

UNIVERSITY
of HAWAII®
MĀNOA

Distinguished
Lecture Series

"The need for a biophysical approach to economics and some implications for Hawaii"

Dr. Charles A. S. Hall

Dept. of Environmental and Forest Biology S.U.N.Y.

3:30 PM January 9, 2013

Architecture Auditorium

"Energy used by the economy
is a proxy of the amount of real
work done in our economy."

"[The basic models of economics] are
enormously and deeply flawed, in a way
and to a degree that is almost inconceivable
and even an embarrassment to someone
who has a background in natural sciences
or who believes in generating truth from the
use of the scientific method."
