 1487 – RELATING TO CLIMATE CHANGE

Chair Lowen, Vice Chair Wildberger and members of the committee:

The University of Hawai'i strongly supports HB 1487. It establishes a Honolulu shoreline climate protection pilot project to develop a plan to protect urban Honolulu from the impacts of climate change and be used as a model for the entire State. This measure also provides funding to start the planning process for deciding how the urban corridor will respond to climate change, and, more specifically, sea level rise, as we move into a future characterized by the strongly accelerating impacts of global warming. We believe this is an important step to increasing the resilience of our communities. We need to move forward on the planning process immediately, as community input and eventual implementation will take time to do well and avoid maladaptation. We also strongly urge the state to approach this pilot project with a holistic and collaborative approach that integrates relevant federal and county partners.

Thank you for the opportunity to testify on this measure.
