Features of the M8004

C. The red indicator light flashes when the telephone rings and when you have a voice message (if you subscribe to a voice messaging service with voltage message waiting).

D. Use **Flash** to access telephone network services such as Call Waiting and Three-Way Calling. (To subscribe to these services, contact your telephone company.)

Answering a Call Waiting call – When you hear the Call Waiting tone, press **Flash** to place your original call on hold and answer the new call. To return to the original call, press **Flash** again. Press **Flash** to alternate between calls.

Making a Three-Way call – First, make a call. When the first call is answered, press **Flash**. That call is put on hold, and you will hear a dial tone. Make the second call. When the second call is answered, press **Flash** again to link the calls together.

E. Press **Redial** to redial the last telephone number that was dialed.

F. Press and hold down **Mute** when you don't want your caller to hear you. Release **Mute** when you want to be heard.

G. Ringer Volume – Slide this switch to set the loudness of the ringer.

H. Handset Speaker Volume – Slide this switch to set the loudness of the handset.
