

**Notice of Meeting**

**UNIVERSITY OF HAWAI'I**

**BOARD OF REGENTS COMMITTEE ON ACADEMIC AND STUDENT AFFAIRS**

Members: Regents Tagorda (Chair), Putnam (Vice-Chair), Acoba, Bal, Higa, Kudo, and Portnoy

**Date:** Friday, May 18, 2018

**Time:** 1:30 p.m.

**Place:** University of Hawai'i at Mānoa  
2465 Campus Road  
Executive Dining Room  
Honolulu, Hawai'i 96822

**AGENDA**

**I. Call Meeting to Order**

**II. Approval of Minutes of March 8, 2018 Meeting**

**III. Public Comment Period:** All written testimony on agenda items received after posting of this agenda and up to 24 hours in advance of the meeting will be distributed to the board. Late testimony on agenda items will be distributed to the board within 24 hours of receipt. Written testimony may be submitted via US mail, email at [bor@hawaii.edu](mailto:bor@hawaii.edu), or facsimile at 956-5156. Individuals submitting written testimony are not automatically signed up for oral testimony. Registration for oral testimony on agenda items will be provided at the meeting location 15 minutes prior to the meeting and closed once the meeting begins. Oral testimony is limited to three (3) minutes. All written testimony submitted are public documents. Therefore, any testimony that is submitted verbally or in writing, electronically or in person, for use in the public meeting process is public information.

**IV. Agenda Items**

**A. For Review & Recommend Board Approval**

1. Implement a Mandatory Student Fee to Provide all Kapi'olani Community College Students With a U-Pass for TheBus
2. Acceptance of Community College Institutional Self-Evaluation Reports
3. Overview of Program Approval Process
4. Change from Provisional to Established Status: Certificate of Achievement in Medical Assisting at Kaua'i Community College
5. Change from Provisional to Established Status: Bachelor of Applied Science Degree in Engineering Technology at University of Hawai'i Maui College

6. Change from Provisional to Established Status: Doctor of Nursing Practice Degrees at the University of Hawai'i at Hilo and the University of Hawai'i at Mānoa
7. Change from Provisional to Established Status: Leeward Community College, Associate in Science in Health Information Technology
8. Degree Change: Re-designate the established Associate in Arts in Teaching (A.A.T.) Degree as an established Associate in Science in Teaching (A.S.T.) Degree at Leeward Community College
9. Degree Change: Re-designate the established Bachelor of Arts (B.A.) in Chemistry Degree as an established Bachelor of Science (B.S.) Degree in Chemistry at the University of Hawai'i at Hilo

B. For Information & Discussion

1. Committee Annual Review

**V. Adjournment**

18 MAY 10 P5:59

Office of the Chancellor

UNIVERSITY of HAWAII  
**KAPI'OLANI**  
COMMUNITY COLLEGE

RECEIVED

February 20, 2018

'18 MAY 10 A11:31

**MEMORANDUM**

UNIVERSITY OF HAWAII  
PRESIDENT'S OFFICE

TO: Jan Naoe Sullivan  
Chair, Board of Regents

VIA: David Lassner *David Lassner*  
President

VIA: Donald O. Straney *Donald O. Straney*  
Vice President for Academic Planning and Policy

VIA: John Morton *John Morton*  
Vice President for Community Colleges

FROM: Louise Pagotto *Louise Pagotto*  
Interim Chancellor

SUBJECT: REQUEST TO IMPLEMENT A MANDATORY STUDENT FEE TO  
PROVIDE ALL KAPI'OLANI COMMUNITY COLLEGE STUDENTS  
WITH A U-PASS FOR THEBUS

SPECIFIC ACTION REQUESTED:

It is requested that the Board of Regents approve the request from the Student Congress at Kapi'olani Community College to implement a mandatory \$40 (forty dollar) student fee to provide all students with a U-PASS for TheBus each semester.

RECOMMENDED EFFECTIVE DATE:

Upon Board of Regents approval for the Fall 2019 semester.

ADDITIONAL COST:

None

PURPOSE:

The current price for students to purchase a U-PASS for TheBus is \$225 per semester. This mandatory student fee would provide a U-PASS for all students at Kapi'olani Community College for \$40 per semester.

BACKGROUND:

Every spring semester, Kapi'olani Community College's Student Congress (Student Congress) partners with the College's Office for Institutional Effectiveness (OFIE) to conduct a survey for students. This survey includes topics of interest identified by Student Congress throughout the academic year. The annual survey conducted in Spring 2017 centered around student fees. One area that the results identified as needing more attention was "transportation". Nearly 60% of students identified that they use personal vehicles, and 4.5% carpool. The second highest mode of transportation identified (28%) was TheBus. In efforts to increase and improve parking for personal vehicles and promote more sustainable transportation choices, Student Congress approached the College administration for initial discussions about TheBus U-PASS.

We have, in consultation with the students, identified the parameters for pricing and terms. We have engaged in initial conversation with the Department of Transportation, and the proposal for the U-PASS is definitely feasible. Each U-PASS is valid for a time frame that is actually before the start of the semester and ends after the semester, thus creating no lapse in accessibility to these services for a student continuing from fall semester to spring semester. Upon approval of the fee by the Board of Regents, the College will complete formal negotiations with the Department of Transportation following the established procedures.

In an effort to consult with the student body of the 2017-2018 academic year, Student Congress conducted an informal survey with students in Fall 2017, asking if they were still in favor of paying a \$40 U-PASS fee. Over the course of two weeks, the Student Congress Executive Team polled a total of 318 students. Over 90% of students indicated they would support a \$40 U-PASS fee.

Student Congress had numerous discussions throughout the Fall 2017 semester and passed a resolution in support of the U-PASS fee in January 2018. To ensure that the Student Congress broad-based support for the proposed fee, the students of Kapi'olani Community College's Student Congress elected to officially consult with the student body through an official ballot.

To ensure validity of the results, Student Congress partnered with the College's Office for Institutional Effectiveness (OFIE) to conduct an official vote on the \$40 U-PASS fee. OFIE agreed to conduct the official vote and leave the ballot open for two weeks.

Students were contacted via email to vote on the fee; additionally, open forums were held on campus for students to voice opinions and ask questions. Student testimony was also encouraged to be emailed to Student Congress. One hundred percent (100%) of the testimonies from students that Student Congress received were all in favor of the fee. To ensure reach to students, there was also an outreach campaign to increase awareness of the fee through flyers, tabling, and standing in high-traffic areas to solicit a vote. The results of the vote are 97.42% in favor, and 2.58% opposed.

ACTION RECOMMENDED:

It is recommended that the Board of Regents approve the request from the Student Congress at Kapi'olani Community College to implement a mandatory \$40 (forty dollar) student fee to provide all students with a U-PASS for TheBus each semester. Upon approval of the fee by the Board of Regents, the College will complete formal negotiations following the established procedures.

c: Executive Administrator and Secretary of the Board Oishi

Item IV.A.2.  
Community College  
Institutional Self-  
Evaluation Reports

**MATERIALS**

# **Planned Improvements Resulting from the Institutional Self Evaluation Report *Hawai'i Community College***

## **Quality Focus Essay**

As a result of self-reflection during the Institutional Self Evaluation Report (ISER) process, members of the Hawai'i Community College (Hawai'i CC) Kauhale identified two areas on which to focus to better meet the mission of the College and to ultimately increase student learning and achievement. These two action projects aim to improve the College's 1) integrated planning process, and 2) student first-year experience.

### **Action Project 1: Integrated Planning**

The goal of institutional planning is to steer the College towards effectively fulfilling its mission. Planning incorporates assessment of student learning, program review, strategic and academic plans, and resource allocation for the attainment of institutional objectives. Since integrated planning involves broad-based coordination and collaboration across the College, it is important to create a process that is clear, well-communicated, and useful.

In an attempt to define the relationships between various planning components of the College and to institutionalize processes that steer the College forward in a unified and coherent manner, the Office of the Chancellor issued HAW Policy 4.201 in November 2011, after a broad, collaborative review. While this policy outlined the intentions of the Kauhale, implementation proved challenging for a variety of reasons. A sound integrated planning system requires the capacity to maintain its various components and ensures active participation by a broad spectrum of the Kauhale. While integrated planning invited participation and functioned as described in the policy, the recent ISER process and Institutional Capacity Analysis Tool (ICAT) survey made evident the need to streamline processes to make the College's integrated plan more transparent, meaningful, and sustainable over time.

#### Desired Goals/Outcomes

The goal of Action Project 1 is to strengthen the College's integrated planning processes to be more efficient, streamlined, and timely. This includes leveraging technology tools (including the recently acquired Campus Labs OUTCOMES assessment management system) for better data and information gathering and improved workflow. Finally, the goal is to make the integrated planning process more Kauhale-based, increasing participation and commitment, as well as improving communication and transparency, all directed towards the shared outcome of enhancing student success.

#### Actions/Steps to Be Implemented

- The College establishes where improvement of the integrated planning processes is needed. From information gathered through the ISER process and ICAT discussions, the College will review where and how to consolidate and streamline campus plans, the program and unit review processes, and the allocation of resources.

- The administrative team, College Council, and Accreditation Liaison Officer (ALO) will create an Integrated Planning Review (IPR) Task Force that will compile and analyze data and survey results.
- With the administrative team, College Council, and ALO, the IPR Task Force will research best practices and models for high quality integrated planning.
- The IPR Task Force will develop an updated model for implementation. This will include strengthening the links between outcomes assessment and the program and unit review process (PURP), and reviewing and clarifying the relationship between the PURP and budget allocation.
- The College will implement the revised model and draft relevant policies.
- The chancellor, administrative team, and IPR Task Force will evaluate the updated model and revise and improve as needed.

**Action Project 2: First-Year Experience**

The goal of the College is to provide high quality learning opportunities that lead students to degree completion and employment. To achieve this goal, the College aims to support each student from entry to end point. This project focuses on improving experiences for students at their most vulnerable stage: their first year at the College. Recognizing the potential to improve the retention of students, the College Kauhale will focus on meeting the needs of students during their first year, both inside and outside the classroom. This project develops a coordinated program between instruction, student services, and academic support that seeks to improve retention and persistence rates, and ultimately degree attainment.

According to 2017 IPEDS statistics, 31.4% of full-time, degree-seeking students who entered Hawai'i CC in fall 2014 completed a certificate or degree in three years. Only 48% of first-time degree-seeking students in fall 2016 returned in fall 2017. Action Project 2 targets the development of high engagement strategies for an effective first-year experience that will contribute to larger, wider ranging efforts of Integrated Student Support (ISS), Student Success Pathways (SSP), and other initiatives to increase retention and persistence. This project will focus on training instructors, peer mentors/tutors, and academic and student support advisors and counselors to develop and implement these strategies.

Desired Goals/Outcomes

The outcome of Action Project 2 is the development of high engagement approaches for instruction and academic and student support that will contribute to a positive first-year experience for students. This Action Project will support other College efforts to create an effective first-year experience (FYE) program that increases Hawai'i CC's attainment of institutional goals for persistence and completion, and ultimately, students' graduation rates and achievement of their academic and career goals.

Actions/Steps to Be Implemented

Launch of instruction and student support training:

- The College will form a FYE Campus Planning Team that will introduce and develop a plan to provide training of faculty and student support faculty/staff in the use of high engagement strategies.

- An initial group of instructors and student support faculty/staff will be trained to implement high engagement strategies.

#### Implementation:

- A bank of resources and professional development materials for high engagement strategies will be made available to the entire campus.
- A cohort of students will be identified to enroll in classes utilizing the high engagement strategies.
- Tutors and peer mentors will be trained.
- Strategies for high-touch support for faculty advising and counseling will be adopted and counselors and advisors will be trained.
- The FYE Campus Planning Team will collect, analyze, and report out student persistence and retention data for students who take one or two classes from trained instructors.

#### Scale up:

- Given the data, as appropriate, teachers, counselors, advisors, tutors, and peer mentors will be offered training in high engagement strategies.
- The FYE Campus Planning Team will monitor success by collecting and analyzing student persistence and retention data and will adjust strategies, as needed.

#### Integration

- The FYE Campus Planning Team will work with the SSP Team and UHCC System's ISS Team to integrate other components of first-year experience: onboarding, retention, persistence measures.
- The FYE Campus Planning Team will monitor success by collecting and analyzing student persistence and retention data and will adjust strategies, as needed.

### **Other Planned Improvements**

- Schedule data updates to reflect current information (transparency) Std 1.b.3.
- Determine how assessment management system and assessment design can enable disaggregation of assessment results Std 1.b.6.
- Creation of a systematic formalized process and annual schedule and timeline for website content review and updating Std 1.c.1.
- Review of Liberal Arts course sequencing and prerequisites Std 2.a.5.
- Gather, analyze and provide data to the College on a regular basis (post in Fact Book) Std 2.a.7.
- Transition to UH Mānoa's Foundations and Diversifications General Education (GE) requirements for AA and AS degrees Std 2.a.12.
- Formalize comprehensive assessment of student needs regarding Student Services Std 2.c.1, 2.c.3.
- Reorganize Student Life structure Std 2.c.4.
- Create evaluation/assessment process or system to measure effectiveness of placement instruments/qualifiers Std 2.c.7.

## Planned Improvements Resulting from the Institutional Self Evaluation Report Honolulu Community College

### Quality Focus Essays

Honolulu CC has centered on two initiatives to further improve student achievement and student success:

- Purposeful Engagement for Student Success
- Enhanced Support for Distance Education Students

#### **QFE #1: Purposeful Engagement for Student Success**

Research shows that the more students become engaged in the college experience, inside and outside the classroom, the more likely they will reach their educational objectives.

The desired objective of this initiative is to increase student persistence and success through purposeful engagement of faculty, staff, administrators, and students.

**Goal #1:** Develop plans to document and increase faculty-to-student engagement strategies in both curriculum content and pedagogy.

*Example of steps to be taken:* Create a comprehensive orientation for new faculty focused on Honolulu CC's core value of "student centered, student focused" that provides professional development on student engagement.

**Goal #2:** Increase strategic and integrated communication among and beyond student affairs and academic support professionals to provide comprehensive services to students.

*Example of steps to be taken:* Expand usage of all student services in the Starfish/MySuccess technology tool so that instructional faculty can refer students to an array of support services (such as counseling/advising, retention services, library support services, career services, tutoring).

**Goal #3:** Engage students early and continuously in academic, extra-curricular, socio-emotional, and work-based learning in and around the campus. Remove barriers to student entry and retention to promote learning and engagement.

*Example of steps to be taken:* Suggest improvements to existing practices in the application, orientation and registration processes to promote student enrollment and persistence.

**Goal #4:** Delete, revise, and add infrastructure and policies with the goal to support student success via the purposeful engagement initiatives.

*Example of steps to be taken:* Review real-time student-level data and predictive analytics to proactively reach out to students at high risk for not being retained

#### **QFE 2: Enhanced Support for Distance Education Students**

The role, scope, and access to online and virtual learning environments will only increase over the coming decade as students use technology to access postsecondary education. In line with the institution’s core value to offer students a supportive, high-quality learning environment, Honolulu CC will be creating processes to improve support services for distance education students.

The desired objective is to increase use of support services and increase successful distance education course completion.

**Goal #1:** Develop a reliable method to track the use of support services by students in distance education (DE).

*Example of steps to be taken:* Investigate the merits of revamping the Academic Counseling webpage to enable students to connect to appropriate student support resources in addition to counseling.

**Goal #2:** Develop and implement plans to increase use of support services for DE students and other off campus students such as evening students.

*Example of steps to be taken:* Create a portal on Lualima, which DE students needing additional writing support will be able to access materials and services that currently are offered to face-to-face in the Writing Center

Other Planned Improvements

Changes Arising Out of the Self-Evaluation Process				
<b>Change, Improvement, and Innovation</b>	<b>Standard</b>	<b>College Leads</b>	<b>Timeline</b>	<b>Outcome</b>
Increase international students	I.A.2	Administration, Faculty, Student Services	Spring 2019 and ongoing	Higher enrollment of international students
Increase enrollment of Native Hawaiian and other students from underserved populations	I.A.2 I.B.6	Administration, Outreach, Hulili Ke Kukui, Po’i Na Naru, Faculty, Student Services	Spring 2019 and ongoing	Higher rates of students from underserved groups
Strengthen sustainability efforts at the College	I.B.9 III.B.4	Sustainability coordinator	Spring 2018 (ongoing)	Increase the awareness and action about sustainability and connection to the strategic plan
Increase culture of assessment at the College	I.B.1-4 I.B.5 II.A.3 II.A.4	PPIR, Assessment Task Force, CCIE, CSSC, Administration	Spring 2019 (and ongoing)	Elevate the level of discussion and engagement in data for decision-making

Standardize format of SLO assessment reporting using assessment database	II.A.3	Institutional Assessment Specialist, CPC, VCAA, division chairs,	Spring 2019	More comprehensive assessment of courses and programs
Implement web database for all course syllabi	II.A.3	VCAA, CPC, division chairs	Spring 2019	Allow students to view syllabi for any course
Designed program to attract returning students	II.A.6	Counselors, Deans, VCAA	Spring 2018 (ongoing)	Unable to recruit enough students so rethinking approach

# Planned Improvements Resulting from the Institutional Self Evaluation Report

## *Kapi'olani Community College*

### Quality Focus Essay

**The Assessment of Student Learning Outcomes QFE** addresses specific issues while **the Engagement for Student Success QFE** focuses on distinct goals for each calendar year.

The **Assessment of Student Learning Outcomes** QFE goals are

- To update the assessment process under the guidance of an Assessment Coordinator.
- To review the Taskstream process and to create queries and reports in Taskstream to inform SLO and SAO assessments.
- To update the General Education Outcomes and to map SLOs and SAOs to the revised Institutional Learning Outcomes and General Education Outcomes.
- To continue innovative workshops and programs to further engage faculty and staff and explore impactful assessment activities across the College.

During the third year, the College will close the loop and make appropriate changes based on completed analyses, including campus feedback on SLO and SAO assessment. Fostering and increasing campus engagement in SLO and SAO assessment will deepen conversations around student learning and, ultimately, will increase student success.

**The Engagement for Student Success QFE** has distinct goals for each year of the QFE. Action plans to accomplish the goals will be created through the Student Success Pathway plans. In March 2017, each department, program, unit, and governance organization created goals and action plans to improve student success resulting in 53 plans being submitted and 47 out of 50 Strategic Plan items addressed. This was unprecedented participation across the campus, and therefore, Student Success Pathway planning was chosen as the process to address the QFE.

The timeline for the QFE starts in January 2019; however, since the Student Success Pathway plans started in 2017, the **Engagement for Student Success QFE** already has a framework and essential data to review and move the process forward. The goals for each year are

- Year 1 (2019) - To increase course completion for all students and fall-to-spring persistence
- Year 2 (2020) - To increase the number of certificates and degrees for all students, increase student transfers within and outside of the UH system; increase the number of certificates and degrees for Native Hawaiian students; increase the number of certificates and degrees by Pell grant recipients; and continue to increase the number of STEM certificates and degrees.
- Year 3 (2021) - To complete the College's 2022-2027 Strategic Plan with clear directions, goals, outcomes, and measures for student engagement, learning, achievement, and success.

## Other Planned Improvements

### 1. Easier Accessibility of Information

- Information for the Public
  - Student Achievement Data - Move student achievement data from the OFIE website to the College's main website.
  - CCSSE Reports: Move CCSSE data from the OFIE website to the College's website
  - Annual Report of Program Data (ARPDs) - Place ARPD link on the College's website.
  - Comprehensive Program Review (CPRs) - Move CPRs from the OFIE website to the College's website.
- Information for the Students
  - Articulation Agreements - Consolidate and publish articulation agreements on the College's website
  - Information on how to transfer - Copy "transfer out" information from the catalog to the College's website
  - Information on the program termination process - Publish information on the program termination process on the College's website
- Information for the faculty and students
  - Making syllabi available - Develop a system to make syllabi more readily available to students

### 2. Syllabi Review and Revision (Form-fillable cover page)

- Standardize information on a cover page for syllabi, including course student learning outcomes, that is adopted by faculty

### 3. Student Records: Archiving Certificates of Competency

- Establish a system for archiving continuing education Certificates of Competency

### 4. Technology Support for Students

- Create and implement a policy for student technology support

### 5. Participate in the Budget by all Constituents

- Institute an annual forum on the budget

## Planned Improvements Resulting from the Institutional Self Evaluation Report Kaua`i Community College

### Quality Focus Essay

As a result of College-wide Conversations with faculty, staff, and students held during the fall 2017 and spring 2018 semesters, two Quality Focus topics were chosen that are both related to student success: “Scheduling for Success” and “Integrated Career and Academic Services for Grades 11-14.” These topics align with UHCC Strategic Directions 2015-2021 (e.g., the Hawai`i Graduation Initiative), the College’s Institution-Set Standards, and several Kaua`i CC Strategic Goals (e.g., increase recent high school graduate enrollment/working adults, reduce the time degree: accelerate college readiness, and increase the number of graduates.)

### **Quality Focus Project #1: Scheduling for Success**

#### *Background*

The College currently offers face-to-face courses at its single campus location, augmented by a limited number of distance education offerings and a small but growing number of early college sections that are taught for high school students on the campus of the three major public high schools on the island. The College serves students from everywhere on the island, commuting to campus can be a barrier for some students because of:

- Distance to campus for students living on the west side or north shore
- Structure of roads on the island (coastal roads only)
- Traffic
- Time commitments to family and work
- Limited public transportation—(Not as easily utilized as in urban locations, although a partnership with Kaua`i County on a subsidized bus pass for students has been successful.)

#### *Project Description / Goals*

The project will encompass five years (2019-2023) with the goal of examining course scheduling at the College in terms of modality, location, time, days, length, etc., the best align with current student and community needs. This will not only aid in on-time degree completion but also provide novel scheduling opportunities for the community that will provide working adults more opportunities to pursue post-secondary education. Areas that will be explored include:

- Compressed courses (e.g., 8-week blocks)
- Part-time student course plans for non-cohorted academic programs
- Determine best practices for scheduling courses with nonstandard number of credits
- Expand summer offerings – (Pell grant availability is being marketed summer 2018)
- Develop offerings at off-site locations on north shore and west side to mitigate commute
- Address late registration and class cancellation procedures and timeline
- Consider year-long student registration
- Increase offering of hybrid courses
- Enhance place-based education with reworking of scheduling to provide time for hands-on learning in the community
- Other scheduling strategies as needed or discovered during this project.

#### *Major Data Source*

The Institutional Effectiveness Office will conduct a Workforce Survey and a Kaua`i Residents’ Survey over summer 2018. The survey will identify the scheduling needs of residents and employers on the island,

providing guidance to the College in selecting the most fruitful strategies of the ones mentioned here. The survey results will also aid in establishing the details of how the strategies are implemented.

## **Quality Focus Project #2: Integrated Career and Academic Services for Grades 11-14**

### *Background*

The College annually reviews its performance against its UHCC System Strategic Priority goals and the current Strategic Priority Plan spanning 2015-2022. One notable decline over the past three years is the number of direct high school enrollees, despite relatively stable senior class sizes at the three primary feeder high schools. Hence the College's focus on increasing enrollments in this population over the next several years.

### *Project Description and Goals*

This project will encompass a four-year period (Fall 2018-Spring 2022) to track participants from their junior and senior years of high school through two years of community college. Specific programming will engage students, especially during their senior year, to explore and possibly choose a major, complete an application, complete orientation, complete placement assessment with the availability of high school grades and coursework, develop an education plan, and enroll. The goal is to complete these activities by April of each academic year to enable students to enroll before they graduate from high school

### *Timeline, Responsible Unit/Person, and Assessment Metrics*

A pilot project was implemented at one feed high school in spring 2018 that included offering a #FindYourFuture Spark event day at KauCC for Juniors and Seniors, offering FAFSA and Scholarship workshops at the high school, and scheduling a Parents' Night for incoming students. These activities will be expanded and scaled -up to include all three feed high schools as well as three charter schools.

Baseline for success will be 2016-2017 data for activities or measures that exist, whereas baseline for new activities will be developed during the 2017-2018 academic year.

### **Other Planned Improvements**

Areas of improvement that required additional time to complete were added to the ISER as Action Items. The College identified seven of these items:

1. The College academic programs will develop course sequencing plans for part-time students, who are increasing at our college when compared to full-time students. This action item is directly related on one of our Quality Focus Essays, Scheduling for Success. (II.A.6.2)
2. The College will dedicate a College Conversation and convene a student focus group to develop strategies to increase student participation in both student government and college committees during the 2018-2019 academic year.
3. The College will use the current Administrative Services survey results to establish baseline target values for future surveys. The survey will be given every two years in the future and used to inform the Administrative Services Annual Program Review Update (APRU.) The next survey will be disseminated in 2019
4. The Human Resources office will develop a list of review dates for APT evaluations to remind supervisors of review deadlines for the 2018-2019 academic year.

5. The College will create a guide for orienting and mentoring lecturers prior to the Spring 2019 semester.
6. The Professional Development Coordinator will maintain an active three-year campus professional development plan that is visible to all employees of the College, beginning in August 2018.
7. Service outcomes will be developed or revised for both the Testing Center and Operations and Maintenance prior to the fall 2018 semester.

## **Planned Improvements Resulting from the Institutional Self Evaluation Report Leeward Community College**

The Institutional Self-Evaluation Report (ISER) is a culminating report of reflection and self-evaluation required of colleges accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC). The process begins about two years before the report is due and an evaluation team visits the campus.

The Self-Evaluation Core Team wrote the Quality Focus Essay (QFE) last in order to allow the self-reflective nature of the ISER uncover larger areas of focus for the College. During the Self-Evaluation process, the College identified two action projects that will have significance in improving student learning and student achievement over a multi-year period, and the team describes them in the QFE.

### Quality Focus Essay

In fall 2017, the first QFE project became clear as the campus embraced a single goal to drive campus initiatives. This goal is known as the Wildly Important Goal (WIG) and provides a unifying vision for the many campus initiatives currently underway to increase student retention.

The second QFE project developed out of a spring 2018 convocation breakout session that focused on the areas of improvement that the Self-Evaluation Core Team identified during the writing of the ISER. One area attracted much attention, and this led to the second QFE project that focuses on improving student learning by making outcomes assessment more meaningful for faculty and staff.

The WIG and the efforts surrounding assessment will help “provide the institution with multi-year, long-term directions for improvement of student learning and student achievement and demonstrate the institution’s commitment to excellence”.

### Action Projects

1. Increase student retention by keeping the students the College already has.
2. Improve student learning by making outcomes assessment more meaningful for faculty and staff.

***Action Project 1: Increase student retention by keeping the students the College already has.  
(Standard I.B.3)***

### Background

As one of seven community colleges, and one of ten colleges in the University of Hawai'i (UH) System, Leeward CC plays a critical role in preparing students for the workforce and for transfer to a four-year college. The University of Hawai'i Community Colleges (UHCC) System coordinates the efforts of the community colleges, ensuring alignment and focused movement on key initiatives. The

UHCC System has initiated several system wide projects in the past five years including a coordinated effort to accelerate students' progress through developmental education courses, the implementation of a pathway-driven registration system, and the creation of common exploratory majors to guide students' selection of coursework. The College goals and plans are guided by these system efforts.

The Self-Evaluation Core Team's review of the data indicated that retention is a gap area that has shown little movement despite the implementation of the system initiatives. Additionally, faculty and staff had begun to experience "initiative fatigue" with so many initiatives needing attention. The College selected its Wildly Important Goal (WIG) of "Keeping the Students We Have" to focus efforts on a single goal. Specifically, the goal is to increase retention and persistence by ten percent in 2017-2018. This goal drives everything the College does.

### Goals and Outcomes

- Increase student retention and persistence by ten percent in 2018-2019.
- Increase the sense of belonging at the College through activities that connect and support students.
- Increase the four-year graduation rate from 16 percent to 25 percent by 2020-2021.

### ***Action Project 2: Improve student learning by making assessment more meaningful for faculty. (Standard II.A.3)***

### Background

A second area in need of improvement is learning outcomes assessment. Since 2010, the College has made use of Tk20, which is a comprehensive online assessment planning, data management, and reporting system. The College made good progress with implementing Tk20 as the repository for learning outcomes assessment. However, faculty and staff did not find Tk20 intuitive or easy to use. Tk20 has become a deterrent to meaningful dialogue about assessment instead of a supportive tool.

### Goals and Outcomes

- Provide faculty and staff with training assessment practices and collaborative engagement opportunities with colleagues.
- Improve quality of outcomes assessment evidence in the College's database of assessment results.
- Increase faculty and staff satisfaction with the process for reporting assessment results.

### Other Planned Improvements

As part of the self-evaluation process, the Self-Evaluation Core Team identified several additional planned improvements including

- Convening a joint ad hoc committee to review the planning process and make recommendations for improvement (Standard I.B.)

- Revising the distance education peer evaluation form to provide feedback on regular and substantive interaction to ensure compliance with Federal regulations (Standard II.A.)
- Conducting a comprehensive review of the Policy on Shared Governance (Standard IV.A.)

## **Planned Improvements Resulting from the Institutional Self Evaluation Report *Windward Community College***

### **Quality Focus Essay: Native Hawaiian Parity**

Windward CC's mission includes a special commitment to serve Native Hawaiian (NH) students. We are proud to be an indigenous serving institution with over 40% of our enrollment consisting of NH students. This mission and commitment is evident in the resources we provide for Native Hawaiians, both institutionally and through attainment of extramural resources. The commitment to serving NH students resonates with our core values concerning diverse learning experiences, working collaboratively and inclusively, serving and supporting with aloha, and striving for excellence and carries with it Action Plans across all the Standards.

#### **Action Project 1: Disaggregation of Data by Race and Ethnicity: (Standards IA2, IB5, IB6, IB9, IIC5, IIID3)**

The College will systematize the disaggregation of data by race/ethnicity for enrollment, course success, persistence, graduation, and transfer.

#### **Goals**

1. Provide valid, consistent data on outcome attainment for Native Hawaiians and others across measures on an annual basis.
2. Improve quality of dialogue on parity measures.
3. Improve quality of decision-making and allocation of resources to promote parity.

#### **Action Project 2: Enrollment (IB9, IIC3, IIC6, IIID1)**

Within the institutional enrollment management plan, the College will identify and prioritize strategies at the institution which positively impact NH enrollment parity across the institution and within degrees/certificates.

#### **Goals**

1. Establish a systematic, evidence-based enrollment management plan for overall enrollment.
2. Delineate within the overall plan specific goals, actions, and activities for individual certificate and degree programs.
3. Allocate resources to strategies which positively impact NH enrollment.
4. Maintain overall enrollment at parity with population.
5. Attain parity with population for each individual degree program.

#### **Action Project 3: Persistence (IA3, IB9, IIC1, IIID1, IVB3)**

Based on accurate, disaggregated data, the College will identify and prioritize strategies at the institution which positively impact NH persistence, which positively impacts enrollment.

The goals for persistence are integrated into the goals for data disaggregation and enrollment. These relevant action steps needed to achieve these integrated goals are also integrated in the

action steps for these action projects. How the goals are integrated in other action project goals is delineated below:

### **Action Project: Disaggregation of Data by Race/Ethnicity**

**Goal 1:** Provide valid, consistent data on outcome attainment for Native Hawaiians and others across measures on an annual basis.

**Integrated Persistence goal:** Disaggregate NH Fall to Fall persistence.

### **Action Project: Enrollment**

**Goal 1:** Establish a systematic, evidence-based enrollment management plan for overall enrollment.

**Integrated Persistence Goal:** Establish a systematic, evidence-based enrollment management plan which considers persistence.

**Goal 3:** Allocate resources to strategies which positively impact NH enrollment.

**Integrated Persistence Goal:** Allocate resources to strategies which positively impact NH persistence.

**Goal 4:** Maintain overall enrollment at parity with population.

**Integrated Persistence Goal:** Maintain parity with population for persistence.

### **Action Project 4: Completion (IA3, IB3, IB9, IIA1, IIA10, IIC1, IIC5, IIC6, IIID1, IIID2, IVB3)**

The College will identify and prioritize strategies at the institution which positively impact NH completion (graduation and transfer).

### **Goals**

1. Implement strategies to promote NH graduation and transfer.
2. Allocate resources to strategies which positively impact NH graduation and transfer.
3. Overall graduation rates at or above parity with population.
4. Graduation rates within specific degrees at or above parity with population.
5. Transfer rates at or above parity with population.

### **Quality Focus Essay 2: Distance Education Parity**

Students receiving distance education at Windward CC *will achieve academic parity* with those receiving face-to-face education at Windward CC.

### **Action Project 1: Provide faculty who teach online with expert training and support (IB1, IIA2, IIA7, IIIA2, IIIA8, IIIA14, IIIC1, IIIC4, IIIC5, IVA4, IVB3)**

### **Goals:**

1. Ensure adequate staffing to provide training and support to faculty who deliver distance instruction.
2. Ensure adequate facilities to provide training and support to faculty who deliver distance

instruction.

3. Provide timely training and assistance to faculty who deliver distance education.
4. Foster peer support and mentoring among faculty and staff who deliver and assist with distance education.
5. Provide faculty with instructional technologies that best support effective instruction.

**Action Project 2: Provide equivalent support services to online and face-to-face students (IB6, IIA7, IIB1, IIC1, IIC3, IIC5, IVB3)**

**Goals:**

1. Institutionalize and centralize tutoring services for all students regardless of course format or location.
2. Extend and enhance student support services for distance learners.

**Action Project 3: Align institutional and programmatic practices for online instruction (IB4, IIA1, IIA6, IVA3, IVA4, IVB3)**

**Goals:**

1. Provide sufficient distance education courses to allow timely completion of degrees.
2. Ensure that the assessment of distance education courses is adequate and equivalent to face-to-face course evaluation.

**Other Planned Improvements**

1. Create an Online AA and AS in Veterinary Assistance Program
2. Modernize existing buildings on campus
3. Modernize teaching spaces on campus
4. Establish more Workforce Development Partnerships
5. Assure ADA Compliance in all documents disseminated on campus
6. Invest in sustainability options
7. Evaluate and modify, if necessary, SLO assessment policies and procedures

# INSTITUTIONAL SELF EVALUATION REPORT

IN SUPPORT OF REAFFIRMATION OF ACCREDITATION

## Introduction

---

### Mission

To promote lifelong learning, Hawai‘i Community College will emphasize the knowledge and experience necessary for *Kauhale* members to pursue academic achievement and workforce readiness.

Aligned with the mission of the UH Community Colleges, we are committed to serving all segments of our Hawai‘i Island community.

### Ke Ala Nu‘ukia

*No ka ho‘opi‘i ‘ana i ka ho‘ona‘auao ‘ia ‘ana kau i ka puaaneane, na ke Kulanui Kaiaulu ‘o Hawai‘i e kaulele ma ka ‘ike e pono ai nā hoa Kauhale i na‘auao a mākaukau ho‘i. Ma hope mākou o ke ala nu‘ukia o nā Kulanui Kaiaulu Hawai‘i a pau a na mākou nō e lawelawe i ko Hawai‘i nui kuauli.*

### Vision

Our *Kauhale* of lifelong learners will be productive and engaged citizens capable of meeting the complex challenges of our island and global communities

### Ka ‘Ōlelo Nu‘ukia

*E lilo ana nā kānaka ‘imi na‘auao o ke Kauhale i kupa ho‘oikaika a papau ho‘i i hiki ke ‘a‘a i nā kūlana nōhihi o ko kākou kaiaulu mokupuni a me ko kākou kaiaulu honua.*

## About Us

### *Kauhale*

Unique to Hawai‘i Community College (Hawai‘i CC) is the academic celebration of the indigenous host culture by embracing the concept of *Kauhale*, which traditionally means the Hawaiian village. *Kauhale* is an ‘*ohana* (family) of administrators, faculty, staff, students, their families, and the Hawai‘i Island community that contributes measurably to the success of the College’s mission and outcomes. *Kauhale* maximizes the “community” in the mission through dialogue, planning, innovation, and assessment across traditional College divisions and units. *Kauhale* enables all members of the College ‘*ohana* to recognize and celebrate individual skills, knowledge, and experiences as well as the skills, knowledge, and experiences of others. *Kauhale* unites all components of Hawai‘i CC into an “academic village without walls” for the overall success of its learners and the learners’ communities and their families, in the spirit of *E ‘Imi Pono* (seeking excellence) ([INTRO-1](#)).

### History

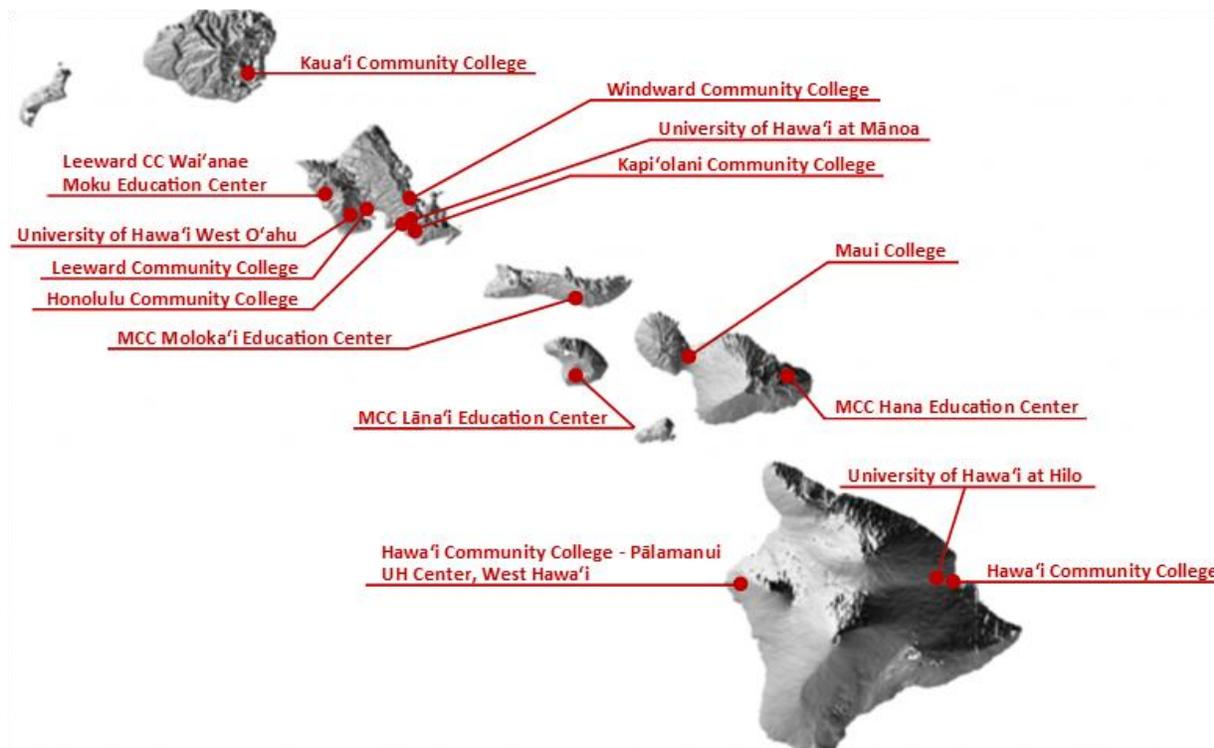

Hawai‘i CC is one of seven community colleges in the University of Hawai‘i (UH) system, which also includes four four-year institutions. The Hawai‘i Territorial Legislature initially established the College in 1941 as Hawai‘i Vocational School. With advancement in technology and expansion of educational opportunities into broader fields of technical training, the institution was renamed in 1956 as Hawai‘i Technical School. In May 1970, the institution joined the University of Hawai‘i as a comprehensive community college with the name Hawai‘i Community College. With the last name change, the administration of the College was transferred from the Hawai‘i Department of Education to the UH System. From 1970 through 1990, Hawai‘i CC was a unit of the University of Hawai‘i at Hilo (UH Hilo). In fall 1990, the UH Board of Regents (BOR) voted to separate the two institutions, and Hawai‘i CC assumed its own administrative responsibilities.

Other historical developments for the College were the offering of college degree classes in Kona beginning in 1982 and the establishment of continuing education programs throughout Hawai‘i Island in 1992. In 1996, the UH BOR created the UH Center model to make higher educational opportunities available to Hawai‘i residents living on the islands of Kaua‘i, Maui, and Hawai‘i. As a result, the UH Center, West Hawai‘i (UHCWH) was established in South Kona on Hawai‘i Island. In July 1997, the administration of the UHCWH was transferred from UH Hilo to Hawai‘i CC. In fall 2015, UHCWH relocated to a new campus in North Kona that also included a campus name change to Hawai‘i Community College–Pālanui.

### Location

Hawai‘i CC serves all of Hawai‘i County, which encompasses Hawai‘i Island, the southernmost island in the Hawaiian archipelago. The College is the island’s only comprehensive, open-door community college. The main Manono campus (1175 Manono Street, Hilo, HI 96720) and shared facilities at UH Hilo (200 West Kāwili Street, Hilo, HI 96720) are located in the county seat of Hilo on the east side of the island. On the west side of the island, the College provides offerings at its branch Pālanui campus (73-4255 Ane Keohokālole Hwy., Kailua-Kona, HI

96740), which is located in Kona, approximately 75 miles away from the Manono campus. Prior to the opening of the Pālanui campus, classes were offered in West Hawai'i at the UHCWH until spring 2015.

**INSERT - map of UH campuses to be sent by UHCC**

In addition, the College has met community needs with the offering of courses at satellite sites at Waimea in the South Kohala District, Honoka'a in the Hāmākua District, Pāhoa and Kea'au in the Puna District, and Pāhala in the Ka'ū District.

## Accreditation Status and Licensure

Hawai'i CC is fully accredited by the Western Association of Schools and Colleges, Accrediting Commission for Community and Junior Colleges (ACCJC). Hawai'i CC's first college accreditation as a separate institution was granted in 1995. Subsequent accreditation was granted in 2001, 2007, and again in 2013 with the provision that a follow-up report be filed. Since the last self-evaluation report of 2012, the College submitted follow-up reports in 2013, 2014, and 2016 along with a midterm report in 2015 to ACCJC to satisfy all requirements for accreditation ([INTRO-2](#)).

In addition, the following three programs include specialty accreditations:

- Culinary Arts–American Culinary Federation Foundation, Inc. Accrediting Commission (ACFFAC)
- Early Childhood Education/Children's Center–National Association for the Education of Young Children (NAEYC)

- Nursing, associate in science (AS) degree–Accreditation Commission for Education in Nursing (ACEN)

## Degrees and Certificates

Hawai‘i CC supports students’ pursuit of academic achievement and workforce readiness by offering 31 academic degrees, 44 career and technical education certificates, and two academic subject certificates through its main Manono campus. The Pāalamanui branch campus in West Hawai‘i offers academic degrees and certificates in ten areas. As the only community college on the island, the College serves the diverse needs of its residents through a variety of innovative instructional delivery modes. Approximately 90% of its enrolled students are Hawai‘i Island residents ([INTRO-3](#)), and according to UH Foundation data, approximately 78% of its alumni staying on the island and contributing to the local community and economy.

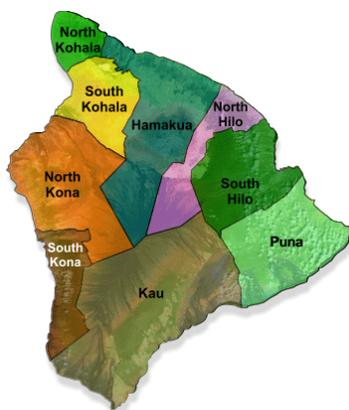

UH System data show that Hawai‘i CC is the main feeder college to UH Hilo. Five associate in arts (AA) degrees in Liberal Arts with specific concentrations in Administration of Justice, Art, History, Psychology, and Sociology were created in fall 2016 to strengthen the intercollegiate pathway for transfer students who intend to pursue baccalaureate degrees. In addition, Hawai‘i CC offers exploratory majors in Health Sciences (with pathways to UH Hilo in Kinesiology and/or Pre-Nursing) and in Business (with pathways to UH Hilo in Accounting and/or General Business).

The Pāalamanui campus also hosts students from other campuses in the UH System through the UHCWH in partnership with UH Mānoa, UH Hilo, UH West O‘ahu, UH Maui College, and other UH community colleges to offer over 50 additional online, distance learning, and hybrid degrees on the campus.

The College also serves its island community by providing a variety of non-credit programs and courses through EDvance (formerly the Office of Continuing Education and Training–OCET). EDvance provides lifelong learning opportunities to all ages by offering courses and programs that include non-credit courses, workshops, customized training for businesses and industries, workforce training, and other activities to enhance local economic development efforts. EDvance offers programs designed to inspire and promote engagement both on campus and in the community, which supports local workforce needs. EDvance works with employers who seek help with training. Requests for program and course offerings are also taken from employees, students and parents, unemployed workers, self-employed workers, retirees, and the workforce in general.

## About Our Service Area: Hawai‘i Island

Since 1997, the College has continued to expand its offerings and locations, supporting its mission as an open-door institution serving all segments of Hawai‘i Island, which includes nine districts (Figure 1).

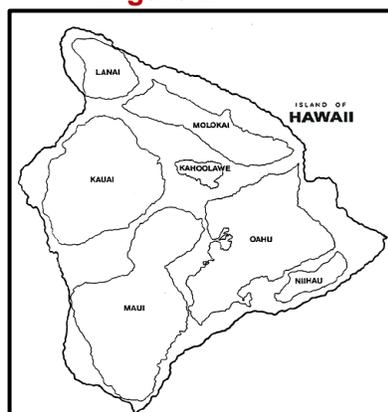

**Figure 1 – Hawai‘i Island Districts**

## Geography

Hawai‘i Island is the largest island in the state, covering 4,028 square miles, a land mass that easily encompasses all the other islands combined (Figure 2). Hawai‘i Island also has a relatively small population, resulting in comparatively far more rural area (Figure 3). The island’s size and rural nature create a challenge in serving the needs of all prospective students.

**Figure 2**

**Figure 3**

Geography Quick Facts: 2015					
	State Total	Hawai‘i County	Honolulu County	Kaua‘i County	Maui County
Land area, square miles	6422.6	4028.4	600.7	620.0	1161.5
Population	1,431,603	196,428	998,714	71,735	164,637
Persons per square mile	223	49	1663	116	142

Source: State of Hawai‘i Data Book

## Population

The population on Hawai‘i Island has increased from 188,795 (July 2012) to 198,449 (July 2016), a 5.1% increase as compared to the state, which showed a 2.6% increase ([INTRO-4](#)).

## Socio-economic Status

Hawai‘i Island lags behind other counties in the state when comparing socio-economic data. Hawai‘i County has historically had the highest unemployment rate. In 2012, the county’s rate was 8.3% (next highest was Kaua‘i, 7.3%) ([INTRO-5](#)). As employment rates have been improving, 2017 rates (not seasonally unadjusted), as of October 2017, were at an all-time low for the state and the county. Hawai‘i County’s unemployment rate dropped down to 2.3%, and

the next highest county, Maui, dropped to 2.1%) ([INTRO-6](#)). The state of Hawai‘i, as of January 2018, had the lowest unemployment rate (2.1%) in the country ([INTRO-7](#)).

From 2012 until 2016, according to American Community Survey (ACS) data released in October 2017, Hawai‘i County has consistently had the lowest median household income in the state. In 2012, the county’s median household income was \$52,098 (Maui County was the next lowest at \$64,058) and in 2016 it was \$53,936 (Kaua‘i County was next lowest at \$68,224)([INTRO-8](#)).

Data produced by Hawai‘i’s Department of Business and Economic Development and Tourism (DBEDT) is based on the annual report of the ACS. According to DBEDT, the county’s poverty level remains the highest in the state: the county’s percentage of individuals living below poverty was 18.3 in 2015 ([INTRO-9](#)). The release of the latest ACS data on the county’s median income and poverty level confirmed Mayor Harry Kim’s assessment of Hawai‘i County’s socio-economic status. The Mayor is aware that “whole regions of the island, particularly Puna and Ka‘ū, have 100% of their schoolchildren in free and reduced lunch programs”([INTRO-10](#)). During 2017-18, 8 of 22 schools added to the school lunch program were in Hawai‘i County; 17 of the total of 52 schools in the school lunch program statewide are in the county([INTRO-11](#)).

## Labor Market

In Hawai‘i County, as of 2014, the largest number of workers were in “services-providing” industries, which comprised 79% of the labor market, primarily in education and health services (20%); trade, transportation and utilities (18%); leisure and hospitality (18%); and government (8%). The “goods-producing” industries employed 10%, primarily in construction (5%), natural resources and mining (3%), and manufacturing (2%). Self-employed and unpaid family workers represented the remainder of the labor market (11%) ([INTRO-12](#)).

Due to the retirement during 2014 to 2024 of many employees from the “baby boom era,” the total number of jobs generated by replacement needs will represent 73% of the total annual openings and will exceed jobs created through growth opportunities ([INTRO-13](#)).

Projections for industry employment from 2014 to 2024 indicate that the number of jobs in Hawai‘i County will rise by 8.5%, from 74,430 (2014) to 80,740 (2024) jobs. “Services-providing” industries will comprise about four-fifths of the total positions added in Hawai‘i County and will have the fastest growth rate for all industries by 2024. Education and health services will have the largest gain (11.7% or 1,760 jobs) and the fastest growth rate among this sector. Leisure and hospitality will be second with the addition of 1,180 jobs, while trade, transportation, and utilities will add another 1,020 jobs. Together these three industries will be responsible for 57% of the county’s total job openings ([INTRO-14](#)).

By 2024, among the “goods-producing” industries, construction will advance the fastest, contributing 51% of the positions added within this sector ([INTRO-15](#)). The rise in employed and unpaid family workers will amount to 9.1%, accounting for 11% of the total county employment ([INTRO-14](#)).

Approximately 25% of the total projected job openings in Hawai‘i County will require education beyond a high school diploma or equivalent, which includes employees who have earned a postsecondary certificate or an associate’s, bachelor’s, master’s, or doctoral degree ([INTRO-16](#)). In general, workers in this category earn more compared to the other education levels. Next to retail sales, jobs related to healthcare will experience the fastest growth rates, while those employed in various sectors will generate the most openings ([INTRO-17](#)).

## Community Education Attainment Level

Based upon the 2015 Hawai‘i County Data Book, the percentage of college graduates in Hawai‘i County ranged from 20.0 to 30.6, depending on location, which was comparable to the state’s average of 29.4, whereas individuals who had some college education ranged from 29.8% to 35.2%, which was also comparable to the state’s average of 31.4% ([INTRO-18](#)).

## About our Students

Hawai‘i CC’s students live primarily on Hawai‘i Island, with over 90% of the College’s students claiming the island as their permanent residence in fall 2017 ([INTRO-19](#)). A majority of the College’s students reside in the Hilo District, with the Puna and Kona Districts as the second and third largest service areas on the island ([INTRO-20](#)).

## Cultural Diversity

Students at the College are as diverse as the island’s various ethnic groups. The student population (based upon fall 2017 enrollment) included 14.3% of two or more races, 20.1% Asians, 15.1% Whites/Caucasians, 1.7% Hispanics/Latinos, 2.2% Other Pacific Islanders, 0.6% Blacks/African Americans, and 0.6% American Indians/Alaska Natives([INTRO-19](#)). However, there are notable proportional differences, with the College’s percentage of Native Hawaiian or Part-Hawaiian students greatly exceeding that of the island’s population as a whole. For fall 2016, nearly 45% of the students enrolled identified themselves as being Native Hawaiian or Part-Hawaiian ([INTRO-21](#)), whereas this resident population on Hawai‘i Island is only 10.5% ([INTRO-22](#)). Among the UHCCs, Hawai‘i CC consistently awarded a high number degrees and certificates to Native Hawaiians or Part-Hawaiians ([INTRO-23](#)).

In comparison to the College’s enrollment, the island’s population (based upon 2014 estimates) included more than 28% of two or more races, 23.2% Asians, 33.6% Whites, 12.3% Hispanics/Latinos, 10.5% Native Hawaiians, 1.9% Other Pacific Islanders, 0.8% Blacks/African Americans, 0.3% American Indians and Alaska Natives, and 1% some other race([INTRO-22](#)).

## Age

As the island’s only open-door college, Hawai‘i CC serves the county’s varied postsecondary age groups. College enrollment encompasses a wide age range with students aged from 16 to over 80. While many students come directly from high school, approximately 45% are above the age of 21([INTRO-19](#)). Since 2012, there has been a steady decline in enrollment amongst most age groups([INTRO-24](#)).

## Gender

Based upon 2016 numbers, the county's gender breakdown was roughly even (50.2% female) ([INTRO-25](#)). In contrast, the College has historically served a larger percentage of female than male students, with approximately 60% of students female in fall 2017 ([INTRO-19](#)).

## Enrollment Trends

At the time of the College's last self-evaluation report, Hawai'i CC's enrollment growth in headcount and full-time-equivalent students (FTE) reached a peak at just over 3,900 students in fall 2011. From fall 2012 to fall 2017, as the economy recovered and the unemployment rate decreased, enrollment also decreased from 3,663 to 2,819 students. This decrease in enrollment was also experienced throughout the UH system over the same period ([INTRO-26](#)). The exceptions to this decrease was an increase in enrollment at the new campuses of UH West O'ahu and Hawai'i CC – Pālanui.

Registration for non-credit courses and services offered through EDvance has gone from 3,197 in 2011-12 to a high of 4,454 (2014) and down to 3,132 (2016-17) ([INTRO-27](#)).

The overall enrollment forecast calls for continued mild decline through fall 2022 ([INTRO-28](#)). Enrollment decreases have historically paralleled a decline in unemployment rates on Hawai'i Island from 8.3% in 2012 down to 2.3% in 2018 ([INTRO-29](#)). Although unemployment rates have steadily dropped in recent years indicating the growth of a healthy economy, Hawai'i Island residents and some of the College's students continue to face financial challenges. The College in 2014-15 had the highest dollar amount (\$450,586) of the UHCC's per head count of unmet student needs at a \$416 average per student ([INTRO-30](#)). As a result, the College, and more broadly the UHCC System, have identified the "elimination of cost as a barrier" to students as one of the primary components of the Strategic Directions 2015-2021 plan.

With lower tuition rates than UH System universities, UH community colleges offer a more affordable option for Hawai'i state residents seeking higher education. The UH BOR approved a five-year tuition schedule for fall 2012 to spring 2017 with moderate increases of tuitions for all UH system universities and community colleges ([INTRO-31](#)). For AY 2017-2018 to 2019-2020, the BOR approved an annual 2% increase for the last two out of these three academic years ([INTRO-32](#)). Hawai'i CC provides an affordable and accessible option for its residents despite these tuition increases. For comparison, the undergraduate tuition for full-time residents in AY 2017-2018 was \$3,024 at Hawai'i CC, which was less than half of the \$7,200 tuition at UH Hilo.

Through Strategic Directions 2015-2021 plans adopted by UHCC ([INTRO-33](#)) and Hawai'i CC ([INTRO-34](#)), the College also plans to increase its outreach to targeted populations on the island, including high school graduates, GED recipients, Pacific Islanders, working age adults, and international students ([INTRO-35](#)). These populations are more likely to enter the workforce without advanced degrees and are the most vulnerable to fluctuations in the job market. By leveraging financial aid and increasing outreach efforts to incentivize returning to school, Hawai'i CC hopes to counteract the pull of the job market.

**High School Graduates Direct Entry.** College enrollment is affected by trends impacting local high school graduates. As part of the state’s P-20 Partnerships for Education ([INTRO-36](#)), college and career readiness have been a focus area for student success. P-20 is a statewide collaboration led by the Executive Office on Early Learning, Hawai‘i Department of Education (DOE), and the UH System with the goal of improving educational outcomes for Hawai‘i. Overall, the state has maintained college-going rates around 55% with Hawai‘i Island college enrollment rates lagging behind at 47% for the Class of 2016.

Hawai‘i public high school seniors are forecast by the Hawai‘i DOE to decrease in school year 2016-17, increase in 2017-18, then grow modestly through school year 2021-22 ([INTRO-37](#)). To address this decline amongst local high school graduates, the College, in addition to its continued participation in the Hawai‘i P-20, Running Start, and Early College programs, has enhanced outreach with several high schools with increased course offerings at various high school campuses.

**GED Recipients.** The College has entered into a memorandum of agreement with the Waipahu Community School for Adults ([INTRO-38](#)) to expand educational offerings and high school equivalency programs at College locations at Manono and Pālanui.

**Pacific Islanders.** The College’s strategic enrollment plan prioritizes customizing onboarding services for target groups of students, including Pacific Islanders. Further goals include improving and stabilizing student support services for priority targets, such as Pacific Islanders, including implementing strategic and structured wrap around supports and services to assist academically underprepared students to succeed in the “gateway” courses for the college’s major program areas.

**Working Age Adults.** The College participates in UHCC strategies to enhance enrollment for this target population include online degrees, workplace-based programs, recruitment and portal for returning adults, and scholarships.

**International Students.** Hawai‘i CC created and filled a position for a Coordinator for the International Program Office to manage the College’s international program, to oversee international recruitment, and to develop and implement strategies for increasing international enrollment.

## Student Achievement Data and Institution-Set Standards

### Student Achievement Data

**Table 1 - Student Headcount by Enrollment Status, 2013-2016**

Enrollment	Fall 2013		Fall 2014		Fall 2015		Fall 2016		Fall 2017	
Part-Time	1,808	53.1%	1,736	54.5%	1,830	59.3%	1,799	60.9%	1,677	59.5%
Full-Time	1,598	46.9%	1,450	45.5%	1,257	40.7%	1,157	39.1%	1,142	40.5%
<b>Total Headcount</b>	<b>3,406</b>		<b>3,186</b>		<b>3,087</b>		<b>2,956</b>		<b>2,819</b>

The College serves a larger number of part-time students than full-time students. Enrollment has decreased by over 17% since 2013.

**Table 2 - Student Headcount by Curriculum Category, 2013-2017**

Curriculum Category	Fall 2013		Fall 2014		Fall 2015		Fall 2016		Fall 2017	
General & Pre-Prof Ed	1,510	44.3%	1,256	39.4%	1,110	36.0%	1,066	36.1%	1,101	39.1%
Career & Tech Ed	1,412	41.5%	1,377	43.2%	1,244	40.3%	1,168	39.5%	1,072	38.0%
Other	484	14.2%	553	17.4%	733	23.7%	722	24.4%	646	22.9%
<b>Total Headcount</b>	<b>3,406</b>		<b>3,186</b>		<b>3,087</b>		<b>2,956</b>		<b>2,819</b>	

Source: IRAO Data Access Portal - Student Enrollment Table 5

(General and Pre-Professional Education programs: AA degrees, ASNS; Career and Technical Education programs: AS, AAS, CA; Other: unclassified and non-Hawai'i CC students)

Over the past five years, enrollment in General and Pre-Professional Education programs and Career and Technical Education programs has remained relatively balanced.

**Table 3 - Student Headcount by Ethnicity, 2013-2017**

Ethnicity	2013		2014		2015		2016		2017	
<b>Total</b>	<b>3,663</b>	<b>100%</b>	<b>3,406</b>	<b>100%</b>	<b>3,186</b>	<b>100%</b>	<b>3,087</b>	<b>100%</b>	<b>2,956</b>	<b>100%</b>
Asian Subtotal	671	18.32%	667	19.58%	622	19.52%	642	20.80%	591	19.99%
Native Hawaiian or Part-Hawaiian	1,562	42.64%	1,399	41.07%	1,360	42.69%	1,305	42.27%	1,303	44.08%
Pacific Islander	119	3.25%	118	3.46%	103	3.23%	98	3.17%	71	2.40%
Other	1,311	35.79%	1,222	35.88%	1,101	34.56%	1,042	33.75%	991	33.53%

Source: IRAO Data Access Portal - Student Enrollment Table 5

Native Hawaiian or part-Hawaiian students comprise the largest ethnic group at Hawai'i CC, constituting between 41% and 44% of the population between 2013 and 2017. The next largest ethnic group is Other (Hispanic, Caucasian, African American or Black, American Indian or Alaskan Native, Mixed Race (2 or more), and no data), at about 35%. Asians make up approximately 19%, and Pacific Islanders comprise about 3%.

**Table 4 - Student Headcount by Pell Grant Recipients, 2013-2017**

	Fall 2013		Fall 2014		Fall 2015		Fall 2016		Fall 2017	
Pell Recipients	1,558	45.7%	1,335	41.9%	1,091	35.3%	1,036	35.0%	1,000	35.5%
Non-Pell Recipients	1,848	54.3%	1,851	58.1%	1,996	64.7%	1,920	65.0%	1,819	64.5%

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_BASE\_UH view, MRT\_AWARD\_BY\_PERSON table, CENSUS; generated by Hawai'iCC, Institutional Research Office; data queried April 18, 2018.

The percentage of Pell recipients decreased from 2013 to 2015, and the ratio of Pell to non-Pell recipients has remained unchanged since.

**Table 5 - Student Headcount by Course Delivery Method, 2013-2017**

Course Delivery Method	Fall 2013	Fall 2014	Fall 2015	Fall 2016	Fall 2017
------------------------	-----------	-----------	-----------	-----------	-----------

DE Students	1,253	36.8%	1,267	39.8%	1,293	41.9%	1,201	40.6%	1,222	43.3%
Non-DE Students	2,153	63.2%	1,919	60.2%	1,794	58.1%	1,755	59.4%	1,597	56.7%
<b>Total Headcount</b>	<b>3,406</b>		<b>3,186</b>		<b>3,087</b>		<b>2,956</b>		<b>2,819</b>	

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_REGS\_UH view, CENSUS; generated by Hawai'i CC, Institutional Research Office; data queried April 18, 2018.

Despite declining enrollment, the percentage of students taking distance education (DE) courses generally increased since 2013, from 37% to 43% of students.

**Table 6 - Course Completion by Course Delivery Method, 2013-2017**

Course Delivery Method	2013	2014	2015	2016	2017
DE Courses	69.4%	69.4%	71.9%	73.0%	71.8%
Face-to-Face Course	76.7%	78.4%	77.8%	78.2%	77.1%

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_REGS\_UH view, CENSUS, EOS; generated by Hawai'i CC, Institutional Research Office; data queried April 20, 2018.

The face-to-face course completion rate has remained around 77-78% over the past five years. The DE course completion rate has risen slightly, from 69.4% to 71.8%, with the gap between delivery methods narrowing to within 5%.

**Table 7 - Overall Student Persistence, 2013-2017**

All Students	Fall 2013	Fall 2014	Fall 2015	Fall 2016	Fall 2017
Overall	71.9%	70.6%	69.0%	69.3%	69.4%
Full-Time	81.6%	81.0%	81.6%	81.3%	79.6%
Part-Time	60.9%	59.8%	58.0%	59.2%	60.7%

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_XOVER view, CENSUS; generated by Hawai'i Community College, Institutional Research Office; data queried April 20, 2018.

Fall to spring persistence rates have remained fairly steady over the past five years, with overall persistence around 70%. Full-time students have higher persistence than part-time students.

**Table 8 - Student Persistence by Curriculum Category, 2013-2017**

Curriculum Category	Fall 2013	Fall 2014	Fall 2015	Fall 2016	Fall 2017
Career & Technical	75.1%	74.7%	72.8%	72.8%	76.5%
General & Pre Professional	72.1%	69.4%	70.6%	70.2%	67.6%
<b>Other</b>	<b>43.5%</b>	<b>55.1%</b>	<b>53.2%</b>	<b>56.5%</b>	<b>54.6%</b>

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_XOVER view, CENSUS; generated by Hawai'i CC, Institutional Research Office; data queried April 20, 2018.

Note: General and Pre-Professional Education programs include AA degrees, AS in Natural Science; Career and Technical Education programs: AS, AAS, and CA; Other include unclassified and non-Hawai'i CC students.

General and Pre-Professional Education student persistence fall to spring has declined slightly since 2013, from 72% to 68%. Career and Technical Education student persistence has held fairly steady and rose slightly in 2017.

**Table 9 - Degrees and Certificates Awarded by Curriculum Category, 2013-2017**

Curriculum Category	2013	2014	2015	2016	2017
---------------------	------	------	------	------	------

Pacific Islander	13	12	13	23	6
Other	206	238	204	207	187

Source: IRAO Data Access Portal - Degrees and Certificates Awarded Table 2

Over the past five years, Native Hawaiian students have earned the highest percentage of the degrees and certificates awarded by the College, averaging 40%, which closely mirrors enrollment figures.

## Institution-Set Standards

In February 2017, the UHCC System adopted UHCCP #4.203 Institution-Set Standards, a policy that establishes the framework for student success through the adoption of eight standards for which each campus is held accountable, with new baseline and aspirational values (i.e., stretch goals) and specific annual target performance measures set for the period from 2016 to 2021 ([INTRO-39](#)). Data for these standards are to be used by each campus in regular reports prepared in conjunction with strategic planning, program review and assessment processes. The eight standards are the following:

1. Course Completion
2. Degrees and Certificates Awarded
3. Native Hawaiian Degrees and Certificates Awarded
4. Pell Recipient Degrees and Certificates Awarded
5. Transfers to Baccalaureate Institutions
6. Integrated Postsecondary Education Data System (IPEDS) Student Success Rate
7. Licensure and Certification Examination Success Rate
8. Job Placement Rate.

Although the review of data for the implementation of this policy began in 2016, the College is including data dating back to 2013 to provide a historical background of its performance in these particular areas. An analysis of the data for each of the eight ISS is summarized below.

### **Standard 1 – Course Completion**

Definition – Percentage of students receiving a grade of C or better in a course. The number of students in the course is defined as the number at the end of the official add/drop period during the academic year (AY).

Baseline Value – 70%

Aspirational Value – 75%

Hawai'i CC consistently exceeded the baseline each AY since 2013 with an overall average of over 6%. Since 2016 when aspirational values were established for this standard, the College has also exceeded these aspirational values. For 2017, the baseline and aspirational value were exceeded with a 5.77% and 0.77% difference between these values and the actual performance.

Category	AY 2017	AY 2016	AY 2015	AY 2014	AY 2013	2013-2017 Average
Baseline Value	70%	70%	70%	70%	70%	70%
Aspirational Value	75%	75%	--	--	--	75%
Actual Performance	75.77%	76.91%	76.38%	76.49%	75.18%	76.15%
Difference between Baseline and Actual	+5.77%	+6.91%	+6.38%	+6.49%	+5.18%	+6.15%

Difference between Aspirational Value and Actual	+0.77%	+1.91%	--	--	--	+1.34%
--	--------	--------	----	----	----	--------

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_REG\_UH view, Census, EOS; generated by Hawai'i CC, Institutional Research Office; data queried February 21, 2018.

Note: Successful course completion is defined as enrolled students whose final grade is A, B, C, CR, P, CE, or CR+.

### **Standard 2 – Degrees and Certificates Awarded**

Definition – Number of Associate Degrees and Certificates of Achievement awarded during the fiscal year (FY).

Baseline Value – Established as the three-year average for FY 2013-2015

Aspirational Value – 5% growth per year from the baseline year

The College awarded an average of 612 degrees and certificates each FY between 2013-2017. Hawai'i CC consistently exceeded the baseline each FY since 2013, with the exception of 2017.

Category	FY 2017	FY 2016	FY 2015	FY 2014	FY 2013	2013-2017 Average
Baseline	597	597	470	470	470	521
Aspirational Value	658	627	619	429	408	646
Actual Performance	576	693	569	669	552	612
Difference between Baseline and Actual	-21	96	99	199	82	91
Difference between Aspirational Value and Actual	-82	66	--	--	--	-8

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_DEGREE\_UH view, EOS; generated by Hawai'i CC, Institutional Research Office; data queried February 21, 2018.

### **Standard 3 – Native Hawaiian Degrees and Certificates Awarded**

Definition – Number of Associate Degrees and Certificates of Achievement awarded during the fiscal year (FY) to students of Native Hawaiian Ancestry.

Baseline Value – Established as the three-year average for FY 2013-2015

Aspirational Value – 5% growth per year from the baseline year

The College awarded an average of 242 associate degrees and certificates of achievement to Native Hawaiians each FY between 2013-2017. In addition, there has been a steady increase in the number of such degrees and certificates since 2013, with the exception of 2017.

Category	FY 2017	FY 2016	FY 2015	FY 2014	FY 2013	2013-2017 Average
----------	---------	---------	---------	---------	---------	-------------------

Baseline	236	236	--	--	--	236
Aspirational Value	260	248	249	179	165	254
Actual Performance	233	270	248	250	210	242
Difference between Baseline and Actual	-3	34	--	--	--	15
Difference between Aspirational Value and Actual	-27	22	--	--	--	-3

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_DEGREE\_UH view, EOS; generated by Hawai'i CC, Institutional Research Office; data queried November 3, 2017.

#### **Standard 4 – Pell Recipient Degrees and Certificates Awarded**

Definition – Number of Associate Degrees and Certificates of Achievement awarded during the fiscal year (FY) to students who ever received Pell awards.

Baseline Value – Established as the three-year average for FY 2013-2015

Aspirational Value – 5% growth per year from the baseline year

The College awarded an average of 411 associate degrees and certificates of achievement to Pell recipients each FY between 2013-2017. In addition, there has been an increase in the number of such degrees and certificates since 2013, with the exception of 2017.

Category	FY 2017	FY 2016	FY 2015	FY 2014	FY 2013	2013-2017 Average
Baseline	418	418	--	--	--	418
Aspirational Value	461	439	418	--*	--*	450
Actual Performance	356	477	401	435	386	411
Difference between Baseline and Actual	-62	59	--	--	--	-2
Difference between Aspirational Value and Actual	-105	38	--	--	--	-34

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, IRO\_DEGREE\_UH view, EOS; generated by Hawai'i CC, Institutional Research Office; data queried November 3, 2017.

\* Only number of Pell recipients tracked.

#### **Standard 5 – Transfers to Baccalaureate Institutions**

Definition – Number of Hawai'i CC home-based students who transfer to a baccalaureate institution during the academic year (AY).

Baseline Value – Established as the three-year average for AY 2012-2015

Aspirational Value – 5% growth per year from the baseline year

Hawai‘i CC consistently exceeded the baseline each AY, averaging 433 transfers to baccalaureate institutions each AY between 2013-2017. For AY 2017, the College also exceeded its aspirational value.

Category	AY 2017	AY 2016	AY 2015	AY 2014	AY 2013	2013-2017 Average
Baseline	398	398	280	280	280	372

Difference between Aspirational Value and Actual	24	-4	--	--	--	10

Source: National Student Clearinghouse Data University of Hawai‘i, Institutional Research Office, Operational Data Store, IRO\_BASE\_UH view, CENSUS; generated by Hawai‘i CC, Institutional Research Office; data queried November 3, 2017.

\*Summer totals not included

### **Standard 6 – IPEDS Student Success Rate**

Definition – Rate at which first time, full time students either graduate or transfer to a baccalaureate institution within 150% of the time of entry.

Baseline Value – Success rate based on the Fall 2012 IPEDS cohort

Aspirational Value – Incremental growth to reach a success rate of 50% by fiscal year (FY) 2021.

Hawai‘i CC consistently exceeded the baseline each FY between 2013-2015. The College did not meet the baseline in 2016 and 2017, but the gap decreased in 2017.

Category	FY 2017	FY 2016	FY 2015	FY 2014	FY 2013	2013-2017 Average
Baseline	31.6%	31.6%	31.6%	31.6%	31.6%	31.6%

Source: U.S. Department of Education, National Center for Education Statistics Integrated Postsecondary Education Data System (IPEDS): Graduation Rate Component Data Summary

For Institution-Set Standards 2, 3, and 4, the College met baseline values between 2013 and 2016, and for many of those years, also met the aspirational values. This was an accomplishment, considering that performance targets were raised in 2015 based on high 2014 results, and that enrollment has declined steadily since 2011. In 2017, however, the enrollment decline caught up to the College, affecting its ability to meet the target values for degree/certificate attainment. For Institution-Set Standard 6, IPEDS success rates have not met baseline values since 2015. The College has undertaken a number of efforts to increase retention and persistence to improve performance in these four standards.

Hawai‘i CC’s *Strategic Directions 2015-2021* outlines Hawai‘i Graduation Initiative (HGI) action strategies committed to improving college readiness and attendance and to promoting persistence and degree/certificate completion, with particular focus on developing support for Native Hawaiians, low-income students, and underrepresented and underserved populations. The College has implemented the following actions toward these efforts:

- placement testing on high school campuses
- summer “boot camps” to strengthen English and Math skills
- degree pathways (e.g., A.A. concentrations, exploratory majors, pathways to 4-year degree programs)
- STAR GPS online degree audit platform that helps students register for courses in optimal academic pathways to their majors
- AA-Liberal Arts degree modification (to increase electives)
- General education designation of courses and transition to Foundations/Diversifications general education designation process practiced at other UH/UHCC campuses
- intrusive advising, e.g., assigned advisees to all faculty, Hānai-a-Kumu faculty-counselor partnerships
- MySuccess early alert system (to flag student concerns with counselors, to schedule student appointments with counselors, tutors)
- English and Math curricula redesign for accelerated/co-requisite course offerings to reduce or eliminate the time spent in developmental classes
- increased classroom tutors
- English professional development and wraparound services program to provide increased time for individual student support
- creation of STEM Center
- new positions, including Student Success Coordinator, Outreach and Recruitment Coordinator, and Pathway Coordinator
- increased authentic assessment to improve courses and programs

- implementation of new curriculum management system and new assessment management system

In addition, Hawai‘i CC recently implemented the UHCC system’s Student Success Pathway (SSP) framework to create intentional and structured educational experiences to guide students from their point of entry through graduation, transfer and career. Key College representatives from cross-functional areas are working together to create an Integrated Student Advising and Support model which will assist students in achieving their academic and career goals by focusing on specific areas, including Onboarding, Student Success/Retention, and Completion (graduation/transfer).

### **Standard 7 - Licensure and Certification Examination Success Rate**

Definition – Pass rate for students in a Career and Technical Education (CTE) program based on the number of students taking the examination. The rate must be reported for all programs where the licensure or certification examination is required for employment. Other certification examination may be reported on an optional basis.

Baseline Value – Minimum required pass rate to meet accreditation requirements for programs that are accredited or the average national or state pass rate for the examination for programs that are not accredited.

Aspirational Value – 3% improvement per year improvement in the pass rate over the previous 3-year average, up to achievement level of 95%

<b>Program: Nursing AS (National Examination)</b>	<b>2016</b>	<b>2015</b>	<b>2014</b>	<b>2013</b>	<b>2013-2016 Average</b>
Baseline	80%	80%	80%	80%	80%
Aspirational Value	83.81%	--	--	--	83.81%
Actual Performance	89.59%	84.62%	83.33%	76.19%	83.43%
Difference between Baseline and Actual	9.59%	4.62%	3.33%	-3.81%	3.43%
Difference between Aspirational Value and Actual	5.78%	--	--	--	5.78%

Source: Nursing Program data

The baseline for the Nursing AS degree program is based upon the minimum required pass rate determined by Accreditation Commission for Education in Nursing (ACEN). The actual performance data is reported annually by the Hawai‘i State Board of Nursing. Overall, there has been a steady increase in the actual performance for this program since 2013. With the exception of 2013, the program has exceeded the baseline. For 2016, the aspirational value was also exceeded by nearly 6%.

<b>Program: Practical Nursing</b>	<b>2016</b>	<b>2015</b>	<b>2014</b>	<b>2013</b>	<b>2013-2016</b>
-----------------------------------	-------------	-------------	-------------	-------------	------------------

<b>(National Examination)</b>					<b>Average</b>
Baseline	75%	75%	75%	75%	75%
Aspirational Value	86.27%	--	--	--	86.27%
Actual Performance	75%	83.33%	83.33%	84.63%	81.57%
Difference between Baseline and Actual	0%	8.33%	8.33%	9.63%	6.57%
Difference between Aspirational Value and Actual	-11.27%	--	--	--	-11.27%

Source: Nursing Program data

The baseline for the Practical Nursing program is based upon the minimum required pass rate determined by the Hawai'i State Board of Nursing. The actual performance data is reported annually by the Hawai'i State Board of Nursing. In 2016, the aspirational value was not met, but overall, the actual performance for this program has either exceeded or met the baseline since 2013.

The Nursing department is currently working on a review of the ASN/PN curriculum to assure that it is current and relevant. Faculty are revising the ASN/PN curriculum to reflect current practice, using evidence-based nursing education research in order to facilitate student attainment of end-of-program student learning outcomes.

Current practices for preparing students for NCLEX-RN/PN are in an ongoing review process. Faculty are looking into the issue that the closest testing site is located on Oahu. This proves costly for students and can delay their testing. Hawai'i CC's program goal is to improve NCLEX-RN/PN first time pass rates.

### **Standard 8 – Job Placement Rate**

Definition – Job placement rate reported for each career and technical education program from the Perkins annual report. The Perkins program data includes all graduates and concentrators (students who have completed a subset of program courses) who have left the program. The Perkins target is based on a negotiated level of placement within the State plan for Career and Technical Education that includes an expectation of continuous improvement. Programs with fewer than 10 students exiting the program shall not be reported.

Baseline (BV) – Perkins established placement rate for AY 2014

Aspirational Value (AV) – Perkins established improvement rate for each subsequent year.

<b>Program</b>	<b>AY 2017 Pass Rate (%)</b>	<b>ISS AV 2017 (%)</b>	<b>AY 2016 Pass Rate (%)</b>	<b>ISS AV 2016 (%)</b>	<b>AY 2015 Pass Rate (%)</b>	<b>ISS AV 2015 (%)</b>	<b>AY 2014 Pass Rate (%)</b>	<b>ISS AV&amp;new BV 2014 (%)</b>	<b>AY 2013 Pass Rate (%)</b>	<b>ISS AV 2013 (%)</b>
Accounting	53.85	64.51	52.78	63.87	64	69	57.14	68.92	61.11	65

Source: University of Hawai'i, Institutional Research Office, Operational Data Store, OVPCC\_APR\_REVIEWS view; generated by Hawai'i CC, Institutional Research Office; data queried November 3, 2017.

An analysis of results shows that it has been a challenge for the College to meet the Job Placement Aspirational Value. The 2016 Aspirational Value was decreased by 5.13% from the previous year which made it a more realistic Aspirational Value for many of our programs. A program-by-program analysis shows that three programs attained at least 90% of the Aspirational Value in four out of five years – Diesel Mechanics, Electrical Installation and Maintenance, and Fire Science. The AS in Nursing exceeded the Aspirational Values the last two years and reached at least 90% of the Aspirational Value in 2015. The lack of new/replacement job positions for graduates may be a reason for programs not meeting Aspirational Values. The Program faculty maintain very close connections with employers through Advisory Councils, professional relationships, and internships. Program Advisory Councils of industry partners keep the programs abreast of industry needs and trends (new skills, procedures, technology changes, etc.) as well as employment forecasts, short and long term. Businesses and organizations recognize the quality of our programs and contact faculty to let them know of job openings and to recruit our graduates. Further, UHCC recently developed the Hawai‘i Industry Sectors dashboard; program faculty and students use the tool to navigate for potential careers and their demand in the State and County. The College is exploring a more efficient and accurate way to capture employment data of our graduates.

## **Significant Events: 2013-2018**

### **75<sup>th</sup> Anniversary**

Hawai‘i CC celebrated its 75th anniversary in 2016. The College started in 1941 as Hawai‘i Vocational School, with 183 students enrolled in five trades programs, and grew to campuses on the east and west sides of Hawai‘i Island with enrollments up to 3,900 students and the offering of 31 academic degrees and 46 certificates ([INTRO-40](#)).

### **Hawai‘i Community College – Pāalamanui**

A substantive change proposal was approved by ACCJC for the relocation of Hawai‘i CC’s branch campus to a new site at Pāalamanui ([INTRO-41](#)). As part of its commitment to expand affordable access to higher education across the island, the College offered its first classes at the new Pāalamanui branch campus in fall 2015. Two-year associate degrees in Culinary Arts, Nursing, Hawaiian Studies, Natural Science, and Liberal Arts are among the offerings. The campus also delivers bachelor’s and graduate degrees from other campuses in the UH System through the UHCWH. In addition, the move to Pāalamanui allowed for the expansion of non-credit workforce development training on the west side of the island. Pāalamanui is a vibrant and essential resource and academic milestone ([INTRO-42](#)): the new classrooms, science laboratories, learning kitchens, and learning resource center are state-of-the-art, LEED Platinum Certified facilities designed for 21st century learning, and are the fulfillment of the College’s Phase I development of the Pāalamanui campus ([INTRO-43](#)). As evidence of the College’s success in expanding access to higher education in West Hawai‘i, enrollment has increased from fall 2015 to fall 2017 at Pāalamanui, when most other campuses in the UH system have experienced enrollment drops ([INTRO-44](#)).

## **50<sup>th</sup> Model Home**

In 2017, the 50<sup>th</sup> Model Home was completed. The "Model Home Project" was established in 1965 with the first home completed in 1966. Students in the College's construction trades programs design and build a custom home, acquiring valuable hands-on learning experience while providing an affordable house to a local family. Students learn how to work with others in related fields and develop work ethics and professional attitudes necessary to be successful in their trades. Over 4,000 Hawai'i CC students have benefited to date, from programs including Architectural, Engineering and CAD Technologies; Welding; Carpentry; Diesel Mechanics; Agriculture; and Electrical Installation and Maintenance Technology ([INTRO-45](#)).

## **East Hawai'i Population Growth and Long Range Planning for Manono Campus**

The county's continued population growth, which is surpassing other counties in the state, will impact the population center of Hilo and nearby districts such as Puna, due to the affordability of housing on the east side of the island ([INTRO-46](#)). In response to this rapid population growth, a new, long range development plan (LRDP) for the Manono campus will highlight the College's continued institutional commitment to expand access to higher education on the east side of the island ([INTRO-47](#)).

## **Island-wide Higher Education Commitment Extends to North Hawai'i**

Legislative funding of \$9 million will allow the College to further its island-wide commitment through the renovation of the North Hawai'i Education and Research Center (NHERC) ([INTRO-48](#)), where the College has offered classes in the past.

## **Developmental Education Reform**

Until 2015, the College's developmental education courses represented a significant part of the curricula. The College catalog outlined a progression chart for course prerequisites in the areas of writing, reading, and math. Nationally, community colleges have looked at the reform of developmental education to identify ways to improve the success of students moving through the progression of developmental into college-level courses. In December 2015, the UH community colleges implemented the UHCCP 5.213 Time To Degree: Co-requisite policy, following a national trend of offering accelerated developmental education, in which a developmental or co-requisite course is taken with a college-level course to reduce the time needed to complete college-level courses ([INTRO-49](#)).

## **General Education Revision**

A major change to the College's General Education (GE) program was begun by the Academic Senate during the last accreditation review period. The review process to determine if a course should be designated GE has been implemented and a scoring rubric is in use. GE learning outcomes are available in the catalog and online, and designated courses are also posted on the website ([INTRO-50](#)). The primary purposes for the revision were to ensure that all aspects of the ACCJC requirements for general education are met and to align with the other UH campuses,

particularly UH Hilo. Most recently, the College's AA and AS programs decided to transition to the UH Mānoa Foundations/Diversifications model for general education (see Standard II.A).

## Assessment

To evaluate the success of student learning, the College has made a major commitment to assessment. The College has invested significant time and resources into improving assessment practices and reporting. In 2017, the College implemented a digital assessment management system, Campus Labs *OUTCOMES*, that enables faculty to receive immediate feedback on their CLO assessments and contributions to aligned PLOs and ILOs. The system provides advanced analytic and graphic data tools to support program & institutional strategic planning, allowing programs to more easily report and analyze their contributions to students' learning and achievement of the College's mission through the annual and comprehensive program review process.

## Leadership Changes

Several changes in College leadership have occurred, primarily due to retirements that were covered with interim and new appointments:

- Chancellor
  - Noreen Yamane (July 2011-December 2015)
  - Joni Onishi (interim January-June 2016)
  - Rachel Solemsaas (July 2016-present)
- Vice Chancellor for Academic Affairs
  - Joni Onishi (2013-2015; July 2016-present)
  - Joyce Hamasaki (interim January 2015-June 2016)
- Vice Chancellor for Student Affairs
  - Jason Cifra (January 2012-January 2017)
  - Dorinna Cortez (interim January 2017-present)
- Vice Chancellor for Administrative Services
  - James Yoshida (April 2012-March 2017)
  - Ken Kaleiwahea (interim April 2017-present)
- Director UHCWH/Pāalamanui
  - Beth Sanders (interim October 2007-March 2014)
  - Kenneth Fletcher (March 2014-present)
- Director of Office of Continuing Education and Training/EDvance
  - Deborah Shigehara (interim July 2009-August 2016)
  - Jessica Yamamoto (August 2016-present)
- Dean of Liberal Arts and Public Services
  - Guy Kimura (interim August 2009-July 2014)
  - Christopher Manaseri (July 2014-September 2016)
  - Caroline Naguwa (interim January-July 2016)
  - Vacant (Joni Onishi assumed duties August 2016-June 2017)
  - Melanie Dorado Wilson (June 2017-present)
- Dean of Career and Technical Education
  - Joyce Hamasaki (interim January 2012-July 2014, permanent August 2014-April 2017)

- Currently vacant (in recruitment Summer 2018; Joni Onishi assumed duties since April 2017)

<b>Role</b>	<b>Name</b>
Team Writer	Rachel Solemsaas, Chancellor
Team Writer	Joni Onishi, Vice Chancellor for Academic Affairs

### Standard IV.C/IV.D

<b>Role</b>	<b>Name</b>
Coordinator	E. Kalani Flores, Professor, Hawai'i Life Styles, Pāalamanui

## Timeline

---

### Fall 2016

---

August

#### **Chancellor appointed Accreditation Core Team members**

- Caroline Naguwa, ISER Co-Chair
- Leanne Urasaki, ISER Co-Chair
- ReshelaDuPuis, Standard Team Liaison
- E. Kalani Flores, ALO
- Guy Kimura, Standard Team Liaison
- Dorinna Cortez, Standard Team Liaison
- Joni Onishi, Administration Liaison
- Kate Sims, Standard Team Liaison

September

#### **UHCC System training for Core Team**

Upon training with a consultant, the Core Team decided to implement Design Thinking principles and strategies to organize the accreditation process. A key result was commitment to a “ground-up” process of inquiry and reflection involving mixed teams of faculty and staff from across the college.

#### **Standard Team members identified**

Each team contained at least one member familiar with the standard’s target area; however, other team members were intentionally selected from outside of the area to bring diverse views and voices to the discussion. Each team had an assigned chair and a writer; for smaller teams, the chair and writer were the same individual. See listing on the following page(s).

October

#### **Standard Team Training #1**

### Spring 2017

---

January

#### **Standard Team Training #2**

February

#### **Standard Writers Training**

March

#### **Standard Teams Analysis meetings**

Standard Team members, Core Team members, and additional campus stakeholders engaged in collaborative discussion of the Teams’ evidence findings in order to determine whether and how standards were being met and to suggest actionable items for the campus to pursue.

May **Editing Team Training (Editor/Formatter)**

**First drafts due from Standard Teams**

**Summer 2017**

---

May – July **Initial formatting/editing of ISER draft**

July **QFE Work Session (1st meeting to discuss QFE proposals)**  
 In response to suggested actionable items and areas of concern arising from the Standard Teams analyses and ISER draft, the ISER co-chairs convened a group of administrator and faculty stakeholders to discuss potential QFE projects to present to the campus.

**Fall 2017**

---

September –October **Core Team and Campus review of ISER draft (including QFE proposals)**

November **Standard Team revisions due**

November – December **Core Team final review of ISER draft.**

**Spring 2018**

---

January – March **QFE finalization**  
**Final formatting/editing of ISER and QFE**

April – May **Campus and Administration approvals of ISER and QFE**

May **Submission of ISER to UHCC**

**Summer 2018**

---

July **Submission of ISER to UH BOR**

August **Submission of ISER to ACCJC**

# Hawai'i Community College - Pālanui

## **University of Hawai‘i Community College Functional Map**

---

The delineation of functions and the differentiation of responsibilities between system and campus level is outlined in the UHCC System Functional Map, most recently reviewed by the community colleges and updated in fall 2017 ([INTRO-51](#)). A summary version organized by major accreditation topic is provided below.

<b>Accreditation Topic</b>	<b>UH Community College System/ UH System</b>	<b>College</b>
1.A Mission	The UH mission is adopted by the Board of Regents and reflected in UH policy. All colleges are expected to conform their mission statements to the UH mission.	Individual college missions are derived from the UH system mission and approved by the Board of Regents. Colleges are responsible for disseminating the mission statement and ensuring that college planning and resource allocation decisions reflect the mission statement.
1.B Academic Quality	UH Community Colleges establish system-wide institution set standards as well as system metrics and goals to achieve student success. System student success metrics are used in planning and resource allocation at the UHCC system level.	Colleges manage the process of establishing course and program based student learning outcomes and assessment and are responsible for using the assessment information to improve student learning.
1.B Institutional Effectiveness	Both the UH System and UHCC system provide data analytics to measure student success, including differentiating the outcomes by targeted student populations. The UHCC system also provides data to the colleges in support of program review and accreditation compliance.	Colleges use data analytics provided by the UH System and UHCC system, along with their own analysis of assessment and achievement results, to improve student success. Data pertinent to student achievement are disaggregated to allow analysis of sub-populations.
1.C Institutional Integrity	UH System and UHCC system publish information for prospective students, including cost of attendance. Some policies regarding institutional integrity exist in University system policies or system-wide collective bargaining agreements.	Colleges are primarily responsible for communicating accurate information, including accreditation information, to students, prospective students, and the general public.

Accreditation Topic	UH Community College System/ UH System	College
2.A Instructional Programs	<p>Policies relating to degrees and certificates are established at the UHCC system level. Degree programs and Certificates of Achievement require Board of Regents approval after review by the college, the UHCC system, and the UH system.</p> <p>Internal UH articulation agreements, general education core agreements, and transfer policies are established at the UH system and UHCC system level.</p>	<p>Colleges are responsible, through their internal curriculum processes, for approving all courses and programs, including course and program SLOs, and ensuring that both programs and courses meet commonly understood higher education standards. Some methods of assessment or evaluation of student performance may be covered in curriculum review.</p>
2.B Library and Learning Support Services	<p>UH System provides a common library services software and shared services agreements to all ten UH campuses. Some learning support services such as course management software and on-line tutoring, are provided by the UH and/or UHCC system to all students.</p>	<p>Colleges establish the on-campus library and learning support services, assess their effectiveness, and improve services as appropriate.</p>
2.C Student Support Services	<p>UHCC system provides shared services for back office financial aid and coordinates other delivery of student support services.</p>	<p>Colleges are responsible for on-campus student support services, including establishing service level outcomes, assessment, and analysis of the services for different sub-populations. All co-curricular services are based at the colleges. Some UHCCs have intramural athletic programs.</p>
3.A Human Resources	<p>HR policies and classifications are determined by UH and UHCC system and applicable collective bargaining agreements. UHCC System facilitates the establishment of faculty academic qualifications for both regular and adjunct faculty. UH and UHCC system act as appeal levels on HR related matters.</p> <p>System and colleges share professional development responsibilities.</p>	<p>Colleges implement the applicable HR policies and CB contracts. Most hiring and other HR decisions are based on the campus. Selected higher level appointments and classifications require system approval.</p>

Accreditation Topic	UH Community College System/ UH System	College
3.B Physical Resources	Development of long-range physical plans and implementation of capital improvement projects is a shared responsibility of UH System, UHCC System and the colleges.	Colleges take the lead in creating and maintaining their own long-range development plans, and provide input into plans and priorities for capital projects. Colleges are responsible for regular maintenance of the physical plant at the college.
3.C Technology Resources	Technology resources including network infrastructure and enterprise software systems are managed by UH System. UH System and UHCC System plan and coordinate system wide on-line learning support and program delivery.	Colleges are responsible for on-campus networks, technology resources, and technology support. Colleges are responsible for training faculty in the use of online delivery and management.
3.D Financial Resource Planning	UH System and Board of Regents set reserve policies, approve the annual operating budgets, and approve the UH request for new operating funds submitted to the State Legislature. The development of the budget and budget requests are based on a policy paper derived from the strategic plan and approved by the Board of Regents. The UHCC system is appropriated funds by the State Legislature and allocates those funds to the colleges. The UHCC system does not receive funds on an FTE or other formula basis from the Legislature.	Colleges are involved in the system budget planning, including adhering to all reserve requirements established by the Board.  Colleges are responsible for internal allocation of funds based on the allocations and revenue generated by the colleges.
3.D Financial Resource Stability	University fiscal systems are managed by UH System. Regular audits are conducted of the UH system, including separate schedules for the UHCC system. The UH internal auditor conducts several audits per year focusing on internal controls and management processes. UH System centrally manages all extramural funds.	Colleges implement fiscal systems in accord with University fiscal policies. When audits identify weaknesses or needed improvements, colleges respond with improvement plans that are incorporated into the audit reports.

Accreditation Topic	UH Community College System/ UH System	College
3.D Financial Resource Liabilities	Fringe benefits, including post-retirement pensions and other post-retirement benefits are not managed or funded by the University. These expenses and liabilities are funded and managed by the State of Hawai'i. UH System manages all UH debt obligations.	Colleges monitor loan default rates and implement action plans as appropriate.
3.D Financial Resource Contractual Agreements	UH System establishes and manages all contracts in accordance with State procurement laws.	Colleges adhere to UH policies and practices in the procurement of all contracts for goods, services, and professional services.
4.A Decision-making Roles and Responsibilities	Board of Regents policy establishes a commitment to shared governance. UH System and UHCC System confer regularly with college governance groups. Formal consultation with collective bargaining units is governed by State statute.	Colleges implement shared governance policies and processes for internal college decision-making.
4.B Chief Executive Officer	UH System and UHCC System delegate to the college CEO authority for college operations within the policy limits of the UH System.	College CEOs are responsible for all college actions, subject to UH policies and delegation of authority as reflected in Board of Regents policy, UH executive policy, and UHCC system policies.
4.C Governing Board	<p>The Board of Regents is established by statute. Members are selected by the Governor with the consent of the Senate from a list recommended by a review committee. Board policies are regularly reviewed and posted. Board by-laws govern Board and Board member behavior. All Board actions are subject to State open meeting and public information laws and regularly published.</p> <p>The VP for UHCC acts as the liaison to the Board of Regents for all CC matters, including accreditation</p>	Colleges submit action items to the Board of Regents through the VP for UHCC and the UH System.
4.D Multi-College Districts or Systems	The Board of Regents appoints the UH System president who is responsible for the entire 10-campus system of higher	Colleges operate within the policy and planning framework established by the UH System

Accreditation Topic	UH Community College System/ UH System	College
	<p>education in Hawai'i. The UH President appoints the VP for Community Colleges who is responsible for the 7-campus community college system. The VP appoints and supervises the individual community college Chancellors.</p> <p>UH System is responsible for UH executive policies, UH system planning and coordination, and for selected system wide support services such as financial services, facilities planning, UHCC system is responsible for CC wide policies, CC budget and resource allocation, and CC system planning and coordination, and selected system services.</p>	<p>and UHCC System.</p>

## **Certification of Continued Institutional Compliance with Eligibility Requirements**

---

**Authority**

**Operational Status**

**Degrees**

**Chief Executive Officer**

**Financial Accountability**

## Certification of Continued Institutional Compliance with Eligibility Requirements

---

Hawai'i Community College is in full compliance with the 21 Eligibility Requirements (ERs) for accreditation. The following section addresses ERs 1 – 5. The remaining 16 will be discussed in the appropriate sections of the Standard Reports.

### 1. Authority

Hawai'i CC is a two-year community college under the authority of the University of Hawai'i (UH) Board of Regents (BOR). The Hawai'i State Constitution establishes the university as a public corporation, and the BOR is responsible for the successful operation and achievement of its purposes. All instructional programs and degrees, faculty appointments, and changes in institutional mission must be approved by the BOR. By law, the BOR has the final responsibility for ensuring that the financial resources of the institution are used to provide sound educational programs.

#### Documentation

- Degree-granting approval statement, authorization to operate, or certificates from appropriate bodies
  - [Article X of the Constitution of the State of Hawai'i](#)
  - [Hawai'i Revised Statutes 304A, Part IV - University of Hawai'i System - Divisions, Departments and Programs](#)
  - [Relationship of the Board to Administration and University](#)

### 2. Operational Status

Hawai'i CC has been fully operational for over 75 years, offering fall, spring, and summer classes designed to meet the varied educational needs of degree-seeking students. The College offers classes at several sites and through distance education. A current schedule of classes and programs can be found on the College website. In addition to the wide range of certificate and degree offerings, the College offers a variety of non-credit programs and courses through EDvance (formerly the Office of Continuing Education and Training–OCET) and hosts UH Center, West Hawai'i students at its Pālanui campus.

#### Documentation

- [Enrollment history of institution \(most recent three years suggested\)](#)
- Enrollments in institutional degree programs by year or cohort, including degrees awarded
  - [Enrollment by degree programs](#)
  - [Degrees awarded by major](#)
- [Current schedule of classes](#)

### 3. Degrees

The College provides 27 academic programs offering 31 degrees, 44 career and technical education certificates, and two academic subject certificates in Liberal Arts. All academic degrees require at least 60 credits, two years of full-time coursework that include a general education component. Degree and course information is available on the College website or in the catalog.

Documentation

- [College Catalog](#)
  - List of degrees, course credit requirements, and length of study for each degree program
  - General education courses and requirements for each degree offered
  - Catalog designation of college level courses for which degree credit is granted
- Data describing student enrollment in each degree program and student enrollment in the institution's non-degree programs
  - [Degree program enrollment data](#)
  - [EDvance \(non-degree programs\) enrollment data](#)

#### **4. Chief Executive Officer**

The UH BOR appoints the chancellor, who is the chief executive officer of the College. When Chancellor Noreen Yamane retired in December 2015, Joni Onishi, vice chancellor for Academic Affairs, served as the interim chancellor during the selection process for a new chancellor. Rachel Solemsaas was appointed by the BOR in April 2016, and began as chancellor on July 1, 2016 (a). She is the chief executive officer of the College. The chancellor's full-time responsibility is to the College; she has the authority to administer BOR policies in areas of planning, managing resources, and ensuring the institution's implementation of statutes, regulations, and policies. Furthermore, she is responsible for the overall administration and management of the College, including programs related to instruction, continuing education and training, and career and technical training; student services; and institutional support.

The rules and regulations of the University of Hawai'i System grant the Office of the Chancellor the following authority and responsibilities. The chancellor

- issues rules and regulations governing the activities of the College
- develops long-range plans for the growth and improvement of the College
- recommends appointments, tenure, leaves, terminations, and promotions for all College personnel
- maintains accreditation standards as promulgated by the Accrediting Commission for Community and Junior Colleges, the State Legislature, and other governing bodies
- approves and submits a College budget to the University System
- serves as the College's liaison and representative to the general community, including the Hawai'i County government, state legislators, and other appropriate state and community agencies and organizations
- assures community involvement and program quality through the establishment of lay advisory bodies to critically review instructional programs, the continuance of a fundraising committee, and the establishment of other committees as needed. (b)

Documentation

- [Name, address, and biographical information about the chief executive officer](#)

- [Certification of CEO's full-time responsibility to the institution signed by chief executive officer and governing board](#)

## 5. Financial Accountability

The College annually undertakes an external financial audit performed by a certified public accountant in accordance with principles set by the Government Standard Board. Audits are reviewed by the BOR. Required federal audits are conducted and are available online at the UH Vice President for Budget and Finance Chief Financial Officer website. Periodic audits and reviews are done by the UH Office of Internal Audit. Financial documents, including copies of budget and audit reports, are linked below. The College reviews its student financial aid obligation through United States Department of Education financial aid audits.

### Documentation

- [Past, current, and proposed budgets](#)
- [Certified independent audits](#), including management letters
- [Financial aid program review/audits](#) if the institution is a participant
- [Student loan default rates](#) and relevant USDE reports if the institution is a participant

## **Compliance with Commission Policies and Federal Regulations**

---

**Policies on Rights and Responsibilities of the Commission and Member Institutions**

**Policy on Institutional Degrees and Credits**

**Policy on Transfer of Credit**

**Policy on Distance Education and on Correspondence Education**

**Policy on Representation of Accredited Status**

**Policy on Student and Public Complaints against Institutions**

**Policy on Institutional Advertising, Student Recruitment and Representation of Accredited Status**

**Policy on Contractual Relationships with Non-Regionally Accredited Organizations**

**Policy on Institutional Compliance with Title IV**

## **Compliance with Commission Policies and Federal Regulations**

Hawai'i Community College affirms its continued compliance with Commission policies and federal regulations.

### **Policies on Rights and Responsibilities of the Commission and Member Institutions**

*The institution has made an appropriate and timely effort to solicit third party comment in advance of a comprehensive evaluation visit.*

Hawai'i CC has fulfilled its institutional responsibility to solicit third party comment on its self-evaluation report. In fall 2017, the College solicited feedback on the draft ISER, which was made available to the campus community, via email and online intranet access, and hosted review discussions with smaller groups. The ISER draft was also provided to student government for feedback. In spring 2018, the College posted its final ISER on its website for review by the campus community and public. In addition, the College has an online link on its Accreditation webpage to the Third Party Comment Form on ACCJC's website.

*The institution cooperates with the evaluation team in any necessary follow-up related to the third party comment.*

The College will cooperate with the visiting evaluation team if any necessary follow-up is required related to third party comments.

### **Policy on Institutional Degrees and Credits**

*Credit hour assignments and degree program lengths are within the range of good practice in higher education (in policy and procedure).*

Hawai'i CC adheres to UHCCP #5.228 Credit Hour, which provides a consistent measure of the quality of a student's academic experience by defining a credit hour and identifying the process and evidence by which the UHCC System ensures reliability and accuracy of the assignment of credit hours to activities earning academic credit. UHCCP #5.203 Program Credentials: Degrees and Certificates establishes the minimum number of credit hours for each of the College's certificates and degrees.

#### Documentation

- [UHCCP #5.228 Credit Hour](#)
- [UHCCP #5.203 Program Credentials: Degrees and Certificates](#)
- [Hawai'i CC Degrees and Certificates](#)

#### Related University policies include:

- [UH Systemwide Executive Policy, E5.228 Credit Hour](#)
- [Board of Regents Policy, 5.201 Instructional Programs](#)
- [UH Systemwide Executive Policy, E5.202 Review of Established Programs](#)
- [UHCC Policy 5.202 Review of Established Programs, Attachment 1-B](#)

*The assignment of credit hours and degree program lengths is verified by the institution, and is reliable and accurate across classroom based courses, laboratory classes, distance education classes, and for courses that involve clinical practice (if applicable to the institution).*

The Academic Senate Curriculum Review Committee (CRC) reviews all new course and degree proposals as well as course/degree revisions, confirms that the courses/degrees meet this minimum unit requirement, and verifies that unit-to-student-learning-hour ratios are correct. Units of credit, expected hours of student contact, and total student work are identical for distance education and face-to-face courses. The College's programs, degrees, and tuition have been approved by the UH Board of Regents and are comparable to those at other community colleges across the UHCC System.

Documentation

- [CRC Duties and Responsibilities](#)

*Tuition is consistent across degree programs (or there is a rational basis for any program-specific tuition).*

Tuition, based upon the number of semester hours for residents and nonresidents, is consistent for degree programs across all UH community colleges as outlined in BOR Policy RP 6.202 Tuition and UH Systemwide Executive Policy EP 6.202 Tuition-Setting Procedures.

Documentation

- [RP 6.202 Tuition](#)
- [EP 6.202 Tuition-Setting Procedures](#)

*Any clock hour conversions to credit hours adhere to the Department of Education's conversion formula, both in policy and procedure, and in practice.*

The College does not award credit based on the clock-to-credit hour conversion formula.

## **Policy on Transfer of Credit**

*Transfer policies are appropriately disclosed to students and to the public.*

Students and the public are informed of current transfer policies and procedures on transferring from within the UH System and from outside the UH system through the College catalog and website, as well as through advising. In addition, the Systemwide Course Transfer Database website contains a searchable database of course equivalencies/evaluations for UH campuses, as well as for other colleges and universities.

Documentation

- [2017-18 Catalog, page 20; pages 38-39](#)
- [Transfer from Within the UH System](#)
- [Transfer from Outside of the UH System](#)
- [UH System Course Transfer Database](#)

*Policies contain information about the criteria the institution uses to accept credits for transfer.*

Hawai'i CC provides for effective transfer of credit that minimizes student difficulties while maintaining the College's commitment to the value and quality of degrees, certificates, and other credentials that are awarded.

#### Documentation

- [Executive Policy E5.209 University of Hawai'i Student Transfer and Campus Interarticulation](#)
- [BOR Policy RP 5.214 Student and Credit Transfer within the University](#)
- [HAW 7.208 Transfer Credit Evaluation Policy](#)
- [HAW 7.209 Transferring Credits from External Institutions](#)

### **Policy on Distance Education and on Correspondence Education**

*The institution has policies and procedures for defining and classifying a course as offered by distance education or correspondence education, in alignment with USDE definitions.*

Hawai'i CC defines its distance education (DE) courses in alignment with the USDE definition and the UH Board of Regents policy 5.210 Distance Education and Offsite Instruction, and articulates the types of DE courses available to its students in its catalog and on its website. The College requires all faculty teaching online classes to complete a compliance certification form certifying their compliance with several regulations and policies, including meeting the USDE definition of distance education. The College does not offer correspondence education courses.

#### Documentation

- [BOR Policy 5.210 Distance Education and Offsite Instruction](#)
- [2017-18 Catalog, pages 10-11](#)
- [Distance Education webpage](#)
- [Online Course Compliance Certification Form](#)

*There is an accurate and consistent application of the policies and procedures for determining if a course is offered by distance education (with regular and substantive interaction with the instructor, initiated by the instructor, and online activities are included as part of a student's grade) or correspondence education (online activities are primarily "paperwork related," including reading posted materials, posting homework and completing examinations, and interaction with the instructor is initiated by the student as needed).*

All Hawai'i CC courses are designed based on Course Outlines of Record that contain the common course elements taught regardless of who teaches the course or the modality of the class. This ensures that all courses offered, including those taught via DE, have the same learning outcomes. In addition, courses and instruction are evaluated using a variety of methods, including peer and student evaluations, regular five-year course review, and learning outcomes assessment.

Departments decide the mode of delivery of courses. Factors that contribute to a class being offered via DE delivery include providing more options to the Pāalamanui campus (which has limited enrollment), offering classes that are traditionally too low-enrolled, and providing options for students who need increased access to educational programs due to the College's large service area.

- [HAW 5.251 Course Outline of Record Policy](#)
- [HAW 5.250 Five-Year Course Review Policy](#)

*The institution has appropriate means and consistently applies those means for verifying the identity of a student who participates in a distance education or correspondence education course or program, and for ensuring that student information is protected.*

The College ensures student authentication through the learning management system, which requires students to log in using their UH username and password. In addition, faculty teaching distance education (DE) courses are urged to include in their courses at least one proctored activity (proctored assessment or other course activity) that requires students to validate their identities. The vice chancellor for Academic Affairs requires that all faculty teaching online classes complete a compliance certification form certifying their compliance with several regulations and policies, including student authentication. Faculty are required to report how they are meeting the responsibility for student authentication in online courses.

#### Documentation

- [Laulima portal](#)
- [Online Course Compliance Certification Form](#)

*The technology infrastructure is sufficient to maintain and sustain the distance education and correspondence education offerings.*

As outlined in Executive Policy 5.204, UH System offices manage the UH System technology infrastructure and services to support distance and online learning activities. This includes

- supporting a wide range of technical components including databases, servers, operating systems, utilities, middleware, and security technologies
- designing, planning, and implementing network connectivity within the UH system and all its campuses, educational centers, and research sites, as well as to the Internet, national and international research and education networks, and state and local government networks
- providing a wide range of day-to-day support services to maximize the availability of the university's networks and key business systems.

At the campus level, DE technology support includes computers, wired and wireless internet access, and classrooms with videoconferencing and interactive television equipment.

Computer Services/IT Support and Media Services provide support for DE technology, along with academic and administrative computing support, communications technology, and maintenance of faculty, staff, and administrator computers.

Documentation:

- [EP 5.204 Distance and Online Learning](#)
- [Hawai'i CC Computer Services](#)
- [Hawai'i CC Media Services](#)

## **Policy on Representation of Accredited Status**

*The institution posts on its website the names of associations, agencies and governmental bodies that accredit, approve, or license the institution and any of its programs, and provides contact information for filing complaints with such entities.*

Hawai'i CC has accreditation information posted on its website, accessible in one click from the College homepage. In compliance with this policy, the College exhibits the appropriate representation of its accredited status in its catalog and on its website, and provides contact information for filing complaints.

Documentation

- [Hawai'i CC homepage](#)
- [Accreditation webpage](#)
- [2017-18 Catalog, page 7](#)

## **Policy on Student and Public Complaints against Institutions**

*The institution has clear policies and procedures for handling student complaints, and the current policies and procedures are accessible to students in the college catalog and online.*

Student grievance and complaint policies and procedures are posted on the Hawai'i CC website.

Documentation

- [HAW 5.101 Student Academic Grievance Policy](#)
- [Student Complaint Form and Process](#)
- [Hawai'i CC Accreditation webpage](#)

In addition, students are informed about these policies and procedures in the Hawai'i CC 2017-2018 catalog as follows:

- Family Educational Rights and Privacy Act (FERPA) Notification, pages 40-41
- Student Academic Grievance Policy, page 42
- Policy on Nondiscrimination and Affirmative Action, page 42
- Policy on Sexual Harassment and Sexual Assault, page 43

*The student complaint files for the previous six years (since the last comprehensive evaluation) are available; the files demonstrate accurate implementation of the complaint policies and procedures.*

Student complaint files for the previous six years are located with the appropriate administrator depending on the nature of the complaint and the administrative level of conclusion; these files

are available for the team to review.

*The team analysis of the student complaint files identifies any issues that may be indicative of the institution's noncompliance with any Accreditation Standards.*

The College will address any concerns that the team may have about the complaint files, procedures, or policies.

*The institution posts on its website the names of associations, agencies and governmental bodies that accredit, approve, or license the institution and any of its programs, and provides contact information for filing complaints with such entities.*

The College posts on its website the names of commissions, agencies, and governmental bodies that accredit, approve, or license the institution and any of its programs, and provides contact information for filing complaints.

Documentation

- [Hawai'i CC Accreditation webpage](#)

### **Policy on Institutional Advertising, Student Recruitment and Representation of Accredited Status**

*The institution provides accurate, timely (current), and appropriately detailed information to students and the public about its programs, locations, and policies.*

Hawai'i CC consistently represents itself in a realistic, truthful manner in its catalogs, publications, websites, and advertising. The annually published catalog, readily available at campus locations and online, provides required program and policy information and an accurate representation of the College's accredited status.

Documentation

- [Hawai'i CC catalog](#)
- [Catalog Accreditation information](#)
- [Hawai'i CC Accreditation webpage](#)

*The institution complies with the Commission Policy on Student Recruitment.*

Student recruitment efforts are conducted through the Office of Student Services and performed by faculty and staff members who have academic credentials, on-the-job training, and experience. During recruitment visits, prospective students are provided with factual information regarding admissions, placement testing, financial aid, advising, registration, tuition and fees, and program requirements via electronic and hard-copy materials. Faculty members often join recruitment visits to share information about their respective programs.

Regarding agreements with recruiters for international students, the College adheres to a rigorous screening process established by the UHCC System office. Recruiters for international students

must submit an application, provide three references, and agree to the National Association of Foreign Student Advisors' Statement of Ethical Principles. Once the application has been reviewed and the references have been contacted, the College may enter into a contract with the recruiter. Enrolled students who have been referred by a recruiter are interviewed to verify that recruiters have provided accurate information. Should the College determine that a recruiter has violated the contract, the College may terminate or choose not to renew the contract.

Documentation

- [National Association of Foreign Student Advisors' Statement of Ethical Principles](#)

*The institution provides required information concerning its accredited status as described above in the section on Student Complaints.*

In compliance with this policy, the College exhibits the appropriate representation of its accredited status as noted in the following statement that is printed in its catalog (2017-18 Catalog, page 7) and posted on its website:

Hawai'i Community College is accredited by the Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges, 10 Commercial Blvd., Suite 204, Novato, CA 94949, (415) 506-0234, an institutional accrediting body recognized by the Council for Higher Education Accreditation and the U.S. Department of Education. Additional information about accreditation, including the filing of complaints against member institutions, can be found at: [www.accjc.org](http://www.accjc.org)

Accreditation for the following specific programs is also listed in the catalog and online:

- Associate in applied science degree in Culinary Arts: American Culinary Federation Foundation, Inc. Accrediting Commission (ACFFAC)
- Associate in science degree in Nursing: Accrediting Commission for Education in Nursing (ACEN)
- Children's Center: National Association for the Education of Young Children (NAEYC)

Documentation

- [Hawai'i CC Accreditation webpage](#)

### **Policy on Contractual Relationships with Non-Regionally Accredited Organizations**

*Contractual relationships of the institution to offer or receive educational, library, and support services meet the Accreditation Standards and have been approved by the Commission through substantive change if required.*

Hawai'i CC does not have any contractual relationships with non-regionally accredited organizations.

## **Policy on Institutional Compliance with Title IV**

*The institution has presented evidence on the required components of the Title IV Program, including findings from any audits and program or other review activities by the USDE.*

Evidence of the College's efforts to ensure compliance with the Title IV Program is posted on the UH Financial Reporting webpage.

Documentation

- [Financial Reporting](#)

*The institution has addressed any issues raised by the USDE as to financial responsibility requirements, program record-keeping, etc. If issues were not timely addressed, the institution demonstrates it has the fiscal and administrative capacity to timely address issues in the future and to retain compliance with Title IV program requirements.*

No issues have been raised by the USDE since the 2012 ISER. Review of the program 2016-17 audit is still in process.

*The institution's student loan default rates are within the acceptable range defined by the USDE. Remedial efforts have been undertaken when default rates near or meet a level outside the acceptable range.*

The College and UH System monitor and manage student loan default rates to ensure compliance with federal requirements. The College's student loan default rates are currently within an acceptable range of 28.2 percent for CDR 2014. Policies and procedures are in place to reduce the current rate, and the College's Financial Aid Office makes significant efforts in the areas of default prevention and debt management through its default prevention plan.

Documentation

- [Default Prevention Plan](#)

## **Standard I: Mission, Academic Quality and Institutional Effectiveness, and Integrity**

---

**I.A. Mission**

**I.B. Assuring Academic Quality and Institutional Effectiveness**

**I.C. Institutional Integrity**

## Standard I: Mission, Academic Quality and Institutional Effectiveness, and Integrity

---

The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.

### I.A. MISSION

---

**I.A.1. The mission describes the institution’s broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement (ER 6).**

#### Evidence of Meeting the Standard

Hawai‘i Community College recently updated its mission, vision statement, and institutional learning outcomes (ILOs). The Board of Regents approved the proposed updates on March 23, 2017; the changes went into effect on July 1, 2017 ([I.A.1-1](#)).

The approved mission and vision statements appear in both Hawaiian and English in the College’s annual catalog([I.A.1-2](#))and on the College’s website on the “About Hawai‘i CC” page([I.A.1-3](#)).The mission statement, as of July 1, 2017, is as follows:

*To promote lifelong learning, Hawai‘i Community College will emphasize the knowledge and experience necessary for Kauhale members to pursue academic achievement and workforce readiness. Aligned with the mission of the UH Community Colleges, we are committed to serving all segments of our Hawai‘i Island community.*

In support of the success of the College’s lifelong learners, Hawai‘i CC embraces the Hawaiian concept of *Kauhale*(the Hawaiian village). Hawai‘i CC’s *Kauhale*is an ‘*ohana* (family) of “administrators, faculty, staff, students, their families, and the Hawai‘i Island community that contributes measurably to the success of our college’s mission and outcomes.” *Kauhale* enables the College ‘*ohana* to recognize and celebrate individual skills, knowledge, and experiences as well as the skills, knowledge, and experiences of others in the spirit of *E ‘ImiPono* (seeking excellence). *Kauhale* is embedded in the mission and vision statements.

#### Educational Purposes

The revised mission is appropriate to an institution of higher learning and highlights the College’s broad educational purposes of 1) creating a culture of lifelong learning and 2) offering educational opportunities that are grounded in students’ pursuit of academic achievement and workforce readiness.

### **Student Population (Served)**

The intended student population of Hawai‘i CC is expressed in the mission’s commitment to serve “all segments of our Hawai‘i Island community.” As the only community college on the island, the College serves the diverse needs of its residents across a wide geographic area and a wide range of socioeconomic and cultural backgrounds. Employing multiple instructional delivery modes, Hawai‘i CC also hosts students from other campuses in the University of Hawai‘i (UH) System, as well as students from across the state and worldwide at its University Center at West Hawai‘i located at the College’s Pālanui campus. (“About Our Students,” Institutional Research Office (IRO) Fact Book ([I.A.1-4](#))).

### **Degrees/Credentials**

Hawai‘i CC supports students’ pursuit of academic achievement and workforce readiness by offering 31 academic degrees, 44 career and technical education certificates, and 2 academic subject certificates ([I.A.1.5](#)).

### **Commitment to Student Learning and Student Achievement**

The College commits to student learning and achievement by promoting lifelong learning skills and ensuring that students have the knowledge and experience necessary to achieve their educational goals. The College’s commitment includes 1) aligning instructional and non-instructional programs, units, and services to ILOs, and 2) embracing institution-set standards focused on achievement of academic and workforce goals. The College *Kauhale* supports the overall success of our learners through cross-campus dialogue, collaboration, planning, innovation, and assessment.

### **Analysis and Evaluation**

Hawai‘i CC’s mission describes its broad educational purposes, intended student population, degrees/credentials, and commitment to student learning and student achievement. The institution’s clearly articulated ILOs and wide range of programs, degrees, and credentials reflect the College’s commitment to providing educational opportunities that meet the diverse needs of learners across the entire island and beyond.

- [I.A.1-4](#) Annual Fact book - About Students
- [I.A.1.5](#) Hawai‘i CC Degrees and Certificates

**I.A.2. The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.**

### **Evidence of Meeting the Standard**

#### **Data Sources**

Hawai‘i CC gathers and analyzes data from a variety of sources to determine how effectively it is accomplishing its mission and whether the mission is directing its institutional priorities.

The Office of the Vice President for Community Colleges (OVPCC) for the UH System shares System and campus data and analyses via biannual presentations ([I.A.2-1](#)), open to the public, to all faculty, lecturers, and staff of the College. Presentations highlight institution-set standards([I.A.2-2](#)) and strategic directions of the University of Hawai‘i Community Colleges (UHCC) System ([I.A.2-3](#)) to address success and achievement gaps for underserved populations. Presentations starting from fall 2009 are archived on the College’s “Strategic Planning Resources” webpage under the “UHCC” heading([I.A.2-4](#)). Further, the Hawai‘i Graduation Initiative Scorecard ([I.A.2-5](#)) summarizes disaggregated quantitative data along with achievement results for performance measure goals. UHCC Strategic Directions are informed by the analysis of these data along with other student success and achievement data and are used to guide strategic plans across all UH campuses.

Another source of data provided by the UHCC Institutional Research & Analysis Office (IRAO) is the UHCC Annual Report of Program Data (ARPD)([I.A.2-6](#)). These data are provided to each of the College’s programs and to most support units, and are analyzed during annual and comprehensive reviews. Within the ARPD, program reports provide quantitative indicators of each program’s demand, efficiency, and effectiveness([I.A.2-7](#)) The ARPD also assigns to each program “Health Call Scores” of Healthy, Cautionary, or Unhealthy on indicators that provide perspective on the program's effectiveness in regard to students' academic success and workforce readiness. Other categories in the ARPD that represent institutional priorities for improvement include Distance Education, Perkins Core Indicators, and Performance Funding Indicators. As part of their review processes, programs and units are required to describe, discuss, and provide context for ARPD, including the program’s health scores in all categories.

Assessment data play a significant role in evaluating whether the College is meeting the educational needs of its students. As described further in Standard I.B, as part of its continuous improvement cycle, the College engages in systematic assessment of learning and unit outcomes ([I.A.2-8](#)). Assessment data, collected on a periodic schedule by the College’s programs and units, are embedded into the annual and comprehensive review processes, which focus on aligning assessment results to goals and action plans to support the College’s mission, institutional learning outcomes (ILOs), and strategic plans([I.A.2-9](#)).

The College’s Institutional Research (IR) website ([I.A.2-10](#),[I.A.2-11](#)) offers additional data for assessing institutional effectiveness. These include the Annual Fact Book ([I.A.2-12](#)), which assembles various data on Hawai‘i CC students, including graduation and persistence rates; the Integrated Postsecondary Education Data System (IPEDS) Data Feedback Reports; and National Community College Benchmark Project (NCCBP) data. Programs are asked to comment on various data in program reviews. Graduation and persistence rates are also addressed in College presentations and discussions, and planning for student success.

### **Use of Data**

All of these data resources are considered when determining how effectively Hawai‘i CC is accomplishing its mission, and are discussed in reviews and reports by faculty, staff, and administrators ([I.A.2-9](#)). Annual and comprehensive reviews by programs and units are examined by the College’s administrative team as part of the program and unit review process (PURP) ([I.A.2-13](#)). In the PURP, the College Effectiveness Review Committee (CERC), a committee with extensive College wide representation, evaluates all comprehensive

reviews([I.A.2-14](#)). Based on its evaluations, the CERC makes data-driven recommendations to the chancellor on prioritizing budget requests and campus planning, setting institutional priorities, and directing improvements that support fulfillment of the mission.

Hawai‘i CC uses institution-set standards data to ensure it is fulfilling its mission, reaching benchmarks for student achievement, and identifying ways to better meet the educational needs of underachieving populations ([I.A.2-15](#)). Programs and units have increasingly used UHCC performance data to understand and comment on their contributions to meeting performance outcomes in annual program and unit reviews. The College’s reorganized Strategic Enrollment Management Committee uses such data to develop strategies to support and increase student success. Hawai‘i CC’s Strategic Directions 2015-2021 document is focused on initiatives and strategies toward these ends ([I.A.2-3](#)).

In an effort to make data more accessible to all campuses, the UH System developed an online tool incorporating workflow and project management in a simple-to-use interface: STAR Academic Logic DB (Academic Logic) is a secure self-service, real-time reporting tool created to represent data from any of the UH-related databases ([I.A.2-16](#)). Student Affairs and Academic Affairs personnel use Academic Logic to obtain data on admissions, enrollment, course offerings, student success, financial aid, course/facilities capacity, and more. For example, the Admissions and Records Office (ARO) utilizes Academic Logic regularly to monitor registration changes, to inform VA certification adjustments, to confer degrees and certificates, to provide the campus with timely enrollment data, and to perform assessment on the timeliness of ARO services. Administrators, faculty, and staff use these data for program and services analysis and planning.

### **Analysis and Evaluation**

The College regularly collects and analyzes data from a wide variety of sources as part of its institutional review processes. Annual and comprehensive reviews, along with institutional data provided by the OVPC, allow the institution to integrate data provided from outcomes assessment, quantitative indicators of program demand and health, external factors impacting programs and units, and student achievement on various measures identified as strategically important to the College’s and UHCC’s missions. These data are regularly used in evaluation, planning, and resource allocation processes to support meeting students’ educational needs.

**I.A.3. The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.**

### **Evidence of Meeting the Standard**

Hawai'i CC participates in strategic planning on multiple levels. With input from all campuses, the UHCC System Office develops Strategic Directions that align with its mission and vision and reflect the priorities of the University across all six community college campuses and Maui College ([I.A.3-1](#)).

In line with the UHCC mission and the College's mission, the institution has its own strategic plans that are developed with College wide input and reviewed periodically. These include Hawai'i CC's Strategic Directions ([I.A.2-3](#)), Academic Master Plan ([I.A.3-2](#), [I.A.3-3](#)), Technology Master Plan ([I.A.3-4](#), [I.A.3-5](#)), and Resources Master Plan ([I.A.3-6](#), [I.A.3-7](#)). The Hawai'i CC Strategic Directions 2015-2021 document focuses on initiatives and strategies designed to help the College meet institutional goals with regard to student learning and achievement and mission fulfillment. This document is the basis for the College's annual institutional priorities. These priorities focus on key initiatives that will support accomplishment of stated goals. Most recently, the College adopted three Wildly Important Goals (WIGs) for 2017-2018 ([I.A.3-8](#)). Programs and support units then developed work plans aligned to these WIGs to create Proactive Efforts that Really Matter (PERMs) ([I.A.3-9](#)).

All programs and units are aligned with the College's mission and institutional learning outcomes (ILOs) ([I.A.3-10](#), [I.A.3-11](#)). Assessment data are collected on a periodic schedule and are analyzed to determine whether outcomes are being met. These assessment practices, along with other data available (see Standard I.A.2), help the College to evaluate whether programs and units are meeting institutional goals. Annual and comprehensive reviews analyze data and set program and unit priorities, goals, and budget requests, which are aligned with the College's strategic plans. Through the PURP, Hawai'i CC integrates the alignment, prioritization, decision-making, planning, resource allocation, and goal-setting which sustain and improve the College's programs and units and contribute to mission fulfillment ([I.A.1-3](#)).

### **Analysis and Evaluation**

Hawai'i CC's programs and services are aligned with its mission, and through assessment and the program and unit review process, the College ensures that program and unit priorities and goals support student learning and achievement.

### **LIST OF EVIDENCE**

<a href="#">I.A.1-3</a>	About Hawai'i CC

**I.A.4. The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary (ER6).**

### **Evidence of Meeting the Standard**

#### **Publication**

Hawai'i CC publishes its mission and other guiding statements in the annual catalog ([I.A.1-2](#)) and on the "About Hawai'i CC" webpage, which is readily accessible from the College's homepage ([I.A.1-3](#)). In addition, the College prints posters that include the institution's mission statement for display in classrooms, offices, and common areas around the College's facilities.

#### **Review Process**

The College's mission and vision statements are reviewed on a five-year cycle by the College Council ([I.A.4-1](#)). The College Council is an organization with representation from all major campus constituencies, and serves as a forum to facilitate dialogue on College wide issues ([I.A.4-2](#)). The College Council Charter describes the Council's responsibility for the development, revision, and assessment of all Institutional Guiding Statements of the College ([I.A.4-3](#)).

The College recently completed a College wide review process for its mission, vision, and institutional learning outcomes (ILOs). This effort was spearheaded by a Review Task Group made up of College Council members who "Organized a series of 'talk story sessions' for both the Hilo and Pāalamanui campuses, as well as an online shared document that allowed for all faculty and staff members to provide input on proposed changes to the ILOs/Mission/Vision" ([I.A.4-4](#)). Extensive efforts were made to involve faculty and staff in meaningful discussions about revision of the College's guiding statements. Outreach included information and discussion meetings, a mandatory Assessment Summit attended by faculty and staff, and emails to faculty and staff lists throughout the revision and voting process. The campus approved the revised mission, vision, and ILO statements in September 2016. The chancellor recommended the new statements to the Board of Regents (BOR), which approved the revised guiding statements as part of the consent agenda at its March 23, 2017 meeting ([I.A.1-1](#)). The new guiding statements went into effect on July 1, 2017.

#### **Analysis and Evaluation**

The institution has a well-defined process by which it reviews and revises its guiding statements, including its mission. The College recently revised its mission, vision, and ILOs in a manner that endeavored to elicit input from all faculty, staff, and administrators. The revised mission was officially adopted through approval by the College's governing body, the BOR, and is widely

published in the annual catalog and online, and through posters displayed across the Hawai‘i CC campus.

### I.B. ASSURING ACADEMIC QUALITY AND INSTITUTIONAL EFFECTIVENESS

---

#### Academic Quality

**I.B.1. The institution demonstrates a sustained, substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.**

#### Evidence of Meeting the Standard

Hawai‘i CC provides many opportunities for faculty and staff to hold meaningful discussions during meetings held in divisions/departments, in committees, and College wide. Sustained dialog on student outcomes, equity, and academic quality, and institutional effectiveness is structured into processes for evaluating and improving student learning and achievement.

#### Student Outcomes

The College’s systematic plan for assessing outcomes for academic programs and service units provides ongoing data collection and promotes sustained efforts to improve the learning environment. Course assessments, which require multi-semester processes of collecting evidence, analyzing data, forming action plans, reassessing, and “closing the loop” reporting, draw faculty and lecturers together to collaborate and improve instructional practices ([I.B.1-1](#)). As part of the process, programs and units discuss how their programs and services support the College’s institutional effectiveness and help the College achieve its goals ([I.B.1-2](#)). Program and unit assessments bring together wider constituencies to address larger academic and service improvement outcomes.

#### Student Achievement

Other forums for collaboration on issues impacting student learning and achievement include the University of Hawai‘i Community Colleges (UHCC) Student Success Committee, which includes subcommittees tasked with identifying issues arising from the implementation of the strategic plan, addressing policy questions, recommending possible changes in practice, and informing the Strategic Planning Council or the Council of Chancellors on major issues needing attention. Colleges in the University of Hawai‘i (UH) System also convene their own student

success committees. Hawai‘i CC’s Student Success Committee([I.B.1-3](#)) and Strategic Enrollment Management group, formed in 2015, have recently evolved into the Student Success Pathways and Integrated Student Services committees. In addition, the Hawai‘i Strategic Institutes/Hawai‘i Student Success Institutes provide an annual opportunity for systemwide collaboration and discussion about student learning and achievement with colleagues from sister campuses([I.B.1-4](#)).

### **Student Equity**

Systemwide efforts to mitigate barriers to student achievement also inform the College’s dialog on improvement. The vice president for Community Colleges gives presentations to all faculty, staff, and administrators at Hawai‘i CC biannually to share data trends, performance measures, and initiatives at the UHCC level, encompassing all six community college campuses and Maui College ([I.B.1-5](#)). Student equity and achievement data are considered when developing the UHCC’s Strategic Directions, which direct the action plans for all campuses.

The College, in alignment with the UHCC Strategic Plan, is committed to closing the student achievement gaps for Native Hawaiians, Filipino, Pacific Islander, and low-income students. The 2015-2021 Strategic Directions and institutional performance indicators set goals to ensure educational parity for these historically underserved groups. Progress is monitored and results are shared College wide starting with the UHCC performance status presentations and during all-College and division meetings. Exercises undertaken at all-College meetings, such as the Poverty Simulation and Achieving the Dream’s Finish Line Game, help the *Kauhale* to focus on closing educational gaps by discussing and understanding opportunity challenges students face, especially those from underserved groups. The College’s Strategic Plan is also aligned with the UH System’s Hawai‘i Papa O KeAo initiative ([I.B.1-6](#)), which strives to establish the University of Hawai‘i as a pre-eminent indigenous-serving institution model.

The College is equally committed to ensuring a welcoming and supportive environment for all students. Examples include numerous Safe Zone Training sessions (to support lesbian, gay, bisexual, transgender, and queer+ (LGBTQ+) students) ([I.B.1-7](#)) and Title IX training by the UH Office of Institutional Equity([I.B.1-8](#)).

Student surveys also provide direct feedback on equity and other issues for College wide discussion. For instance, a Student Climate Survey on Sexual Harassment and Gender Discrimination was open to students, faculty, staff, and administrators of the College in spring 2017 ([I.B.1-9](#)). Forthcoming results will help the College to determine action items and to set benchmarks for continuous improvement.

Further, Hawai‘i CC has a dedicated center to provide direct academic support for students with disabilities. The Hā‘awi Kōkua Program’s mission is to promote equal opportunity for individuals with disabilities to gain the maximum benefit from their educational/learning experience by participating fully in their regular courses and activities at Hawai‘i CC. The program provides a series of online training videos on its webpage to increase awareness and encourage discussion of academic disabilities support (webpage /video links at the bottom of the Hā‘awi Kōkua Faculty & Staff Resources webpage)([I.B.1-10](#)).

### **Academic Quality**

The College's designated forum for faculty oversight of academics is through the Academic Senate ([I.B.1-11](#)). The Senate conducts regular discussions of academic quality. All instructional and non-instructional faculty members are invited to attend and vote at monthly meetings of the entire Senate, where formal agenda items are debated. In addition, representatives of all departments and instructional units attend more frequent meetings of Standing, Select, and ad hoc Senate committees (including the General Education (GE) Committee, the Distance Education (DE) Committee, and the Curriculum Review Committee) in which members review, discuss, and make recommendations on specific policies, curricula, and other academic issues. Senate meeting minutes are posted publicly for review.

Discussions about academic quality also occur in instructional division meetings, in which division/department chairs, deans, and the vice chancellor for Academic Affairs review policies, procedures, and practices related to instructional programs and requirements, assessment, and initiative/innovation implementation and progress.

### **Institutional Effectiveness**

The College's recent revision of its mission, vision, and institutional learning outcomes (ILOs) is one example of collegial, College wide dialog regarding institutional effectiveness, as detailed in Standard I.A.4. In addition, bi-annual all-College meetings are held during convocation week to start off the fall and spring semesters; these meetings encourage collegial discussion of institutional effectiveness and improvement, including updates on student achievement data and initiatives ([I.B.1-12](#)).

The College's Institutional Assessment coordinator further supports sustained, substantive, collegial dialog on institutional effectiveness. The coordinator leads periodic College wide assessment summits([I.B.1-13](#)), holds one-on-one meetings with programs and units seeking guidance on assessment, provides updates on assessment efforts at Hawai'i CC, develops and provides institutional assessment resources, and offers professional development opportunities for faculty and staff to improve knowledge and practice of assessment ([I.B.1-14](#) ). The coordinator's specific expertise in assessment practices enhances the level of dialog, ensuring that substantive discussions are taking place.

The assessment coordinator also chairs and convenes the College wide Assessment Committee ([I.B.1-15](#)), which has recently begun collaborating with the College Effectiveness Review Committee (CERC) to provide robust evaluations of assessment results used as evidence in program and unit comprehensive reviews ([I.B.1-16](#)). Evaluation by CERC, described in Standard I.A.2, also promotes College wide discussion of academic quality, improvement, and effectiveness.

With representation from all major campus constituencies, the College Council is another broad forum for dialog on institutional issues and improvements. Anyone from the *Kauhale* may bring issues to the table by proposing agenda items([I.B.1-17](#)).

### **Analysis and Evaluation**

The College's systematic assessment and planning processes generate collegial discussions on student learning and achievement. There are numerous College wide bodies and forums that promote discussions about equity, academic quality, and institutional effectiveness, often

expanding dialog started within committees and department meetings. Extensive review processes help translate data, trends, and the institution's strategic directions into innovative plans and resource allocation decisions designed to foster continuous improvement of student learning and achievement at Hawai'i CC.

**I.B.2. The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services (ER 11).**

#### Evidence of Meeting the Standard

##### Defined Outcomes

Hawai'i CC defines student learning outcomes for all academic programs and service units at the institutional (ILO), program (PLO), course (CLO), and unit (UO) levels (described in Standard I.A.3). Hawai'i CC's ILOs (described in Standard I.A.4) represent the College's expectations for degree and certificate recipients, and guide course, program, and unit outcomes. Outcomes also serve as a guiding force in developing curriculum and co-curricular activities.

The development, revision, and assessment of learning outcomes at the course, program, non-instructional unit, and institutional levels are established by Hawai'i CC 5.202 Assessment Policy, including Distance Education Courses ([I.B.2-1](#)). Procedures for revision of course learning outcomes are determined by the Haw 5.253 Fast Track Modification to a Course Policy ([I.B.2-2](#)) and the Curriculum Review Committee's Guidelines for Evaluating Course Proposals ([I.B.2-3](#)). PLOs, CLOs, and UOs are posted on the program/unit pages on the College's website ([I.B.2-4](#)), and PLOs are also published in the annual catalog ([I.B.2-5](#)).

The institution's "Programs of Study" webpage list the degrees and certificates that are achievable through each program at Hawai'i CC ([I.B.2-6](#)). This information may also be found in the catalog ([I.B.2-5](#)).

### **Outcomes Assessment**

As CLOs and PLOs are aligned, course assessments ensure that students who complete Hawai'i CC programs achieve the identified program outcomes. Student learning outcomes for all courses, regardless of delivery mode, are assessed systematically throughout the College on a Course Assessment Schedule ([I.B.2-7](#)). Course assessment schedules, plans, and reports are available online via the Assessment webpage ([I.B.2-8](#)). The student and learning support services units and the non-credit unit at Hawai'i CC participate in the Unit Assessment Cycle. Unit outcomes (UOs) are assessed and reported on annually. The cycle is displayed in the Assessment Handbook ([I.B.2-9](#)). Assessment results are included in Annual Unit Reviews available via the Program and Unit Review webpage ([I.B.2-10](#)). The 2016-2017 Annual Assessment Report from the Assessment Committee to College Council summarizes activities, accomplishments, and action plans, and directs institutional improvement([I.B.1-15](#)).

The program and unit review process (PURP) is the method by which the College incorporates assessment results in planning and improvements as outlined in a Standard I.A.2, Standard I.A.3, and further described in Standard I.B.5. Both instructional programs and service units at the College participate in required annual review as well as comprehensive review every three years, integrating assessment results and discussion with action planning and resource requests, ensuring that assessment results in direct improvements to instructional and student and learning support services.

### **Analysis and Evaluation**

The recently revised ILOs provide a framework for the College's defined student learning outcomes at the course, program, and unit levels for all academic programs and service units. Outcomes are assessed on a regular schedule, and results are reported, discussed, and used to direct action items in annual and comprehensive program and unit reviews. The cycle of assessment and review ensures that students who complete academic programs achieve the identified outcomes and that outcomes drive the implementation of student success initiatives and other instructional innovations.

### **LIST OF EVIDENCE**

<a href="#">I.B.1-15</a>	Assessment Review AY 16-17 Annual Report

**I.B.3. The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information (ER 11).**

### **Evidence of Meeting the Standard**

#### **Establishment and Assessment of Institution-Set Standards**

UHCC Policy 4.203 Institution-Set Standards define the standards by which all colleges in the UHCC System assess student achievement ([I.B.3-1](#)).

Standards:

1. Course Completion
2. Degrees and Certificates Awarded
3. Native Hawaiian Degrees and Certificates Awarded
4. Pell Recipient Degrees and Certificates Awarded
5. Transfer to Baccalaureate Institutions
6. Integrated Postsecondary Education Data System (IPEDS) Student Success Rate
7. Licensure and Certification Examination Success Rate
8. Job Placement Rate

According to the policy, each standard will have a baseline level of achievement and an aspirational target for improvement based on each College's previous performance on each measure. These aspirational targets are aligned with System strategic plan targets. Regardless of delivery mode, all courses and programs are held to the same standards.

The Office of the Vice President of the Community Colleges (OVPCC) is responsible for producing an annual report of achievement results compared to the baseline and target values, including trend analysis. A presentation is given by the vice president each semester, providing Hawai'i CC faculty and staff with performance data on each of the standards. In the OVPCC presentations, the outcomes are shared as well as new strategies and initiatives aimed toward improving student achievement. UHCC Strategic Directions are informed by the results of those performance measures, along with other student success and achievement data ([I.B.3-2](#)).

According to the Institution-Set Standards policy, the College is responsible for "reviewing the annual results and using the results in program planning and resource allocation as appropriate. If the actual effectiveness measure falls below the baseline, the college shall prepare an action plan to address improvements in the achievement results." Results and action plans are discussed in division, administrative, and College Council meetings, and in various student success committees and meetings. The College has taken action in response to standards results; for example, in academic year 2015-16, after the College did not meet its target for transfer for two years, a grant-funded position was institutionalized to become a Pathway Coordinator position to provide consistent support in increasing the transfer rate to four-year institutions. In addition, the College formed a Strategic Enrollment Management group and created Outreach and Recruitment Coordinator and Student Success Coordinator positions to assist in meeting various targets.

### **Published Information**

The vice president's biannual presentations are published on the UHCC website, along with annual reports of each community college's performance on the standards and other performance data summaries. The vice president's presentations are also published on Hawai'i CC's website, along with numerous College, UHCC, and UH strategic planning documents ([I.B.3-3](#)).

Institution-set standards achievement data are also accessible online in the College Fact Book ([I.B.3-4](#)). Applicable programs, such as Nursing and Allied Health, also track licensure exam pass rates and post the expected results and achievement outcome data on the College's website ([I.B.3-5](#)).

Other resources that share the institution's achievement results are the College Program Analyses and Executive Summaries posted on the UHCC Annual Report of Program Data (ARPD) website ([I.B.3-6](#)). Summaries include the College's ARPD information, performance funding goals and results, and performance results on Perkins Core Indicators. These results are incorporated into the PURP and, along with institution-set standards results and goals, inform the College's integrated planning.

### **Analysis and Evaluation**

Institution-set standards, along with baseline and aspirational targets for each campus to achieve, are established by the UHCC System. Performance on the standards is reported to the College in biannual presentations by the UHCC vice president. In addition to these presentations, the UHCC also publishes campus-specific annual reports on its website, along with other presentations and reports detailing each campus's performance on the standards and other systemwide initiatives. Hawai'i CC publishes the vice president's presentations on its website, along with other reports and strategic plans for continuous improvement. Institution-set standards results are also published on the College's website. When standards are not met, the campus develops improvement plans to address issues.

### **LIST OF EVIDENCE**

<a href="#">I.B.3-1</a>	UHCCP # 4.203 Institution-Set Standard
<a href="#">I.B.3-2</a>	UHCC-VP Presentation Sp2016
<a href="#">I.B.3-3</a>	Strategic Planning Resources
<a href="#">I.B.3-4</a>	2017 Factbook
<a href="#">I.B.3-5</a>	Nursing Student Achievement Outcome Data
<a href="#">I.B.3-6</a>	Annual Report of Program Data

**I.B.4. The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.**

### **Evidence of Meeting the Standard**

#### **Use of Data**

As described in Standard I.B.2, all Hawai'i CC academic programs and service units participate in regular assessments using an outcomes-based approach designed to support student learning and student achievement. While conducting and reporting on assessments, worksheets guide participants to reflect on ways that data can drive institutional improvements ([I.B.4-1](#)). In fact, the College is so strongly committed to outcomes-based assessment that investment was made in

a software product to better track and use assessment data to support student success and to provide longitudinal planning support for programs and units. The software, called Campus Labs *OUTCOMES*, was procured in spring 2017 with system set-up throughout summer 2017 for College wide implementation in fall 2017 ([I.B.4-2](#)).

### **Institutional Processes**

The program and unit review process (PURP), described in more detail in Standard I.B.5, organizes the College's processes of using assessment data to support student learning and achievement. Student achievement and outcomes data are analyzed by faculty and staff who are responsible for discussing results in annual and comprehensive program and unit reviews. Program and unit review templates include questions about how goals and action plans are tied to student learning outcomes: "[D]iscuss how implementing this action will help lead to improvements in student learning and their attainment of the program's learning outcomes (PLOs)," "Describe the program's intended next steps to improve student learning, based on the program's overall AY16-17 assessment results" ([I.B.4-3](#)).

Through the PURP, comprehensive program and unit reviews containing assessment data and analysis, action items, and resource requests are evaluated by the CERC, which submits recommendations that inform administrative decisions regarding campus priorities, initiative development, and resource allocation in support of student learning and achievement ([I.B.4-4](#)). In addition, annual reports from the College's Assessment Committee summarize activities and action plans based on the results of assessment and provide the College Council and the administrative team with additional feedback to inform improvement efforts ([I.B.1-15](#)).

### **Analysis and Evaluation**

The institution regularly collects assessment data and incorporates the results of assessment into its ongoing institutional processes, including program and unit review. Throughout these processes, participants and reviewers are prompted to make decisions and set action plans that align with the results of assessment and support student learning and achievement.

- [I.B.1-15](#) Assessment Review AY 16-17 Annual Report

### **Institutional Effectiveness**

**I.B.5. The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.**

## Evidence of Meeting the Standard

### Program and Unit Review

The College's program review is determined by the requirements detailed in Haw #4.201 Integrated Planning for Institutional Effectiveness ([I.B.5-1](#)), UHCCP #5.202([I.B.5-2](#)), Board of Regents Policy, Section 5-201.B & E. ([I.B.5-3](#)), and University of Hawai'i Systemwide Executive Policy, E5.202 ([I.B.5-4](#)) policies. The program and unit review process (PURP) ensures that the College regularly assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement ([I.B.5-5](#)). Instructional programs and service units participate in both annual reviews and comprehensive reviews every three years, providing a method by which assessment of course and program learning outcomes, unit outcomes, and student achievement data are systematically incorporated into ongoing evaluation of programs and services. All courses, regardless of delivery mode, are held to the same standards and assessment practices. The process supports programmatic improvement, implementation of modifications, and evaluation of the changes made for continuous quality improvement ([I.B.5-6](#)).

Assessment findings (described in Standard I.B.2) are incorporated into the PURP, during which data relevant to student outcomes and achievement (including outcomes assessment, Annual Report of Program Data (ARPD), program-specific data, and institutional data, further described in Standard I.A.2) are analyzed and used to determine program/unit effectiveness and to inform the action plans and goals that are discussed in annual and comprehensive reviews. Annual review results impact initiatives development, annual priorities, and appendices updates of the Academic Master Plan, Technology Master Plan, and Resources Master Plan. Comprehensive reviews focus on aligning goals and action plans with the College's mission, ILOs, and strategic plans. Goals and resource requests must be based on analysis of the program's achievement data, which are disaggregated by program and delivery mode, and of the overall results of course assessments of student learning outcomes conducted during the review period. All programs and units are held to the same standards ([I.B.5-7](#), [I.B.5-8](#), [I.B.5-9](#)).

The College Effectiveness Review Committee (CERC) evaluates comprehensive reviews using criteria which examine the program/unit's effectiveness in supporting fulfillment of the College's mission and ILOs, and the alignment of the program/unit's goals and action plans with the College's mission, ILOs, and strategic plan ([I.B.5-10](#)). Evaluation by CERC promotes College wide discussion of academic quality, effectiveness, and improvement. CERC provides feedback to programs and units via response memos; a summary report and recommendations are sent to the chancellor for discussion with the administrative team and for consideration in strategic planning and resource allocation decisions ([I.B.5-11](#)).

### Analysis and Evaluation

Hawai'i CC has an established program/unit review process that includes evaluation of programs and services based on data regarding student learning and achievement. The College incorporates the analysis of several sources of data, including disaggregated data, into its strategic planning, including qualitative and quantitative data in the form of assessment outcomes and achievement results.

### LIST OF EVIDENCE

**I.B.6. The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.**

### **Evidence of Meeting the Standard**

Hawai‘i CC disaggregates and analyzes achievement results for subpopulations of students, and has just begun to disaggregate learning outcomes results for subpopulations of students. Based on one of the action steps from the 2015-2016 Annual Assessment Report from the Assessment Committee to the College Council, in 2017, the College procured an assessment management system (AMS) which includes the ability to disaggregate data ([I.B.6-1](#)). The College is currently investigating different approaches to disaggregate outcomes data using the new AMS.

Disaggregated achievement data by subpopulation, including course delivery mode, are provided in academic program and support services ARPD provided by the System ([I.B.6-2](#)). Additional disaggregated data are found in Hawai‘i CC’s Fact Book, which includes institution-set standards data and a wealth of information on the institution’s students and service area, including degrees and certificates awarded and graduation and persistence rates ([I.B.6-3](#)).

At the program and unit level, ARPD data is addressed in the PURP, which provides an opportunity for the College to identify performance gaps in subpopulations of students and to set action plans and goals based on such analysis ([I.B.5-5](#)). Program and unit reviews are evaluated by the CERC, which submits recommendations to the chancellor and administrative team for consideration in setting both annual and long-term priorities. At the institutional level, disaggregated achievement data are shared and discussed in biannual all-College meetings and during the vice president’s presentations. Student success committees and administration collaborate to shape initiatives designed to address institutional performance gaps. All of these efforts contribute to the College’s integrated planning process, in which development of institutional initiatives, setting of annual priorities, strategic planning, and resource allocation occur to mitigate performance gaps and provide necessary support for increased student success.

### **Analysis and Evaluation**

The College disaggregates and analyzes student achievement data for subpopulations of students, allowing it to identify performance gaps for subpopulations that can be mitigated using strategies

identified within its evaluation and planning processes. Disaggregation of student outcomes data is in the early stages, and will be enhanced by the College's recent acquisition of a new AMS. Evaluation of mitigation strategies is incorporated into program and unit review and in the strategic planning process.

#### LIST OF EVIDENCE

- [I.B.6-1](#) Institutional Assessment Office Annual Summary Report to the College Council AY 15-16
- [I.B.6-2](#) Sample ARPD (Accounting)
- [I.B.6-3](#) 2017 Annual Fact Book
- [I.B.5-5](#) Program and Unit Review Process (PURP)

**I.B.7. The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.**

#### Evidence of Meeting the Standard

Hawai'i CC reviews and updates policies as needed. However, the College recognized that such evaluation had not been formalized for all policies, thus resulting in the revision of HAW 1.001 and the development of a schedule of policy review that will provide more consistent evaluation and updating of policies across the institution.

Governance process review is carried out by the College's Academic Senate ([I.B.1-11](#)), College Council ([I.B.7-1](#)), and Student Government ([I.B.7-2](#)) as directed in their charters. Subcommittees of Hawai'i CC's Academic Senate, including Educational Policy and Faculty Policy Committees, regularly evaluate relevant policies. The outcomes of committee discussions are shared at Academic Senate meetings, and Senate minutes are available on the College's website ([I.B.7-3](#)).

Institutional practices within instructional programs, student and learning support services, and resource management are evaluated on a regular schedule via the PURP. Programs and units participate in the assessment process and change practices for improvement as part of their review. Comprehensive reviews evaluate program/unit effectiveness and contribution to mission fulfillment. The PURP is described in more detail in Standard I.B.5.

#### Analysis and Evaluation

The institution evaluates its policies and practices to assure effectiveness in supporting academic quality and mission accomplishment. Regular governance process review, assessment, and the PURP provide a systematic structure for improvement of institutional practices and processes. A new schedule of policy review ensures formalized, consistent evaluation of policies.

#### LIST OF EVIDENCE

- [I.B.1-11](#) Senate Handbook
- [I.B.7-1](#) College Council Charter
- [I.B.7-2](#) Constitution for Student Government
- [I.B.7-3](#) Academic Senate Minute

**I.B.8. The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.**

### **Evidence of Meeting the Standard**

Hawai‘i CC communicates the results of all of its assessment and evaluation activities on its website. Results are also shared via all-College presentations, executive summaries, and emails. Through extensive communication, the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.

Hawai‘i CC’s PURP integrates comprehensive program/unit reviews into assessment of institutional effectiveness. The process informs outcome-driven innovation and resource allocation and ensures that the College develops action plans based on its strengths and weaknesses.

PURP reports are broadly communicated:

- Assessment of courses and units are published on the College website ([I.B.8-1](#), [I.B.8-2](#))
- Annual and comprehensive reviews are published on the College website ([I.B.8-3](#))
- CERC summary report and recommendations to the chancellor are published on the College Intranet ([I.B.4-4](#)).

The College also uses the following published evaluation reports in its planning process:

- UHCC vice president presentations ([I.B.3-3](#))
- Institution-set standards data ([I.B.8-4](#))
- Accreditation reports ([I.B.8-5](#))

College wide presentations, division/department/unit meetings, and assessment summits further support a shared understanding of the institution’s strengths and weaknesses. All-College meetings are held at the beginning of each semester and at the end of the academic year, and include updates from administration on student achievement, student success initiatives, strategic plans, ongoing resource implications, accreditation, and other significant topics.

### **Analysis and Evaluation**

Hawai‘i CC’s assessment and evaluation results are broadly communicated via the College website. Results are discussed College wide, and are the basis for strategic planning.

### **LIST OF EVIDENCE**

<a href="#">I.B.8-4</a>	Factbook section with ISS data
<a href="#">I.B.8-5</a>	Accreditation Report

**I.B.9. The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources (ER 19).**

### **Evidence of Meeting the Standard**

Hawai‘i CC’s Integrated Planning for Institutional Effectiveness Policy HAW 4.201 outlines the systematic, institution-wide evaluation and strategic planning process that integrates program and unit review, planning, and resource allocation to support mission fulfillment and continuous improvement of academic quality and institutional effectiveness ([I.B.9-1](#)). The policy, along with institutional assessment and planning documents, is accessible via the College’s Institutional Effectiveness and Planning webpage ([I.B.9-2](#)).

Evidence of integrated planning is available in many forms, including performance measures, outcomes assessment, program and unit reviews, evaluations, results summaries, and strategic planning documents.

Hawai‘i CC utilizes the PURP and analysis of institution-set standards and performance indicators results to evaluate programs and services’ strengths and areas of need. Annual reviews affect short-term priorities and prompt minor updates to the College’s Academic, Resources, and Technology Master Plans ([I.B.9-3](#)). Comprehensive reviews are evaluated by the CERC for mission, ILO, and strategic plan alignment and effectiveness before recommendations are submitted to the chancellor and administrative team for institutional prioritizing and budgeting decisions regarding program, services, personnel, facilities, and technology ([I.B.4-4](#)). Comprehensive review recommendations, institutional data trends, and UH System and UHCC strategic plans inform development of the College’s long-range goals in the Academic, Resources, and Technology Master Plans and the College’s strategic plans. Consideration of a variety of data and institutional and System goals results in a broadly informed evaluation and integrated planning process designed to continuously improve educational quality and institutional effectiveness.

### **Analysis and Evaluation**

Hawai‘i CC engages in an integrated evaluation and planning process directed toward accomplishment of its mission through a continuous cycle of improvement of academic quality and institutional effectiveness. Assessment and program/unit reviews lead to planning for both short- and long-range goals. Performance indicator results and System goals also direct long-range strategic planning that impacts all areas of the College. Integrated planning information and data are available on the College website, and campus-wide input ensures that evaluation and strategic planning are a collaborative effort to provide quality educational programs and services to students.

Determine how assessment management system and assessment design can enable disaggregation of assessment results	I.B.6	Vice Chancellor for Academic Affairs, Institutional Assessment Coordinator, Institutional Research	Begin fall 2018	Disaggregation of learning outcomes data
Review and revise the integrated planning process (including evaluation of master plans)	I.B.9, III.B.2, III.C.1, III.D.2	(Related to QFE Project #1)		

## I.C. INSTITUTIONAL INTEGRITY

---

**I.C.1. The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors.**

### Evidence of Meeting the Standard

The College assures the clarity, accuracy, and integrity of information about the mission statement, learning outcomes, educational programs, student support services, and accreditation status through a variety of processes.

### Mission Statement

The current mission and vision statements and the institutional learning outcomes are published in both English and Hawaiian on page 6 of the 2017-2018 catalog ([I.C.1-1](#)) and on the College's website ([I.C.1-2](#)), as well as printed on posters prominently displayed on the Hilo and Pālanuui campuses. The mission and vision statements are reviewed on a five-year cycle by the College Council ([I.C.1-3](#)). The College Council Charter describes the Council's responsibility for the development, revision, and assessment of all Institutional Guiding Statements of the College ([I.C.1-4](#)).

### Instructional Programs

Instructional program information is contained on pages 63-98 in the 2017-2018 catalog and via the "Programs of Study" link on the College's website ([I.C.1-5](#)). Programs are regularly reviewed in the program and unit review process (PURP) to assess the integrity and currency of instructional offerings. The College does not offer any completely DE programs; however, information about DE courses is available on the College's website ([I.C.1-6](#)).

### Program and Course Learning Outcomes (PLOs, CLOs)

Learning outcomes for all programs and courses, regardless of delivery mode, are regularly reviewed for currency and accuracy by instructional faculty and administrators through a rigorous, collaborative process. Both the PLOs and CLOs are available at the College's Intranet curriculum website ([I.C.1-7](#)) and the College's public website via instructional program pages ([I.C.1-8](#)), as well as on the College's Assessment website ([I.C.1-9](#)).

PLOs are developed and reviewed by program faculty and lecturers, and then approved by department or division chairs and the dean of Liberal Arts and Public Services or the dean of Career and Technical Education. Each year, 20 percent of each program's courses are reviewed for currency and correct articulation ([I.C.1-10](#)). Faculty and lecturers collaborate during these course reviews and other course assessments to develop or revise course learning outcomes; such revisions can be approved via the Fast Track or Curriculum Review processes.

CLOs are customarily published in course syllabi and distributed to students at the beginning of the semester in hard copy and/or electronic format. Department and division chairs are responsible to review syllabi for accuracy of learning outcomes. The assessment process, which

entails the development of an assessment plan, conducting the assessment, planning and implementing improvements for student success, and a closing the loop re-assessment for each course, ensures that course learning outcomes are revisited on a regular cycle of review. Assessment reports and schedules of course assessments for each instructional program are available on the Assessment webpage ([I.C.1-11](#)).

### **Student Support Services**

Information on student support services is available on pages 12-13 and 36-39 of the 2017-2018 catalog ([I.C.1-12](#)) and on the College's website, under "Admission, Advising, Financial Aid & Student Support Services" and "Learning Resources" via the "Services for Students" link ([I.C.1-13](#)). Student support for DE students is provided on the "Services for DE" webpage ([I.C.1-14](#)). Non-instructional faculty, staff and administrators review service and student support unit outcomes on a regular basis. This is one way to ensure currency and accuracy of the student support services offered at Hawai'i CC.

### **Accreditation**

The College provides accurate information to students and the public about its accreditation status with its accreditors on the Accreditation page of the College website ([I.C.1-15](#)). This information includes the Accrediting Commission for Community and Junior Colleges (ACCJC) recommendations and the College's responses, including follow-up reports from 2012 to 2016.

For publication of the above information, the Office of the Vice Chancellor for Academic Affairs is responsible for ensuring the accuracy and clarity of the academic information printed in the catalog and on the College's website. Each year, the previous year's catalog is distributed to the appropriate department/division chairs and administrative staff, who review and revise information concerning instructional programs and academic support services. The College's mission statement, student support services information, and accreditation status are reviewed and updated by the responsible unit and content contributors. Beginning in 2016-17, all departmental units and instructional programs reviewed their respective webpages as part of the annual program/unit review process. In addition, there is a Web Support Request Form that faculty or staff can utilize to update specific information on the College's website ([I.C.1-16](#)).

### **Analysis and Evaluation**

The College publishes information about its mission statement, learning outcomes, educational programs, student support services, and accreditation status in its catalog and on its website. Clarity, accuracy, and integrity of the information that the College publishes are maintained by consistent, regular review by faculty, staff, and administrators. All catalog information undergoes annual review and revision to ensure accuracy before it is printed in the catalog or posted online on the College's website.

**I.C.2 The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the "Catalog Requirements".**

### Evidence of Meeting the Standard

A catalog is published each academic year on the College's website ([I.C.2-1](#)) and in hard copy form.

As described in Standard I.C.1, responsibility lies with faculty, staff and administrators to assure that information published in the catalog is precise, accurate, and current. Department/division chairs, unit managers, and program coordinators are responsible for checking the catalog for accuracy and currency, paying particular attention to areas under their purview.

The following information is published in the catalog (page references as provided in the 2017-2018 print catalog ([I.C.2-2](#))):

- General Information
  - Official Name, Address(es), Telephone Number(s), and Website Address of the Institution (Page 1)
  - Educational Mission (Page 6)
  - Representation of accredited status with the ACCJC and with programmatic accreditors, if any (Page 7)
  - Course, Program, and Degree Offerings (Pages 63 - 154)
  - Student Learning Outcomes for Programs and Degrees (Pages 63 - 95)
  - Academic Calendar and Program Length (Pages 2 - 3)
  - Academic Freedom Statement (Page 41)
  - Available Student Financial Aid (Pages 52 - 55)
  - Available Learning Resources (Pages 12 - 14)
  - Names and Degrees of Administrators and Faculty (Pages 158 - 165)
  - Names of Governing Board Members (Page 166)
- Requirements
  - Admissions (Pages 16 - 22)
  - Student Fees and Other Financial Obligations (Pages 24 - 27)
  - Degree, Certificates, Graduation and Transfer (Degrees and Certificates: Pages 56-57; Graduation: Page 34; and Transfer: Pages 38-39)

- Major Policies Affecting Students
  - Academic Regulations, including Academic Honesty (Pages 42 - 50)
  - Nondiscrimination (Page 42)
  - Acceptance of Transfer Credits (Page 20)
  - Transcripts (Page 35)
  - Grievance and Complaint Procedures (Page 42)
  - Sexual Harassment (Page 43)
  - Refund of Fees (Page 25)

### **Analysis and Evaluation**

The College catalog, containing information for prospective and current students, is published each year, online and in hard copy format. The information is reviewed and updated for accuracy and currency prior to publication.

### **LIST OF EVIDENCE**

- [I.C.2-1](#) The catalog on the website  
[I.C.2-2](#) The printed catalog

**I.C.3 The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public.**

### **Evidence of Meeting the Standard**

#### **Learning Outcomes Assessment**

As described in Standard I.B.8, the College shares extensive documentation of its assessment processes and results on the Assessment page of the College website ([I.C.3-1](#)). Resources available include explanations and detailed graphics of the College's approach to assessment, schedules, links to the College's digital and hardcopy report templates and system, the Assessment Handbook, assessment reports, and presentations and reports to the College.

#### **Student Achievement**

Hawai'i CC shares a variety of student achievement data, as described in Standard I.A.2. The College's Fact Book includes persistence and graduation rates and other institution-set standards results ([I.C.3-2](#)). Additional student success data are provided by the vice president for the University of Hawai'i Community Colleges (UHCC), whose biannual presentations to the *Kauhale* are available online on the College's Strategic Planning Resources webpage ([I.C.3-3](#)).

Annual Reports of Program Data (ARPD) provided by the UHCC System, along with data analysis contained in instructional program reviews are also available on the College website ([I.C.3-4](#)). The Career and Technical Education (CTE) programs further provide data on the College's Gainful Employment webpage ([I.C.3-5](#)) and on each program's page on the College's website ([I.C.3-6](#)).

In addition to highlighting student achievement through publications at the College's website, Hawai'i CC's evaluation of student achievement is reflected in its Program and Unit Review Process (PURP), strategic planning, and innovation efforts.

### **Analysis and Evaluation**

In order to communicate academic quality matters and achievement to the public, Hawai'i CC publishes documentation of learning outcomes assessment and results and student achievement data and evaluation on a variety of pages on the College's website.

#### **LIST OF EVIDENCE**

<a href="#">I.C.3-1</a>	Instructional Program Assessment Reports and Plans
<a href="#">I.C.3-2</a>	2017 Annual Fact Book.pdf

<a href="#">I.C.3-4</a>	Instructional Program Reviews
<a href="#">I.C.3-5</a>	Gainful Employment Website
<a href="#">I.C.3-6</a>	Program Page - Culinary

**I.C.4 The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.**

### **Evidence of Meeting the Standard**

A list of certificates and degrees that the College offers is included on pages 56 to 57 of the 2017-2018 catalog ([I.C.4-1](#)) and on the College's website ([I.C.4-2](#)).

Each program has a description of the purpose of the degrees or certificates it offers, the content and course requirements for each degree or certificate, and its program learning outcomes. Course descriptions and learning outcomes are available on the program webpages ([I.C.4-3](#)). The majority of the Career and Technical Education (CTE) programs also include a student schedule of courses to assist CTE students in their academic planning ([I.C.4-4](#)).

### **Analysis and Evaluation**

The College publishes the certificates and degrees it offers in terms of their purpose, content, course requirements, and expected learning outcomes in its catalog and on its website.

#### **LIST OF EVIDENCE**

<a href="#">I.C.4-1</a>	Curricula and Programs
<a href="#">I.C.4-2</a>	Program of Study
<a href="#">I.C.4-3</a>	AEC Technologies
<a href="#">I.C.4-4</a>	Student Schedule of Courses

**I.C.5 The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.**

### **Evidence of Meeting the Standard**

#### **Policy review**

As Hawai'i CC is part of a ten-campus University of Hawai'i (UH) System, the College operates under Board of Regents policies ([I.C.5-1](#)), Executive Policies ([I.C.5-2](#)), UHCC policies ([I.C.5-3](#)) and Hawai'i CC policies ([I.C.5-4](#)).

UH System Executive and Administrative policies (EP and AP policies) should be reviewed every three years in accordance with UH System Policy No. EP 2.201, Section III C ([I.C.5-5](#)).

The College is committed to regular review of its policies and procedures, with updates made when necessary, to assure alignment between the mission and programs and services. Since 2012, a number of College administrative, academic, and student affairs policies have been reviewed. Publications are reviewed for accuracy (see Standard I.C.1).

The Academic Senate, which represents the faculty governance arm of the College, includes a statement in Article VII of its Charter that Senate policies will be reviewed every five years or earlier as needed. The Senate Charter was recently revised in 2016 - 2017. Standing committees of the Academic Senate, which include the Educational Policy and Faculty Policy Committees, regularly review relevant policies ([I.C.5-6](#)).

#### **Procedure review**

In addition to policy review, institutional procedures are reviewed in the PURP, in which programs and units conduct assessment to determine effectiveness, adjust practices, and create action plans to implement improvements. The PURP process itself is evaluated annually by the College Effectiveness Review Committee (CERC), with feedback prompting changes for future reviews ([I.C.5-7](#)).

### **Analysis and Evaluation**

The College regularly reviews policies and procedures to ensure currency and effectiveness of programs and services in their support of the mission fulfillment. Publications are also reviewed regularly by faculty, staff, and administrators to ensure accuracy of information.

#### **LIST OF EVIDENCE**

<a href="#">I.C.5-1</a>	Policies and Procedures Information System
<a href="#">I.C.5-2</a>	Executive Policies
<a href="#">I.C.5-3</a>	UHCC OVPCC index
<a href="#">I.C.5-4</a>	Hawai'i Community College policies
<a href="#">I.C.5-5</a>	Policy EP 2.201
<a href="#">I.C.5-6</a>	Academic Senate Handbook
<a href="#">I.C.5-7</a>	CERC Operating Guidelines

**I.C.6 The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other institutional materials.**

### **Evidence of Meeting the Standard**

Hawai'i CC publishes the cost of tuition and fees on page 24 of the 2017-2018 catalog ([I.C.6-1](#)) and on the College website ([I.C.6-2](#)).

Textbook costs are available at the University of Hawai'i at Hilo Bookstore website ([I.C.6-3](#)).

The Gainful Employment statement on each CTE program page includes information about the cost of textbooks and supplies ([I.C.3-5](#)).

### **Analysis and Evaluation**

The cost of education, including tuition, fees, and textbook costs is readily available to current and prospective students.

### **LIST OF EVIDENCE**

<a href="#">I.C.6-1</a>	Catalog Tuition and Fees
<a href="#">I.C.6-2</a>	Tuition and Fees website
<a href="#">I.C.6-3</a>	University of Hawai'i at Hilo Bookstore website
<a href="#">I.C.3-5</a>	Gainful Employment website

**I.C.7 In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution's commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students.**

### **Evidence of Meeting the Standard**

The College uses and publishes its Statement of Rights and Responsibilities of the University Community, as defined in UH Administrative Rule, Title 20, Chapter 2, on the Academic Freedom webpage on the College website ([I.C.7-1](#)). The statement asserts that the "purpose of the university is to pursue the truth through teaching, learning, and research in an atmosphere of freedom of body and mind." This policy covers the entire UH community, including faculty, staff, and students.

The contract negotiated between the faculty union (UHPA) and the Board of Regents includes further language that protects academic freedom. Significant sections are included in the 2017-2018 College catalog on page 41 ([I.C.7-2](#)).

HAW 5.101 Student Academic Grievance Policy defines the right to academic freedom and protects freedom of expression for students and is posted on the College's website ([I.C.7-3](#)).

## Analysis and Evaluation

Hawai'i CC publishes statements on academic freedom for faculty, staff, and students. This academic freedom is accompanied by the responsibility to not interfere with freedom of others to teach and/or learn whether in person or online.

### LIST OF EVIDENCE

- [I.C.7-1](#) Academic Freedom
- [I.C.7-2](#) Academic Freedom in catalog
- [I.C.7-3](#) Student Academic Grievance Policy

**I.C.8 The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.**

### Evidence of Meeting the Standard

The College's policies and procedures concerning honesty, responsibility, and academic integrity are published in its Student Conduct Code, which is available in its entirety on the College website ([I.C.8-1](#)). Excerpts can also be found in the 2017-18 College catalog on pages 43-48 ([I.C.8-2](#)).

In addition, UH Policy EP 7.208, the Systemwide Student Conduct Code, defines the categories of impermissible behavior, such as academic dishonesty, sexual harassment, and disruptive behavior, and the consequences of similar behavior that obstructs the learning and teaching at any UH campus ([I.C.8-3](#)). This policy covers the University community, which includes faculty, staff, and students. Any University-sponsored activities, which may be off-campus or activities that affect the University, are covered in this policy.

The UH System policy on faculty professional ethics, which includes responsibility for academic honesty and integrity, is available to the public and can be accessed at the College's website ([I.C.8-4](#)).

Faculty teaching distance education (DE) courses are required to report how they are meeting the responsibility for student authentication in online courses ([I.C.8-5](#)).

To discourage plagiarism, for many years the College has purchased a subscription to Turnitin, an online plagiarism-checker. The training to use this tool emphasizes 1) the development of assignments that require authentic student writing, and 2) the importance of creating an academic environment that prizes honesty and integrity. There is extensive use of this tool by faculty who give written assignments.

## Analysis and Evaluation

Policies and procedures that promote academic honesty, responsibility, and integrity for students and faculty are referenced in the catalog, the faculty union agreement with the Board of Regents, and on the College's website. There are procedures and appropriate sanctions for student

misbehavior. The College has further committed to procedures and instructional tools to promote student verification and ethical scholarship.

#### LIST OF EVIDENCE

<a href="#">I.C.8-1</a>	Student Conduct Code
<a href="#">I.C.8-2</a>	Student Conduct Code in catalog
<a href="#">I.C.8-3</a>	Policy EP 7.208
<a href="#">I.C.8-4</a>	UHCCP #5.211
<a href="#">I.C.8-5</a>	Compliance Form

**I.C.9 Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.**

#### Evidence of Meeting the Standard

To encourage faculty to distinguish between personal conviction and professionally accepted views, the College publishes policies on academic freedom, ethics, and integrity. The policies on academic freedom and professional ethics are contained in the Statement of Rights and Responsibilities of the University Community, as defined in UH Administrative Rule, Title 20, Chapter 2 ([I.C.9-1](#)) (also posted on the Academic Freedom webpage on the College website ([I.C.7-1](#))) and in the UHCCP (policy) 5.211 Statement on Professional Ethics ([I.C.8-4](#)).

In Section B, UHCCP #5.211, faculty are charged to “hold before them the best scholarly and ethical standards of their discipline.” Further, Article IV.A of the faculty contract states that “Faculty Members are responsible for maintaining high professional standards of scholarship and instruction in their field of special competence. In giving instruction upon controversial matters, Faculty Members are expected to set forth justly and without suppression the differing opinions of other investigators, and in their conclusions provide factual or other scholarly sources for each such conclusions. Faculty members should be careful not to introduce into their teaching controversial matters that have no relation to their subject” ([I.C.9-2](#)). Article IV.A also states that “When speaking and acting as citizens, Faculty Members shall take suitable precaution to assure that personal utterances or actions are not construed as representing the University.”

Hawai‘i CC encourages all instructors to distinguish between personal conviction and professionally accepted views via policies that define the expectations of exemplary behavior of its faculty and lecturers. The department/division chairs review the syllabi that are distributed to students to ensure appropriateness. Evaluations of faculty members applying for contract renewal, tenure and/or promotion include peer observations and analysis of student course evaluations, through which potential concerns may arise. If there are any problems that occur in this process of review, the department/division chair has the responsibility to ensure fair and objective treatment of both faculty member and students. In the case of lecturers, lecturers are evaluated and are held to the same standards as full-time faculty.

Students can also lodge complaints with the department chair or administration, and/or file a formal grievance. The Student Grievance Policy is available at the College’s website ([I.C.7-3](#)).

### Analysis and Evaluation

The College has policies in place that encourage faculty to perform their duties in a professional manner, separating personal conviction from professional views.

#### LIST OF EVIDENCE

- [I.C.9-1](#) UH Administrative Rule, Title 20, Chapter 2
- [I.C.7-1](#) Academic Freedom
- [I.C.8-4](#) UHCCP #5.211
- [I.C.9-2](#) Article IV, Faculty Professional Responsibilities and Workload
- [I.C.7-3](#) Student Academic Grievance Policy

**I.C.10 Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or worldviews, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.**

#### Evidence of Meeting the Standard

The College does not follow codes that seek to instill specific beliefs or worldviews, but does follow general codes of conduct (see Standard I.C.8).

### Analysis and Evaluation

The College does not follow codes that seek to instill specific beliefs or worldviews.

**I.C.11 Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.**

The College does not operate in foreign locations.

**I.C.12 The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities.**

#### Evidence of Meeting the Standard

The College complies with ACCJC Eligibility Requirements; Accreditation Standards; Commission policies, guidelines, and requirements for public disclosure; institutional reporting; team visits; and prior approval of substantive changes, as evidenced by its March 1, 2013 six-year ACCJC Certificate of Accreditation ([I.C.12-1](#)).

Further evidence--covering the period from 2012 until the present academic year--is available in the self-study report, midterm reports, follow-up reports, action letters, and communication with

ACCJC on the Accreditation page of the College website ([I.C.12-2](#)). The College has been proactive in responding to each of the recommendations made by ACCJC.

Links to self-study, mid-term, follow-up reports, action letters, and communication with ACCJC prior to 2012 are on the College's archival webpage ([I.C.12-3](#)).

The College continues to comply through its current accreditation process. An example of the College's continued compliance is the most recent letter from ACCJC, which acknowledged the College's response to Standard III A.1.c ([I.C.12-4](#)).

### **Analysis and Evaluation**

Hawai'i CC has complied with all ACCJC requirements and recommendations in the past and continues to comply in the current accreditation cycle.

### **LIST OF EVIDENCE**

- [I.C.12-1](#) March 1, 2013 six-year ACCJC Certificate of Accreditation
- [I.C.12-2](#) Accreditation page of the College website
- [I.C.12-3](#) Accreditation Archival webpage
- [I.C.12-4](#) letter from ACCJC, which acknowledged Standard III A.1.c

**I.C.13 The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public.**

### **Evidence of Meeting the Standard**

The College demonstrates honesty and integrity in its relationships with external agencies by publishing all of its communication with external agencies, such as ACCJC, on its website ([I.C.12-2](#)).

The following Hawai'i CC programs and center have additional accreditation, certification, or approval through their respective agencies:

- Culinary Arts Program
- Nursing Program
- Hawai'i Community College Children's Center

Statements of their accreditation/approval status are published on the Accreditation webpage ([I.C.12-2](#)) as well as on program pages. ([I.C.13-1](#), [I.C.13-2](#) , [I.C.13-3](#))

Compliance with State and Federal regulations and statutes are required by the College and reflected in all of its publications.

### **Analysis and Evaluation**

The College provides evidence of compliance with ACCJC requirements on its website. In addition, different programs within the College, such as the Culinary Arts and Nursing Programs

and the Early Childhood Center provide evidence of complying with their respective accrediting agencies.

#### LIST OF EVIDENCE

[I.C.13-2](#) General information & requirement - PN  
[I.C.13-3](#) General information & requirement - Culinary

**I.C.14 The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.**

#### Evidence of Meeting the Standard

Hawai'i CC is an institution committed to providing its students with a high quality education. Focusing on student learning and achievement, the College does not generate financial return for its investors, contribute to a related or parent organization, or support external interests as it is a publicly funded state institution.

Evidence of the College's commitment to a high quality education is contained in its mission and vision statements and in the institutional learning outcomes ([I.C.14-1](#)), as well as in the College's 2015 - 2021 Strategic Plan ([I.C.14-2](#)).

#### Analysis and Evaluation

Hawai'i CC's highest priorities are commitments to providing its students with a high quality education and to student learning and achievement, as evidenced in the College's mission, visions, and strategic plans. The College does not generate financial return for investors, contribute to a related or parent organization, or support external interests.

#### LIST OF EVIDENCE

## **Standard II: Student Learning Programs and Support Services**

---

**II.A. Instructional Programs**

**II.B. Library and Learning Support Services**

**II.C. Student Support Services**

## **Standard II: Student Learning Programs and Support Services**

---

The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

### **II.A. INSTRUCTIONAL PROGRAMS**

---

**II.A.1 All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment or transfer to other higher education programs. (ER 9 and ER 11)**

#### **Evidence of Meeting the Standard**

All instructional programs at Hawai'i Community College ([II.A.1-1](#)) are offered in fields of study consistent with the institution's newly revised mission, which states that the College "will emphasize the knowledge and experience necessary for *Kauhale* members to pursue academic achievement and workforce readiness." As noted in Standard I.A.1, the mission's categories of "academic achievement" and "workforce readiness" correspond broadly to the types of degrees, credentials, and certificates offered by the College's academic programs and Career and Technical Education (CTE) programs. All credit courses and programs offered at all sites ([II.A.1-2](#)), including those offered at area high schools as part of the Early College Program, are appropriate to higher education, regardless of the delivery method.

To ensure that programs align with the mission and comply with generally accepted practices in degree granting institutions of higher learning, all programs are reviewed and approved at various levels ([II.A.1-3](#)):

- Departmental faculty
- Academic Senate Curriculum Review Committee (CRC)
- Academic Senate
- College Administration
- Board of Regents

The CRC approves each course and program, regardless of delivery or location, according to guidelines to help to determine whether a course may be considered college level, appropriate for the proposed course number, and applicable toward academic certificates and degrees.

As described in Standard I.B.2, all academic programs regularly assess student learning outcomes at the course level. Measures of student learning provided by assessment reports, as well as attainment of other achievement outcomes indicated by Annual Report of Program Data (ARPD), such as program health, the awarding of degrees and certificates, transfer to other higher education programs, and employability ([II.A.1-4](#)), are addressed in annual and comprehensive program reviews. Program review requirements are determined by various Hawai‘i CC ([II.A.1-5](#)), University of Hawai‘i Community Colleges (UHCC) ([II.A.1-6](#)), and University of Hawai‘i (UH) System ([II.A.1-7](#), [II.A.1-8](#)) policies. Faculty from all departments lead and complete these assessment and review processes with a commitment to furthering rich dialog about student learning, maintaining currency and rigor in all disciplines, and promoting a culture of continuous improvement at the College. Assessment at the College includes a commitment to “closing the loop” after data analysis, reassessment, and reanalysis ([II.A.1-9](#)) to ensure that students benefit. Comprehensive reviews demonstrate alignment to the mission and the institutional learning outcomes (ILOs), and programs must show how their action plan will help the College to achieve Strategic Directions initiatives ([II.A.1-10](#)) and to meet various performance-based measures ([II.A.1-11](#)). Comprehensive reviews are evaluated by the College Effectiveness Review Committee (CERC), with results and recommendations integrated into strategic planning and budgeting processes.

To ensure that programs offered at the College culminate in employment, the College uses Program Advisory Councils (PACs) ([II.A.1-12](#)) to assist CTE programs in defining industry standards applicable to their areas. Each PAC is comprised of industry professionals, program faculty, and community members; members are listed in the 2017-18 college catalog ([II.A.1-13](#)). The PACs communicate new trends in the industry and employment outlooks for both the state and Hawai‘i Island. Where the College delivers an island-wide program (e.g., nursing), the PAC also has island-wide membership. All advisory councils meet regularly (at a minimum once per academic year). Advisory council meeting minutes are submitted to the CTE dean’s office for record keeping ([II.A.1-14](#)).

Through the Office of EDvance (formerly the Office of Continuing Education and Training–OCET), the College offers an Intensive English Program that prepares students to take credit courses ([II.A.1-15](#)).

### **Analysis and Evaluation**

The College engages in systematic and cyclical program review and assessment in keeping with higher education standards. Student learning outcomes are developed for all courses and programs in alignment with the College’s institutional learning outcomes and mission, and College curricula support student achievement and the fulfillment of degrees, certificates, transfers, and employment. The College complies with System policies regarding curriculum development for all programs, showing parity across all modes of delivery and at the various College locations.

**II.A.2 Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.**

### **Evidence of Meeting the Standard**

#### **Curriculum**

The content and methods of instruction for each new course are vetted and approved by the CRC, the Academic Senate, and administration before the course is added to the online Kuali Student Curriculum Management (KSCM) ([II.A.2-1](#)), a Systemwide electronic course record management database (which replaced the former Curriculum Central database). In KSCM, each course outline demonstrates the alignment between course learning outcomes (CLOs) and program learning outcomes (PLOs), and each program outline demonstrates the alignment between PLOs and ILOs ([II.A.2-2](#)).

The University Council on Articulation policy requires that all previously articulated general education core courses be reviewed over a five-year period ([II.A.2-3](#)). To ensure currency, Hawai'i Community College reviews 20 percent of its approved courses each year ([II.A.2-4](#), [II.A.2-5](#)). This systematic course review evaluates relevance, appropriateness, and currency of program courses.

#### **Assessment**

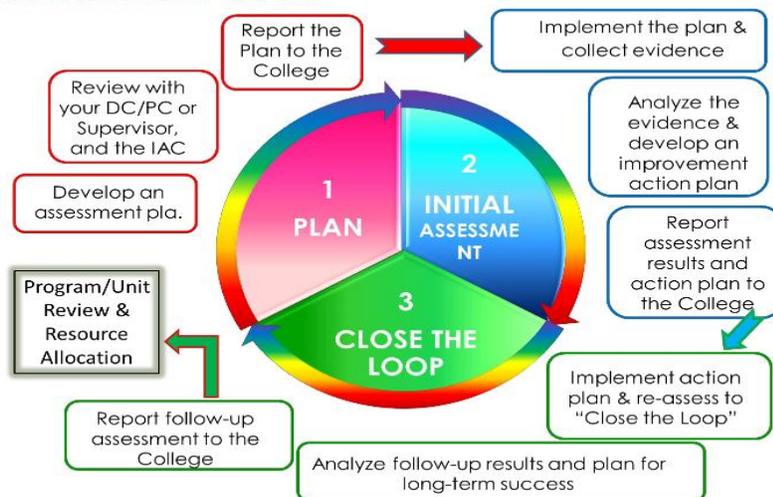

Assessment is a primary way in which the College continuously improves teaching and learning strategies and promotes student success. Hawai'i CC engages in scheduled systematic assessment of student learning outcomes for all courses (see Assessment Reports Archive), regardless of delivery mode, to ensure continuous improvement and student success ([II.A.2-6](#)). The College focuses on a learning outcomes approach and clearly defines the course assessment cycle for all faculty, as described on the Assessment webpage ([II.A.1-9](#)). The Assessment Handbook, which is updated annually, provides a detailed and current guide to assessment ([II.A.2-7](#)).

Across the College, assessment focuses on gathering evidence of student learning in alignment with course learning outcomes (CLOs) and program learning outcomes (PLOs), as reflected in

the report templates for planning ([II.A.2-8](#)), sharing results([II.A.2-9](#)), and closing the loop ([II.A.2-10](#)).

When assessing CLOs, faculty--including full time, part time, and adjunct faculty--document the assessment strategy, artifacts, analysis and action plans for student achievement, and alignment to the relevant PLO(s). Assessment results are discussed within departments to clarify areas for improvement and to adjust curriculum and instruction to increase student outcomes attainment. (See 2017-18 campus labs assessment worksheet ([II.A.2-11](#)) and 2016-17 and prior course assessment templates ([II.A.2-12](#))). Assessment artifacts have been identified by delivery method in some assessment projects so that faculty can evaluate whether learning outcomes are met regardless of means of delivery.

### THE ASSESSMENT CYCLE

In addition to course assessments, initiatives like the Liberal Arts (LBRT) PLO assessment show dedication to moving beyond departmental assessment and deepening dialog across the program. LBRT PLO assessment has yielded important learning outcome and instructional insights which are shared in meetings involving all LBRT faculty, including adjunct faculty. The most recent meeting was in November 2016, focusing on the May 2016 assessment of the Oral Communications and Quantitative Reasoning PLOs by the LBRT dean and department chairs ([II.A.2-13](#)). The process continues with each LBRT PLO targeted for assessment and collaborative discussion and goal-setting.

The Office of Continuing Education and Training incorporates its instructional assessments into its unit annual and comprehensive reviews ([II.A.2-14](#)) and in the annual reviews for the Apprenticeship Program ([II.A.2-15](#)) and Intensive English Program ([II.A.2-16](#)).

Assessment across the *Kauhale* is governed by the College's Assessment Policy, HAW 5.202 ([II.A.2-17](#)). Annual Summary Reports to the College Council by the Institutional Assessment Office present a comprehensive look at the year's activities and achievements and at future projects focused on continuous improvement in assessment ([II.A.2-18](#)).

### **Institutional Program and Unit Review**

Systematic evaluation of courses, programs, and directly related services also occurs via the College's Program and Unit Review Process (PURP). Described further in Standards I.B.4-5, PURP is two-part process with College wide involvement ([II.A.2-19](#)). The first part of the process is an annual review by all programs and units used for program and academic support unit planning ([II.A.2-20](#)); this process supports instructional improvement by ensuring that programs document outcomes assessment and improvements and any challenges that impact the quality of instruction or services ([II.A.2-21](#), [II.A.2-22](#)). Department/division chairs and deans review the annual program reviews, and the deans assist the vice chancellor for Academic Affairs in preparing any necessary updates of the Academic Master Plan Appendix. The UH System gathers and posts an Annual Report of Instructional Program Data, which assists faculty in evaluating program health and in preparing program reviews ([II.A.2-23](#)).

The second part of the PURP is a three-year comprehensive review that analyzes demand, effectiveness, and efficiency; identifies needed improvements; determines necessary actions; and requests needed resources based on demonstrated evidence. The process of writing and submitting comprehensive reviews follows a similar structure as the annual reviews, on a clearly defined schedule for all programs ([II.A.2-24](#)) and units ([II.A.2-25](#)). It includes long-term program and unit planning, and demonstrates the contributions of the academic program or service unit to the College's achievement of its mission, ILOs, and Strategic Directions plan ([II.A.2-26](#)). Department/division chairs, program coordinators, and service unit managers use a standard template ([II.A.2-27](#)) to write a review for their program or unit, prioritizing actions and budget items. Final reports are sent to the respective vice chancellor or director, who submits the report to the College Effectiveness Review Committee (CERC), a shared governance committee with extensive College wide representation ([II.A.2-28](#)). Each comprehensive review is reviewed and evaluated by the CERC based on a published rubric ([II.A.2-29](#)), and each program or unit receives an individualized report from the CERC with feedback and recommendations that are addressed in subsequent program and unit annual reviews.

### **Instructional Improvement**

In addition to the course review, assessment, and program review processes, Hawai'i CC assures currency, improves teaching and learning strategies, and promotes student success through the following avenues:

Faculty evaluation (HAW 9.203 ([II.A.2-30](#))), lecturer evaluation (HAW 9.104 ([II.A.2-31](#))), and the tenure and promotion review ([II.A.2-32](#)) processes aim to support high-quality instructional delivery, design, and self-assessment. Per Hawai'i CC policy, lecturers and probationary and non-probationary instructional faculty are required to use eCAFE, the official tool for course and faculty evaluations at UH, to evaluate and document their teaching effectiveness ([II.A.2-33](#)). Hawai'i CC's eCAFE survey consists of a standard set of questions ([II.A.2-34](#)) focused on instructional design and delivery, and it allows instructors to add customized questions. Lecturers send the results to their respective department or division chair. Probationary and non-

probationary faculty can submit student evaluations as part of their contract renewal/tenure and promotion documents.

An active Faculty/Staff Development Committee organizes and promotes professional development workshops for instructors on both sides of the island (Hilo and Pālanuui) focused on teaching and learning strategies and current practices in higher education instruction. Additionally, faculty have access to state and national conferences, including the annual UHCC Hawai'i Student Success Institute, which provides an opportunity for sharing best teaching practices ([II.A.2-35](#)).

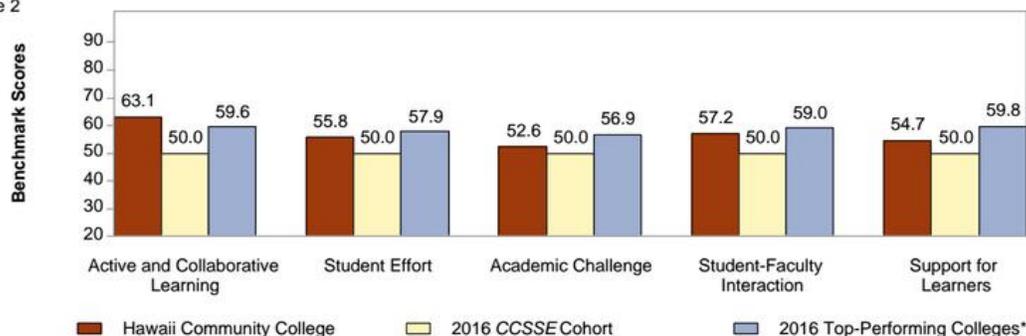

As part of its participation in the UHCC System's developmental education redesign implementation in 2015, the College was especially supportive of English and math faculty attending state and national conferences focused on co-requisite models of developmental education. To build on these experiences and to move forward with instructional improvement, the English department (including faculty and lecturers) designed a program of monthly professional development meetings to share methodologies and data. In March 2017, English, math, and science faculty participated in a statewide institute to address developmental education redesign and student pathways reform.

For distance education classes, instructors employ teaching methodologies that engage students in interactive learning that meets accepted professional standards. The Instructional Technology Support Office (ITSO) is dedicated to supporting faculty with the design, development, and implementation of quality online courses at Hawai'i CC ([II.A.2-36](#)). ITSO also offers services that help promote effective course planning and appropriate use of instructional strategies. ITSO staff research and stay current in instructional strategies and tools to improve the effectiveness of online classes. Updated information and trainings are shared routinely with faculty to promote effective and current teaching practices.

As described in Standard II.A.1, Career and Technical Education (CTE) programs receive guidance on currency and relevance of their content and instruction from Program Advisory Councils (PACs) (HAW 3.302 ([II.A.2-37](#))), composed of industry-based experts from the community. PACs advise faculty, division chairs, and the vice chancellor for Academic Affairs on curricula, new trends in the industry, and employment outlooks for both the state and Hawai'i Island.

The Center for Community College Student Engagement (CCCSE) survey (most recently deployed in 2016) provides the College with insight into students' views of their engagement in courses, active and collaborative learning strategies, and support of their learning by faculty and staff ([II.A.2-38](#)). These results are shared across the college.

Figure 2

\*Top-Performing colleges are those that scored in the top 10 percent of the cohort by benchmark.

Notes: Benchmark scores are standardized to have a mean of 50 and a standard deviation of 25 across all respondents. For further information about how benchmarks are computed, please visit [www.ccsse.org](http://www.ccsse.org).

## Analysis and Evaluation

Hawai'i CC has a clear, systematic process for curriculum development that ensures that content and instruction meet accepted academic and professional standards. Furthermore, in keeping with the College's defined course and program review schedule, faculty--including full time, part time, and adjunct faculty--routinely participate in assessment projects to review course content and methods of instruction. These ongoing, College wide efforts aim to identify and target improvements in instructional courses, programs, and directly related services. All instructional courses, including distance learning and courses offered by the Office of Continuing Education and Training, undergo review and systematic evaluation.

<a href="#">II.A.2-38</a>	The Center for Community College Student Engagement (CCCSE) survey

**II.A.3. The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that specifies learning outcomes identical with those in the institution's officially approved course outline.**

### **Evidence of Meeting the Standard**

Hawai'i CC has identified learning outcomes for all courses and programs. As described in Standard II.A.2, the College assesses all courses, programs, and units using established institutional procedures. HAW 5.202 Assessment establishes responsibility for the various campus constituencies and the 2017-18 Assessment Handbook provides clear information concerning the process, cycle, schedule, and reporting of results for all courses, programs, and units ([II.A.3-1](#)).

Per HAW 5.251 Course Outline of Record ([II.A.3-2](#)), student/course learning outcomes are required on all Course Outlines of Record (CORs). The officially approved course outlines for all College courses are accessible in the KSCM database ([II.A.3-3](#)) where the templates for submission require a statement of CLOs and PLOs.

Per HAW 5.250 Course Review Policy and Procedures ([II.A.2-4](#)), courses must be reviewed on a regular basis with the oversight of the Curriculum Review Committee (CRC). The College has procedures to review 20 percent of all of its approved courses each year. As part of the review, faculty who teach the course review the approved course outline that was sent to the University Council on Articulation when the course was originally articulated (if available), as well as the current course syllabus found in the division central curriculum files and faculty/lecturer course syllabi.

The vice chancellor for Academic Affairs and division/department chairs promote the College wide practice that requires that all faculty and lecturers submit course syllabi to division offices each semester to be housed in an organized electronic repository. The division/department chairs review the syllabi of their faculty and lecturers to ensure that current course learning outcomes are included. It is customary that students in every class section receive a course syllabus with current course learning outcomes included. (See syllabus guidelines for in-person classes ([II.A.3-4](#)) and online classes ([II.A.3-5](#).) The same is true for online classes, as emphasized in the course design guidelines and template promoted by the Instructional Technology Support Office ([II.A.3-6](#)).

### Analysis and Evaluation

The College engages in regular assessment of learning outcomes for all courses, programs, certificates, and degrees through its scheduled course assessments and cyclical program and course reviews. The process of approving course outlines and course learning outcomes is well-defined and managed by representatives from across the *Kauhale*. Reviewed course syllabi specifying current learning outcomes are gathered each semester in repositories for each division/department, and are distributed routinely to students.

**II.A.4 If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.**

### Evidence of Meeting the Standard

The College offers pre-collegiate level curriculum addressing basic skills (mathematics, writing, reading) and some vocational skills. The pre-collegiate basic skills courses are distinguished from college level English and mathematics courses by course number; courses numbered less than 100 are considered to be at the pre-collegiate level. Per Executive Policy E5.209 ([II.A.4-1](#)), UHCCP #5.300 ([II.A.4-2](#)), and HAW 5.252 ([II.A.4-3](#)), credit for courses numbered 1-99 are not transferable to the baccalaureate level.

An additional characteristic that distinguishes pre-college from college level courses is the latter's definition through minimum entry level competencies in basic skills. Commonly, courses numbered at or above the 100-level have basic skills prerequisites, which ensure entry competencies, including pre-college course completion, placement test scores, and other placement criteria. It should be noted as well that pre-collegiate developmental courses are not offered via distance education at the College.

Courses numbered below 100 undergo course proposal review, systematic assessment, and alignment to program learning outcomes and the College's ILOs by departments and the CRC as part of the regular course proposal and course outline of record review, program review, and course assessment cycles. These courses are included in the annual and comprehensive program reviews ([II.A.4-4](#)) and the all-College course assessment schedule ([II.A.4-5](#)). Data regarding remedial math ([II.A.4-6](#)), writing ([II.A.4-7](#)), and reading ([II.A.4-8](#)) are analyzed in the UHCC Systemwide Instructional Annual Report of Program Data (ARPD).

The College is a participant in the UHCC Systemwide reform of developmental education ([II.A.4-9](#)), and has embraced the Accelerated Learning Program model for math and English. Math and English faculty have served as developmental education representatives on various committees as well as on Systemwide developmental education committees to redesign the course progressions in math's STEM ([II.A.4-10](#)) and non-STEM ([II.A.4-11](#)) sequences, and in reading ([II.A.4-12](#)) and writing ([II.A.4-13](#)), including changes to curricula, instruction, and assessments. Hawai'i CC reading faculty members have been active participants in Reading Summits, a collaboration with UHCC faculty to align courses, learning outcomes, rubrics, and assessment strategies.

As part of the reform effort, Hawai'i CC has supported faculty and lecturers to attend in-house, statewide, and national professional development opportunities. Beginning in 2016-17, the College has funded reassigned time and lecturer stipends for the English faculty teaching pre-collegiate courses to support more intensive and extensive wrap-around services, gather and analyze more targeted assessment data, attend monthly professional development meetings, and share best practices ideas. Systemwide dialog and planning is encouraged by sending faculty from all disciplines and departments to the annual Systemwide student success conference sponsored by the UHCC Student Success Council ([II.A.4-14](#)). The latest conference included an extra day of inter-campus work on the developmental education redesign (Windward Community College on March 4, 2017).

In addition, the College maintains high-quality instruction through the actions of various faculty committees. College faculty have also participated in a collaborative project of the Hawai'i Department of Education, the P-20 Initiative ([II.A.4-15](#)), and the UH System to develop a transitional 12th grade math and an English course ([II.A.4-16](#)) to address the needs of pre-collegiate students.

The College supports developmental students' progress and success in college level courses through academic tutoring and other assistance at The Learning Center ([II.A.4-17](#)), Hale Kea Advancement and Testing Center ([II.A.4-18](#)), and Pāalamanui's Library and Learning Center ([II.A.4-19](#)). Students enrolled in pre-collegiate basic skills courses have access to writing, reading, math, and ESL labs that provide tutorial assistance and learning resources. The College funds peer tutors to staff the labs and offers reassigned time for writing, reading, and math lab coordinator positions. Beginning in spring 2017, peer tutors have been available for embedded in-class tutoring, and an ESL peer mentor program was implemented. The College also funds access to 24-hour online Brainfuse tutoring for all students, and faculty have participated in the nationwide EdReady initiative. Data regarding tutoring services generally and those used by developmental students specifically are provided in the UHCC Academic Support Annual Report of Program Data, showing in 2016 all of the Program Quantitative Indicators as "Healthy." ([II.A.4-20](#))

In addition, the College created a Student Success Coordinator position (described in Standard II.B.1) and a partnership program between faculty and Student Services counselors, both of which aim to bolster the direct support students receive. In the Hānai a Kumu program, a counselor is matched with a faculty member to strengthen the coordination of services (further described in Standard II.C.5).

### **Analysis and Evaluation**

The College demonstrates a commitment to supporting students in its pre-collegiate courses through a variety of academic and counseling services. Pre-collegiate courses are clearly distinguished from college level course through course numbering, clear course learning outcomes, and prerequisites. The quality of the College’s pre-collegiate instruction and course design is ensured through regular course review, program review, and course assessment.

**II.A.5 The institution’s degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or the equivalent at the baccalaureate level. (ER 12)**

### **Evidence of Meeting the Standard**

The College adheres to UHCCP #5.228 Credit Hour ([II.A.5-1](#)), which provides a consistent measure of the quality of a student’s academic experience by defining a credit hour and identifying the process and evidence by which the UHCC System ensures reliability and

accuracy of the assignment of credit hours to activities earning academic credit. UHCCP #5.203 Program Credentials: Degrees and Certificates establishes the minimum number of credit hours for each of the College's certificates and degrees([II.A.5-2](#)). Related University Policies and Regulations include the following:

- U.S. Department of Education, Federal Register October 29, 2010, Final Regulations on Program Integrity Issues (75FR 66832) ([II.A.5-3](#))
- Board of Regents Policy, RP 5.201 Instructional Programs ([II.A.5-4](#))
- UH Systemwide Executive Policy, EP 5.202 Review of Established Programs ([II.A.5-5](#))
- UHCC Policy UHCCP 5.202 Review of Established Programs, Attachment 1-B ([II.A.1-6](#))
- UH Systemwide Executive Policy, EP 5.228 Credit Hours ([II.A.5-7](#))

The College's curriculum review, program review, and outcomes-based assessment processes all contribute to ensuring that instruction is of appropriate length, breadth, depth, and rigor (see Standards II.A.1-3). With the oversight and guidance of the Curriculum Review Committee (CRC) ([II.A.5-8](#)), new courses undergo faculty-driven curriculum review, and existing courses are systematically reviewed every five years with 20 percent undergoing review annually ([II.A.5-9](#)). Issues related to correct sequencing, time to completion, and synthesis of learning are part of the decision-making process in the review of new and existing courses. These issues are also addressed in program reviews, which discuss attainment of course and program learning outcomes; both annual and comprehensive reviews require linking action items to PLO attainment.

All new courses undergo the same proposal and review process whether they are taught face-to-face, online, or through video-conferencing. Departments decide the mode of delivery of courses, and all distance education courses are evaluated using the same faculty-driven process as face-to-face courses. The Instructional Technology Support Office (ITSO) has a rubric that it uses internally and shares with faculty ([II.A.5-10](#)) and the Distance Education Committee has been developing a tool to ensure a quality peer review of DE courses College wide ([II.A.5-11](#)).

In addition, the UHCC System has oversight of annual program reviews to ensure that the community colleges are aligned in terms of rigor, sequencing, and time to completion. Executive summaries can be viewed online ([II.A.5-12](#)). New program proposals are submitted to the CRC for recommendation and the VCAA seeks approval from other VCAs in the System; the process culminates with approval from the UH Board of Regents.

A number of College programs are accredited through outside agencies to ensure appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning ([II.A.5-13](#)). Culinary Arts at Pālanui and Hilo have separate accreditation through the American Culinary Federation Foundation Accrediting Commission (ACFFAC), and the associate in science degree program, leading to registered nursing, is accredited by the Accreditation Commission for Education in Nursing (ACEN), formerly known as the National League for Nursing Accrediting Commission, Inc. (NLNAC), and approved by the Hawai'i State Board of Nursing. In addition, the 20-hour Certificate of Competence in Substance Abuse Counseling ensures synthesis of learning and sequencing by preparing students to satisfy the addiction studies educational requirements for the Hawai'i State Department of Health, Alcohol and Drug Abuse Division's

(ADAD) Certified Substance Abuse Counselor (CSAC), and/or Certified Drug Prevention Specialist (CDPS) positions ([II.A.5-14](#)).

For CTE programs, valuable oversight on the scope and quality of curricula and programs is also provided by Program Advisory Councils. These groups advise their respective programs of training needs and new developments in the field. Councils include employers, alumni, and others knowledgeable about the field ([II.A.5-15](#)).

Hawai'i CC Strategic Directions 2015-2021, Hawai'i Graduation Initiative (HGI) Action Strategy 2 focuses on implementing structural improvements that promote persistence, strengthen pathways, and address gaps in student achievement, with the goal of reducing students' time to completion while upholding rigorous standards ([II.A.5-16](#)). This is in keeping with the December 2015 adoption of UHCCP #5.213 Time to Degree: Co-Requisite that outlines the Systemwide guidelines to provide the necessary curricular structure to help students succeed in college level courses through co-requisites, thereby shortening the time to successful completion of academic credentials ([II.A.5-17](#)).

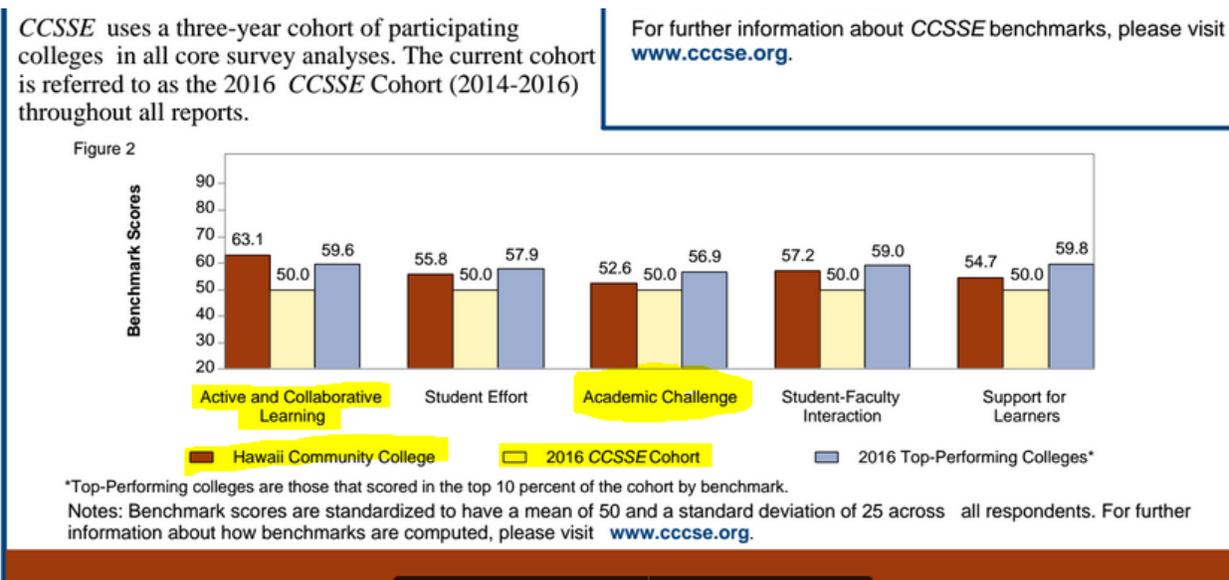

The general education philosophy of the College reflects the *Kauhale*'s effort to broaden and deepen students' learning and to adhere to common practices in American higher education ([II.A.5-18](#)). There are ten General Education Learning Outcomes (GELOs) ([II.A.5-19](#)) and within each, a set of benchmarks based on a survey of the literature for standards used by professional organizations and associations to describe competence in specific fields. Such organizations include, but are not limited to, the Association of American Colleges and Universities, the National Council of Teachers of Mathematics, and the Association for College and Research Libraries. The General Education Committee (GEC) ensures a rigorous process for GE course designation ([II.A.5-20](#)).

In February 2017, the Academic Senate voted to move to the University of Hawai'i at Mānoa's Foundations model for general education ([II.A.5-21](#)), with the transition from the College's current general education structure to take place over the next two years. The intention is to provide better alignment across the UH System so students encounter clearer academic pathways and the College upholds the rigor and breadth of the general education requirement in concert with other System campuses. This model includes two types of course designations: 1) Foundations courses are intended to give students skills and perspectives that are fundamental to undertaking higher education; 2) Diversification courses are intended to assure that every student has a broad exposure to different domains of academic knowledge, while at the same time allowing flexibility for students with different goals and interests.

Hawai'i CC establishes rigor across the disciplines through courses which earn designations as Writing Intensive ([II.A.5-22](#)), Hawai'i Asian Pacific, and Sustainability. Faculty apply to have their courses earn these designations, which are awarded through associated Select Committees of the Academic Senate, comprised of faculty across the disciplines. Faculty also collaborate to create learning communities that allow for an integrated, interdisciplinary approach. Learning communities are designed to introduce students to various academic subjects, to support students in synthesizing connections between those subjects, to encourage students to apply knowledge gained in the classroom to their daily lives, and to support students' involvement in learning ([II.A.5-23](#)).

The Prior Learning Assessment initiative supports students in seeking college credit for previous learning (II.A.5-24). Comprehensive transcript evaluations provide opportunities for students to reduce time to degree by earning credit towards their degree through prior learning assessments.

The College's strategies to ensure rigor, depth, and breadth of instruction are reflected in the favorable results of the 2016 CCSSE data (II.A.5-25) which show increases in all categories focused on rigor in courses. The College ranked above the small college average (Figure #).

## Analysis and Evaluation

Clear policies, as well as established processes for course and program approval, assessment, and review, ensure that all Hawai'i CC associate degrees contain the minimum 60 credit hours, and that courses and programs align with UH and national standards in terms of length, breadth, depth, rigor, course sequencing, and synthesis of learning.

In addition, the College is an active participant in Systemwide strategic initiatives focused on improving time to completion, retention, and persistence of students.

**II.A.6 The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. (ER 9)**

**Evidence of the standard:**

The College's Strategic Directions 2015-2021, Hawai'i Graduation Initiative (HGI) Action Strategy 2 ([II.A.5-16](#)), UHCCP #5.213 Time to Degree: Co-Requisite ([II.A.5-17](#)), and UHCCP #5.203 Program Credentials: Degrees and Certificates ([II.A.6-1](#)) place emphasis upon students completing program requirements in appropriate time frames. The UH System's "15 to Finish" initiative encourages students to take 15 credits each semester to complete associate degree programs in two years ([II.A.6-2](#)).

In order to improve course scheduling procedures, the UH System's STAR Guided Pathways System (GPS) registration system was fully implemented by the College in fall 2016 to give faculty and administrators new tools to predict student demand and improve course sequencing and alignment ([II.A.6-3](#)). The system is intended to help faculty, staff, and students see the logical sequence of course requirements and to recognize variables that affect students' pathways into optimal series of courses. Inputting program requirements into the STAR system creates transparency about how program requirements coordinate, and testing mock registration before live registration provides the institution an opportunity to see where program requirements are misaligned.

Reports from STAR also allow the College to predict the number of students who will need specific requirements, which informs course scheduling for subsequent semesters. Hawai'i CC uses data reports, waitlist reports, enrollment figures, and STAR dashboard reports to identify

course fill rates to improve accuracy of course scheduling. Division chairs, deans, and the VCAA collaborate to ensure that courses needed across disciplines are identified and scheduled at appropriate times for students to complete program requirements.

The College makes efforts to ensure that courses are sequenced so that students can build their skills to complete their programs in a timely manner, regardless of location or delivery. Course sequencing receives attention from the Curriculum Review Committee (CRC) as it examines course and program modifications, and course sequencing and scheduling are discussed regularly in division chair meetings. If under-enrolled courses are vital to students' paths to timely completion, the VCAA can authorize keeping sections open.

In February 2017, the College worked with Ad Astra consultants on an audit of course offerings, room scheduling, and other variables that impact maximizing enrollment. The results of the Ad Astra Strategic Check-up provided a sense of assurance that our scheduling process was effective, while identifying areas where the College could focus on improvement ([II.A.6-4](#)).

Across the System, efforts to align programs across campuses also help address the issue of timely degree completion. The College's CTE programs align to each other through their Program Coordinating Councils ([II.A.6-5](#)), and the Liberal Arts programs have begun alignment meetings as requested by the UHCC vice president.

To improve the student experience, STAR GPS enables students to view courses needed for graduation in their chosen major, as well as completed grades, transfer credits, academic holds, and other information. Students are presented with their required courses placed in recommended sequence, which minimizes confusion about which courses are applicable toward degree requirements and in which order they should be taken ([II.A.6-6](#)). Additional Liberal Arts pathways--such as the Art, Psychology, and pre-Business concentrations--have been created to keep students on track with transfer requirements to ensure that upon completion of their associate degree, students' courses are aligned with major degree requirements at the four-year UH institution. This system supports students, their faculty advisors, and Student Services counselors by more clearly identifying individual students' pathways, earned credits, and remaining unfulfilled degree requirements.

In addition to STAR GPS, students receive course selection guidance via CTE program semester schedules published in the catalog ([II.A.6-7](#)), and advising sheets with program requirements for all programs available on the College website ([II.A.6-8](#)).

### **Analysis and Evaluation**

The College's recent adoption of the STAR Guided Pathways System for registration and review of student course records has greatly facilitated efforts to promote students' timely completion of certificate and degree programs. Scheduling processes, as well as academic advising, have improved as a result of access to STAR data. By participating in Systemwide initiatives and adhering to the College's strategic plan and graduation initiative, faculty and staff are advancing students' ability to complete their certificates and degrees in appropriate time frames consistent with higher education standards.

**II.A.7 The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.**

### Evidence of Meeting the Standard

Hawai‘i CC demonstrates its commitment to all segments of the Hawai‘i Island community by providing instruction and learning support, including multiple delivery modes and varied teaching methodologies, that support equity and success for all students.

Hawai‘i CC instructors use a variety of teaching methodologies and assessment strategies to meet different students’ needs and learning styles. Teaching methods include, but are not limited to, class participation, lecture, demonstrations, discussion, research, and labs. All students also have access to the online learning management system called *Laulima* (“cooperation, working together” in Hawaiian), which many instructors use to post instructional materials, host discussion forums, and collaborate with students. Faculty members exercise considerable freedom when determining teaching methods and delivery modes suitable to the curriculum, to students’ needs, and to Hawai‘i CC’s mission. This is evident, for example, when Hawaiian Studies students showcase what they have learned in various classes during each fall semester’s *Hō‘ike* ([II.A.7-1](#)) (*hō‘ike* means to show or exhibit). Learners invite their families to the *hō‘ike* as a way to share what they have learned from diverse teaching methodologies.

The College offers internship and practicum classes that promote experiential learning, as well as the opportunity for students to engage in service learning projects in the community and on campus that include, but are not limited to, reforestation and trail maintenance projects with a history instructor in Kona ([II.A.7-2](#)), environmental projects in Hilo with community partners ([II.A.7-3](#)), model home construction to benefit local low-income families ([II.A.7-4](#)), and other projects within the social sciences. Other demonstrations of the range of teaching methodologies used across disciplines to promote student learning include the Culinary Classic, student showcases of the OneThemeOneCollege learning community, ([II.A.7-5](#), [II.A.7-6](#)) and learning communities of linked classes in different disciplines (e.g., Hawaiian studies and English).

The College’s assessment process and annual and comprehensive program reviews also advance discussions about instructional and assessment methods being employed across the *Kauhale*. These cyclical, ongoing improvement efforts enable departments to discuss teaching and learning, and to target the diverse and changing needs of students (see Standards II.A.1-3). Likewise, efforts such as the reform of developmental education (see Standard II.A.4) promote

student success by increasing faculty knowledge of innovative teaching methodologies and instruction.

Course delivery modes include in-person, video-conferencing, hybrid, and fully online classes. Decisions regarding the delivery mode of courses are made at the departmental level and consider program/student needs and instructor availability. The Instructional Technology Support Office (ITSO) is dedicated to supporting best practices in distance education (see Standard II.A.2). ITSO uses its annual unit reviews to demonstrate how the unit uses assessment data from students and faculty to drive improvements in *Laulima* trainings and online instruction trainings for faculty ([II.A.7-7](#)). Distance education courses and their methodologies are included in the regular course assessment and program review schedule. Achievement data specific to distance education courses are reported in the LBRTs Instructional Annual Report on Program Data (ARPD) ([II.A.7-8](#)). Success data in this area have been encouraging as the quantitative indicators have risen.

For all courses, the eCAFE course evaluation tool ([II.A.7-9](#)) is used to ask students to rate their instructors on the use of instructional methods and to provide feedback on delivery modes ([II.A.2-34](#)). From this student feedback, instructors are able to identify areas for improvement to better serve the needs of students. Lecturers share eCAFE results with their division/department chairs, and it is customary for faculty to analyze and reflect on their eCAFE results in their contract renewal and tenure and promotion dossiers.

As described in the College's Strategic Directions 2015-2021, Hawai'i Graduation Initiative (HGI) Action Strategy 2 (pg 3-4) ([II.A.5-16](#)), Hawai'i CC works to enhance the success of special populations such as Native Hawaiians, Filipinos, veterans, adult learners, and part-time students. Students enrolled in pre-collegiate courses also benefit from additional support provided by instructors as part of the developmental education redesign (see Standard II.A.4).

The Hā'awi Kōkua (Disability Services) Program promotes equal opportunities for students with disabilities with a wide range of services available from interpreters to classroom notetakers ([II.A.7-10](#)). Trainings on Universal Design are offered to instructors, and the Instructional Technology Support Office (ITSO) emphasizes adherence to accessibility guidelines to ensure success for students with disabilities ([II.A.3-5](#)).

Hawai'iPapa O KeAo, which means "Hawai'i Foundations of Enlightenment/Knowledge," is the name of the initiative designed to make the ten campuses of the University of Hawai'i model indigenous-serving institutions ([II.A.7-11](#)). The College's Hālaulani Transfer Success Center was established in 2013 to encourage and support Hawai'i CC students to graduate and/or transfer to one of the four-year UH campuses or to any other four-year institution to achieve a bachelor of arts or science degree ([II.A.7-12](#)). The center was established with support from an Alaska Native/Native Hawaiian Serving Institutions Title III Grant with the purpose of increasing success for Alaska Native and Native Hawaiian students. While the grant cycle has ended, these services are still available through Counseling, Advising and Student Support Services.

The College's ESL program supports speakers of other languages by offering classes in reading, writing, and grammar, as well as providing an ESL lab and ESL peer mentors ([II.A.7-13](#)). Other programs invite faculty, staff, and students to share a commitment to diversity such as the annual

International Education Week that promotes interactive cultural celebrations and exchanges ([II.A.7-14](#)).

For adult learners, the College participates in the statewide Prior Learning Assessment initiative, allowing students to earn college credit for what they already know by demonstrating learning outcomes through faculty approved assessments or other methods ([II.A.7-15](#)). These assessments can include exams, standardized tests, portfolios, and evaluation of industry or military training.

The College creates a supportive learning environment for its diverse student population through a variety of other initiatives. The College has two representatives on the University of Hawai‘i Systemwide Commission on LGBTQ+ Equality ([II.A.7-16](#)) and pursues the Safe Zone Program’s objective to train participants to utilize their gained knowledge and skills to foster a safe and inclusive community for LGBTQ+ students, faculty, and staff. These trainings affect instructors’ approaches to fostering equitable learning opportunities inside and outside of the classroom ([II.A.7-17](#)).

Hawai‘i CC also encourages student access and success by offering express admissions and enrollment days, orientations, campus tours, academic advising, as well as special outreach events such as informational tables to support access to benefits for veterans at the Pālanui campus and, in collaboration with the Hilo Veterans Center, a Veterans Resource, Education and Job Fair ([II.A.7-18](#)) at the Manono campus. In addition, Hawai‘i CC offers an annual Career, Job, and Internship Fair ([II.A.7-19](#)) for students and alumni and also collaborates with county, state, and private agencies to offer an annual Career Readiness Fair and a Career, Job and Resource Fair for the community.

Further descriptions of the College’s online and campus-based learning support services are given in Standard II.B.1.

### **Analysis and Evaluation**

Hawai‘i CC uses a variety of instructional modes and methods, learning support services, and strategies and initiatives to support equity and success for all students. In addition to faculty use of direct feedback from students on teaching methods and delivery modes via the eCAFE course evaluations, the regular assessment of courses and review of programs promote continuous efforts to attend to the diverse and changing needs of students.

**II.A.8 The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.**

### Evidence of Meeting the Standard

A limited number of programs and departments use department-wide examinations. Both the Registered and Practical Nursing programs administer the Assessment Technologies Institute (ATI) standardized exams in most of their courses, usually in the 14th week of the semester. ATI models the exam after the nursing boards exam (NCLEX). These standardized exams reduce bias and enhance reliability. Faculty are also able to compare their results with other nursing programs, as ATI has benchmark scores.

Neither nursing program uses non-standardized department-wide exams.

For the Prior Learning Assessment Program, the College follows UHCCP #5.302 ([II.A.8-1](#)) and relies on valid National Equivalency Exams including:

1. Advanced Placement Examination Program (AP) – Series of exams developed by the College Board for high school students to earn college credit while in high school.
2. College Level Examination Program (CLEP) – Series of standardized subject exams developed by the College Board to assess college level learning for college credit.
3. Defense Activity for Non-Traditional Education Support (DANTES) Subject Standardized Tests – Standardized subject exams developed to assess college level knowledge for college credit originally limited to members of the armed forces but now available to civilians.
4. Excelsior College Examination (UExcel) Program – Standardized exams formerly named Regents College Exams or American College Testing (ACT) Proficiency Examination Program (PEP).

One example of how standardized exams are assessed for validity and reliability is in the case of CLEP. CLEP exams are assessed and reviewed by the American Council of Education (ACE) to

ensure the CLEP procedures, controls, policies, and exam contents all meet the ACE's standards ([II.A.8-2](#)).

### Analysis and Evaluation

The limited number of programs that use department-wide exams rely on standardized tests that are carefully vetted for their validity and reliability.

### LIST OF EVIDENCE

<a href="#">II.A.8-1</a>	UHCCP #5.302
<a href="#">II.A.8-2</a>	American Council of Education

**I.A.9 The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to- credit-hour conversions. (ER 10)**

### Evidence of Meeting the Standard

Hawai'i CC awards credits, degrees, and certificates based on student attainment of learning outcomes. Students receive grades, which reflect their mastery of course learning outcomes that are aligned to program learning outcomes. Passing grades earn course credit applicable towards stated program requirements. Program requirements for course credits, degrees, and certificates are aligned with federal and UHCC guidelines.

The College awards credits in alignment with the Federal Regulation 34 CFR parts 600-603:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out of class student work each week for approximately 15 weeks for one semester or trimester hour of credit, or ten to twelve weeks for one quarter hour of credit, or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.
3. Additionally, UHCCP #5.228 Credit Hour ([II.A.5-1](#)) indicates that academic credit is awarded using the following formulas for one semester unit of credit, based on a 15-week semester: (1) one hour of lecture per week; (2) two hours of lecture/lab per week; or (3) three hours of lab per week (see College catalog pg 23 ([II.A.9-1](#))). Vocational education classes require one hour per week of lecture plus three hours per week work experience. Distance education classes are subject to the same credit hour policies as face-to-face classes.

The graduation requirements for associate degrees are stated in UHCCP #5.203, and include completion of at least 60 credits for associate degrees ([II.A.6-1](#)). Hawai'i CC requirements for associate degrees are found in the college catalog ([II.A.9-2](#)). To qualify for degree conferral, students must attain a minimum 2.0 cumulative GPA and complete all stated program requirements. Executive Policy E5.209 University of Hawai'i Student Transfer and Campus

Interarticulation and Regents Policy RP 5.214 Student and Credit Transfer within the University ([II.A.9-3](#)) ensure the smooth transfer of credits across the System through a maximum degree of coordination and cooperation among campus instructional units.

Credits earned for prior learning are determined by UHCCP #5.302 Prior Learning Assessment Program ([II.A.7-15](#)) explained in the College's catalog (2016 pg 31-32 ([II.A.9-4](#))) and require careful review of evidence of student learning outcomes demonstrated through Advanced Placement exams, College Level Placement exams (CLEP), Credit By Institutional Exams (CBIE), previous non-English study, education received in the military, and portfolio based assessments.

Faculty members engage in rigorous processes when creating, reviewing, and evaluating courses and developing learning outcomes. The College's curriculum review process ensures appropriate achievement levels for credits earned, while its assessment process identifies the effectiveness of students' attainment of learning outcomes. The College engages in a five-year review cycle for all courses to ensure currency and accuracy (see Standards II.A.1-3).

#### Analysis and Evaluation:

The awarding of course credit, degrees, and certificates is based on student attainment of learning outcomes that are in line with federal and UHCC policies. The systematic and cyclical review of all courses and their learning outcomes ensures student achievement in keeping with the norms of higher education.

#### **LIST OF EVIDENCE**

<a href="#">II.A.9-3</a>	RP 5.214 Student and Credit Transfer within the University
<a href="#">II.A.7-15</a>	UHCCP #5.302 Prior Learning Assessment Program
<a href="#">II.A.9-4</a>	College catalog pg 31-32

**II.A.10 The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission. (ER 10)**

#### **Evidence of Meeting the Standard**

The College publishes a full list of memorandum of agreement (MOA) and program articulation agreements that allow its students to receive credit at other institutions within the UH System ([II.A.10-1](#)). Specific programs articulations exist for Culinary Arts, between Hawai'i CC, Kap'iolani CC, Kaua'i CC, Leeward CC, and UH Maui College (Feb 2012) ([II.A.10-2](#)), and for Nursing (BSN), between UH Hilo, Hawai'i CC, Kapi'olani CC, Kaua'i CC, and UH Maui

College (Oct. 2010) ([II.A.10-3](#)). In support of the Academy of Creative Media at UH West O‘ahu, there is a Systemwide MOA ([II.A.10-4](#)) and a recommended Academic Pathway ([II.A.10-5](#)) for Hawai‘i CC students.

Executive Policy E5.209 University of Hawai‘i Student Transfer and Campus Interarticulation ([II.A.4-1](#)) and Regents Policy RP 5.214 Student and Credit Transfer within the University ([II.A.9-3](#)) explain procedures for transfer of students and credits across the System. (Regents Policies, Executive Policies and Administrative Procedures shall be reviewed every three years -- See Executive Policy 2.201-III.C ([II.A.10-6](#))) HAW 7.208 Transfer Credit Evaluation Policy ([II.A.10-7](#)) and HAW 7.209 Transferring Credits from External Institutions ([II.A.10-8](#)) define the processes for transfer of credits to Hawai‘i CC from other UH institutions and non-UH institutions. A May 2010 MOA ([II.A.10-9](#)) describes the transfer of general education core courses across the UH System.

When students who are pursuing a bachelor's degree earn university credits for coursework also required for an associate in arts degree, reverse transfer of credit is available ([II.A.10-10](#)). Per UHCCP #5.206 Reverse Transfer, academic credits for coursework completed at a four-year university can be transferred back to the College to satisfy associate degree completion ([II.A.10-11](#)).

As described in the College catalog page 9, the Degree Pathways Partnership with UH Hilo facilitates the completion of baccalaureate degrees at UH Hilo by students who begin their post-secondary education at Hawai‘i CC ([II.A.10-12](#)). Likewise, the College has a memorandum of understanding with UH Hilo’s College of Business and Economics and a transfer agreement allowing Hawai‘i CC graduates who transfer into UH Hilo with an associate in science degree in Natural Science (AS-NSCI) to receive automatic admission as juniors.

Other specific transfer pathways have been formalized for specific programs whose students need classes offered by other institutions. Examples include the College’s Administration of Justice MOU ([II.A.10-13](#)), Early Childhood Education’s articulation agreements with Chaminade University in Honolulu ([II.A.10-14](#)), and the bachelor of arts in Social Sciences degree with a concentration in Early Childhood Education at UH West O‘ahu ([II.A.10-15](#)).

The transparent sharing of course outlines of record with clearly indicated student learning outcomes through the Systemwide Kuali Student Curriculum Management (KSCM) database and UH System Course Transfer Database ([II.A.10-16](#)) assists College faculty and staff with the process of evaluating whether potential transfer courses align with and are comparable to its own courses. For non-UH System transferred courses, if the student has passed a course for which department has approved course content equivalency, the learning outcomes have been met.

Students are informed of policies and processes regarding transferring from within the UH System ([II.A.10-17](#)) and from outside UH System ([II.A.10-18](#)) in the College catalog (on pages 20 and 39) as well as on the College website. The Systemwide Course Transfer Database website contains a searchable database of course equivalencies/evaluations for UH campuses, as well as other colleges and universities ([II.A.10-16](#)). The evaluation of courses on this site is a guide, and transferability of any given course is not guaranteed until an official transfer credit evaluation is completed.

An additional guide is provided by STAR's "What if Journey," a tool which allows students to explore how their existing coursework would articulate into different degrees or certificates if they were to transfer to other UH campuses. If students decide to change campus and degrees officially, they then pursue a transcript evaluation.

### **Analysis and Evaluation**

Across the UH and UHCC System, numerous multi-campus agreements and program articulation policies facilitate the mobility of students from one campus to another without penalty. Hawai'i CC students are informed of transfer procedures and articulation agreements between institutions via the College catalog and website, as well as through advising.

**II.A.11 The institution includes, in all of its programs, student learning outcomes appropriate to the program level in: communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.**

### **Evidence of Meeting the Standard**

The College's General Education Learning Outcomes (GELOs) embody the hallmarks of communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, and the ability to engage diverse perspectives.

### **General Education Learning Outcomes**

- Communication - Speak and write to communicate information and ideas in professional, academic and personal settings.
- Critical Reading - Read critically to synthesize information to gain understanding.
- Critical Thinking - Make informed decisions through analyzing and evaluating information.
- Information Competency - Retrieve, evaluate, and utilize information.
- Technological Competency - Employ computer technology to perform academic and professional tasks.
- Quantitative Reasoning - Apply mathematical concepts, methods, and problem-solving strategies to analyze, synthesize, and evaluate real-world problems in quantitative terms.
- Areas of Knowledge - Utilize methods, perspectives, and content of selected disciplines in the natural sciences, social sciences, and humanities.
- Self and Community - Engage in activities demonstrating understanding of one's relationship with one's communities and environment.
- Cultural Diversity - Articulate and demonstrate an awareness and sensitivity to cultural diversity.
- Ethics - Behave in an informed and principled manner.

Course learning outcomes (CLOs) and program learning outcomes (PLOs) align with the College's GELOs to reflect these competencies, in addition to any other program-specific learning outcomes.

CLOs in specific courses have been aligned to GELOs; these courses have been designated by the General Education Committee (GEC) as meeting general education requirements ([II.A.11-1](#)). In addition, as appropriate, PLOs have been aligned to, or are in the process of being aligned to, the GELOs ([II.A.11-2](#)). These aligned outcomes are evaluated through course assessments that are summarized in annual program reviews (see Standards II.A.1-3). Through program review, the alignment between the CLOs and the PLOs is evident. In the KSCM database, which houses the most recently approved course outlines, each course outline includes a statement of CLO to PLO alignments. The College's annual assessment process (see Standards II.A.1-3) validates the attainment of CLOs which align to PLOs and ultimately to GELOs. Importantly, the process drives program improvement by fostering discussion among faculty about student learning outcomes data and ways to improve instruction and assessment to support student learning.

## Analysis and Evaluation

All of the College's programs include General Education Learning Outcomes (GELOs) that address communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, and the ability to engage diverse perspectives, among other program-specific learning outcomes. CLOs and PLOs are aligned to GELOs, and course level assessments ensure that student learning outcomes achievement fulfills general education requirements.

## LIST OF EVIDENCE

- II.A.11-1      GE Designated Courses  
 II.A.11-2      PLOs and GLOs

**II.A.12 The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences. (ER 12)**

## Evidence of Meeting the Standard

All degree programs incorporate general education (GE) based on the UHCC System Policy UHCCP #5.200 General Education in All Degree Programs, which mirrors the competencies listed in this Standard ([II.A.12-1](#)). The College's general education philosophy is clearly outlined in its catalog ([II.A.12-2](#)) and on its website ([II.A.5-18](#)). This philosophy is the premise for the formation of the General Education Learning Outcomes (GELOs), which also provide clear guidelines for attainment of student success.

Each of the ten GELOs includes a set of benchmarks that were developed by the Academic Senate's ad hoc General Education Committee (GEC) based on a survey of the literature for standards used by professional organizations and associations to describe competence in specific fields ([II.A.5-19](#)). The GELOs guide the process of proposing courses for GE designation ([II.A.12-3](#)) as well as GEC's process of review. The GELOs are further aligned to the College's ILOs.

## Associate in Arts (AA) degree

The GE course designation process for the associate in arts (AA) degree is clearly defined ([II.A.5-20](#)) and involves regularly scheduled course review by the GEC ([II.A.12-4](#)), comprised of representative faculty from various disciplines and departments. The committee is tasked with

determining whether courses are consistent with levels of quality and rigor appropriate to higher education. (See rubric requesting examples of “rigorous assignments/activities.”([II.A.12-5](#)))

The GE course designation form ([II.A.12-6](#)) and rubric ([II.A.12-5](#)) require evidence of how specific assignments or activities support all of the benchmarks in the designated primary GELO, how the course meets one of benchmarks for the critical thinking GELO, and how, if applicable, a course meets one of the benchmarks for an optional secondary designation. All proposed GE courses, regardless of the mode of delivery, undergo this review; distance education courses are eligible for GE designation in order to meet the demands of the College’s diverse student population in various locations across the island.

A current list of GE designated courses (including both 100- and 200-level courses) is published and maintained on the College website ([II.A.5-18](#)). The GE designated courses for the area requirements (Humanities, Natural Science, and Social Sciences) are published in the College catalog’s AA degree listing (see catalog pages 58-59 and 81). A May 2010 memorandum of agreement describes the transfer of GE core courses across the UH System and the process to verify the course’s current articulation status between Hawai‘i CC and each campus in the University of Hawai‘i System.

### **Associate in Science (AS) degree**

General education requirements for the AS degree include prescribed communications, mathematics, and thinking/reasoning courses, as well as 9 credits total of general education electives in three areas: Cultural, Natural, and Social Environments. Designated courses (listed in the catalog pages 61-62) are approved via memo by relevant department chairs based on the criteria in the present GE benchmarks. In addition, courses receiving GE designation by the GEC also qualify as Environment electives.

In January 2017, the Academic Senate voted to adopt the University of Hawai‘i at Mānoa’s General Education Foundations and Diversification requirements ([II.A.12-7](#)) for the AA degrees ([II.A.12-8](#)), with AS degrees adoption following in January 2018 ([II.A.12-9](#)). The College’s General Education Committee approved a designation process to comply with the new requirements. This change emphasizes the College’s commitment to higher education quality and rigor, as the Foundations and Diversifications requirements are based on UH System criteria originated by UH Mānoa, and ensures quality general education that aligns seamlessly with other institutions within the UH and UHCC System that have adopted Foundations and Diversification requirements.

### **Associate in Applied Science (AAS) degree**

In spring 2017, the Academic Senate approved a process for the AAS programs to align their PLOs to the GELOs ([II.A.12-10](#)). As stated in the College catalog page 60, components of general education (GE) included within the AAS degree must be consistent with levels of quality and rigor appropriate to higher education. In addition to required communications and mathematics or thinking/reasoning courses, the AAS requires 9 credits total of general education electives in three areas: Cultural, Natural, and Social Environments. Designated courses (listed in the catalog pages 60-61) are approved via memo by relevant department chairs based on the criteria in the present GE benchmarks. In addition, courses receiving GE designation by the General Education Committee also qualify as AAS Environment Electives ([II.A.12-11](#)).

The student learning outcomes of all GE courses, including all in-person and distance education courses, are reviewed as part of the College's regular course assessment process and program review. CLOs are aligned to PLOs in these assessments and reviews, which ensures that programs facilitate continuous student success in fulfilling the GELOs.

### **Analysis and Evaluation**

Through College wide dialog over the past six years, faculty have implemented a carefully considered general education philosophy, developed GE outcomes, and created and instituted a process that determines the appropriateness of each course in the GE curriculum. A GE component exists in all degree programs.

### **LIST OF EVIDENCE**

II.A.12-11	Academic Senate Recommendation

**II.A.13 All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and includes mastery, at the appropriate degree level, of key theories and practices within the field of study.**

### **Evidence of Meeting the Standard**

The College offers focused study in all degree programs ([II.A.13-1](#)), giving students an opportunity to work through at least one area of inquiry or an established interdisciplinary core. Per UHCCP #5.203 Program Credentials Degrees and Certificates ([II.A.13-2](#)) and as described in the College catalog ([II.A.9-2](#)), students focus their studies when pursuing a certificate of

competence, certificate of achievement, an associate in applied science degree, an associate in science degree, an academic subject certificate, or an associate in arts degree.

Through the course approval process, course assessment cycle, and program review (see Standards II.A.1-3), the College ensures that student learning outcomes, competencies, and levels of mastery of key theories and practices within each field of study are appropriate to each level of achievement.

### **Analysis and Evaluation**

In all degree programs, students encounter focused study in at least one area of inquiry or in an established interdisciplinary core. Student learning outcomes are central both to determining specialized courses and to promoting mastery of key, fundamental aspects of each field of study at each degree level.

### **LIST OF EVIDENCE**

- II.A.13-1 Program of Study
- II.A.13-2 UHCCP 5.203 Program Credentials: Degrees and Certificates
- II.A.9-2 Curricula and Programs

**II.A.14 Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.**

### **Evidence of Meeting the Standard**

Graduates from Hawai‘i CC’s Career and Technical Education (CTE) programs demonstrate competencies that meet employment standards and represent preparation for licensure or certification.

For the CTE programs, one of the most effective formal means of maintaining currency with employment standards is provided by the Program Advisory Councils (PACs) (described in Standard II.A.1), which advise their respective programs of training needs and new developments in the field ([II.A.9-2](#)). The PACs are appointed by the chancellor to advise the faculty, division chair, and vice chancellor for Academic Affairs on curricula, new trends in the industry, and employment outlooks for both the state and Hawai‘i Island.

An example of a certificate program reflecting industry standards and preparation for employment is the Architectural, Engineering, and CAD Technologies program ([II.A.14-1](#)). This program prepares students for employment with architectural firms, contractors, engineers, surveyors, or government agencies. Job responsibilities range from making accurate working drawings of buildings to assisting a surveying crew ([II.A.14-2](#)).

Likewise, the Business Technology program (BTEC) prepares students for employment in positions such as administrative assistants, receptionists, clerks, or secretaries ([II.A.14-3](#)). Students learn critical office skills, along with communication, organizational proficiencies,

accounting, and business math to enhance employment and promotion possibilities. BTEC has a long-standing cooperative education partnership with Hawai‘i County, which offers 12-15 paid cooperative education student office positions every year ([II.A.14-4](#)). The students receive credit, work experience, income, and encouragement to seek permanent positions with the county.

As another example, the College’s Office of EDvance has also offered a Process Technology and General Maintenance Certificate Program (PTGM) stemming from a partnership with local industry and commercial entities to provide the required training and hands-on experience they are seeking for entry level positions for their building maintenance and process technology departments ([II.A.14-5](#)). A local geothermal company has provided a tuition reimbursement for students who successfully complete the program.

In addition, CTE students have the opportunity to participate in valuable internships. Examples include fieldwork internships offered to students in the Tropical Forest Ecosystem and Agroforestry Management (TEAM) program ([II.A.14-6](#)) and the eight-week Akamai Internship Program, established in 2003, which provides real-world experience that can help students see the practical applications for their classroom learning ([II.A.14-7](#)). The Akamai Workforce Initiative is devoted to building Hawai‘i’s scientific and technical workforce, a goal that Hawai‘i CC shares. Akamai interns have a strong track record of persisting in STEM programs and finding jobs in STEM fields after graduating. The College’s career and job development counselor also assists students by talking to employers and posting and advertising internships.

As discussed in Standard II.A.5, a number of College programs are accredited through outside agencies to ensure appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning. The Culinary Arts programs at Pālanui and Hilo have separate accreditation through the American Culinary Federation Foundation, Inc. Accrediting Commission (ACFFAC) (catalog pages 7 and 70). The AS degree in Nursing program, leading to a career in registered nursing, is accredited by the Accreditation Commission for Education in Nursing (ACEN)([II.A.14-8](#)), formerly known as the National League for Nursing Accrediting Commission, Inc. (NLNAC) and approved by the Hawai‘i State Board of Nursing ([II.A.14-9](#)).

In addition, the 20-hour Certificate of Competence in Substance Abuse Counseling ensures synthesis of learning and sequencing by preparing students to satisfy the addiction studies educational requirements for the Hawai‘i State Department of Health Alcohol and Drug Abuse Division’s (ADAD) Certified Substance Abuse Counselor (CSAC) and/or Certified Drug Prevention Specialist (CDPS) positions ([II.A.5-15](#)).

As described in Standards II.A.1-3, all CTE courses, certificates, and degrees undergo systematic curriculum review, annual and comprehensive program review, and course assessment. Furthermore, using faculty’s knowledge of graduate job placement, CTE programs analyze and provide context for the System-provided ARPD employment opportunities data. This ensures the quality of the College’s CTE experience for students and the alignment of student learning outcomes to technical and professional workforce development competencies.

### **Analysis and Evaluation**

The CTE faculty and administration of the College collaborate closely with industry leaders and employers in the community to ensure that graduates earning certificates and degrees demonstrate workplace competencies and preparation for licensure and certification in their

various fields. The College systematically reviews its CTE certificate and degree programs with the input of community- and industry-based advisory councils to promote standards that align with the changing needs of employers and industries seeking trained personnel in Hawai‘i.

II.A.14-9	The Nursing Program
II.A.5-14	Substance Abuse Counseling

**II.A.15 When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.**

### Evidence of Meeting the Standard

- Throughout the UH System, there is a commitment to transparency about program changes and program elimination. The College adheres to Regents Policy RP 5.201 Instructional Programs ([II.A.5-4](#)), regarding Termination of Programs: “Commitments to students already officially enrolled in such programs [those deemed out-of-date and due to be eliminated] shall be met and limited for up to two years for associate degrees at community college programs and four years for baccalaureate degrees. No new program admissions shall take place.” The College’s Student Services counselors and faculty advisors work closely with students in such programs to support them in completing their courses of study in a timely manner. Any students in a program due to be temporarily stopped out or eliminated are contacted and assisted to try to enable them to complete the program within the standard program timeline.

In its statements about graduation and program requirements, the College also addresses unique circumstances in which students might encounter eliminated programs or significant changes to a program. In its annual catalog, the College makes it clear that students’ graduation requirements can be affected depending on the selected catalog year (HAW 5.702 Graduation Requirements ([II.A.15-1](#)); catalog pg 33 ([II.A.15-2](#))) and that credits earned more than ten years before graduation in courses which have materially changed in content or standards may not be applied toward the certificate or associate degree. However, such credits can be reviewed for acceptability by the vice chancellor for Academic Affairs and the appropriate division chair (HAW 5.650 Time Limits on Credits Earned ([II.A.15-3](#)); catalog pg 34 ([II.A.15-4](#))).

A new and positive development in the area of clarifying students' academic pathways is the systemwide use of STAR GPS for registration and academic advising ([II.A.15-5](#)). With the new STAR technology, there are more opportunities for students and their advisors to consider previous program requirements in alignment with revised, current requirements and to recognize and plan for any possible disruptions on the pathway to graduation. For example, STAR easily enables students to compare different catalog year requirements and program changes using the "What If Journey" tool. This tool is a powerful way for students, counselors, and faculty to see where students can make strategic choices to facilitate their fulfillment of program requirements.

### **Analysis and Evaluation**

Through its policies and advising practices, the College attempts to provide appropriate alternatives for students whose programs are eliminated or changed significantly. Use of STAR technology advances these efforts by empowering students and advisors to explore multiple graduation pathways.

### **LIST OF EVIDENCE**

II.A.5-4	RP 5.201 Instructional Programs
II.A.15-1	HAW 5.702
II.A.15-2	Graduation Requirement
II.A.15-3	Time Limit on Credits Earned
II.A.15-4	Graduation Information
II.A.15-5	STAR Guided Pathways to Graduation

**II.A.16 The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of type of credit awarded, delivery mode, or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievements for students.**

### **Evidence of Meeting the Standard**

All Hawai'i CC courses, in all delivery modes and locations, undergo evaluation aimed at upholding the learning outcomes to support student achievement. The College abides by UHCCP #5.203 (III E)([II.A.13-2](#)), which states the standards for all degrees and certificates awarded in the UHCC system: the policy aims "to assure that high-quality instruction and appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning characterize all program credentials."

Collegiate and pre-collegiate credit courses undergo systematic course review, and assessments are included in annual and comprehensive program reviews (see Standard II.A.2) ([II.A.16-1](#)). These reviews examine student learning outcomes at the course level and drive instructional and program improvements.

Students completing career technical education and occupational certificates “must demonstrate technical and professional competencies that meet employment and other applicable standards and are prepared for external licensure and certification” ([II.A.16-2](#)). The Program Advisory Councils (PACs) ([II.A.16-3](#)) assist the College faculty in maintaining the currency of its Career and Technical Education (CTE) programs (see Standard II.A.14). Likewise, the Nursing and Culinary programs maintain current, high-quality practices in keeping with their accrediting bodies and standardized exams (see Standard II.A.5).

All classes/courses delivered via distance delivery mode are included in the Course Review Policy and Procedure ([II.A.16-4](#)) and in all other institutional assessment and review processes (see Standard II.A.2). In addition, Hawai‘i CC’s Instructional Technology Support Office (ITSO) provides support to faculty teaching distance education classes, including a detailed rubric ([II.A.16-5](#)) for evaluating the design and build of online classes. The Distance Education Committee of the Academic Senate is designing a new draft tool for use in peer evaluation of online courses ([II.A.5-11](#)).

Hawai‘i CC’s non-credit pre-collegiate continuing and community education courses are delivered through its Office of EDvance. EDvance completes annual ([II.A.2-14](#)) and comprehensive unit reviews ([II.A.16-6](#)), and engages in assessment activities to evaluate unit outcomes. These reviews include EDvance’s Intensive English Program ([II.A.16-7](#)), Apprenticeship Program ([II.A.2-15](#)), and non-credit and workforce development courses program ([II.A.2-14](#)).

EDvance also improves quality and currency of its programs through its membership in the world’s largest association in continuing education and lifelong learning, Learning Resources Network (LERN) ([II.A.16-8](#)). Staff attend training (including certifications) and receive updates in the field through LERN in order to stay abreast of national and international trends. EDvance follows prescribed best practices and strives to achieve relevant benchmarks set by LERN.

### **Analysis and Evaluation**

All Hawai‘i CC instructional programs undergo scheduled, systematic review and assessment in keeping with the College’s commitment to continuous improvement. Student learning outcomes and student achievement guide evaluation and improvement of each program and course. Additional efforts to maintain currency and relevance of programs include professional development opportunities and local industry collaborations.

#### CHANGES AND PLANS ARISING OUT OF THE SELF-EVALUATION PROCESS

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Review and revise the Program/Unit Review Process	II.A.2, II.A.16	(Related to QFE Project #1)		
College-wide guidelines and general expectations for course syllabi were created	II.A.3	Vice Chancellor for Academic Affairs, Deans, Division and Department Chairs	Completed and posted on the website fall 2017	Increased consistency in course syllabi content across departments
Review of Liberal Arts course sequencing and prerequisites	II.A.5	Liberal Arts Dean and Department Chairs	Started fall 2017; ongoing	Improve sequencing and effectiveness of learning in 100-level courses before moving to upper level courses  Ensure that prerequisites for 200-level courses are appropriate and consistent
Gather, analyze and provide data to the College on a regular basis. (post in Fact Book)	II.A.7	Institutional Researcher	Planned for fall 2018 (after new Institutional Researcher hired)	Improved use of data to determine effectiveness of different modes, methodologies, and support services with specific student groups

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
General Education Learning Outcomes (GELO) aligned with Program Learning Outcomes (PLO) and Institutional Learning Outcomes (ILO)	II.A.11	Instructional faculty, Department/Division Chairs, Liberal Arts Dean, Vice Chancellor for Academic Affairs	Completed spring 2018:  GELO to PLO alignments approved by Vice Chancellor for Academic Affairs  GELO to ILO alignments approved by Academic Senate	Clear and documented alignment of College outcomes
Transition to UH Mānoa's Foundations and Diversifications General Education (GE) requirements for AA and AS degrees	II.A.12		Transition for AA degree will be completed in fall 2018 (approved by Academic Senate spring 2017)  Transition for AS degrees will be completed in fall 2019 (approved by Academic Senate spring 2018)	Improve GE alignment to UH System

## II.B. LIBRARY AND LEARNING SUPPORT SERVICES

---

**II.B.1** The institution supports student learning and achievement by providing library and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services. (ER 17)

### Evidence of Meeting the Standard

Hawai'i CC provides a variety of library and learning support services for both distance education (DE) and on-campus student needs. A descriptive summary of each library and learning support service is listed below.

#### Mookini Library

The Mookini Library, at the University of Hawai'i at Hilo, is a shared service with Hawai'i Community College ([II.B.1-1](#)). Though UH Hilo maintains the Mookini Library, Hawai'i CC students are able to access most of the materials and services provided by the library. Hawai'i CC students have a separate login page to connect them with extensive online research databases available to Hawai'i CC students.

The library provides substantial academic resources to UH Hilo and Hawai'i CC students, faculty, and students. Collections include online/electronic books, periodicals and databases, and over 228,000 book volumes ([II.B.1-2](#)). The library also offers study rooms, media production, computers, scanners, and paid access printers.

The College ensures that students, faculty, and staff users are provided clear instruction regarding the use of library materials. Instructions are found on the library website and are also part of Library Skills curriculum available to faculty teaching DE classes. Faculty and staff users are also provided library training upon request. For short questions, students, faculty, and staff may ask the Information Desk for help, and for longer, more in-depth research questions, there is the Book-a-Librarian service ([II.B.1-3](#)) to make appointments.

While DE students have access to in-person resources and can call the library or submit questions using the Ask-a-Librarian service ([II.B.1-4](#)) as needed, a DE librarian is also available specifically for DE needs (see *DE-Specific Tutoring and Learning Support* below) ([II.B.1-5](#)). The library is open 77.5 hours per week during the academic year (fall 2017).

#### English Program / Courses Support

The library provides support to a majority of the College's English courses through the library instruction program ([II.B.1-6](#)). This collaboration between the library and instructors increases student engagement by tailoring sessions to coursework and assignments. Sessions can include the following: a tour of the library, introduction to finding books and articles, introduction to Hawaiian resources, introduction to databases and source evaluation, and assistance with topic

development and search strategies for class research projects. The primary focus is on helping students to develop the information literacy skills and knowledge base needed to find and effectively utilize the sources and resources required for college research.

### *OneThemeOneCollege (OTOC)*

Another example of Mookini Library support is the OTOC program ([II.B.1-7](#)). OTOC is a campus-wide collaboration between the library and participating instructors designed to support and promote student engagement and learning. In 2014, in collaboration with instructors, the designated Hawai'i CC librarian at Mookini Library designed a research guide for students with information on sources for the topic *wai* (water). The librarian also initiated the purchase of books addressing various water topics to add to the collection, and promoted the additions in a book display, reinforcing the OTOC theme.

### **The Learning Center**

The Learning Center (TLC) is located on the UH Hilo campus, on the first floor of Mookini Library ([II.B.1-8](#)). TLC is an academic support program of Hawai'i CC, serving primarily Hawai'i CC students, along with UH Hilo students. Staffing for TLC includes a full-time site coordinator, office assistant, educational specialist, and part-time student staff. In addition, faculty from the English and math departments are assigned as area coordinators for reading (until spring 2016), writing, math, and ESL to provide a direct connection between instruction and specific area training and tutoring.

TLC provides a variety of academic support:

- Math, reading, writing, ESL, and content tutoring services, walk-in and by appointment
- In-class tutoring for specific courses per faculty request ([II.B.1-9](#))
- Tutors for the Hale Kea Advancement and Testing Center and the STEM Center on the Manono campus
- Instructional materials, including study skills and reference materials
- Multimedia classroom
- Access to a computer lab
- Make-up testing
- English and math practice for students seeking to prepare for upcoming courses and/or to improve placement test scores. TLC uses EdReady Math and NROC English online programs.
- Facilitation of the "Brainfuse" online tutoring program to support DE instruction, after hours services, and students who do not have access to the campus tutoring centers.

### **Hale Kea Advancement and Testing Center**

The Hale Kea Advancement and Testing Center (HKATC) is located on the Manono campus ([II.B.1-10](#)). The Center provides academic resources that include a computer lab for student use, tutoring, placement testing, DE testing, make-up testing, special testing services for students with disabilities, printer access, and an electronic classroom. Additionally, HKATC staff can assist computer lab users in navigating technology or understanding assignments. Staffing includes a full-time site manager, educational specialist, and part-time student staff.

### **STEM Center (Science, Technology, Engineering and Math Center)**

The STEM Center is located on the Manono campus ([II.B.1-11](#)). The Center provides a student lab with whiteboards, desks and study areas, peer tutoring in science and math, computer access, technology-equipped classrooms for science and math courses, and science and math faculty offices. Additionally, the Center is utilized by the Office of Continuing Education and Training (OCET) for weekend and evening courses and trainings.

### **Pāalamanui Library and Learning Center (LLC)**

The Pāalamanui LLC provides learning resources and services to the students, faculty, and staff at the Pāalamanui campus ([II.B.1-12](#)). Resources include computer workstations, printing, scanners, copiers, and 2,500 books and DVDs. Through partnership and collaboration with UH Hilo, students, faculty, and staff at Pāalamanui also have access to online and electronic resources and services provided through the Mookini Library.

The Pāalamanui LLC also offers placement testing, test proctoring, library instruction, and tutoring for students. Test proctoring is available for on-site and distance courses, though services are limited to UH System students due to limited staffing resources. Library instruction is offered via in-class presentations and by individual appointment as needed. Online library instruction is also available through the College's online learning management system (*Laulima*). General help is provided regarding navigating the various online systems used by the College, including MyUH, UH email, STAR, *Laulima*, etc. In-person tutoring is offered for math and English. For distance tutoring, and tutoring for other subject areas, students are referred to the online Brainfuse or Online Learning Academy (OLA) learning services.

### **DE-Specific Tutoring and Learning Support**

The College's commitment to serving DE students equitably is defined in HAW 5.200 regarding services for DE students ([II.B.1-13](#)). The College provides several online services for tutoring and individual support that are available for both DE and non-DE students ([II.B.1-14](#)).

- Brainfuse, contracted by the College, is an online tutoring system with live tutoring sessions ([II.B.1-15](#)). For the subjects of math, reading, and writing, live tutoring is accessible 24 hours per day and 7 days per week. Brainfuse offers tutoring in other subjects during specific, listed hours.
- Online Learning Academy (OLA) Tutoring is a free service provided by UH Mānoa that is available and utilized by Hawai'i CC students ([II.B.1-16](#)). OLA provides tutoring in the following subjects: basic math, pre-algebra, algebra, geometry, trigonometry, calculus, biology, chemistry, physics, environmental science, writing, and language arts.
- EdReady is an online academic support tool contracted by the University of Hawai'i Community Colleges (UHCC) System, designed to help prepare students to raise their math placement scores ([II.B.1-17](#)). It offers an individualized study plan for each student and is accessible 24 hours per day and 7 days per week.
- NROC English is an online academic support tool contracted by the UHCC System, designed to help improve students' reading and writing skills ([II.B.1-18](#)). The integrated reading and writing program is individualized through units of study, each with a pre- and post- assessment. Students advance through units with the support of an instructor or educational specialist.

Library instruction is provided for DE students through *Laulima* and via the distance learning link of the Mookini Library homepage([II.B.1-5](#)). Some of the resources accessible for DE learning include online books, journal and newspaper articles, interlibrary loan service, streaming academic videos, general and subject-specific research guides, online library skills assignments, and course reserves provided by specific instructors. The library provides library skills assignments through *Laulima*([II.B.1-19](#)). These skills assignments, while not specifically required by the College, are used in many 100-level English courses to meet the information literacy skills component of the course([II.B.1-20](#)).

Individualized help from College librarians is also available for DE students and instructors. As described previously, Mookini provides the Ask-a-Librarian service ([II.B.1-4](#)) for short questions that a student can ask via a Google Form; for longer and more in-depth research questions, students can call the reference desk or schedule an appointment via the Book-a-Librarianservice ([II.B.1-3](#)) on the library website. The website specifies that librarians will, at times, work evenings and weekends to provide quicker responses. In addition, the DE librarian sends a standard email to all new DE instructors, outlining resources available and requesting input regarding any materials needed for their courses ([II.B.1-21](#)). This outreach helps provide library instruction while also facilitating collaboration between instructors and librarians.

### **ProctorU**

In 2015, the College entered into a contractual agreement with ProctorU, a live, online proctoring service that allows students to complete exams from any location using a computer, webcam, and reliable high speed internet connection ([II.B.1-22](#)). This service was contracted for the purpose of supporting DE students by providing an alternative to visiting one of the UH testing sites to take proctored exams. Students are required to pay for the service and fees vary based on length of the exam and how soon the student must take the exam. ProctorU also offers ongoing DE training for faculty and lectures through web-conference trainings.

### **Turnitin**

Turnitin is an internationally recognized commercial service for plagiarism prevention used by 15,000 institutions and 30 million students ([II.B.1-23](#)). Hawai'i CC subscribes to this service on an annual basis to allow students and faculty to receive feedback on student use of outside sources. Turnitin allows for review of many types of assignments, including essays, research papers, lab reports, and presentation slides. Students are able to upload their work and self-check for potential plagiarism when using sourced material, thereby building their awareness of issues surrounding academic integrity and correct source integration.

Instructors are encouraged to use originality reports as a formative assessment and resource for teaching proper citation and discussing plagiarism with students in class or in individualized conferences. Turnitin also offers a useful platform for instructors to supply written comments, as well as voice messages, on students' work. For online instructors especially, this is an organized, productive, and interactive way of delivering timely feedback to students. In addition, Turnitin offers a peer review tool so students can comment on each other's work in structured manner that the instructor can evaluate.

### **Hālaulani Transfer Center**

As part of the Title III grant-funded Hālaulani Transfer Center (2011 to 2016), peer mentors provided 715 contacts, including workshops and other academic success activities ([II.B.1-24](#)).

### **Kulukuluua Project**

The Kulukuluua Title III grant project (2009 to 2016) provided academic support services including tutoring for developmental education and the Hawai'i Life Styles Program ([II.B.1-25](#)). The program supported 409 students in tutoring and counseling activities in 2016.

### **GEAR UP boot camps**

From 2014 through 2016, the College utilized GEAR UP (Gaining Early Awareness and Readiness for Undergraduate Programs) grant funds to provide math and English boot camps, offered during school breaks, to help students place into higher level math and English courses ([II.B.1-26](#)). The majority of students who attended placed into a higher level class ([II.B.1-27](#)). These boot camps were provided to support the UH System's "15 to Finish" Hawai'i Graduation Initiative ([II.B.1-28](#)), decreasing students' credit hours spent in developmental education courses. Students in the boot camp utilized EdReady and Khan Academy to participate in individualized study at their own pace and placement. GEAR UP also provided funding for math tutors. The tutors provided mini-lessons and monitored student progress as the students utilized online learning methods.

### **Student Success Coordinator**

In June of 2017, the College hired a full-time faculty Student Success Coordinator to develop and coordinate academic and non-cognitive support for at-risk and underprepared students. The coordinator collaborates with math and English faculty, as well as with other academic and student support service units, to support underprepared students. This position was identified as a need by both instructional and support services to help facilitate UHCC System initiatives.

### **Hā'awi Kōkua Lab**

The Hā'awi Kōkua Center provides assistance and support to help students with disabilities succeed academically, including special accommodations support, such as classroom notetakers, sign language interpreters, and specialized testing accommodations ([II.B.1-29](#)). The center includes a disability counselor, a manager for the Kōkua lab on the Manono campus, peer mentors for the lab, and student workers to assist as notetakers. The counselor arranges for academic accommodations appropriate to a student's diagnosed disability for both face-to-face and DE classes and also travels to Pālanui several times a month to be available to meet with students at that campus in person. Other support for students with disabilities includes adaptive technology such as digital recorders, wheelchair adaptive chairs and desks, and computer screen enlargers. Through a partnership with the Counseling, Advising and Student Support Services Center, Hā'awi Kōkua also offers academic workshops for students.

Programs use various approaches for assessment of the sufficiency, quality, currency, depth and variety of services provided by the library and the College's learning support services (further described in Standard II.B.3). Common tools include surveys, student and faculty evaluations, Annual Report of Program Data (ARPD), usage statistics, individual program evaluations, and the national Community College Survey of Student Engagement (CCSSE) Survey. DE students

are surveyed annually to assess that their academic support needs are met. Results are reported and analyzed in annual and comprehensive unit reviews.

### **Analysis and Evaluation**

Hawai‘i CC supports all students, both DE and in-person, by providing effective and varied library, tutoring, and learning support resources and services, including online alternatives for DE students and others who require off-campus access to resources.

### **LIST OF EVIDENCE**

**II.B.2 Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment, course reserves and materials to support student learning and enhance the achievement of the mission.**

### **Evidence of Meeting the Standard**

The Mookini Library, Pāalamanui LLC, HKATC, Hā‘awi Kōkua Center, and TLC all utilize the annual and comprehensive review processes to identify needed resources and equipment. Each unit uses feedback surveys/evaluations, APRD, and quantitative data to determine if more resources are required for optimal learning support services to students.

Librarians, both at the Pāalamanui LLC and Mookini Library, collaborate with faculty to ensure that there are sufficient materials and resources to support the curriculum. Library collections are assessed through evaluations that communicate student, faculty, and staff satisfaction or dissatisfaction regarding resources. The libraries also review quantitative data, such as circulation numbers, journals accessed, and databases utilized, to determine whether materials and services should be added or discontinued. The librarians solicit feedback and suggestions for new resources as funds become available, and request feedback about continuing and canceling subscriptions. The designated Hawai‘i CC Mookini librarian and Pāalamanui LLC librarian both attend Academic Support meetings and are notified of new programs. All librarians (Distance Education, Mookini, and Pāalamanui) contact new instructors at the beginning of the semester to open communication regarding any resources or instruction they may require for their courses. This is also an opportunity to explain what types of resources are readily available to instructors and their classes.

For DE instruction in particular, many of the above procedures apply regarding the library’s support. The library has a proxy service that allows DE students to access online library resources by logging in with their UH username and password. Several DE instructors work with the DE librarian to create online tutorials and assignments that teach students how to access resources specific to their course needs. To address learning outcomes for DE students, some DE instructors have students complete online library research assignments([II.B.1-20](#)). The DE librarian sends the results to the instructors.

### **Academic Support Unit (ASU)**

ASU addresses the needs of instructional programs, as well as the needs of other units that provide learner support, to promote student learning in curricular and co-curricular endeavors

(II.B.2-1). Offices within ASU that specifically support the maintenance of education equipment and materials include Computer Services, Technology Support, and Media Services.

*Computer and Software Maintenance*

Hawai‘i CC strives to make computers accessible and available for use by students, staff, and faculty. Below is a table listing the number of computers available on all sites and campuses.

	LAN (Wired) Devices		Wireless Devices			
	PCs	Apples	Surfaces	iPads	Laptops	Subtotal
Manono and UH Hilo	694	56	134	62	255	1201
Pālanuanui	50	3	16	10	9	80
Kona Hospital Annex	7	0	0	0	12	19
Ka‘ū Resource and Distance Learning Center (KRDLC)	6	6	0	2	2	16
<b>Total</b>						<b>1306</b>

**Total # of computer labs available to students:**

- UH Hilo and Manono campuses: 20
- Pālanuanui: 5
- Ka‘ū Resource and Distance Learning Center in Pahala: 1

**Total # of Hawai‘i CC classrooms with technology available:**

- Instructor-use computers w/ Elmo UH Hilo and Manono campuses: 56
- Instructor-use computers w/ Elmo Pālanuanui: 15
- Instructor-use computers w/ Elmo Kona Hospital Nursing portable: 1

**Total: 72 Instructor-use computers**

The Computer Services office services computers for Hawai‘iCC with the exception of those computers that are shared with another site or campus and are designated as outside of the College’s responsibility. One example is the Mookini Library, which is maintained by UH Hilo.

The College typically sets a budget for computer replacements in designated computer labs based on a four-year life cycle. Other computer replacements are requested through individual program and units via comprehensive reviews and are funded by the appropriate vice chancellor

or dean. As Computer Services receives funding, replacements are prioritized by the oldest systems in use by faculty, lecturers, and staff. Over the past two years, Computer Services replaced all of the hard drives in the classroom instructors' systems with solid state drives and additional memory to support and sustain performance and enhanced response times.

Computer Services actively works to keep all computers up to date on software, and prior to July 2016 had completed operating system upgrades to approximately half of the computers maintained by the College. In addition to replacements and software updates, Computer Services performs an annual physical cleaning of computers in designated labs. This includes removing the computer CPUs, keyboards, and mice from the classrooms for cleaning. Software maintenance is largely automated; Computer Services pushes out updates to antivirus, plugins, Microsoft updates, Adobe updates, etc., as they become available across the campus networks. As there have been a greater number of laptops in use across the campuses, Computer Services also identifies concentrations of the needed updates to be performed manually. Typically, these updates occur twice per year.

For unscheduled computer needs, Computer Services serves the College through a convenient work request method. Faculty and staff in need of assistance access the online IT HelpDesk website to submit requests for service ([II.B.2-2](#)).

#### *Media-Specific Maintenance*

The College employs three full-time media specialists, two in Hilo and one at Pāalamanui. Additional part-time temporary media personnel are available at the Pāalamanui campus. Media Services provides and maintains media and media services to faculty, staff, and students. Media services also helps maintain equipment by responding to trouble calls and resolving technical problems as rapidly as possible, to reduce down-time for instruction and school operation. Media Services replaces or repairs equipment as needed. Faculty and staff fill out Media Design and Production work request forms when they have equipment in need of attention.

#### **Analysis and Evaluation**

The College utilizes faculty and staff expertise, as well as student input and quantitative data, to select educational equipment and materials in support of student learning. Professionals at Computer Services and Media Services physically maintain the equipment and resources. The College's acquisition and maintenance of appropriate resources for all learners provides students with the tools they need to achieve their academic and career goals. Additionally, the selection of DE-focused equipment provides flexibility for learners across the island, which helps the College ensure equity of resources for all learners.

**II.B.3 The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.**

### **Evidence of Meeting the Standard**

The Mookini Library collects several sources of data to evaluate its services and resources, including the Common Student Survey ([II.B.3-1](#)), Mookini ARPD ([II.B.3-2](#)), a faculty survey administered once a year to faculty whose classes have participated in library instruction ([II.B.3-3](#)), and the “library skills assignments” used by some English classes ([II.B.1-20](#)). Follow-up surveys are deployed on an as-needed basis. Data collected from library surveys and assessments are used to determine whether the resources and support provided to Hawai‘i CC and UH Hilo students and faculty are adequate.

Evaluation of collected data is used to drive improvement. As an example, in 2012, the Mookini Library conducted a student survey to further assess student suggestions for extended hours ([II.B.3-4](#)). Based on the results, the library extended its hours in the following years despite staffing cutbacks.

In general, ARPD data consistently report satisfaction with all Mookini Library and learning support services and resources (70-90 percent or higher). Assessment results are discussed in annual and comprehensive reviews as a means for creating action plans to address weaknesses

and ensure continued satisfaction in areas identified as strengths. Quantitative data are also reviewed, such as circulation counts, reference questions answered, and number of presentations given.

TLC and HKATC evaluate their services and resources through student surveys and student achievement data. Unit outcomes for tutoring include the following:

- TLC/HKATC will provide tutoring services for students to support their success in their academic endeavors.
- Students who receive tutoring will pass their tutored courses (Systemwide SLO).

For TLC, data considered for assessment and evaluation include TLC- and tutoring-specific student evaluations ([II.B.3-5](#)), ASU Common Survey ([II.B.3-6](#)), TLC faculty user evaluations ([II.B.3-7](#)), ARPD data, and CCSSE survey results ([II.B.3-8](#)). Students who receive tutoring and other services at TLC are provided an evaluation in the 12th week of instruction in the fall semester. These data indicators are discussed in annual and comprehensive reviews ([II.B.3-9](#)).

In fall 2016, 96 percent of the 103 respondents to the tutoring evaluation reported they rated TLC either “good” or “excellent.” Additionally, student pass rates for those courses in which students received tutoring are tracked and reported to evaluate services, as well to measure student persistence and re-enrollment in comparison to students who did not utilize tutoring ([II.B.3-10](#)). Between 2012 and 2016, an average of 71.6 percent of students who utilized tutoring passed the course in which they were tutored.

Similarly, the HKATC assesses and evaluates services and resources through the annual and comprehensive review processes([II.B.3-11](#)). Data sources include the HKATC evaluation (given to students who utilized their services) ([II.B.3-12](#)), HKATC faculty lab-use evaluation ([II.B.3-13](#)), ASU Common Survey ([II.B.3-6](#)), ARPD data, and CCSSE data. Between 2012 and 2015, 98-100 percent of survey respondents reported that they were satisfied with the testing services at HKATC ([II.B.3-10](#)). Additionally, the data system MySuccess (Starfish) was used to examine demand and number of students served. Like TLC, HKATC tracks and evaluates pass rates and student persistence rates for tutored courses.

An additional method for ensuring sufficient depth and quality of learning support services, utilized by both TLC and HKATC, is ongoing collaboration between the centers and assigned area coordinators, instructional faculty who serve as liaisons between instruction and learning support. Area coordinators work nine hours per week in TLC and are assigned to train tutors in their specific content areas, provide input and solicit feedback during department meetings, and suggest improvements in TLC/HKATC services.

The Pāalamanui Library and Learning Center (LLC) uses an annual survey to assess services. This survey is given to staff, faculty, and students, most recently in 2014 ([II.B.3-14](#)), 2016 ([II.B.3-15](#)), and 2017 ([II.B.3-16](#)). Since the campus was moving to its new facilities in 2015, a survey was not completed. Survey results are reviewed to consider adjustments in personnel, facilities, and resources.

DE students are given an annual survey that includes questions on library services, tutoring, and testing services([II.B.3-17](#)), with results sent to Mookini Library’s Hawai‘i CC designated

librarian and the DE librarian to be used to for assessment and planning, and to TLC, HKATC, and the Pāalamanui LLC for consideration in unit reviews.

Distance tutoring, offered through three different services, is also evaluated on a regular basis to determine effectiveness. Brainfuse usage and user survey results ([II.B.3-18](#)) are tracked by the company for quality control purposes, to inform personnel changes, or to identify training needs. Brainfuse provides usage statistics broken down by month, day, and even hour of the day([II.B.3-19](#)). Use of this service by Hawai'i CC students from August 2015 to July 2016 was approximately 750 hours ([II.B.3-20](#)). Ninety-two percent of UHCC Brainfuse users reported they found the service helpful and 95 percent would recommend it to other students. The Brainfuse monthly reports are shared with instructional departments. Any issues or questions are reported back to the UHCC System and are used to determine if the service will be continued when the contract expires. OLA Tutoring is tracked by UH Mānoa, and information regarding contact hours for Hawai'i CC students is provided by the OLA project director. Since the OLA tutoring program is provided free of charge, students make their own determination if they want to continue using the services. EdReady, which is also purchased through the UH System, uses campus-specific codes to track usage for each campus.

The Hālaulani Transfer Center assessed the quality of services in 2015 based on student surveys and evaluated demand based on the number of students who utilized peer mentoring services.

GEAR UP boot camps were evaluated using pre- and post-test placement scores ([II.B.3-21](#)). These scores were examined to determine if students achieved higher math placement on the post-tests. The 2014 summer session surveys reported 100 percent positive feedback, with 96 percent of students reporting that they would recommend the boot camp to friends and family. The successful results were used to solicit funds from the College when grant funds were not available. In 2015-16, GEAR UP grant funds were still sufficient to cover boot camp costs.

The Hā'awi Kōkua Center evaluates services based on a general satisfaction evaluation, counselor evaluations, ARPD data, and quantitative data regarding the usage of equipment or services, such as the number of students using digital recorders. Each semester, Hā'awi Kōkua staff send out an overall satisfaction evaluation regarding student satisfaction with each of the services offered ([II.B.3-22](#)).

### **Analysis and Evaluation**

All library and learning support services are regularly evaluated, and these evaluations inform future budget requests as well as revisions to practices and services. Each service utilizes both quantitative and qualitative methods of assessment to evaluate services.

### **LIST OF EVIDENCE**

**II.B.4 When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible, and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness. (ER 17)**

### **Evidence of Meeting the Standard**

The College collaborates and/or contracts with several library and other learning support services for its instructional programs by establishing agreements (1) with other UH campuses, (2) via the UHCC System, and (3) directly with external service providers. Services are formalized in a contract when there is a monetary agreement regarding the access of services; these contracts detail the responsibility for securing and maintaining student information in accordance with FERPA regulations, as well ensuring security, maintenance, and reliability. When services are funded by the UHCC System, formal agreements between individual campuses are not necessary.

Services used by the College, whether directly purchased or accessed through a UHCC System purchase, are thoroughly evaluated. The College reviews data usage reports and survey feedback to ensure students are satisfied with services.

The College relies on a collaboration with UH Hilo for library services. The Mookini Library, administered by UH Hilo, is the most prominent shared resource for library and learning support services for the College, the result of a long-standing partnership with UH Hilo. The Mookini Library is legislatively mandated to provide library services to the College. College services include support to the Pāalamanui Library and Learning Center. In 2006, the College signed a formal MOU with UH Hilo that has since expired ([II.B.4-1](#)). Currently, the College is billed according to library resource usage by Hawai'i CC students ([II.B.4-2](#)). A new MOU is in the process of being negotiated.

The College has access to the Brainfuse live online learning service through a contract with the UHCC System ([II.B.4-3](#)). Brainfuse is made readily accessible through the College website ([II.B.4-4](#)) and is advertised via email announcements and flyers; it is also accessible through a student's MyUH Services ([II.B.4-5](#)). In terms of ensuring security, the System's contract with Brainfuse stipulates that Brainfuse is responsible for maintaining student information. One way in which Brainfuse secures student information is by having users create a username and password strictly for their Brainfuse account.

EdReady is another online learning support tool made accessible through UHCC subscription to NROC. With the provision of an access code, current and future students can utilize the program with internet access via the College ([II.B.1-17](#)) and EdReady websites ([II.B.4-6](#)). Evaluations and student success are monitored by designated Hawai'i CC program administrators. Marketing and outreach are accomplished through flyers, email, academic advising, and special programs, such as math and English boot camps. Security for this service is maintained by the provider. Terms for institutional and individual use can be found on the EdReady website ([II.B.4-7](#)).

The College's contract with ProctorU states the terms and conditions wherein ProctorU is responsible for securely maintaining student information in accordance with FERPA. ProctorU provides information to the College via institutional administrator login access.

Turnitin is contracted annually by the College, and is used by instructional faculty across the disciplines to address academic integrity, plagiarism, and proper citation and use of sources([II.B.1-23](#)). The vice chancellor of Academic Affairs (VCAA) selects a faculty member liaison who works with a designated Turnitin representative to ensure the annual contract is re-evaluated each June and that instructors have easy, reliable access to Turnitin's services. The faculty liaison gathers feedback from faculty and lecturers who use the service and reports to the VCAA before contract renewal for each academic school year. Turnitin abides by standard U.S. and EU practices regarding security and privacy policies([II.B.4-8](#)), provides timely updates on their system status([II.B.4-9](#)) via email and social media, and has helpful customer service for faculty and administration.

Shared resources and support services are clearly advertised and easily accessible through the Hawai'i CC website as well as other campus websites when applicable. This information is also included on many instructors' syllabi, posted as flyers around campus, and distributed by many offices including TLC, HKATC, and the Counseling, Advising and Support Services Center. For off-island, rural, and DE students, an online orientation[II.B.4-10](#) provides information on tutoring and support services; many instructors also embed learning services, both online and on-campus, into their assignments.

Faculty and staff are also provided training and information on different resources and services as part of New Hire Orientation and on an ongoing basis as new resources and services develop. For example, when EdReady became available to the College in 2014, three information session opportunities were provided to faculty, staff, and students. From these sessions, faculty and staff often return to their respective departments to share information. Additionally, the Faculty/Staff Development Committee is charged with providing professional development workshops and opportunities. This network of training and sharing information allows the College to raise awareness of resources and ensure that they are well advertised and utilized.

### **Analysis and Evaluation**

Hawai'i CC's established collaborations with other UH campuses and external support services include formalized contracts, MOAs, and monetary agreements that allow access of shared resources and services by students, faculty, and staff. Shared resources are advertised and accessible through the College website and at physical locations on campus.

### **LIST OF EVIDENCE**

### **CHANGES AND PLANS ARISING OUT OF THE SELF-EVALUATION PROCESS**

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Added The Learning Center tutoring services to MySuccess system	II.B.1	MySuccess Campus Leads, The Learning Center Coordinator	Completed in 2017-2018	Students able to make appointments at The Learning Center via the MySuccess system

## II.C. STUDENT SUPPORT SERVICES

**II.C.1 The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution. (ER15)**

### Evidence of Meeting the Standard

As described in Standard I.A.3, all of the College's academic program and service units are aligned with its mission. Each unit within the Office of Student Affairs details how its services align with Hawai'i CC's mission as part its comprehensive unit review. For example, the Counseling Unit "promote[s] student learning by providing information, guidance ([II.C.1-1](#)), and encouragement" and the Admission and Records Office Comprehensive Unit "embraces our unique Hawai'i Island culture" by "supporting active participation in cultural protocol and events (e.g. kīpaepae, Pāmaomao) and respecting cultural nuances when providing services" ([II.C.1-2](#)).

The demographic characteristics of Hawai'i CC's students demonstrate the necessity of the services the College provides for first generation, low-income, and indigenous students. Most of the College's students are Hawai'i residents (97 percent), and 59 percent are at least part Native Hawaiian. First generation students make up 24 percent of the population, and 64 percent of students qualify for Pell Grants. The average student age is 25, which reflects the high number of nontraditional learners that make up the student body; three percent are also veterans. Approximately half of the College's students are enrolled in career and technical education while the other half are completing general and pre-professional education. ([II.C.1-3](#), [II.C.1-4](#))

Hawai'i CC's Office of Student Affairs (also referred to as Division of Student Affairs) offers the following student support services, regardless of course delivery mode, at the College's Manono campus ([II.C.1-5](#)):

- Admissions and Records Office--accepts all students according to the Hawai'i CC open door policy; provides record management, transfer credit evaluation, and degree conferral services

- Career and Job Development Center (CAJDC)--assists students in exploring, developing, planning, and implementing their career goals and in gaining on- and off-campus employment opportunities
- Counseling, Advising and Support Services Center (CASSC)--provides students with admissions, academic, career, financial aid, personal, and job search assistance
- Financial Aid Office--assists students in funding their education
- Information Center--offers a centralized resource to guide students to appropriate resources
- Hā‘awi Kōkua--supports students with disabilities
- Student Life Program--provides extra-curricular experiences that engage students in their community and help them build leadership experience
- GEAR UP--supports low-income students in the transition to college
- Mental Wellness and Personal Development Service--supports students' mental wellness

Pāalamanui Student Services provides comprehensive student support services to students at the Pāalamanui campus. The following on-location services also support the students:

- The mental health therapist and Hā‘awi Kōkua counselor make regular, scheduled visits to the Pāalamanui campus to deliver services to students there.
- Elama Project--provides scholarships, counseling, and workshops for academic and career success at the College's Pāalamanui campus.

In addition to providing services to students at both of the College's locations, Hawai‘i CC also provided the following services during the Title III grant term:

- Hālaulani Transfer Success Center (Title III)--encourages and supports Native Hawaiian students to graduate and/or transfer to a four-year institution.
- Rural Hawai‘i Grant--supports high priority groups such as unemployed, underemployed, and veteran learners.

The grant ended in 2016, but the Paepae ‘Ōhūa Native Hawaiian Success Center continues to serve this student population. The center offers support through counseling, peer tutors and mentors, workshops, financial aid information, and academic advising ([II.C.1-6](#)).

Support services are also available to distance education (DE) students. The College's catalog lists the following services available for DE students, including students with disabilities, whose home campus is Hawai‘i CC: “admissions and records, orientation, financial aid, registration, counseling, and advisement” ([II.C.1-7](#)). The “Services For DE Students” webpage also provides links to learning support programs, technical support services, and Brainfuse online tutoring available to DE students, and has information on how to use the following Google applications: Drive, Email, Calendar, and Sites ([II.C.1-8](#)). The “Registering for a DE class” website explains the registration process, how to purchase textbooks, and how to inquire about financial aid for DE courses ([II.C.1-9](#)).

Hawai‘i CC regularly evaluates its student support services as part of its schedule of annual and comprehensive reviews of all programs and units ([II.C.1-10](#), [II.C.1-11](#)). The reviews from 2005 to 2016 are available online at the Program and Unit Review website ([II.C.1-12](#)). The College also implemented an assessment management system to track and record reports in fall 2017 as

part of its efforts to improve its oversight of assessment submission. Additionally, Hawai‘i CC publishes the Student Services Annual Report of Program Data (ARPD), which details and analyzes quantitative indicators in relation to student learning outcomes ([II.C.1-13](#)). Additional sources of evaluation data include projects such as the Admissions and Records Office’s “secret shopper” collaboration with Hawai‘i CC’s Marketing Program to improve services to students ([II.C.1-14](#)).

Unit assessment data have been used regularly by Division of Student Affairs (DSA) units to drive improvements in unit services, operations, and functions. For example, DSA Counseling and DSA Information Center annual and comprehensive reports over the past few years show they used survey data to improve outreach to students via texting and phone calls instead of just email([II.C.1-1](#)).

Hawai‘i CC’s newly formed Campus Integrated Student Support (ISS) Team, a subset of the University of Hawai‘i (UH) System’s ISS Task Force, has been charged with developing and implementing targeted student support strategies. The comprehensive, multifaceted, and inclusive ISS approach involves all members of the College community in creating a strong support structure for all students ([II.C.1-15](#)). Student needs are assessed through the use of data from multiple sources, technology, and meaningful human interactions. Services are designed to provide each student with the type and intensity of support appropriate for their unique circumstances and academic and career goals. The approach will begin with a soft launch in spring 2018 and full, institution-wide implementation by fall 2018.

### **Analysis and Evaluation**

Hawai‘i CC regularly evaluates its student services and demonstrates that they support student learning and the College’s mission.

**II.C.2 The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.**

### **Evidence of Meeting the Standard**

As stated in Standard I.C.1., Hawai‘i CC assesses all student support units annually. Each unit identifies its learning support outcomes, which are published on the College’s Assessment webpage. For example, Counseling, Advising and Support Services is assessed on the following student learning outcomes([II.C.2-1](#)):

- Student will identify career and/or academic goals and develop a plan to achieve those goals.
- Student will identify and utilize campus and community resources.
- Student will identify the requirements to maintain or return to good academic standing.

Additionally, comprehensive unit reviews occur on a three-year cycle. The assessment cycle prioritizes continual improvement of student support services, regardless of delivery mode, towards best meeting student learning outcomes. Once data have been collected, the results are

analyzed and areas of improvement are identified. The next assessment is then based on the action plan developed from the prior assessment ([II.C.2-2](#)). Some of the improvements to student services arising from assessment include the following:

- A mental health therapist position was added to Hawai'i CC's staff ([II.C.2-3](#))
- The mental health therapist developed online resources useful for distance education (DE) students and other students who prefer online resources, including ULifeLine and Half of Us, both of which provide wellness information, hotline numbers for suicide prevention, and other resources ([II.C.2-4](#))
- STAR GPS was introduced to improve online and in-person student advising and provide clear graduation pathways for each student's needs ([II.C.2-5](#))
- The Instruction Technology Support Office survey for DE students was revised in 2016-17 to include questions about student support services ([II.C.2-6](#))

### Analysis and Evaluation

Hawai'i CC assesses the outcomes of its learning support services and programs, and it regularly improves these services based upon assessment data. Annual and comprehensive reviews address assessment, action plans, resource requests, and alignment to the College's strategic goals to ensure continuous improvement of services.

**II.C.3 The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method. (ER 15)**

### Evidence of Meeting the Standard

Hawai'i CC assures that its services are reliably available when and where the students need them. The College includes campuses on both the western and eastern sides of the island (Manono and Pāalamanui), and its support services assist students at both campuses. The campuses are also connected via Polycom-enabled classrooms. The College's website provides a Live Chat service that directs students to appropriate services ([II.C.3-1](#)). Information about all of the above services is also listed online. For a description of its services for distance education students, see Standard II.C.1.

Hawai'i CC assures the equitability of its services by offering an appropriate, comprehensive, and reliable range of in-person and online services. The following provide services to enable equal access to Hawai'i CC's students:

- Hā'awi Kōkua--supports students with disabilities ([II.C.3-2](#))
- Title IX Coordinator--protects equal opportunity regardless of gender identity or sexual orientation ([II.C.3-3](#))
- The Elama Project--provides scholarships, counseling, and workshops for academic and career success to students otherwise unable to attend college at Hawai'i CC's Pāalamanui campus ([II.C.3-4](#))
- Instructional Technology Support Office (ITSO)--trains distance education faculty and assures that online courses are accessible to all online students([II.C.3-5](#))

- Admissions and Records Office--Accepts all students according to the Hawai‘i CC’s open door policy ([II.C.3-6](#))
- Student Orientation and Returning Student Advising--provides online orientation for new and transfer students unable to attend the in-person events ([II.C.3-7](#))
- The Early College High School Program (ECHS)--a dual-credit program that allows high school students to begin taking college courses at their high school ([II.C.3-8](#)).
- Running Start--a dual-credit program that also enables high school students to take college courses on the Hawai‘i CC campus ([II.C.3-9](#)).
- Kūlani Correctional Facility Courses--The Office of Continuing Education and Training offers Agriculture, Culture, and Personal Growth courses at the correctional facility ([II.C.3-10](#))

The Kūlani Correctional Facility program exemplifies equitable access to appropriate services by offering personal and professional training to incarcerated students. The Transitional Skills and Employment Skills courses help prepare students to successfully shift to a meaningful post-prison life. Agriculture courses such as Sustainable Crop Production and Egg Production for Small Farms provide inmates with workforce development and with ways to provide for themselves in an environmentally responsible and safe way once they leave prison. The courses can also count for credit should the inmates choose to enroll in a degree program once they are released.

Another growing program is the high school/early admit programs such as Early College and Running Start. These statewide programs, created in a partnership between the Hawai‘i State Department of Education and the UH System, provide opportunities for academically qualified public high school and home schooled students in grades 9-12 to enroll in college classes as part of their high school coursework; participating students can earn both high school and college credits. Early College programs have been offered in nine high schools across the island ([II.C.3-11](#)). Early College students are offered the same academic support services offered to all students, in addition to off-campus support with application, registration, and orientation. Enrolled students also have access to all resources available to Hawai‘i CC and University of Hawai‘i services and resources.

In order to provide appropriate and comprehensive services, the UH System abides by national and state equal opportunity laws that protect against discrimination. As stated in the University Statement of Nondiscrimination and Affirmative Action, “the University is committed to a policy of nondiscrimination on the basis of race, sex, age, religion, color, national origin, ancestry, handicap, marital status, arrest and court record, sexual orientation, and veteran status.” The College is committed to implementing the law under the leadership of Hawai‘i CC’s chancellor ([II.C.3-12](#)). As an example, Hā‘awi Kōkua assists students with disabilities in applying for and receiving accommodation. See Standard II.B.1 for a more detailed description of their services. As documented in the Hā‘awi Kōkua Unit Assessment Report 2014-15, 100 percent of students with disabilities that identified themselves were assessed and all who chose to accept accommodation were provided with it ([II.C.3-13](#)).

In addition to ensuring that students with disabilities not be excluded from any services, Hawai‘i CC comprehensively addresses the range of students’ needs by providing Title IX services. The College abides by the following UH System policy:

Any person believing that they have been subjected to sex discrimination; sexual harassment; gender-based harassment, including harassment based on actual or perceived sex, gender, sexual orientation, gender identity, or gender expression; sexual exploitation; sexual assault; domestic violence; dating violence; or stalking should report the prohibited behavior immediately to the respective campus Title IX Coordinator([II.C.3-14](#)).

The Title IX coordinator provides students with the following:

- a website with video tutorials on and links to Title IX resources and policies ([II.C.3-15](#)).
- A brochure that defines and provides examples of sexual harassment, sexual assault, and stalking, and lists resources for and the intervention efforts that ensue when a sexual assault is reported ([II.C.3-16](#))

Furthermore, all instructors are asked to include standard language on Title IX in their syllabi ([II.C.3-16](#)).

### **Analysis and Evaluation**

The College provides appropriate, comprehensive, and reliable services to its students to ensure that they access courses and resources, regardless of course delivery mode, on equitable terms. It oversees the implementation of nondiscrimination laws in order to serve all students equitably, and it makes information and services available to students regardless of location. By hiring a mental health counselor that serves both campuses and by constructing a new campus to better serve students on the west side of the island, Hawai‘i CC has also improved its services in the current accreditation cycle.

**II.C.4 Co-curricular programs and athletics programs are suited to the institution’s mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.**

### **Evidence of Meeting the Standard**

Hawai‘iCC provides co-curricular programs to enrich students’ educational experiences through its Student Life Program, in accordance with the UH System policy that co-curricular activities “empower students to be responsible leaders in civic duties, community service or professional matters” and “complement, extend, and reinforce academic learning by serving as nontraditional classroom venues for the application of knowledge, skills, and attitudes learned in the instructional program” ([II.C.4-1](#)).

The mission of the College’s Student Life Program is to “empower[...] students to develop leadership and life skills and demonstrate social responsibility through culturally-relevant co-curricular programs,” which aligns with the College’s mission to help students succeed academically and professionally while also serving the community([II.C.4-2](#)).

The Student Life Program manages the KauWa‘a Student Life Center and provides support to the College’s Chartered Student Organization (CSO) ([II.C.4-3](#)) and Registered Independent Student Organizations (RISOs) ([II.C.4-4](#)). CSOs serve the entire student body with funding from student fees, and include organizations such as the Associated Students of the University of Hawai‘i - Hawai‘i Community College (ASUH- Hawai‘i CC), the student government that represents the College’s students ([II.C.4-5](#)). RISOs serve students’ educational interests through clubs, such as the long-standing, internationally recognized honor society, Phi Theta Kappa ([II.C.4-3](#)). The College also provides service-learning opportunities for students and faculty ([II.C.4-6](#)).

Co-curricular activities contribute to students’ educational experience. For example, ASUH- Hawai‘i CC promotes students’ participation in student policy, leadership, and advocacy, as those in student leader positions must represent all students and uphold the student conduct code. In addition to providing leadership experience, co-curricular activities also cultivate students’ research and writing skills. The Hawai‘i CC Information Center coordinates the Ka ‘Io Newsletter, which students create and disseminate to all students electronically ([II.C.4-7](#), [II.C.4-8](#)) and in limited hard copy form once a week ([II.C.4-9](#)). Student publications fees fund annual academic planners, which are available to all students ([II.C.4-10](#)). Furthermore, co-curricular activities foster academic excellence through the Phi Theta Kappa Honor Society; by-laws establish its purpose as being “the promotion of scholarship, the development of leadership and service, and the cultivation of fellowship among qualified students of this college” ([II.C.4-11](#)).

The vice chancellor for Student Affairs (VCSA) exercises delegated control ([II.C.4-12](#)) over co-curricular programs, including their finances, and ensures that they are conducted with integrity. Student activity and publication fees are collected from students each semester. The VCSA approves expenditures of student fees for programs, educational experiences, and activities that benefit the student body ([II.C.4-13](#), [II.C.4-13](#)).

Student government fees are also collected from students each semester. The elected student government leaders of the ASUH-Hawai‘i CC, with the guidance of faculty/staff advisors, provide programming and activities to support the student body and manage student government fees. Student government leaders approve expenditures through standard parliamentary procedures, record approvals in the meeting minutes, and submit the minutes for processing ([II.C.4-15](#)). Hawai‘i CC also ensures that students leaders who participate in a CSO or RISO, which also have faculty/staff advisors, conduct themselves in a professional and collegial manner. Student leaders who violate standards of conduct within their organization may be disciplined as outlined in their bylaws ([II.C.4-16](#)).

### **Analysis and Evaluation**

Hawai‘i CC controls its co-curricular programs according to System policies to ensure that they are suited to and contribute to students’ social and educational experiences.

**II.C.5 The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.**

### **Evidence of Meeting the Standard**

Hawai'i CC provides counseling and academic advising services for all current and prospective students at both the Hilo and Pālanui campuses ([II.C.5-1](#)). These services are available in person, by telephone, and by email. Counseling faculty also provide various student success workshops designed to bolster student success ([II.C.5-2](#), [II.C.5-3](#)). Workshops can be requested by instructional faculty for delivery during classroom time or during a specified time outside of classroom hours. Offerings include a variety of academic support topics including Time Management, Creating an Academic Plan, Learning Styles, and Memory Techniques. The Paepae 'Ōhua Native Hawaiian Success Center, supported by USDOE Title III until 2016 and institutionalized after that point, also provides counseling and advising to students based on Native Hawaiian philosophy and foundation ([II.C.5-4](#)).

Counseling and academic advising services are regularly evaluated through student evaluations, assessment, and the Community College Survey of Student Engagement (CCSSE) to ensure that they are supporting student development and success ([II.C.5-5](#)). For instance, student success workshops utilize an evaluation form ([II.C.5-6](#)) in which students are able to rate the workshops, provide input for future topics, and suggest revisions to the workshop they attended; the results of these surveys inform future topics and topic frequency for workshop offerings. The Counseling, Advising and Support Services Center (CASSC) uses the results of the evaluations and assessment to improve services, develop action plan strategies, and discuss professional development training needed for the counselors and academic advisors.

Student evaluations are administered regularly. For example, students are asked to complete an evaluation after their in-person academic advising sessions. At student success workshops, students complete an evaluation immediately after the workshop. When counselors conduct class registration information sessions in the fall and spring semesters, students also complete a survey immediately after the session. For online learners, the Instructional Technology Support Office (ITSO) sends out an electronic evaluation towards the end of the semester that includes questions about the support services the students received.

In order to ensure student success, Hawai'i CC orients students to understand program requirements ([II.C.5-7](#)). Prior to every semester, all new and transfer students attend a mandatory New Student Orientation (NSO) where they learn about campus resources and services available to them, general financial aid information, Title IX information, the STAR registration process, their major requirements, and the academic calendar. The NSO is offered both on campus and online; the online NSO is a live web session where students meet with a counselor ([II.C.3-5](#)). All international students and Early College students are required to attend a mandatory orientation each semester regardless of whether or not they have previously attended Hawai'i CC and are continuing enrollment into the next semester. All returning students (students who previously attended Hawai'i CC and stopped out for a semester or more) and students on academic

probation must attend a mandatory advising session with a counselor. For all students mandated to attend an NSO or advising session, academic advising holds are placed on students' records until they have completed the requirement ([II.C.5-8](#)).

In addition to providing students with timely and accurate information about academic, transfer, and graduation requirements when they first enroll as students, the CASSC staff regularly monitor students' academic progress. They generate a Master Student Profile document after the first week of the fall and spring semesters to identify all enrolled students. Counseling faculty use this data to identify students on academic probation, to determine how close a student is to fulfilling his/her graduation requirements, and to tally the number of students in each counselor's assigned group of majors. The CASSC staff also generate a Student Success Report for all students at least two weeks before the start of the fall and spring semesters. By using the data from this report, counseling faculty identify and contact those students who have registered for courses that are not applicable towards their graduation requirements. Ensuring that students know which classes are not applicable is especially important for students receiving financial aid, because financial aid will not fund classes that are not required for the major.

Furthermore, the counseling faculty collaborate with instructional faculty to reach out to students "flagged" in the MySuccess Early Alert program ([II.C.5-9](#)). In support of Hawai'i CC's commitment to student success and retention, faculty use the MySuccess Referral tool to identify students who would benefit from additional support through their academic journey. Instructors are provided with descriptions of patterns of behavior that typical at-risk students demonstrate, such as excessive absences. Instructors make efforts to approach students initially to address concerns, then make referrals to the counselors if necessary. Students are flagged by their instructors in the first week of instruction (No Shows), in the fifth week (Early Alert) and in the eighth week of the semester (Consider to Withdraw). Counselors follow up on referrals, making additional referrals as appropriate and providing assistance (e.g., academic plan, success strategies, financial aid). They close the loop by informing instructors of the outcomes of their referrals, as well as by submitting a report that is disseminated to the vice chancellor for Student Affairs, the vice chancellor for Academic Affairs, deans, and instructors at the close of the semester. These reports provide valuable information to analyze and respond to toward the goal of continuously improving support for student learning and achievement at Hawai'i CC.

Beginning in 2016, the CASSC implemented the Hānai A Kumū model, wherein counselors were assigned to specific accelerated English course instructors ([II.C.5-10](#)). The term "*hānai a kumu*" was chosen to relay the sense of a counselor adopting a teacher and class(es) to act as additional support for the class. Counselor activities include the following: visiting classrooms, conducting in-class workshops to support academic success, and serving as dedicated points of contact for instructors needing assistance with identified students. The Hānai A Kumū model was developed as a means of providing wrap-around services to support students during and after the University of Hawai'i Community Colleges (UHCC) Systemwide changes in the developmental education model. Class workshops are evaluated with the same assessment tool as the student success workshops.

Hawai'i CC trains instructional faculty and other personnel to ensure that they are prepared to advise students. The CASSC provides academic advisor refresher workshops for faculty advisors prior to the start of the fall and spring semesters ([II.C.5-11](#)). Furthermore, faculty advisors regularly communicate and collaborate with counseling faculty assigned to work with students in

the programs/majors they instruct. The Hilo campus has seven general counselors, one disability services counselor, one career and job development counselor, and one academic advisor. The Pālanui campus has one counselor who serves all students. In 2016-17, one counselor was reassigned to serve as the STAR coordinator in order to prepare staff and faculty to use the new STAR advising interface. The coordinator provided numerous STAR training sessions to teach advisors how to use the interface to register students and to familiarize them with the STAR Graduation Pathway ([II.C.5-12](#)).

### Analysis and Evaluation

Hawai‘i CC prepares faculty and personnel to best counsel and advise students with accurate information to enable academic success. It also ensures that students are familiar with the available resources and that they learn how to best succeed through their graduation pathways.

**II.C.6 The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals. (ER16)**

### Evidence of Meeting the Standard

As described in Standard II.C.1, Hawai‘i CC ensures adherence to its policies through the assessment and review of all units. Its admission policies are established at the UH System level.

According to these policies, Hawai‘i CC provides open admission to high school graduates aged 18 and over ([II.C.6-1](#)). The College’s only program with selective admission is Nursing ([II.C.6-2](#)). Admissions personnel process applications and related documents in an accurate and timely manner. The application form requests information about past education and residency ([II.C.6-3](#)).

Hawai‘i CC’s chancellor establishes the early admission policies ([II.C.6-4](#)). According to the catalog, high school students may register for courses with the guidance of the high school counselor and a Hawai‘i CC counselor if they follow all standard procedures and deadlines ([II.C.6-5](#)). The catalog also defines the residency requirements for in-state tuition, the procedures for veterans’ benefits, the transfer procedures, and placement criteria. Over the 2014-15 review period, the Admissions and Records Office “received and processed 5153 applications, evaluated and conferred (when eligible) 845 degrees and certificates, evaluated 591 transcripts resulting in over 13,000 transfer credits awarded, processed 1476 transcript requests, and certified over 120 students to the VA (each semester)” ([II.C.6-6](#)).

Hawai‘i CC lays out its degree and certificate pathways through the catalog, advising sheets, and the STAR advising interface. For example, students can see the program outcomes and semester-by-semester course plan for AS and AAS degrees and certificates in the catalog (e.g., Tropical Forest Ecosystem and Agroforestry Management ([II.C.6-7](#)) and Liberal Arts ([II.C.6-8](#))). They can also find the pathways defined on advising sheets available online or through a counselor (e.g., Tropical Forest Ecosystem and Agroforestry Management ([II.C.6-9](#)) and Liberal Arts ([II.C.6-10](#))). Students can find the specific requirements for the Liberal Arts concentrations in Administration of Justice, Art, History, Psychology, and Sociology in the catalog ([II.C.6-11](#)). Furthermore, they can register for the recommended courses directly through STAR, an interface

that populates each student's graduation pathway with the best sequence of courses for successful completion of their degree; STAR also includes a "What If Journey" where students can view and test out possible pathways ([II.C.2-5](#)). Hawai'i CC provided students, faculty, and staff with training in using the new interface [II.C.6-12](#). The interface supports the UH System's "15 to Finish" initiative, which encourages students to complete 15 credit hours every semester in order to increase their chances of completing their educational goals ([II.C.6-13](#)).

In addition to providing its students with a variety of materials delineating clear degree pathways, Hawai'i CC provides individual advising appointments concerning admissions, academic, career, retention, financial aid, personal, and other advising to help students complete their goals. In order to ensure that academic counselors provide a consistent level of quality advising, Hawai'i CC's CASSC provides students with the "Academic Advising Syllabus," which outlines the counselor's responsibilities ([II.C.6-14](#)). The worksheet doubles as an instructional resource for students, as it educates them about how to successfully take charge of their academic trajectory and provides them with advising tools and resources.

For students who wish to continue their education, the UH System provides a Course Transfer Database that students can search to establish course equivalencies ([II.C.6-15](#)). For students who wish to move straight into their careers with their degree from Hawai'i CC, the Career and Job Development Center (CAJDC) provides assistance with job search, resume and cover letter writing, completion of applications, and interview preparation ([II.C.6-16](#), [II.C.6-17](#), [II.C.6-18](#)). CAJDC also coordinates the IS 105 Career/Life Exploration and Planning course, which guides students through the career exploration process, assists with the selection and planning of an appropriate career/academic pathway, and develops professional and goal-setting skills ([II.C.6-19](#)).

In collaboration with the Hilo Veterans Center, Hawai'i CC also hosts a Veterans Resource, Education and Job Fair ([II.C.6-20](#)) on campus in Hilo; at Pālanui, the College has hosted informational tables to support access to benefits for veterans. In addition, Hawai'i CC offers an annual Career, Job, and Internship Fair ([II.C.6-21](#)) for students and alumni and also collaborates with county, state, and private agencies to offer an annual Career Readiness Fair and a Career, Job and Resource Fair for the community.

### **Analysis and Evaluation**

The College adheres to its open admission, early admission, and residency policies, and it clearly communicates admission policies and qualifications as it advises students on clear pathways to complete their educational goals. It provides the support that students need to achieve their academic and career goals, and it continually seeks ways to improve the quality of the services it offers. For example, Hawai'i CC's institution of the STAR advising interface in 2016 demonstrates the importance that the institution places on students understanding and following the most effective pathway for achieving success.

### II.C.7 The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

#### Evidence of Meeting the Standard

As described in Standard II.C.6, Hawai‘i CC follows an open admission policy, so it does not use admissions instruments. It does, however, evaluate its placement instruments at the UH System level. Based on a request made by the UHCC Achieving the Dream Initiative Team and endorsed by the UHCC vice president and the Hawai‘i CC Academic Senate, Hawai‘i CC revised its placement testing policy in spring 2014, requiring that all students entering degree and certificate programs complete testing in their skill areas before registering, with the exception of students who already possessed an AA or bachelor’s degree or who met the SAT or ACT entry requirements at UH Mānoa ([II.C.7-1](#)). Until December 2016, Hawai‘i CC used the placement instrument Compass as mandated by the UH System. In spring 2016, the UHCC Student Success Council’s Cognitive Assessment Committee recommended new measures ([II.C.7-2](#)) for placement into math and English: students who do not have SAT or ACT test scores can self-place in English and math courses based on a menu of qualifiers that include overall high school GPA or specific grades in 12th grade English or math courses, Smarter Balanced Assessment English and math levels, or GED or HiSET scores ([II.C.7-3](#)). Students without any of the listed measures will take an Accuplacer test. These new measures went into effect in fall 2016.

Accuplacer was selected to replace COMPASS as the new placement testing instrument because it is broadly used and easily programmable to fit the College’s needs, with a well-designed and completely online interface and live support. The effectiveness of Accuplacer and the other placement tools will be evaluated by the UHCC System annually. Upon evaluation, any necessary changes will be implemented.

Hale Kea Advancement and Testing Center (HKATC), which houses the placement testing at Hawai‘i CC, evaluates its placement practices annually. It has recently seen a 27 percent growth in the number of students receiving testing services([II.C.7-4](#)). To address the problems caused by the increase in demand for testing services, it has designated two electronic classrooms to address these needs, and it plans to hire one permanent position and one civil service position in the coming year.

#### Analysis and Evaluation

Hawai‘i CC, along with the UHCC System, regularly evaluates placement instruments and practices to validate their effectiveness while minimizing biases. Replacing the Compass placement instrument with the more accessible and user-friendly Accuplacer demonstrates a commitment to continually improving placement practices, and the College’s new policy also provides multiple qualifiers for establishing student placement.

**II.C.8 The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.**

### **Evidence of Meeting the Standard**

Hawai‘i CC takes seriously its responsibility to collect and store sensitive student information only as necessary for the functioning of the College. It follows UH System policy EP 2.214 Security and Protection of Sensitive Information, which provides “the framework for specific practices and procedures associated with systems and files that contain sensitive, personal and confidential information”(II.C.8-1) The policy protects information such as student records and health information from inappropriate disclosure. In section III.D, it designates social security number and personal financial information as of special concern, and prohibits the use of social security number as an identifier and protects credit card and electronic transactions accordingly. Section III.H.1 states that only the designated senior administrators may grant individuals access to sensitive information as necessary for the effective execution of their duties. Lastly, in Section III.F of the policy, such information is only obtained “when essential to the function and operations of the institution.”

Hawai‘i CC maintains student records permanently, securely, and confidentially. Online student applications and academic and financial aid records for existing students are stored electronically on a secure server or in hard copy in locked file cabinets. Student medical records are stored electronically or as hard copies in locked file cabinets. Counseling and mental health records are also stored in locked filing cabinets. Furthermore, the College follows UH System policy for protecting sensitive information when it is being transmitted, such as using secure https web transactions and the secure UH “filedrop” service instead of email for online transmission (II.C.8-2).

Hawai‘i CC publishes and follows established policies for the release of student records. The UH System complies with the federal Family Educational Rights and Privacy Act (FERPA) and AP 7.022 Protection of Educational Rights and Privacy of Students (II.C.8-3). These administrative rules control the release of student records and delineate the procedures that students may follow in order to challenge record information that they deem inaccurate.

### **Analysis and Evaluation**

Hawai‘i CC maintains student records permanently, securely, and confidentially, and it publishes and follows policies for release of these records. It collects and stores sensitive information only as required to function, and securely transmits such information only to authorized persons.

### **CHANGES AND PLANS ARISING OUT OF THE SELF-EVALUATION PROCESS**

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Formalize comprehensive assessment of student needs regarding Student Services	II.C.1 II.C.3	Vice Chancellor for Student Affairs, Student Affairs managers	Begin fall 2018	Increase data to better identify needs for student services for all students (including DE)
Reorganize Student Life structure	II.C.4	Vice Chancellor for Student Affairs	Begin fall 2018	Clearly defined Student Life structure and program
Create evaluation/assessment process or system to measure effectiveness of placement instruments/qualifiers	II.C.7	Vice Chancellor for Academic Affairs, Institutional Researcher, Student Success Council, Vice Chancellor for Student Affairs, Hale Kea Manager	Planned for fall 2018 (after new Institutional Researcher hired)	Structured and scheduled data analysis of placement instruments and qualifiers (every semester)

## **Standard III Resources**

---

**III.A. Human Resources**

**III.B. Physical Resources**

**III.C. Technology Resources**

**III.D. Financial Resources**

## Standard III Resources

---

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

### III.A. Human Resources

**III.A.1 The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.**

#### Evidence of Meeting the Standard

##### Hiring Criteria and Consistent Hiring Procedures

Hawai'i Community College assures the integrity and quality of its program and services with clear policies and procedures for hiring administrators, faculty, and staff. Permanent employees of the College fall into one (1) of four (4) distinct classifications:

- Executive/Managerial (E/M) ([III.A.1-1](#))
- Faculty ([III.A.1-2](#))
- Administrative, Professional, and Technical (APT) ([III.A.1-3](#))
- Civil Service([III.A.1-4](#))

The first three (3) groups are approved by the Board of Regents (BOR) and are referred to as BOR positions. Applications are submitted directly to the College for the interviewing and hiring process with the exception of the E/M positions, which also require presidential and/or BOR approval. Safeguards are in place to ensure consistent application of the BOR's hiring policies and procedures ([III.A.1-5](#), [III.A.1-6](#), [III.A.1-7](#)) The civil service group falls under the jurisdiction of the State of Hawai'i Department of Human Resources Development (DHRD) ([III.A.1-8](#)). In addition, the College employs temporary employees to meet short term needs.

The College creates screening committees to review application materials, select qualified applicants for interviews, and identify candidates for potential employment in permanent positions. Screening committees are formed to provide a balanced and objective evaluation and recommendation of candidates, and follow best practices promoted by the UH Office of Human Resources (OHR) ([III.A.1-9](#)). Generally, the primary hiring decision and compliance with Equal Employment Opportunity (EEO) and OHR procedures in the hiring process are the responsibility of the College, subject to review and consultation with UH System ([III.A.1-10](#), [III.A.1-11](#)).

### **Program needs and College mission**

The College seeks to recruit the best qualified candidates to perform the requisite duties and responsibilities of the position description (PD). The PD clearly indicates the position duties, skills, responsibilities, authority, minimum qualifications, and desirable qualifications (if any). Established PDs are reviewed by the program, unit, and administrators to ensure that they address the needs of the College. Hawai'i CC's Equal Employment Opportunity/Affirmative Action (EEO/AA) coordinator reviews the PD for compliance before the position is posted.

### **Advertising, Credential Verification and Equivalencies**

All vacant positions are posted on the publicly accessible University of Hawai'i Work At UH website ([III.A.1-12](#)) and a newspaper of statewide circulation. Campuses also have the option to advertise nationally in appropriate professional journals, electronic bulletins, industry publications, or other suitable media. Advertisements are prepared in accordance with the UH Systemwide Chapter 9 Personnel BOR policies ([III.A.1-13](#)), executive policies ([III.A.1-14](#)), and administrative procedures ([III.A.1-15](#)); the College's EEO/AA Policy ([III.A.1-16](#)); collective bargaining agreements ([III.A.1-17](#)); and state and federal non-discrimination laws. Instructions for applying are provided on the Work At UH website based on the classification of the PD.

Applications are screened by Human Resources for minimum qualifications (MQs), and degree(s) conferred are verified with official transcripts to produce a list of qualified candidates for screening committees to interview and recommend candidates for appointment. Colleges check the equivalency of degrees by referring to the National Association of Credential Services([III.A.1-18](#)).

### **Analysis and Evaluation**

The College has a well-defined recruiting, screening, and selection process. Position descriptions are reviewed by units and administrators prior to public posting to ensure that they accurately describe the position and address the needs of the institution. The UH System provides clear policies and procedures relating to personnel under Chapter 9 of the BOR policies, executive policies, and administrative procedures. These policies and procedures are continuously revised and updated by the UH System to provide assurance that personnel hired by the College are qualified to preserve the integrity of its programs and services.

**III.A.2 Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning.**

### **Evidence of Meeting the Standard**

Instruction is the College's highest priority; therefore, teaching remains the most important duty of the instructional faculty ([III.A.2-1](#)). BOR Policy RP 9.214 sets standards for the level of assignment for the instructional component of faculty responsibilities ([III.A.2-2](#)). In addition, position descriptions for instructional faculty include any non-instructional duties and responsibilities, which typically require developing and/or updating curriculum, teaching

methods, and assessment strategies to improve student learning based on assessment results; conducting student evaluations of teaching effectiveness; participating in assessment of course learning outcomes; and participating in department and/or institutional assessments of student learning. Lecturer (adjunct) positions include assessment of student learning but do not include curriculum development, development of student learning outcomes, college service, or other professional duties expected of faculty members. Faculty classification ([III.A.2-3](#)) including duties, academic qualifications, generic job descriptions, and criteria for tenure and promotion are established at the UHCC level for all faculty ([III.A.2-4](#)). Academic qualifications for lecturers are identical to those for other faculty. The College uses these factors in hiring, retention, and promotional decisions.

Hawai'i CC evaluates faculty qualifications via a rigorous application and screening process, ([III.A.1-6](#)). The application for faculty or executive positions requires applicants to list all appropriate degrees and other training, professional and teaching experience, scholarly activities, and other relevant service, honors, or activities ([III.A.2-5](#)). Undergraduate and graduate transcripts, as well as contact information for professional references, are collected so that the College may verify qualifications and coursework based on degrees awarded from an accredited institution as it relates to the position applied for. Applicants may also be asked to submit other materials (e.g., letters of reference, teaching evaluations, papers, writing samples), as further evidence of their qualifications and potential to contribute to the mission of the College. As part of the interview process, the screening committee may ask the candidates to present a sample lesson, teaching demonstration, or other role play in order to demonstrate subject-area knowledge and teaching effectiveness.

### **Analysis and Evaluation**

The College evaluates applicants' qualifications and potential to contribute to the institution via an extensive application and screening process. Faculty job descriptions include a detailed list of instructional and non-instructional duties and responsibilities.

**III.A.3 Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.**

### **Evidence of Meeting the Standard**

Duties, academic qualifications, and job descriptions are established by the UH System for all administrators ([III.A.3-1](#)) and other personnel ([III.A.3-2](#)). Position descriptions for administrators and other employees responsible for educational programs and services are reviewed prior to each recruitment by the relevant department/program/unit, hiring authority, and by Human Resources. Descriptions include duties and responsibilities associated with long-term institutional effectiveness, including accreditation, planning, grants, initiatives, assessment, and program review. The College uses these factors in hiring, retention, and promotional decisions.

Hawai'i CC evaluates applicant qualifications via a rigorous application and screening process ([III.A.1-6](#)). Administrators use the same application form as faculty, the application for faculty or executive positions, which requires applicants to list all relevant degrees and other training, professional and teaching experience, scholarly activities, service, honors, or activities, as well as submit transcripts, resumes, references, and other supporting documents ([III.A.2-5](#)).

Similarly, the application for other employees, required for administrative, professional, and technical (APT) positions, requests evidence of qualifications, including educational attainment, training, work experience, professional memberships and/or awards, certifications, and licenses ([III.A.3-3](#)).

### **Analysis and Evaluation**

The College has a well-defined recruiting, screening, and selection process to hire administrators and other employees responsible for educational programs and services with the qualifications necessary for their positions.

**III.A.4 Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.**

### **Evidence of Meeting the Standard**

Hawai'i CC requires that degrees held by faculty, administrators, and other employees be from an accredited institution as evidenced in the "To Apply" section of the position description posted on the Work At UH website ([III.A.4-1](#)). Degrees from institutions outside of the United States are checked for equivalency by referring to the National Association of Credential Evaluation Services ([III.A.1-18](#)).

The College publishes in its printed and online catalog a directory of faculty and staff listing employees and their respective degrees from accredited institutions ([III.A.4-2](#)).

### **Analysis and Evaluation**

The College requires a degree from an accredited institution to meet employee minimum qualifications. Furthermore, the College has a procedure for checking the equivalency for degrees earned from non-U.S. institutions.

**III.A.5 The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.**

### **Evidence of Meeting the Standard**

Hawai'i CC follows established policies and procedures for the performance evaluation of all personnel. The intervals, criteria, and evaluation processes are set forth by UH Systemwide Chapter 9 Personnel BOR policies ([III.A.1-13](#)), executive policies ([III.A.1-14](#)), and administrative procedures ([III.A.1-15](#)); the College's EEO/AA Policy ([III.A.1-16](#)); and appropriate collective bargaining agreements ([III.A.1-17](#)).

BOR Policy RP 9.213 provides guidelines and specific procedures to evaluate executive/managerial (E/M), faculty, and APT personnel periodically ([III.A.5-1](#)). Performance

evaluations are conducted in order to provide assurance to the College and its constituents that professional staff resources and particular areas of expertise are being used to the best advantage. The evaluations also provide for the recognition of excellence and identify areas for improvement.

E/M personnel are expected to perform their duties and responsibilities in a manner that achieves the highest standards of quality and professionalism; they are evaluated annually as specified in BOR Policy RP 9.212 ([III.A.1-7](#)). These evaluations are a critical component of continued employment, professional development, and compensation. In accordance with UHCCP #9.202, the executive employee provides a statement of professional and administrative objectives at the beginning of the evaluation period for that year ([III.A.5-2](#)). These goals include long-term objectives that serve as a basis for incremental planning. At the end of the evaluation period, the executive employee provides a self-assessment to his/her supervisor on the progress made toward goals and strategic outcomes, and accomplishments during the past year in relation to the goals and objectives. The evaluation may also include a survey using the UH System's 360 Assessment Online Evaluation tool ([III.A.5-3](#)) to receive anonymous feedback from peers, constituents, and personnel selected by the supervisor. The confidential results of the evaluation are provided to the supervisor to discuss with the executive employee.

Faculty members submit dossiers at regular and defined intervals, prescribed in the 2017-2021 UHPA-BOR Contract, Article XII, Tenure and Service ([III.A.5-4](#)). Dossiers for faculty include analyses of performance, student ([III.A.5-5](#)) (for instructional faculty) and peer feedback ([III.A.5-6](#)), job duties, and participation in the College and community. During a probationary period, tenure-track employees submit dossiers to apply for contract renewal every two years; after the probationary period, tenured faculty are required to submit a post-tenure review document every five years as specified in UHCCP #9.203 ([III.A.5-7](#)) and HAW 9.203 ([III.A.5-8](#)). These policies recognize the special role of the faculty in the academic mission of the College and provide safeguards for academic freedom as well as the opportunity for participation of faculty peers in the review process. The purpose of the evaluation of faculty is to improve the overall instruction and/or service to students as well as to evaluate the performance of their primary responsibilities and success in meeting institutional needs.

Lecturers are evaluated once each year, once every two years, or once every four years depending on position level as specified by UHCCP #9.104 ([III.A.5-9](#)) and HAW 9.104 ([III.A.5-10](#)). The purpose of the evaluation is to improve overall instruction for students as well as to evaluate the lecturer's performance of teaching duties. The evaluation must include one peer evaluation, student evaluations submitted through eCAFE ([III.A.5-11](#)), and a self-analysis reflecting on the achievement of student learning outcomes, instructional strategies, and effectiveness. The submission must also include any planned actions as a result of the peer and student evaluations and responses to prior evaluation recommendations. The evaluation documents are submitted to the department/division chair (DC) for feedback, including strengths and weaknesses. The DC makes a recommendation to rehire/not rehire to the vice chancellor for Academic Affairs who notifies the lecturer by April 30 if he/she remains in good standing and is eligible for assignment to classes.

Administrative, professional, and technical (APT) personnel are evaluated annually from November 1 to October 31 in accordance with AP 9.170([III.A.5-12](#)) using the UH performance evaluation system ([III.A.5-13](#)). The purpose of the evaluation is to give both the supervisor and

employee the opportunity to discuss performance expectations and recognize exceptional work performance. In accordance with this policy, the supervisor meets with the APT employee at the beginning of the evaluation period to review the position description and work assignments, and to discuss the supervisor's expectations for the evaluation period. If the APT employee believes the performance expectations established by the supervisor are not consistent with the work assignments and position description, the employee may request a review by the appropriate level of authority above the immediate supervisor.

Civil service personnel are evaluated at the initial probationary period of six months, again at the year mark, and annually thereafter. Evaluation procedures follow the performance appraisal system (PAS) of the State of Hawai'i Department of Human Resources Development (DHRD) ([III.A.5-14](#), [III.A.5-15](#)). The purpose of the PAS is to evaluate achievement of position requirements, recognize excellent performance, and address unacceptable performance. The supervisor meets with the civil service employee at the beginning of the evaluation period to review the performance categories and set goals for the employee. Performance issues can be noted on the PAS during the performance monitoring period, and coaching and performance feedback is given to the employee. The appraisal conference is conducted privately to discuss performance effectiveness, help the employee understand how he/she can improve performance, and to provide positive feedback on good performance. This conference also allows the supervisor and civil service employee to begin performance planning for the next rating period and discuss performance expectations/requirements and goals/projects for the coming year.

### **Analysis and Evaluation**

The College adheres to established policies and procedures related to the performance evaluation of all personnel.

**III.A.6 The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of The assessment of learning outcomes to improve teaching and learning.**

Effective January 2018, Standard III.A.6 is no longer applicable. The Commission acted to delete the Standard during its January 2018 Board of Directors meeting.

**III.A.7 The institution maintains a sufficient number of qualified faculty, which includes full-time faculty and may include part-time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes.**

### **Evidence of Meeting the Standard**

As of fall 2016, Hawai'i CC employed a total of 104 qualified faculty to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services ([III.A.7-1](#)). Of these individuals, 86 are instructional faculty and 18 are other faculty positions. The College also has 97 lecturers who are hired on an as-needed basis.

UHCCP #9.237 establishes the standard teaching assignment for full-time community college instructional faculty as 27 semester credits or equivalent per academic year ([III.A.7-2](#)). As prescribed in the 2017-2021 UHPA-BOR Contract, Article IV, Faculty Professional Responsibilities and Workload ([III.A.7-3](#)), faculty workload is not limited to instruction. Instructional faculty of the College may have duties and responsibilities that encompass a number of professional activities in addition to teaching. Programs are responsible for the review of staffing needs in order to achieve the institutional mission and purposes.

Based upon curriculum and enrollment needs, the division or department chair (DC) identifies the total instructional workload requirements to be met for the academic year. Considering the planning, professional objectives, and activities of the faculty, as well as the objectives of the division or department, the DC determines faculty instructional workload in accordance with BOR Policy RP 9.214 ([III.A.7-4](#)). While no formal policy governs the ratio of full-time to part-time/adjunct faculty, the ratio is monitored by the UHCC System and the College to assure compliance with the Standard.

Established positions are allocated by State Legislature as shown on the College's organizational chart([III.A.7-5](#)). Programs review instructional needs for all delivery modes and submit requests for additional faculty in comprehensive program ([III.A.7-6](#)) and unit reviews ([III.A.7-7](#)), which are reviewed by the College Effectiveness Review Committee (CERC). When an instructional faculty position is vacated by retirement, termination, or resignation, the deans and vice chancellor for Academic Affairs (VCAA) determine if the position should be recruited for replacement. The VCAA then submits personnel recommendations to the chancellor for resource allocation discussion at the campus level. If a position is needed that is not allocated in the general funds, it may be created at the campus level as a temporary position funded by tuition and fees.

As described in Standards III.A.1 and III.A.2, applicants for faculty employment must meet minimum qualifications and supply credentials, including documentation and official transcripts to verify education and experience. Final decisions on hiring are made at the chancellor level.

### **Analysis and Evaluation**

The College maintains a sufficient number of faculty to meet enrollment demand. Lecturers are hired as needed when enrollment and other workloads increase. As a component of reorganization and budgetary planning processes, the College divisions and departments identify staffing needs to fulfill institutional missions and goals.

**III.A.8 An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.**

### **Evidence of Meeting the Standard**

The College website provides a number of online resources for all faculty. The Faculty and Staff page contains links to a variety of resources, including evaluation and professional development information. The College's Employee Handbook([III.A.8-1](#)) is available online and addresses

employee matters and issues for all College employees. The handbook includes information about the College, documents and resources, policies and procedures, campus communication, campus services, professional development, and emergency procedures.

Division/department chairs provide orientation and oversight for lecturers (adjunct faculty). As outlined in Standard III.A.5, the College has established policies and procedures related to the performance evaluation of all personnel. Lecturers are evaluated as specified by UHCCP #9.104 ([III.A.5-9](#)) and HAW 9.104 ([III.A.5-10](#)). Lecturers teaching at least half-time are members of the faculty collective bargaining unit and are covered by the collective bargaining agreement.

Professional development covering a wide range of topics is provided to all faculty, including lecturers, during convocation week ([III.A.8-2](#)) and throughout the year ([III.A.8-3](#)). All workshops are free and are offered to all faculty, lecturers, and staff. The College has also sent lecturers to select conferences, including the annual Hawai'i Strategic Institute (HSI)/Hawai'i Student Success Institute (HSSI)([III.A.8-4](#)) and the Hawai'i Great Teachers Seminar([III.A.8-5](#)).

### **Analysis and Evaluation**

Hawai'i CC online information and division/department orientations provide lecturers with necessary information about the College and their specific division/departments. Convocation week offers workshops and events to all faculty and staff to provide opportunities for integration into the College culture and campus activities. The College provides year-round support and training to all interested faculty. Division/department chairs oversee lecturer performance and regular evaluation of lecturers is directed by System and College policies.

**III.A.9 The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. (ER 8)**

### **Evidence of Meeting the Standard**

As of fall 2016, Hawai'i CC employed a total of 128 qualified staff to support the effective educational, technological, physical, and administrative operations of the institution ([III.A.9-1](#)). Of these individuals, 67 are administrative, professional, and technical (APT) positions and 61 are civil service positions.

APT positions include professional, non-faculty positions that require a baccalaureate degree, such as research associates, educational specialists, administrative officers, auxiliary and facilities services personnel, and human resources specialists. The classification and compensation of each pay band is established by the University of Hawai'i Office of Human Resources (OHR) ([III.A.9-2](#)). The College has Band A and B APT positions based on a salary schedule for 9-month and 11-month employees ([III.A.9-3](#)), assigned to pay bands ([III.A.9-4](#)) based on work complexity and scope of responsibility:

- Band A – Entry / Intermediate / Independent Level Worker
- Band B – Journeyworker / Senior Worker / Working Supervisor

Civil service positions include a variety of occupations relating to clerical, library support, property protection, nursing, medical support, labor, custodial, trades, and equipment operation.

The OHR is delegated authority to classify civil service positions. The State of Hawai‘i Department of Human Resources Development (DHRD) ([III.A.9-5](#)) maintains the Class Specifications and Minimum Qualification Requirements and Compensation Plan ([III.A.9-6](#)) for each position.

Established positions are allocated by State Legislature as shown on the College’s organizational chart ([III.A.7-5](#)). When a position is vacated by retirement, termination, or resignation, the manager, division/department chair, or vice chancellor determines if the position should be recruited for replacement as a part of the strategic planning process. The vice chancellor submits personnel recommendations to the chancellor for resource allocation discussions at the campus level. If a position is needed that is not allocated in the general funds, it may be created at the campus level as a temporary position funded by tuition and fees. Requests for additional positions are included in the comprehensive program and unit reviews that are completed every three years. Based on evaluations of comprehensive reviews, if a new position needs to be created, supervisors work in consultation with Human Resources representatives to determine the duties, responsibilities, and the minimum qualifications of the position.

As described in Standard III.A.1, applicants for employment must meet minimum qualifications and supply credentials, including documentation and official transcripts to verify education and experience, which are required upon offer of employment as described in the “To Apply” section of each position posted on the Work at UH website([III.A.4-1](#)). Final decisions on hiring are made at the chancellor level.

Names and biographical information about administrative staff are located in the catalog ([III.A.9-7](#)).

### **Analysis and Evaluation**

The College maintains a sufficient number of staff with appropriate credentials to provide operational and administrative support. Program and unit review and assessment provide a venue to assess capacity needs in support areas to fulfill institutional missions and goals.

**III.A.10 The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes. (ER 8)**

### **Evidence of Meeting the Standard**

As specified in Executive Policy EP 9.212 ([III.A10-1](#)), individual executive/managerial (E/M) positions are established with specific duties and responsibilities that reflect managerial and leadership requirements necessary to carry out the strategic mission of the University. Only the University of Hawai‘i president has the authority to establish, amend, or abolish E/M positions, except for positions that report directly to the BOR or to the president. While no formal administrative staffing ratios are established, the staffing levels for E/M employees are reviewed and compared across the UHCC System.

Hawai‘i CC has a total of seven E/M positions ([III.A.9-7](#)):

- Chancellor
- Vice Chancellor for Academic Affairs
- Vice Chancellor for Student Affairs
- Vice Chancellor for Administrative Affairs
- Director, EDvance (formerly Office of Continuing Education and Training)
- Director, Hawai‘i CC – Pālanui (University of Hawai‘i Center at West Hawai‘i)
- Dean of Career and Technical Education
- Dean of Liberal Arts and Public Services

As outlined in Standards III.A.1 and III.A.3, applicants for E/M employment must meet minimum qualifications and supply credentials, including documentation and official transcripts to verify education and experience. Final decisions on hiring are approved by the president or BOR. E/M positions are provided with University Leadership Orientation as specified in Executive Policy EP 2.211 ([III.A.10-2](#)).

### **Analysis and Evaluation**

The College maintains a sufficient number of executive/managerial positions as compared to other UH community colleges. As the College takes steps to fill positions held by interim appointees, executive and managerial leadership has remained focused on the College’s mission and the goals of the Strategic Directions 2015-2021.

**III.A.11 The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.**

### **Evidence of Meeting the Standard**

Personnel policies are established and published at multiple levels, including BOR policies ([III.A.1-13](#)), UH executive policies ([III.A.1-14](#)), UH administrative procedures ([III.A.1-15](#)), UHCC System Section 9 policies ([III.A.1-16](#)), State of Hawai‘i Department of Human Resources Development (DHRD) policies ([III.A.11-1](#)), and College policies ([III.A.11-2](#)). Additionally, collective bargaining agreements govern personnel actions for covered employees ([III.A.1-17](#)).

The College’s personnel policies and procedures (Section 9) are available for review on the College’s website ([III.A.11-3](#)). New or revised policies and procedures are developed using a collaborative decision-making process with appropriate participation and consultation. The Human Resources office helps to ensure that personnel policies and procedures are equitably and consistently administered for the fair treatment of all personnel.

### **Analysis and Evaluation**

The Colleges establishes, publishes, and adheres to written personnel policies and procedures.

**III.A.12 Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.**

### **Evidence of Meeting the Standard**

Hawai‘i CC is committed to providing appropriate programs, practices, and services that support its diverse personnel. The College maintains clear policies and procedures for employment equity and diversity consistent with its mission.

The College adheres to a policy of nondiscrimination and equal opportunity in all personnel actions in accordance with the principles of Equal Employment Opportunity and Affirmative Action (EEO/AA) under BOR Policy RP 1.205 ([III.A.12-1](#)), Executive Policy EP 1.202 ([III.A.12-12](#)), Administrative Procedure AP 9.890 ([III.A.12-3](#)), and Hawai‘i CC Policy HAW 9.900 ([III.A.1-16](#)), which includes a commitment to “stress individual qualifications and prohibit discrimination on the basis of race, color, national origin, sex (including sexual harassment), religion, ancestry, age, marital status, disability, arrest/court record, sexual orientation, breastfeeding and National Guard participation.”

Formal EEO/AA analysis is conducted by the UHCC System on a regular basis and is incorporated into the recruitment/hiring processes. The College has an affirmative action program that complies with federal contractor requirements for data collection, workforce analysis, identification of problem areas, placement goals or benchmarks, outreach and recruitment, measuring affirmative action efforts, and taking remedial action when necessary.

As part of the affirmative action program, the director of UHCC EEO/AA develops affirmative action plans (AAP) for minorities and women in accordance with federal contractor requirements on an annual basis. In addition, the director develops an affirmative action plan for protected veterans and individuals with disabilities (Part II) prepared in accordance with federal contractor requirements ([III.A.12-4](#)). Faculty/staff with disabilities can seek assistance with the Human Resources office.

The director of UHCC EEO/AA works closely with the campus EEO/AA coordinator to monitor employment practices and recruiting and hiring decisions to ensure compliance with the laws. The campus EEO/AA coordinator oversees all aspects of the employment process, beginning with the selection of screening committee members and approval of interview questions before applications are reviewed, in addition to providing support for the College’s diverse personnel.

The College is committed to creating a culture of equality, acceptance, and respect for all members of our campus community regardless of race, ethnicity, gender identity or sexual orientation in accordance with the UH System Commission on Lesbian, Gay, Bisexual, Transgender and Queer+ (LGBTQ+) Equality and with relevant EEO/AA policies ([III.A.12-5](#)).

The College also participates in the UH System’s Safe Zone program ([III.A.12-6](#)), with goals of promoting social justice and fostering a safe and inclusive community for LGBTQ+ students, faculty, and staff. Offices, faculty, and staff that have completed the Safe Zone training program may display the Safe Zone Ally poster. In addition, a list of faculty and staff members who have declared that they are allies and advocates is posted on the College’s website ([III.A.12-7](#)).

## Analysis and Evaluation

The College is committed to a policy of nondiscrimination and equal opportunity in employment decisions and strives to promote diversity through its programs, practices, and services to foster a culture of equality, acceptance, and respect for all members of campus.

**III.A.13 The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.**

### Evidence of Meeting the Standard

All personnel at the College are considered State of Hawai‘i employees and therefore governed by the State Ethics Code, Chapter 84, Hawai‘i Revised Statutes ([III.A.13-1](#)). All state employees must exhibit the highest standard of ethical conduct regarding gifts, confidential information, fair treatment, conflicts of interest, and disclosure. The statute also describes disciplinary action for violations.

Faculty and lecturers at the College are guided by a Statement of Professional Ethics in accordance with UHCCP #5.211([III.A.13-2](#)) based on the adoption of the American Association of University Professors Statement on Professional Ethics ([III.A.13-3](#)). This policy reinforces expectations and standards that faculty must strive to achieve in recognition of the special responsibilities placed upon them. The statement provides guidance in such matters as intellectual honesty, academic freedom, responsibilities to students, respect for colleagues, and impressions when speaking or acting as citizens.

BOR Policy RP 12.201 also sets forth ethical standards of conduct in research and scholarly activities ([III.A.13-4](#)). Executive Policy EP 12.211 sets forth policies and procedures for responding to allegations of research and scholarly misconduct ([III.A.13-5](#)). When a formal allegation is rendered, the procedures provide due process rights as specified in the appropriate collective bargaining agreements to ensure that any decisions rest on evidence fully and fairly assessed.

In addition, Administrative Procedure AP 8.025 outlines responsibilities of employees who perform or have authority for fiscal and administrative functions ([III.A.13-6](#)).

The College provides annual training for all employees regarding ethics, conflicts of interest, Title XII, Title IX ([III.A.13-7](#)), and sexual harassment.

All employees are also required to file the University of Hawai‘i Conflicts of Interest Disclosure Form Part I ([III.A.13-8](#)) in accordance with Executive Policy EP 12.214 ([III.A.13-9](#)). When a conflict of interest situation arises, the guidelines in Administrative Procedures AP 5.504 ([III.A.13-10](#)) set forth policies and procedures for determining the appropriate action for conflict resolution and possible implementation of a management plan. Further review may be conducted by other senior administrators and the University of Hawai‘i Office of Research Services (ORS) ([III.A.13-11](#)); the case may also be referred to the Conflicts of Interest Committee to prepare written recommendations for management or elimination of the conflicts of interest.

## Analysis and Evaluation

The College has established policies and procedures related to the professional ethics of all personnel. The College ensures the dissemination of information at the time of hiring and through ongoing, annual training and activities to further awareness. Clear policies and procedures are in place to address potential violations.

**III.A.14 The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.**

## Evidence of Meeting the Standard

The College's commitment to promoting lifelong learning within our *Kauhale* is also demonstrated with its support for the professional development of its faculty and staff. One of the College's 2017-18 institutional priorities (called Wildly Important Goals) is "Strengthening *Kauhale* through its human capital." Hawai'i CC promotes professional development opportunities for all personnel through campus-based workshops, professional training, local and national conferences, study abroad ([III.A.14-1](#)), and sabbatical leave ([III.A.14-2](#)).

Faculty and staff have attended national and international conferences to enhance job knowledge and stay current with trends in higher education programs and services. Recent conferences attended include the following:

- SCUP-52 ([III.A.14-3](#)), Society for College and University Planning - "We Strengthen and Transform Higher Education"
- NAFSA: Association of International Educators
- Strategic Enrollment Planning Executive Forum
- Community Colleges for International Development
- American College Counseling Association (ACCA) Conference
- International Union for Conservation Networks
- Council on Adult and Experiential Learning
- Association for Tropical Biology and Conservation (Merida, Yucatan, Mexico)
- Conference of the Americas on International Education & The Meeting of the Inter-American Space for Technical and Technological Higher Education (Montreal, Quebec, Canada)
- Transatlantic Connections (Bundoran, Donegal, Ireland)

The College and UHCC System support numerous professional development activities, including the following:

- The President's Emerging Leaders Program (PELP)([III.A.14-4](#))
- WO Learning Champions ([III.A.14-5](#))
- Community College Leadership Champions ([III.A.14-6](#))
- Hawai'i Student Success Institute ([III.A.8.4](#))
- Hawai'i Great Teachers Seminar ([III.A.8-5](#))
- Innovative Educators Webinars ([III.A.14-7](#))

- APT/Civil Service Professional Development Day ([III.A.14-8](#))

The College purchased a subscription to provide all personnel with a library of professional development webinars. The Innovative Educators webinar calendar provides a timeline of more than 150 live webinars per year ([III.A.14-9](#)). For those who prefer on-demand webinars, a library of over 100 training topics is available, including At-Risk Populations, Campus Safety, Organizational Development, Student Success, Teaching & Learning, Technology, and Title IX ([III.A.14-10](#)).

Throughout the year, the Faculty/Staff Development Committee ([III.A.14-11](#)) coordinates professional development activities to help create a campus culture that emphasizes continuous learning and growth, to create opportunities for faculty and staff develop their skills to further their careers, and to build unity and familiarity across the campus. The Professional Development Workshops calendar ([III.A.8-3](#)) serves as a resource for professional development and includes topics of interest such as campus safety ([III.A.14-12](#)), how to support those in crisis ([III.A.14-13](#)), and electricity savings ([III.A.14-14](#)). Participants complete evaluations to provide feedback to the presenters and to the committee; feedback is used as the basis for future professional development planning and improvements.

In conjunction with the Faculty/Staff Development Committee, the Instructional Technology Support Office (ITSO) ([III.A.14-15](#)), part of the Academic Support unit, researches and provides training for new technologies and strategies that enhance the achievement of student learning outcomes. In addition to regular campus workshops to refresh or refine skills related to online course development, Google applications, and other technologies ([III.A.14-16](#)), ITSO also administers the Online Course Development Program (OCDP) annually. The OCDP is an intensive training that covers online course development strategies, use of *Laulima* (UH learning management system) tools, and federal and College expectations of online courses; follow-up training and evaluation is conducted throughout the completion of the course development and teaching of the online class ([III.A.14-17](#)). ITSO uses data gathered from workshop evaluations, OCDP evaluations, and campus wide surveys to inform future trainings.

All College personnel are eligible to apply for University of Hawai'i tuition waivers ([III.A.14-18](#)). These waivers allow qualified employees to take classes at any of the UH campuses, up to six credits per semester. This practice encourages personnel to remain “lifelong learners.”

The College identifies professional development needs and sufficiency of learning opportunities through campus climate surveys. As a follow up, EDvance (formerly the Office of Continuing Education and Training–OCET) sent out a survey to college staff and conducted in-person surveys to identify topics of interest for future trainings. The culmination of this effort was the first APT/Civil Service Professional Development Day in fall 2017, which was run in-house using a conference format with multiple workshops to choose from.

Other means to identify professional development needs come through use of the Institutional Change Assessment Tool ([III.A.14-19](#)), program/unit reviews, performance evaluations with supervisors, and open-house discussions with the chancellor.

## Analysis and Evaluation

The College provides a wide range of professional development opportunities for employees, including campus based trainings; Systemwide leadership development programs and conferences; state, national, and international travel grants; online webinar access; long-term sabbatical leaves; and college tuition waivers. Evaluations of professional development activities are used for future planning and improvement efforts.

**III.A.15 The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.**

## Evidence of Meeting the Standard

The College's Human Resources office maintains the security and confidentiality of personnel records in accordance with state and federal laws, regulations, and rules. Personnel files for faculty and APT employees are maintained at the College, E/M and civil service personnel records are maintained by the University of Hawai'i Office of Human Resources (OHR) ([III.A.9-2](#)) and student employee records are maintained by supervisors.

Employees may view their personnel records by appointment by contacting the Human Resources office. Procedures governing an employee's access to their records are found in AP 9.025 ([III.A.15-1](#)). This procedure complies with the provisions of the Fair Information Practice Act to provide confidentiality of personal records and access to an employee's personal records in accordance with Hawai'i Administrative Rules, Title 20, University of Hawai'i, Chapter 16, Personal Records ([III.A.15-2](#)). Under this procedure, employees seeking access to their records submit a request form to the designated custodian of the personal record.

The College makes provisions to maintain and secure E/M, faculty, and APT personnel records in accordance with AP 9.075 ([III.A.15-3](#)). This procedure also governs an employee's access to their records in accordance with the Disclosure of Personal Records ([III.A.15-4](#)) under Part III of the Uniform Information Practices Act (UIPA), Chapter 92F of the Hawai'i Revised Statutes (HRS) ([III.A.15-5](#)).

Civil service personnel records are maintained and secured by OHR under State of Hawai'i Department of Human Resources Development DHRD Policy 701.002 ([III.A.15-6](#)). Procedures to access these records are in accordance with the Disclosure of Personal Records ([III.A.15-7](#)) under Part III of the Uniform Information Practices Act (UIPA), Chapter 92F of the Hawai'i Revised Statutes (HRS) ([III.A.15-8](#)).

All personnel records are kept in a locked filing cabinet inside a secure room accessible only to authorized individuals, including Human Resources staff and the vice chancellor for Administrative Affairs. The grand master key held by security personnel will not open the doors to these secure rooms.

All computer monitors in the Human Resources office have a privacy filter to protect information from unauthorized personnel who may walk into the office without an appointment. Human Resources staff members are trained to protect the confidentiality of any open personnel records or documents by covering the file or minimizing the document on their computer screen.

Any UH employees, including student hires, that access sensitive information are required to sign UH Form 92 - General Confidentiality Notice ([III.A.15-9](#)). This form acknowledges that the employee understands that sensitive and confidential information must be protected in accordance with EP 2.210 ([III.A.15-10](#)), which provides policies and practices for the acceptable use and management of all information technology resources, and EP 2.214 ([III.A.15-11](#)), which provides the framework for specific practices and procedures associated with systems and files that contain sensitive, personal, and confidential information.

Confidential files that are transferred between campuses are marked “CONFIDENTIAL” and sent via U.S. Mail or delivered by authorized personnel. Electronic files that are confidential are sent via the UH FileDrop system which uses SSL to send an encrypted email to the specified recipient with a randomly generated URL to download the file(s) ([III.A.15-12](#)). As an additional level of protection, the “Require Authentication” checkbox is used to require the UH login and password of the intended recipient. The recipient must have both the random URL and UH username and password in order to download any files. The sender also selects a file expiration date between 1 to 7 days. The email sent to the recipient contains the date and time at which the files will be deleted.

### Analysis and Evaluation

All College personnel records are locked in a secure room with restricted access. Procedures governing the secure transfer of files are strictly observed. Employees may request to view their personnel records by following established procedures.

## III.B. Physical Resources

**III.B.1 The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.**

### Evidence of Meeting the Standard

The College offers courses, programs, and learning support services at the following three primary campuses ([III.B.1-1](#)):

**Manono campus.** The Manono campus, located in Hilo, consists of 20.7 acres with 27 buildings, some used by the University of Hawai‘i at Hilo (UH Hilo). Facilities include a cafeteria, a student learning and testing center, faculty offices, a business office, counseling offices, admissions and records offices, administrative offices, an academic computing support office, classrooms, labs, facilities and maintenance offices, and vocational shops.

**UH Hilo campus.** The UH Hilo campus, located a half mile from the Manono campus, is situated on approximately 115 acres and includes space for the College’s general education, business education, and technology classes, as well as faculty offices, vocational shops, and the Learning Center (TLC). The College also shares facilities with UH Hilo, including the Edwin H. Mookini Library, the Kilohana Center, the Campus Center, the theatre, and the bookstore. In addition, the campus includes athletic facilities such as tennis courts, playing fields, and a fee-based student life center with weight rooms and a swimming pool. Hawai‘i CC and UH Hilo also

share an off-campus 110-acre farm lab, Hilo Pana‘ewa Agricultural Park, which consists of a small office building, numerous greenhouse structures, crop fields, and auxiliary buildings for livestock.

**Pāalamanui campus.** The Pāalamanui campus is located in Kailua-Kona, approximately 75 miles west of the Manono campus. The five buildings on this 78-acre site house classrooms, vocational labs, a computer lab, a library/learning center, and support services. In addition to delivering Hawai‘i CC classes, the Pāalamanui campus also hosts the University of Hawai‘i Center, West Hawai‘i, which provides access to distance programs delivered by other UH campuses.

To meet the demand for higher education across the island, the College began offering courses in West Hawai‘i in the 1980s in 12,500 square feet of leased space in a retail center. After obtaining funding from the state and Pāalamanui LLC, the Pāalamanui campus was built and the College began teaching classes there in fall 2015. With 24,000 square feet of learning space dedicated to serving students, the new facility has space for courses, programs, and learning support services ([III.B.1-2](#)).

In addition to the locations that are maintained by the UH System, Hawai‘i CC also offers classes at schools across Hawai‘i island. Classes are offered at Hilo High School, Ke Kula o Ehunuikaimalino, Kea‘au High School, Kealakehe High School, Konawaena High School, Pāhoā High School, and Waiākea High School. These facilities are maintained by the administration at each of the school sites.

The UH System, the UHCC System, and the College share responsibility for providing safe and sufficient physical resources. Major capital projects are managed by the UH System. Minor projects, including all maintenance and health and safety repairs, and projects that require professional design consultants are managed by the UHCC Office of Facilities and Environmental Health (FEH). When appropriate, the FEH assigns its environmental safety specialist to investigate and recommend remediation of code and safety needs. The UHCC System also supports the College by acquiring and allocating Capital Improvements Program (CIP) funding and implementing construction projects on the campus.

The College conducts regular physical inspections and requests assistance from the FEH office to assess or evaluate health and safety issues, code compliance, etc. The Auxiliary and Facilities Services (AFS) manager oversees the planning and maintenance of the campus and serves as the primary campus liaison with the FEH. Limited Fire and Safety audits are conducted annually by the UHCC environmental safety specialist to identify fire code violations. When the need arises, FEH representatives and the Hawai‘i CC vice chancellor for Administrative Services also conduct physical inspections of the campuses to evaluate federal, state, and county requirements regarding building codes, Americans with Disabilities Act (ADA) compliance, and repair/maintenance issues. Inspections are also used to evaluate project requests made by the College and to identify facilities in need of health and/or safety upgrades (see also Standard [III.B.2](#)).

The College also evaluates the safety and sufficiency of physical facilities during annual unit and program reviews, which include an analysis of health and safety needs ([III.B.1-3](#)). The vice

chancellor for Administrative Services and the AFS manager review and prioritize requests based on the impact to instruction and services. Units and programs may also use their departmental funds for modifications or improvements.

In addition, faculty and staff may submit facility modification requests, which are evaluated based on need and alignment with program and unit reviews. Unsafe facilities can be reported by calling the Planning, Operations, and Maintenance (POM) office, emailing the AFS manager, or submitting a request through eFacilities, a computerized maintenance management system, which is discussed in Standard III.B.2.

Facility and technology needs for Hawai'i CC Distance Education (DE) and off-site classes are determined by each individual program, taking into account the needs of the students and the availability of physical space with the required technology. Program needs for distance learning can be submitted via the comprehensive review process, further detailed in Standard III.B.2.

The Hawai'i CC Security office, which operates 24 hours a day, 365 days a year, is responsible for public safety at the Manono and Pālanui campuses. The office is responsible for numerous campus safety and security programs, including emergency management, community safety and security education, and physical security, including security technology, behavioral threat assessment, and special event management ([III.B.1-4](#)). To provide safe and secure access to its campuses, Hawai'i CC Security controls vehicular access to the Manono and Pālanui campuses via gates at the driveways entering the campuses.

For the UH Hilo campus, the UH Hilo administration ensures that facilities have appropriate access, safety, and security.

All three campuses are ADA compliant, providing accessible walkways and buildings and requisite handicap parking stalls. In summer 2016, upgrades were completed on the installation of three automatic door openers for ADA access. Also, each campus has clearly identified all-gender restrooms([III.B.1-5](#), [III.B.1-6](#), [III.B.1-7](#)).

The College conforms to requirements established by the federal Jeanne Clery Disclosure of Campus Security Policy and Crime Statistics Act (Clery Act), which include security and facilities access, crime reporting procedures, crime prevention programs, and the relationship between campus security and local law enforcement. As part of the reporting process mandated by the Clery Act, the security environment of the campus is assessed annually ([III.B.1-8](#)). Campus security authorities receive annual training relevant to their responsibility to report conditions that jeopardize student safety. The UHCC also provides training and oversight for compliance with Clery Act and workplace violence reporting and training. In addition, UHCC Policy #11.600 provides guidance regarding continual development and implementation of safety and security matters, including conditions for hiring and training college security officers ([III.B.1-9](#)). In summer 2016, the UHCC System provided funding to improve door hardware and locking systems to support security in the event of a campus lock-down.

In regards to safety and hazardous materials, the UHCC System provides periodic campus inspections and training services through the environmental health and safety specialist (EHSS).

The EHSS conducts training on hazardous materials awareness and hazardous waste management procedures as well as periodic facility inspections and safety consultations for faculty and staff, providing special attention to instructional programs and courses that use hazardous materials, such as auto body, auto mechanics, and chemistry ([III.B.1-10](#)). The college also maintains a Hazardous Materials/Hazardous Waste Management program ([III.B.1-11](#)).

The following practices are also in place to assure access, safety, security, and a healthful environment:

- UH Systemwide email and cell phone alert system for emergency notification
- Emergency call boxes with blue identification lights ([III.B.1-12](#))
- Automated External Defibrillators (AED) located throughout campuses and associated training provided([III.B.1-13](#), [III.B.1-14](#))
- Security cameras at the Manono and Pālanui campuses
- Campus directory and maps located throughout campuses

### **Analysis and Evaluation**

The UH System, UHCC System, and the College work collaboratively to provide safe and secure access to physical resources at all locations where it offers courses, programs, and learning support services through effective safety and maintenance processes. Facilities are inspected annually and evaluated with awareness of health, safety, and accessibility issues. All buildings on all three campuses are accessible and ADA compliant. Campus security personnel are well-trained and on patrol year-round. The UHCC System's FEH provides assistance in the management of hazardous materials and waste, and performs safety inspections. College personnel are able to report safety and resource concerns via POM, the online maintenance management system, and program and unit reviews.

**III.B.2 The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.**

### **Evidence of Meeting the Standard**

Hawai'i CC engages in ongoing maintenance of its existing physical resources and develops plans to meet the changing needs of the College community.

On a regular basis, campus buildings and grounds are monitored by building occupants, janitorial/custodial/maintenance staff, and security personnel. Faculty and staff participate in the maintenance of physical resources by reporting and requesting services through eFacilitiesAiM ([III.B.2-1](#)), a computerized maintenance management system that is used for campus work requests. As work requests are submitted via eFacilitiesAiM, the AFS manager conducts a visual inspection of the campus facilities, equipment, and grounds to assess needs for acquiring, maintaining, repairing, or upgrading resources. Facilities or equipment that have received multiple requests or complaints are carefully monitored. Smaller scale repairs and maintenance are undertaken using campus financial resources and personnel.

Every three years, programs and units submit comprehensive reviews, which include requests for maintenance and upgrades of facilities and equipment for the purpose of achieving program and unit outcomes ([III.B.2-2](#)). In the comprehensive review, programs and units assess effective utilization of their resources and determine their needs for the development and growth of their programs and units, aligning needs with the mission, vision, learning outcomes, and strategic directions. Once the comprehensive review is submitted, the College Effectiveness Review Committee (CERC) evaluates the information provided in the report. The CERC evaluation is submitted to the campus administration for their review and prioritization of any requested facilities and equipment purchases, repairs, or replacements ([III.B.2-3](#)).

To modify, renovate, expand, or update a facility, programs and units submit a facilities modification request form ([III.B.2-4](#)). Upon approval by the campus administration and the UHCC System Office of Capital Improvements, the requested modification is added to the Hawai'i CC Capital Improvements Program (CIP). Approved projects require funding from either the campus or the UHCC System. A need for additional DE facilities can also be requested by the program via a facilities modification request form. This form is first reviewed by the campus administration; once approved, it is sent to the Facilities and Environmental Health Office (FEH) for approval. If approved by FEH, it returns to the College and is added to the Hawai'i CC Repair, Maintenance and Renovation Projects list for tracking and prioritization.

When the cost of purchase, repair, maintenance, or upgrade is more than \$25,000, the campus must contact the UHCC System for possible funding. At the UHCC System level, projects are prioritized by weighing the relative importance of each project against the needs of the seven UHCC campuses. Priorities are determined by considering multiple factors, including, but not limited to, work order occurrences, failure of systems, complaints from users, and long-range plans. Funding is appropriated by the Hawai'i State Legislature in three categories: Capital Renewal and Deferred Maintenance (CRDM), Minor CIP, and Major CIP Line Item Projects.

CRDM is prioritized by each campus, taking into account the predictable lifetimes of facility sub-systems and the facilities that have failing sub-systems. Funding is allocated as a "lump sum" to the UHCC System, and projects are prioritized by the UHCC System to remediate or eliminate the code and safety needs of the campuses. Minor CIP include projects that are estimated at less than \$5 million and that modernize classrooms/learning environments. Major CIP Line Item Projects typically exceed \$5 million and include new construction and renovation projects.

For DE, technology support is shared by the UH System, which provides major enterprise systems and the UH technical infrastructure, and by the colleges, which provide on-campus support for students and staff using technology resources. The UH System has a high-speed digital network connecting all campuses, learning centers, libraries, and Department of Education (DOE) schools. The College provides teaching and learning space as well as DE equipment needs such as video conference equipment, which is maintained by the Media Services unit of Academic Support.

### Analysis and Evaluation

Through ongoing evaluation and the use of a computerized maintenance management system, the College regularly identifies problems and maintains the physical resources of the campuses. Program and unit reviews, integrated planning processes, and facilities modification requests enable administrators to evaluate the effective use of facilities and equipment and prioritize the anticipated needs of the campus.

**III.B.3 To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.**

### Evidence of Meeting the Standard

As described in Standards III.B.1-2, the College evaluates the effectiveness of its facilities and equipment regularly via several processes, including program and unit reviews, and collaborates with the UH and UHCC Systems to monitor and prioritize repair and replacement needs.

Hawai'i CC participates in the UHCC System annual Facilities Renewal Reinvestment Model (FRRM) that documents the backlog of maintenance and estimates the annual funding required for ongoing capital reinvestment. The FRRM uses campus building information and life-cycle methodology to estimate deferred maintenance and future capital repair needs ([III.B.3-1](#)). Visual inspections are also conducted as needed in conjunction with the FEH, and evaluations are made regarding the prioritizing of new projects ([III.B.3-2](#)).

Current efforts to avoid underutilization of classroom space include analysis of room usage for possible repurposing. Currently, certain rooms are assigned to specific departments or academic programs, while other campus facilities are assigned by POM. Each program oversees the use of the classroom space allocated to the program; rooms are scheduled according to the needs of the program, including DE course needs. To use classrooms and other facilities, instructors must follow the Hawai'i CC Facilities Use Practices, Procedures and Terms of Use ([III.B.3-3](#)).

The College works with UH Hilo to effectively use space on the shared Hilo campuses.

### Analysis and Evaluation

The UHCC System provides support for physical resources through the FRRM report and the regular maintenance schedule. The College ensures that facilities and equipment are regularly evaluated and that improvements are made to support programs, services, and student learning.

**III.B.4 Long range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.**

### Evidence of Meeting the Standard

Major projects are submitted through the UH System Office of Project Delivery, formally the Office of Capital Improvements ([III.B.4-1](#)). As described in Standard III.B.2, projects are prioritized at the UHCC System level by weighing the relative importance of each project against

the needs of the seven UHCC campuses. At the UHCC level, the UHCC Associate Vice President for Administrative Affairs oversees major repair and maintenance projects ([III.B.4-2](#)).

The UHCC System has developed a 6-Year Vision & Plan, which spans 2018-2023 ([III.B.4-3](#)). Currently, UHCC's focus is to implement a building and grounds maintenance program that minimizes deferred maintenance while enhancing student learning through the creation and implementation of design standards for classrooms and laboratories that reflect modern teaching approaches. UHCC is also committed to ensuring that equipment is current and meeting industry standards, and to developing and maintaining a high-speed digital environment on all campuses, consistent with the facilities-related strategic plan.

The UHCC Strategic Directions 2015-2021 provides a vision for modern teaching and learning environments at UHCC campuses ([III.B.4-4](#)). To address DE needs, UHCC commits to ensuring that the digital networks are constructed and maintained in a manner that takes full advantage of the UH intercampus network. Working with UH Information Technology Services and drawing on the planning work of the Modern Facilities Task Force, UHCC assesses all of its internal campus networks to assure that they provide the required high-speed connectivity to teaching and learning spaces, to business operations, and to students in general ([III.B.4-5](#)). Necessary upgrades are implemented based on this assessment. DE needs that exceed the funds available at the campus level are incorporated into the Hawai'i CC long-range capital goals and submitted to the UHCC System for review and inclusion in the UHCC 6-Year Vision & Plan ([III.B.4-4](#)).

Directly aligned with the UHCC Strategic Directions 2015-2021, Hawai'i CC's Strategic Directions 2015-2021 ([III.B.4-6](#)) are used to prioritize budget requests for projects that will be submitted to the UHCC System and to the Hawai'i State Legislature. In accordance with state law, UH submits a biennium budget request to the governor and legislature for their consideration during the regular legislative session; supplemental budget requests may also be submitted.

Hawai'i CC's long-range capital goals reflect the projected costs of facilities and equipment. The College's institutional planning incorporates planning for new facilities and equipment, with input provided by the administrative team; unit, division, and department chairs; and CERC evaluation of program and unit reviews.

The College has developed Long Range Development Plans (LRDPs), which incorporate institutional improvement goals and provide facility cost projections. For new facilities, the total cost of ownership is managed by the UH System and UHCC System, while the UHCC FEH considers the total cost of ownership when implementing projects. Considerations in the total cost of ownership include purchase cost, maintenance, and lifespan. The LRDPs include site considerations, program planning, planning criteria, site utilizations, alternative site plans, ultimate plans, architectural barrier-free programs, design guidelines, implementation and transitional plans, and cost estimates. The College currently has three LRDPs: two for a Hilo campus and one for the Pālanui campus.

For the Hilo campus, two plans have been developed. The first is the Hawai'i CC Manono Campus Long Range Development Plan 2010 Revision and Update, the most recent in a series of

plans for a consolidated campus in Hilo ([III.B.4-7](#)). This plan details an expanded campus at the Manono site and addresses needed infrastructure upgrades to aging facilities. More recently, an alternative plan was created, the Hawai‘i CC Long Range Development Plan Update 2025 ([III.B.4-8](#)), which proposes relocating the College to a new site approximately 2.6 miles away from the current Manono campus location. Both plans consolidate services to one location with adequate facilities, including new buildings, additional parking, and improved communal areas ([III.B.4-9](#)). This consolidation will assist the College in accomplishing its mission, improving support of student achievement and helping us reach our 21st Century Facilities strategic direction. Currently, the LRDP for Manono campus is being revised and updated for presentation to the BOR in 2018.

The College’s plan for the Pālanui campus is found in the University of Hawai‘i Center – West Hawai‘i Long Range Development Plan 2009 Revision and Update ([III.B.4-10](#)). Updating the original LRDP that was completed in 1998, this plan addressed changes in the West Hawai‘i community, progression of nearby development projects, and the Environmental Impact Statement completed in 2000. It maps the development of the new, permanent Pālanui campus in Kona. This LRDP established a permanent campus for West Hawai‘i and included additional instructional programs, allowing for expansion of our offerings to the students of West Hawai‘i. Located in the midst of lava lands never before developed, this plan establishes a university-centered village to be developed in four phases. Phase 1 has been completed thus far.

### Analysis and Evaluation

Long range planning has addressed changes in program needs and includes cost estimates concerning new physical plant facilities and infrastructure improvements. The College has remained focused on providing new campuses on both sides of the island, with the Pālanui campus making progress toward achieving that goal. In its efforts to update the current Hilo campus LRDP, the College recognizes the ongoing uncertainty in securing the necessary state appropriations.

### CHANGES AND PLANS ARISING OUT OF THE SELF-EVALUATION PROCESS

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Review and revise the integrated planning process (including evaluation of master plans)	I.B.9, III.B.2, III.C.1, III.D.2	(Related to QFE Project #1)		

### III.C. TECHNOLOGY RESOURCES

---

**III.C.1 Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.**

#### Evidence of Meeting the Standard

Hawai'i Community College provides technology resources at its primary campuses and several remote locations, including Kona Nursing Resource Center (KNRC) in Kealahou and the Ka'u Resource & Distance Learning Center (KRDL) in Pahala. The College provides technology support to meet current learning, teaching, communications, and operational needs at all locations. As technology improves, Hawai'i CC resources change and evolve appropriately to meet the needs of the College as well as the community it serves.

Computer Services/IT Support and Media Services provide support for academic and administrative computing and communications technology as well as maintenance of faculty/staff/administration computers, network infrastructure (wired and wireless), VOIP phone system, and servers. They also provide a range of services including technological research and recommendations, purchasing, coordination, installation of software products, and support for distance education technology, multimedia display, and other technologies.

The majority of the technology decisions for the network infrastructure (e.g., cabling, layout, equipment, etc.) are made by Computer Services ([III.C.1-1](#)). Occasionally, network infrastructure decisions may be mandated or driven by University of Hawai'i (UH) System changes made by UH Information Technology Services (ITS). Other technology decisions are made in consultation with relevant stakeholders, including administration, faculty, funding agencies, and community partners such as KRDL and WDD.

Technology needs at the campus come from a variety of sources (e.g., new employees, grant-funded projects, program reviews, network infrastructure change, or new/replacement computers for a classroom, department, or office). Once a decision has been made to purchase computers/printers/software due to a need, Computer Services is notified, purchases are made, equipment arrives, and Computer Services provides setup and support for the purchased equipment.

Classroom, lab, and most administrator and staff computers are on a four-year hardware replacement cycle. Normally, the oldest are replaced first. Remaining computers, depending on availability, are refreshed/recycled with more memory and upgraded storage.

All software is reviewed by Computer Services/IT Support prior to purchase to ensure compatibility with existing systems. The majority of the College's computers run Windows 7 and 10. All of the College's Macs run OSX. Standard software includes the Microsoft Office suite to ensure uniformity ([III.C.1-2](#), [III.C.1-3](#)). Computer Services/IT Support regularly installs standard software products, including Adobe programs such as Acrobat Reader, Flash Player, and Shockwave Player; Firefox; Chrome; Java; and McAfee Enterprise + AntiSpyware Enterprise ([III.C.1-4](#)). In addition, divisions and departments may purchase specialized software

for use on networked or individual computers ([III.C.1-5](#)). Provisions for reliability, disaster recovery, privacy, and security are described further in Standard III.C.3.

In addition to the College's telephone and voicemail system, the College uses a variety of communication technologies, including Polycom videoconferencing, which is used regularly to facilitate meetings between Hilo and Pālanui as well as to link to other UH campuses and to conduct distance learning courses. The College offers distance education (DE) through a variety of modes, including the internet, videoconferencing, and interactive television. DE technology support includes computers, wired and wireless internet access, and classrooms with videoconferencing and interactive television equipment.

Design, development, and oversight of the administration of the College website ([III.C.1-6](#)) is provided by Hawai'i CC's web developer([III.C.1-7](#)).

The UH System relies on email as the primary means of communication, issuing employees and students email accounts. The College also maintains several social media accounts, including Facebook ([III.C.1-8](#)), Twitter ([III.C.1-9](#)), Flickr ([III.C.1-10](#)), YouTube ([III.C.1-11](#)), and Instagram([III.C.1-12](#)). The College provides access to the internet, MyUH (the UH System's integrated student information system), the STAR online student information and advising tool, and *Laulima*, the web-based course management and collaborative resources tool used by the UH System. *Laulima* is used by faculty and students for both DE and face-to-face courses, and by faculty and staff for collaborative projects. *Laulima* is an open-source Sakai learning management system ([III.C.1-13](#)). It is maintained by UH System IT support, available daily by phone from 7 a.m. to 11 p.m. and by email 24 hours per day ([III.C.1-14](#)).

All Hawai'i CC classrooms are equipped with an instructor workstation that includes a computer and visual presenter. Most programs use photocopiers, scanners, overhead projectors, visual presenters, and DVD players. The majority of non-instructional and service unit staff are equipped with a VOIP phone and computer. A small minority have a VOIP phone and computers shared among a group of staff. Most units have printers and a multifunction printer/scanner/fax.

Additional computers, mobile laptop carts, and multimedia equipment are also provided in specialized labs for designated classrooms and programs. Fully equipped labs and classrooms are located at the three primary campuses and at three off-site locations. Interactive Television (ITV) classrooms are equipped with Polycom videoconferencing equipment in 18 College classrooms—three on the UH Hilo campus, seven on the Manono campus, and eight at the Pālanui campus.

Electronic classrooms and laptop carts are provided in the following locations/programs:

- Manono campus
  - Electronic classrooms--Intensive English Program (IEP); Digital Media Arts (DMA); EDvance (formerly the Office of Continuing Education and Training--OCET); Tropical Forest Ecosystem and Agroforestry Management (TEAM); Architectural, Engineering, and CAD Technologies; Hale Kea Advancement and Testing Center (HKATC); Counseling; Electronics; Nursing; Cafeteria Lab; Hā'awi Kōkua

- Laptop Carts--STEM Center, English, Counseling, Hawai‘i Life Styles, Cisco, DMA, Nursing, EDvance
- UH Hilo campus
  - Electronic classrooms--Business Education and Technology (BEaT), English, the Learning Center (TLC), Auto Body, Auto Mechanics, Diesel, Machine Welding and Industrial Mechanics
  - Laptop Carts--English
- Pālanuanui campus
  - Electronic classrooms--Library and Learning Center, Hā‘awi Kōkua, Counseling, Computer Lab
  - Laptop Carts--English, DMA, Nursing, Student Services
- Offsite locations (desktop computers)
  - Kona Nursing Resource Center (KNRC) in Kealahou
  - Ka‘ū Resource & Distance Learning Center (KRDLC) in Pahala.

In addition to classrooms and labs with computer and multimedia equipment, many programs require specialized instructional technology. Examples include Nursing’s SimMan mannequin simulator, DMA’s three-dimensional printer, BEaT’s Cybersecurity Tableau Write Protection Kit, OCET’s Flow and Level Process Control Trainer, EDvance’s (formerly the Office of Continuing Education and Training–OCET)Virage Truck Simulator, and TEAM’s drone (in the near future) for forest surveying.

Outside of the classrooms, students have access to computers with internet access at libraries, learning centers, and computer labs. In addition, wireless access is available at the three main campuses.

As discussed in Standard II.B.1, the College participates in the operation of two libraries, the shared Edwin H. Mookini Library on the UH Hilo campus and the library at the Pālanuanui campus, both of which provide a range of technologies, including computers to access library resources and the internet, as well as student-use labs with printing and scanning capabilities, wireless access, and copy machines. In addition, the Mookini Library loans audiovisual equipment to faculty and staff, and provides students and faculty with access to audiovisual equipment within the library.

The College operates three learning centers that provide computers and standard software applications, located at the Manono campus (HKATC), the UH Hilo campus (TLC) and the Pālanuanui campus (Pālanuanui LLC). HKATC and Pālanuanui LLC contain dedicated testing facilities for placement testing using internet-based Accuplacer tests as well as proctored exams for DE. HKATC and TLC also provide ADA compliant workstations for students with disabilities.

The College’s Hā‘awi Kōkua Program provides additional services, resources, and access to assistive and adaptive technology for students with disabilities in Hilo and West Hawai‘i. Hā‘awi Kōkua operates a Kōkua Technology Lab on the Manono campus and at the Pālanuanui campus, which includes four computer workstations equipped with assistive and adaptive hardware/software, as well as other stand-alone technology, such as voice/TTY and video phones, audio recorders, talking and large screen calculators, and visual text enlargers. Accommodations for faculty with disabilities are coordinated by the Human Resources office.

In addition to computers and software, the learning centers offer tutoring assistance for students requesting help using the internet, with online registration, Microsoft Office, Quickbooks, MyMathLab, EdReady, Brainfuse, and other online resources. Staff members also help faculty with computer questions including the use of the smartboard projection unit in the TLC mini classroom.

UH ITS has responsibility for planning, policy, coordination, external relations, and operational activities related to information technologies for the University of Hawai‘i System ([III.C.1-15](#)). The College provides support for many of these technologies, including the student information ([III.C.1-16](#)), curriculum ([III.C.1-17](#)), financial ([III.C.1-18](#)), and learning management systems ([III.C.1-19](#)).

### **Analysis and Evaluation**

Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support Hawai‘i CC’s management and operational functions, academic programs, teaching and learning, and support services. The College serves three primary campuses as well as other remote locations and provides sufficient technology support to meet current learning, teaching, communications, and operational needs at all locations.

**III.C.2 The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.**

### **Evidence of Meeting the Standard**

As technology is one of the central elements of the Hawai‘i CC learning experience ([III.C.2-1](#)), procedures are in place for acquisition, regular maintenance, and replacement of technology resources.

In accordance with UH Administrative Procedure 8.540([III.C.2-2](#)), individual departments and divisions maintain inventory records on technology purchased through their budgets. In addition, Computer Services/IT Support maintains records on all laptops, networked computers, and printers and ensures all computer software and peripherals are compatible with existing systems. Computer Services/IT Support records (available upon request from the Computer Services office) are contained in Lansweeper.

The College’s Computer Services/IT Support maintains replacement schedules for computer hardware, purchases extended warranties for computer systems, develops server data recovery and back-up plans, provides for data privacy on computer systems and networks, and creates emergency response plans. Classroom, lab, and most administrator and staff computers are purchased with service warranties and are on a four-year hardware replacement cycle. In addition, departments, divisions, and units identify ongoing technology needs and submit requests to the appropriate administrator for approval. Computer Services/IT Support coordinates purchases to verify that equipment can be supported and is compatible with existing systems.

The College’s Media Services has a prioritized replacement schedule for media equipment such as Polycom units, cameras, mics, projectors, and TVs ([III.C.2-3](#)). For multimedia equipment purchases, Media Services provides research and checks compatibility, maintains inventory

records (available upon request), and coordinates equipment acquisitions, working with administration, faculty, and other units. In addition, Media Services keeps new or working units of general multimedia equipment in inventory to replace equipment as needed.

Technology needs at the UH System level are driven by the UH ITS Strategic Plan ([III.C.1-15](#)). UH ITS also provides technology project updates on its Projects page ([III.C.2-4](#)).

At the College level, faculty and staff are given the opportunity to request technology upgrades that fulfill their program/unit needs in their comprehensive program/unit reviews. To guide longer term planning, the College developed a Technology Master Plan (TMP), the Information Technology Strategic Plan 2013-2015 ([III.C.2-5](#)). A key feature of the plan recommended the hiring of an IT manager to lead the implementation of the plan. Due to budget limitations, the establishment of the position has been delayed. Plans are now underway to reallocate an existing position to assume the role of the manager as the College pursues another IT staff position in the next legislative session ([III.C.2-6](#)).

### **Analysis and Evaluation**

Hawai'i CC plans for, updates, and replaces technology to ensure its technological infrastructure, quality, and capacity are adequate to support its mission, operations, programs, and services. Computer Services/IT Support and Media Services follow regular schedules for computer hardware and other equipment purchase and replacement, data recovery and back-up plans, and installation updates to software products as needed.

**III.C.3 The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.**

### **Evidence of Meeting the Standard**

The responsibility for technology resources is shared between the UH System and the College. Computer Services/IT Support is responsible for managing the College's information technology infrastructure and for maintaining the privacy and security of data exchanged on the campuses by students, faculty, and staff.

The UH Information Technology Services (ITS) provides support services for teaching, learning, public services, administration, and research to the UH community ([III.C.3-1](#)) in the areas of administrative services, academic technologies, cyberinfrastructure, enterprise systems, information security, and technology infrastructure ([III.C.3-2](#)). ITS organizes an annual All Campus IT Workshop for IT Specialists to meet and receive updates on technology ([III.C.3-3](#)) and provides guidance and assistance to keep the UH resources safe and secure from cyber and physical threats. ITS also sends alerts to the UH community ([III.C.3-4](#)) and runs a help desk service, [help@Hawaii.edu](mailto:help@Hawaii.edu), which is available for phone and email support daily from 7 a.m. to 11 p.m., including holidays, except for maintenance times ([III.C.3-5](#)).

Network connectivity (wired and wireless) and VOIP phones are available 24 hours a day, 7 days a week. Wireless network access, as well as access to networked computers, requires authentication using UH usernames and passwords. Tools used for distance education are secure and reliable, and the Hawai'i CC website is secure against compromises. Server scans and data

rooms are monitored ([III.C.3-6](#)). UH System ITS Technology Infrastructure Office ensures that there is maximum availability, quick response to down time, and reliable network connectivity for all network services/delivery modes within the UH System as well as to the internet.

Computer Services/IT Support continually monitors the campus network and responds to network interruptions caused by network equipment on campus. Computers and network equipment have usernames and passwords to ensure data privacy and protection. In the event of a power interruption, uninterrupted power supplies (UPS) provide emergency power to servers, computers, and network equipment to allow users to shut down their computers and Computer Services/IT Support to properly shut down servers and network equipment.

Hardware (desktops, laptops, tablets, and peripherals) are purchased from credible and reliable manufacturers, and all College computer systems are protected by McAfee anti-virus software. ([III.C.3-7](#)) McAfee VirusScan Enterprise software is made available through a site license agreement between UH and McAfee, and is used to detect and take action on potentially unwanted spyware and cookies ([III.C.3-8](#)). McAfee and Windows updates are performed as automatic updates at scheduled times on computers.

Computer system reliability is maintained through several methods. The majority of general-use classroom/lab computers are configured with Faronics Deep Freeze software, which prevents unwanted workstation changes, whether accidental or malicious ([III.C.3-9](#)). These computers are “unfrozen” weekly while automatic updates are applied. Computer Services/IT Support also retains administrator rights on most networked computers, which helps to minimize the frequency and severity of viruses, malware, and other computer problems.

Computer Services/IT Support uses a back-up system to address disaster recovery of server information. For example, servers are physically secured and data is automatically backed up to another server and tape weekly. Tapes are secured and stored in a safe. Data from this server is then transferred to another server in a different building on a weekly basis. Users are generally responsible for their own data recovery, and many offices use UPS battery backups that provide emergency power in the event of a power interruption to allow users to properly store data and shut down their computers.

### **Analysis and Evaluation**

Technology resources at all College locations are implemented and maintained by UH ITS and Hawai‘i CC’s Computer Services to ensure reliable access, safety, and security. Computer Services/IT Support ensures system security by using a back-up system. Software updates for virus scanning software are made available through a site license agreement and are used to detect and take action on potentially unwanted spyware and cookies. All networked computers and wireless network access require log-in authentication to maintain privacy and security of data exchanged by students, faculty, and staff.

**III.C.4 The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.**

### **Evidence of Meeting the Standard**

Hawai‘i CC provides technology instruction and support for faculty, staff, students, and administrators in the form of distance education (DE) support, computer and media training, professional development workshops, and other support services.

#### **Distance Education Support**

The Instructional Technology Support Office (ITSO) ([III.C.4-1](#)), part of the Academic Support unit, provides ongoing training and support for DE instructors. ITSO delivers training programs and workshops, creates instructional and reference materials, and provides one-on-one faculty support. Evaluations are conducted for ITSO trainings, workshops, and services.

Media Services provides multimedia equipment training for faculty teaching via videoconferencing. Prior to the start of each semester, Polycom equipment training is offered to instructors using videoconferencing classrooms. Tips and strategies to adapt face-to-face curriculum to the videoconferencing delivery mode are also presented.

Support for DE students is provided by Learning Center staff, as well as via the UH ITS Help Desk([III.C.4-2](#)).

#### **Computer and Media Training**

Technology training and professional support for faculty, administrators, and staff is offered throughout the year by a number of different departments, programs, and non-instructional support units, as well as through services offered across the UH System. Group trainings and training for nonstandard computer hardware/software can be requested through the Faculty/Staff Development Committee or EDvance. In addition, the Computer Services/IT Support unit provides one-on-one instruction and support of standard computer hardware/software installations based on faculty/staff requests.

In addition to providing Polycom training to faculty, Media Services also provides Polycom and general multimedia equipment training to all personnel upon request.

Computer support for students is provided by several academic support units, including the learning centers, STEM Center, and I Ola Hāloa Center for Hawai‘i Life Styles. In addition, students can obtain support via the UH ITS Help Desk([III.C.4-2](#)).

#### **Professional Development Workshops**

Throughout the semester, the Faculty/Staff Development Committee offers a variety of technology-related workshops and presentations, including sessions on new software and internet applications. Recent offerings have included workshops on *Laulima*, Turnitin, and other web-based instructional resources. The committee conducts evaluations after each workshop, and conducted a survey in spring 2015 to assess the training needs of faculty and staff. Individuals or departments can also request specific topics for workshops or training via the committee’s webpage ([III.C.4-3](#)).

### Other Support Services

Training and ongoing support for faculty and staff are provided by campus and/or System level personnel for web-based systems including:

- Banner student information system for course scheduling (campus)
- Banner student information system for application and student records (System/campus)
- Quali Student Curriculum Management system (campus)
- Quali Financial System (System)
- STAR student information and advising (System/campus)
- STAR GPS (guided pathways system) (campus)
- MySuccess student support and retention system (System)
- Academic Logic (UH database) (System/campus)
- Peoplesoft human resources management system (System)
- Campus Labs assessment management system (campus)

As described in Standard III.C.2, the College has been delayed in hiring an IT manager to lead the implementation of the Technology Master Plan. Nevertheless, the College continues to work towards the plan's goals and has implemented many of its strategies. Examples include the following:

- *Strategy 1.1: Expand DE support staff*  
Media Services in both Hilo and Pālanui have expanded their DE support staff (one temporary full-time media specialist in Hilo, and two 0.5 temporary media specialists at Pālanui). The Instructional Technology Support Office (ITSO) has requested additional staffing at Pālanui through the unit review process ([III.C.4-4](#)).
- *Strategy 1.2: Provide resources for ongoing training of DE staff*  
ITSO and Media Services have been provided with resources for ongoing training of DE staff. A Rural Utilities Service (RUS) grant also provided training to media specialists on new video conference equipment and software.
- *Strategy 1.3: Increase training opportunities for faculty, staff, and students*  
ITSO provides workshops to faculty and staff year-round, and Media Services provides training for faculty on a one-on-one basis as needed. Several units provide support for students.
- *Strategy 1.7: Investigate and explore distance education and online delivery options*  
ITSO has continued to explore educational technology options for faculty. The office has introduced and provided training on applications/services (e.g., Screencast-o-matic, Google Apps, EdPuzzle, Quizlet) that can be incorporated into DE classes ([III.C.4-5](#)).
- *Strategy 3.1: Implement a system of assessing faculty/staff technology training needs*  
*Strategy 3.3: Establish a process for requesting and receiving training*  
ITSO provides technology training for faculty and staff. All workshops/training include a participant evaluation, which includes inquiry about additional training needs. New online instructors are contacted and offered training and support. ITSO also sends out regular communication, which include offers for one-on-one training, to the DE community.

### **Analysis and Evaluation**

Hawai'i CC provides appropriate instruction and support for faculty, staff, students, and administrators in the effective use of technology and technology systems related to its programs, services, and institutional operations. The College offers training to personnel and students through different departments (Media Services, Faculty/Staff Development Committee, ITSO, learning centers) as well as through the UH System. In addition, the Computer Services/IT Support unit provides one-on-one instruction and support of standard computer hardware/software installations based on faculty/staff requests.

**III.C.5 The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.**

### **Evidence of Meeting the Standard**

The College adheres to multiple policies and agreements that address the effective use of technology in teaching and learning, including UH Executive Policy E2.210 Use and Management of Information Technology Resources, which details acceptable use and management of all UH information technology resources ([III.C.5-1](#)). The policy specifies responsible use (privileges and responsibilities, principles of responsible use), confidentiality and security of electronic information, ownership and disclosure of information, privacy of student information, commitment to access, special responsibilities of system and network administrators, and due process. Employees and students must agree to the established guidelines in the policy in order to gain access to the College's technology services, including email, software applications, and resources. Unauthorized access is prohibited by law in accordance with Chapter 708, Hawai'i Revised Statutes ([III.C.5-2](#)).

Hawai'i CC policies also guide the appropriate use of webpages and social media([III.C.5-3](#), [III.C.5-4](#)) as well as content used for online instruction, which is expected to comply with federal guidelines that include accessibility for students with disabilities ([III.C.5-5](#)).

Students learn about appropriate technology use during required student orientation sessions. The College also provides DE students with information about netiquette at the beginning of each semester ([III.C.5-6](#)).

Hawai'i CC personnel needing to access Banner or STAR are required to go through an authorization process. For both Banner and STAR, requesters must complete and pass the UH Information Security Awareness Training ([III.C.5-7](#)) and fill in the UH General Confidentiality Notice Form ([III.C.5-8](#)). For STAR, the requester must also fill in the STAR User Policy and Security Agreement ([III.C.5-9](#)).

### **Analysis and Evaluation**

Clear policies and procedures are in place to guide the appropriate use of technology in the teaching and learning processes. Employees and students must agree to the College guidelines and policies in order to access services

### **CHANGES AND PLANS ARISING OUT OF THE SELF-EVALUATION PROCESS**

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Review and revise the integrated planning process (including evaluation of master plans)	I.B.9, III.B.2, III.C.1, III.D.2	(Related to QFE Project #1)		

### III.D. Financial Resources

#### Planning

**III.D.1 Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)**

#### Evidence of Meeting the Standard

Sufficient revenue streams are maintained to ensure financial solvency, cover base operations, and support initiatives that innovate and enhance programs and services. Institutional priorities are aligned with the strategic plans and result from resource needs identified from program and unit reviews. Funding sources are provided to help realize these priorities. The budget process is managed with integrity to ensure that financial stability is maintained.

#### Revenues and Funding

Funding for Hawai'i CC comes from the University of Hawai'i Community Colleges (UHCC) via state and federal funding, grants, and the collection of tuition and fees. As outlined in the mission and strategic plans, Hawai'i CC and UHCC are committed to supporting and sustaining student learning programs and services, including distance education courses, programs, and services, and to improving institutional effectiveness.

The sources of revenues for the College include:

### **General Funds and Tuition and Fees Special Fund**

The UHCC vice president and chancellors determine the General Fund allocations to individual community colleges, normally maintaining established levels of current service funding. Current service funding is equal to the prior year's General Fund appropriation, plus any previously agreed upon collective bargaining augmentations, minus base budget reductions, plus funds for new initiatives (program change requests). General Fund base budget reductions are normally driven by downturns in the state economy; however, there have been no significant budget reductions since fiscal year 2011.

The General Funds received by the campuses, combined with tuition generated from credit instruction, comprise the general operating fund or "unrestricted operating budget" of the campuses. In 1995, the legislature authorized the establishment of the Tuition and Fees Special Fund (TFSF) and permitted the university to retain and expend revenues from tuition in order to "...maintain or improve the university's programs and operations" (Act 161, SLH 1995([III.D.1-1](#))). Prior to this action, tuition revenues were retained by the state and the university received General Fund appropriations for all of its general operating expenses. This change afforded the community colleges the means to implement planned tuition increases designed to sufficiently cover base operations as well as fund initiatives supporting educational improvement and innovation([III.D.1-2](#)).

The funding of the general operating budget through a combination of General Fund and TFSF has a significant stabilizing effect on campus operations. General Fund allocations remain relatively stable even when enrollments contract, mitigating the impact of the loss of TFSF revenue([III.D.1-3](#)). Conversely, when enrollments grow, campuses generate additional revenue to meet increased costs. As mentioned previously, reductions to the General Fund base itself usually coincide with downturns in the state economy. However, these periods are often associated with increases in enrollment as students leave the workforce to further their education.

### **Other Special and Revolving Funds**

Other special and revolving funds also finance aspects of campus operations; however, unlike General Funds and TFSF that support general operations, these funding sources are used to support specific program activities. The program activities include non-credit instruction, summer session instruction, conferences, and student activities. The individual funds are established by statute and operate on a self-sustaining basis. In addition to covering direct costs, programs are required to generate an administrative cost fee to cover their equitable share of general campus operating expenses([III.D.1-4](#)).

### **Extramural Funds**

Proposals are submitted to extramural organizations consisting of federal, state, and local government agencies, nonprofit foundations and other private sponsors. Successful proposals result in the university receiving grants, cooperative agreements, or contracts that provide funds for the proposed activities. Extramurally funded project activities are designed to focus on outcomes and outputs supporting the needs of both the College and sponsoring agency. Proposals and awards are submitted and received on behalf of the applicant, the University of Hawai'i (UH), by the UH Office of Research Services (ORS). All extramural funds are administered by ORS for all campuses within the UH System([III.D.1-5](#)).

## Reserves

UHCC requires that each campus maintain adequate financial resources to ensure financial stability([III.D.1-6](#)). All community college campuses maintain sufficient cash reserves to address emergencies (5% minimum reserve) and other operating contingencies such as temporary downturns in enrollment or significant one-time investment opportunities that support educational improvement and innovation (10% targeted reserves)([III.D.1-7](#)).

## Capital Improvements Program (CIP) Funds

UHCC supports all campuses by securing and allocating Capital Improvements Program (CIP) funding. The primary revenue source for CIP projects comes from state-issued general obligation bonds. Debt service payments to retire the bonds are funded by the state; individual campuses are not obligated to pay for these long-term obligations.

There are three major categories of CIP projects:

New Construction, Replacement, and Major Renovations – The construction of new facilities and major renovations of existing facilities (renovations exceeding \$5 million) are budgeted and appropriated as separate line item projects. Planning for the development of new facilities is guided by campus long-range development plans([III.D.1-8](#)), ([III.D.1-9](#)), ([III.D.1-10](#)). Funding for new facilities and major renovations is provided as line items in the authorizing legislative appropriations([III.D.1-11](#)).

1. Capital Renewal and Deferred Maintenance (CRDM)– CRDM projects are comprised of two parts: (a) Capital Renewal and (b) Reduction of Deferred Maintenance.

Capital Renewal – All buildings are comprised of different sub-systems that have predictable lifetimes. The Facilities Renewal Reinvestment Model (FRRM) identifies roofs, building exteriors, elevators and conveying systems, air conditioning, lighting, electrical equipment, plumbing, fire protection and detection systems, built-in specialties and equipment, and interior finishes. Capital renewal requirements are sub-systems that are at the end of their useful lives and need to be replaced. In other words, the failure to implement capital renewal projects results in a commensurate increase to the deferred maintenance backlog. Capital renewal requirements are detailed in the 2016 Facility Renewal Reinvestment Study Report prepared by Sightlines for budget planning purpose([III.D.1-12](#)).

Deferred Maintenance – Buildings with deferred maintenance are facilities that have failing sub-systems or sub-systems that are operating beyond their useful lifetime. The FRRM on the Sightlines report guides campus evaluations of deferred maintenance needs; however, onsite evaluations conducted by the facilities manager and the vice chancellor for Administrative Services (VCAS) help to prioritize projects so that requests can be submitted to the UHCC System Office on an ongoing basis to ultimately identify specific deferred maintenance projects that require funding.([III.D.1-13](#), [III.D.1-14](#))

2. Minor CIP – The Minor CIP project category is for the modernization of learning environments to enhance the delivery of priority instructional programs. Funding priorities are placed on improving classrooms and other spaces that directly support educational

improvement and innovation([III.D.1-15](#)). This funding source, typically \$10 million a year for the UHCC System, has been a major factor in campus plans to keep instructional spaces up to date([III.D.1-16](#)).

Funding for CRDM and Minor CIP is provided as state-funded lump sum appropriations, which means that the community colleges can determine the specific projects that are funded through the lump sum appropriations. UHCC conducts an annual CRDM and Minor CIP budget meeting to allocate the lump sum appropriations. Each campus formulates prioritized lists of CRDM and Minor CIP projects for consideration. Projects are prioritized at the system level by weighing the relative importance of each project against the needs of the seven UHCC campuses([III.D.1-17](#)). This process ensures that the highest CRDM and Minor CIP needs are met by allowing the funds to flow to the most critical projects in the UHCC System.

### **Funding for Priority Initiatives**

UHCC Innovation and strategic initiative allocations provide campuses with the means to implement institutional improvements that support strategically important initiatives. For instance, the Hawai'i Graduation Initiative (HGI) ([III.D.1-18](#)) is a high priority initiative that aims to increase the number of educated citizens within the state. HGI's strategies reflect UHCC's commitment to support increased student participation and completion, particularly for students from underserved populations and regions, and to expand workforce development opportunities across the state.

Performance-based funding has been identified as a solution aimed at generating greater institutional productivity, accountability, and educational attainment. Through funding incentives, performance-based funding is designed to encourage efficient resource allocation, greater awareness and attention to strategic priorities, and a results-oriented campus culture. The UHCC currently earmarks approximately \$6.5 million of its base budget for this purpose. Starting in fiscal year 2016, the UH System began providing performance funding allocations that contributed an additional \$2 million. Combined, performance funding represents over 4% of the total general operating budget([III.D.1-19](#)).

Within the College, institutional priorities are set using the Hawai'i CC Strategic Directions 2015-2021 and guide resource allocation([III.D.1-20](#)). Budget principles are developed to ensure resource allocation includes addressing immediate needs such as compliance costs.([III.D.1-21](#),[III.D.1-22](#), [III.D.1-23](#), [III.D.1-24](#)) In addition to UHCC funding for system priorities, the College reallocates existing resources such as position vacancies and its unallocated tuition and special revenues funds to support prioritized campus needs([III.D.1-25](#)).

### **UHCC Innovation Funds and other Strategic Initiatives**

Innovation and strategic initiative funding allocations are used to address critical needs identified through the strategic planning process and support the goals of the HGI. Some of the initiatives include subsidizing the cost of new classes associated with enrollment growth, reforming developmental education, improving retention and persistence through guided pathway and early intervention systems, expanding financial aid support, supporting Native Hawaiian achievement, and replacing equipment([III.D.1-26](#)).

Some of the major initiatives are as follows:

- Enrollment Growth funding is designed to provide community college campuses with the resources needed to meet student demand for instruction. Since tuition revenue alone historically has been insufficient to cover all costs associated with offering additional classes, the enrollment growth fund was established to cover the differential cost (additional costs net of tuition revenue) for additional credit classes/credits required to meet student demands. This has successfully eliminated the financial “disincentive” for adding new sections and allowed UHCC campuses to become more aggressive in their decisions to add classes that students need to complete their degree requirements.
- Developmental Education Reform funding supports UHCC’s large-scale approach to accelerate students through college level math and English. National data through such organizations as Complete College America consistently show that incorporating the co-requisite model, rather than the pre-requisite model, results in many more students successfully passing gatekeeper courses. Given the large number of underprepared students that require support to successfully complete college level courses, the initiative is anticipated to have a significant impact on retention, persistence, and graduation.
- Guided Pathway funding supports efforts to improve timely completions by providing every student entering the community colleges with a clear individualized guided pathway to their credential with associated student support structures. The initiative expands the university’s capacity to track and advise students using an intuitive, online academic mapping and advising tool that links student advising with student registration.
- Achieving the Dream funding supports participation in the national effort to help more community college students succeed, with a special focus on students of color and low-income students.
- Financial Aid Support funding supports efforts to eliminate financial barriers to the community colleges by improving access to financial aid among low-income students, and those from underserved regions and populations.
- Equipment replacement funding supports campus efforts to maintain an inventory of properly functioning and technologically current equipment. Career and technical education programs in particular require a substantial investment in equipment to provide students with meaningful hands-on training, ensure student safety and maintain currency with industry standards and expectations.

### **Managing with Integrity**

In compliance with Board of Regents (BOR) Policy 8.204([III.D.1-27](#)), the framework of financial planning begins with a comprehensive operating financial plan submitted to the BOR for its approval prior to the start of each fiscal year. The plan provides the BOR with oversight to ensure that the College is managing its resources with integrity and in a fiscally responsible manner.

The plan includes all appropriated funds, including the general operating budget and other special and revolving funds. The primary underlying assumption of the approved plan is that projected expenditures do not exceed projected revenue, except for planned one-time expenditures from carryover balances. These budgets are broken down on a quarterly basis, and

variances exceeding established thresholds at the UHCC System level must be explained to the BOR at the close of each quarter ([III.D.1-28](#)). Explanations for the variances are provided at the UOH 800 level, such as one-time expenses that were programmed into the previous fiscal year, and carryover balances earmarked for these requirements are carried forward into the current fiscal year.

General operating budgets (GF+TFSF) are formulated for the BOR using the following budget tools:

- General Fund projections are based on anticipated allocations (UHCCP 8.000)
- TFSF revenue projections are based on prior year collections plus/minus changes in projected enrollment and plus BOR-approved rate increases. TFSF projections are carefully monitored and adjusted according to actual fall and spring enrollment([III.D.1-29](#)).
- Regular and lecturer payroll are projected based on labor ledger and personnel data contained in the financial management and personnel information systems to ensure the accuracy of the projections([III.D.1-30](#)).
- Non-payroll budgets (other current expenses) are evaluated against historical averages of expenditures to determine appropriateness of current year allocations([III.D.1-31](#)).
- Cash balances are projected and reviewed to ensure compliance with reserve policy requirements([III.D.1-32](#)).

All other special and revolving fund programs implement cost center-based budgeting for revenues and expenses through the development of financial plans ([III.D.1-33](#)). A UHCC policy was adopted to provide additional guidance to the campuses on executing financial oversight of these revenue generating programs([III.D.1-34](#)).

### **Budget Adjustments**

All general operating and other special and revolving fund budgets are entered into the financial management system at the individual account level and by major category of expenditure (regular payroll, lecturer payroll, casual hire payroll, student help payroll, other current expenses and equipment). These budgets are monitored via monthly budget to actual reports that are posted to the UHCC Budget website([III.D.1-35](#)).

General operating budgets (GF+TFSF) are monitored and adjusted throughout the year as needed:

- Regular and lecturer payroll requirements are re-projected every month and compared against budgets to determine if revised projections require budget changes([III.D.1-36](#)).
- Other payroll and non-payroll budget balances are reviewed on a regular basis to determine if budget balances are adequate or require budget changes.
- Internal general operating budget financial plans are produced and updated to ensure that campus revenue and expenditure plans are balanced([III.D.1-37](#)).

- General operating budget status reports are reviewed at monthly VCAS meetings([III.D.1-38](#))

For other special and revolving funds, financial plans are monitored to track revenue and expenditure projections ([III.D.1-39](#)). Best practices regarding cash management are followed to ensure that cash flow requirements, long-term obligations, and other unanticipated costs can be covered as they arise.

### **Campus Process**

At the campus level, the College ensures that the budget planning process is transparent through communication at All College meetings([III.D.1-40](#)). The process is built upon participation with the College Council([III.D.1-41](#), [III.D.1-42](#)) a College-wide governance organization with representatives from all major campus constituencies, as well as with the College Effectiveness Review Committee (CERC), which compiles budget requests from comprehensive program and unit reviews([III.D.1-43](#))

### *Budget Planning*

The budget planning process begins each year in the spring for the upcoming fiscal year (FY) and continues into summer to ensure the operating budget is in place by the beginning of the fiscal year on July 1. Individual programs and units work with administration to allocate the projected budget based on a 3-year average of prior expenditures by account for B-Budget (operating expenditures) and Student Employment requirements ([III.D.1-44](#), [III.D.1-45](#)). Allocations are based on program/unit/department alignment with the strategic plan using guiding principles and priority criteria. Finally, one-time equipment and personnel requests may be submitted by any constituent on campus whose needs have changed since the comprehensive program and unit reviews compiled by CERC([III.D.1-46](#), [III.D.1-47](#)).

- In April, the vice chancellor for Administrative Services (VCAS) provides budgeting templates to the administrative team so that they can work with their constituents on budget requests. All requests are submitted to the VCAS for compilation. The administrative team meets to review the budget requests to determine allocations based on guiding principles and priority criteria.
- In May, the projected budget is presented to the College.
- In June and July, the administrative team finalizes the budget as it receives information from the UHCC Budget Planning and Finance Office. The chancellor approves the adopted budget for the new fiscal year.
- In August, the operating budget is presented at the All College meeting.

The budget planning process is used as the basis to request funds for equipment maintenance and replacement, supplies and materials, and personnel. This process begins at the program or unit level: Program/Unit personnel or program management identifies needs through their Annual Review of Program Data, and/or Comprehensive or Annual Review, which are all aligned with the campus strategic plan. Once identified, these needs are entered into the budget planning templates provided by the VCAS. Budget needs are collected by the department/division chair, unit head, or program coordinator, who are then asked to assess requests by priority. Priority is always given first to issues involving the health and safety of students or employees. All requests

are then summarized and compiled by the VCAS and submitted to the administrative team for further review and prioritization. Once completed, the prioritized listing is reviewed by the budget analyst, VCAS, and chancellor to ensure a balanced budget. The proposed budget plan is then approved by the chancellor.

### **Analysis and Evaluation**

Hawai‘i CC manages its resources with integrity to support programs and services and to improve institutional effectiveness in accordance with BOR policies. In conjunction with UHCC, the College maintains sufficient financial resources to support its programs and services through the use of General Funds, Tuition and Fees Special Funds, other special and revolving funds, extramural funds, reserves, and CIP funds. These funds are distributed appropriately across the various programs and services based on campus policy and institutional priorities. The College’s financial resources are maintained, allocated, and reallocated based on system policy regarding fiscal responsibilities within the university.

**III.D.2 The institution’s mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.**

### **Evidence of Meeting the Standard**

Hawai‘i CC is one of ten campuses within the UH System. Hawai‘i CC’s mission and strategic plan([III.D.2-1](#)) are the basis for the College’s budgetary and financial operational decisions. The College’s recently updated mission statement and 2015-2021 strategic plan directly align with both the UH System and the UHCC strategic plans.

HAW 4.201 Integrated Planning([III.D.2-2](#)) for Institutional Effectiveness guides the College in an interactive process of 1) planning, where institutional priorities are aligned to the strategic plan; 2) evaluation, through the comprehensive program and unit reviews; and 3) resource allocation, where funding requests and reallocation are implemented. A participatory and transparent structure is in place to make resource allocation decisions. The College Effectiveness Review Committee (CERC) reviews comprehensive program and unit reviews([III.D.2-3](#)), catalogs funding requests, and provides resource recommendations to the chancellor. The chancellor, with members of administration, uses recommendations from the CERC to set institutional priorities for each fiscal year. In fiscal year 2018, institutional priorities were stated as Wildly Important Goals (WIGs): better meet the educational needs of Hawai‘i Island, increase student success, and strengthen the *Kauhale*([III.D.2-4](#)).

With institutional priorities set, the CERC summary of funding requests is matched with available funding or reallocation opportunities as part of the integrated planning process. If necessary, budget plans are amended. Funding priorities that cannot be accommodated at the campus level are submitted to UHCC for consideration to be included in the system’s request to the legislature.

The budget plans contain base budget information from the prior year plus any adjustment made, including funding new requests, which provides for the budget operational plan([III.D.2-4](#)). Financial plans are disseminated throughout the College in a timely manner through memos, letters, and emails from the VCAS to the administrative team, which then communicates to division/department chairs and program coordinators([III.D.2-5](#)). They are also shared with the Kauhale via the College Council and during the all-College meetings in fall and spring. All-College meeting information is also posted on the chancellor's webpage([III.D.2-6](#)).

Past expenditures have supported the achievement of institutional plans. For instance, beginning in 2015, system funds have been dedicated to restructuring developmental education curricula, supporting professional development of instructors, hiring tutors and peer mentors, and updating technology([III.D.2-7](#)).

Budget and financial reviews are conducted annually by the BOR per RP 8.204([III.D.2-8](#)). The College ensures sound financial practices by 1) operating within its means by adopting a balanced budget, 2) investing in the future with appropriate one-time non-General Funds (e.g., special funds and extramural funds) and 3) maintaining prudent level of reserves. College reserves are set by UHCCP 8.201([III.D.2-9](#)). Hawai'i CC maintains sufficient cash reserves to address emergencies (5% minimum reserve) and other operating contingencies, such as temporary downturns in enrollment or significant one-time investment opportunities that support educational improvement and innovation (10% targeted reserves)([III.D.2-10](#)).

Per EP 8.207([III.D.2-11](#)), the College self-insures against normal and expected losses. It participates in the UH System's Risk Management Special Fund (RMSF) to ensure appropriate reserves are in place for unexpected losses. The RMSF was created by Act 186, Session Laws of Hawai'i 2003, to finance a self-insurance program at UH. The fund pays for expenses associated with the administration of the risk management program, including insurance premiums, retention payments, and judgment payments. The program is funded by annual assessments to each campus. Each campus's assessment is based on factors such as number of employees, student enrollment, loss history, and specialized facilities([III.D.2-12](#)).

### **Analysis and Evaluation**

Hawai'i CC follows an integrated planning process that ensures that the College's mission and strategic plans ground its institutional planning, program evaluation, and resource allocation. Financial practices follow established guidelines and policies for institutional effectiveness and stability. Financial information is integrated into planning decisions at all levels and disseminated regularly throughout the College by the VCAS, administrative team, and division/department chairs.

**III.D.3 The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.**

### **Evidence of Meeting the Standard**

The College follows clearly defined policies and procedures that guide its financial planning and budget development, including annual/comprehensive reviews and the budget planning process. Hawai'i CC financial planning and budget development align with the UHCC process, as outlined in the Budget Policy Paper and budget instructions. The policy paper sets forth the environmental context for budget building, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget. The budget instructions establish the budget philosophy, major budget assumptions, expectations, and timeline. Operating budget revenue and expenditure assumptions are explained, including enrollment and tuition revenue projections, payroll cost assumptions, and utility cost projections; assumptions for developing CIP revenue and expenditure projections are also provided. Finally, expectations for increased efficiencies and productivity are outlined ([III.D.3-1](#)).

Upon approval by the BOR, the University's budget is submitted to the Governor for review and incorporated into the executive budget request. The executive budget request for the state is then submitted to the Legislature in December for consideration in the regular session of the Legislature in January. Appropriations by the Legislature are usually passed in May and transmitted to the Governor for approval. Upon approval by the Governor in June, allocation notices are transmitted to the University, including any restrictions imposed on Legislative appropriations. The president determines distributions of general funds including a UHCC level distribution. The vice president for community colleges and the UHCC chancellors determine the general fund allocations to the individual community college campuses, normally maintaining established levels of current service funding.

Budget development documents are posted on the UH website. These documents include the following:

Budget Policy Paper and budget instructions([III.D.3-2](#))

Proposed budget request to the BOR([III.D.3-3](#))

Status of both operating and CIP Budgets through the various stages of the budget development cycle([III.D.3-4](#))

UHCC System budget execution documents are distributed during monthly VCAS meetings and/or posted on the UHCC website ([III.D.3-5](#)). These documents include the following:

General operating budget allocations ([III.D.3-6](#))

General operating budget financial plans ([III.D.3-7](#))

General operating budget status reports ([III.D.3-8](#))

Monthly budget reports ([III.D.3-9](#))

From the UHCC process, the College's budget development process is guided by the integrated planning process (as described in Standard III.D.2)([III.D.3-8](#)). Hawai'i CC administrators, faculty, staff members, and student government leaders have the opportunity to participate in the financial planning and budget process within the College. Administrators receive input from the various constituencies about financial needs. The College engages the participation of all constituencies through college meetings, program and unit review, and committee work such as CERC.

Financial plans are disseminated throughout the College in a timely manner through memos, letters, and emails from the vice chancellor of Administrative Services (VCAS) to the administrative team, who then communicates to division/department chairs and program coordinators. They are also shared with the *Kauhale* via the College Council and during the all-College meetings in fall and spring. The all-College meeting information is also posted on the chancellor's webpage.

### **Analysis and Evaluation**

Hawai'i CC defines and follows system budget guidelines and processes, and provides all constituencies with appropriate opportunities to participate in development of financial plans and budgets.

### **Fiscal Responsibility and Stability**

**III.D.4. Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.**

### **Evidence of Meeting the Standard**

In coordination with UHCC, institutional planning at the College reflects a realistic assessment of resource availability as well as the further development of the resources to meet expenditure requirements and strategic goals.

As described in III.D.3, the Budget Policy Paper and budget instructions set forth the environmental context for budget building, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget. The budget instructions establish the budget philosophy, major budget assumptions, expectations and timeline. Operating budget revenue and expenditure assumptions including enrollment and tuition revenue projections, payroll cost assumptions, and utility cost projections are explained. Assumptions for developing CIP revenue and expenditure projections are also provided. Finally, expectations for increased efficiencies and productivity are outlined in this document([III.D.4-1](#)).

General operating budgets (GF+TFSF) are formulated for the BOR using the following budget tools:

- General Fund projections, monitored closely by UHCC based on anticipated allocations([III.D.4-2](#))
- TFSF revenue projections, based on prior year collections plus/minus changes in projected enrollment and plus BOR-approved rate increases. TFSF projections are carefully monitored and adjusted according to actual fall and spring enrollment([III.D.4-](#)

3). This helps inform sound tuition policy. Tuition increase proposals balance the competing needs of keeping college affordable, meeting immediate campus needs, and achieving the goals promoted by strategic plans. UHCC has successfully maintained this delicate balance by establishing a tuition rate schedule that ensures adequate resources for ongoing needs and new funding to meet strategic objectives, yet remains affordable when compared to other two-year institutions.

- Regular payroll and lecturer payroll projections, based on labor ledger and personnel data contained in the financial management and personnel information systems to ensure the accuracy of the projections(III.D.4-4). The College closely monitors its enrollment to validate expenditure plans from tuition and fees. This includes an annual review of tuition-funded positions.
- Non-payroll budgets (other current expenses), evaluated against historical averages of expenditures to determine appropriateness of current year allocations(III.D.4-5).
- Cash balances, projected and reviewed to ensure compliance with reserve policy requirements(III.D.4-6).
- All other special and revolving funds require a balanced budget plan that uses sound revenue estimates grounded in historical information and anticipated future revenues(III.D.4-1). A UHCC policy was adopted to provide additional guidance to the campuses on executing financial oversight of these revenue generating programs (III.D.4-1).

The College also supports UHCC strategic directions to diversify the resource base beyond state appropriations and tuition. Tactics to achieve this goal include the following:

- Improving revenue streams associated with other revenue generating programs that will ultimately help cover campus overhead expenses. Hawai‘i CC special funds in support of non-credit programs have been refocused for workforce retraining and career exploration instead of personal enrichment. The latter have been effectively provided by UH Hilo for Hawai‘i Island. This change assists in ensuring the viability of EDvance (formerly the Office of Continuing Education and Training–OCET).
- Spearheading efforts to pursue external funding for projects that relate to strategic priorities. UHCC is in the process of establishing a grants office that will target state- or systemwide appeals to accelerate long-term strategic goals. Similarly, the College is using its Research and Training Revolving Funds to support its grant capacity with a grants writer position, grants fiscal compliance officer, and consultation to build Center of Excellence capacity nationally.
- Executing a successful fundraising campaign across all campuses to provide additional support for students, faculty, facilities, priorities, and programs. Hawai‘i CC has recently launched its Waihona campaign program, including the pursuit of naming opportunities at its Pālanui site. The campaign is coordinated closely with the UH Foundation. A new development officer and regional staff team are now in place to support advancement initiatives at the College. The College also maintains community partnerships with the Hawaii P-20 Early College Program, Japanese Chamber of Commerce & Industry of Hawaii, and others, which further develop resources.
- Executing a coherent strategy for international and nonresident recruitment and enrollment, including partnerships, that advances revenue goals as well as the educational

benefits of a globally diverse student body to Hawai‘i students. The College has prioritized resources to expand its international program with additional marketing and short-term global programs.

### **Analysis and Evaluation**

Hawai‘i CC’s planning process requires analysis of relevant financial data and uses institutional planning tools to realistically assess resource availability, expenditures, and potential for financial resource development. The College also works to develop its resources through the UH Foundation and grants, as well as community partnerships.

**III.D.5. Fiscal Responsibility and Stability: To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.**

### **Evidence of Meeting the Standard**

The College adopts strong budgetary and internal control systems. The allocation of operational funds at Hawai‘i CC is divided into the following areas: the chancellor’s office, Academic Affairs, Student Affairs, Administrative Services, the Office of Continuing Education and Training, and the UH Center West Hawai‘i (Pāalamanui). Operating budgets are allocated to each area. The operating budgets are made accessible to each respective area through the use of Quali Financial Systems (KFS), eThORITY, and monthly financial reports from the UHCC Budget Office.

All general operating and other special and revolving fund budgets are entered into the financial management system at the individual account level and by major category of expenditure (regular payroll, lecturer payroll, casual hire payroll, student help payroll, other current expenses and equipment). These budgets are monitored via monthly budget to actual reports that are posted to the UHCC Budget website([III.D.5-1](#)).

General operating budgets (GF+TF SF) are monitored and adjusted throughout the year as needed:

- Regular and lecturer payroll requirements are re-projected on a regular basis and compared against budgets to determine if revised projections require budget changes. Other payroll and non-payroll budget balances are reviewed on a regular basis to determine if budget balances are adequate or require budget changes([III.D.5-2](#)).
- Other payroll and non-payroll budget balances are reviewed on a regular basis to determine if budget balances are adequate or require budget changes.
- Internal general operating budget financial plans are produced and updated to ensure that campus revenue and expenditure plans are adequate([III.D.5-3](#)).
- General operating budget status reports are reviewed at monthly VCAS meetings([III.D.5-3](#)).

The College complies with all University Administrative Procedures under Chapter 8, Business and Finance([III.D.5-4](#)), which establishes numerous controls through the proper use of delegations of authority, segregation of duties, online workflow management of transaction approvals, account reconciliations, and physical inventory verifications.

Internal controls and financial management practices are evaluated during the course of external and internal audits such as the annual consolidated financial statement audit, financial and compliance audit (A-133 audit), state auditor review of special funds, UH internal auditor audits, and Unit review for Business Office practices.

Any audit findings or weakness in internal controls reported by the auditors are addressed and corrected.

The College, as part of the UH System, publishes a consolidated financial statement and budgetary information, which contains audit findings. These are available to members of its Kauhale through website publication, while detailed information is accessible through financial systems like Kualii or eThORITY. These reports provide budgets, historical or current year revenues, expenditures, transfers, legislative or executive restrictions, enrollment trends, carryforward cash balances, reserve balances, cash projections, and audit findings and reports. The VCAS reports financial and budget status to College personnel during All College meetings.

Internal and external audits help the College to improve management practices and internal control structures, including Internal Control and Business Issues Report([III.D.5-5](#)), A-133 Financial and Compliance Audits([III.D.5-6](#)), and the Comprehensive Annual Financial Report (CAFR)([III.D.5-7](#)).

### **Analysis and Evaluation**

The constant improvement of the financial integrity of Hawai'i CC requires the use and evaluation of internal control structures in a responsible, dependable, and timely way. This allows for timely response and assistance to internal and external entities.

**III.D.6. Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.**

### **Evidence of Meeting the Standard**

The College follows BOR policy, which covers the university's fiscal management and budget process, noting that the board has "a fiduciary obligation to ensure that the University is managing its resources in a fiscally responsible manner" ([III.D.6-1](#)).

To ensure accuracy and credibility of financial and budget related documents, the College, in consultation and coordination with the UHCC System office, utilizes various multi-year financial projection models, historical revenue and expenditure patterns, business plans, and enrollment forecasts to determine anticipated cash and fund balances, revenues, and expenditures([III.D.6-2](#)).

The College ensures financial resources are appropriately allocated to student learning programs and services through Integrated Planning for Institutional Effectiveness as detailed in

III.D.2([III.D.6-3](#)). This program and unit review process ensures that resource requests, and subsequent investment of resources, are aligned with program and unit needs and activities and with the College's strategic plan goals and objectives.

The College maintains financial documents, including the budget, which is developed so that financial resources support student learning programs and services. The fiscal information in the Kualii Financial System (KFS)--a systemwide financial accounting system which tracks expenditures through the budget--is readily available for review by representative budget authorities. All transactions posted in KFS undergo an approval routing process that may go all the way up to the UH System level, depending on the types and dollar amount of the transaction. These transactions are reviewed and monitored by staff in the Business Office. Further, UH System offices, such as the Office of Procurement and Real Property Management, occasionally conduct random reviews of transactions. Approving budget authorities are involved in the budget process and are responsible for development and management of their budgets. The Hawai'i CC VCAS works with the various administrators and their designees in formulating an overall campus budget, to ensure that the financial resources support learning programs and services. Monthly Budget vs. Actual reports are provided to the administrators to help monitor operational expenditures against their allocated budgets([III.D.6-4](#)).

### **Analysis and Evaluation**

Hawai'i CC's financial documents are reviewed for allowability, allocability, reasonableness, and accuracy. Budgets are allocated to the programs, departments, units, and support services. The expenditure approval process ensures that programs utilize their allocations properly.

**III.D.7. Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.**

### **Evidence of Meeting the Standard**

The College responds in a responsible and timely manner to internal and external audit findings. Consolidated financial statements, which include audit findings, are posted on the UH Financial Reporting webpage([III.D.7-1](#)[III.D.7-2](#)).

### **Audit results:**

The BOR oversees the integrity of financial position and operations, including follow-up and corrective actions related to audit findings. Per Article II, Section D.2.e of the BOR by-laws, the Committee for Independent Audit mandates that the College report audit findings and related corrective actions. The College works closely with Office of the Vice President for Budget and Finance([III.D.7-3](#))to report and follow up on audit findings.

Responses to findings, including items stated in the management letter related to UH annual financial statements, are coordinated at the system level through the UH Budget and Finance Office. Audit findings are discussed with campus administrative staff, who notify affected units to ensure units have an understanding of the reason for the finding and the regulations or other requirements upon which the finding is based. Subsequent audits confirm corrective actions have been taken, which will be reported to the board.

For all internal or external audit findings, affected units and administrative or support unit staff discuss and develop corrective action plans, which may include recording of transactions to correct errors, changes to existing procedures or development of new procedures, staffing changes, training, and/or implementation of new systems (e.g., Destiny) to improve compliance with regulations, to increase or enhance financial or programmatic data available for monitoring and decision making, or to improve internal control.

Corrective action plans identify the program and individuals responsible for implementing corrective action, actions taken to correct the audit finding or deficiency (if applicable), actions taken to prevent reoccurrence (if applicable), and the date corrective actions were taken. Additionally, these corrective actions may be confirmed by a subsequent review of the affected operation or a follow-up audit as determined necessary by the auditor. The plans are communicated to the auditor in accordance with deadlines set by the auditor or coordinating office such as ORS (A-133 audit corrective action plans).

Hawai'i CC had one audit finding in 2017 for the Federal Direct Student Loan program, with two items needing to be addressed: 1) evidence of monthly reconciliation of borrower data, and 2) exit counseling to borrowers in a timely manner. The College took corrective action and by July 1, 2017, developed a monthly reconciliation process and standard operating procedure to ensure timely reporting of all loan records between the institution and Common Origination and Disbursement. The College also began running weekly reports to monitor all students that either Drop below half time, graduate, or disenroll, to ensure that exit notification letters are sent to students within the allotted time frame([III.D.7-4](#)).

### **Analysis and Evaluation**

Hawai'i CC provides responses to external audit findings that are comprehensive and timely. Responses to any external audit findings are properly communicated through appropriate channels at both the UHCC and campus levels.

**III.D.8. The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness and the results of this assessment are used for improvement.**

### **Evidence of Meeting the Standard**

Evaluation of campus financial and internal control systems are governed by UH Systemwide Executive Policies EP 8.204 University Audit Plan([III.D.8-1](#)) to ensure that they are effective.

Consolidated financial statements for the University of Hawai'i, which includes Hawai'i CC, are prepared in accordance with generally accepted accounting principles and are audited annually by external auditors. For the year ending June 30, 2017, the auditors reported, "the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the University of Hawai'i, as of June 30, 2017 and 2016, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America"([III.D.8-2](#)).

The auditors consider the University's internal controls relevant to the preparation and fair presentation of the consolidated financial statements in order to design appropriate audit procedures, but not for the purpose of expressing an opinion on the effectiveness of internal control. However, any weaknesses in financial or internal control observed by auditors during the course of the audit which are required to be reported by federal regulations are reported in a Financial and Compliance Audit report. Any weaknesses in financial or internal control which are not required to be reported by federal regulations in the compliance report are reported in an Internal Control and Business Issues Report.

The Financial and Compliance Audit report also provides a report on compliance with the requirements of laws, regulations, and contracts and grants applicable to its federal programs that could have a direct and material effect on each of the University's major federal programs. For the year ending June 30, 2017, the auditors stated, "In our opinion, the University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2017." With respect to internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program, the auditors stated, "We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses." The auditors found six instances of noncompliance which were required to be reported but stated, "Our opinion on each major federal program is not modified with respect to these matters"([III.D.8-3](#)).

The Internal Control and Business Issues Report discloses any weaknesses in financial or internal control which are not required to be reported by federal regulations in the Financial and Compliance Report. In addition, the report discloses whether findings from the prior audit are resolved or unresolved and if any of the findings are repeat findings in the current year. For the year ending June 30, 2017, the auditors did not report any findings for Hawai'i CC([III.D.8-4](#)).

Financial and internal control findings for central offices (General Accounting and Loan Collection Office, Financial Management Office, etc.) are addressed in the same manner as campus findings. Affected units discuss and develop corrective action plans which may include recording of transactions to correct errors, changes to existing procedures or development of new procedures, staffing changes, training, or implementation of new systems.

Hawai'i Revised Statutes §23-12 ([III.D.8-5](#))require the State of Hawai'i's Office of the Auditor to conduct a review of University of Hawai'i special funds, revolving funds, and trust funds and accounts once every five years. The review includes an evaluation of the original intent and purpose of each fund, both as expressed by the Legislature and as understood by the expending agency, the degree to which each fund achieves the stated and claimed purposes, an evaluation of performance standards established by the agency, and a summary statement reflecting total fund transactions in the preceding five fiscal years, including the fund balance at the beginning of each fiscal year, total deposits and withdrawals, amount of interest earned, total expenditures made from the fund, and the ending fund balance for each fiscal year. The Office of the Auditor's Report 14-18, Review of Special Funds, Revolving Funds, Trust Funds, and Trust Accounts of the University of Hawai'i, examined 65 university special funds, revolving funds, trust funds, and trust accounts. The report was completed in December 2014([III.D.8-6](#)). Report

14-18 stated that the Community Colleges Special Fund, established by §304A-2162, “continues to serve the purpose for which it was created, but it functions as, and meets the criteria for, a revolving fund and should be reclassified as such.” Report 14-18 was presented to the 2015 Hawai‘i State Legislature; however, the Legislature, through further consultation with UHCC, determined that the special fund classification was appropriate.

The university’s Office of Internal Audit conducts UH internal audits to ensure the quality and integrity of the university’s compliance with legal, regulatory, and policy requirements; financial reporting and financial statements; and internal controls. The university’s Office of Internal Audit reports its findings directly to the BOR Committee on Independent Audit to ensure appropriate oversight, management, and operating responsibilities. Also, the UH internal auditor performs audits of selected programs (e.g., petty cash, culinary program) and may identify internal control deficiencies.

The UHCC campuses participate in annual surveys to ensure that revenue bond expenditures and uses of spaces improved by revenue bonds remain consistent with regulatory and legal restrictions.

Audits of a specific department, program, or fund may be conducted by a legislative auditor or an external audit firm that is hired by the university. These audits may identify internal control deficiencies.

For audits by the UH internal auditor or other external auditors, corrective actions may be confirmed by review of operations or follow-up audit by auditors, if any.

In addition to UH System internal audits, the Hawai‘i CC Business Office conducts a review of campus programs or units to identify any deficiencies. If any deficiencies are found, recommendations are made for improvement with follow up to ensure that the deficiencies are addressed. Finally, internal and financial control systems are also considered when developing procedures that affect staffing assignments and implementation of improvements to financial systems or sub-systems.

Extramural funding agencies may perform program or financial audits of grants or contracts at any time during or after the funding period for any reason, including normal programmatic or financial monitoring or in the event of suspected fraud or criminal activity.

The University of Hawai‘i has established Administrative Procedures on Business and Finance that govern financial management. These policies and procedures are reviewed regularly and are updated to ensure compliance with applicable laws and regulations. The UH Internal Auditor also conducts audits to ensure compliance with UH policies and procedures([III.D.8-7](#)).

### **Analysis and Evaluation**

Following system policy, Hawai‘i CC’s financial and internal control systems are evaluated for validity and effectiveness. Along with legislative audits and UH System internal audits, the Hawai‘i CC Business Office reviews campus programs or units to identify any deficiencies. If

any deficiencies are found, recommendations are made for improvement with follow up to ensure that the deficiencies are addressed.

**III.D.9. The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.**

### **Evidence of Meeting the Standard**

Sufficient cash flow and reserves are retained by the College so that stability is ensured and strategies for appropriate risk management can be supported. The College follows the reserve policy established by UHCCP 8.201 Unrestricted Fund Reserve Policy – General, Special, Revolving Funds(III.D.9-1). The minimum cash reserves are to be maintained at 5% of unrestricted funds expenditures and encumbrances. The target cash reserves may be maintained at a level that is above the 5% minimum and up to 10% of the unrestricted funds expenditures and encumbrances. All UHCC campuses meet both 5% minimum and 10% targeted reserve requirements. For fiscal year 2018, the Hawai‘i CC reserve amount held centrally by the UH System totals \$1,143,937. This is in the operating budget as presented to the BOR meeting on August 10, 2017.

There are two primary sources of revenue that are used to support the operating budget of the College: state general fund appropriations and tuition revenue. State general funds are appropriated to the community college campuses by the State Legislature. The state provides approximately one quarter of the funding prior to the beginning of the fiscal year with the remaining full year allocation made prior to the end of the first quarter. State general fund revenues are used almost exclusively to pay employee salaries. The College collects tuition prior to the beginning of fall and spring terms and these funds are expended over the course of each term. Tuition revenue projections are adjusted according to actual enrollments and budget modifications are made if necessary. Revenue from tuition is used to support salaries and other operational expenses of the College. Unexpended tuition revenue is the primary source of the College’s cash reserves.

The UH System is a state agency and is covered within the provisions of the State of Hawai‘i’s self-insurance program. The UH risk management program was established through UH Executive Policy EP 8.207. Through this policy, additional insurance shall be secured only where hazardous conditions increase the potential and probability of loss.

The State of Hawai‘i, to include the UH and its ten campuses, is self-insured and provides insurance policies and coverages for all state agencies. The College has a delegated responsibility to review potentially high-risk programs and activities and to ensure that these programs and activities are properly assessed to minimize or prevent liability concerns. Oversight for all insurance-related requirements and issues is provided to the College by the UH Office of Risk Management. This office assists the College in identifying and managing risks in order to reduce losses, maintain financial stability, and protect university resources(III.D.9-2).

## Analysis and Evaluation

The cash flow strategies at Hawai‘i CC are sufficient to maintain stability for the implementation and management of plans to meet emergencies and other occurrences. The College meets cash reserve requirements set by the UHCC System made up of a minimum reserve (5% of prior year expenditures) and a target reserve (5%-10% of prior year expenditures).

**III.D.10 Fiscal Responsibility and Stability: The Institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.**

## Evidence of Meeting the Standard

The UH System has offices established to provide financial oversight and support to campuses. Overall UH financial reporting responsibilities are handled by the UH Financial Management Office([III.D.10-1](#)). The Office of Research Services (ORS) is responsible for the management of extramurally funded programs([III.D.10-2](#)). ORS reviews and approves research and training grants from federal and other external agencies. In addition, extramural fund financial information is maintained in the financial system of the Research Corporation of the University of Hawai‘i (RCUH). ([III.D.10-3](#)) Funds generated through fundraising efforts are overseen by the UH Foundation([III.D.10-4](#)).

Kuali Financial System (KFS), a systemwide financial accounting system designed to meet the needs of higher education, was implemented in July 2012. Users of KFS have the ability to review financial information at an account level. UHCC generates financial reports for budgets, historical or current year revenues, expenditures, transfers, legislative or executive restrictions, enrollment trends, carry forward cash balances, reserve balances, and cash projections for the campuses. The College’s internal oversight of funds and expenditures is exercised by the VCAS. For extramural funds, budget to actual reports, eThority reports, and loan funds, KFS online-available balance screens provide monitoring of financial status.

Financial information is communicated throughout the College periodically via memos, reports, and meetings to monitor financial status and to assess the need for budget adjustments due to changes to initial plans, unanticipated savings, or new requirements. This information is used to prioritize the various financial decisions of the College, including identification of funds that can be reallocated, which ensures the appropriate use of funds.

While the UH ORS centrally manages all extramural funds, the College has a fiscal specialist in the Business Office to provide fiscal support. Fiscal transactions are processed through the RCUH system. The principal investigator (PI) of each award maintains oversight and control of funds, and is responsible for reviewing purchases and authorizing personnel hires within the scope of the contract/grant. Compliance with the regulations and requirements covering the award is audited as part of the annual systemwide Financial and Compliance Audit (A-133).

The College’s Financial Aid Office maintains documentation to demonstrate compliance with regulations and requirements, such as student eligibility based on need; financial aid awards that

do not exceed unmet need or maximum award limits; adjustment of awards when unmet need changes or a student withdraws; repayment to federal program for over-award adjustments; reporting of awards, adjustments, or withdrawals to federal agency; and exit interviews for students with loans. Compliance with federal Title IV requirements is demonstrated through the campus maintenance of documentation for student eligibility, adjustments, and reporting of awards. Financial aid grants and loan programs are also audited as part of the annual Systemwide Financial and Compliance Audit (A-133)([III.D.10-5](#)).

Operational oversight of the College's revenue generating program funds for campus units and activities that generate revenue, including the library, culinary, construction, transportation, and other programs, is stated in the UHCCP #8.200 Financial and Operational Oversight of Revenue Generating and Financially Self-Sustaining Programs. According to the policy, programs are required to provide business plans and budgets to the Business Office. The business plans require the programs to review and project the revenue to cover direct costs. Programs are required to generate an administrative cost to cover their share of general campus operating expenses.

There are a variety of contractual agreements that Hawai'i CC enters into both with internal and external entities. These agreements allow the College to utilize existing and additional financial, technological, physical, and human resources to deliver educational services to all segments of the Hawai'i Island community. The agreements include, but are not limited to, purchase orders, contractual procurement orders, real property lease/rental agreements, memorandums of agreement, affiliation and sponsored/sheltered class agreements, and extramural contracts. All contractual agreements go through several layers of review and approval to ensure that they are consistent with Hawai'i CC's mission and goals: unit-, department-, or division-level administrative review; Business Office review; vice chancellor, dean, or director review; and, if needed, chancellor review.

Auxiliary activities are revenue-generating programs and activities that provide non-instructional goods or services funded by a user charge or fee. Auxiliary activities include activities such as food service, vending machines, and facilities rental and are conducted for the benefit of students, faculty, and staff. Auxiliary activities are reviewed annually as part of the College's revenue-generating program planning and budget process([III.D.10-6](#)). This process ensures that these activities are actively engaged in the financial management responsibilities of the enterprise and to ensure the activities are financially solvent.

Monies from scholarships, fundraisers, and donations are housed in accounts under the UH Foundation and are monitored by the foundation's internal control system. The UH Foundation's responsibilities are to ensure that properly authorized transactions are processed in a timely manner and that disbursements are in compliance with account restrictions.

The Treasury Office administers the cash handling and cash management of the University System. This office also administers the TouchNet eCommerce system for non-registration related payments([III.D.10-7](#)). Hawaii CC complies with policies and procedures for the receipting, depositing and cash management of funds received by the University([III.D.10-8](#)).

The Capital Asset Accounting Office works with campus and system departments in the administration of all capitalized asset accounting which includes accounting for equipment assets, CIP assets, plant assets, and other agency vested assets([III.D.9](#)). Hawai‘i CC complies with policies and procedures for the acquisition, use, upkeep, tracking, and disposition of capitalized assets.

### **Analysis and Evaluation**

In addition to system monitoring, Hawai‘i CC maintains effective oversight of finances by closely monitoring financial reports, distributing financial information regularly throughout the College in order to assess the need for budget adjustment, and by documenting compliance with external program requirements.

### **Liabilities**

**III.D.11 The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.**

### **Evidence of Meeting the Standard**

As described in Standard III.D.2, Hawai‘i CC’s financial planning is integrated with its institutional mission and goals in order to guarantee long-term support of its student learning programs and services.

The College prioritizes its payments for liabilities and obligations through a variety of means, including continual assessment of revenues and expenditures, identification of projected revenues and expenditures, and the maintenance of reserves at both the system and College levels. Short-term and long-term financial planning considers the College’s long-range obligations. Long-term obligations are taken into account when developing annual campus financial plans. These nondiscretionary obligations are considered before programming budgets for discretionary items and are reflected as line items in the operating budget([III.D.11-1](#)).

In addition, the College works closely with both the UHCC and UH System offices. Long-term debt in the form of debt service on revenue bonds to finance new construction and facility improvements are considered in both short-term and long term financial planning.

The UHCC System supports all campuses by securing and allocating CIP funding to fund major construction and renovation projects. The primary revenue source for university CIP projects comes from state-issued general obligation bonds for which the state funds debt service payments to retire the bonds. Individual campuses are not required to pay for these long-term obligations.

The UHCC campuses do not issue debt for Other Post-Employment Benefits (OPEB), insurance costs, or repair and maintenance projects which are funded by the state. The items currently financed with long-term debt are limited to projects that directly create cost savings that offset

debt service costs. Revenue bond debt service for Pāalamanui has resulted in cost savings from elimination of lease rental([III.D.11-1](#)).

### **Analysis and Evaluation**

Hawai‘i CC engages in long-term financial planning and creates annual budgets that maintain sufficient financial resources over time to address current and future payments of liabilities and obligations.

**III.D.12. The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.**

### **Evidence of Meeting the Standard**

The employer’s share of OPEB obligations for General Fund positions is centrally paid for by the General Fund for all state agencies. As such, employer OPEB obligations for General Fund positions are not part of the UH System operating budget.

The University of Hawai‘i is, however, obligated to cover the OPEB requirements for the relatively small number of non-General Funded positions. The university’s contributions are calculated as part of the state’s total contribution requirements and are reimbursed to the state’s General Fund as part of the fringe benefit rate on the UH employees’ actual salaries. The UH System’s liability for OPEB is not allocated internally to individual departments, funds, and campuses([III.D.12-1](#)).

The university’s annual OPEB cost for non-General Fund employees is calculated based on the annual required contribution (ARC), an amount actuarially determined in accordance with the parameters of Governmental Accounting Standards Board Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and to amortize any unfunded actuarial liabilities over a period not to exceed 30 years. Employer OPEB obligations for non-General Fund positions are fully recognized and accounted for in UHCC non-General Fund financial plans. Annually, funds are allocated by the College as part of the budget planning and execution process.

The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

As mentioned in the Notes to the Consolidated Financial Statements for June 30, 2017 and 2016, page 67, Funding Policy and Annual OPEB Cost section: “The University is required by GASB Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions, to obtain an actuarial valuation every other year. Therefore, an actuarial valuation was performed as of July 1, 2015.”

### Analysis and Evaluation

Hawai‘i CC appropriately allocates resources for payment of benefits, liabilities, and obligations for non-General Fund positions. The level of funding is recognized and accounted for in UHCC financial plans.

**III.D.13. On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.**

### Evidence of Meeting the Standard

The UHCC System, in coordination and consultation with the College, calculates the amount of the financial obligation associated with locally incurred debt instruments. Funds are transferred from the College to the UHCC System on an annual basis for repayment of these debt instruments. Debt instruments were used to finance the development and construction of the new Pālanui campus. During development of the annual budget, the College identifies assessed financial obligations and allocates resources to meet debt agreements. The College’s annual financial projection allocates the amount required for repayment of debt to ensure it does not affect the financial condition of the institution([III.D.10-1](#)).

The UHCC System supports all campuses by securing and allocating capital improvement program (CIP) funding to fund major construction and renovation projects. The primary revenue source for University CIP projects comes from state-issued general obligation bonds where the state funds debt service payments to retire the bonds. Individual campuses are not required to pay for these long-term obligations.

The items currently financed with long-term debt are limited to projects that directly create cost savings that offset debt service costs. Revenue bond debt service for Pālanui has resulted in cost savings from elimination of lease rental([III.D.13-2](#)).

### Analysis and Evaluation

Annually, Hawai‘i CC assesses and allocates resources for repayment of locally incurred debts that can affect the financial condition of the institution.

**III.D.14. All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.**

### Evidence of Meeting the Standard

Hawai‘i CC has long-term debt instruments (revenue bonds). In fiscal year 2013, revenue bond usage was approved by the UH BOR for the construction costs related to the Pālanui campus. Annually, funds are allocated for the debt service as part of the budget planning and execution process, which is 2.1% of the operating budget. Revenue bond debt service for Pālanui has resulted in cost savings from elimination of lease rental([III.D.14-1](#)).

University policies and procedures require that the funds be used in accordance with state and federal requirements, the mission and goals of the university, and the purpose of the funding source:

- UHCCP # 8.200 Financial and Operational Oversight of Revenue Generating and Financially Self-Sustaining Programs([III.D.14-2](#))
- RP 10.201 Interests in Real Property([III.D.14-3](#))
- EP 2.212 Management of University Bond System (UBS)([III.D.14-4](#))

The revenue bond processes and compliance have been reviewed and evaluated by the UH Office of the Internal Audit report for fiscal year 2013.

Auxiliary activities at Hawai‘i CC, including food service, are conducted for the benefit of students, faculty, and staff. Auxiliary activities are reviewed annually to ensure activities are not operating at a deficit or accumulating excess cash or profits. UHCCP #8.200 ([III.D.14-5](#)) provides guidance in carrying out financial and operational oversight to ancillary and self-sustaining services. Bookstore operations are administered by the UH Mānoa Bookstore unit.

The fiscal management of extramural, externally funded programs and contractual agreements is reviewed and approved through the UH ORS. The usage of the funds must be in accordance with the rules and regulations as stipulated in the award contract([III.D.14-6](#)). An annual Financial and Compliance Audit is conducted in accordance with the Office of Management Budget (OMB) circular A-133.

Fundraising efforts are conducted by the University of Hawai‘i Foundation (UHF) within the UH System; its activities and funds are audited separately from the UH System annual audits. In addition to the UHF fundraising efforts, the campus is also active in seeking revenue to fund scholarships, staff development, and expansion goals through grants and contracts. The UHF takes in the revenue and disburses the accounts payable, including scholarships, reimbursements, and expenditures.

University policies and procedures govern acceptance of gifts and fundraising activities and provide guidelines to ensure funds are properly expended in compliance with donor restrictions and the usual and common business and regulatory practices ([III.D.14-7](#)[III.D.14-8](#), [III.D.14-9](#), [III.D.14-10](#)). Fundraising, grants, and contracts transactions are reviewed and monitored by the UHF staff or the College’s Business Office.

### **Analysis and Evaluation**

All financial resources at Hawai‘i CC, including debt instruments, auxiliary activities, fundraising activities, and grants, are utilized for their intended purposes and in compliance with institutional regulations.

**III.D.15. The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.**

**Evidence of Meeting the Standard**

The Financial Aid Office monitors and manages student loans so that the College is in compliance with federal requirements. The College follows the policies of Title IV of the Higher Education Act (2017-18 catalog, pp. 52-55) and is an institutional member of the National Association for Student Financial Aid Administrators (NASFAA). Daily newsletters are reviewed by the Financial Aid Office to keep abreast of changes in regulations, upcoming deadlines, and updates about NASFAA's efforts to advocate for aid administrators. Access to the federal Student Aid Resource web page ([ifap.ed.gov](http://ifap.ed.gov)) to review regulations has been given to all of the Financial Aid staff. In addition, the staff attends various state and regional association trainings.

The Financial Aid officer is responsible for ensuring that changes to procedures and institutional policies are made in a timely manner to maintain compliance. Annually, a federal A-133 Compliance Audit is done to ensure that Title IV aid is being administered in accordance to federal regulations. If the campus has a finding, an audit will be conducted the following year for that compliance issue to ensure that the campus has corrected its procedures and policy. The Hawai'i CC Financial Aid Office's last federal A-133 Audit was completed for the 2016-2017 award year and one audit finding with two items were noted and have been corrected by the College.

Hawai'i CC is responsible for submitting a Program Participation Agreement (PPA) Application every 3-5 years to the U.S. Department of Education to receive approval to administer Title IV aid. Hawai'i CC's current PPA is set to expire on March 31, 2021.

Hawai'i CC has a current student loan default rate of 24.2% ([III.D.15-1](#)). This is a significant decrease from the student loan default rate that hovered between 27.6 and 28.1% over the prior three years ([III.D.15-2](#)), which is below the 30% threshold that would require the creation of a student loan default prevention plan. Although not required by the Department of Education to have a default prevention plan in place, the Financial Aid Office at the College makes significant efforts in the areas of default prevention and debt management by including a default prevention plan as well as informational videos and resource links on the Financial Aid website ([III.D.15-3](#)). The College has developed policies and procedures to ensure timely dissemination of Exit Notification for loans as well as consistent monthly reporting of federal student loans to the Common Origination and Disbursements (COD) agency ([III.D.15-4](#)).

Student loan default rates, revenues, and related matters are monitored and assessed for compliance with federal regulations. The Financial Aid manager and the Financial Aid officer, whose program responsibility is student loans, review the annual draft cohort default rate that is provided in February, the official cohort default rate, and the reports that the campus receives from the federal loan servicers.

Student loan default rates, revenues, and related matters are monitored and assessed for compliance with federal regulations. The Financial Aid manager and the Financial Aid officer, whose program responsibility is student loans, review the annual draft cohort default rate that is provided in February, the official cohort default rate, and the reports that the campus receives from the federal loan servicers.

### **Analysis and Evaluation**

Hawai‘i CC monitors and manages student loan default rates and federal grants, which include Title IV, to ensure compliance with federal requirements. The most current cohort default rates for Hawai‘i CC are below the federal guidelines of 30%. Annual audits are conducted, and findings, if any, are corrected. The College has processes in place to ensure default rates remain within acceptable standards and has strengthened collaboration with the UH System Financial Aid Office to improve reporting.

**III.D.16. Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.**

### **Evidence of Meeting the Standard**

There are a variety of contractual agreements that Hawai‘i CC enters into both with internal and external entities. These agreements allow the College to utilize existing and additional financial, technological, physical, and human resources to deliver educational services to all segments of the Hawai‘i Island community. The agreements include, but are not limited to, purchase orders, contractual procurement orders, real property lease/rental agreements, memorandums of agreement, affiliation and sponsored/sheltered class agreements, and extramural contracts. All contractual agreements go through several layers of review and approval to ensure that they are consistent with Hawai‘i CC’s mission and goals: unit-, department-, or division-level administrative review; Business Office review; vice chancellor, dean, or director review; and, if needed, chancellor review.

All agreements are subject to applicable UH policies and procedures included in the UH Systemwide Administrative Procedures Manual A8.200([III.D.16-1](#)), BOR Policies and Bylaws Chapter 8([III.D.16-2](#)), and UH Systemwide Executive Policies E8.000 ([III.D.16-3](#)). Finalized agreements include clearly defined roles and responsibilities, services, corrective actions, and termination to ensure oversight and integrity.

Contractual agreement awards providing extramural funding to Hawai‘i CC are reviewed and executed by the UH ORS. Annually, usage of the extramural funds is audited as part of the consolidated financial statement audit and compliance audit. Non-extramural funded procurement agreements that involve amounts greater than \$25,000 are reviewed and executed by the UH Office of Procurement and Real Property Management.

University policies and procedures govern acceptance of contracts and provide guidelines to ensure all fiscal resources are expended in accordance with the goals, objectives, and mission of the university and in compliance with federal and state laws and regulations, university policies

and procedures, sponsor terms and conditions of the contract, and common business and regulatory practices.

Affiliation agreements and sponsored/sheltered class agreements that are executed by the College are reviewed following an established on-campus routing procedure. This is to ensure adherence to applicable UH policies and procedures. These agreements are under College control and allow for changes or terminations by the College([III.D.16-4](#)).

The Office of the Vice President for Community Colleges (OVPCC) conducts post-audit reviews of affiliation agreements and sponsored or sheltered class agreements to ensure that agreements comply with university policies and procedures and reasonable risk tolerance. The OVPCC also reviews Affiliation Agreement Reports and Sponsored/Sheltered Class Reports to determine if the affiliation agreements and sponsored/sheltered class memorandums of agreement are consistent with the academic/instructional direction of the community colleges.

### **Analysis and Evaluation**

Agreements with external entities are consistent with the institution's mission and goals to deliver educational services to all sectors of the Hawai'i Island community. UH System policies and procedures govern all agreements, which are reviewed closely to maintain the integrity of the institution and the quality of its programs, services, and operations.

### **CHANGES AND PLANS ARISING OUT OF THE SELF-EVALUATION PROCESS**

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Review and revise the integrated planning process (including evaluation of master plans)	I.B.9, III.B.2, III.C.1, III.D.2	(Related to QFE Project #1)		

## **Standard IV: Leadership and Governance**

---

**IV.A. Decision-Making Roles and Processes**

**IV.B. Chief Executive Officer**

**IV.C. Leadership and Governance**

**IV.D. Multi-College Districts or Systems**

## Standard IV: Leadership and Governance

---

The institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continued improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

### IV.A. DECISION-MAKING ROLES AND PROCESSES

---

**IV.A.1 Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective planning and implementation.**

#### Evidence of Meeting the Standard

In the spirit of ‘*E Imi Pono* (“seeking excellence”), institutional leaders at Hawai‘i CC encourage College wide innovation through participatory processes such as shared governance, all-College/*Kauhale*/convocation events, professional development, division/department meetings, committee work, student government, personnel/student surveys, advisory councils, reassigned time projects, assessment, and program/unit review. Benchmarks for institutional excellence, as demonstrated in the mission of the University of Hawai‘i Community Colleges ([IV.A.1-1](#)) and Hawai‘i CC’s newly revised mission and institutional learning outcomes ([IV.A.1-2](#)), speak to the College’s dedication to the island *Kauhale*, to respect for diverse perspectives, and to student success and educational excellence.

Shared responsibility for institutional performance is emphasized through traditions such as each semester’s opening “All-College Breakfast,” during which administrative team members report on new and ongoing projects to a gathering of all Hawai‘i CC faculty, staff, administrators, and student government representatives ([IV.A.1-3](#)). These meetings also include activities and foster dialog about institutional goals, planning, and student achievement ([IV.A.1-4](#)).

Professional development opportunities, such as participation in conferences, seminars, and workshops, also support innovation. Two dynamic examples include the Hawai‘i National Great Teachers Seminar ([IV.A.1-5](#)) and the Hawai‘i Student Success Institute ([IV.A.1-6](#)). Not only do these opportunities serve as a springboard for innovation through presentations of new ideas and strategies for student success, they also provide a forum for faculty and staff to network with counterparts from other colleges, which is significant given the College’s geographic location. Additionally, leadership supports the efforts of the Faculty/Staff Development Committee

([IV.A.1-7](#)) to provide professional development workshops throughout the year. The College recognizes innovative efforts of individual faculty and/or staff members with its Innovation Award ([IV.A.1-8](#)).

Innovation also stems from division/department meetings where colleagues convene to discuss current issues and possible solutions. At times, these outcomes can lead to even wider meetings to confer more broadly about campus issues. For example, the Liberal Arts and Public Services division has met to discuss, among other issues, program modifications ([IV.A.1-9](#)), assessment ([IV.A.1-10](#)), and approaches to resolving plagiarism ([IV.A.1-11](#)).

Equally significant, committee work often acts as a conduit for innovation. Due to the composition of most committees, members represent different facets of the College and committee meetings provide a forum for sharing multiple perspectives. For example, when members of the Hawai'i CC International Education Committee wanted to promote the benefits of internationalism, the winning suggestion was to invite Fulbright scholars from around the world to give presentations about their areas of expertise, as well as about their home countries. Combined, these aspects would deepen intercultural understanding and support the College's institutional learning outcomes. Notably, this suggestion came from a professor who had been supported by administration to pursue a Fulbright opportunity in India. The idea became an annual event for the College, which has now hosted individuals from Bulgaria ([IV.A.1-12](#)), Indonesia ([IV.A.1-13](#)), and India ([IV.A.1-14](#)).

Other sources of innovation include Program Advisory Councils, which represent local industry leaders and influence programmatic initiatives, and reassigned time projects that allow faculty to pursue ideas and innovations pertinent to student success. For example, Hawai'i CC's coordinator for ESL instruction used reassigned time ([IV.A.1-15](#)) to create a framework for an English language learners outreach/recruitment project to better serve English language learners in the community. Another example is the English department's professional development program, which offers faculty release time for implementing, documenting, and sharing new instructional methodologies and wrap-around strategies to support student success in its redesigned co-requisite developmental courses (see Standard II.A.2).

Additionally, the College's review and planning processes, described further in Standards I.B.1-2, serve as a forum for collecting and forwarding innovative ideas and action plans. Assessment ([IV.A.1-16](#)), the program and unit review process ([IV.A.1-17](#)) and the College Effectiveness Review Committee (CERC) ([IV.A.1-18](#)) all rely on reflective analysis to reveal strengths, weaknesses, and needs. Discoveries can lead to action items concerning teaching innovations, identification of new trends and directions for programs/units, and opportunities for collaboration among disciplines or divisions/units.

Other policies, practices, and programs that encourage collaboration on institutional improvement include:

- HAW 4.201 - Integrated Planning for Institutional Effectiveness, a policy to “identif[y] the various components that Hawai'i CC uses to plan for, implement support for, evaluate and improve student success;” ([IV.A.1-19](#))

- Innovations projects supported by the Office of the Vice President of Community Colleges ([IV.A.1-20](#)). A comprehensive website highlights new directions and campus ideas that have been funded;
- Collaboration on major System initiatives (Developmental Education Acceleration, STAR GPS registration system, Pathways ([IV.A.1-21](#))), which promote efficient processes for instruction, course selection, registration, and academic career guidance/monitoring;
- College wide invitations to contribute to institutional processes and procedures, such as revision of the College’s institutional guiding statements or strategic plan ([IV.A.1-22](#));
- Cross-departmental student success committees such as the Strategic Enrollment Management Committee, Student Success Committee, and the newly formed Student Success Pathways Committee; and
- Participation in *wala‘au* “talk story” sessions, which promote congregation, interaction, and the exchange of ideas relative to campus initiatives ([IV.A.1-23](#)).

### Analysis and Evaluation

Guided by the institutional mission, Hawai‘i CC encourages participatory processes and implements innovations through professional development, integrated planning, and other institutional practices. Hawai‘i CC’s leadership encourages initiative by offering rewards and professional development opportunities to faculty and staff in order to promote student learning and institutional improvement.

**IV.A.2 The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special-purpose committees.**

### **Evidence of Meeting the Standard**

Hawai'i CC has numerous policy, planning, and special-purpose committees, each of which has guidelines that specify purpose, membership, and roles of participation for administrators, faculty, staff, and students. Established policies and procedures are regularly reviewed for effectiveness.

HAW 3.303 defines the College's shared governance model, including the roles of its three most important governing bodies: the College Council, the Academic Senate, and the Associated Students of the University of Hawai'i (ASUH). The policy outlines the purpose of each of these assemblies and states that regular evaluation of the governance groups serves "to ensure the integrity and effectiveness of the College's governance and decision making processes." ([IV.A.2-1](#)) Several recent governance changes resulted from the evaluation process: the 2015-16 College Council "facilitated a campus wide committee to review, revise and implement changes to the Hawai'i CC College Council Charter"; the 2016-17 Academic Senate updated its charter to accurately define the duties of the secretary and to implement the idea of select committees in addition to standing committees, among other changes; and the ASUH amended its constitution and by-laws in the 2015-16 academic year.

The College Council's primary role is to apprise the chancellor of College wide issues. Membership is comprised of representatives from all of the institution's constituencies (administration, faculty, staff, and students); in addition, anyone from the College may bring forth concerns. Topics include budgeting, strategic planning, community relations, accreditation and assessment, institutional guiding statements, and coordination of committees. The Committee Handbook provides a current list of committees and guidelines ([IV.A.2-2](#)); an overview of college committee structure is outlined in HAW 3.301 ([IV.A.2-3](#)). The council also forms task forces to address special purposes. Participation roles are defined further in the College Council Charter ([IV.A.2-4](#)).

The Academic Senate is comprised of all instructional and non-instructional faculty and holds responsibilities pertaining to "development, modification, initiation, and review of academic policies and issues." Topics include the scope and nature of educational curricula; standards for teaching, scholarship, and service; standards and evaluation of admission, graduation, certification, and grading; and professional ethics. Guidelines for participation, as well as for service on representative committees within the Academic Senate, are explained in the Academic Senate Charter ([IV.A.2-5](#)).

The ASUH is the main forum for student participation in governance. Membership is extended to all current students of Hawai'i CC. The ASUH Charter authorizes the election of a student government "responsible for the general welfare and development of the student body" ([IV.A.2-6](#)). Elected officers of the student government collaborate with a faculty advisor and report to the

vice chancellor for Student Affairs. The ASUH president also represents the student body on the College Council.

Students can also contribute to the College by participating in service learning projects and other co-curricular activities (see Standard II.C.4) and by completing the following surveys, which solicit feedback to improve the Hawai‘i CC experience for students:

- The Community College Survey of Student Engagement (CCSSE) ([IV.A.2-7](#))
- Graduation Leaver Survey (GLS) ([IV.A.2-8](#))
- Student Climate Survey (SCS) ([IV.A.2-9](#))

Finally, students have representation on the CERC, the Student Conduct Committee, and on the Ho‘olulu Council, a special advisory council to the chancellor that is tasked with reporting on issues, programs, and policies that affect Native Hawaiians at Hawai‘i CC and within the UH System([IV.A.2-10](#)). The council also represents Hawai‘i CC on the Pūko‘a Council, a Native Hawaiian advisory council to the UH president, and on the Council of Community College Native Hawaiian Chairs. Membership is open to any Hawai‘i CC constituents; further guidelines appear in the Ho‘olulu Council charter ([IV.A.2-11](#)).

### **Analysis and Evaluation**

Guided by clear policies, procedures, and membership rules, the shared governance model has been successful in affording administration, faculty, staff, and students the opportunity to participate in decision-making processes. Shared governance responsibilities are clearly divided between the College Council, the Academic Senate, and the ASUH and are defined in their respective charters. To address the College’s role as an indigenous serving institution, the Ho‘olulu Council ensures representation of Native Hawaiians in College governance.

**IV.A.3 Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.**

### **Evidence of Meeting the Standard**

As described in Standard IV.A.2, Hawai‘i CC has policies and procedures that define the roles of the College Council, Academic Senate, and ASUH in governance, institutional policies, planning and budget, as appropriate. The institution’s organizational chart ([IV.A.3-1](#)) and functional statement([IV.A.3-2](#)) further specify the roles and management responsibilities of each Hawai‘i CC administrator.

The role of faculty in institutional governance is set forth in HAW 3.303 - Campus Governance ([IV.A.2-1](#)) and Executive Policy EP 1.201 - Faculty Involvement in Academic Policy ([IV.A.3-3](#)).

Hawai‘i CC’s Integrated Planning for Institutional Effectiveness Policy HAW 4.201 outlines the systematic, institution-wide evaluation and strategic planning process that integrates program and unit review, planning, and resource allocation to support mission fulfillment and continuous improvement of academic quality and institutional effectiveness ([IV.A.3-4](#)). Faculty members primarily exercise their voice in institutional planning and budgeting via the program and unit review process([IV.A.1-17](#)) (further described in Standards I.B.4-5) in which they report on data, program status, assessment results, goals and action plans, and budget requests. The program/unit review plans and budget requests are evaluated by the College Effectiveness Review Committee (CERC), which has representative membership from across the College ([IV.A.3-5](#)), with budget prioritization recommendations made to the administrative team. Based on the program/unit reviews and System strategic directions ([IV.A.3-6](#)), the administration shapes the College’s strategic plans and makes final resource allocation decisions.

### **Analysis and Evaluation**

Policy documents describing the Integrated Planning Process and other shared governance procedures define clear and substantive roles for administrators and faculty in institutional governance processes, providing opportunity for significant contributions to institutional policies, planning, and budget considerations.

<a href="#">IV.A.3-6</a>	Strategic Directions 2015-2021

**IV.A.4 Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.**

**Evidence of Meeting the Standard**

Faculty and academic administrators at Hawai‘i CC share responsibility for making recommendations about curriculum and student learning programs and services. A combination of policies, procedures, and well-defined structures establish these responsibilities.

As indicated in Standard IV.A.2, the Academic Senate, composed of all faculty members, plays a primary role in evaluating academic policy and curriculum. The Academic Senate Charter ([IV.A.4-1](#)) assigns responsibilities relating to curriculum and student learning programs and services to three standing committees, which review and evaluate all relevant College and System policies and procedures. These committees, which report to the Senate regularly with recommendations, are assigned the following areas of focus:

- **Educational Policy Committee.** The Educational Policy Committee reviews, advises, and makes recommendations to the Senate on academic policies including, but not limited to, standards for graduation, admissions, certification, and distance education; academic regulations; curriculum process; grading; and student relations (e.g., student conduct, grievances, and appeals).
- **Curriculum Review Committee.** The Curriculum Review Committee makes recommendations regarding the review and modification of degree requirements, program proposals, course proposals, and catalog descriptions as appropriate for all credit courses, including distance education and summer session. The Curriculum Review Committee’s recommendations are reviewed by the Senate. The Senate chair forwards the Senate’s recommendations to the vice chancellor for Academic Affairs.
- **General Education Committee.** The General Education Committee reviews course proposals and makes recommendations regarding the designations of these courses as general education. The recommendations are forwarded to, reviewed, and approved by the Senate.

In addition to the standing committees, the Academic Senate created four “Select” committees to evaluate courses and policies that fall into specific curricular categories:

- **Distance Education Committee.** The Distance Education Committee develops and proposes policies regarding a College wide, coordinated approach to online teaching and learning at Hawai‘i CC to ensure these courses meet best practices and national standards of online teaching and align with the mission of the College.
- **Hawai‘i Asian Pacific Course Designation Committee.** The Hawai‘i Asian Pacific Course Designation Committee reviews and approves courses that meet the University of Hawai‘i System requirements that identify important skills and concepts necessary for living and working in diverse communities, such as Hawai‘i. A significant component of readings, assignments, and other course materials in the course will address Hawaiian, Asian and/or Pacific cultures.
- **Sustainability Course Designation Committee.** The Sustainability Course Designation Committee reviews and approve courses that meet the University of Hawai‘i System

requirements that identify important skills and concepts regarding sustainability across a variety of academic disciplines. A significant component of readings, assignments, and other course materials will address environmental topics.

- **Writing Intensive Curriculum Committee.** The Writing Intensive Curriculum Committee evaluates courses according to the University of Hawai‘i System Articulation Agreement governing Writing Intensive (WI) designation and intercampus transfer. Hallmarks of WI designated courses include a maximum class size, minimum word count and writing prerequisite, interaction between the instructor and student as part of a writing process, and emphasis on writing as a major grade determinant and a tool for learning course material.

HAW 5.202 - Assessment Policy ([IV.A.4-2](#)) defines assessment as “the process of gathering information/data on student learning and services for the purposes of evaluating and improving the learning environment” and ensures that assessment is a consistent, College wide practice. The policy delineates how the outcomes of assessment contribute to improving student learning and services, as well as the responsibilities of faculty, staff, vice chancellors, and directors. The Assessment Committee supports continuous improvement in learning by sponsoring assessment activities, encouraging meaningful assessment practices and experiences, and promulgating discovery based on results of the assessment process. The Institutional Assessment coordinator provides training and support to develop, align, and assess institutional, unit, program, and course outcomes; maintains and publishes assessment documentation, reports, and resources; and collaborates with administrators, division/department/unit leadership, and faculty/staff to facilitate assessment activities that foster continuous improvement.

In addition, HAW 5.250 - Course Review Policy ([IV.A.4-3](#)) outlines a systematic procedure for faculty review of courses to ensure continuity and relevance over time.

Faculty and academic administrators also offer recommendations for curriculum and student learning programs and services via the program and unit review process ([IV.A.4-4](#)). Additional feedback is provided by the CERC ([IV.A.1-18](#)), which is comprised of College wide representation and chaired by the vice chancellor for Academic Affairs (VCAA), and which evaluates all comprehensive program and unit reviews to provide “quality improvement” feedback to the review writers and to provide campus planning recommendations to the chancellor.

To ensure that current practices are followed and effective, HAW 4.201 - Integrated Planning for Institutional Effectiveness Policy([IV.A.3-4](#)) specifies the VCAA as responsible for the “development and regular review” of the Academic Master Plan, which is a product of collaboration between faculty and the VCAA.

The College Council includes academic administrators, faculty, and staff as defined by College Council Charter([IV.A.2-4](#)), and provides recommendations on student learning programs, including the learning centers and library. UHCCP 5.203 ([IV.A.4-5](#)) addresses the establishment and issuance of the degrees and certificates within the University of Hawai‘i Community Colleges (UHCC), and delegates to each college the responsibility for planning, design, and establishment of programs leading to degrees and certificates.

Lastly, the Distance Education Substantive Change Process is addressed in the document titled “Substantive Change Proposal: Associate of Arts Degree via Distance Learning” ([IV.A.4-6](#)) and provides responsibilities for administration and faculty that ensure the integrity of online courses.

### Analysis and Evaluation

Hawai‘i CC charters, policies, and other documents assign responsibility for reviewing and making recommendations on curriculum and student learning programs and services to specific constituencies within the faculty and academic administration. Policy is also in place to regularly evaluate practices for compliance and effectiveness.

### LIST OF EVIDENCE

<a href="#">IV.A.4-1</a>	Charter of the Academic Senate
<a href="#">IV.A.4-2</a>	<b>HAW 5.202 Assessment Policy</b>
<a href="#">IV.A.4-3</a>	HAW 5-250 Course Review Policy and Procedure

<a href="#">IV.A.4-5</a>	UHCCP 5.203 - Program Credentials Degrees and Certificates
<a href="#">IV.A.4-6</a>	AA Substantive Change_3_12_09

**IV.A.5 Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.**

### Evidence of Meeting the Standard

The Constitution of the State of Hawai‘i, Article X, Section 6, gives the Board of Regents ([IV.A.5-1](#)) domain over the University of Hawai‘i System. Its responsibilities include authorizing, amending, and publishing policies “that provide the framework for the university.” The Regents’ Policy on Faculty Involvement in Academic Decision-Making and Academic Policy Development RP 1.210 ([IV.A.5-2](#)) ensures that Hawai‘i CC faculty members have a voice “on matters impacting and/or relating to the development and maintenance of academic policy and standards to the end that quality education is provided, preserved, and improved.” UH Executive Policy 1.210 Faculty Involvement in Academic Policy ([IV.A.3-3](#)) serves to implement RP 1.210.

At the campus level, HAW 4.201 - Integrated Planning for Institutional Effectiveness policy ensures effective decision-making for institutional plans and gives consideration to all relevant stakeholders ([IV.A.3-4](#)). Faculty, staff, and administrators provide collective input through the program and unit review process, ([IV.A.4-4](#)) CERC, and the College Council. This document includes the UH System policies on planning, delineates institutional plans, explains the implementation process of the plans, and provides a schedule for continuous review of the plans to promote ongoing improvements. The flowchart diagram of the Integrated Planning Process illustrates the cycle of the College’s resource allocation and plans implementation ([IV.A.5-4](#)).

Finally, the Hawai‘i CC concept of *Kauhale* ([IV.A.1-2](#)) requires community involvement to harness collective knowledge and expertise. As described on the College’s *About Hawai‘iCC* webpage, “Community partnerships and collaboration are central to the mission of the College. To keep curricula and requirements current and relevant, the College has invited community leaders in business, industry, and the professions to serve as advisors to provide guidance regarding course content, selection of training equipment, employment needs, and the effectiveness of different programs. Program Advisory Councils are formed for each degree program. In addition, the chancellor seeks advice from community and business leaders on ways the College can assist in development for the community. Members of these advisory groups are listed throughout the catalog.”

### Analysis and Evaluation

The College’s system of board and institutional governance ensures that all stakeholders participate in the development and review of institutional plans, policies, curricular changes, and other significant decisions. Specifically, guidelines for these considerations are stipulated in HAW 4.201 Integrated Planning for Institutional Effectiveness policy, through which the College continuously develops and reviews plans to support institutional effectiveness and student success. Depending on the nature of the matter, decisions also include the direct involvement of the College Council, Academic Senate, student government, advisory councils, industry, and the community.

<a href="#">IV.A.1-2</a>	Concept of <i>Kauhale</i>

**IV.A.6 The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.**

### Evidence of Meeting the Standard

The College uses a number of methods to disseminate information institution-wide regarding the processes for decision-making and the resulting decisions. The chancellor shares updates on College progress and institutional planning at College wide meetings, and posts this information on the Hawai‘i CC website ([IV.A.6-1](#)). Administrators also relay updates, announcements, and decisions during unit/division meetings and via campus email. In addition, significant decision-making bodies such as the College Council ([IV.A.6-2](#)), Academic Senate ([IV.A.6-3](#)), and student government ([IV.A.6-4](#)) record meeting proceedings with minutes, which are posted on the College’s website. The information described above is also discussed in division and department meetings. Other methods of communication include the faculty/staff/student listservs, the College newsletter *Kauhale* ([IV.A.6-5](#)), and the student newsletter *Ka ‘Io* ([IV.A.6-6](#)).

## Analysis and Evaluation

The College uses multiple methods, including its website, blogs, email, newsletters, and meetings, to broadcast decision-making processes and the resulting decisions.

<a href="#">IV.A.6-6</a>	Ka‘Io NEWS

**IV.A.7 Leadership roles and the institution’s governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.**

### Evidence of Meeting the Standard

The institution’s organizational chart([IV.A.3-1](#)) and functional statement ([IV.A.3-2](#)) specify the roles and management responsibilities of each Hawai‘i CC administrator. Roles and responsibilities of administrative positions are reviewed during reorganization or when a position is up for recruitment.

Regular evaluation to assure integrity and effectiveness of the institution’s governance groups, including policies, procedures, and processes, takes place within the various campus entities. As stated in Standard IV.A.2, to establish effectiveness and relevance, the governing bodies representing faculty and College wide constituencies conduct charter reviews. Review processes are documented in minutes and draft documents; revised charters are posted on the College website.

The College Council Charter was most recently updated in the 2017-18 academic year ([IV.A.2-4](#)). Additionally, the council has conducted surveys to evaluate its purpose and effectiveness ([IV.A.6-2](#)). Results are available on the council webpage and have been used as an impetus to discuss the role that the council plays within the College.

Likewise, the Academic Senate updated its charter in the 2016-17 academic year, which resulted in strengthening the preamble, identifying the need for additional committee designations, further detailing the roles of the chair and vice chair, redefining the role of the secretary to address duties related to the digital age, removing the archivist position, recognizing the addition of a permanent member from Pālamānui on the Executive Committee, and establishing a review period for the charters, practices, and processes of Senate committees ([IV.A.7-1](#)).

The ASUH amended its constitution ([IV.A.7-2](#)) and by-laws ([IV.A.7-3](#)) in the 2015-16 academic year as well.

The College also has a Committee on Committees([IV.A.7-4](#)), whose charge includes the “periodic review of committee structure[s].” Reporting directly to the College Council, the committee provides monthly updates at council meetings.

## Analysis and Evaluation

The College evaluates the institution's leadership roles and policies, procedures, and processes relative to governance and decision-making to ensure integrity and effectiveness; however, it needs to do so in a more consistent and predictable manner, formally documenting such evaluation. The institution uses some results for ongoing improvement.

## IV.B. CHIEF EXECUTIVE OFFICER

---

**IV.B.1 The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.**

### Evidence of Meeting the Standard

In accordance with the UH System classification plan ([IV.B.1-1](#)), the chancellor has primary responsibility for providing “the visionary leadership in developing, designing, facilitating and implementing campus plans, initiatives, policies and procedures to support and promote excellence across the system and the campus.” In this capacity, the Hawai'i CC chancellor--Chancellor Yamane (July 1, 2011-December 30, 2015), Interim Chancellor Onishi (January 1- June 30, 2016) and newly appointed Chancellor Solemsaas (July 1, 2016-present)--oversees all administrative and academic matters of the campus (Academic Affairs, Student Affairs, Administrative Services, Office of Continuing Education and Training, and the Pālanuanui

branch campus([IV.B.1-2](#)), including budget planning and execution, human resources management, facilities management, long- and short-range academic and administrative planning, community outreach, fundraising, and entrepreneurial activities.

Under the direction of the chancellor, clearly articulated policies regarding campus governance, committee work, and planning processes are in place. These policies provide guidance and clarify the roles of different constituents and campus leaders regarding the planning and operations of the College. The College governance structure and planning policies support a participatory and transparent system under the leadership of the chancellor (see HAW 3.301 ([IV.B.1-3](#)), 3.303 ([IV.B.1-4](#)), 4.201 ([IV.B.1-5](#))). On campus, the chancellor regularly meets with the College administrative team and the chairs of the College Council and the Academic Senate to communicate institutional values, goals, institution-set standards, and other relevant information related to planning and mission fulfillment. The chancellor reports to the College Council at its monthly meetings ([IV.B.1-6](#)) and is occasionally invited to address the Academic Senate when the Academic Senate chair and chancellor decide an issue needs to be shared collaboratively with the faculty. The chancellor also ensures that these matters are communicated in a timely manner to the College community during campus-wide meetings at Fall and Spring convocation, email announcements, and web postings([IV.B.1-7](#)). Off campus, the chancellor meets with Rotary Clubs, and the Hawai‘i Island, Kona, Kohala, and Japanese Chambers of Commerce to share mission and vision and other relevant news with the community. The chancellor also convenes an advisory council to provide community input on pertinent planning issues ([IV.B.1-8](#)).

The chancellor approves the College budget. The administrative team, headed by the chancellor, is given information about all budget expenditures during budget planning meetings. In 2017, the chancellor requested that the College Council review planning processes and clarify further the role of the council as it relates to setting priority criteria for resource allocation. As a part of the resource allocation process, the results of the program and unit review process and the budget prioritization process are grounded in relevant data and analysis to help inform work plans and resource allocation. For example, permanent positions to support the redesign of developmental education resulted from the 2015 program reviews for reading, writing, and math, which requested “More permanent, full-time faculty... not only to teach high-demand developmental courses, but also to consistently participate in assessment, curriculum development, and student success strategies concerning developmental reading courses.”

The chancellor oversees institutional effectiveness and ensures that the integrated planning cycle is based on a culture of evidence and focuses on student learning ([IV.B.1-5](#), [IV.B.1-9](#)). Additionally, the chancellor recommends for Board of Regents (BOR) approval the College mission and vision statements and strategic plans that ensure commitment to student learning and success ([IV.B.1-10](#)). In pursuit of College endeavors, as needed and in consultation with the UH president and the UHCC vice president, the chancellor represents the campus in legislative sessions in support of Hawai‘i CC and UH System missions.

Consistent with UH BOR policy 5.201 ([IV.B.1-11](#)), the chancellor acts on behalf of the campus to make recommendations to the BOR about programs that are “new, provisional, under review, and ... the naming of programs...” in support of the College mission. Upon recommendations of the faculty, the chancellor certifies to the BOR that graduates have met prescribed program requirements in the awarding of degrees and certificates of achievement contained in BOR-

approved degree programs. The chancellor also approves new certificates of competence and completion in support of the mission.

In selecting and evaluating personnel, the chancellor adheres to all contracts and has final approval of all personnel appointments at the College. To support personnel development, the chancellor promotes professional development opportunities for all personnel through campus-based workshops, professional training, local and national conferences, study abroad, and sabbatical leave. The chancellor also supports an annual Chancellor's Award for Outstanding Service to a faculty or staff member and recruits campus representatives to serve on selection committees for other awards given to faculty or staff ([IV.B.1-12](#)).

### **Analysis and Evaluation**

The chancellor demonstrates primary responsibility for the quality of the institution through effective leadership in the areas of planning, budget, organization, human resources, and institutional effectiveness driven by a well-communicated commitment to institutional values, goals, and standards. Clearly articulated policies are in place for campus governance. The chancellor takes an active role in the selection, development, and evaluation of personnel. An integrated planning cycle is in place through which the chancellor manages and assesses institutional effectiveness.

### **LIST OF EVIDENCE**

<a href="#">IV.B.1-1</a>	Chancellor Job Code GE102

<a href="#">IV.B.1-12</a>	Faculty staff award

**IV.B.2 The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.**

### **Evidence of Meeting the Standard**

The College's administrative structure is comparable to other similarly sized higher education institutions in the state ([IV.B.1-2](#)). Evaluation of the administrative structure occurs through the ongoing integrated planning process (program review, planning, and budget prioritization processes) ([IV.B.1-5](#)). New mandates, position vacancies, new allocation, programmatic changes, and program/unit review results inform the effectiveness of organizational units, reporting structures, and responsibilities needed from administrators. As a result of the above

processes and with a new chancellor, the administrative team began a more comprehensive review of overall administrative structure and staffing support in key areas in 2017. A proposal for an organizational restructure has been developed to strengthen Hawai‘i Island support, particularly because the new Pāalamanui campus is approximately 75 miles away from the main, Hilo location ([IV.B.2-1](#)). Thus, support for the Pāalamanui branch campus was redefined to ensure integrated academic and student affairs operations with administrative services on that site instead of at a central Hilo location. The proposal also included consolidation of departments, such as the merging of Construction Academy with Transportation and Trades to create a new unit, Applied Technology Education.

Evaluations of executive management staff are done annually, which includes setting of goals and identifying work plans for the forthcoming academic year. All administrators working directly under the chancellor have clearly defined job descriptions and are evaluated annually using the guidelines set forth in UH EP 9.212.IX ([IV.B.2-2](#)) (see Standard III.A.1). This includes responsibilities delegated by the chancellor and assigned to members of the administrative team. For example, the chancellor has delegated responsibility for “overall administration, management, development, and integrity of all academic programs and services at the College, both instructional and non-instructional programs” to the vice chancellor for Academic Affairs (VCAA). The VCAA serves as the chief academic officer of the campus with, among other duties, decision-making and direct responsibilities “for all instructional programs and courses.”

### **Analysis and Evaluation**

Through the integrated planning process, the chancellor oversees and evaluates the administrative structure of the College, focusing on its commitment to meet the needs of all segments of the Hawai‘i Island community. Staffing and delegation of authority to personnel, such as the vice chancellors for Academic Affairs, Administrative Services, and Student Services, are consistent and appropriate.

### **LIST OF EVIDENCE**

<a href="#">IV.B.1-2</a>	Organizational Chart
<a href="#">IV.B.1-5</a>	HAW 4.201 - Integrated Planning for Institutional Effectiveness
<a href="#">IV.B.2-1</a>	Reorganizational Proposal
<a href="#">IV.B.2-2</a>	UH EP 9.212.IX

**IV.B.3 Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:**

- establishing a collegial process that sets values, goals, and priorities;
- ensuring the college sets institutional performance standards for student achievement;
- ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;
- ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;
- ensuring that the allocation of resources supports and improves learning and achievement; and
- establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.

### **Evidence of Meeting the Standard**

Under the chancellor’s leadership, the College institutes processes that support ongoing improvements in the teaching and learning environment, taking a *Kauhale* approach to how the college community communicates both internally and with its surrounding community. Campus governance operates under the philosophy of collegiality ([IV.B.1-4](#)). Faculty members, through the Academic Senate, have primary responsibility for the teaching of courses and share the responsibility for overseeing the curriculum with the chancellor, who has delegated the maintenance of the curriculum to the VCAA. Additional collegial processes include committee work ([IV.B.1-3](#)) and convocation activities, during which the chancellor communicates the status of key initiatives that impact instruction and student achievement, planning, and mission fulfillment. In addition, the chancellor holds *Wala ‘au* (“to converse” in Hawaiian) focus group sessions that establish values, goals, and priorities; communicate information; and generate interdisciplinary feedback on College matters. *Wala ‘au* sessions have been held on System and College initiatives, grant activities, developmental education, budget, and the accreditation process ([IV.B.3-1](#)).

From 2013 until 2015, each college in the UH System was responsible for setting its student performance standards based on information provided by the Office of the Vice President of Community College (OVPCC). Each college was also responsible for evaluating whether targets were met. During 2015 and 2016, the vice president met with each college’s chancellor and with the chancellors as a whole to develop a Systemwide set of performance measures. The result was UHCCP 4.203, Institution-Set Standards ([IV.B.3-2](#)), implemented in February 2017. The vice president meets during the fall semester on each campus to give an annual presentation on the respective college’s attainment of the targets ([IV.B.3-3](#)).

On November 16, 2017, highlights of targets met and deficiencies as summarized by the vice president were shared by the chancellor through the chancellor’s *Wala ‘au* e-newsletter sent via the campus faculty/staff listserv ([IV.B.3-4](#)). The administrative team meets regularly with the chancellor to develop and follow up on action plans to address the deficiencies.

As CEO, the chancellor oversees the College’s integrated planning activities ([IV.B.1-5](#)), which include assessment and program and unit reviews, strategic planning, and resource allocation.

The chancellor has maintained a collegial focus on improvements to the teaching and learning environment by emphasizing faculty involvement throughout review processes to ensure that academic planning remains a priority, and through the activities of the Assessment Committee, a group that is comprised of faculty and staff. The committee monitors and refines assessment-related portions of the program/unit review processes, and assists in the development and implementation of assessment plans for student learning outcomes in all programs and units.

The College's Institutional Research Office (IRO) compiles regular and on-demand reports that analyze data at the student, program, and curricular levels ([IV.B.3-5](#)). Such reports, along with System data, are utilized by programs and units to prepare their reviews and assessments of student learning, which are then evaluated by the College Effectiveness Review Committee (CERC), which has College wide representation, to determine if institutional goals have been met. The CERC also evaluates budget requests generated during the program/unit review process, measuring their relevance to strategic plan goals and providing the chancellor with a summary evaluation and budget recommendations ([IV.B.3-6](#)). In consultation with the administrative team, the chancellor uses CERC recommendations to manage campus resources and develop the campus budget, as well as to develop supplemental and biennium budget recommendations for the OVPCC. These processes emphasize the primary role of data-driven institutional planning.

Via the College's integrated planning process, the chancellor ensures that the College evaluates whether institutional planning and implementation efforts achieve the mission of the institution, and that planning culminates in resource requests, which are prioritized based on strategic plan objectives and College priorities in support of student achievement and learning. As such, ongoing implementation and evaluation of goals set in campus plans and/or appendices are reviewed and updated appropriately. This has resulted in the College's Strategic Plan for 2015-2021, setting the stage to formally link strategic plan outcomes with comprehensive program and unit review processes, further establishing procedures to evaluate overall institutional planning and effectiveness ([IV.B.3-7](#)).

### **Analysis and Evaluation**

Established policies and procedures show that the chancellor prioritizes continuous improvement of the institution through the achievement of educational goals. Integrated planning activities rely on data collected both internally and externally, and analysis of the data leads to coordinated resource allocation recommendations. Comparison of data from program and unit reviews with available resources ensures that allocations are funneled to the areas that will have the most impact on student learning and achievement. Evaluation of institutional planning and implementation efforts supports the achievement of the College's mission.

### **LIST OF EVIDENCE**

<a href="#">IV.B.3-7</a>	Procedures to Evaluate Institutional Planning and Effectiveness

**IV.B.4 The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.**

### **Evidence of Meeting the Standard**

Per the College’s functional statement, the chancellor is responsible for maintaining the “accreditation standards as promulgated by the Accrediting Commission for Community and Junior Colleges, the State Legislature, and other governing bodies” ([IV.B.4-1](#)). The chancellor assigned the Accreditation Liaison Officer (ALO) position to a faculty member, who is required to provide the *Kauhale* with ongoing updates via email and during campus wide meetings, coordinate the writing of mid-term reports and substantive change proposals, and assume other responsibilities that may arise.

In 2016, preparation for the institutional self-evaluation report (ISER) and analysis resulted in the establishment of the Accreditation Team and Core Team to document how the College complies with all accreditation requirements, standards, and policies. Using Stanford’s Design Thinking model, members for each Standard Team were carefully selected, ensuring diverse cross-campus representation. Two faculty members served as ISER co-chairs and led the Core Team (accreditation steering committee). The Core and Standard Teams membership included faculty, staff, and administrative leaders. The chancellor provided appropriate resources for training and consultation to ensure faculty, staff, and administrative personnel were equipped to actively participate and engage in the accreditation process ([IV.B.4-2](#), [IV.B.4-3](#), [IV.B.4-4](#)). The chancellor has either attended or sent representatives to ACCJC accreditation trainings to ensure familiarity with the new standards and policies.

The chancellor met regularly with the ISER co-chairs and ALO and attended Core Team meetings. The membership of the Accreditation Team and Core Team demonstrates how faculty, staff, and administrative leaders are part of the process.

In addition, Chancellor Solemsaas requested training to serve as an ACCJC evaluator. Prior to joining Hawai‘i CC, she served as an accreditation evaluator for the Northwest Commission on Colleges and Universities for five years, visiting seven different institutions in Montana, Oregon, and Washington. Chancellor Solemsaas also issued a campus-wide invitation seeking volunteers across the *Kauhale* to serve as ACCJC evaluators.

### **Analysis and Evaluation**

The chancellor actively leads the *Kauhale* in its commitment to meeting eligibility requirements, standards, and commission policies at all times. Members of faculty, staff, and administration have been recruited to serve in a variety of roles: as ALO, on accreditation teams, and in work groups writing the ISER. Furthermore, the chancellor has set an example of accreditation service as a volunteer evaluator and encourages faculty, staff, and administration to do likewise

**LIST OF EVIDENCE**

<a href="#">IV.B.4-1</a>	Functional Statements
<a href="#">IV.B.4-2</a>	Accreditation Kick-off workshop
<a href="#">IV.B.4-3</a>	Accreditation Team Training - Fall 2016
<a href="#">IV.B.4-4</a>	Accreditation Team Training - spring 2017

**IV.B.5 The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.**

**Evidence of Meeting the Standard**

The chancellor ensures that all statutes, regulations, and governing board policies are followed ([IV.B.5-1](#)). If there are questions about whether or not proposed actions are appropriate, the chancellor consults with UH legal counsel and UHCC Human Resources. Examples of how the chancellor ensures that statutes, regulations, and policies are followed at the College level include the following:

- Internal and external audit findings
- Follow-up on findings from student complaints and student discipline
- Clery Report findings
- CARE Team findings
- Title IX regulations with the management team
- Proof of compliance with required trainings, including sexual assault, right to privacy, and faculty-student behavior.

Written System directives on updates or new statutes, regulations, and governing board policies are distributed to the administrative team and to the campus. During summer 2017, UH System policy updates were reviewed to identify updates needed for related College policies. The chancellor also assures consistency with the UH System through campus policy actions, overseeing the need to revise, create, or delete policies through the vice chancellors, according to their respective areas of responsibility. The chancellor provides final approval to policy actions once appropriate reviews and approvals are given by applicable governing bodies, such as the Academic Senate. Subsequently, the chancellor ensures appropriate notification and implementation through the vice chancellors' offices.

Through participation in the University Council of Chancellors and the Council of Community College Chancellors ([IV.B.5-2](#)), the chancellor works directly with System leadership to negotiate budgetary concerns such as meeting the institutional performance standards, the FTE targets, and the College reserves. The chancellor takes action to implement new requirements and disseminate UH System information, policies, regulations, etc., through weekly meetings with the administrative team, who assure appropriate steps are taken within their respective areas. All information is also shared with the College at monthly College Council meetings. The chancellor makes campus-wide presentations during fall and spring convocation. When invited to Academic Senate or committee meetings, the chancellor provides updates about UH System policies and their impacts on the College.

The chancellor ensures that College practices are consistent with the mission and College policies through the integrated planning process, which includes evaluation via the program/unit review process. Results and recommendations are submitted to the chancellor for consideration and planning purposes.

The chancellor is responsible for the fiscal management of the College and approves the College budget, which is overseen by the vice chancellor of Administrative Services. The administrative team, headed by the chancellor, reviews expenditures and personnel changes, particularly vacant position status. In 2016, the administrative team adopted fiscal guiding principles that 1) ensure a balanced budget, 2) invest in the future, and 3) maintain prudent level of reserves. With no additional funding available for allocation, the administrative team focused on reallocating vacant personnel while establishing funds to be used for priorities; reserves were set aside to ensure contingency funds are in place for future priorities ([IV.B.5-3](#), [IV.B.5-4](#)).

### **Analysis and Evaluation**

The chancellor assures that statutes, regulations, and board policies are implemented and communicated effectively, and that College practices are in line with these requirements and consistently reflect the college's mission. The chancellor effectually controls the budget and expenditures working directly with System leadership and the College's administrative team.

<a href="#">IV.B.5-3</a>	Budget Planning 2016
<a href="#">IV.B.5-4</a>	Budget Planning 2017

## **IV.B.6 The CEO works and communicates effectively with the communities served by the institution.**

### **Evidence of Meeting the Standard**

Hawai'i CC is committed to the spirit of *Kauhale*. In addition to providing monthly updates to the College Council, regularly attending participatory governance committees, and presenting during all-College meetings, the chancellor meets regularly with communities served by the institution. The chancellor provides monthly articles to the local chamber newsletter and presents College updates at community functions and meetings ([IV.B.6-1](#)).

Administrative team members also serve on a number of community boards, including the Hawai'i Island Chamber of Commerce, the Japanese Chamber of Commerce, the Industry of Hawai'i Workforce Investment Board, and the North Hawai'i Educational Resource Center. The chancellor's weekly administrative team meetings include reports on community board activities. In this manner, the chancellor is able to maintain a broad range of communication within the community.

The chancellor also supports Program Advisory Councils, which provide input to all Career and Technical Education programs. Each program meets with its council one or two times a year to ensure that the program continues to meet community and employer needs ([IV.B.6-2](#)). In addition, the chancellor and members of the administrative team support the state's P-20

initiatives ([IV.B.6-3](#)), strengthening ties with the College’s K-12 partners, such as Department of Education (DOE), Kamehameha Schools, and other charter schools. In 2017, the chancellor helped to launch the Hawai‘i Island Educational Leadership group, consisting of the chancellors from UH Hilo and Hawai‘i CC, three DOE Complex Area Superintendents, and a representative from the P-20 initiative. The group seeks to establish communication among the various stakeholders within the educational community to ensure that students succeed in a cohesive system ([IV.B.6-4](#)).

In addition, the chancellor ensures administrative support for a number of College projects designed to strengthen communication and engagement with the community. In 2017, the College hosted its 50<sup>th</sup> Model Home Project. The project included a fundraising event that convened alumni and community and business partners for this point of pride project ([IV.B.6-5](#)). Hawai‘i CC – Pālanui also hosted the UH president’s speaker series events ([IV.B.6-6](#)). The events hosted anywhere from 65 to 120 community attendees.

Finally, the chancellor has awarded outstanding community partners with a Mahalo Award since 1995. Partners are selected from list of nominees and are often awarded during the College’s end of the year celebration ([IV.B.6-7](#)).

### **Analysis and Evaluation**

The chancellor works closely with the community through many educational and leadership organizations and encourages the leadership team to do the same. Communications with the community are frequent and varied, ensuring that its needs remain center stage in the work that the College does.

## **IV.C. LEADERSHIP AND GOVERNANCE**

---

**IV.C.1 The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.**

### **Evidence of Meeting the Standard**

The Board of Regents (BOR) of the University of Hawai‘i (UH) is established under Hawai‘i Revised Statutes HRS§304A-104. The fifteen-member board is responsible for the general management and control of the university that incorporates all of public higher education,

including the University of Hawai‘i Community College (UHCC) System. The regents are appointed to five-year terms (with one exception noted below), and represent either one of the four counties in the state or the public at large. Regents may be appointed to a second consecutive five-year term. One regent must be a student of the university. The student regent is appointed for a two-year term, and may be reappointed. ([IV.C.1-1](#), [IV.C.1-2](#))

Members of the board, drawn from a slate of nominees submitted by the Regents Candidate Advisory Committee (RCAC), are appointed by the governor and confirmed by the state Senate. The RCAC consists of seven members, with four members appointed by the governor and one member each appointed by the president of the state Senate, the speaker of the House, and the Association of Emeritus Regents. The RCAC solicits nominations for the regents, qualifies and screens the applicants, and presents to the governor a slate of nominees for each vacant regent position. ([IV.C.1-3](#), [IV.C.1-4](#))

The bylaws of the BOR include the specific organization and responsibility of the board and its committees for academic matters, financial oversight, and general control of the university. This authority is further delineated through Regents Policies (RP)([IV.C.1-5](#), [IV.C.1-6](#)). Several policies, including RP 4.201 Mission and Purpose of the University, focus on assurance of academic quality and integrity and effectiveness as integral to the institution, a focus echoed in different ways in individual institutional mission statements. The board executes these responsibilities through regular reporting and deliberation at board and committee meetings. The board also may elect to create special task groups to address specific issues, such as the recently created Integrated Academic and Facilities Plan. ([IV.C.1-7](#), [IV.C.1-8](#))

### **Analysis and Evaluation**

The governing board is established in state statute and the board is appointed through a process of open recruitment for board member candidates followed by gubernatorial appointment and Senate confirmation.

The authority of the board for the governance of the university is established in the state constitution and statute, and the board has organized its bylaws, policies, and processes to carry out the full measure of board governance, including the oversight of academic programs, student success, and fiscal integrity of the institutions.

The authority of the board encompasses all components of the university, including the UHCC System and the individual community colleges.

permitted interaction group)

**IV.C.2 The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.**

### **Evidence of Meeting the Standard**

The primary policy governing board interaction among board members and with the broader university community is RP 1.202 Relationship of the Board to Administration and University. Specifically, Section III.A.2.B of the policy states the following:

“Except as specifically authorized by formal action, no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson. All meetings between board members and any member of the administration, including the president, shall be authorized by the board’s chairperson and arranged through the secretary and/or with the full knowledge of the secretary. In addition, no unilateral action of a member of the board has the authorization nor support of the board; and the authority of the board reposes in the board as a whole. Likewise, all communication from the president and any members of the administration to the members of the board must flow through the secretary unless otherwise authorized.”

The policy also delineates and structures the communication between the board and the university administration, including the requesting and providing of information to and from the board and the administration. ([IV.C.2-1](#))

The policy is further emphasized through the BOR handbook that is made available to all incoming regents and published on the board website. The handbook is based on best practices drawn from the Association of Governing Boards, and includes expectations of regents, including the responsibility of individual regents to “Serve the institution or system as a whole. Individual trustees have a responsibility to support the majority action, even when they disagree.” ([IV.C.2-2](#))

The 2017 Board Self Assessment includes several items focused on “Acting as a Unit.” Responses to the self-assessment questionnaire indicate that regents feel that there is effective communication and mutual trust, leading to a “high-performing group that works well together.” ([IV.C.2-3](#), [IV.C.2-4](#), [IV.C.2-5](#)),

### **Analysis and Evaluation**

As noted, RP 1.202 specifically addresses and seeks to ensure the collective nature of its decisions and actions. A review of board minutes did not disclose any instances of board members acting outside the policy guidelines.

<a href="#">IV.C.2-4</a>	Board Self-Evaluation Results, 2017

[IV.C.2-5](#) Board of Regents Minutes of November 16, 2017

**IV.C.3 The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system**

**Evidence of Meeting the Standard**

As the governing body of the UH System, the BOR selects and evaluates the university president. RP 2.203 Policy on Evaluation of the President, establishes the evaluation protocols for the university president, including an annual self-assessment by the president, additional data collection by the board, a preliminary meeting between the board and the president, and a final evaluation after the president responds to the preliminary assessment. ([IV.C.3-1](#))

**System CEO Selection**

There has not been a search for the vice president for Community Colleges (VPCC) since the position was re-established in 2005, and the current vice president was appointed to oversee the reorganization of the community college system. Should the position of vice president become vacant, the president would follow the recruitment and other procedures outlined in RP 9.212: Executive and Managerial Personnel Policies. In a two-step process that differentiates the functions of appointment and approval, the president would make a recommendation for VPCC to the BOR, which has the final approving authority for that position. ([IV.C.3-2](#))

**Campus CEO Selection**

The process for selecting the chancellor (CEO) of a college is managed by the VPCC. The search process involves the creation of a 15- to 20-member committee, the Chancellor Search Advisory Committee (CSAC), composed of representatives from various college constituencies and the community that the College serves. Nominations for members of the screening committee are solicited from governance groups. The vice president determines the final composition, based on ensuring broad and equitable representation within the advisory committee.

A formal policy for the selection of chancellors, University of Hawai'i Community Colleges Policy (UHCCP) 9.210 Recruitment, Selection, and Appointment of Community College Chancellors, was drafted in spring 2018, and vetted and approved by the chancellors and campus governance bodies ([IV.C.3-3](#)). A detailed set of procedures, which has been used consistently for several years in this process, is appended to the policy.

The authority for appointment of the college chancellor is delegated to the VPCC, with final approval of the appointment by the president of the university. A public announcement is made, and the selected candidate is also placed on the agenda of the BOR to ensure that the regents are fully informed of the selection process and the selected candidate.

**UH CEO Evaluation**

Evaluations are conducted in executive session at a public board meeting with the summary results of the evaluation also made public and included in board minutes. The posted agenda items and subsequent minutes for the past three presidential evaluations are provided as evidence. ([IV.C.3-4](#), [IV.C.3-5](#), [IV.C.3-6](#))

### **UHCC and CC Campus CEO Evaluation**

The board delegates the evaluation of the VPCC to the university president, and the evaluation of the individual college chancellors is further delegated to the VPCC. The annual evaluation of both the VPCC and the chancellors is governed by Executive Policies, EP 9.203 Evaluation of Board of Regents Appointees, and EP 9.212 Executive/Managerial Classification and Compensation. ([IV.C.3-7](#), [IV.C.3-8](#))

Executive Policies establish an annual review that includes a 360-degree assessment by the individual, as well as his/her peers, subordinates, and constituents, of the executive's performance. The individual self-assessment also includes a review of accomplishments and goals set for the review year, and the establishment of goals for the upcoming year. The evaluation information is then discussed between the supervisor and the executive being evaluated. The results of the evaluation impact both continued employment and compensation increases.

The UHCC System further refines the annual evaluation of executive personnel, including chancellors, through UHCCP 9.202 Executive Employees Performance Evaluation. This policy delineates the requirements for the respondents in the 360 evaluation, and also adds the college's attainment of its strategic goals as a component of the chancellor's evaluation. ([IV.C.3-9](#))

The evaluation system is reviewed on a periodic basis. In the 2016-2017 review, two changes were adopted. First, an additional item was added to the 360 instrument to allow respondents to assess the performance of the executive in furthering the student success agenda. ([IV.C.3-10](#)) Second, the categories of performance rating were changed to better reflect the gradations in overall performance. Each executive/managerial employee is now rated as exceptional, exceeds expectations, meets expectations, or does not meet expectations. ([IV.C.3-11](#))

### **Analysis and Evaluation**

#### **CEO Selection**

The procedures used to recruit and select the VPCC and the college chancellors involve a broadly representative screening committee, extensive solicitation of applicants, multiple levels of interviews, and public visitations by the finalists to the campus. The president of the university makes the final selection of the vice president, subject to approval by the BOR. The VPCC makes the final determination of the chancellor, subject to approval by the president.

#### **CEO Evaluation**

Annual evaluations involving 360 evaluations, assessment of goal attainment, and progress toward strategic goals have been conducted for the vice president and all college chancellors each year. The results of the evaluation are used to set goals for the upcoming year, establish performance ratings on which continued employment may be based, and in determination of merit-based salary increases, when available.

**IV.C.4. The governing board is an independent, policy-making body that reflects the public interest in the institution’s educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.**

### **Evidence of Meeting the Standard**

The autonomy of the university and related independent authority of the BOR is embodied in Article X of the state constitution. Section 6 of Article X specifically states that:

“There shall be a board of regents of the University of Hawai‘i, the members of which shall be nominated and, by and with the advice and consent of the Senate, appointed by the governor from pools of qualified candidates presented to the governor by the candidate advisory council for the board of regents of the University of Hawai‘i, as provided by law. At least part of the membership of the board shall represent geographic subdivisions of the State. The board shall have the power to formulate policy, and to exercise control over the university through its executive officer, the president of the university, who shall be appointed by the board. The board shall also have exclusive jurisdiction over the internal structure, management, and operation of the university. This section shall not limit the power of the legislature to enact laws of statewide concern. The legislature shall have the exclusive jurisdiction to identify laws of statewide concern” ([IV.C.4-1](#)).

In carrying out its responsibilities, the board leadership often testifies at legislative hearings on matters relating to the university, and meets with key state legislators on various bills and budget matters. These legislative communications are coordinated and consistent between the board and the university’s administrative legislative coordinator.

### **Analysis and Evaluation**

The autonomy of the university is established in the state constitution. Given the authority of the legislature to enact laws of statewide concern, the board remains attentive to whether such laws might impede the university and board from exercising its constitutional authority.

In 2012, a fraudulent fundraising event for university athletics led to extensive legislative hearings and bills introduced relating to management and control within the university. The BOR responded by creating an Advisory Task Group on Operational and Financial Controls Improvement (ATG) to conduct its own audit of university operations. The ATG, comprised of both regents and respected community members, conducted an audit of policies and practices, evaluated the processes against best practices in higher education, and made recommendations in

several areas for improvement. The board considered the reports, and made governance and policy changes in accordance with some of those recommendations. ([IV.C.4-2](#), [IV.C.4-3](#), [IV.C.4-4](#), [IV.C.4-5](#), [IV.C.4-6](#))

By taking the initiative to address the issues raised by the legislature in a comprehensive and very public manner, the board exercised not only its responsibility for oversight and management of the university, but also its authority to act on matters relating to the university, and protecting the institution from undue influence and political pressure.

#### LIST OF EVIDENCE

<a href="#">IV.C.4-1</a>	State Constitution, Article X, Section 6
<a href="#">IV.C.4-2</a>	Advisory Task Group (ATG) on Operational and Financial Controls report of November 12, 2012

<a href="#">IV.C.4-4</a>	ATG report of May 12, 2013
<a href="#">IV.C.4-5</a>	ATG report of July 15, 2013
<a href="#">IV.C.4-6</a>	ATG report of August 14, 2013

**IV.C.5. The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.**

#### Evidence of Meeting the Standard

Both by the structure of and responsibilities established for its standing committees, and by its Regents Policies, the board acts to fulfill its responsibilities as the single provider of public higher education in the state. Board policies and strategic plans are aligned and guide the university in fulfilling its overall mission. The role of community colleges within the UH System is further defined in RP 4.207 Community College System. ([IV.C.5-1](#))

The board has modified the UH mission statement twice in the past several years. In 2009, the regents adopted a change in the mission that made explicit the university's responsibility and commitment to the success of Native Hawaiian students and the desire for the university to be a model indigenous serving institution ([IV.C.1-7](#)). In 2014, the regents acted in response to a student initiative to expand the mission to include sustainability as a core responsibility and value for the university. This subsequently led to the creation of a new policy on Sustainability, RP 4.208, illustrating the alignment of mission and policy ([IV.C.5-2](#)). Work on a new policy focused on alignment of programs with the mission is currently in progress.

As stated in RP 4.201, Section C.b, "The Board approves a mission statement that elaborates the basic system mission, articulating those qualities common to the system as a whole. At a minimum, the system mission incorporates the vision, purpose, and common values of the UH System, emphasizing the fundamental commitment to access and quality." Policy RP 4.201, Section C.a also differentiates the basic unit missions (four-year and two-year institutions), which are further articulated in individual campus mission statements.

### Analysis and Evaluation

BOR bylaws and policies, committee structure and responsibilities, and meeting minutes are aligned with the overall mission of the system, and reflect the broad compliance with the overall expectations of board management, quality control, and fiscal oversight.

#### LIST OF EVIDENCE

<a href="#">IV.C.5-1</a>	RP 4.207: Community College System
<a href="#">IV.C.1-7</a>	RP 4.201: Mission and Purpose of the University
<a href="#">IV.C.5-2</a>	RP 4.208: Sustainability Policy

**IV.C.6. The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.**

#### Evidence of Meeting the Standard

The BOR homepage (<http://www.Hawaii.edu/offices/bor/>) includes links to the board bylaws and policies. The bylaws include sections defining the board membership and organization, the officers and duties of each officer, the standing committee structure of the board and the scope of each committee, the meeting requirements for both committees and the board, and other operating procedures including parliamentary procedures, establishment of quorum, voting rules, access to legal counsel and outside consultants, and procedures for modifying the bylaws, which may be done through a two-thirds vote of the board. The bylaws also include the conflict of interest requirements for board members. ([IV.C.1-2](#), [IV.C.6-1](#))

### Analysis and Evaluation

The bylaws are published and made available to the public, and include all required elements of the Standard.

#### LIST OF EVIDENCE

<a href="#">IV.C.1-2</a>	Board of Regents Home Page
<a href="#">IV.C.6-1</a>	Board of Regents Bylaws

**IV.C.7. The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.**

#### Evidence of Meeting the Standard

BOR policies are reviewed on a staggered three-year cycle, with current iterations posted at the board's homepage. As a result of a recommendation from the previous comprehensive accreditation review, the university and board developed and implemented the UH Systemwide Policies and Procedures Information System (PPIS). The PPIS documents all of the board policies and the related UH executive policies and administrative procedures. ([IV.C.7-1](#))

The features of the PPIS include:

- Description of the PPIS with frequently asked questions on the PPIS homepage
- Easy public access to all policies, including from the BOR homepage
- Policy header that includes the effective date of each policy, the dates of all prior amendments to the policy, and the next scheduled review date. While Regents Policies may be amended on as-needed basis, the board policies are also on a staggered three-year review cycle
- Links from the executive policy and/or administrative procedure to the related Regents Policy
- Automatic notification to interested parties of any change in policy ([IV.C.7-2](#))

When the PPIS was implemented in 2014, all policies were re-codified to be consistent with the new system. The policy review dates were set as August 2017 for Chapters 1-4, August 2018 for Chapters 5-9, and August 2019 for Chapters 10-13. ([IV.C.7-3](#))

The review of Chapters 1-4 was conducted beginning in summer 2017 with a review of the 28 policies included in those chapters. Policies were reviewed for both content and format under the aegis of the Committee on Personnel Affairs and Board Governance. Recommendations were made as to whether a policy would a) remain unchanged; b) be subject to editing for clarity or alignment with current practice; c) undergo substantive review and modification; or d) be repealed. Based on this assessment, one policy will be repealed and six will undergo substantive review. One new policy may be created. The board will complete this cycle by the end of the academic year, before a new cycle begins. A report was presented first to the Committee on Personnel Affairs and Board Governance on November 1, 2017, and subsequently provided to the board at its November 16, 2017 meeting. ([IV.C.7-4](#), [IV.C.7-5](#)) A further update was provided to the Committee on April 5, 2018 ([IV.C.7-6](#)).

### **Analysis and Evaluation**

The board policies are publicly available through the BOR homepage and are managed through the comprehensive PPIS. The PPIS system provides timely notification to all interested parties of policy changes and establishes a review cycle for all policies.

The review cycle for Chapters 1-4 was initiated as scheduled in summer 2017 and resulted in the review of 28 policies. Six policies were substantively updated through the review process.

All policies are current with their review cycle. It is understood that a policy may be reviewed and revised at any time, should the need arise; a new policy may also be created as needed. A review of board minutes confirmed that board actions were in compliance with policies. Policy changes were also compliant with all consultation requirements established by Chapter 89 of the Hawai'i Revised Statutes, the public employee collective bargaining law.

### **LIST OF EVIDENCE**

<a href="#">IV.C.7-1</a>	UH Systemwide Policies and Procedures Information System (PPIS) home page
<a href="#">IV.C.7-2</a>	Sample notifications from PPIS
<a href="#">IV.C.7-3</a>	BOR Policy Review Schedule
<a href="#">IV.C.7-4</a>	Committee on Academic Affairs and Board Governance Minutes of

[IV.C.7-5](#) Board of Regents Minutes of November 16, 2017  
[IV.C72-6](#) Board of Regents Minutes of April 5, 2018

**IV.C.8. To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.**

### Evidence of Meeting the Standard

The board has established strategic goals for the university and its component colleges in four key areas:

- Hawai‘i Graduation Initiative focusing on student success
- Hawai‘i Innovation Initiative focusing on research and innovation and commercialization of the university’s research endeavors
- Twenty-first century facilities, including eliminating the deferred maintenance backlog, modernizing teaching and research facilities, and sustainability
- High performing, mission-driven system, including developing efficiencies and effective strategies taking advantage of the university’s role as the single system of public higher education in the state.

These key goals, endorsed by the board in 2015, are further articulated in and aligned with the strategic goals of the UHCC System and of the individual community colleges and other campuses. When feasible, the goals are quantified with targeted incremental growth or improvement measures. ([IV.C.8-1](#), [IV.C.8-2](#), [IV.C.8-3](#), [IV.C.8-4](#))

The board regularly receives updates on the university’s progress in meeting these strategic goals through data on established metrics and trends, and presentations at either board meetings or meetings of the Academic and Student Affairs Committee. The board has instituted policies such as performance funding that are directly related to the student success goals. Additionally, the board has sought to gain a better understanding of the issues impacting student success through a series of reports that explore topics such as financial aid, enrollment management, workforce planning, and student pathways. ([IV.C.8-5](#))

The board meets on a rotating basis at the campuses in the system; it receives a briefing from the host campus on its progress toward meeting the student success agenda.

### Analysis and Evaluation

The board has adopted strategic goals related to student success with specific metrics and targets for each major unit, including the community colleges. The community colleges have adopted strategic goals that are consistent with these system goals and that extend the goals and targets to the individual community colleges.

### LIST OF EVIDENCE

- [IV.C.8-1](#) Board of Regents Minutes of January 22, 2015 (p. 15, documenting endorsement of Strategic Plan)

<a href="#">IV.C.8-5</a>	Midterm Report, January 2018
	UHCC Strategic Directions 2015-2021

**IV.C.9. The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.**

### Evidence of Meeting the Standard

All new board members receive a full-day orientation that consists of two major components. The first is an introduction to university functions, governance, and strategic directions. The second component deals with board governance, processes, ethics, and conduct. All new board members receive a copy of the BOR General Overview as a part of the orientation, as well as a substantial *New Regent Orientation Book*. Additionally, beginning in 2017, new board members are paired with a more experienced board member, who serves as a mentor to the incoming member. ([IV.C.1-5](#), [IV.C.9-1](#), [IV.C.9-2](#))

Board members regularly participate in governing board professional development through attendance at conferences of the Association of Governing Boards and the Association of Community College Trustees. ([IV.C.9-3](#))

The board also organizes training for its members as a part of regular board retreats or board committee meetings. For example, during the 2016-2017 academic year, the university external auditor conducted a four-part training session for the Independent Audit Committee, drawn from the American Institute of Certified Public Accountants handbook, covering the primary duties of an audit committee, expertise, understanding processes and controls, federal government implications, and roles and responsibilities of the external auditor, the internal auditor, and management ([IV.C.9-4](#)). The vice president for Budget and Finance also provides an overview of the State of Hawai'i budget as it pertains to the University system. ([IV.C.9-5](#))

### Analysis and Evaluation

New board members are provided with a comprehensive orientation and related materials, and with a mentor from among the experienced board members. Professional development is provided through attendance at national board professional associations and through training provided at board meetings.

In 2017, the board updated its committee structure to modify the Personnel Committee to also include board governance. Among the added responsibilities for the committee is ensuring that education and development pertinent to board service is provided for board members.

[IV.C.9-5](#) State of Hawai'i Budget 101 (CFO Presentation)

**IV.C.10. Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board's effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.**

### **Evidence of Meeting the Standard**

Regents Policy (RP) 2.204 establishes the process for board self-evaluation. In 2017, the board bylaws were amended to expand the role of the Personnel Committee to a Committee on Personnel Affairs and Board Governance, with explicit responsibility for managing the board evaluation process. ([IV.C.10-1](#), [IV.C.10-2](#))

Pertinent to the current accreditation cycle, the Board has conducted annual evaluations since 2014. ([IV.C.10-3](#), [IV.C.10-4](#), [IV.C.10-5](#)) Additionally, in 2012-2013, the board undertook a comprehensive audit of the university operations, including board functions and structure, and implemented significant changes in response to the audit recommendations. [Link 10.6 should be here This is in a folder with 6 documents. Link all 5.](#) The board has drawn from the Association for Governing Boards as a guide to structuring and evaluating its operations. [Link 10.7 should be here.](#) [\[IV.C.10.11\]](#)

### **Analysis and Evaluation**

The board uses the results of its evaluation to improve its operations. For example, in 2015 the board evaluation included an assessment of whether the board committee structure adequately aligned with the strategic directions of the university. The concern was that the then-current structure of having an Academic Affairs Committee, a Student Affairs Committee, and a Community College Committee resulted in un-coordinated conversations about student success. After debate and consultation, the board acted to consolidate the three committees and focus the committee responsibilities on the student success agenda. At the same time, the board acted to create a committee on research and innovation, also in alignment with the university's strategic directions.

While the board has actively engaged in self-evaluation and acted in response to those evaluations, the evaluation schedule has not been scheduled in a formal, regular manner. Partly in response to this assessment, the board acted to expand the Personnel Committee to include governance. Among the described responsibilities of the expanded committee are oversight of the evaluation process and the regular review of board policies. The policy on Board Self Evaluation, RP 2.204, is one of those undergoing substantive review.

**IV.C.11. The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.**

### **Evidence of Meeting the Standard**

Article X of the BOR bylaws establishes the conflict of interest policies and procedures for regents. Regents are informed of the ethics requirements during their initial orientation. ([IV.C.1-5](#))

Regents Policy, RP 2.206 Policy on Regents as Employees, also describes the conflicts of interest that may arise when regents are also active employees of the university and the conditions under which such regents need to recuse themselves from actions impacted by their employment status. ([IV.C.11-1](#))

Regents are also subject to public laws governing ethics behavior. Regents must file annual financial disclosure forms with the Hawai'i State Ethics Commission. These disclosures are open to the public. The board has also included a board education presentation by the State Ethics Commission Executive Director as an agenda item at its regular meetings. ([IV.C.11-2](#))

### **Analysis and Evaluation**

The board is subject to both state ethics laws and to its own bylaws and policies relating to ethics and conflicts of interest. The laws and policies cover all of the potential conflicts identified in the Standard. Board members are informed of the ethics requirements through their initial orientation, and through regular board professional development.

Potential ethics concerns are routinely identified during board meetings and the regent in question is either recused from action and deliberation on the agenda item, or the potential conflict is determined not to preclude participation. The UH general counsel is available at board meetings to help resolve the determination of potential conflicts of interest.

No evidence exists for board members having acted in a manner inconsistent with the established ethics bylaws and policies.

**LIST OF EVIDENCE**

<a href="#">IV.C.1-5</a>	Bylaws of the Board of Regents 100115
<a href="#">IV.C.11-1</a>	RP 2.206: Regents as Employees
<a href="#">IV.C.11-2</a>	Board of Regents Minutes for January 26, 2017 (with Ethics Commission Presentation Ppt.)

**IV.C.12. The governing board delegates full responsibility and authority to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.**

**Evidence of Meeting the Standard**

Regents Policy, RP 2.202 Duties of the President, clearly documents the relationship between the BOR and the UH System president, and establishes the authority of the president to implement and administer board policies. ([IV.C.12-1](#))

The general policy on duties of the president is further refined in specific actions. For example, RP 9.218 Delegation of Personnel Actions, describes those hiring actions reserved by the board, those delegated to the president, and those that may be further delegated by the president. ([IV.C.12-2](#))

The structure of the UH System establishes this line of authority with the UH System president, and through the president to the VPCC, and the individual college chancellors.

When the board does feel that a matter needs additional oversight, it may elect to create a task group to work on the issue. Task groups may be established by the chairperson upon authorization by the board, and with such powers and duties as determined by the board. The tenure of a specific task group shall expire at the completion of its assigned task.

An example of such a task group was focused on creating an Integrated Academic and Facilities Plan for the UH System. ([IV.C.12-3](#)) The task group included both regents and UH administrative officials. Several meetings were held that led to the final recommendation to adopt a plan governing academic program planning and related facilities construction across the ten-campus UH System. ([IV.C.12-4](#), [IV.C.12-5](#), [IV.C.12-6](#), [IV.C.12.7](#))

**Analysis and Evaluation**

While the board maintains its responsibility for establishing overall strategic direction, university policies, and fiduciary management of the UH System, the board does not actively engage in direct or detailed management of the community colleges or individual campuses.

**LIST OF EVIDENCE**

<a href="#">IV.C.12-1</a>	RP 2.202: Duties of the President
<a href="#">IV.C.12-2</a>	RP 9.218: Delegation of Personnel Actions

<a href="#">IV.C.12-4</a>	BOR Meeting 091715
<a href="#">IV.C.12-5</a>	Integrated Academic and Facilities Plan

- [IV.C.12-6](#) Board of Regents Minutes of April 20, 2017 (including Report from IAFP task group of April 17, 2017, and adoption of IAFP)
- [IV.C.12-7](#) [Link in evidence, no link in document](#)

**IV.C.13. The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college's accredited status, and supports through policy the college's efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.**

### **Evidence of Meeting the Standard**

The board is routinely informed about the status of accreditation at each of the community colleges.

In preparation for the 2018 Institutional Self Evaluation Report (ISER), the Committee on Academic and Student Affairs was presented with an overview of the accreditation process, including those Standards relating to the governing board. Following this briefing, the board acted to create a permitted interaction group to assist in the evaluation of board-related Standards. ([IV.C.13-1](#)) A permitted interaction group is comprised of a sub-set of the regents and is allowed to engage in conversation and dialog about an issue without being subject to open meeting provisions. The permitted interaction group may not take any action but may only report to the larger board or one of its committees. The permitted interaction group included board leadership, the chair and vice chair of the Committee on Academic and Student Affairs, and regents representing all the islands with community colleges. A further briefing on preparing for accreditation was provided to the board at its March 2017 meeting. ([IV.C.13-2](#))

Members of the permitted action group were provided an early draft of Standard IV.C in August 2017, and met with representatives from the community colleges (ALOs and ISER chairs/co-chairs) in November 2017 to refine the document, provide clarification where needed, and suggest additional items of evidence. The group was provided a final opportunity to review this section, pertaining to the governing board, before the completed ISERs from the six campuses were presented for review by the Committee on Academic and Student Affairs, the BOR, and the UH president in early summer 2018.

### **Analysis and Evaluation**

The board was fully informed of the accreditation requirements and the process of ISER preparation, and was directly involved in the assessment of board-related Standards.

### **LIST OF EVIDENCE**

- [IV.C.13-1](#) Board of Regents Minutes of February 23, 2017 (p. 10) on creation of permitted interaction group
- [IV.C.13-2](#) Committee on Academic and Student Affairs Minutes of March 8, 2017 (p. 3, with VPCC presentation on accreditation standards)

## IV.D. MULTI-COLLEGE DISTRICTS OR SYSTEMS

---

**IV.D.1 In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.**

### Evidence of Meeting the Standard

The University of Hawai‘i (UH) System is the sole provider of public higher education in the state of Hawai‘i. The overall structure of the UH System is established in Board of Regents (BOR) Policy, RP 3.201 Major Organizational Units of the University of Hawai‘i. The ten-campus UH System as a whole includes the University of Hawai‘i Community College System (UHCC), which is comprised of seven community colleges. The UHCC System is further established in Regents Policy RP 4.207 Community College System. UH Maui College is accredited by the Western Association of Schools and Colleges (WASC), Senior division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges (ACCJC), and function as the multi-campus system now being evaluated. ([IV.D.1-1](#), [IV.D.1-2](#))

As an outcome of the reorganization in 2005, overall leadership of the UHCC System is now provided by the vice president for Community Colleges (VPCC), the CEO of the system. The VPCC is a member of the senior administration of the UH System, reporting directly to the UH System president ([IV.D.1-3](#)). The UHCC office, which oversees the management of and provides support in several areas including academic support, planning, personnel, facilities, and fiscal resources, is located on the island of O‘ahu at a central site near the flagship campus in Mānoa. The VPCC works with an associate vice president for Academic Affairs and an associate vice president for Administrative Affairs to ensure support for the effective operation of the colleges at the system level. ([IV.D.1-4](#), [IV.D.1-5](#))

The VPCC further works with the chancellors (CEOs of the individual colleges), delegating to them the authority for campus leadership (See Standard IV.D.4.) ([IV.D.1-6](#)). The community college chancellors may report through the VPCC to the president of the UH System for policy-making and decisions affecting all campuses; and to the VPCC for leadership and coordination of community college matters. This flow of communication preserves the BOR’s actions in supporting both individual campus autonomy and systemwide coordinated operations. ([IV.D.1-7](#))

The delineation of functions and the differentiation of responsibilities between system and campus level is summarized in the UHCC System Functional Map, most recently reviewed by the community colleges and updated in fall 2017. The Functional Map shows alignment with both the major accreditation topics ([IV.D.1-8](#)), as well as the detailed parts of Standards. ([IV.D.1-9](#))

## Analysis and Evaluation

As part of the University of Hawai'i system, the College meets this Standard.

Established policies and procedures clearly identify the positions of CEO for both the UHCC System (VPCC) and individual campuses (chancellors), and identify their authorized roles in providing leadership at multiple levels.

### LIST OF EVIDENCE

<a href="#">IV.D.1-8</a>	University of Hawai'i Community Colleges Functional Map by Major Accreditation Topic
<a href="#">IV.D.1-9</a>	University of Hawai'i Community Colleges Functional Map (Major Accreditation Topic and Detailed Map by Parts of Standards)

**IV.D.2 The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system-provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.**

### Evidence of Meeting the Standard

The VPCC (the system CEO) provides primary leadership in ensuring that the colleges function effectively in fulfillment of their respective missions and in support of educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office and several bodies comprised of campus representatives.

The operations of the Office of the Vice President for Community Colleges (OVPC) are overseen by two associate vice presidents who coordinate centralized support services in the areas of academic affairs and administrative affairs. The associate vice president for Academic Affairs provides leadership in operational policy-making pertinent to the development and implementation of UHCC Systemwide academic plans, goals, and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment, and policy analysis; career and technical education; student affairs; and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to more refined assessment of the success of various programs and initiatives. ([IV.D.2-1](#))

The associate vice president for Administrative Affairs provides leadership in supporting all aspects of administrative services that contribute to the effective and efficient functioning of the colleges. Specific areas of assistance and coordination include budget and finance; compliance and Title IX; Equal Employment Opportunity; facilities and environmental health; human resources; and marketing and communications([IV.D.2-2](#)). Facilities management is one area that requires an additional level of coordination and prioritization. Capital improvement projects (CIP) for all campuses are managed at the UH System level through the UH Office of Capital Improvements (OCI; now designated as the Office of Project Delivery), established by the BOR. General UHCC repair and maintenance and minor CIP are managed by the associate vice president for Administrative Affairs, and individual colleges have responsibility for routine maintenance, and health and safety issues. Individual colleges have Long Range Development Plans (LRDP), which are used by the UHCC and UH Systems to develop and justify minor and major CIP. [\[IV.D.2.3\]](#)[\[IV.D.2.4--HawCC LRDP\]](#)

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: Council of Community College Chancellors ([IV.D.2-4](#)); Community College Council of Faculty Senate Chairs ([IV.D.2-5](#)); and Community College Council of Native Hawaiian Chairs ([IV.D.2-6](#), [IV.D.2-7](#))

Each campus also mirrors the system-level structure in having executive leadership for academic affairs and administrative services; where student services functions are coordinated under the AVPCCAA at the system level, the colleges maintain separate executive management for student services with either vice chancellors or deans. Vice chancellors for Academic Affairs (VCAAs), vice chancellors for Administrative Services (VCASs), and vice chancellors for Student Affairs (VCSA) or deans for Student Services (DOSS) also meet with their counterparts from other campuses on a regular basis, extending the network of collaborative planning and decision-making, and mutual support.

In addition to these councils based on administrative positions, the UHCC System has also developed several system-level initiatives in support of student success and achievement. Primary among these is the Student Success Council, created in 2014 as an outgrowth of the UHCC System having joined the Achieving the Dream Initiative in 2006 ([IV.D.2-8](#)). The system-level council is mirrored in campus-based committees, which are focused on four key initiatives: developmental education; college pathways; just-in-time, customized support services; and graduation and transfer. Coordination at the system level, balanced with campus-based activities, ensures that the colleges adhere to consistent standards, benefit from sharing of resources and best practices, and have support for developing models for implementation that fit best with the individual campus culture and mission.

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are a) Sustainability and b) Distance Education. With reference to Sustainability, an Executive Policy (EP 4.202) and a new Regents Policy (RP 4.208) signal a system-level commitment that will impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time, recent discussion has now focused on developing a coordinated and fully online associate in arts

(Liberal Arts) degree at the UHCC System level, which will require renewed and proactive commitment from the UHCC System office and the individual campuses.

([IV.D.2-9](#), [IV.D.2-10](#), [IV.D.2-11](#))

### Analysis and Evaluation

As part of the University of Hawai'i system, the College meets this Standard.

The UHCC System is well-structured as a system to delineate the roles and responsibilities for the system as a whole on the one hand, and the individual colleges on the other. It provides for the benefits of the economies and efficiencies of scale through the coordination of academic and administrative functions in the system-level OVPCC (see also Standard III), while supporting the autonomy of individual campuses, the management structure of which significantly mirrors that of the system office.

Additional structures exist that further provide for equal access to participation among the campuses, founded on regular communication and collaborative discussion and decision-making, including the councils that meet with the VPCC, the committees of vice chancellors, and the system-level initiatives such as the Student Success Council.

**IV.D.3 The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and the district/system. The district/system CEO ensures effective control of expenditures.**

### Evidence of Meeting the Standard

The UH System's budget preparation and receipt of and further distribution of resources are governed by state law, primarily Chapter 37 of the Hawai'i Revised Statutes (HRS) ([IV.D.3-1](#)). Biennial budget requests, financial plans, and program performance reports are provided to the governor and the legislature in odd-numbered years; supplemental budget requests (to amend any appropriation for the current fiscal biennium) may also be submitted in even-numbered years.

Operating and Capital Improvement Projects (CIP) funds for the UH System are appropriated by major organizational units, of which the UHCC is one.

The UHCC System Office, under the guidance of the AVPCCAS, coordinates the budget development and request process for the community colleges, based on the strategic plans of the UH System, the UHCC System, and the individual college strategic plan. ([IV.D.3-2](#))

The Community Colleges Strategic Planning Council (SPC) is the primary body for ensuring systemwide participation in the UHCC strategic planning process. The membership of the SPC includes the chancellor, faculty senate chair, and student government chair from each college; and the vice president and the associate vice presidents for the community colleges. ([IV.D.3-3](#)) The SPC provides a planning context to ensure that system budget request categories and priorities are consistent with and align appropriately with UHCC Strategic Plan goals and objectives. The guiding principles of the Community College Strategic Academic Planning Process, which defines the role of the SPC, are codified in UHCCP #4.101 Strategic Academic Planning. The VPCC has a functional responsibility for providing a fair distribution of resources that are sufficient to support the effective operations of the colleges. ([IV.D.3-4](#))

Each college develops its own budget request (as described in more detail in Standard III.D.) At the UHCC System level, the seven community college chancellors, with support from the associate vice presidents and their staff, collectively review, categorize, and prioritize the individual college budget requests. A key criterion in approving campus budget requests is the extent to which they align with and support strategic planning goals. The individual college budgets remain intact at the campus level, but are consolidated at the UHCC System level for purposes of further integration in the overall UH System budget, which is ultimately submitted to the State Legislature.

While state General Funds, allocated by the legislature, provide the most significant funding source for the colleges, tuition revenues also constitute a major component of college budgets. Other sources of internal and extramural funds (e.g., special funds, revolving funds, grant funds, UH Foundation) may also be generated and retained by each college. The management of sources of funding other than general funds is guided by two UHCC Policies: UHCCP #8.000 General Fund and Tuition and Fees Special Fund Allocation, and UHCCP #8.201 Unrestricted Fund Reserve—General, Special, Revolving Funds. Each College's budget reflects a different combination of revenue sources and expenditures; all campuses maintain the reserve required by accreditors. ([IV.D.3-5](#), [IV.D.3-6](#), [IV.D.3.7](#))

Campuses have also had access to additional funds from the OVPCC, and more recently from the Office of the University of Hawai'i President, providing additional incentive for the meeting of certain goals linked to performance measures focused on student achievement. These are in turn associated with system and campus strategic objectives ([IV.D.3-8](#)). Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. Unallocated funds are redistributed by the OVPCC for other campus or system initiatives, such as those associated with Student Success.

In addition to fiscal resources, the UHCC System has also been attentive to the more effective use of vacant positions throughout the system. Since requests for new positions are subject to

legislative approval and appropriation, the system must often reallocate a position from one unit or program to another, in order to be more responsive to such factors as enrollment growth, changing workforce needs, and program requirements. Another UHCC policy was developed in November 2012 to more objectively and equitably manage and reassign vacant positions. This policy created a system pool of those positions, from which campuses may request reallocation, based on documented need. ([IV.D.3-9](#))

With reference to effective control of expenditures, recent actions taken between 2013-2016 provide an example of the controls in place to ensure accountability and sound fiscal management, as well as the way in which corrective action may lead to the creation and implementation of new policy and procedural guidelines. In the fiscal year ending June 30, 2013, the UH Office of Internal Audit (OIA) conducted operational reviews of the Culinary Arts programs at two community college campuses. The reports identified “operational and financial risks” and presented recommendations relating to the inventory management, financial analysis and reporting, and other aspects of these programs. In spring 2014 OIA conducted follow-up reviews to ensure implementation of recommendations([IV.D.3-10](#)). The Internal Audit report was on the agenda of the May 12, 2015 meeting of the BOR Committee on Independent Audit. Subsequent to the December 15, 2016 meeting of that same committee, findings from the Internal Audit report were included in the UH System’s Annual Report on Material Weaknesses and Fraud, presented to the 2017 legislature ([IV.D.3-11](#), [IV.D.3-12](#), [IV.D.3-13](#)). As one outcome of this case, the OVPC created a new policy in March 2016 to provide better management and oversight for revenue-generating programs. ([IV.D.3-14](#))

### **Analysis and Evaluation**

As part of the University of Hawai‘i system, the College meets this Standard.

Allocation of key resources (particularly funding and personnel) is guided by clearly established policies. Procedures allow all campuses to participate in collective decision-making about resource allocation. Budget requests are tied to strategic planning goals and objectives to ensure that resources are used most effectively to support colleges’ missions in service to student learning and achievement. Fiscal controls are in place to further ensure accountability in the allocation and use of resources.

**IV.D.4 The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEOs accountable for the operation of the colleges.**

### **Evidence of Meeting the Standard**

The University of Hawai‘i System has a president, a vice president for Community Colleges (VPCC) (among several vice presidents responsible for differentiated areas of UH System functions), and chancellors for each of the ten universities or colleges in the system. As noted, the VPCC is the CEO of the system of the seven UH community colleges. Each college has a chancellor, the CEO of the institution. BOR Policy BP 4.207 established the Community College System in 2002, although the colleges have been functioning since 1965 as part of the UH System ([IV.D.4-1](#)). In 2005, the BOR approved the reorganization of the Community College System and created the new Executive position of VPCC ([IV.D.4-2](#)). A subsequent memo to the college chancellors provided detailed organizational charts as well as a Functional Statement for the OVPCC ([IV.D.4-3](#)). Key among the Major Functions delineated in that memo is the following:

“Ensures that the community college chancellors have full responsibility and authority to implement and administer delegated system policies without interference and holds the chancellors accountable for the operation of the colleges.”

The authority and responsibility of community college chancellors for the overall management and governance of their campuses is further affirmed in Executive Policy 1.102 Authority to Manage and Control the Operations of the Campus, which states, “Primary authority for financial management has been delegated by the president to the chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads.” ([IV.D.4-4](#)) University of Hawai‘i Community Colleges Policy, UHCCP #8.000 General Fund and Tuition and Fees Special Fund Allocation, also specifies the chancellor’s responsibility “...to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission.” ([IV.D.4-5](#)) Responsibility for a broad range of personnel actions has also been delegated to the chancellors in Executive Policy 9.112 (Attachment B) ([IV.D.4-6](#)).

In line with the need for accountability in the fulfillment of their duties, chancellors (and other executive/managerial personnel) are subject to annual performance evaluation, with final assessment by the VPCC. This process is thoroughly codified in UHCCP #9.202 Executive Employees Performance Evaluation. ([IV.D.4-7](#), [IV.D.4-8](#))

### **Analysis and Evaluation**

As part of the University of Hawai‘i system, the College meets this Standard.

It is clearly documented in several policy and procedural documents that both the delegation of authority to the campus CEOs, as well as mechanisms to ensure their accountability, are clearly established in the UHCC System. The trend of delineation and delegation has generally given

more autonomy to the chancellors in making campus-level decisions, particularly in the areas of personnel and finance.

<a href="#">IV.D.4-8</a>	Board of Regents Committee on Personnel Affairs and Board Governance Minutes of November 1, 2017 (update of Executive/Managerial Evaluations)

**IV.D.5 District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.**

#### Evidence of Meeting the Standard

The community colleges in the Hawai'i statewide system of public higher education operate within a three-tiered system: the University of Hawai'i (UH) System as a whole (including seven community colleges, two baccalaureate institutions, and the flagship research university); the UH Community College (UHCC) System; and the individual community college campuses located on the four major islands in the state. Satellite learning centers, providing additional outreach across the state, are managed by the community colleges and UH Maui College ([IV.D.5-1](#)). A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require effective planning of operations that are coordinated and integrated across the system.

As noted, there are multiple structures in place at the UH and UHCC levels (e.g., committees of administrative counterparts from individual campuses, councils of campus governance representatives) that facilitate the dialogue and decision-making essential to the processes of planning and implementation. In addition, each tier of the system is grounded in a comprehensive strategic plan that provides the conceptual guidance for mid-range planning. These currently include the UH Strategic Directions 2015-2021, the UHCC Strategic Directions 2015-2021 (intentionally developed to be aligned with the overall UH plan), and the individual campus strategic plans, also developed in alignment with the UHCC plan. ([IV.D.5-2](#), [IV.D.5-3](#), [IV.D.5-4](#))

A crosswalk of these three levels of planning further corroborates the high degree of congruity and integration ([IV.D.3-2](#)). In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the

UH and UHCC levels, as seen in the Crosswalk of UH System and UHCC System Performance Funding cited in Standard IV.D.3. ([IV.D.5-5](#))

Most recently, on April 20, 2017, the BOR approved the Integrated Academic and Facilities Plan (IAFP) for the University of Hawai‘i System. Recognizing the critical interdependence between the academic missions of the ten campuses and the physical and other resources required to support those missions, the IAFP states that it is “...intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH System is addressed without undue duplication or inter-campus competition.” (p. 2) ([IV.D.5-6](#)) The IAFP provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three universities and the UHCC System) and affirms the further integration of planning in noting that “The principles of this plan will be incorporated into biennium budget planning, annual operating budgets, 6-year CIP plans and academic program approvals and reviews.” (p. 18)

### **Analysis and Evaluation**

As part of the University of Hawai‘i system, the College meets this Standard.

The UH System, the UHCC System, and the individual community colleges develop strategic plans that are closely aligned in support of institutional missions focused on student learning and achievement. In many cases, the goals articulated in the plans result in measurable objectives that are used as the basis of evaluating institutional and system effectiveness.

### **LIST OF EVIDENCE**

<a href="#">IV.D.5-1</a>	System Map with CC and Learning Center locations

**IV.D.6 Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.**

### **Evidence of Meeting the Standard**

Multiple modes and avenues of communication exist in the UH System to facilitate and support the effective operation of its constituent institutions. Within the UHCC System, the VPCC and the administrative staff in the OVPCC are key liaisons in the ongoing process of the flow of information.

The VPCC is a member of the UH president’s senior leadership team (Executive Council) as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the Administrative Representative to the BOR Standing Committee on Academic and Student Affairs, and items forwarded from the colleges for BOR approval (e.g., strategic plans,

Institutional Self Evaluation Reports) are presented under the signature of the VPCC. In addition to publicly posted minutes of BOR committee and board meetings, the VPCC is provided with memos summarizing BOR-approved actions ([IV.D.6-1](#)). Campuses are also informed of updates to the policies and procedures that constitute the institutional infrastructure through notification from the Policies and Procedures Information System (PPIS) ([IV.D.6-2](#)).

The VPCC also meets regularly with three councils representing different aspects of college governance: the Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs. Meetings of these councils are documented, and each council completes an annual self-assessment. ([IV.D.6-3](#), [IV.D.6-4](#), [IV.D.6-5](#))

The VPCC makes semi-annual visits to each UHCC campus, with information pertinent to both UHCC System and individual campus performance. Typically, fall semester visits focus on major initiatives and budget for the current academic year as well as campus scorecards in the context of performance-based funding based on data from the prior academic year. Spring semester visits generally provide a summary, as well as a prospective view of upcoming work. [\[IV.D.6.6--VPCC HawCC campus report\(s\)\]](#)

As noted, the community colleges function within a three-tiered system: the UH System, the UHCC System, and the individual community colleges. Communication between the top two tiers (UH System and UHCC System) is structurally more stable and often articulated in specific policy or procedure. Communication between system and individual campuses is predicated on the expectation that campus representatives who sit on or are present at system-level meetings (e.g., the councils identified above, or meetings of functional counterparts such as vice chancellors for Academic Affairs) will report back to their campuses or constituents for informational or decision-making purposes. Individual campus perspectives on communication between campus and system indicate that there are varying degrees of effective campus- and constituent-focused reporting. With the goal of improving timely access to information documenting discussion and decision-making at the system level (e.g., agendas and minutes of councils and other deliberative bodies), specific steps have been taken to address communication-related concerns: 1) as needed, orientation is provided to those serving as campus representatives to system committees so they are more fully aware of their reporting duties; and 2) the OVPCC is engaged in a comprehensive update of its own website to enhance accessibility and currency of the information posted there.

### **Analysis and Evaluation**

As part of the University of Hawai'i system, the College meets this Standard.

Just as the VPCC serves as an important point of connection between the UH System and the UHCC System (OVPCC), and between the OVPCC and the individual colleges, the chancellors of the individual colleges are responsible for coordinating with the OVPCC, and for extending lines of communication to their respective executive teams, faculty, and staff. The OVPCC has recognized the need to maintain access to up-to-date documentation of system-level meetings, and is updating its own website to ensure better access to that information.

**LIST OF EVIDENCE**

<a href="#">IV.D.6-1</a>	Sample Board of Regents memos to VPCC
<a href="#">IV.D.6-2</a>	Sample PPIS Memos to VPCC
<a href="#">IV.D.6-3</a>	UHCCP 1.101: Council of Community College Chancellors
<a href="#">IV.D.6-4</a>	UHCCP 1.102: Community College Council of Faculty Senate Chairs
<a href="#">IV.D.6-5</a>	UHCCP 1.104: Community College Council of Native Hawaiian Chairs

**IV.D.7 The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.**

**Evidence of Meeting the Standard**

The process of evaluating role delineations, governance, and decision-making processes can best be described as organic and ongoing, in the sense that while there is not a formal instrument of evaluation or assessment, there are multiple established policies and procedures in place at the UH, UHCC, and campus levels that are intended to ensure the stable, consistent, and effective functioning of systems and individual colleges. Such policies and procedures serve both to a) set standards of best practices; and b) minimize the likelihood of actions that do not uphold expectations of integrity and effectiveness. Policies are regularly reviewed ([IV.D.7-1](#)), new policies are created when need is recognized (e.g., new UHCC policy on selection process for chancellors), roles and responsibilities are delineated in the Functional Map, and personnel are regularly evaluated on their performance in supporting and achieving educational goals ([IV.D.7-2](#)).

Of specific importance in this last context is the role of the Community Colleges Strategic Planning Council (SPC), the primary body for assuring systemwide participation in the UHCC strategic planning process, as codified in UHCCP #4.101 Strategic Academic Planning. The policy identifies roles and responsibilities in the process of campus academic planning, which provides much of the critical infrastructure for the effective functioning of the colleges ([IV.D.7-3](#)).

**Analysis and Evaluation**

Established policies and procedures, as well as documentation of governance and decision-making that operationalize those policies and procedures, are subject to ongoing review. Where appropriate, colleges are evaluated on the basis of performance-based measures that support their efforts to meet goals linked to student achievement and learning.

## Quality Focus Essay

---

[Insert Picture Here]

## Quality Focus Essay

---

### Introduction

As a result of self-reflection during the Institutional Self Evaluation Report (ISER) process, members of the Hawai‘i Community College (Hawai‘i CC) *Kauhale* identified two areas on which to focus to better meet the mission of the College and to ultimately increase student learning and achievement. These two action projects aim to improve the College’s 1) integrated planning process, and 2) student first-year experience.

In this Quality Focus Essay (QFE), the College outlines how these projects were identified, as well as proposed outcomes, actions, timelines, needed resources, and proposed assessments.

Action Project	Standards Related to Action Project
1. Integrated Planning	I.A.3, I.B.9, II.A.16, III.B.2, III.C.1, III.D.2, III.D.3, IV.A.2, IV.A.3, IV.A.6, IV.B.3
2. First-Year Experience	I.B.3, II.A.7, II.B.1, II.C.1, II.C.5, III.A.14

### Action Project 1: Integrated Planning

The goal of institutional planning is to steer the College towards effectively fulfilling its mission. Planning incorporates assessment of student learning, program review, strategic and academic plans, and resource allocation for the attainment of institutional objectives. Since integrated planning involves broad-based coordination and collaboration across the College, it is important to create a process that is clear, well-communicated, and useful. Integrated planning evolves over time and requires continual re-evaluation and commitment from all parts of the *Kauhale*. Writing the ISER, followed by the deployment of Achieving the Dream’s Institutional Capacity Assessment Tool (ICAT) survey, provided an excellent opportunity to assess how well integrated planning is taking place at Hawai‘i CC. Through Standard and Core Team discussions, stakeholders indicated the need for further revision of integrated planning at the College.

**Recent Integrated Planning Efforts:** In an attempt to define the relationships between various planning components of the College and to institutionalize processes that steer the College forward in a unified and coherent manner, the Office of the Chancellor issued HAW Policy 4.201 in November 2011, after a broad, collaborative review. This policy outlined the way the various components work together to guide the institution towards its goals. These components include various plans (the UHCC Strategic Plan, Hawai‘i CC’s Strategic Plan, the Academic Master Plan, the Technology Master Plan, and the Resources Master Plan) as well as the program and unit review and assessment processes ([QFE-1](#)). While this policy outlined the intentions of the *Kauhale*, implementation proved challenging for a variety of reasons. A sound integrated planning system requires the capacity to maintain its various components and ensures active participation by a broad spectrum of the *Kauhale*. While integrated planning invited participation and functioned as described in the policy, the recent ISER process and ICAT survey made evident the need to streamline processes to make the College’s integrated plan more transparent, meaningful, and sustainable over time.

## Identification of the Need

**The ISER Process:** Reviewing various plans and processes, campus leaders and Standard Teams identified inefficiencies. For example, Standard Teams noted that the annual evaluations of program and unit reviews, conducted by the College Effectiveness Review Committee (CERC), are time consuming and, because multiple representatives and stakeholders participate in these evaluations, difficult to schedule. There can be a significant time lag between the writing of program and unit reviews and related resource allocation. A more streamlined process of evaluation by CERC could assure more meaningful expenditures that directly promote student learning.

In another example, while program and unit reviews facilitate important reflection within departments and non-instructional units, this reflection remains largely in silos. Cross-campus self-evaluation could be strengthened in the integrated planning process to facilitate more seamless services and support for students across the institution. In addition, a wider, more intentional sharing of results would lead to better transparency and cross-department/division/unit understanding and cooperation.

**The ICAT Survey:** Hawai'i CC adopted Achieving the Dream's Institutional Capacity Assessment Tool (ICAT) as a way to gather feedback from the College's faculty and staff about the institution's processes and to provide context for Action Project 1.

Planning for implementation of the ICAT survey started July 2017 with the administrative team, College Council, and members of the ISER Core Team. The tool measures *Kauhale* members' perceptions regarding institutional capacity in seven key areas. Not surprisingly, the results of the survey confirmed needs identified during the ISER process. With the results of the ICAT, the College

- facilitated a campus-wide discussion about improvements needed for the College, such as streamlining the integration of planning, evaluation, and resource allocation;
- focused on our capacity to support student success, particularly in closing educational achievement gaps; and
- re-evaluated efforts and commitment to achieving student success.

The survey was launched at the beginning of spring 2018. By mid-February, 118 faculty, administration and staff (34%) responded to the survey. The College kicked off a campus dialogue with a Capacity Cafe during *Kauhale* Day ([QFE-2](#)) on March 2, 2018. Over 150 members discussed the data and proposed solutions to identified concerns.

## Desired Goals/Outcomes

The goal of Action Project 1 is to strengthen the College's integrated planning processes to be more efficient, streamlined, and timely. This includes leveraging technology tools (including the recently acquired Campus Labs *OUTCOMES* assessment management system) for better data and information gathering and improved workflow. Finally, the goal is to make the integrated

planning process more *Kauhale*-based, increasing participation and commitment, as well as improving communication and transparency, all directed towards the shared outcome of enhancing student success.

### Actions/Steps to Be Implemented

- The College establishes where improvement of the integrated planning processes is needed. From information gathered through the ISER process and ICAT discussions, the College will review where and how to consolidate and streamline campus plans, the program and unit review processes, and the allocation of resources.
- The administrative team, College Council, and Accreditation Liaison Officer (ALO) will create an Integrated Planning Review (IPR) Task Force that will compile and analyze data and survey results.
- With the administrative team, College Council, and ALO, the IPR Task Force will research best practices and models for high quality integrated planning.
- The IPR Task Force will develop an updated model for implementation. This will include strengthening the links between outcomes assessment and the program and unit review process (PURP), and reviewing and clarifying the relationship between the PURP and budget allocation.
- The College will implement the revised model and draft relevant policies.
- The chancellor, administrative team, and IPR Task Force will evaluate the updated model and revise and improve as needed.

### Responsible Parties

Ultimately, the responsible parties will be the administrators of the College. However, a broad cadre of campus leaders and stakeholders, represented in the IPR Task Force, will be involved in the research, review, and revision process. In addition, the College Council's involvement will ensure broad representation across the College.

### Timeline and Process

Implementation Year	Tasks	Timeline	Responsible Parties
Year 0 (Spring 2018)	<b><u>Taking Inventory</u></b> Needs assessment (ISER, ICAT)	Spring	Administrative Team, College Council, ALO
Year 1 (2018-2019)	<b><u>Review and Research</u></b> <ul style="list-style-type: none"> <li>● Review, consolidate, streamline campus plans</li> </ul>	Fall, Spring, Summer	IPR Task Force: membership from Administration and Campus Governance

	<ul style="list-style-type: none"> <li>● Review, revise PURP</li> <li>● Explore ways for Campus Labs <i>OUTCOMES</i> assessment management system to contribute to better efficiency of assessment and program/unit review</li> <li>● Review and revise budget process</li> <li>● Compile and analyze data</li> <li>● Research best practices and models</li> </ul>		Groups
Year 2 (2019-2020)	<p style="text-align: center;"><b><u>Redesign</u></b></p> <ul style="list-style-type: none"> <li>● Develop new model and plan for implementation</li> </ul>	Fall, Spring	IPR Task Force
Year 3 (2020-2021)	<p style="text-align: center;"><b><u>Implement</u></b></p> <ul style="list-style-type: none"> <li>● Implement updated model and draft policies</li> </ul>	Fall, Spring	Chancellor, Administrative Team, IPR Task Force
Year 4 (2021-2022)	<p style="text-align: center;"><b><u>Assess and Revise</u></b></p> <ul style="list-style-type: none"> <li>● Evaluate update model</li> <li>● Revise and improve as needed</li> </ul>	Fall, Spring	IPR Task Force

### Resources

Initially, Action Project 1 will not require resources beyond the time and commitment of the *Kauhale*, most especially the administrative team, College Council, ALO, and the IPR Task Force. During and after Year 2, however, resource needs will be evaluated and the various participants will identify what funding will be needed, if any.

### Assessment

The College will collect data about 1) the timely completion and quality of program and unit reviews, 2) numbers of faculty and staff who participate in the planning process, and 3) student success indicators directly resulting from budgeting decisions and expenditures. Furthermore, the College plans to redeploy the ICAT survey to identify ways to continue making improvements.

## Action Project 2: First-Year Experience

The goal of the College is to provide high quality learning opportunities that lead students to degree completion and employment. To achieve this goal, the College aims to support each student from entry to end point. This project focuses on improving experiences for students at their most vulnerable stage: their first year at the College. Recognizing the potential to improve the retention of students, the College *Kauhale* will focus on meeting the needs of students during their first year, both inside and outside the classroom. This project develops a coordinated program between instruction, student services, and academic support that seeks to improve retention and persistence rates, and ultimately degree attainment.

### Identification of the Problem

According to 2017 IPEDS statistics, 31.4% of full-time, degree-seeking students who entered Hawai‘i CC in fall 2014 completed a certificate or degree in three years. Only 48% of first-time degree-seeking students in fall 2016 returned in fall 2017 ([QFE-3](#)). In response to these data, the College and the UHCC System have worked to improve Hawai‘i CC’s enrollment and persistence through a number of initiatives. For example, the UHCC System’s Integrated Student Support (ISS) Team emerged out of Achieving the Dream efforts to develop a “Student Success Pathway with academic and non-academic supports to achieve an educational goal that supports their career aspirations.” ([QFE-4](#)) Similarly, in spring 2017, the vice chancellor for Academic Affairs (VCAA) and the vice chancellor for Student Affairs (VCSA) convened a representative group of campus leaders for the Student Success Pathways (SSP) Team, which is working towards the development and implementation of an integrated Strategic Enrollment Management (SEM) Plan 2018-2021. The SEM Plan modifies existing outreach and onboarding activities, as well as improves support for students’ progress to degree completion and transfer.

**Action Project 2** targets the development of high engagement strategies for an effective first-year experience that will contribute to larger, wider ranging efforts of ISS, SSP, and other initiatives to increase retention and persistence. This project will focus on training instructors, peer mentors/tutors, and academic and student support advisors and counselors to develop and implement these strategies.

### Desired Goals/Outcomes

The outcome of Action Project 2 is the development of high engagement approaches for instruction and academic and student support that will contribute to a positive first-year experience for students. This Action Project will support other College efforts to create an effective first-year experience program that increases Hawai‘i CC’s attainment of institutional goals for persistence and completion, and ultimately, students’ graduation rates and achievement of their academic and career goals.

### Actions/Steps to Be Implemented

#### Launch of instruction and student support training:

- The College will form a First-Year Experience Campus Planning Team that will introduce and develop a plan to provide training of faculty and student support faculty/staff in the use of high engagement strategies.

- An initial group of instructors and student support faculty/staff will be trained to implement high engagement strategies.

**Implementation**

- A bank of resources and professional development materials for high engagement strategies will be made available to the entire campus.
- A cohort of students will be identified to enroll in classes utilizing the high engagement strategies.
- Tutors and peer mentors will be trained.
- Strategies for high-touch support for faculty advising and counseling will be adopted and counselors and advisors will be trained.
- The First-Year Experience Campus Planning Team will collect, analyze, and report out student persistence and retention data for students who take one or two classes from trained instructors.

**Scale up**

- Given the data, as appropriate, teachers, counselors, advisors, tutors, and peer mentors will be offered training in high engagement strategies.
- The First-Year Experience Campus Planning Team will monitor success by collecting and analyzing student persistence and retention data and will adjust strategies, as needed.

**Integration**

- The First-Year Experience Campus Planning Team will work with the Student Success Pathways (SSP) Team and UHCC System’s Integrated Student Support (ISS) Team to integrate other components of first-year experience: onboarding, retention, persistence measures.
- The First-Year Experience Campus Planning Team will monitor success by collecting and analyzing student persistence and retention data and will adjust strategies, as needed.

**Responsible Parties**

As in Action Project 1, the final responsibility lies with the administrative team. However, trained faculty and counselors, as well as those overseeing the peer tutoring/mentoring program, will carry out the implementation and support the assessment.

**Timeline and Process**

Implementation Year	Tasks	Timeline	Responsible Parties
---------------------	-------	----------	---------------------

Year 0 (Spring-Summer 2018)	<p style="text-align: center;"><b><u>Launch of Instruction and Student Support Training</u></b></p> <ul style="list-style-type: none"> <li>● Form a campus planning team.</li> <li>● Offer introductory, voluntary training to all instructor and student services faculty and staff.</li> <li>● Train initial group of instructors and student support faculty/staff.</li> </ul>	Spring/ Summer	VCAA
Year 1 (2018-2019) Pilot Project	<p style="text-align: center;"><b><u>Implementation</u></b></p> <ul style="list-style-type: none"> <li>● Provide a bank of resources and professional development materials for high engagement strategies, campus-wide.</li> <li>● Identify a cohort of students to enroll in pilot classes.</li> <li>● Train tutors and peer mentors.</li> <li>● Couple high engagement teaching with other services: trained peer mentoring, faculty advising, and counseling.</li> <li>● Collect data on students who take one or two classes from trained instructors in the first semester.</li> <li>● Analyze and report out data.</li> </ul>	Fall	Campus Planning Team
		Fall	Campus Planning Team/VCAA
		Fall/Spring	VCAA/VCSA
		Spring	VCAA/VCSA/ Campus Planning Team
		Spring/ Summer	IR
		Summer/Fall	Campus Planning Team

Year 2 (2019-2020) Scale up	<p style="text-align: center;"><b><u>Scale up</u></b></p> <ul style="list-style-type: none"> <li>● Increase number of trained teachers, advisors, tutors, peer mentors.</li> <li>● Monitor and adjust.</li> <li>● Continue to develop resources, collect and analyze data.</li> </ul>	Fall/Spring	Campus Planning Team/VCAA
Year 3 (2020-2021) Evaluation Stage	<p style="text-align: center;"><b><u>Integration</u></b></p> <ul style="list-style-type: none"> <li>● Integrate other components of first-year experience: peer mentoring, workshops, leadership and community service activities, retention, persistence measures.</li> <li>● Monitor and adjust.</li> <li>● Continue to develop resources, collect and analyze data.</li> </ul>	Fall/Spring	VCAA/VCSA  Campus Planning Team/VCAA  Campus Planning Team/VCAA

### Resources

The College has made a three-year commitment to utilizing AVID (Advancement Via Individual Determination) for Higher Education ([QFE-5](#)) resources and training to develop high engagement strategies to increase student retention and persistence. AVID for Higher Education (AHE) has demonstrated the value of increasing the level of student engagement through interpersonal relationships (student/student and instructor/student), collaborative activities, critical thinking activities, and non-cognitive skill-building opportunities. AHE coaches are available to assist the campus planning team as it develops its own, tailored first-year experience program through a campus-wide, campus-specific approach. Hawai'i CC will leverage access to these resources to support the development of a first-year experience program.

### Assessment

To assess the success of Action Project 2, student persistence and retention data will be collected and analyzed each year by administration, the Campus Planning Team, and participants in the pilot and scale-up of this project. This group will share with the College the effectiveness of strategies that have been designed and implemented, first from the pilot, and then from the scale-up efforts. If warranted, further resources will be sought for professional development for instructors, counselors, and advisors.

## Changes and Plans Arising out of the Self-Evaluation Process

---

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Schedule of data updates to reflect current information (transparency)	I.B.3	Institutional Research, Institutional Assessment Coordinator	2018-2019 (upon approval of campus reorganization and creation of Office of <i>Kauhale</i> Analytics and Intelligence)	Increase access to campus data needed for evaluation and planning
Determine how assessment management system and assessment design can enable disaggregation of assessment results	I.B.6	Vice Chancellor for Academic Affairs, Institutional Assessment Coordinator, Institutional Research	Begin fall 2018	Disaggregation of learning outcomes data
Review and revise the integrated planning process (including evaluation of master plans)	I.B.9, III.B.2, III.C.1, III.D.2	(Related to QFE Project #1)		

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Creation of a systematic formalized process and annual schedule and timeline for website content review and updating	I.C.1	Web Developer, Vice Chancellor for Administrative Services	Started spring 2018	Website content is reviewed annually for accuracy and updated in a timely manner
Policy HAW 1.001 was updated to include a policy review schedule	I.C.5, IV.A.4	Administrative Team	Completed spring 2018	Systematic, regular review of College policies and procedures
Language related to the objective presentation of instructional content was included in the syllabus guidelines	I.C.9	Vice Chancellor for Academic Affairs, Deans, Division and Department Chairs	Completed and posted on the College website fall 2017	Increased awareness of expectations related to the presentation of instructional content
Review and revise the Program/Unit Review Process	II.A.2, II.A.16	(Related to QFE Project #1)		
College-wide guidelines and general expectations for course syllabi were created	II.A.3	Vice Chancellor for Academic Affairs, Deans, Division and Department Chairs	Completed and posted on the website fall 2017	Increased consistency in course syllabi content across departments

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Review of Liberal Arts course sequencing and prerequisites	II.A.5	Liberal Arts Dean and Department Chairs	Started fall 2017; ongoing	<p>Improve sequencing and effectiveness of learning in 100-level courses before moving to upper level courses</p> <p>Ensure that prerequisites for 200-level courses are appropriate and consistent</p>
Gather, analyze and provide data to the College on a regular basis. (post in Fact Book)	II.A.7	Institutional Researcher	Planned for fall 2018 (after new Institutional Researcher hired)	Improved use of data to determine effectiveness of different modes, methodologies, and support services with specific student groups
General Education Learning Outcomes (GELO) aligned with Program Learning Outcomes (PLO) and Institutional Learning Outcomes (ILO)	II.A.11	Instructional faculty, Department/Division Chairs, Liberal Arts Dean, Vice Chancellor for Academic Affairs	<p>Completed spring 2018:</p> <p>GELO to PLO alignments approved by Vice Chancellor for Academic Affairs</p> <p>GELO to ILO alignments approved by Academic Senate</p>	Clear and documented alignment of College outcomes

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Transition to UH Mānoa's Foundations and Diversifications General Education (GE) requirements for AA and AS degrees	II.A.12		Transition for AA degree will be completed in fall 2018 (approved by Academic Senate spring 2017)  Transition for AS degrees will be completed in fall 2019 (approved by Academic Senate spring 2018)	Improve GE alignment to UH System
Added The Learning Center tutoring services to MySuccess system	II.B.1	MySuccess Campus Leads, The Learning Center Coordinator	Completed in 2017-2018	Students able to make appointments at The Learning Center via the MySuccess system
Formalize comprehensive assessment of student needs regarding Student Services	II.C.1 II.C.3	Vice Chancellor for Student Affairs, Student Affairs managers	Begin fall 2018	Increase data to better identify needs for student services for all students (including DE)
Reorganize Student Life structure	II.C.4	Vice Chancellor for Student Affairs	Begin fall 2018	Clearly defined Student Life structure and program

Action	Standards	Responsible Party(ies)	Timeline	Expected Outcome
Create evaluation/assessment process or system to measure effectiveness of placement instruments/qualifiers	II.C.7	Vice Chancellor for Academic Affairs, Institutional Researcher, Student Success Council, Vice Chancellor for Student Affairs, Hale Kea Manager	Planned for fall 2018 (after new Institutional Researcher hired)	Structured and scheduled data analysis of placement instruments and qualifiers (every semester)

## Guide to Viewing the Report

### Document links

Blue designators within parentheses indicate a link to evidence supporting the point discussed, usually a document or webpage screen shot. Click on the link to view the evidence.

The following example will link to a document:

... outlined in its Strategic Directions ([I.A.7](#)) ....

For large documents, the blue designator will show the specific page to view, such as page 15 for the following example:

... essence of the college and its purpose ([I.A.1 \[p. 15\]](#)) ....

Referrals to other sections are not links but there for information. Referrals are in italics, not in blue, and begin with “See section ....”

*(See section I.B.3)*

### Evidence folders

On the same thumb drive as the report are folders that include evidence files pertaining to particular standards, such as folder STD.I.A.

Names of files for web screen shots include the web link in parentheses. Click on link to go to the webpage if there is an Internet connection. An example of such a file:

I.C.8 Accreditation Screen Shot ([www.honolulu.hawaii.edu/accreditation](http://www.honolulu.hawaii.edu/accreditation))

### REFERENCES IN DISTANCE EDUCATION SUPPLEMENT

In the Distance Education Supplement, *italicized* references in parentheses indicate that the information is in the main report. Example:

... regular communication, reports, and plans. (*II.A.5, II.A.6, II.A.7*).

**POLICY FILE NAMES**

Policy names that start with

RP – refer to Board of Regents policies (example RP 8.201)

EP – refer to University of Hawai'i executive policies (example EP 8.201)

AP – refer to University of Hawai'i administrative policies (example AP 8.201)

UHCCP – refer to University of Hawai'i Community College policies (example UHCCP 8.201)

HCCP – refer to Honolulu CC policies (example HCCP 8.201)

## Introduction

### Brief History

Honolulu Community College (Honolulu CC) was established in 1920 as the Territorial Trade School in Palama. Subsequently, it became part McKinley High School, but was later reestablished as Honolulu Vocational School. It became the Honolulu Technical School in 1955 before becoming part of the University of Hawai'i as a result of the Community College Act of 1964. In 1966, the Board of Regents approved the name Honolulu Community College and authorized the school to grant Associate in Arts and Associate in Science degrees.

As one of seven schools comprising the UH Community College System, Honolulu CC experienced rapid growth between 1966 and 1976 and has evolved into a fully comprehensive community college. The Main Campus, a short distance from the heart of Honolulu on Dillingham Boulevard, offers liberal arts instruction leading to a two-year Associate in Arts degree, allowing students to transfer credits to achieve junior class standing at four-year higher education institutions within the State. The college also has facilities near Honolulu International Airport, on Kokea Street, and at Sand Island that currently offer Associate in Science, Associate in Applied Science, and Associate in Technical Studies degrees. Certificate programs in more than twenty Career and Technical Education areas that are integrated with a strong general education "core" help Honolulu CC provide an educated citizenry for the workforce of the State of Hawai'i.

### Responding to Students

In its planning, Honolulu CC takes into account that its student population is an aggregate of multi-ethnic and cultural identities unique to the Kalihi-Kapālama neighborhood. The neighborhood, not far from the Honolulu city center, has a working-class environment with a significant number of immigrant families and Native Hawaiians. Data on student demographics are available in the *Honolulu CC Fact Book 2017* (I.A.2 [pp. 5-9]).

The community ranks third highest in the state for disabilities among those ages 21 to 64. It has the highest percentages statewide of Filipinos (46.7%), Asians (65.8%), and foreign-born recent immigrants (15.6%). It has the second-largest population of Pacific Islanders in the state. The per capita income is in the lowest 25% statewide.

Compared to the state as a whole, our community experiences higher unemployment, higher usage of welfare and food stamp assistance, and lower levels of home ownership.

More than half of the adolescents from this area who responded to a statewide survey reported community disorganization, low family attachment, and poor parental supervision.

According to the “Farrington Area Community Profile,” our community has one of the lowest for children who are nurtured and doing well in school, families that are healthy, and communities which are economically vital. Measured by a protection index, the Farrington community ranked 41 out of 42 statewide communities ([INTRO.1 \[p. 6\]](#)).

The per capita income is in the lowest 25% Statewide. Residents in this area experience higher unemployment, higher usage of welfare and food stamp assistance, and lower levels of home ownership than the State as a whole. The percentage of adults possessing high school diplomas is 69%, the lowest in the state, and those with Bachelor’s Degrees are only 12%. The area has a high percentage of foreign-born recent immigrants and the second-largest population of Other Pacific Islanders in the state ([INTRO.1 \[pp. 2-4\]](#)).

Students seek affordable and flexible education from an open-door and comprehensive community college to accommodate work schedules and family concerns. Honolulu CC is the primary technical training center of the Pacific Rim and is thus uniquely equipped to address the business and technical needs of the State of Hawai’ i. In addition to providing workforce opportunities that are required by legislative mandate, the College also offers a variety of degrees and serves as a primary entry point for students seeking an Associate degrees in Arts (AA), Science (AS), and Technical Studies (ATS), or to complete their first two years of a Liberal Arts degree for eventual transfer to a four-year degree-granting institution ([I.A.1](#)).

The College also offers non-credit courses in Apprenticeship and Journey Worker Training, Continuing Education, and Lifelong Learning. In addition, the College has instituted a High School Outreach Program (Early College High School) in which qualifying seniors may take courses for college transfer credit. The College’s evening program enrolls many students returning to college while raising families or after long absences. Many are full-time employees during the workday.

The College also addresses the needs of those entering or re-entering the workforce by pursuing with required certifications or job skills. Veterans are accommodated as well as individuals seeking to improve their professional and personal skills and interests. The College also offers an array of distance education courses in cable, online, and hybrid formats as noted in the college catalog ([I.A.1 \[p. 163\]](#)).

The needs of our students, community and statewide workforce, as identified in our mission statement, provide an essential rationale for the creation, support and

continuous improvement of programs, curricula, courses and services. The context of our community, the current and future needs of Hawai'i business and community members, as well as future employment opportunities for our students are determined using a variety of sources.

The reports and studies utilized include Department of Labor and Industrial Relations forecasting reports ([Intro.2](#)) that project the employment growth by industry; survey of former students ([Intro.3](#)), and Career Assessments done by the HCC Career Readiness and Job Placement Center. On the whole, the data gathered by the College and the Office of the Vice-President for Community Colleges ([Intro.4](#)) strongly indicate that the College's mission and goals are appropriately aligned with the needs of our student population.

Student needs are assessed regularly with the biannual administration of the Community College Survey of Student Engagement (CCSSE), and the Graduation Survey. The surveys provide meaningful information from current students, soon-to-be alumni, and former students. The surveys attempt to gauge general satisfaction, student engagement and any student needs that are unmet by the College. Other quantifiable data such as student retention and success rates, persistence and transfer rates, course completion and success rates are reviewed regularly as part of the Annual Report of Program Data (ARPD), Program Reviews, and the annual strategic plan updates.

The College has developed projected success measures for Native Hawaiian, Filipino, Pacific Islander, and low-income students as shown in the College's Educational & Strategic Plan ([I.A.3 \[pp. 4-6\]](#)). The measures target achievement in degrees and certificates, STEM, and transfer to four-year programs. Achieving these goals remains a challenge [Gap Analyses] ([I.A.3 \[p. 4\]](#)). Data on Native Hawaiian degree/certificate completion rates is available in the *Honolulu CC Fact Book 2017* ([I.A.2 \[pp. 77-78\]](#)).

The state's Hawai'i Graduation Initiative (HGI) is committed to increasing college participation and completion rates. Specifically, with regard to Native Hawaiian students, the College has implemented "Hawai'i Papa O Ke Ao" (Hawai'i Foundation of Enlightenment/Knowledge), an initiative led by Native Hawaiian faculty and staff, for the University of Hawai'i (UH) system to become a leading indigenous-serving educational entity. This initiative will make use of a Title III Grant, *Ho'āla Hou* (Renewing a Pathway to Student Success Through Culture-Based Learning) to facilitate an enrollment pathway for Hawaiian students and create a culture-and place-based learning program for faculty, staff, and administrators aimed at infusing Hawaiian culture, traditions, and values into the campus community.

The institution's educational purpose is appropriate to an institution of higher learning. Honolulu CC's mission is reflected in a wide range of academic and support services to meet the needs of its intended student population.

The College offers many courses to meet the University of Hawai'i and other four-year institutions' general education requirements, which may be applied toward a baccalaureate degree. Data on transfer to four-year institutions are available in the *Honolulu CC Fact Book 2017* (I.A.2 [pp. 101-103]). Honolulu CC is committed to providing the first two years of a traditional baccalaureate education by offering high-quality general education courses in Liberal Arts.

The College provides two-year transfer educational programs that offer students the general education component of the baccalaureate degree. The two-year transfer educational program offers courses articulated with all three four-year campuses in the UH system, as well as to the other six community colleges.

In Fall 2017, Honolulu CC inaugurated three pathways to assist students in achieving a specialized education: Exploratory Business, Exploratory Social Sciences, and Exploratory Health. These pathways guide students to courses that meet the requirements of the specialized majors at the four-year UH colleges.

In the realm of technical education, the College offers two-year, four-year, short-term and apprenticeship occupational-technical curricula for employment, skill upgrading and career advancement, and transfer to four-year technical programs.

The College also offers non-credit and continuing education services.

Some career and technical education degrees provide students with skills and competencies for gainful employment, entirely at the associate level. The Honolulu CC CENT program (Computing, Electronics, and Networking Technology), has established an articulation with UH West Oahu that includes the option of a Bachelor of Applied Science in CENT or the option of a Bachelor of Applied Science in Information Security and Assurance (ISA). There is also articulation leading to a Bachelor of Arts in System Administration with Hawai'i Pacific University. Students who complete either the Associate of Science degree or the Advanced Professional Certificate in CENT may apply to transfer to these institutions to complete a baccalaureate degree in these programs. Students may be concurrently enrolled in the Bachelor of Applied Science programs at UH West Oahu and the CENT AS or APC program at Honolulu CC, as noted in the college catalog (I.A.1 [p. 105]).

The College provides a wide array of non-academic support services to encourage and

facilitate academic progress: Career and Retention Services which provide assistance in career counseling, career assessments, career exploration, résumé and cover letter writing, interview preparation, career fairs, and career readiness presentations; a Children's Center, which provides day care for infants, toddlers and preschoolers; Financial Aid Services, which is available to all Honolulu CC students; Mental Health Services, which provides confidential personal/crisis counseling and community referral services; Disability Services (Student ACCESS), which is in compliance with Section 84.4 of the Federal rules and regulations governing Section 504 of the Rehabilitation Act of 1973; and Student Success (TRIO-SSS), where students receive guided individualized assessment and planning, small group tutoring, mentoring, cultural and educational workshops, club and community service activities, and other academic support.

The College was the first among the Hawai'i community colleges to pilot the STAR Graduation Pathway for new student registration in April 2016, and is the first to engage in a facilities and scheduling analysis tied to efficiency and effectiveness of facilities use.

In 2016, the College obtained an iPASS grant (Integrated Planning and Advising for Student Success) piloted using MySuccess and predictive analytics to adopt a more proactive approach with our students, as indicated in Planning Council minutes ([Intro.5](#)).

Other academic support services are also provided: The Campus Open Computer Lab along with several computer access locations on campus; the Hawaiian Center, which offers an array of comprehensive services and is open to all students; a Library, which assists students, faculty, and staff in obtaining and using information resources effectively to enable and promote student learning; a Math Lab, which provides tutoring both inside and outside the classroom; a Testing and Tutoring Center to assist students with their course work and related activities; and a Writing Center to help students become better writers and succeed in college.

Student achievement is measured by metrics including certificate and degree attainment, licensure examination passage, post-program employment, successful course completion and Student Learning Outcomes (SLOs). The assessment of SLOs is the College's instrument to ensure that the student-learning component of the mission is implemented successfully. Recently, the College hired an Institutional Assessment Specialist and has been discussing options for a repository containing campus-wide SLO assessment. The College is committed to student learning and student achievement.

Student success data is shared with the Vice President for Community Colleges and

partnership groups, and is used in assessing compliance with institution set standards, strategic initiatives, equity expectations, grants and other College initiatives.

Compared to the other community colleges in the UH System, Honolulu CC is a unique learning environment (Liberal Arts and the non-credit Technical Training Center of the Pacific Rim), with a unique student population (Native Hawaiian, Filipino, low income, immigrant), with a unique set of challenges (high unemployment, low income), but with a common goal, achieving academic excellence and personal growth.

In a statewide survey of the community that the College serves, the majority of adolescents reported that they value education, and the majority of parents reported that they are involved with their children's schools ([Intro.1](#)). The mind-set of the College is not simply that of a linear, cause-and-effect relationship between academic excellence and personal growth, but that personal growth also leads to academic excellence.

## Campus Initiatives

### *Pathways*

In AY 2015-16, Honolulu CC adopted Student Success Pathways to align campus-wide strategic planning efforts for student success. The Pathways framework articulates five phases that guide students from point of entry to transfer to a four-year institution or attainment of credentials for the labor market. The campus is focusing on one phase at a time, mapping out specific activities.

Subsequently, the University of Hawai'i Community College (UHCC) Student Success Council adopted a similar framework. Though not identical, it aligns with the Honolulu CC's Pathways and allows collaboration with other seven community colleges to share ideas.

*Illustration-Intro.1 Pathways*

Pathways provide structured educational experiences for students, guiding them with the end in mind. The initiative helps students choose and enter a path, keeps them on the path, and ensures they are learning. Pathways also encompass enrollment efforts and ways the campus can support student learning and achievement ([Intro.6](#), [Intro.7](#), [II.C.18](#)).

### STAR GPS Registration

Honolulu CC worked with the University of Hawai‘i at Mānoa to pilot STAR, an online course registration interface for students. The pilot began with just ten students but scaled progressively. Currently all traditional students register via STAR.

STAR GPS Registration is an easy-to-navigate registration system that displays courses a student needs to graduate in a timely manner and personalizes a plan, so the student will know the courses that count for a degree or credential. STAR also provides a visual calendar of classes so the student can see how they fit together when making selections of courses. Students can search for any class at any UH campus and view transcripts (II.C.28).

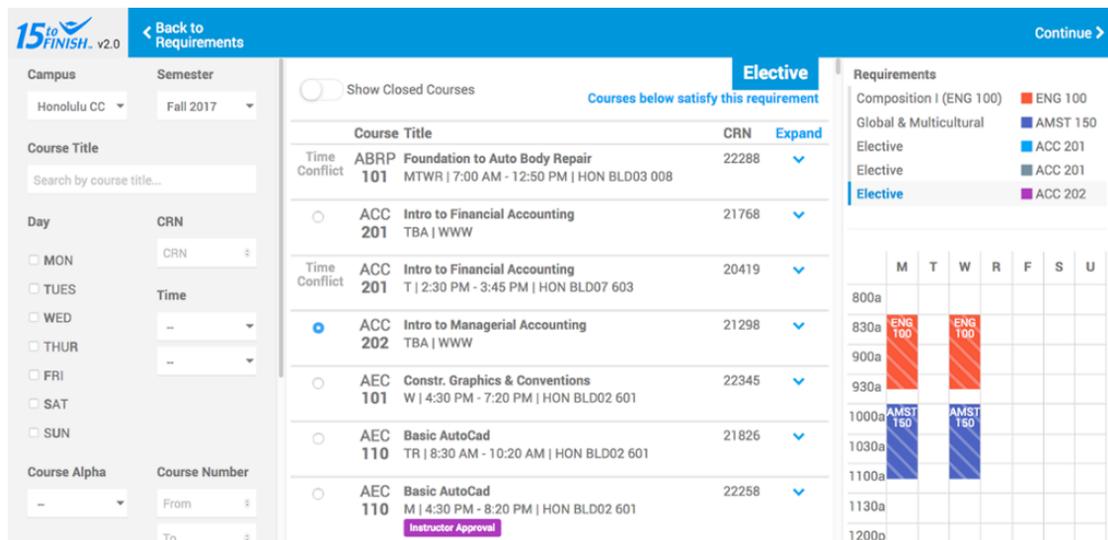

Illustration-Intro.2 STAR GPS Registration

### IPASS

iPASS (Integrated Planning and Advising for Student Success) is an initiative to use technology to strengthen and streamline the student experience of academic, career, financial advising, and planning services.

The College is transforming these services by enhancing academic counseling, accelerating the move to online registration, refining course planning, improving responses to early alerts for retention, implementing a wider range of supports, and engaging faculty to assist students in academic progress.

The University of Hawai'i System and Honolulu CC emerged as one of 24 institutions in the nation to receive \$225,000 over three years. The funding comes from Achieving the Dream and the Helmsley Charitable Trust.

*Illustration-Intro.3 iPASS*

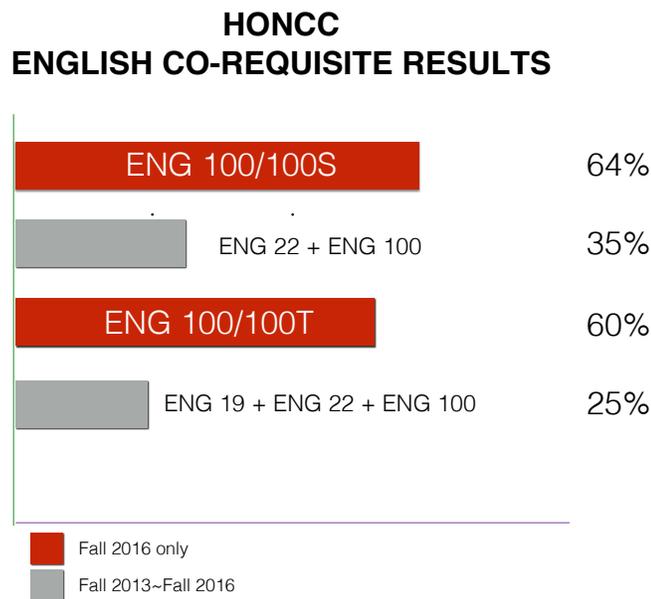

In accordance with our College’s mission (“Student Centered, Student Focused”), Honolulu CC recognizes that student success and retention is the responsibility of every faculty, staff, and administrator. Students are empowered through stronger connections with faculty, student services, and academic support programs. These connections are supported through the robust use of integrated technology solutions.

Instructional faculty can play a role in initial advising and connection to services. Over the past two and a half years, Honolulu CC has used iPASS to build a holistic and integrated advising experience for students. Through the work of iPASS, support services have augmented their capacity to use technology tools and amplify processes around the collection of data from these tools to better meet the needs of students (Intro.8).

*English and Math Redesign*

English and math eliminated developmental education classes in Fall 2016. The aim was to remove roadblocks that delay students from beginning program coursework and completing requirements for graduation. The redesign reduced coursework to complete college-level English to one semester or math to one or two semesters from as much as four semesters in the former developmental sequence.

English switched to co-requisite classes from underprepared students and showed a dramatic success. Students with English skills below college-level were placed into either a 1-below (ENG 100/100S) or 2-below (ENG 100/100T) co-requisite course. The success rates of the 1-below were 64% compared to 35% in the old sequence and success rates of 2-below were 60% compared to 25% in the old sequence.

*Illustration-Intro.4 English co-requisite results*

Math implemented accelerated courses and showed an improved success rate. Of 50 students enrolled in MATH 25/103 in fall 2016, 54% successfully completed the college-level MATH 103 component. The success is a dramatic change compared with the students who enrolled in MATH 25 between fall 2013 and spring 2016 and only 22% successfully completed MATH 103 by fall 2016 ([Intro.9](#)).

English continued its success with the co-requisite classes in Fall 2017. According to UHCC data, 67% of students in classes one-below college-level or above completed their courses in one semester. Math too had a favorable success rate of 57% of students completing classes one-level below college-level or above in one semester ([Intro.10](#)).

### *Ho‘āla Hou*

*Ho‘āla Hou* (Renewing a Pathway to Student Success Through Culture-Based Learning) is a Title III funded program aimed at increasing access, enrollment, and successful completion of academic credentials of Native Hawaiian students.

*Illustration.Intro.5 Ho‘āla Hou*

The first goal is to establish an enrollment pathway to Honolulu CC for Native Hawaiian students and create a sense of place at the college for Native Hawaiians that is culturally significant and relevant. These are to be accomplished by developing and implementing a culturally appropriate outreach and recruitment plan, creating a team of peer mentors to outreach to the community and establish community-based partnerships, erecting a *halau* (community gathering space) and creating a digital cultural and historical bilingual (Hawaiian and English) tour of the campus and native plant species.

The second goal is to create a culture and place-based training program for faculty, staff, and administrators aimed at infusing Hawaiian culture, traditions and values in teaching, learning and service in order to support student success and completion ([Intro.11](#)).

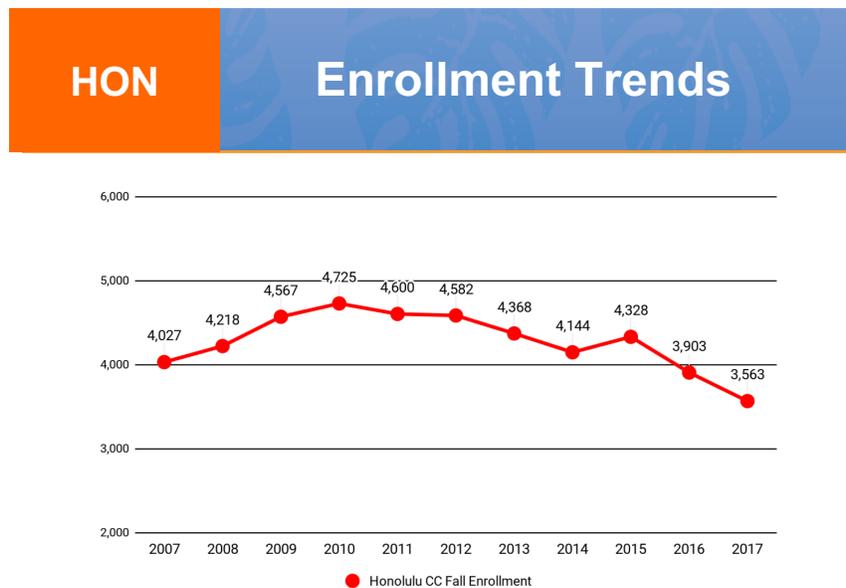

# Student Achievement Data and Institution-set Standards

## Enrollment

### *Longitudinal Trends*

Enrollment trends at Honolulu CC over the past decade mirror trends experienced at most two-year institutions showing modest declines. The factors impacting lower enrollments include increased employment rates on the islands, the decline in population, the high cost and commitment of postsecondary education, and increased competition from emerging and start up learning organizations for students.

The tables show student headcounts and year-over-year changes for each academic year (fall, spring, summer) for the last ten academic years. Enrollment numbers include unduplicated student counts at Honolulu CC at each of the census dates. Student characteristics (e.g., age, Pell status) were determined as of the time of initial during the first enrolled semester of the academic year. Distance education modes were determined over the course of the entire academic year. *(See QFE 2, Enhanced Support for Distance Education Students).*

1

Illustration-Intro 7 HonCC headcount

Enrollment tends to be correlated with the strength of the economy and employment. When the demand for workers rises, enrollment has a tendency to decline, as high school graduates and others opt to take a job rather than go to school. (See QFE 1, *Purposeful Engagement for Student Success*).

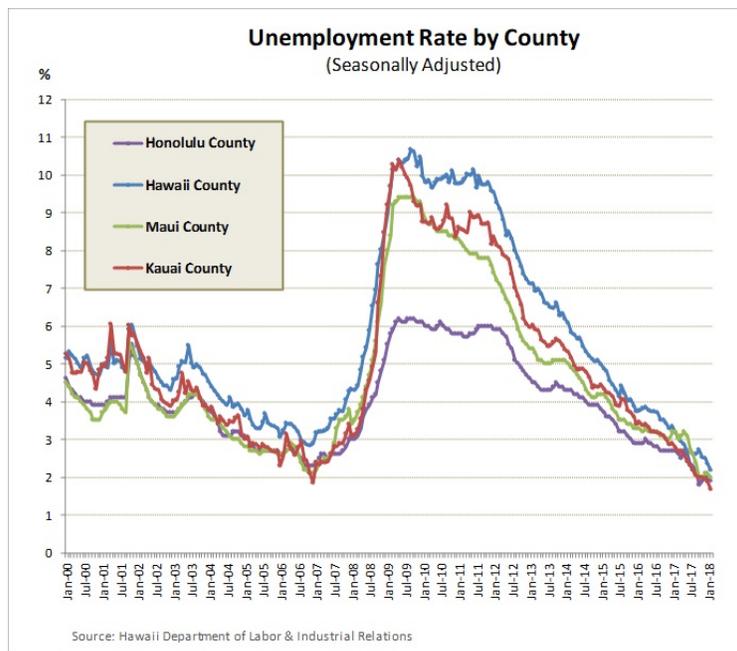

Illustration-Intro.8 Unemployment trends

In addition to the economic trends, the City and County of Honolulu population for high school graduates also has been in decline. The 18-24 age group particularly has decreased over the four years to 2016, as shown in the table. Future population

projections for the college going age groups show similar flat or declining trends for the Hawai'i.

**RESIDENT POPULATION BY  
SELECTED AGE GROUPS**

[As of July 1. Includes military personnel stationed or homeported in Hawaii and residents temporarily absent; excludes visitors present.]

Age group	City and County of Honolulu 2012	City and County of Honolulu 2016	% Change 2012-2016
Total persons	976,372	992,605	1.66

*Illustration-Intro.10 Headcount by gender*

*Disaggregation of Enrollment*

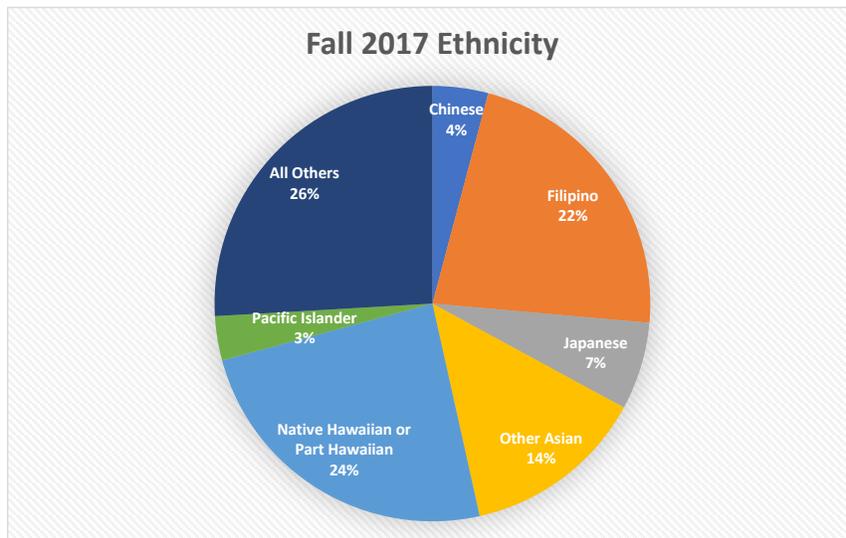

Overall student enrollment dropped 11% over the five academic years. Disaggregating enrollment trends by traditional ethnic and racial groupings shows higher than average

declines for students under 22 age group (-13%), females (-13%), Native Hawaiians (21%), Pacific Islanders (-23%), and Pell recipients (-30%).

Headcount by Ethnicity	Academic Year									
	2013		2014		2015		2016		2017	
	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY
All	6,086	-2.47%	5,940	-2.40%	5,782	-2.66%	5,931	2.58%	5,421	-8.60%
Native Hawaiian	1,589	-3.58%	1,499	-5.66%	1,394	-7.00%	1,450	4.02%	1,260	-13.10%
Filipino	1,181	-2.24%	1,175	-0.51%	1,142	-2.81%	1,138	-0.35%	1,111	-2.37%
Pacific Islander	212	6.53%	207	-2.36%	172	-16.91%	180	4.65%	164	-8.89%

*Illustration-Intro.11 Headcount by ethnicity*

As the ethnicity pie chart shows, a large portion of Honolulu CC’s student population is Native Hawaiian and Filipino. Enrollment of Native Hawaiian students fell substantially in AY 2017, reflecting the general enrollment trend. (See QFE 1, Purposeful Engagement for Student Success).

*Illustration-Intro.13 Pell recipients*

### *Enrollment in Distance Education*

Distance education showed large decreases across all modalities except completely online classes. Students who enrolled in at least one completely online class increased by 22% over the five academic years. This increase was possible because of the large drops (28% to 88%) in other distance education modalities and a 14% decrease in the number of students who enrolled in all face-to-face classes. (See QFE 1, *Purposeful Engagement for Student Success*).

Headcount by DE Mode	Academic Year									
	2013		2014		2015		2016		2017	
	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY

*Illustration-Intro.14 DE headcount*

### *Enrollment by Division*

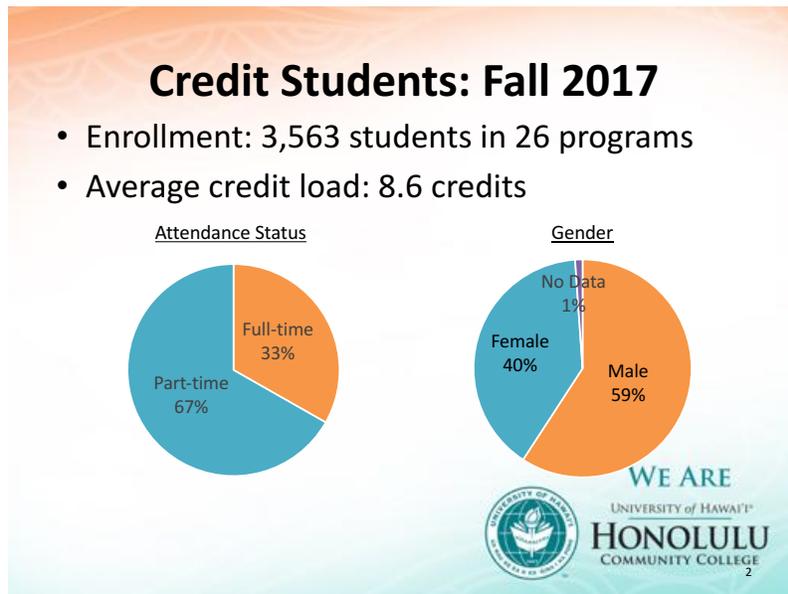

The College’s largest student enrollment is in Career and Technical Education (CTE) programs. Although the number of students in the CTE programs has declined over the past five years the declining is less relative to other students those seeking general and pre-professional education.

Headcount by Division	Academic Year									
	2013		2014		2015		2016		2017	
	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY	Headcount	Change from Previous AY
All	6,086	-2.47%	5,940	-2.40%	5,782	-2.66%	5,931	2.58%	5,421	-8.60%
Career & Tech Ed	3,057	0.00%	3,034	-0.75%	2,986	-1.58%	2,933	-1.77%	2,776	-5.35%
General & Pre-Prof Ed	1,161	-12.05%	1,139	-1.89%	1,073	-5.79%	1,071	-0.19%	976	-8.87%

*Illustration-Intro.15 Headcount by division*

Honolulu CC has 26 programs. The percentage of female students is 40% of the total enrollment which does not parallel trends at other colleges where female students exceed those of male counterparts. Although programs in trades tend to be dominated by male students, the College has a number of CTE programs that tend to attract female students such as Early Childhood Education, Fashion, and Cosmetology. (See QFE 1 – Purposeful Engagement for Student Success).

A majority of students are part-time. Many work because of the socioeconomic situation of the community the College serves. Average credit loads reveal that most students who attend Honolulu CC are part-time students.

*Illustration-Intro.16 Credit students*

Honolulu CC also has a robust apprenticeship program, with nearly as many students as in the credit program. The Apprenticeship Training program provides instruction to those on Oahu who are apprenticing in various construction and mechanical trades. Training also is offered to journey workers for upgrading skills and obtaining job-related certifications ([Intro.12](#)). The College recently provided a presentation to the Board of Regents on the apprenticeship program and other non-credit education activities ([Intro.13](#)).

**Apprenticeship Model**

- Enrollment
  - Fall 2017: 3,188 students  
430 classes  
220 instructors
  - Spring 2018: 2,813+ students  
350+ classes  
215+ instructors

WE ARE  
UNIVERSITY of HAWAII™  
**HONOLULU**  
COMMUNITY COLLEGE  
7

*Illustration-Intro.17 Apprenticeship students*

Students in state or federally approved apprenticeship programs have an opportunity to earn a Certificate of Achievement or an Associate in Applied Science (AAS) degree. Many students achieve this degree through an apprentice training program administered through a contract between the College and Pearl Harbor Naval Shipyard ([Intro.14](#)).

**Apprenticeship Model: Pearl Harbor**

- Model: Entrance in spring semester  
Length: 2 years in an Associate in Applied Science degree (AAS)
- Enrollment:
  - Fall 2017: 352 students
  - Spring 2018: 396 students
  - 83% male
- Graduation:
  - Completion Rate > 90%

WE ARE  
UNIVERSITY of HAWAII™  
**HONOLULU**  
COMMUNITY COLLEGE  
9

*Illustration-Intro.18 Pearl Harbor apprenticeship*

Honolulu CC also partners with high schools to introduce students to construction industry careers and to provide opportunities to explore and develop the technical, academic, and employability skills necessary to make informed choices on possible career opportunities within the construction and other industries ([Intro.15](#)).

**High School Outreach:  
Construction Academy, 2015-16**

Enrollment

- 1,251 students
- 88% males; 12% females

College Admission

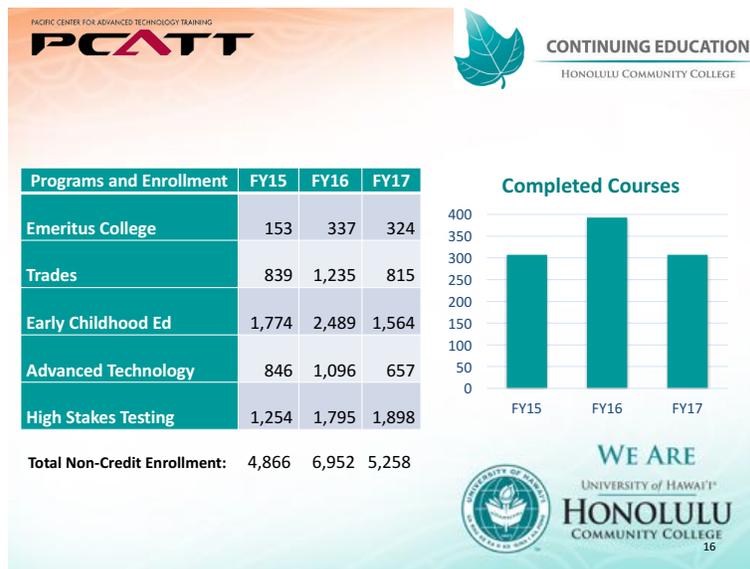

- Of 410 seniors, 58% were admitted to a UH campus; 36% admitted to Hon CC

WE ARE  
UNIVERSITY of HAWAII™  
**HONOLULU**  
COMMUNITY COLLEGE  
12

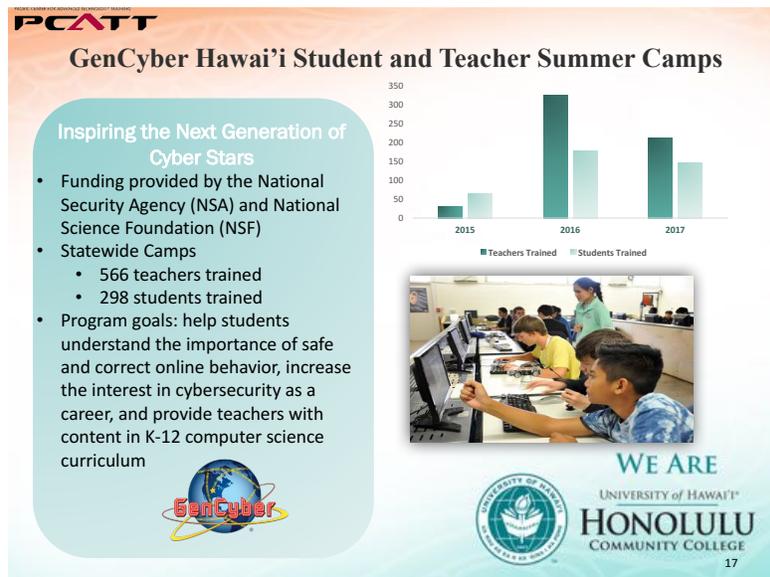

*Illustration-Intro.19 Construction Academy*

Continuing Education also is a strong program for the College. Non-credit enrollment exceeds the credit enrollment.

*Illustration-Intro.20 Continuing Education*

The campus’ s Pacific Center for Advanced Technology Training (PCATT) works with the Department of Labor, DevLeague, National Security Agency (NSA), National Science Foundation (NSF), and other to provide training to teachers and students. PCATT hosts a yearly Apple Institute and recently began working with Amazon Web Services to provide data center technician apprenticeship training ([Intro.16](#)).

*Illustration-Intro.21 PCATT summer camps*

### Incoming Student Educational Goals

As a comprehensive, open two-year institution, Honolulu CC has a multi-function mission. Students include those pursuing the first two years of a baccalaureate study with intent to transfer, others who are securing associate degrees in traditional and career and technical field, those out to improve technical job skills to meet current workforce demands on the islands, those who are taking courses to become college ready, and finally others who have goals of lifelong learning.

The following tables show immediate and highest educational goals for new, first-time students for the last four fall terms. Data are only shown for the students with recorded educational goals. This is a relatively new measure in the student database and only four falls of data are shown. Goal data were available for 92%, 96%, 95%, and 98% of the four falls respectively. In the previous fall less than 50% of the new, first-time students had recorded educational goals. All students were enrolled and home based at Honolulu CC at the census freeze date. Dually enrolled high school students (major=SPEA) were excluded. As the pathways initiative takes hold at the college and Hawaiian system, education goal tracking will become more robust. *(See QFE 1, Purposeful Engagement for Student Success).*

Educational Goals (All New, First-Time Students) (Denominators are the total number of students with recorded goals.)				
Immediate Educational Goals	Fall			
	2014	2015	2016	2017
	Percent	Percent	Percent	Percent
Earn a bachelor's degree (UH Maui College)	2.40%	2.01%	3.45%	2.03%
Earn a certificate	11.18%	11.17%	11.11%	14.23%
Earn an associate degree	68.85%	67.58%	68.20%	65.04%
Not sure (I am not sure any of the above statements apply to me)	5.75%	4.95%	5.94%	3.66%
Take courses to transfer to another college	11.02%	12.27%	9.77%	12.60%
Take course, but not toward a degree	0.80%	2.01%	1.53%	2.44%

*Illustration-Intro.22 Educational goals*

The most common immediate educational goal across all incoming students was to earn an associate degree (67%). The two highest educational goals of all incoming students were to earn a bachelor’s degree (40%) or earn an associate degree (37%).

Earning an associate degree was the most common immediate educational goal across all disaggregated groups except those with very small numbers (e.g., at least one

distance education course that was not online or off site or at least two distance education courses with different modes) and unclassified students. Unclassified students generally wanted to take courses to transfer to another college (39%) or take courses not toward a degree (27%). (See QFE 1, *Purposeful Engagement for Student Success*).

There also was a high degree of consistence across most groups in the highest educational goals. Earning a bachelor’s degree (40%) or earning an associate degree were the most common highest educational goals across all disaggregated groups except those with very small numbers (e.g., at least one distance education course that was not online or off site or at least two distance education courses with different modes) and unclassified students. In addition to earning a bachelor’s degree (31%), unclassified students also wanted to earn a graduate degree (22%). (See QFE 1, *Purposeful Engagement for Student Success*).

### Fall-to-Spring and Fall-to-Fall Reenrollment

Another data element of interest to the college is persistence as defined federally and in the Hawaiian accountability scheme. Sometimes referred to as retention, persistence measures this marker as a momentum, or tipping point, to the reaching of more terminal outcomes such as degree completion or transfer.

Over five fall terms, the percentage of students who reenrolled from fall to spring was approximately 72% and fall-to-fall was approximately 55%. The reenrollment rates for Pacific Islander students were lower.

The goal of the University of Hawai‘i Community Colleges is to achieve a 75% persistence rate for fall-to spring and a 65% for fall-to-fall. The College has implemented a plan to address the reenrollment rates. (See QFE-1 *Purposeful Engagement Initiative*)

Fall to Spring Reenrollment by Age	Fall Cohort				
	2013	2014	2015	2016	2017
	Percent Fall to Spring Reenrollment				
All	72.71%	73.89%	71.88%	73.18%	69.34%
<22	73.77%	76.20%	74.65%	74.27%	72.76%
22-24	73.06%	69.22%	70.61%	73.29%	67.95%
25-44	71.83%	73.71%	69.57%	72.26%	65.47%
>44	67.71%	70.37%	69.77%	70.11%	71.95%

*Illustration-Intro.23 Fall-to-spring retention*

Fall to Fall Reenrollment by Age	Fall Cohort				
	2012	2013	2014	2015	2016
	Percent Fall to Fall Reenrollment				
All	55.57%	53.46%	56.16%	56.26%	55.55%
<22	55.98%	52.98%	57.09%	56.39%	56.57%
22-24	50.94%	56.39%	53.13%	54.32%	55.59%
25-44	57.08%	52.58%	57.46%	57.17%	55.06%
>44	56.97%	54.07%	50.00%	55.48%	50.66%

*Illustration-Intro.24 Fall-to-fall retention*

The tables show fall-to-spring and fall-to-fall reenrollment rates for students enrolled and home based at Honolulu Community College for the last five fall cohorts. No dually enrolled (major=SPEA) students were included in the initial cohort. Reenrollment was counted if a student was enrolled and home based at Honolulu CC at either the spring census date (for fall-to-spring reenrollment) or the second fall census date (for fall-to-fall reenrollment.) Students who graduated with an associate degree or a certificate of Achievement and did not return after the initial fall semester were removed from the cohort. Students who transferred to 4-yr institutions or who were deceased also were removed from the cohort. Student characteristic (e.g., age, Pell status) were determined during the initial fall semester.

Fall to Spring Reenrollment by Gender	Fall Cohort				
	2013	2014	2015	2016	2017
	Percent Fall to Spring Reenrollment				
All	72.71%	73.89%	71.88%	73.18%	69.34%
Female	71.06%	72.41%	69.75%	70.64%	69.07%
Male	73.34%	74.74%	73.10%	74.75%	69.72%
No Data	82.98%	70.00%	70.00%	61.54%	52.00%

*Illustration-Intro.25 Fall-to-spring reenrollment by gender*

Fall to Fall Reenrollment by Gender	Fall Cohort				
	2012	2013	2014	2015	2016
	Percent Fall to Fall Reenrollment				
All	55.57%	53.46%	56.16%	56.26%	55.55%
Female	51.12%	51.63%	53.61%	49.68%	53.57%
Male	57.81%	54.26%	57.46%	59.87%	56.70%
No Data	68.29%	58.33%	58.62%	57.14%	50.00%

*Illustration-Intro.26 Fall-to-fall reenrollment by gender*

The fall-to-spring reenrollment rates for Pacific Islanders averaged approximately 64%, and fall-to-fall rates averaged approximately 43%. *(See QFE 1, Purposeful Engagement for Student Success).*

There also was a discrepancy between Pell recipients and non-recipients. Non-recipients of Pell grants showed approximately 13 percentage points lower fall-to-spring reenrollment rates than Pell recipients. There also was a discrepancy between students who enrolled in at least one completely online class and students who enrolled in all face-to-face classes. *(See QFE 1, Purposeful Engagement for Student Success).*

The online students were approximately 9 percentage points lower in fall-to-spring reenrollment and 7 percentage points lower in fall-to-fall reenrollment rates. *(See Quality Focus Essay 2, Enhance Support for Distance Education Students).* This is an area of keen interest at the college given the action project in the institution's quality focus essay. Significant enrollment differences exist between all students and students with general and pre-professional majors and unclassified students. *(See QFE 2, Enhanced Support for Distance Education Students).*

General and pre-professional students had fall-to-spring reenrollment rates approximately 8 percentage points lower than all students and unclassified students were approximately 20 percentage points lower than all students. Fall-to-fall reenrollment also showed this difference. General and pre-professional students were approximately 10 percentage points lower and unclassified students were approximately 18 percentage points lower than all students.

Fall to Spring Reenrollment by Ethnicity	Fall Cohort				
	2013	2014	2015	2016	2017
	Percent Fall to Spring Reenrollment				
All	72.71%	73.89%	71.88%	73.18%	69.34%
Native Hawaiian	72.70%	73.87%	71.95%	70.47%	70.27%
Filipino	75.60%	78.58%	76.08%	80.78%	73.37%
Pacific Islander	65.73%	71.05%	62.50%	65.66%	56.73%

*Illustration-Intro.27 Fall-to-spring reenrollment by ethnicity*

Fall to Fall Reenrollment by Ethnicity	Fall Cohort				
	2012	2013	2014	2015	2016
	Percent Fall to Fall Reenrollment				
All	55.57%	53.46%	56.16%	56.26%	55.55%

## **Institution-Set Standards**

Honolulu CC has established standards of achievement success with respect to student success, particularly in relation to progress on the College's mission (ER 11, Standard I.A.2 and I.B.3).<sup>1</sup> As part of the larger accountability scheme of the University of Hawai'i Community College System, the college has set expectations for both course and program completion, degree and certificate completion, licensing examination passage rates, job placement rates, and transfer rates to baccalaureate institutions. Data on the standards are gathered through the UHCC office and the college and results are analyzed and interpreted to meet college and system wide missions. Importantly, innovations and improvements designed to increase student performance, academic quality and, and institutional effectiveness (ER 11 and Standard I.B.3) are discussed and implemented in cooperation with the UHCC. While centralization of the standards is made by the UHCC office to create systematicity and uniformity in data collection, access and use, colleges provide input and feedback as to the reasonableness of the standards and the potential hurdles to meeting the standards that are unique to each institution. (*See QFE 1, Purposeful Engagement for Student Success*).

In particular, Honolulu CC has established institution-set standards for student achievement that are appropriate to its mission and assesses how well it is achieving them for continuous improvement. These standards are outlined in a University of Hawai'i Community Colleges (UHCC) policy (I.B.24), which includes both planned targets as well as aspirational goals. (*See section I.B.33; ER 11*). The UHCC system has gone to great lengths to unify the member colleges and simplify processes by centralizing the data collection efforts to assure a sufficient level of analysis for all of the colleges. The goal also was to use the institution set standards in tandem with Hawai'i's performance-based funding model so as not to overburden the colleges with multiple measures of analysis and to reduce confusion of metrics measuring progress using alternative definitions.

In this way, many of the set standards are the basis for performance funding from UHCC to the College. For FY 2016, Honolulu CC exceeded all its performance initiatives defined by UHCC (I.B.26) and met nearly all the performance initiatives defined by the University of Hawai'i (I.B.45). Through its initiatives and through efforts by committees and departments, the efforts of the College has focused on student success and student achievement.

---

*Illustration-Intro.33 Performance funding*

*Course Completion<sup>2</sup>*

Course completion is a within-term measure overall satisfactory success in the class achievement and for transfer of credit. Honolulu CC exceeded its target for course completion of 70%, including its aspirational goal of 75%. Course completion is defined by the percentage of students receiving a grade of C or better in a course. The number of students in the course is the number at the end of the official add/drop period.

Over five fall terms course success rates were approximately 75% for all students. As anticipated, there were differences in successful attainment at the course level for traditionally underserved groups and those impacted by poverty and lack of educational opportunity. (See QFE 1, Purposeful Engagement for Student Success).

Course success rates were consistently lower for Pacific Islanders (58%). The College included focus on these students in its strategic plan (I.A.3). Course success rates also were consistently lower for students who enrolled in at least one completely online course (67%) as compared to all students. Recognizing this, the College implemented a plan to address academic and student service support for online students. (See QFE 2, Enhanced Support for Distance Education Students.)

Course success rates also were consistently lower for general and pre-professional education majors (67%) and unclassified students (68%) as compared to all students. The college expects that the increased expectation of educational plans and the review of progress by campus professionals will close these achievement gaps.

<sup>2</sup> See, Checklist for Compliance, Student Achievement; ACCJC White Paper on Standard I.B.3.

Course Success by Age	Fall				
	2013	2014	2015	2016	2017
	Percent Success				
All	73.29%	73.65%	75.25%	75.85%	75.51%
<22	68.57%	70.86%	69.87%	68.52%	70.63%
22-24	73.88%	72.52%	73.78%	77.32%	74.54%
25-44	80.37%	78.48%	82.20%	84.68%	81.94%
>44	75.10%	74.84%	78.89%	76.76%	80.24%

*Illustration-Intro.34 Course success by age group*

Although female students meet the baseline goal, the course success rate is below the aspirational goal. Given the lower rate of capture of female students as reported above, this area of baseline and aspirational goal difference offers to the college an opportunity to focus on female students in target efforts for improved equity in outcomes going forward.

Course Success by Gender	Fall				
	2013	2014	2015	2016	2017
	Percent Success

Male	73.42%	74.68%	76.22%	75.89%	76.86%
No Data	76.51%	72.63%	84.96%	75.51%	74.29%

*Illustration-Intro.35 Course success by gender*

The success rates are for all courses taken by students enrolled and home based at Honolulu CC for the last five fall terms. Dually enrolled high school students (major=SPEA) were excluded. Audited courses and courses with no grades available (Record Delayed or null grades) also were excluded.

Course success for online classes was nearly that of face-to-face classes but the College has implemented a plan to improve it more with more proactive student service support. *(See QFE 2, Enhanced Support for Distance Education Students)*

Course Success by DE Mode	Fall				
	2013	2014	2015	2016	2017
	Percent Success				
All	73.29%	73.65%	75.25%	75.85%	75.51%

At Least Two DE Classes with Different Modes	58.02%	30.00%	57.58%	65.38%	.
All Classes Face-to-Face	74.76%	75.25%	77.44%	77.83%	77.58%

*Illustration-Intro.36 Course success by De mode*

### *Degrees and Certificates Awarded*

Honolulu CC exceeded its goal and aspirational goal for degree and certificates awarded. Success in this area has not been easy for the College, which lagged far behind in 2013, as the table indicates. This measure will be of keen interest for the college given the likelihood of continued flattening or decline in enrollment counts. Since the institutional marker are counts and not rates, the population declines will cause the college to reconsider the viability and reasonableness of the performance based targets.

Degrees and CAs by Age	Fiscal Year				
	2013	2014	2015	2016	2017
	Number of Awards				
All	551	683	725	886	900
<22	141	127	168	243	186
22-24	113	150	163	193	195
25-44	252	369	338	410	471
>44	45	37	56	40	48

*Illustration-Intro.37 Degrees and certificates by age group*

Through efforts by counselors, the College moved the number of awards to 900 in 2017 from 551 in 2013, a dramatic increase. Awards include the number of Associate Degrees and Certificates of Achievements during the fiscal year. The baseline was established as the three-year average for fiscal years 2013-2015 for the awards data. The aspiration goal was 5% growth per year from the baseline.

The under 22 age group was underrepresented in the number of awards. That age group is approximately 42% of the college population, but they only received 23% of the awards. Similarly, females were underrepresented in the number of awards. They are approximately 43% of the college population, but they only received 32% of the awards.

The number of awards for female students was less than one-third of the total granted.

*Illustration-Intro.39 Degrees and certificates by program*

### *Native Hawaiian Degrees and Certificates Awarded*

Honolulu CC achieved its goal, but the efforts have not been easy. A number of initiatives have been focused on this population, including the strategic plan (I.A.3), the AA Degree in Hawaiian Studies (I.A.1 [p. 81]), the *Ho’ala Hou* (Renewing a Pathway to Student Success Through Culture-Based Learning), the Po’i Nā Nalu (II.B.36) program, among others.

The awards include the number of Associate Degrees and Certificates of Achievement given during the fiscal year to students of Native Hawaiian Ancestry.

Degrees and CAs by Ethnicity	Fiscal Year				
	2013	2014	2015	2016	2017
	Number of Awards				
All	551	683	725	886	900
Native Hawaiian	136	189	167	238	225
Filipino	115	131	170	204	166
Pacific Islander	13	8	17	14	19

*Illustration-Intro.40 Degrees and certificates by ethnicity*

Pacific Islander students are only around 3% of the college population, but they receive less than 2% of the number of awards. The strategic plan also includes focus on this group of students (I.A.3). This completion difference represents the an area of opportunity for the college to apply equity techniques such as the equity index and disproportionate impact analysis to help close the achievement gaps that exist for Pacific Islander students.

Degrees and CAs by DE Mode	Fiscal Year				
	2013	2014	2015	2016	2017
	Number of Awards				
All	551	683	725	886	900

At Least One Off Site Class	87	134	63	10	3
At Least One DE Class (not online or off site)	25	32	19	14	18
At Least Two DE Classes with Different Modes	56	79	61	39	59
All Classes Face-to-Face	263	274	371	499	540

*Illustration-Intro.41 Degrees and certificates by DE mode*

### *Pell Recipient Degrees and Certificates Awarded*

Honolulu CC achieved this goal, but success from year to year has been uneven. Wanting to change the trend, the College has initiated a plan to help this population of students by being proactive in the support services the institution provides. (*See QFE 1 – Purposeful Engagement Initiative*)

Degrees and CAs by Pell	Fiscal Year				
	2013	2014	2015	2016	2017
	Number of Awards				
All	551	683	725	886	900
At Least One Semester of Pell	206	227	280	368	312
No Pell	345	456	445	518	588

*Illustration-Intro.42 Degrees and certificates by Pell recipients*

Non-Pell recipients and students who enroll in all face-to-face classes also are underrepresented in the number of awards they received. Non-Pell recipients are approximately 80% of the college population and face-to-face students are approximately 67% of the college population. They receive 63% and 51% of the number of awards respectively.

*Transfer to Baccalaureate Institutions*

Transfer to a four-year institution is a keep component of the college mission. The number of students transferring to baccalaureate institutions during the 2017 academic year increased dramatically to 237 from two years prior of 128. The increases were in all age groups. The under 22 age group averaged approximately 42% of the college population, but that group only produced approximately 36% of the four-year transfers.

Number of 4-Yr Transfers by Age	Academic Year of Transfer				
	2013	2014	2015	2016	2017

Male	132	128	79	121	114
No Data	0	0	0	1	1

*Illustration-Intro.43 Transfers by gender*

Transfer information was obtained from the National Student Clearinghouse, which uses student identifiers to locate students at four-year schools. A problem arises when students transfer and do not apply for financial aid or who indicate that they do not want to participate in data sharing. The result then is an underreporting of transfer counts. While this phenomenon is difficult to predict and assess, the college takes the data provided, extrapolates the impact of the failure to capture student data, and makes the best decisions possible given the limitations of the data techniques. Additional measures are being considered such as tracking transcript requests, and other services provided to transfer students. Transfers to four-year institutions occurred between August 1<sup>st</sup> and July 31<sup>st</sup> of the indicated academic year, and were direct from Honolulu CC without any intervening higher education attendance. All students were enrolled and home based at Honolulu CC at the census freeze date during any semester previous to the four-year transfer. Dually enrolled high school students (major=SPEA) at the College were excluded from the analysis. The indicated student characteristics (e.g., age, Pell status) were as of the last semester enrolled and home based at Honolulu CC.

UH System data for students transferring to one of the UH four-year institutions also showed an increase. The baseline for the College’s goal is the three-year average of academic years 2012-2015, with an aspirational 5% growth per year from the baseline.

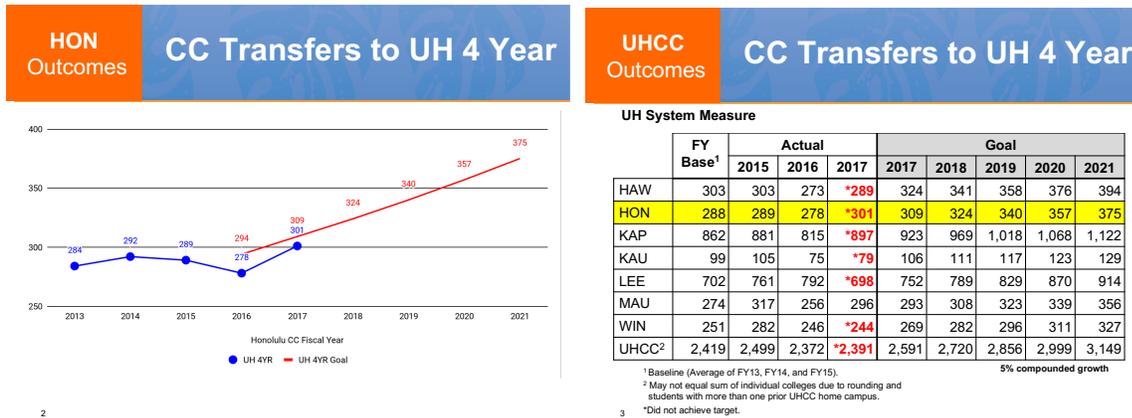

Illustration-Intro.44 Transfers to UH

Native Hawaiians and Filipinos averaged 24% and 20% of the college population, respectively, but they only produced approximately 18% and 17% of the four-year transfers, respectively. (See QFE 1, Purposeful Engagement for Student Success).

Number of 4-Yr Transfers by Ethnicity	Academic Year of Transfer				
	2013	2014	2015	2016	2017

All Classes Face-to-Face	169	153	67	129	132

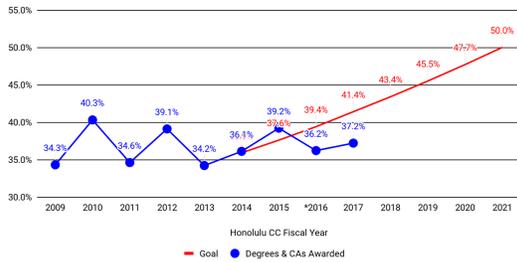

*Illustration-Intro.47 Transfers by DE mode*

Career and technical education students were approximately 51% of the college population but produced only 39% of the four-year transfers.

*Integrated Postsecondary Education Data System (IPEDS) Student Success Rate*

Nationally tracked data from the United States Department of Education (USDOE) is also reviewed by the college. However, traditional tracking by the USDOE has historically focused on first-time, full-time students, which is a relatively small percentage of the students who attend Honolulu CC. Nevertheless, the data are reviewed given the strong mission function of transfer to baccalaureate institutions. The IPEDS success rate increased but the rate was below the goal. Therefore, at Honolulu CC, ~~The~~ IPEDS data does report first-time, full-time students, degree-seeking students who are graduating or transferring to a baccalaureate institution within three years (150% of the time of entry). The rate is based on the Fall 2012 IPEDS cohort and the aspirational goal is to reach a success rate of 50% by FY 2021.

Illustration-Intro.48 IPEDs success rate

*Licensure and Certification Examination Success Rate*

There is a strong federal interest in tracking employment and professional licensure rates for community college students. Current measures of assessing license pass rates are still elementary. Better systems of measuring passage rates as well as wage gain are currently underway with the support of the system office. Currently, pass rate for students in a Career and Technical Education (CTE) program based on the number of students taking the examination. Examinations are conducted outside of the institution so licensure and certification data is not available for most programs. Cosmetology reported a 92% success rate for the state exam in 2016, up 61% in 2015. The aspiration goal for the College is 95%.

*Job Placement Rate*

As with license pass rates, the collection of job placement rates with confidence is still a challenge for all two-year institutions. Many students acquire skills and ‘job out’ of college with little ability to discern the impact the role that matriculation to college played in the employment. Additionally, many students secure employment in fields other than their identified educational goals for a variety of reasons other than via college curriculum. Students without social security numbers secure jobs but remain outside of the tracking systems given the undocumented status of these students. As a result, the job placement rate is reported for each career and technical education program comes from a Perkins annual report. The Perkins program data includes all graduates and concentrators (students who have completed a subset of program courses) who have left the program. The Perkins target (and institutional set standard) is based on a negotiated level of placement within the state plan for Career and

Technical Education that includes an expectation of continuous improvement. Programs with fewer than 10 students exiting the program are not reported.

Program	Institution set standard (%)	2016 Job Placement Rate (%)	2015 Job Placement Rate (%)	2014 Job Placement Rate (%)
Administration of Justice	63.87	63.04	54.55	64.58

### **Strategic Plan Goal A: Student Success**

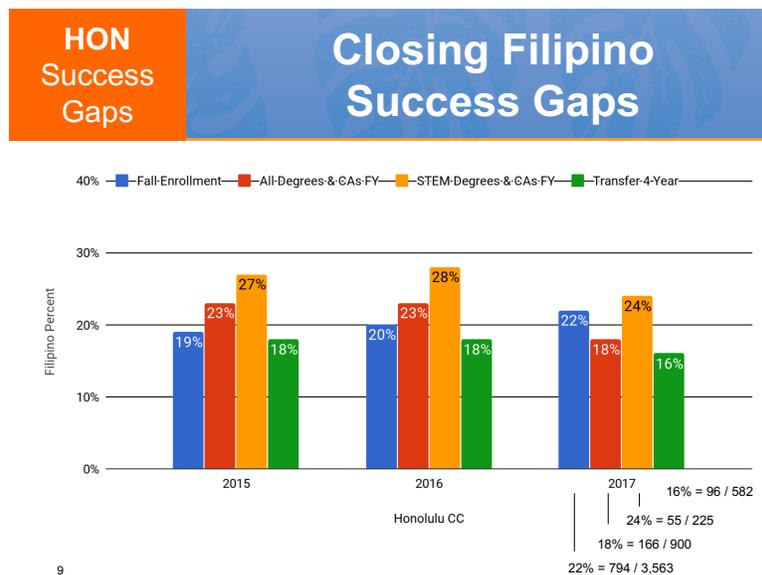

Related to the accreditation and state reporting of measures of success and achievement, the college has identified measures for progress on the strategic plan. The plain goal in the future is to identify measures that can measure progress on the institutional mission through the strategic plan that also satisfy federal and state indicators.

## Organization of the Self-Evaluation Process

Honolulu CC’s accreditation self-evaluation process has been collaborative with the full campus involved. The evaluation was an opportunity to look closely and assess the organization, procedures, practices, methodologies, and philosophies to better understand the impact of the institution on student success and student achievement. This thoughtful reflection was widespread through the campus with discussions focusing on many questions: Why do we do this? Is this method the best way? Could we implement a more effective way? How does our actions impact student learning and student success?

### Accreditation Self-Evaluation Timeline

Fall 2016	<ul style="list-style-type: none"> <li>• UHCC-wide accreditation training session is offered in September - many Honolulu CC participants attend</li> <li>• Accreditation committee forms from the Accreditation Task Force and asks for volunteers to participate on teams</li> <li>• Committee decides on leads to oversee Standard I, Standard II, Standard III, and Standard IV</li> <li>• Chairs are decided for each of the 10 standard teams as well as lead writers</li> <li>• Standard teams meet to organize responsibilities</li> </ul>
Spring 2017	<ul style="list-style-type: none"> <li>• Steering committee begins meeting once a month</li> <li>• Standard teams begin gathering evidence</li> <li>• First draft of each standard team report is due on April 10</li> </ul>
Summer 2017	<ul style="list-style-type: none"> <li>• Teams continue to gather evidence</li> <li>• New ALO appointed in late May</li> </ul>
Fall 2017	<ul style="list-style-type: none"> <li>• Accreditation town hall meeting is held in August for the campus</li> <li>• Standard teams meet</li> <li>• Steering Committee begins meeting every other week</li> <li>• Survey is conducted for faculty and staff, results disseminated to campus on Sep 26</li> <li>• Survey is conducted for students, results disseminated to campus on Oct 2</li> <li>• Second draft of each standard team report is due on Oct 2</li> <li>• ALO provides comments on the drafts to each standard team</li> <li>• Accreditation webpage moved from the Intranet to College’s main website on Nov 9</li> <li>• Final draft of each standard team report is due on Nov 13</li> <li>• Draft of reports are posted for the campus to view on Dec 19</li> </ul>
Spring 2018	<ul style="list-style-type: none"> <li>• Accreditation town hall meeting is held in early January for campus</li> <li>• Test Your Accreditation IQ quiz begins on Feb 15 and continues weekly to inform the campus</li> <li>• First full edit of drafts is posted for the campus on March 13</li> <li>• Teams continue to prepare and consolidate evidence</li> <li>• Campus polled for ideas on QFE on March 19</li> <li>• Town hall meetings held on each Friday in April for Standards I, II, III, IV and QFE</li> <li>• Steering committee decides on QFEs and drafts provide to campus on</li> </ul>

	<p>May 1</p> <ul style="list-style-type: none"> <li>Final report is provided to UHCC on May 11</li> <li>Chancellor presents overview of self-study and process to Board of Regents on May 18</li> <li>Report is approved by the Board of Regents on _____</li> </ul>
Summer 2018	<ul style="list-style-type: none"> <li>Final edits of the report, including final updates to evidence on June 1</li> <li>Report and evidence sent to design center for preparation</li> <li>Self-Study and Quality Focus Essays submitted to ACCJC in July</li> </ul>
Fall 2018	<ul style="list-style-type: none"> <li>Campus prepares for accreditation visit</li> <li>Accreditation visit on week of October 15</li> </ul>

#### *Standard Teams*

##### Standard I.A

David Panisnick	Chair	Faculty, Religion/Philosophy
Jeannie Shaw		Pearl Harbor Naval Shipyard Coordinator
Fumiko Takasugi		Interim Dean Tech I

##### Standard I.B

Keala Chock	Chair	Dean Tech II
John DeLay		Faculty, Geography
Jennifer Higa-King		Interim Dean UC
Pat Patterson		Faculty, History
Bed Paudyal		Faculty, English

### Standard I.C

Jerry Saviano	Chair	Faculty, English
Jess Aki		Faculty, Cosmetology
Shanon Miho		Counselor
Josephine Stenberg		Registrar

### Standard II.A

Karen Lee	Chair	Vice Chancellor of Academic Affairs
Jeff Stearns		Faculty, English, Division Chair
Ann Abeshima		Faculty, Early Childhood Education
Tiani Akeo-Basques		Faculty, Hawaiian Programs
Diane Caulfield		Faculty, Cooperative Education
Clarise Ikeno		Faculty, Mathematics
Sterling Foster		Faculty, Mathematics
Shidong Kan		Faculty, Physics
Chiara Logli		Assessment Specialist
Robert Silva		Faculty, Automotive Mechanics Technology
Shioko Yonezawa		Faculty, Japanese
Evelyn Greene		Faculty, Aeronautics Maintenance Technology
Bert Shimabukuro		Faculty, Automotive Technology, Division Chair

### Standard II.B

Jolene Suda	Chair	Director TRIO
April Ching		Faculty, English
Ina Miller-Cabasug		Retention Counselor
Sarah Myhre		Librarian
Kenneth Quilantang		Faculty, English
Wayne Sunahara		Dean Academic Support

### Standard II.C

Erica Balbag-Gerard	Chair	Counselor
Hillary Brown		Career & Employment Counseling
Kalani Flores		Program Manager Academic Support
Kimbertly Gallant		Counselor Mental Health
Kalei Lum-Ho		Program Manager, Hawaiian Programs
Lara Sugimoto		Dean Student Services
Sharleen Nakamoto Levine		Faculty, American Studies

### Standard III.A

Monique Tingkang	Chair	Human Resource Manager
Derek Inafuku		Vice Chancellor Administrative Services
Irene Mesina		Head Librarian
Renette Sonomura		Secretary
Cyndi Uyehara		Faculty, Early Childhood Education
Eric Shaffer		Faculty, English

### Standard III.B

Steve Auerbach	Chair	Director PCATT
Stefanie Sasaki		Librarian
Cassandra Kam		Disability Specialist
James Niino		Apprenticeship Coordinator
Guy Shibayama		Apprenticeship
Rheta Kuwahara-Fujita		Faculty, Early Childhood Education
David Tanaka		Auxiliary and Facilities Services Manager

### Standard III.C

Mike Meyer	Chair	Information Technology Manager
Ross Egloria		Education Technology
Karadeen Kam-Kalani		Faculty, Speech
Stacy Rogers		Faculty, Fire and Environmental Emergency Response
Wayne Sunahara		Dean Academic Support
Kristi Teruya		Retention Counselor

### Standard III.D

Derek Inafuku	Chair	Vice Chancellor for Academic Services
Jeff Stearns		Faculty, English, Division Chair Language Arts
Lara Kong		Secretary
Beryl Morimoto		PCATT Training
Guy Fo		Faculty, Architectural, Engineering, CAD Technologies
Myrna Patterson		Fiscal Manager

### Standard IV.A & IV.B

Erika Lacro	Chair	Chancellor
Cynthia Smith	Chair	Faculty, History
Amy Akana		Financial Aid Specialist
Silvan Chung		Career and Employment Center
Dean Crowell		Faculty, Carpentry
Alapaki Luke		Faculty, Hawaiian Programs
Conred Maddox		Faculty, English
Janina Martin		Faculty, Early Childhood Education

## University of Hawai‘i Community Colleges and Honolulu CC Functional Map

Accreditation Topic	UH Community College System/UH System	College
1.A Mission	The UH mission is adopted by the Board of Regents and reflected in UH policy. All colleges are expected to conform their mission statements to the UH mission.	Individual college missions are derived from the UH system mission and approved by the Board of Regents. Colleges are responsible for disseminating the mission statement and ensuring that college planning and resource allocation decisions reflect the mission statement.
1.B Academic Quality	UH Community Colleges establish system-wide institution set standards as well as system metrics and goals to achieve student success. System student success metrics are used in planning and resource allocation at the UHCC system level.	Colleges manage the process of establishing course and program based student learning outcomes and assessment and are responsible for using the assessment information to improve student learning.
1.B Institutional Effectiveness	Both the UH System and UHCC system provide data analytics to measure student success, including differentiating the outcomes by targeted student populations. The UHCC system also provides data to the colleges in support of program review and accreditation compliance.	Colleges use data analytics provided by the UH System and UHCC system, along with their own analysis of assessment and achievement results, to improve student success. Data pertinent to student achievement are disaggregated to allow analysis of sub-populations.
1.C Institutional Integrity	UH System and UHCC system publish information for prospective students, including cost of attendance. Some policies regarding institutional integrity exist in University system policies or system-wide collective bargaining agreements.	Colleges are primarily responsible for communicating accurate information, including accreditation information, to students, prospective students, and the general public.
2.A Instructional Programs	Policies relating to degrees and certificates are established at the UHCC system level. Degree programs and Certificates of Achievement require Board of Regents approval after review by the college, the UHCC system, and the UH system. Internal UH articulation agreements, general education core agreements, and transfer policies are established at the UH system and UHCC system level.	Colleges are responsible, through their internal curriculum processes, for approving all courses and programs, including course and program SLOs, and ensuring that both programs and courses meet commonly understood higher education standards. Some methods of assessment or evaluation of student performance may be covered in curriculum review.
2.B Library and Learning Support Services	UH System provides a common library services software and shared services agreements to all ten UH campuses. Some learning support services such as course management software and on-line tutoring, are provided by the UH and/or UHCC system to all students.	Colleges establish the on-campus library and learning support services, assess their effectiveness, and improve services as appropriate.

Accreditation Topic	UH Community College System/UH System	College
2.C Student Support Services	UHCC system provides shared services for back office financial aid and coordinates other delivery of student support services.	Colleges are responsible for on-campus student support services, including establishing service level outcomes, assessment, and analysis of the services for different sub-populations. All co-curricular services are based at the colleges. Some UHCCs have intramural athletic programs.
3.A Human Resources	HR policies and classifications are determined by UH and UHCC system and applicable collective bargaining agreements. UHCC System facilitates the establishment of faculty academic qualifications for both regular and adjunct faculty. UH and UHCC system act as appeal levels on HR related matters. System and colleges share professional development responsibilities.	Colleges implement the applicable HR policies and CB contracts. Most hiring and other HR decisions are based on the campus. Selected higher level appointments and classifications require system approval.
3.B Physical Resources	Development of long-range physical plans and implementation of capital improvement projects is a shared responsibility of UH System, UHCC System and the colleges.	Colleges take the lead in creating and maintaining their own long-range development plans, and provide input into plans and priorities for capital projects. Colleges are responsible for regular maintenance of the physical plant at the college.
3.C Technology Resources	Technology resources including network infrastructure and enterprise software systems are managed by UH System. UH System and UHCC System plan and coordinate system wide on-line learning support and program delivery.	Colleges are responsible for on-campus networks, technology resources, and technology support. College are responsible for training faculty in the use of online delivery and management.
3.D Financial Resource Planning	UH System and Board of Regents set reserve policies, approve the annual operating budgets, and approve the UH request for new operating funds submitted to the State legislature. The development of the budget and budget requests are based on a policy paper derived from the strategic plan and approved by the Board of Regents. The UHCC system is appropriated funds by the State legislature and allocates those funds to the colleges. The UHCC system does not receive funds on an FTE or other formula basis from the Legislature.	Colleges are involved in the system budget planning, including adhering to all reserve requirements established by the Board. Colleges are responsible for internal allocation of funds based on the allocations and revenue generated by the colleges.
3.D Financial Resource Stability	University fiscal systems are managed by UH System. Regular audits are conducted of the UH system, including separate schedules for the UHCC system. The UH internal auditor conducts several audits per year focusing on internal controls and management processes. UH System centrally manages all extramural funds.	Colleges implement fiscal systems in accord with University fiscal policies. When audits identify weaknesses or needed improvements, colleges respond with improvement plans that are incorporated into the audit reports.

Accreditation Topic	UH Community College System/UH System	College
3.D Financial Resource Liabilities	Fringe benefits, including post-retirement pensions and other post-retirement benefits are not managed or funded by the University. These expenses and liabilities are funded and managed by the State of Hawai'i. UH System manages all UH debt obligations.	Colleges monitor loan default rates and implement action plans as appropriate.
3.D Financial Resource Contractual Agreements	UH System establishes and manages all contracts in accordance with State procurement laws.	Colleges adhere to UH policies and practices in the procurement of all contracts for goods, services, and professional services.
4.A Decision-making Roles and Responsibilities	Board of Regents policy establishes a commitment to shared governance. UH System and UHCC System confer regularly with college governance groups. Formal consultation with collective bargaining units is governed by State statute.	Colleges implement shared governance policies and processes for internal college decision-making.
4.B Chief Executive Officer	UH System and UHCC System delegate to the college CEO authority for college operations within the policy limits of the UH System.	College CEOs are responsible for all college actions, subject to UH policies and delegation of authority as reflected in Board of Regents policy, UH executive policy, and UHCC system policies.
4.C Governing Board	<p>The Board of Regents is established by statute. Members are selected by the Governor with the consent of the Senate from a list recommended by a review committee. Board policies are regularly reviewed and posted. Board by-laws govern Board and Board member behavior. All Board actions are subject to State open meeting and public information laws and regularly published.</p> <p>The VP for UHCC acts as the liaison to the Board of Regents for all CC matters, including accreditation.</p>	Colleges submit action items to the Board of Regents through the VP for UHCC and the UH System.
4.D Multi-College Districts or Systems	<p>The Board of Regents appoints the UH System president who is responsible for the entire 10-campus system of higher education in Hawai'i. The UH President appoints the VP for Community Colleges who is responsible for the 7-campus community college system. The VP appoints and supervises the individual community college Chancellors.</p> <p>UH System is responsible for UH executive policies, UH system planning and coordination, and for selected system wide support services such as financial services, facilities planning, UHCC system is responsible for CC wide policies, CC budget and resource allocation, and CC system planning and coordination, and selected system services.</p>	Colleges operate within the policy and planning framework established by the UH System and UHCC System.

<b>Standard I: Mission, Academic Quality and Institutional Effectiveness, and Integrity</b>				
Standard	College	UHCC	UH Sys	Comments
<b>A. Mission</b>				
A.1 The mission describes the institution’s broad educational purposes, its intended student population, the types of degrees And other credentials it offers, and its commitment to student learning and student achievement. (ER 6)	SH	SH	SH	The college is responsible for developing and obtaining approval for the college mission. UHCC and UH System are responsible for developing and obtaining approval for the UH mission.  The college mission statements are expected to align with the UH System mission
A.2 The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.	P	S	S	Primary responsibility for assesses the effectiveness of the college in meeting the mission rests with the college. UHCC and UH System provide data, analytics, and tools in support of this assessment and monitor college success.
A.3 The institution’s programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.	P	S	S	Primary responsibility for alignment with the mission rests with the college. UHCC and UH System provide data, analytics, and tools in support of this assessment and monitor college programs. Major new programs require system approval which includes reviewing alignment with mission.
A.4 The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary. (ER 6)	P	SH	S	College is responsible for development, publications, and periodic update of the mission. UHCC presents the mission update to the Board of Regents on behalf of the college.
<b>B. Assuring Academic Quality and Institutional Effectiveness Academic Quality</b>				
B.1 The institution demonstrates a sustained, substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.	SH	SH	SH	The University aligns its focus on academic quality through shared goals and targets at the UH System, UHCC, and college level. These goals and related plans address all aspects of academic quality identified in the standards.
B.2 The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services. (ER 11)	P	S	S	The college has responsibility for defining and assessing student learning outcomes. UHCC monitors and supports cross campus conversations for common programs.

B.3 The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information. (ER 11)	SH	SH	S	The UHCC system has adopted common institution set standards to assure alignment with strategic goals and to provide a common framework for the colleges. Standards have both baseline minima and improvement goals. Colleges are responsible for assessing and addressing improvements in pursuit of the standards.
B.4 The institution uses assessment data and organizes its institutional processes to support student learning and student achievement.	SH	SH	SH	All levels of the organization use assessment data to establish goals to improve student achievement and learning. Colleges are responsible for the use of assessment data at the course and program level and for service level outcomes at the college.
Institutional Effectiveness				
B.5 The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, student learning outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by program type and mode of delivery.	SH	SH	SH	UHCC and UH System are responsible for policies relating to program review and program planning and assessment. Both also provide analytic information and tools to support college level review.  Colleges are responsible for full implementation of the policies on campus and for integration of the assessment data into college processes and improvement efforts.
B.6 The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.	SH	SH	SH	Analytic information at both the system and college level is disaggregated. The system strategic goals identify specific populations that are a priority for eliminating performance gaps.  Colleges address improvements based on the results within their own programs and campuses.
B.7 The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.	SH	SH	SH	Primary responsibility for program review rests with the colleges. UHCC and UH System establish governing policies, provide supporting data, and monitor compliance. All levels of the organization regularly evaluate and update policies, as appropriate. In some instances, UHCC wide policies and practices are adopted to address improved service and/or student achievement.
B.8 The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.	SH	SH	SH	Each level of the organization is responsible for sharing with the public and with internal constituencies the performance of the colleges and the system.

<p>B.9 The institution engages in continuous, broad based, systematic evaluation and planning. The institution integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources. (ER 19)</p>	SH	SH	SH	<p>UH System and UHCC policies establish the requirements and framework for integrated planning. UH System undertakes long-term program and facilities planning across the ten campus higher education system. UHCC addresses planning within the seven college community college system. Colleges are responsible for the development of the planning systems within the college. The planning systems are designed to be integrated and interdependent.</p>
<p>C. Institutional Integrity</p>				
<p>C.1 The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors. (ER 20)</p>	P	S	S	<p>The college is primarily responsible for the accuracy of information. Some public information is also maintained on UHCC and UH System websites for use by students and the general public.</p>
<p>C.2 The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the “Catalog Requirements” (ER 20)</p>	P	S	S	<p>College catalogs are the responsibility of the colleges.</p>
<p>C.3 The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public. (ER 19)</p>	P	S	S	<p>All public information is consistent with known assessment and evaluation information and is accurately reported to the various constituencies.</p>
<p>C.4 The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.</p>	SH	SH	SH	<p>Degree and certificate types are defined by UHCC policy. Colleges are responsible for accurately reporting the content, course requirements, and expected learning outcomes for its degree and certificate programs.</p>
<p>C.5 The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.</p>	SH	SH	SH	<p>All levels are responsible for the periodic review or policies, procedures, and publications under their jurisdiction and control.</p>

<p>C.6 The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>The college is responsible for posting total cost of education to prospective and current students.</p>
<p>C.7 In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution’s commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students. (ER 13)</p>	<p>SH</p>	<p>S</p>	<p>SH</p>	<p>The Board of Regents and UH System has adopted policies related to academic freedom and responsibility. Policies are also addressed in faculty collective bargaining agreements. Colleges are responsible for the implementation of these policies.</p>
<p>C.8 The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Colleges are responsible for implementing policies and procedures relating to academic honesty.</p>
<p>C.9 Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Colleges are responsible for implementing policies and procedures relating to faculty presentation of information and ideas.</p>
<p>C.10 Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.</p>	<p>SH</p>	<p>SH</p>	<p>SH</p>	<p>Generic codes of conduct are promulgated for various constituencies, including Board members, administrators, faculty, and students. There are no codes of conduct related to specific beliefs or world views..</p>
<p>C.11 Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.</p>	<p>NA</p>	<p>NA</p>	<p>NA</p>	<p>No college operates in a foreign location at this time.</p>

<p>C.12 The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities. (ER 21)</p>	SH	SH	SH	All levels of the organization are expected to comply with accreditation rules and regulations.
<p>C.13 The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. (ER 21)</p>	SH	SH	SH	All levels of the organization are expected to act with integrity. Colleges are responsible to proper notification of accreditation status and/or changes in accreditation status.
<p>C.14 The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.</p>	NA	NA	NA	The colleges have no relationship with investors, parent organizations, or external interests and operate solely as a component of the University of Hawai'i System.

<b>Standard II: Student Learning Programs and Support Services</b>				
Standard	College	UHCC	UH Sys	Comments
A. Instructional Programs				
<p>A.1 All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs. (ER 9 and ER 11)</p>	SH	SH	SH	Colleges develop and initiate all instructional programs. New programs or termination of programs requires approval by UHCC and UH System. Programs comply with UHCC and UH System policies relating to the type of credential and must be congruent with college mission and scope.

<p>A.2 Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Responsibility for quality control and improvement of instruction and services resides primarily with the instructional faculty.</p>
<p>A.3 The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Responsibility for the creation, assessment, and communication of student learning outcomes resides with the college.</p>
<p>A.4 If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.</p>	<p>SH</p>	<p>SH</p>	<p>S</p>	<p>Policies relating to course numbering and application of credits toward degrees are set at the system level. Colleges implement these policies. The UHCC system plan has a major focus on successful developmental education for students who are not yet college ready.</p>
<p>A.5 The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level. (ER 12)</p>	<p>SH</p>	<p>SH</p>	<p>S</p>	<p>UHCC system policies define credit length and rigor for all degrees and certificates. Colleges are responsible for assuring that learning outcomes within the programs are at common higher education levels.</p>
<p>A.6 The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. (ER 9)</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Colleges manage course scheduling and student advising to assure timely completion of certificates and degrees. UHCC and UH System provide tools to support guided pathways and other systems to promote student completion.</p>
<p>A.7 The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Colleges offer a variety of teaching methodologies and assess student success against those methodologies.</p>

<p>A.8 The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Where applicable, colleges are responsible for the validation of department or program wide examinations.</p>
<p>A.9 The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions. (ER 10)</p>	<p>SH</p>	<p>SH</p>	<p>S</p>	<p>UHCC System policies establish credit and contact hour requirements for college credits and number of credits required for degrees and certificates. Colleges are responsible for adhering to these policies and for ensuring that the awarding of course credit aligns with student learning outcomes. At present no courses are offered on a clock hour basis.</p>
<p>A.10 The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission. (ER 10)</p>	<p>SH</p>	<p>SH</p>	<p>SH</p>	<p>UH System and UHCC policies govern student transfer among the ten campus system. Articulation agreements with non-UH institutions may be developed either as UHCC wide agreements or as individual college agreements. Courses accepted as transfer meet all student learning outcomes and satisfy all degree requirements and course pre-requisites satisfied by the college course. Students may view all articulated courses through a publicly available web site.</p>
<p>A.11 The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>Program learning outcomes covering the topics indicated are incorporated into one or more courses within the program. The depth of competency is tied to the expectations of the employment or transfer curriculum for which the student is being prepared.</p>

<p>A.12 The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student’s preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences. (ER 12)</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>General education outcomes covering the required topics are included in all degree programs. The depth of the general education program varies by program type. While the specific general education courses are determined by the college, the UH system has articulated general education outcomes across the system.</p>
<p>A.13 All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level of key theories and practices within the field of study.</p>	<p>P</p>	<p>S</p>	<p>S</p>	<p>The design of the core program focus is based on input from employers and/or transfer baccalaureate requirements.</p>
<p>A.14 Graduates completing career technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.</p>	<p>SH</p>	<p>SH</p>	<p>S</p>	<p>UHCC policy sets institution set standards for all programs requiring external licensure and certification.</p>
<p>A.15 When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.</p>	<p>SH</p>	<p>SH</p>	<p>SH</p>	<p>By Board of Regents policy, students must be able to complete a terminated program within a reasonable period of time. The UH System must approve all terminations, including a specific plan for program completion. Colleges are responsible for designing and implementing the completion plan.</p>

<p>A.16 The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.</p>	SH	SH	SH	<p>Board of Regents and UH System Executive policy establish program review requirements. The UHCC further establishes CC system review policies and provides data and other information to support program review. Colleges are responsible for program and service level reviews for programs at the college, including the improvement efforts based on the reviews.</p>
<p>B. Library and Learning Support Services</p>				
<p>B.1 The institution supports student learning and achievement by providing library, and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services. (ER 17)</p>	SH	S	SH	<p>Students have access to all libraries within the UH system. Library software is managed by UH Mānoa for all libraries.</p> <p>Colleges are responsible for local library services and all on-campus learning support.</p> <p>On-line services such as library services, tutoring services, learning management systems, and other academic support are available to all students, including distance education students, through central services.</p>
<p>B.2 Relying on appropriate expertise of faculty, including librarians, and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.</p>	P	S	S	<p>Colleges are responsible for instructional and learning support equipment on campuses. A central funding pool is maintained by the UHCC for capital equipment replacement for items over \$5000.</p>
<p>B.3 The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.</p>	P	S	S	<p>Colleges are responsible for program and service level review of library and other learning support services.</p>

<p>B.4 When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness. (ER 17)</p>	SH	SH	SH	<p>Other than shared services within the UH system, there are no contractual or other relationships with external colleges or entities to provide library or learning resources.</p> <p>Some services, particularly for on-line tutoring, are contracted to outside third parties.</p>
<p>C. Student Support Services</p>				
<p>C.1 The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution. (ER 15)</p>	P	S	S	<p>Colleges are responsible for program and service level review of student support services.</p>
<p>C.2 The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.</p>	P	S	S	<p>Colleges include assessment and achievement results in the program review process and identify areas for improvement, especially for targeted sub- populations of students.</p> <p>UHCC strategic plan identifies enrollment and achievement goals for targeted populations.</p>
<p>C.3 The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method. (ER 15)</p>	SH	SH	S	<p>Most student support services are delivered and assessed by the colleges. Some services, particularly back office support services, are centralized to provide more consistent and efficient service to students.</p>
<p>C.4 Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletic programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.</p>	P	S	S	<p>Co-curricular programs are the responsibility of the colleges. There are no athletics programs within the UHCC system.</p>

<p>C.5 The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.</p>	P	S	S	<p>Colleges are responsible for providing the counseling and academic advising programs for students.</p>
<p>C.6 The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate and transfer goals. (ER 16)</p>	SH	SH	SH	<p>General college admission standards are set by law and UH System policy and are generally open admission. Some programs have program specific admission criteria.</p> <p>UHCC and UH System provide system software tools to provide both college personnel and students with information on their pathways, degree or transfer requirements, and their progress toward degree.</p>
<p>C.7 The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.</p>	SH	SH	S	<p>UHCC system evaluates common placement instruments and practices.</p> <p>Colleges evaluate admission practices for select admissions programs.</p>
<p>C.8 The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.</p>	SH	S	SH	<p>Colleges are responsible for maintaining all documents managed by the colleges. UH System manages all electronic student records, including provision for secure back-up. UH system policies govern record retention and data use.</p>

<b>Standard III: Resources</b>				
Standard	College	UHCC	UH Sys	Comments
A. Human Resources				

<p>A.1 The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.</p>	SH	SH	SH	<p>Faculty, professional staff, and executive/managerial personnel are Board of Regents appointees subject to classification and qualification rules established for these employees. Support staff including clerical and grounds and maintenance staff are State of Hawai'i civil service employees subject to civil service classification and qualification rules. All employees, except executive/managerial are subject to collective bargaining agreements.</p> <p>Hiring authority varies by employee type. Generally, the primary hiring decision and compliance with EEO and HR procedures in the hiring process, are the responsibility of the college, subject to review.</p> <p>All recruitment includes publication of duties, responsibilities, and qualifications required.</p>
<p>A.2 Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning. (ER 14)</p>	SH	SH	S	<p>Faculty classification including duties, academic qualifications, generic job descriptions, and criteria for tenure and promotion are established at the UHCC level for all faculty. Academic qualifications for lecturers (adjunct) are identical to those for regular faculty.</p> <p>Colleges use these system policies in hiring, retention, and promotion decisions.</p>
<p>A.3 Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.</p>	SH	S	SH	<p>Duties, academic qualifications, and job descriptions, are established at the UH System level for all professional support personnel (APT) and executive/managerial employees.</p> <p>Colleges use these system policies in hiring, retention, and promotion decisions.</p>
<p>A.4 Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.</p>	S	S	P	<p>UH System policies and practice are consistent with the standard and colleges must comply with the policy.</p>

<p>A.5 The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.</p>	SH	SH	SH	<p>Evaluation policies and processes are established by the UH System and/or UHCC system for each classification of employee – executive/managerial, faculty, lecturer(adjunct), APT (professional staff), and civil service. The evaluation processes and frequency vary for each classification.</p> <p>Colleges comply with these policies in the evaluation of college employees.</p>
<p>A.6 The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.</p>	SH	SH	S	<p>Community college faculty classification and duties and evaluation processes (contract renewal, tenure and promotion, and post-tenure evaluations) include the use of the results of learning outcomes as a duty and criteria for evaluation. Lecturers (adjunct) evaluation also includes this criteria.</p> <p>UHCC policy also includes assessment of learning outcomes as a component of executive/managerial evaluation.</p>
<p>A.7 The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes. (ER 14)</p>	P	S	S	<p>While no formal policy governs the ration of full-time to part-time/adjunct faculty, the ratio is monitored by UHCC system and the colleges to assure compliance with the standard.</p>
<p>A.8 An institution with part time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.</p>	SH	SH	SH	<p>Lecturers (adjunct) teaching half-time are members of the faculty collective bargaining unit and covered by the collective bargaining agreement. UHCC policies govern the step advancement and evaluation of lecturers (adjunct). Colleges are responsible for the orientation, oversight, evaluation, and professional development of lecturers.</p>
<p>A.9 The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution. (ER 8)</p>	SH	SH	S	<p>UHCC positions are controlled through legislative appropriation. By policy, UHCC system reallocates positions that have gone unfilled by colleges. Colleges may also reallocate positions within their authorized number of position counts.</p> <p>While no formal staffing ratios are established, the staffing levels for various classifications of employees are reviewed and compared across the colleges.</p>

<p>A.10 The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution’s mission and purposes. (ER 8)</p>	SH	SH	S	<p>UHCC positions are controlled through legislative appropriation. By policy, UHCC system reallocates positions that have gone unfilled by colleges. Colleges may also reallocate positions within their authorized number of position counts.</p> <p>While no formal administrative staffing ratios are established, the staffing levels for executive/managerial employees are reviewed and compared across the colleges.</p>
<p>A.11 The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.</p>	SH	SH	SH	<p>Personnel policies are established and published at multiple levels, including Board of Regents, UH Executive Policies, UHCC System policies, and college policies. Additionally, collective bargaining agreements govern personnel actions for the covered employees. Policies are periodically reviewed and updated.</p>
<p>A.12 Through its policies and practices, the institution creates and maintains appropriate programs, practices, and service that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.</p>	SH	SH	S	<p>Formal EEO/Affirmative action analysis is conducted by the UHCC system office on a regular basis and is incorporated into the recruitment/hiring processes.</p>
<p>A.13 The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.</p>	S	S	P	<p>Formal ethics policies and procedures are established by the UH System for various employee classifications. All employees are also subject to State of Hawai‘i ethics rules and regulations.</p>
<p>A.14 The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.</p>	SH	SH	SH	<p>Primary responsibility for professional development is with the college. UH System and UHCC also provide professional development opportunities for personnel at all colleges.</p>
<p>A.15 The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.</p>	SH	SH	SH	<p>Records retention policies, including security and confidentiality, are established by the UH system in accord with law and collective bargaining agreements. Colleges maintain records under their control in accord with these policies.</p>
<p>B. Physical Resources</p>				

<p>B.1 The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.</p>	SH	SH	SH	<p>Facilities planning and management is shared among the different levels of the organization Major capital projects are managed by UH System, minor projects, including all repair and maintenance and health and safety repairs, are managed by UHCC system, and regular maintenance of the buildings and campus are managed by the college. Campus security and safety is managed by the college with UHCC system providing training and oversight for compliance with Clery act and workplace violence reporting and training.</p>
<p>B.2 The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.</p>	S	SH	SH	<p>Long range building and land use planning is managed by UH System and UHCC system with input from the colleges.</p>
<p>B.3 To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.</p>	S	SH	SH	<p>All facilities are monitored on a regular maintenance schedule, including planning for deferred maintenance, by the UHCC and UH system. Priorities are established for addressing both regular and deferred maintenance.</p> <p>UHCC system maintains a regular program of review/replacement for capital equipment for the colleges.</p>
<p>B.4 Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.</p>	S	SH	SH	<p>Planning for new facilities, including total cost of ownership is managed by UHCC and UH System for major new projects.</p>
<p>C. Technology Resources</p>				
<p>C.1 Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's management and operational functions, academic programs, teaching and learning, and support services.</p>	SH	S	SH	<p>Technology support is shared by the UH System for major enterprise systems and for the UH technical infrastructure and by the colleges for on-campus support for students and staff using college technology resources.</p>
<p>C.2 The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.</p>	SH	S	SH	<p>UH System is responsible for planning and replacement of enterprise software and hardware systems. Colleges are responsible for replacement of college computers and other technology equipment.</p>

C.3 The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.	SH	S	SH	UH System is responsible for establishing policies and programs for information security. Colleges are responsible for implementing and complying with the security policies and for managing the on-campus computing networks.
C.4 The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.	SH	S	SH	UH System provides training and support for enterprise level software. Colleges provide direct support to faculty and staff and to students on the campus.
C.5 The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.	SH	S	SH	UH System has policies governing the use of technology by faculty, staff, and students. Colleges monitor and implement these policies on the campus.
<b>D. Financial Resources Planning</b>				
D.1 Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)	SH	SH	SH	UH System establishes policies relating to long term financial planning, tuition rate setting, and reserve. UHCC manages the combined UHCC budget in accordance with these policies and develops the allocation methodology to the colleges. Colleges are responsible for managing funds within their allocations, including revenue generating programs, and carrying out business practices in compliance with financial rules, regulations and good practice.
D.2 The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.	SH	SH	SH	Community college mission and goals are integral to the financial planning carried out by the UH System. The UHCC system considers the individual college mission in planning and allocation. The allocation methodology includes outcomes funding based on common goals but with specific targets established for each college.
D.3 The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.	SH	SH	SH	Colleges are responsible for the development of college budgets and internal allocation decisions, including participation by various constituencies in budget development.  Requests to the Legislature for new State funding are made within the context of Board of Regents policy and submitted through the UHCC to the UH System following system procedures.

Fiscal Responsibility and Stability				
D.4 Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.	SH	SH	SH	Financial plans and budgets are based on historic analysis of expenditures, enrollment and tuition revenue generation projections, known salary adjustments resulting from collective bargaining, and other factors impacting revenue, expenditures, and budgeting. Operating budgets are presented to and approved by the Board of Regents.
D.5 To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.	SH	SH	SH	Both the external UH audit and audits conducted by the UH internal auditor address control structure mechanisms and other financial practices. UHCC system and colleges are responsible for addressing and correcting any identified weaknesses.
D.6 Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.	SH	SH	SH	All budget and expenditure information is derived from the University's enterprise financial system which is fully audited each year.
D.7 Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.	SH	SH	SH	College and UH System responses to all audit findings are reported publicly to the Board of Regents as part of the audit process.
D.8 The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.	P	S	S	In addition to internal and external audit results, colleges have a responsibility to conduct service level review of business services and operations.
D.9 The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.	SH	SH	SH	UH System and UHCC System establish reserve levels for different funds and monitor college compliance with meeting reserve levels. UH System manages enterprise risk management for all UH colleges.
D.10 The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.	SH	S	SH	UH System manages all extramurally funded projects, including all compliance activities. The external audit includes audits of the UH Foundation and the UH Research Corporation as affiliated organizations. Investments are also managed by UH System. Colleges operate extramural funded and contract activities within the structures and processes managed by the central UH services.

Liabilities				
D.11 The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.	SH	SH	SH	Financial planning at all levels includes six year budget and revenue projections, impact of budgets on reserve levels, and known liabilities.
D.12 The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.	S	S	SH	Fringe benefits, including OPEB obligations, are budgeted and managed by the State of Hawai'i for all employees, including University employees. While the OPEB obligations are recorded within the UH audit, the obligation is held by the State.  UH does make payments for non-State funded workers to the pension and retiree health benefits programs, as required.
D.13 On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.	S	S	P	All bond funds and repayments are held and managed by the UH System. Colleges may not hold bond instruments individually although revenues from colleges may be used for bond repayment, as authorized by the bond sale.
D.14 All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.	SH	S	SH	The UH bond system monitors the expenditure of bond funds to assure compliance with bond issue purposes and applicable use laws. All fund-raising activities and expenditure of privately raised funds are managed by the UH Foundation in accordance with donor intention and IRS rules. All extramurally funded programs are monitored for compliance with grant conditions by the central UH System Office of Research Services.
D.15 The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.	SH	S	SH	The external audit includes a comprehensive audit of all Title IV activities and compliance. Any audit exceptions or issues related to default rates are addressed by the college and subsequently reviewed by the Federal government and follow-up audits.
Contractual Agreements				
D.16 Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.	S	S	P	All contractual agreements are subject to University policies and UH system approval. Colleges may not enter into contractual relationships on their own authority.

Standard IV: Leadership and Governance				
Standard	College	UHCC	UH Sys	Comments
A. Decision-making Roles and Processes				
A.1 Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institution-wide implications, systematic participative processes are used to assure effective planning and implementation.	SH	SH	SH	Leaders at all levels are expected to focus on student achievement and learning and create a climate of innovation and continuous quality improvement.  Establishment of major goals, policy changes, or improvements are vetted through multiple layers of the organization.
A.2 The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special- purpose committees.	SH	SH	SH	The Board of Regents has established University wide policies affirming the commitment to shared governance. UH System, UHCC System, and college policies define the structures and methods of engagement of the various constituencies in the shared governance process.
A.3 Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.	SH	SH	SH	The shared governance policies provide for and describe the role of faculty and administrators in the various governance structures.
A.4 Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.	P	S	S	By policy, faculty curriculum committees and faculty senates have primary responsibility for course and program decisions, subject to review by academic administrators and compliance with system academic guidelines.
A.5 Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.	SH	SH	SH	The shared governance system is intended to provide multiple views while allowing timely decisions. In addition to shared governance, public input is sought on major directions or decisions and strong working relationships are established with outside organizations including State and Count departments, Department of Education, and external business and community organizations.

A.6 The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.	SH	SH	SH	Each level of the organization is responsible for communicating the decision-making processes as well as the resulting decisions and/or actions.
A.7 Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.	SH	SH	SH	Periodic assessment of the governance structures is carried out at different levels of the organization and changes/improvements made as appropriate.
B. Chief Executive Officer				
B.1 The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.	P	S	S	The role of the college CEO is defined in the executive/managerial classification and in the job description for the CEO.
B.2 The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.	P	S	S	The CEO is responsible within the authority delegated by the UH System and UHCC system to carry out these responsibilities.
B.3 Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by: <ul style="list-style-type: none"> <li>•establishing a collegial process that sets values, goals, and priorities;</li> <li>•ensuring the college sets institutional performance standards for student achievement;</li> <li>•ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;</li> <li>•ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;</li> <li>•ensuring that the allocation of resources supports and improves learning and achievement; and</li> <li>•establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.</li> </ul>	P	S	S	The CEO is responsible within the authority delegated by the UH System and UHCC system to carry out these responsibilities.

B.4 The CEO has the primary leadership role for accreditation, ensuring that the institution meets or exceeds Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.	SH	SH	S	The college CEO has responsibility for accreditation standards and compliance for all college related standards. The Vice-President for Community Colleges has responsibility for UHCC system related standards including acting as liaison to the UH System and Board of Regents on accreditation matters.
B.5 The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.	P	S	S	The CEO is responsible within the authority delegated by the UH System and UHCC system to carry out these responsibilities.
B.6 The CEO works and communicates effectively with the communities served by the institution.	P	S	S	The CEO is responsible within the authority delegated by the UH System and UHCC system to carry out these responsibilities.
C. Governing Board				
C.1 The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution. (ER 7)	S	S	P	The Board of Regents is established by statute that provides the authority addressed in the standard.
C.2 The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.	S	S	P	Board of Regents by-laws stipulate the requirement to act as a collective entity.
C.3 The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.	S	SH	SH	The Board of Regents selects and evaluates the University of Hawai'i System President. The President is delegated the authority to select and evaluate the Vice-President for Community Colleges who is delegated authority to select and evaluate the college CEOs.
C.4 The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure. (ER 7)	S	S	P	The Board of Regents independence and role in setting policy and advocating for the University is embodied in the State Constitution and statute.

<p>C.5 The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.</p>	S	S	P	<p>These responsibilities are reflected in Board policies and in statute.</p>
<p>C.6 The institution or the governing board publishes the board bylaws and policies specifying the board’s size, duties, responsibilities, structure, and operating procedures.</p>	S	S	P	<p>All Board policies, by-laws, agendas, and minutes are published on the BOR link from the University home page.</p>
<p>C.7 The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.</p>	S	S	P	<p>The Board of Regents (and UH executive policy) system identifies the last date the policy was revised and the next scheduled review date. This information is publicly available.</p>
<p>C.8 To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.</p>	S	S	P	<p>The Board of Regents approves the University strategic directions including specific improvement goals for student success. The Board also reviews specific programmatic improvements through its committee structure.</p>
<p>C.9 The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.</p>	S	S	P	<p>Board development, including new member orientation is encoded in Board by-laws. The membership of the Board, including staggered terms, is proscribed by statute.</p>
<p>C.10 Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board’s effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices  And performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.</p>	S	S	P	<p>The evaluation process for the Board of Regents is described in Board by-laws.</p>

<p>C.11 The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution. (ER 7)</p>	S	S	P	<p>The Board of Regents ethics policy and its implementation are described in the Board by-laws. Board members are expected to publicly disclose and recuse themselves from any matter in which they may have a conflict of interest.</p>
<p>C.12 The governing board delegates full responsibility and authority to the CEO to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.</p>	S	S	P	<p>The primary governance relationship is between the Board of Regents and the University of Hawai'i System President. Authority delegated to the President is clearly delineated in Board policy, including whether the President may further delegate the authority to the UHCC Vice-President for Community Colleges and/or the Community College Chancellors.</p>
<p>C.13 The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college's accredited status, and supports through policy the college's efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.</p>	S	SH	SH	<p>The UHCC system office is responsible for liaison with the Board of Regents on all matters, including accreditation. Primary communication to the Board on accreditation matters is through the Academic and Student Affairs Committee. All self evaluation reports, as well as other submittals to the ACCJC, are made available to the full Board.</p>
<p>D. Multi-College Districts or Systems</p>				
<p>D.1 In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.</p>	S	SH	SH	<p>The UH Community College system operates as a system within the larger University of Hawai'i system. The VP for Community Colleges oversees the seven community college system, including establishing system policies, budget allocations, system strategic directions, and carrying out other responsibilities as defined by the Board of Regents and the University President.</p>

<p>D.2 The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.</p>	S	SH	S	<p>Delineation of responsibilities from the VP for Community Colleges to the Colleges is established in University executive policy and Community College system policies. The VP for Community Colleges does set community college system goals and allocates resources in support of those goals and the College operations. Internal resource allocation is the responsibility of the colleges.</p>
<p>D.3 The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and district/system. The district/system CEO ensures effective control of expenditures.</p>	S	P	S	<p>The VP for Community Colleges has policies describing the allocation and reallocation methodologies for the CC system. All funds are managed through the University fiscal management system and monitored by the office of the Vice- President for Community Colleges. The University audit includes a separate schedule for the community colleges within the larger University audit.</p>
<p>D.4 The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEO's accountable for the operation of the colleges.</p>	S	P	S	<p>The authority of the college CEO is defined in University executive policy and in community college system policy.</p>
<p>D.5 District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.</p>	SH	SH	SH	<p>University of Hawai'i System, UH Community College system, and individual college plans are integrated through adoption of common goals and metrics and areas of emphasis.</p>
<p>D.6 Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.</p>	SH	SH	SH	<p>Multiple communication channels are employed including posting of information and regular meetings with system governance groups and the colleges, and college wide presentations of system goal achievement and strategic plan success.</p>
<p>D.7 The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement.</p>	S	P	S	<p>Policies of the UH Community College system are reviewed on a regular basis. Individual governance processes are reviewed on a periodic basis and may be adapted in response to changes in the University system governance processes.</p>

## **Certification of Continued Institutional Compliance with Eligibility Requirements**

### **CERTIFICATION OF CONTINUED COLLEGE COMPLIANCE WITH ELIGIBILITY REQUIREMENTS 1-5**

Honolulu Community College has examined its policies and practices considering the expectations of the Eligibility Requirements (ERs) as required for the completion of the Institutional Self Evaluation Report. Requirement 1 through 5, inclusive, are summarized separately in this section; the analysis of the remaining ERs is included in the narrative responses to the standards, as relevant. Relevant evidence demonstrating continued compliance with the ERs is included, as relevant.

#### **1. AUTHORITY**

Honolulu Community College (Honolulu CC) was established in 1920 as the Territorial Trade School in Pālama. Subsequently, it became part McKinley High School, but was later reestablished as Honolulu Vocational School. It became the Honolulu Technical School in 1955 before becoming part of the University of Hawai'i as a result of the Community College Act of 1964. In 1966, the Board of Regents approved the name Honolulu CC and authorized the school to grant Associate in Arts and Associate in Science degrees.

The College has been continuously accredited by the Accrediting Commission for Community and Junior Colleges (ACCJC) of the Western Association of Schools and Colleges (WASC).

Honolulu CC operates under the University of Hawai'i System of Higher Education, and is a duly authorized postsecondary institution by the State of Hawai'i to award degrees and certificates appropriate for two-year institutions. The University of Hawai'i Community College (UHCC) system is responsible for the quality of the community colleges and operates through a centralized office. Honolulu CC awards degrees approved by the UHCC and the Board of Regents.

#### Conclusion

The College has full authority from the State of Hawai'i as part of the University of Hawai'i system and complies with Eligibility Requirement 1, Authority.

#### Evidence

- Certificate of Incorporation
- ACCJC Certification
- UHCC Member Institution Certificate

## **2. OPERATIONAL STATUS**

Since its inception in 1920, Honolulu Community College has been in continuous, uninterrupted operation. The college has a student headcount of 3,563 and full time equivalent student count of 1,184. Students who attend Honolulu CC are principally degree and transfer seeking students. In addition, the institution also offers certificates, in career and technical education and workforce readiness fields, pre-collegiate courses in mathematics and English to develop college readiness for further academic study, and noncredit and community education.

College operations are robust and organized to best meet the college mission. (See, Standard I.A.) The college has an annual budget of approximately \$38,369,655 with 155 full-time faculty and 154 administrative and support staff.

### Conclusion

The College complies and has continually complied with Eligibility Requirement 2, Operational Status. Honolulu CC is member institution of the University of Hawai'i system.

### Evidence

- College Catalog
- Class Schedule
- See, Detailed Discussion, Instructional Programs, Standard I.A

## **3. DEGREES**

The seeking of a post-secondary award is the principal goal of most Honolulu Community College students. In fact, for the 2016-2017 academic year, Honolulu CC awarded 652 associate degrees and 248 certificates of achievement. As discussed in Standard II.A, associate degrees consist of traditional two-year degrees with appropriate unit acquisition based on well-recognized traditions in higher education. Honolulu CC has an established catalog that acts as the principal document establishing degree and other award expectations for students and setting forth conditions for enrollment and matriculation at the institution. Potential and current studies use the catalog for educational planning. The Honolulu CC Faculty senate has established a curriculum committee that establishes reviews and updates course and program information for

currency and relevance. The college and system governing board approves all new and existing programs of study through a robust scheme of curriculum oversight and review.

### Conclusion

The College complies and has continually complied with Eligibility Requirement 3, Degrees. Honolulu CC awards associates degrees and certificates based on successful accumulation of course units. The awards are consistent with the University of Hawai'i system colleges with articulation and transfer of credit to other accredited colleges in the region. Faculty in disciplines create and approve through faculty-led processes of content review. The College examines all existing curriculum for relevance, currency based on academic, career, and technical education standards.

### Evidence

- College Catalog
- Class Schedule
- See, Detailed Discussion, Instructional Programs, Standard II.A

## **4. CHIEF EXECUTIVE OFFICER**

The college has a chief executive officer duly appointed by the board with the exclusive and full-time responsibility is to execute the board policies. The chief executive officer at Honolulu Community College is a chancellor with the title of President reserved for the head of the UHCC system. The college appointed the current chief executive officer on July 2, 2012, and the accrediting commission has been timely notified of all executive leadership changes. There are established UHCC system policies for the hiring and evaluation of the CEO. Delegation of authority to administer the board policies are likewise governed by established board policy.

### Conclusion

The College complies and has continually complied with Eligibility Requirement 4, Chief Executive Officer. The State of Hawai'i has authorized Honolulu CC to operate as a post-secondary educational institution in California and to award degrees by the University of Hawai'i system and the State of Hawai'i. A CEO who has the responsibility for the academic quality of the institution leads it. The CEO's responsibility is full time and a person whose principal responsibility is the welfare of the institution holds the position.

### Evidence

- UHCC, BOR, UH Policies: UHCCP 9.210, RP 9.212, UHCCP 9,202, EP 9.202
- Chancellor Job Description
- See, Detailed Coverage contained in Standard IV.B

## **5. FINANCIAL ACCOUNTABILITY**

The financial operations and systems at Honolulu CC as well as the UHCC undergo strict internal and external controls. Financial processes are reviewed by independent audit performed by an neutral certified public accountant. When reviewing financial operations, Honolulu CC and the UHCC apply generally accepted accounting principles for its operations and for audit. Each year, the Honolulu CC budget and the UHCC budget are presented to the public and reviewed and approved by the governing board. All financial evaluations include a thorough review of internal financial systems and compliance with Hawai'i and federal laws and regulations. Since the College is part of the UHCC System of Higher Education, all audits are examined by the UHCC and UH financial offices, as well. The last audit was completed on June 30, 2017.

The college is also authorized to award financial aid under federal Title IV. The college is following the required components of the Title IV of the federal regulations and all findings from any audits and program or other review activities by the USDE are held maintained by the college. All financial responsibility requirements, program record-keeping, etc. are appropriately stored and maintained in secure college record keeping systems. Honolulu CC has a Vice Chancellor dedicated to review of fiscal and administrative capacity and to address current and future financial obligations. Student loan default rates at Honolulu CC are well within the acceptable range defined by the USDE for our institution.

### Conclusion

The College complies and has continually complied with Eligibility Requirement 5, Financial Accountability. Honolulu CC is a financially stable state supported institution with has external audits conducted regularly and with proper systems of internal controls to monitor financial and budgetary requirements.

### Evidence

- 2017 Independent Financial Audit
- Title IV Authorization for Federal Aid
- See, Detailed coverage, Financial Resources, Standard IV.D
- See, Checklist for Compliance with Checklist for Evaluating Compliance with Federal Regulations and Related Commission Policies, Title IV Compliance

## **Certification Continued Institutional Compliance with Commission Policies**

In the self-evaluation process, Honolulu CC evaluated its compliance with ACCJC policies and Federal Regulations, including those noted within the standards themselves. The College has stayed up-to-date with the ACCJC policies by the Commission's correspondence and through its training sessions held in Honolulu. The College also has referred to the *Manual for Institutional Self Evaluation, Guidelines for Preparing Institutional Reports to the Commission, Guide to Evaluating and Improving Institutions*, among other documents, in preparing the self-evaluation. Compliance to policies, including evidence of compliance, is embedded in the evidence of meeting the standards in the report.

Honolulu CC has created a matrix to assist the team in its work to review the college's performance in these areas. The College determined that we ourselves should review the checklist items and assess our own performance. To this end, we have reviewed each policy, identified the evidence, connected the standards and eligibility requirements, and analyzed and evaluated our performance. The matrix makes reference to and crosswalks findings in the institutional self-evaluation report with the conclusions in the matrix for each item.

<b>Public Notification of an Evaluation Visit and Third-Party Comment</b> Regulation citation: 602.23(b)	
	<b>Item One:</b> The Institution has made an appropriate and timely effort to solicit third party comment in advance of the comprehensive evaluation visit.
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The Accreditation webpage was moved to the College’s main website from the Intranet on November 9, 2017 to make activities available to the general public. <b>Standards and Performance with Respect to Student Achievement</b> Regulation citations: 602.16(a)(1)(i); 602.17(f); 602.19 (a-e).]	
	<p><b>Item One:</b> The institution has defined elements of student achievement performance across the institution, and has identified the expected measure of performance within each defined element. Course completion is included as one of these elements of student achievement. Other elements of student achievement performance for measurement have been determined as appropriate to the institution’s mission.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC has established institution-set standards at the institution level for planning and institutional improvement.</li> <li>• Successful course completion is one of the measures of analysis in the institution set-standards under University of Hawai'i policy and accountability.</li> <li>• The College met its target for course completion in FY 2018.</li> <li>• Successful completion of classes is included in the Annual Review of Program Data that all programs analyze each year.</li> <li>• Other set-standards that monitor student achievement include degrees and certificates awarded, transfers to baccalaureate institutions, licensure and certification examination success rates, and job placement rate, which are tied to the strategic plan and mission of the institution.</li> <li>• Institution set standards and the strategic plan are reviewed annually by the Planning Council.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards I.A.2, I.B.2, I.B.3, I.B.5</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Section on Student Achievement Data and Institution-Set Standards</li> </ul>

	<p><b>Item Two:</b> The institution has defined elements of student achievement performance within each instructional program, and has identified the expected measure of performance within each defined element. The defined elements include, but are not limited to, job placement rates for program completers, and for programs in fields where licensure is required, the licensure examination passage rates for program completers.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• All Honolulu CC 's programs analyze student achievement performance in Annual Review of Program Data. The data includes course completion, persistence, degrees awarded, transfers, technical skills achieved, job placement, among other student success data.</li> <li>• All community colleges follow the UHCC policy of indicators from the system office. Career and Technical Education programs set job placement rates based on the Federal Perkins Core Indicator Reports. Data is reviewed annually in the ARPD reviews.</li> <li>• Student achievement performance is identified in the College's strategic plan and institution set-standards, which includes licensure and certificate examination success rates and job placement.</li> <li>• Job placement rates and licensure examination pass rates along with set- targets are reported to the ACCJC in Annual Reports.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards I.B.2, I.B.3, II.A.1, II.A.13, II.A.14</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Section on Student Achievement Data and Institution-Set Standards</li> </ul>

	<p><b>Item Three:</b> The institution-set standards for programs and across the institution are relevant to guide self-evaluation and institutional improvement; the defined elements and expected performance levels are appropriate within higher education; the results are reported regularly across the campus; and the definition of elements and results are used in program-level and institution-wide planning to evaluate how well the institution fulfills its mission, to determine needed changes, to allocating resources, and to make improvements.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The Planning Council reviews, evaluates, and discuss the College’s performance on goals and outcomes and makes recommendations when necessary to the chancellor and other campus committees.</li> <li>• Twice a year, the Vice President of Community Colleges visits the College to review in campus town hall meetings to review the institution’s set-standards as well as that of the community colleges as a whole.</li> <li>• The College met all its UHCC funding initiatives and most of its UH funding initiatives, indicating the impact of campus reviewing its goals and outcomes for student success and student achievement.</li> <li>• Student performance metrics are the basis for the Annual Program Data Review analysis. All programs and student services are involved in the analysis of the ARPD.</li> <li>• ARPD analyses for each program are available to the campus community and housed on the UHCC website. The ARPD analyses allow programs to compare how they contribute to student success in relation to the overall results of the College.</li> <li>• The ARPD analyses allow faculty and staff to incorporate the information in program and department planning.</li> <li>• In addition to program level analysis of institution set standards, the college uses set standards to guide larger, institutional level discussions on progress on the mission through the strategic plan.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards I.B.2, I.B.3, I.B.5, I.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Section on Student Achievement Data and Institution-Set Standards</li> </ul>

	<p><b>Item Four:</b> The institution analyzes its performance as to the institution-set standards and as to student achievement, and takes appropriate measures in areas where its performance is not at the expected level.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Student performance metrics that are in the institution set-standards are included in the Annual Program Data Review, except IPEDS data.</li> <li>• Programs analyze the ARPD to determine student performance and the analyses are used for improvement.</li> <li>• Programs base requests for supplemental program funding to improve their programs on the ARPD analyses, the College’s strategic plan and the institution’s mission.</li> <li>• The College met all its UHCC funding initiatives and most of its UH funding initiatives, indicating the impact of campus reviewing its goals and outcomes for student success and student achievement.</li> <li>• The college now examines aspirational goals in addition to reviewing floors of expected levels of performance.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards I.B.2, I.B.3, I.B. 6, II.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Section on Student Achievement Data and Institution-Set Standards</li> </ul>

<p align="center"><b>Credits, Program Length, and Tuition</b>                      Regulation citations: 602.16(a)(1)(i); 602.17(f); 602.19 (a-e).]</p>	
	<p><b>Item One:</b> Credit hour assignments and degree program lengths are within the range of good practice in higher education (in policy and procedure).</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC conforms to a commonly accepted minimum program length of at least 60 semester credit hours awarded for achievement of an associate degree, including the Associate in Arts (AA), Associate in Science (AS), Associate in Applied Science (AAS), and Associate in Technical Students (ATS) degrees.</li> <li>• The minimum 60 semester credit hours awarded for degrees are specified in UHCC policy (II.A.1).</li> <li>• Credit hours are defined in UHCC policy (II.A.46) and in UH policy (II.A.9).</li> <li>• Programs and courses are approved by the Committee on Programs and Curricula (CPC), which is a subcommittee of the Faculty Senate Executive Committee. The CPC takes into consideration of the definition of credit hours for courses and the policy on credit hours awarded for degrees.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.5, II.A.6, II.A.9, II.A.10, II.A.11, II.A.12</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirements 9, 10, 12</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• College Catalog (I.A.1 [pp. 73, 76])</li> </ul>

	<p><b>Item Two:</b> The assignment of credit hours and degree program lengths is verified by the institution, and is reliable and accurate across classroom based courses, laboratory classes, distance education classes, and for courses that involve clinical practice (if applicable to the institution).</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The Committee on Programs and Curricula (CPC) reviews all programs and courses assuring appropriate credit hours for courses and program lengths for degrees. The CPC is a subcommittee of the faculty senate.</li> <li>• The CPC does not distinguish differences between distance education and face-to-face course proposals in the approval process. All courses meet the same criteria, no matter what the delivery mode.</li> <li>• The CPC assures that all programs meet the minimum 60 semester credit hours for associate degrees.</li> <li>• Distance education courses must be approved by the CPC, while proposals for conducting courses online are reviewed and overseen by the Distance Education Advisory Board.</li> <li>• The College follows the policies set by UHCC and UH for course credit hours and degree program length and CPC procedures for course and program approval. CPC procedures and guidelines are outlined in the CPC manual.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• See Standards II.A.5, II.A.6, II.A.9, II.A.10, II.A.11, II.A.12</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirements 9, 10, 11, 12</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• CPC Reference Manual (<a href="#">II.A.10</a>)</li> </ul>

	<p><b>Item Three:</b> Tuition is consistent across degree programs (or there is a rational basis for any program specific tuition).</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>Honolulu CC is a community college with open admission. The authority to establish tuition schedules for University of Hawai'i campuses resides with the Board of Regents.</li> <li>Tuition is set at a uniform rate per unit. Resident tuition is \$126 per credit and non-resident tuition \$340 per credit during the academic year, consistent with all the Hawai'i community colleges. Summer tuition and off-campus education program tuition is higher. Tuition rates, activity fees, and other costs are published in the college catalog and on the college website.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>Standards I.B.2 I.B.3, I.C.2, I.C.6, II.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>Honolulu CC College Catalog (<a href="#">I.A.1 [pp.30-31]</a>), Board of Regents Reference Guide (<a href="#">I.A.6 [p. 51]</a>), Board of Regents Policy on tuition (<a href="#">III.D.4</a>)</li> </ul>

	<p><b>Item Four:</b> Any clock hour conversions to credit hours adhere to the Department of Education's conversion formula, both in policy and procedure, and in practice.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>The College does not offer clock-hour based courses.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>Standard II.A.9</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>Not applicable</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>Not applicable</li> </ul>

	<p><b>Item Five:</b> The institution demonstrates compliance with the <i>Commission Policy on Institutional Degrees and Credits</i>.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC conforms to a commonly accepted minimum program length of at least 60 semester credit hours awarded for achievement of an associate degree.</li> <li>• The minimum 60 semester credit hours awarded for degrees are specified in UHCC policy (II.A.1).</li> <li>• Credit hours are defined in UHCC policy (II.A.46) and in UH policy (II.A.9).</li> <li>• Programs and courses are reviewed and approved by the Committee on Programs and Curricula (CPC), which is a subcommittee of the Faculty Senate Executive Committee. The CPC takes into consideration of the definition of credit hours for courses and the policy on credit hours awarded for degrees.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards I.B.2, I.B.3, II.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• College Catalog (I.A.1 [pp. 73, 76])</li> </ul>

<p style="text-align: center;"><b>Transfer Policies</b></p> <p style="text-align: center;">[Regulation citations: 602.16(a)(1)(viii); 602.17(a)(3); 602.24(e); 668.43(a)(ii).]</p>	
	<p><b>Item One:</b> Transfer policies are appropriately disclosed to students and to the public.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Policies and procedures on the transfer of credit are in the college catalog (<a href="#">I.A.1 [pp. 53-56]</a>)</li> <li>• Policies and procedures for transfer of credit are also available on the College website.</li> <li>• The College website provides students with Transcript Evaluation Request Form. Students are encouraged to meet with counselors in the application process to have transcripts evaluated.</li> <li>• The College has processes to evaluate transcripts for credit and participates in discussions about the articulation of Honolulu CC courses at other institutions.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.A.10</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 20</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC Catalog (<a href="#">I.A.1. [pp. 53-56]</a>)</li> </ul>

	<p><b>Item Two:</b> Policies contain information about the criteria the institution uses to accept credits for transfer.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Courses taken at other University of Hawai'i campuses are guided by the UH Articulation Agreement.</li> <li>• For non-UH transfers, College policies require courses awarded as credit for satisfying degree requirements to be from institutions accredited by U.S regional accrediting associations.</li> <li>• The College also provides details for accepting other learning credits in its policies and procedures in its catalog and on its website.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.A.10</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 20</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC College Catalog (<a href="#">I.A.1. [pp. 53-56]</a>)</li> </ul>

	<p><b>Item Three:</b> The institution complies with the Commission Policy on Transfer of Credit.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Faculty members in the discipline decide if a course will be accepted for transfer credit and the status of the transfer credit in meeting general education requirements, program requirements, or elective credits.</li> <li>• The courses are entered into a Transfer Database so future students transferring from the same institutions will receive the designated credit.</li> <li>• Courses taken at other University of Hawai'i campuses are guided by the UH Articulation Agreement.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.A.10</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 20</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC College Catalog Catalog (<a href="#">I.A.1. [pp. 53-56]</a>)</li> </ul>

<p align="center"><b>Distance Education and Correspondence Education</b>                      [Regulation citations: 602.16(a)(1)(iv), (vi); 602.17(g); 668.38.]</p>	
	<p><b>Item One:</b> The institution has policies and procedures for defining and classifying a course as offered by distance education or correspondence education, in alignment with USDE definitions.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• All the College’s courses, regardless of delivery mode, must follow the same curriculum process for approval or modification. The Committee on Programs and Curricula (CPC), a subcommittee of the faculty senate, manages the curriculum process.</li> <li>• Courses, regardless of delivery mode, meet measures of program length and objectives for degrees or certificates with student achievement and student success in mind, in line with the mission of the College.</li> <li>• The College does not offer correspondence education.</li> <li>• The College uses a secure learning management system (Laulima) for online, hybrid, and face-to-face instruction, which requires students and faculty to input a unique user name and password. Laulima is managed by University of Hawai’i ITS for all the 10 colleges in the system.</li> <li>• Faculty teaching courses in any delivery mode must meet the same education qualifications, established by the institution.</li> <li>• Support services are available to online students as well as those in face-to-face classes. The College website provides distance education resources for students, including an introduction for online students to get started and learn about resources available.</li> <li>• Discipline faculty in academic programs complete course assessment in the same way as face-to-face classes, which includes student success metrics. Assessment is disaggregated for online and face-to-face modes of delivery.</li> <li>• The College has a Distance Education Advisory Board that has oversight of online instruction.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.B.1, II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirements 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Distance Education Supplement</li> <li>• Quality Focus Essay 2, Enhanced DE Support Initiative</li> </ul>

	<p><b>Item Two:</b> There is an accurate and consistent application of the policies and procedures for determining if a course is offered by distance education (with regular and substantive interaction with the instructor, initiated by the instructor, and online activities are included as part of a student’s grade) or correspondence education (online activities are primarily “paperwork related,” including reading posted materials, posting homework and completing examinations, and interaction with the instructor is initiated by the student as needed)</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• All the College’s courses, regardless of delivery mode, must follow the same curriculum process for approval or modification. The Committee on Programs and Curricula (CPC), a subcommittee of the faculty senate, manages the curriculum process.</li> <li>• Courses, regardless of delivery mode, meet measures of program length and objectives for degrees or certificates with student achievement and student success in mind, in line with the mission of the College.</li> <li>• The Distance Education Advisory Board has oversight of online instruction and approves distance education courses, based on College policy. Regular and substantive interaction initiated by the instructor is one of the criteria for approval. The policy requires online courses to have the frequency of instructor contact with students to be the same as face-to-face courses (DE.11).</li> <li>• The College does not offer correspondence education.</li> <li>• Discipline faculty in academic programs complete assessment, which includes student success and achievement metrics. Assessment is disaggregated for online as well as face-to-face modes of delivery.</li> <li>• Dialog about assessment in online courses occurs in faculty meetings and in the Distance Education Advisory Board.</li> <li>• The College provides professional development through the Faculty Development Committee.</li> <li>• Faculty have access to the College’s Distance Education Handbook that provides information on all aspects of teaching an online course.</li> <li>• Faculty also have access to the University of Hawai’i ITS website that also provides distance education resources, including faculty manuals, tutorials, and videos on course material development and use of technical resources.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.B.1, II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirements 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Distance Education Supplement, QFE Enhanced DE Support Initiative</li> <li>• Quality Focus Essay 2, Enhanced DE Support Initiative</li> </ul>

	<p><b>Item Three:</b> The institution has appropriate means and consistently applies those means for verifying the identity of a student who participates in a distance education or correspondence education course or program, and for ensuring that student information is protected.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The College uses a secure learning management system (Laulima) for online, hybrid, and face-to-face instruction, which requires students and faculty to input a unique user name and password. Laulima is managed by University of Hawai'i ITS for all the 10 colleges in the system</li> <li>• The Laulima (Sakai) platform provides a wide-range of course support including communication, posting assignments, progress tracking, grading, and testing.</li> <li>• The College does not offer correspondence education.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.B.1, II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirements 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Distance Education Supplement</li> <li>• Quality Focus Essay 2, Enhanced DE Support Initiative</li> </ul>

	<p><b>Item Four:</b> The technology infrastructure is sufficient to maintain and sustain the distance education and correspondence education offerings.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Technology needs are identified and supported through technology plans of both the institution’s Information Technology Services and the University of Hawai’i ITS.</li> <li>• Distance Education resource needs are discussed in the Distance Education Advisory Committee meetings, which take place monthly.</li> <li>• The College does not offer correspondence education.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.B.1, II.C.1, III.C</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirements 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Distance Education Supplement</li> <li>• Quality Focus Essay 2, Enhanced DE Support Initiative</li> </ul>

	<p><b>Item Five:</b> The institution demonstrates compliance with the Commission Policy on Distance Education and Correspondence Education.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The Distance Education Advisory Board has oversight of online instruction and approves distance education courses, based on College policy. Regular and substantive interaction initiated by the instructor is one of the criteria for approval. The policy requires online courses to have the frequency of instructor contact with students to be the same as face-to-face courses (DE.11).</li> <li>• All the College’s courses, regardless of delivery mode, must follow the same curriculum process for approval or modification. The Committee on Programs and Curricula (CPC), a subcommittee of the faculty senate, manages the curriculum process.</li> <li>• Courses, regardless of delivery mode, meet measures of program length and objectives for degrees or certificates with student achievement and student success in mind, in line with the mission of the College.</li> <li>• The College does not offer correspondence education.</li> <li>• Faculty teaching courses in any delivery mode must meet the same education qualifications, established by the institution.</li> <li>• Support services are available to online students as well as those in face-to-face classes.</li> <li>• Discipline faculty in academic programs complete course assessment in the same way as face-to-face classes, which includes student success metrics. Assessment is disaggregated for online and face-to-face modes of delivery.</li> <li>• The College provides professional development through the Faculty Development Committee.</li> <li>• Faculty have access to the College’s Distance Education Handbook that provides information on all aspects of teaching an online course.</li> <li>• Faculty also have access to the University of Hawai’i ITS website that also provides distance education resources, including faculty manuals, tutorials, and videos on course material development and use of technical resources.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards II.A.1, II.B.1, II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirements 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Distance Education Supplement</li> <li>• Quality Focus Essay 2, Enhanced DE Support Initiative</li> </ul>

<p style="text-align: center;"><b>Student Complaints</b> [Regulation citations: 602.16(a)(1)(ix); 668.43.]</p>	
	<p><b>Item One:</b> The institution has clear policies and procedures for handling student complaints, and the current policies and procedures are accessible to students in the college catalog and online.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC has defined policies and procedures for student with complaints and grievances, which are articulated in the College catalog and online through <i>Policies</i> on the College’s website.</li> <li>• Student complaint forms for general issues, suggestions, exception requests are available online on the Dean of Student Services webpage.</li> <li>• For academic grievances, the website includes a discussion of the rights and responsibilities of students, related definitions, procedures for the resolution of academic grievances, and responsibilities and procedures of the academic grievance committee.</li> <li>• Both the catalog and website provide information on procedures and contacts for nondiscrimination affirmative action issues as well as for Title IX discrimination.</li> <li>• The College follows the University of Hawai‘i system policy on student conduct (<a href="#">Comp.9</a>) as well as its own related procedures (<a href="#">Comp.10</a>).</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not applicable</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC catalog (<a href="#">I.A.1 [pp. 63-67]</a>, College website (<a href="#">Comp.8</a>))</li> </ul>

	<p><b>Item Two:</b> The student complaint files for the previous six years (since the last comprehensive evaluation) are available; the files demonstrate accurate implementation of the complaint policies and procedures.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Student complaint files involving discrimination, harassment, and sexual assault (including Title IX issues) are held by the Title IX Coordinator. The academic deans maintain files on student academic grievance complaints that escalate to them, while the Dean of Student Services maintains student complaint records on all other issues.</li> <li>• Student complaint files are maintained for the previous six years (since the last comprehensive site visit are available to the site team for review.</li> <li>• The files demonstrate accurate implementation of the complaint policies and procedures</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not Applicable</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Honolulu CC catalog</li> </ul>

	<p><b>Item Three:</b> The team analysis of the student complaint files identifies any issues that may be indicative of the institution’s noncompliance with any Accreditation Standards.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The College is prepared for any inquiry that the team members may have about the complaint files, procedures or policies.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not applicable</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• None</li> </ul>

	<p><b>Item Four:</b> The institution posts on its website the names of associations, agencies and govern mental bodies that accredit, approve, or license the institution and any of its programs, and provides contact information for filing complaints with such entities.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The College lists all of the required information from the ACCJC on the College’s main accreditation page.</li> <li>• The College lists on its website all the programmatic accreditors and licensing agencies that accredit, approve, or license the institution, and identifies a link for any student complaints.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not applicable</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• None</li> </ul>

	<p><b>Item Five:</b> The institution demonstrates compliance with the Commission Policy on Representation of Accredited Status and the Policy on Student and Public Complaints Against Institutions.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The College complies with the Policy on Representation of Accredited Status by posting public notifications of all accreditation statuses on the campus website.</li> <li>• The College also complies with the Policy on Student and Public Complaints Against Institutions.</li> <li>• Honolulu CC provides students with clear policies and procedures on student academic grievances, discrimination, and sexual harassment, which are outlined in the college catalog and on its website.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards I.B.2, I.B.3, II.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Not applicable</li> </ul>

<b>Institutional Disclosure and Advertising and Recruitment Materials</b> [Regulation citations: 602.16(a)(1))(vii); 668.6.]	
	<p><b>Item One:</b> The institution provides accurate, timely (current), and appropriately detailed information to students and the public about its programs, locations, and policies.</p>
Meets	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The college catalog is available in both print and on the website. Integrity of the catalog is assured by including up-to-date curriculum changes and through review by those responsible for content before publication.</li> <li>• Depending upon the publication, responsible parties ensure the accuracy of the information before dissemination to the public.</li> <li>• The class schedule is provided online and updated continually to reflect current status prior to the start of classes each semester.</li> <li>• College personnel and faculty who are well versed in the College admissions procedures and programs manage student recruitment.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standards I.C.2, I.C.4</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• None</li> </ul>

	<p><b>Item Two:</b> The institution complies with the Commission Policy on Institutional Advertising, Student Recruitment, and Representation of Accredited Status.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The College ensures all publications and advertising disseminated to the public are clear, accurate, and free of any misrepresentations. ## **Standard I: Mission, Academic Quality and Instructional Effectiveness, and Integrity**

The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continually and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.

### **Standard I.A: Mission**

[I.A.1](#) The mission describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement.

---

#### Evidence of Meeting the Standard

Honolulu Community College is an open access comprehensive two-year institution operating as part of the University of Hawai'i Community Colleges (UHCC) under the auspices of the University of Hawai'i system ([I.A.24](#)). Its unique mission to provide broad educational opportunities in a vibrant learning environment for the diverse community it serves aligns with greater mission and purpose of community colleges in Hawai'i to deliver effective teaching of remedial/developmental education, general education, career and workforce and introductory liberal arts, pre-professional, and selected baccalaureate courses and programs. The mission of Honolulu CC is embodied in the mission of the University of Hawai'i Community Colleges, outlined in its Strategic Directions ([I.A.7](#)) and its policy on strategic planning ([I.A.4](#)).

The College's mission is memorialized in a statement that captures the essence of the college and its purpose ([I.A.1 \[p. 15\]](#)). Specifically:

*Honolulu Community College provides accessible educational opportunities through an engaging learning environment that values academic excellence and personal growth of all students, with a kuleana (responsibility) to Native Hawaiians and our community, through career, liberal arts, technology, transfer, and professional training programs.*

The mission of Honolulu CC was updated in the 2016-2017 academic year.

In support of Honolulu CC's mission, the College has established a set of core values, also noted in the college catalog ([I.A.1 \[p. 15\]](#)):

- *Student-Centered and Student-Focused - offering a supportive, high quality learning environment that guides students through their college pathway to become contributing members and leaders of our community.*
- *Community and Industry Partnerships - fostering educational partnerships with state-registered apprenticeship programs, local industries, and other organizations to create diverse academic and training opportunities.*
- *Indigenous Serving - supporting the Native Hawaiian community and its language, history, and culture.*
- *Sustainability - creating a culture of social responsibility around the conservation of resources and creating a foundation for environmental stewardship.*
- *Diversity and Equity - maintaining an equitable multicultural environment where all aspects of diversity are appreciated and respected.*

The College's mission statement and core values provide a foundation that forms and guides institutional decisions and actions. The mission describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement. It emphasizes the importance of an engaging learning environment and academic excellence, and addresses a core value of sustainability.

The mission statement and core values address all four aspects of the standard.

1) The institution's **educational purpose**: Honolulu CC provides "educational opportunities through an engaging learning environment that values academic excellence and personal growth...." The core values of being student-centered and student-focused support this concept.

Honolulu CC provides formal general education and transfer curriculum, workforce training, and lifelong learning opportunities. The College is a center for cultural, artistic and athletics

2) The **student population**: Honolulu CC provides the opportunities to "all students, with a *kuleana* (responsibility) to Native Hawaiians and our community." The core values bolster this concept by being indigenous-serving and with diversity and equity.

Students attending Honolulu CC are remarkably diverse including recent high school graduates, students returning to postsecondary education after raising families or securing work, individuals seeking to enter or retool for the local workforce, veterans and second language learners. The institution's mission is to help each of the students

meet their unique educational objectives. (*See Introduction*)

3) ***Types of degrees and credentials:*** Honolulu CC addresses the needs of the community “through career, liberal arts, technology, transfer, and professional training programs.” Both the core values for student-centered and student-focused learning as well as building community and industry partnerships support this initiative. (*See section II.A*)

Each year, Honolulu CC awards approximately 900 degrees and certificates, with about 515 students transferring each year to private and public institutions both in Hawai'i and in other states and nations. Career and technical education is robust at Honolulu CC with 25 programs. The programs are built under an umbrella of state policies and regulations that assure rigor and breadth. The college courses are articulated to the state university curriculum patterns and local private institutions regularly accept Honolulu courses for transfer credit. (*See Introduction, section II.A.14*).

4) ***Commitment to learning and achievement:*** Honolulu CC envisions its education as providing the “personal growth of all students.” This commitment is supported by the student-centered and student-focused core value.

The College examines the learning competencies in knowledge, skills and abilities gained at all learning levels, both within and outside the classroom, through formal student learning assessment (*See section II.A.3, section II.C.2*).<sup>4</sup> Moreover, the college examines student success at key milestones along the educational pathway and at regular completion points, setting standards for institutional performance (*See section I.B.3, ER11*) and completing regular program review. (*See section I.B.9*)<sup>5</sup>

Student success is a specific goal of the strategic plan ([I.A.3 \[pp. 4-6\]](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. The College's mission accurately describes the institution's broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement. The reflection on the mission has informed the college's consideration of increased, purposeful engagement, to help students reach their educational goals.

---

<sup>4</sup> ACCJC Glossary, Learning.

<sup>5</sup> ACCJC Glossary, Achievement.

[I.A.2](#) The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.

---

#### Evidence of Meeting the Standard

The College bases its institutional priorities and the needs of students on effective use of data.

Data is collected systematically by the institution's Office of Policy, Planning, and Institutional Research (PPIR), which compiles a yearly fact book, issues periodic data briefs, and provides other data analysis to the campus.

The *Honolulu Community College Fact Book 2017* ([I.A.2](#)) includes data on student demographics, student achievement data, course success rates, retention, degree and certification completions, four-year college transfer rates, among other information.

PPIR office supports the mission of the college by providing accurate, timely, and reliable information to respond to the needs of various institutional constituencies. In addition, the PPIR office works with the college's Assessment Task Force to engage in and support processes for determining and documenting the effectiveness of programs and services and of the institution as a whole to foster continuous quality improvement.

The Integrated Planning, Resource Allocation, and Assessment policy ([I.A.4](#)) is integral to clarifying the educational momentum of the College and demonstrates the connection between the mission and the strategic plan. The policy is in line with the University of Hawai'i Community Colleges policy on Strategic Academic Planning ([I.A.5](#)). The common mission for the University of Hawai'i as stipulated by the Board of Regents ([I.A.6 \[p. 1\]](#)) includes goals of providing the people of Hawai'i equal opportunity for quality college education and embracing responsibility to the indigenous people of Hawai'i as well as the indigenous language and culture. These goals are reflected in Honolulu CC's mission and strategic plan. These values also are reflected in the University of Hawai'i Community Colleges' Strategic Directions, 2015-2021 ([I.A.7](#)).

The Planning Council charter ([I.A.8](#)) outlines the committee's scope to organize annual reviews and updates of the College's strategic plan, integrating assessment and program evaluations. The committee also reviews the mission statement, set standards, and

supplementary program funding, and monitors the processes related to institutional research and institutional effectiveness. The Planning Council reviews and updates the strategic plan, integrating assessment and program review, which are integrated into the decision-making process. The council endeavors to align the campus and other decision-making bodies in making decisions for student learning and student achievement.

The Planning Council articulates how data is used in determining how effectively the College is accomplishing its mission. For example, the Assessment Task Force has developed SLO-PLO-ILO mapping to achieve more comprehensive understanding of course assessments. The College also piloted Ad Astra (I.A.9) for the community college system to strategically offer courses at the best times for students and used the Velocity tool to bring in new frameworks for managing assessment.

The institution uses assessment results to set institutional priorities and improve practices and processes toward meeting the mission.

Institution-set standards are examined and whether the institution is meeting these set goals is evaluated. Moreover, prioritization of the groups is also reflected in future planning and projection, as shown in the Educational & Strategic Plan 2016-2021 (I.A.3), which is aligned with the UHCC and UH System plans (I.A.10, I.A.25).

The Hulili Ke Kukui Hawaiian Center infuses the educational experience at the College with place-based learning, and the college has begun working toward becoming a model indigenous-serving institution. The Title III Grant, Ho'ala Hou—Renewing a Pathway to Student Success Through Culture-Based Learning—both establishes an enrollment pathway to the college for Hawaiian students and a program of faculty, staff, and administration development involving infusing Hawaiian culture in teaching, learning, and service, in order to support student success and completion. The institution has implemented these structures and processes to assess how well it is meeting the mission.

Also new to the mission statement (core values) finalized in 2017 (I.A.11) and the Educational & Strategic Plan 2016-2021 is the goal of sustainability. The 2016-2018 Honolulu CC Sustainability Implementation Plan (SIP) includes specific energy reduction and renewable targets to meet the UH System Executive Policy mandate to increase energy efficiency and reliance on renewables (I.A.12 [p. 5]). To aid in meeting these targets, the College's strategic plan identifies measures of campus resource usage and emissions to be compiled and reported (I.A.3 [pp. 13-14]). A Greenhouse Gas Inventory was issued in 2016; an updated report will be issued for academic year 2017-2018. Additional processes for systematic collection and reporting of campus achievement of sustainability goals are under development. Reports will be issued under

supervision of the Sustainability Coordinator. In addition, continued growth in the number of Honolulu CC Sustainability Designation courses is reported bi-annually to the UH Office of Sustainability.

### Analysis and Evaluation

Honolulu CC meets this standard. The College uses data from a variety of sources to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the education needs of students. The College uses the strategic plan and the statewide reporting on performance based measures on the Hawai'i accountability scheme to assess progress on the mission. Additionally, the institution set standards identify the floors of expected performance as well as aspirational goals. The review of these data have informed both the QFE action projects. *(See QFE 1, Purposeful Engagement for Student Success).*

**I.A.3 The institution's programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.**

---

### Evidence of Meeting the Standard

Honolulu CC is a student-centered and student-focused college. The programs and services aligned with its mission evolve from this primary assumption, as does institutional decision-making, planning, and resource allocation, which then inform institutional goals for student learning and achievement.

The College collects data on the student population and its needs. It uses these data to determine the kinds of programs and services that best accommodate our student population. Academic and non-academic student services support success in these programs. These programs and services are aligned with the College's mission and contribute to student learning and student achievement.

Assessment at the instructional level is aligned with program and institutional outcomes. The Program Review process is designed to ensure that programs and services are consistent with its mission. Data collected from these reviews guide the institution in making necessary improvements in student learning and achievement. Student

Learning Outcome (SLO) assessment results influence decision-making, planning, and resources allocation. Program Review assessment results and course SLO results are factored into budget requests, which must demonstrate alignment with the College's mission ([I.A.13 \[Section II\]](#), [I.A.26](#)).

The College's commitment to General Education, a commitment to ensuring that students acquire a broad and comprehensive education, whether in Liberal Arts or Career Technical Education, is reflected in its Institutional Learning Outcomes (ILO), which are published in the college catalog ([I.A.1 \[p. 15\]](#)).

In 2014, the Planning Council revised its Institutional Learning Outcomes (ILO) based on the consensus that the existing ILOs were unsuitable for assessment. The ILOs reflect the mission of providing "educational opportunities through an engaging learning environment that values academic excellence and personal growth." The ILOs too are consistent with an institution of higher learning: Critical Thinking, Information Literacy, Effective Communication, Quantitative Reasoning, Career Preparation, and Community Awareness and Social Responsibility.

The mission statement defines who we are. The core values address why we do what we do. The ILOs describe how we meet our mission.

Department, instructional, and student services units assess student learning, student achievement, and efficiency measures to review performance and goals met and unmet. Necessary adjustments, including proposed initiatives, often including grant proposals are based on the analysis of data. This influences decision-making regarding existing funds, requests for new funds, and resources allocation. Personnel across the campus understand and participate to further the mission of the College [See Standard IV B.4].

### Analysis and Evaluation

Honolulu CC meets this standard. The intended student population, its demographics and educational goals, described in the mission statement, is directly related to the programs and services offered by the College. Instructional, Program, Services, and Institutional review processes demonstrate alignment with the mission statement. The mission statement influences planning, decision-making, and resource allocation. Committees like the Planning Council monitor and facilitate compliance with the mission and the strategic plan. The college will focus on student engagement as a key area of study for its quality focus essay, action project 1. (*See QFE 1, Purposeful Engagement for Student Success*).

I.A.4 The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary.

---

#### Evidence of Meeting the Standard

The Planning Council, as stipulated by its charter, reviews the mission statement annually and makes revisions when appropriate (I.A.8). The Planning Council revised the mission statement in Fall 2016 (I.A. 14) and after extensive campus-wide discussion and vetting by governance committees and other constituencies (I.A.15, I.A.16), adopted the current mission statement in Fall 2016 (I.A.17). Attempts to translate the mission statement into Hawaiian proved to be a challenge. Some of the words in the statement do not easily translate into Hawaiian. However, the translation was completed and sent to the Board of Regents for approval (I.A.11).

The University of Hawai'i Board of Regents approved the mission statement and its Hawaiian translation in May 2017 (I.A.18). The mission is published in the college catalog (I.A.1 [p. 15]). The mission statement can also be found on the Honolulu CC website (I.A.19) and on bulletin boards around the campus.

In the 2017 Self Study Survey for Faculty, Staff, and Administration, 94.1% of respondents indicated that they strongly agreed or somewhat agreed that they knew and understood the College's mission. About 60% of respondents also agreed the mission is communicated outside the institution (I.A.20 [pp. 8, 10]). Among students, 64.81% strongly agreed or somewhat agreed that the mission is clear (I.A.21 [p. 12]). And yet, when asked about the various components of the mission, the positive responses were significantly higher (I.A.20 [pp. 8-11]).

The College is exploring strategies for communicating the mission outside the campus, especially in the community most served by the College. Efforts to address this issue through the use of social media have been discussed and implemented (I.A.22). The College has also recognized the importance of building partnerships with alumni to raise awareness, reputation, and good will in the community (I.A.23).

#### Analysis and Evaluation

Honolulu CC meets this standard. The mission statement is published in print and on

the College website. The Board of Regents approved the mission statement. The Planning Council has primary responsibility for reviewing the mission statement on an annual basis and revising it when deemed necessary. Once revised, governance committees vet the mission statement before being submitted for approval by the Governing Board.

## **Standard I.B: Assuring Academic Quality and Institutional Effectiveness**

I.B.1. The institution demonstrates a sustained, substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.

---

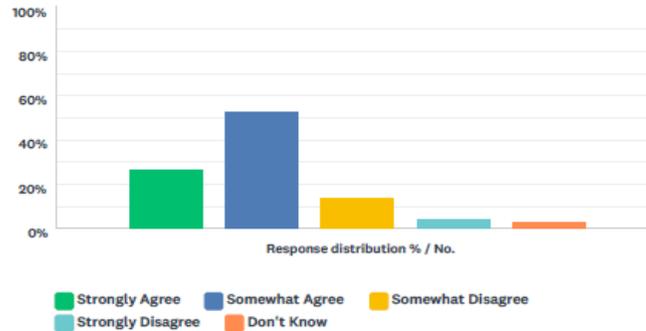

### Evidence of Meeting the Standard

Honolulu CC recognizes the importance that dialog and conversation about data plays to make meaningful use of evidence in decision-making and resource allocation to improve student learning and success. The college fosters dialog in a variety of settings, both face-to-face and virtual, providing multiple opportunities for all members of the college to participate in dialog through town hall meetings and through moderated and un-moderated email lists. The college provides an Intranet system for archiving and disseminating information that can be accessed by all members of the institutional community, and can be edited by committee chairs and recorders.

Committee minutes are posted online ([I.B.1](#)), and key campus-wide committees including the Faculty Senate Executive Committee (FSEC), the Staff Senate Executive Committee (SSEC), and the Planning Council also post meeting minutes for the campus to view. In addition, members of committees whose job is to report to, or collect information from constituents and stakeholders communicate using both email and the college Intranet, and solicit information via email. A majority of faculty and staff who participated in the survey agree that the Campus engages in substantive and collegial dialog regarding continuous improvement of student learning ([I.A.20](#)).

**Q14 The campus has demonstrated a sustained substantive and collegial dialogue about continuous improvement of student learning and achievement.**

Answered: 172 Skipped: 14

	STRONGLY AGREE	SOMEWHAT AGREE	SOMEWHAT DISAGREE	STRONGLY DISAGREE	DON'T KNOW	TOTAL	WEIGHTED AVERAGE
Response distribution % / No.	26.7% 46	52.3% 90	14.0% 24	4.1% 7	2.9% 5	172	3.05

*Illustration-Standard-I.1 Survey results – campus dialog*

The College's structure for dialog is based on its organizational chart for administration and governance. Communication flows vertically (e.g., from the Chancellor's office to Academic Affairs, from Academic Affairs to Student Services) and horizontally (e.g., between UC college and the Transportation and Trades divisions, among disciplines within a division). The College uses a variety of modes for communicating information and providing opportunities for dialog. These include email, town hall gatherings, committee meetings, chancellor "talk story" hours, assessment showcases, and general college meetings that occur during a semester. Products of the dialog are posted on the College intranet ([I.B.2](#)).

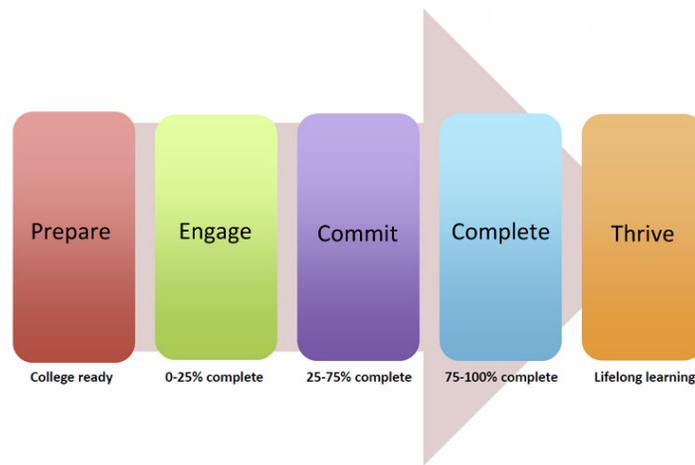

Dialog also occurs through face-to-face meetings (e.g., among members of a discipline), group meetings (e.g., town hall gatherings, showcases, Deans and Division Chair meetings, Planning Council meetings), and online discussions and methods (e.g., Community on Programs and Curricula, General Education Board). The frequency of dialog varies. For example, a campus-wide general college meeting occurs at the beginning of each semester ([I.B.2](#)). The Campus Committee on Institutional Effectiveness (CCIE) and Committee on Student Affairs (COSA) meet once a month. The Deans and Division Chairs Committee (DDC) meets every two weeks.

*Student Outcomes, Academic Quality*

The impact of the dialog on student learning is captured in student learning outcome inventories and assessment ([I.B.3](#)). Learning findings are reviewed at the course, program, and institutional levels by faculty for methodological pedagogical

improvements and curriculum design or improvement. These measure student learning. Completion and passing rates gauge student achievement are analyzed in the Annual Reviews of Program Data (ARPD), Program Review, and the College fact book ([I.B.4](#), [I.A.2](#)).

To evaluate student learning and student achievement, the Campus Student Success Council (established in 2015) became a mechanism to focus discussion and initiatives on student outcomes, student equity, and academic quality. The council uses data and feedback from faculty to make recommendations to the administration about student success and completion as well as helping to implement and do work around different campus or system initiatives related to student success ([I.B.5](#)).

*Illustration-Standard-I.2 Pathways*

Student Success Pathways have been a key focus of the CSSC, discussing ways of improving student outcomes throughout the college experience. For example, in the Prepare stage, entering students are assessed for college readiness to be prepared for success on the first day of classes. Students are to successfully complete pre-college work in math and English within their first semester or year.

### *Student Equity*

Broad and extensive dialog about student equity are ingrained in all campus committees, in line with the mission and strategic plan of the College, which note a responsibility to Native Hawaiians and our community. Specific committees also were establish for discussions of student equity including the Kupu Ka Wai Council (KKW), which has a mission to nurture and to sustain the institution as a Hawaiian place of learning, and the Committee on Social Equity (COSE), which addresses existing and

potential bias issues on age, culture, gender, among issues affecting students, faculty, or staff.

### *Institutional Effectiveness*

The dialog leads to a collective understanding of the importance of using data and research in evaluating student learning. This can be seen in assessment showcases ([I.B.6](#)), annual program reviews ([I.B.4](#)), minutes and reports from the Campus Council on Institutional Effectiveness (CCIE) ([I.B.7](#)), Assessment Task Force (AsTF) ([I.B.8](#)), and the Accreditation Task Force (AcTF) ([I.B.9](#)), which is now represented by the Accreditation Steering Committee ([I.B.10](#)). The College's Educational and Strategic Plan 2016-2021 also provides goals for the institution to achieve in its planning ([I.A.3](#)).

Data from academic and support department is collected and compiled by the institution's Office of Policy, Planning and Institutional Research (PPIR), which disseminates graphics and data sheets to the campus for analysis ([I.B.11](#)). The PPIR also issues an annual fact book ([I.A.2](#)), among other documents. The College is committed to using assessment to improve institutional effectiveness. For multi-campus data, the University of Hawai'i Community Colleges (UHCC) gathers and makes analytical information available ([I.B.12](#), [I.B.13](#)) as well as the University of Hawai'i Institutional Research ([I.B.14](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. The institution has a sustained, substantive and collegial dialog about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. Ample opportunities exist for the college community to participate in dialog and assessments that affect student learning and achievement. Importantly, the conversations lead to improvement and change in systems and processes that improve student learning and achievement. Finally, the faculty and administrative leadership at the College fosters conversations and discussions about evidence. Dialog about student learning and achievement in the pathway has informed the engagement and distance education action projects in the QFE. (*See QFE 1, Purposeful Engagement for Student Success*).

[I.B.2](#). The institution defines and assesses Student Learning Outcomes for all instructional programs and student and learning support services. (ER 11)

## Evidence of Meeting the Standard

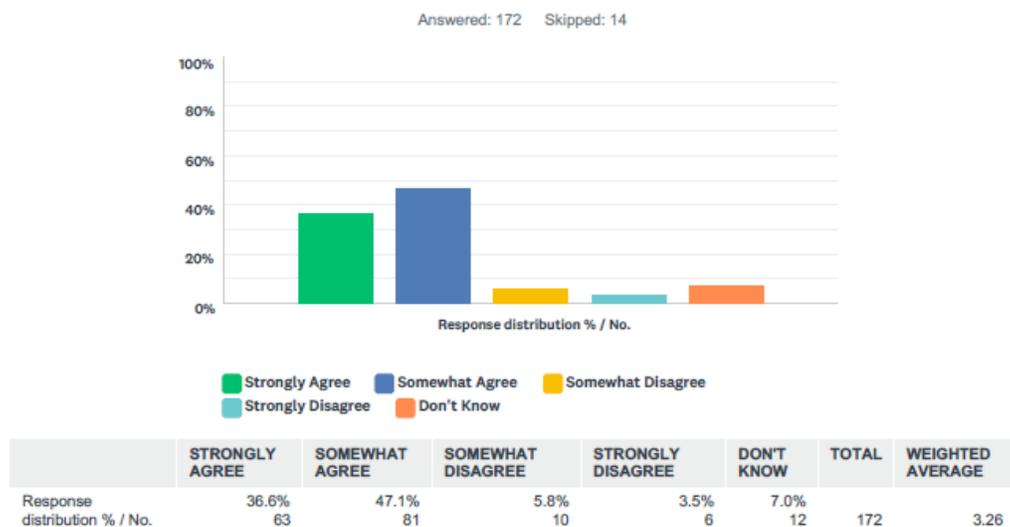

### *Learning Outcomes*

The College created an official institutional assessment structure in 2001 by introducing Student Learning Outcomes (SLO) in instructional units. By 2005, after the development of the Planning Council, the College required all courses to have SLOs and began the development of Service Area Outcomes (SAO) for non-instructional units. The Planning Council also developed Program Learning Outcomes (PLO) for all instructional units of the College, and mandated a schedule and structure for Program Review.

By 2012 the College successfully integrated SLOs into all instructional programs, and instituted Program Review across all College units. SAOs were developed. Next, the College revised its Institutional Learning Outcomes (ILO) and finally its mission statement. Outcomes highlight skill and knowledge competencies at the various stages of learning: course, program, and institutional. .<sup>6</sup>

The survey results below indicate that the overwhelming majority of faculty and staff agree that the institution defines and assesses SLOs for instructional programs and student services.

**Q15 The institution defines and assesses student learning outcomes for all instructional programs and student and learning support services.**

<sup>6</sup> See, ACCJC Glossary, Learning

*Illustration-Standard-I.3 Survey results – campus assessment*

The College worked to assess SLOs, SAOs, and PLOs across all units. The College also endeavored to clarify the relationships between SLOs to PLOs and PLOs to ILOs, thus creating an atmosphere of data-driven continuous improvement from the course and service to the institutional level. Constituents review assessment of all outcomes to "close the loop," making changes to improve areas where outcomes are not met and striving for successful achievement of goals.

*Curriculum Development and Learning Outcomes*

Faculty serve on curriculum committees to develop and evaluate courses, programs, and certificates. Academic support groups, student services, and other campus units also gather and monitor evaluations of their services. The Annual Reviews of Program Data (APRD) are completed each fall.

Faculty complete course SLO assessment each semester. The procedures require faculty to close the loop in their reports by showing what adjustments have been made to improve the outcomes of student achievement. This process guides improvement of courses and programs. The Institutional Assessment Specialist gathers and compiles all the data for comprehensive review.

As a part of curriculum development, learning outcomes are organized into a hierarchy, course SLOs nested under PLOs, which are nested under ILOs. Course SLOs are mapped to PLOs in the campus' curriculum management software Quali CM, and as part of assessment activities, all PLOs have been mapped to ILOs ([I.B.15](#)). The curriculum maps for each program highlight the student outcomes on the pathways to graduation.

The college mandates SLOs for all courses, PLOs for all programs, certificates, and degrees on both the credit and non-credit sides of the institution. The College also mandates that all non-instructional and administrative units have SAOs related to their mission that are aligned with ILOs. All PLOs must also align with one or more of the ILOs for the College as a whole.

The Committee on Programs and Curricula (CPC), which is the highest curriculum body on campus, requires all instructional programs to maintain and publish PLOs and SLOs ([I.B.16](#), [I.B.17](#)). Curriculum development is incorporated into the mission and purpose of the University of Hawai'i System ([I.B.18](#)). The CPC is a committee that operates under

the Faculty Senate Executive Committee (FSEC) as noted in its reference manual and charter ([I.B.19](#), [I.B.41](#)).

SLOs for courses are approved by the CPC. The CPC is in the process of moving paper archives to its new electronic KSCM curriculum management program, which is used for approval of new and modifications of courses and programs.

SLOs also are the basis for evaluating whether courses fit within core requirement areas, including Writing Intensive, Foundations, and Diversifications designations. SLOs are mapped to PLOs and ILOs ([I.B.19](#)). A full-time Assessment Specialist was hired on August 1, 2017. In Fall 2017 the coordinator began holding departmental workshops and one-on-one consultations within 6 instructional and 6 non-instructional divisions on SLO/SAO assessments (e.g., methods, data collection/analysis, implemented actions, and planned resolutions for the future) and is facilitating the design of content and timeline for cycles of SLO/SAO assessment as well as distinct PLO and ILO assessment.

In addition, the coordinator is supporting the creation of processes to streamline SLO/SAOs, PLOs, ILOs across all campus platforms (e.g., syllabi, KSCM, website, other databases).

The campus is evaluating assessment-specific reporting systems to launch a comprehensive assessment effort. The specialist is a resource for trainings on assessment-related topics (e.g., transforming course objectives into SLOs; creating rubrics; conducting analysis; mapping SLO-PLO-ILO; entering data) ([I.B.20](#)).

All non-instructional units of the College are required to maintain SAOs, the non-instructional equivalent of SLOs, for all activities ([I.B.21](#)). All SAOs are inventoried annually and used as the basis for closing the loop in regard to the Annual Report of Program Data that is used for the College's Program Review process. These SAOs are therefore the basis of the measurement of success for all non-instructional activities on campus, and their evaluation provides service units with ways to continuously improve their services to students and to the campus. They are also the basis for budget requests for all units. In this way, assessment is built into the core of the non-instructional organization of the College. Learning outcome assessments are the basis for regular evaluation of all courses and programs, including non-credit instruction, student services, and learning support services.

### *Distance Education*

In addition to classroom-based courses on the College campus, The Distance Education Advisory Committee (DEAC), and Distance Education Coordinator oversee the

development of courses offered in Distance mode ([I.B.22](#)). Distance course descriptions, student learning objectives, and Diversification and Foundation designations (the University of Hawai'i System Core Curriculum) are subject to the same policies and institutional processes that guide the development and evaluation of traditional courses. However, Distance courses are also subject to an application and evaluation process specific to the mode of delivery ([I.B.23](#)). This process is designed to ensure that faculty teaching Distance mode courses fulfill both the SLO and assessment requirements of the relevant discipline, but also offer courses via Distance Education that are substantially the same as classroom-based courses in terms of content, interaction, teaching methods, and outcomes. To do this, the DEAC monitors all newly approved courses for an entire semester to be certain that they are operating according to DEAC set standards for delivery and interaction. Courses that do not meet the standard are removed from the Distance mode offerings at the College ([I.B.23](#))

The DEAC has established standards for quality in distance courses. In the interest of maintaining a standard of excellence in education, correspondence courses are not offered at the College. The College has also nearly finished eliminating cable television-based courses, and has concentrated delivery of all new distance courses on the Internet. This allows the College to maintain more rigor in delivery, more opportunities for interaction between distance faculty and their students, and more control over the standard parts of the courses, including the Laulima Gradebook, the Syllabus tool, and the Announcements tool. Such standardization has allowed the College to provide consistently high-quality distance courses in which students can always reach the instructor, know where they are in the course, and be assured that they are receiving the same rigor as the course includes in the physical classroom. Quality and continuous improvement of distance courses is facilitated by the fact that a majority of faculty who serve on the DEAC also teach distance education courses. The assessment process requires instructors to evaluate courses in any mode of delivery. All Honolulu CC distance courses are subject to an application and regular evaluation process at three-year intervals that is specific to distance education.

The College works toward continuous improvement through this system in two key ways: by working to continuously close in on achievement of outcomes already set through constant evaluation and adjustment, and through the evaluation of the outcomes themselves to determine whether outcomes have been met and need to be replaced by new outcomes, to learn whether changes in fields, student and institutional needs, and economic and social context require reevaluation of the mission of a unit and hence changes in outcomes and methodology. The college thus expects this system to carry it forward into the future through a continuous adjustment to higher education needs and contexts. One key to the consistent usefulness of this system will be to

maintain and expand the College's commitment to communication between all constituencies.

### Analysis and Evaluation

Honolulu CC meets this standard. The College requires that all units, whether instructional or non-instructional maintain a clear set of outcomes and assess those outcomes with the goal of continuously improving performance. The SLOs, SAOs, PLOs and ILOs are clearly defined, publicized, aligned, and drive the performance initiatives carried out at all levels and units. Further, evaluation of achievement toward all outcomes is done through data gathering and analysis, which drives conversations within disciplines and service units and across campus. Decisions on what and how to change result from those conversations, and are then evaluated in turn to close the loop by addressing issues of concern and then evaluating the solutions.

[I.B.3 The institution establishes institution-set standards for student achievement, appropriate to its mission, assesses how well it is achieving them in pursuit of continuous improvement, and publishes this information.](#)

---

### Evidence of Meeting the Standard

The College has established institution-set standards for student achievement and student success to assess how the college is maintaining those measures with the effort to continually improve. The results of the set standards are published by the Office of Policy, Planning, and Institutional Research (PPIR) in a fact book on the College website.

#### *Institution Set Standards*

The components of the set standards are determined by UHCC policy ([I.B.24](#)) so the data can be compiled for all the Hawai'i community colleges. The goals cover targets set from 2016 to 2021, with data compiled by the University of Hawai'i Institutional Research and Analysis Office (IRAO). Set standards establish criteria for student achievement ([I.B.24](#)) for the College to set its priorities and actions. The College is committed to improving student achievement and student success in line with its

mission. The standards identified by the state follow the Commission model for system driven measures for performance review.<sup>7</sup>

The standards include

- Course completion
- Degrees and Certificates Awarded
- Native Hawaiian Degrees and Certificates Awarded
- Pell Recipient Degrees and Certificates Awarded
- Transfer to Baccalaureate Institutions
- Integrated Postsecondary Education Data System (IPEDS) Student Success Rate
- Licensure and Certification Examination Success Rate
- Job Placement Rate<sup>8</sup>

The achievement goals are set as specific yearly percentage increases on the baseline values, which are determined differently for different standards. A complete discussion of the college's performance indicates is found in the Introduction Section of this report.

The College discusses course completion, program completion, and other student success initiatives at General College Meetings, at presentations by the Vice President of the Community Colleges, in Campus Student Success Council meetings, Planning Council meetings, among other venues. The Planning Council reviews the set standards each year ([I.A.8](#)). As the targets are set by UHCC, The Vice President of the Community Colleges also visits the campus each year to review the campus performance ([I.B.25](#)). (ER11)

### *Performance Based Initiatives*

These discussions have been instrumental in helping the College meet all of its performance initiatives ([I.B.26](#)) for fiscal 2018, which overlap with the set standards. In most cases the College exceeded the targets. These targets include

- Degrees and certificates
- Native Hawaiian degrees and certificates
- STEM degrees and certificates

---

<sup>7</sup> See, ACCJC White Paper, I.B.3 and I.B.6

<sup>8</sup> (See, Checklist for Evaluating Compliance with Federal Regulations and Related Commission Policies, Student Achievement)

- Pell Recipients degrees and certificates
- Transfers to 4-year colleges

The UH System has additional measures for the campus to achieve (I.B.27) and the College met nearly all of them. The UH System also provides the campus with a scorecard (I.B.28).

The institution’s fact book (I.A.2 [p. 36-103]) details set-standard metrics aligned with the College’s strategic plan. The Fact Book includes student achievement data disaggregated for major, gender, and ethnicity.

Illustrations from the Fall 2017 survey (I.A.20) indicate that a majority of faculty and staff surveyed agree that the institution sets standards for student achievement, sets standards appropriate to the mission and assesses their achievement, pursues continuous improvement, and publishes assessment results and how the results are used for continuous improvement.

*Illustration-Standard-I.7 Survey results – publishing assessment information*

The survey shows how much faculty and staff are aware of the importance of the set standards and how they are used to improve student achievement in line with the mission of the institution ([I.A.20](#)).

*Locally Identified Measures*

In addition to the federal and state identified areas of performance measurement, Honolulu CC has identified measures that are important to the community that we serve and are unique to the college mission. ...

Analysis and Evaluation

Honolulu CC meets this standard. As part of the Hawai'i Community College system the college participates in a broad scheme of using performance measures for evaluating performance as well as for goal setting. The institution considers federal, state and local measures to guide its progress on the mission. Moreover, adjusting the institution-set standards to accommodate needs for change in programs, college goals, and economic and social realities will become a part of the overall assessment process of the college. Making certain that the standards meet the mission, and that the mission meets community and UHCC needs and goals is the key to closing the loop on the College's performance vis-à-vis the State of Hawai'i and the students who attend. (See QFE 1, Purposeful Engagement for Student Success, QFE 2, Enhanced Support for Distance Education Students).

#### [I.B.4 The Institution uses assessment data and organizes its institutional processes to support student learning and student achievement.](#)

---

##### Evidence of Meeting the Standard

Assessment data drives the College's planning to improve student learning and student achievement. Student achievement is discussed at the General College meeting at the beginning of the fall and spring semesters and the Vice President of Community Colleges visits the campus each semester to discuss achievement results for institutional set-standards, performance initiatives, strategic plans, and other objectives. As part of UHCC, the College also participates in multi-year national scale efforts such as Achieving the Dream, which tracks other has measurable goals for improvement ([I.B.29](#)).

In addition to the Honolulu CC's Office of Policy, Planning, and Institutional Research (PPIR), the UHCC provides assessment data for all the seven community colleges. Data is provided for student achievement and student success as discussed in I.B.3 and for ARPD (Annual Review of Program Data). PPIR publishes a fact book of data about student demographics, student achievement, and instructional programs ([I.A.2](#)).

Program reviews are conducted each year, based on data provided for each program (ARPD). The reviews analyze the data to determine the strength of the program and address strategies for improvement. These program analyses are made available to the campus and used for requests in supplementary program funding that is overseen by the Planning Council. Decision on the funding encompasses the other major governing committees, including the Faculty Senate Executive Committee (FSEC), Staff Senate Executive Committee (SSEC), Kupu Ka Wai Council, and Student Government, which review the ARPDs as part of the process.

The Institutional Assessment Specialist, hired in fall 2017, is tasked with collecting and organizing assessment data information that is used by campus units and committees as part of a process to support student learning and achievement. Instructional divisions discuss discipline and course level assessment data as well as the ARPD.

Non-instructional units discuss the assessments of services they provide and include the results and plans in their ARPD analyses.

The campus has held showcases and workshops periodically over the past years to inform the campus about assessment strategies and techniques, but from fall 2017, the Institutional Assessment Specialist began systematically organizing workshops for the campus and departments, and working with department representatives on the Assessment Task Force.

In recent semesters the restructuring of math and English courses has been instituted across those programs based on assessment of student achievement, and the results are being monitored to evaluate the success of the instituted changes.

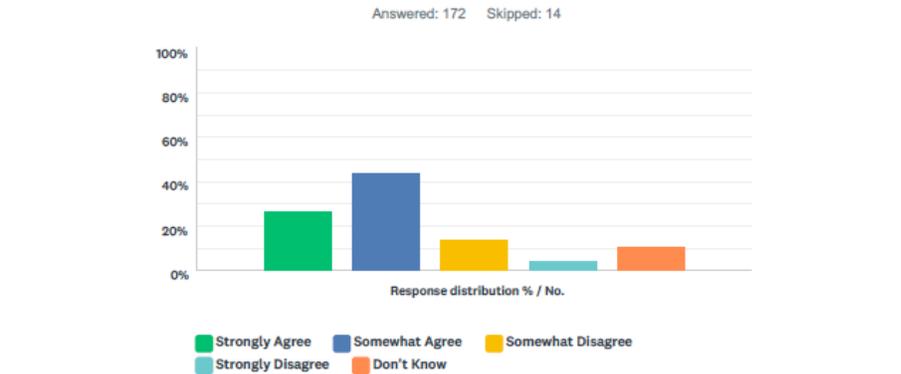

Based on student achievement data, the English and math programs redesigned developmental courses to improve student achievement by the shortening the time to completion of college-level courses. Low success rates spurred the change.

The English program, for example, eliminated developmental education classes in Fall 2016, moving to a co-requisite model putting all students in college-level ENG 100 courses. Of the 434 students who enrolled in the lowest developmental level class between fall 2013 and spring 2016, only 24.88% successfully completed ENG 100 by fall 2016. Of the students who enrolled in co-requisite ENG 100/100T in fall 2016, 61.24% successfully completed the course ([I.B.42](#)).

In an effort to improve student achievement, the College, along with the other community colleges, moved from placement testing to high school grades, grade point averages, SAT, ACT, or other scores to determine appropriate first-semester English and math courses. The UHCC gathers the data for English and math to assess which of the multiple measures are most effective for placement. As part of the process, a UHCC Cognitive Assessment Committee meets each year to review the measures and adjust them if needed. The committee met in December 2017 and proposed several adjustments to the placement measures ([I.B.30](#)).

Data assessment and analysis drives college planning to improve student learning and student achievement. A majority of faculty and staff participating in the campus survey agreed that the institution uses assessment data and processes to support learning and achievement.

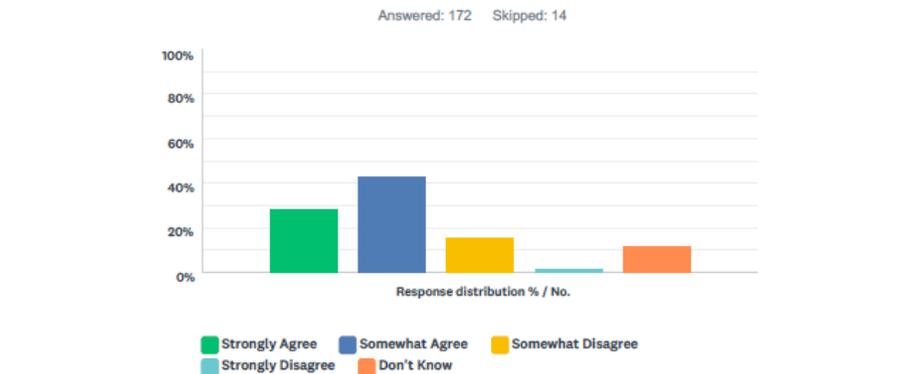

Q20 HonCC uses assessment data to support learning and achievement.

	STRONGLY AGREE	SOMEWHAT AGREE	SOMEWHAT DISAGREE	STRONGLY DISAGREE	DON'T KNOW	TOTAL	WEIGHTED AVERAGE

*Illustration-Standard-I.8 Survey results – using assessment data*

Q21 HonCC uses its institutional processes to support learning and achievement.

	STRONGLY AGREE	SOMEWHAT AGREE	SOMEWHAT DISAGREE	STRONGLY DISAGREE	DON'T KNOW	TOTAL	WEIGHTED AVERAGE
Response distribution % / No.	27.9% 48	43.0% 74	15.7% 27	1.7% 3	11.6% 20	172	3.10

*Illustration-Standard-I.9 Survey results – using institutional processes*

The Office of Planning, Policy and Institutional Research (PIIR) assists in the assessment of student achievement, including enrollment and transfer rates for which data briefs are periodically reported through the campus public web page ([I.B.31](#)). These data sheets stimulate discussions in the Campus Student Success Council (CSSC), among other committees ([I.B.32](#)). PIIR also provides specific or customized data to administration, divisions, departments, and other units for analyzing programs, courses, student success, or other operations of the institution. The CSSC includes a data group tasked to specifically analyze ways to improve student achievement. The

PPIR's comprehensive fact book further provides assessment data to help guide initiatives ([I.A.2](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. The College gathers assessment data and uses the assessment information to organize its processes to support student learning and student achievement. The college research office provides critical information to all constituent groups in a variety of settings and levels of analysis to guide decision-making. The planning and governance systems support the use of evidence providing venues and voices to the analysis of data. As a result, the college keeps central the use of evidence for making decisions and fosters a culture of inquiry for the institution.

[I.B.5 Institutional Effectiveness: The institution assesses accomplishment of its mission through program review and evaluation of goals and objectives, Student Learning Outcomes, and student achievement. Quantitative and qualitative data are disaggregated for analysis by the program type and mode of delivery.](#)

---

### Evidence of Meeting the Standard

The College has both an annual and a five-year program review schedule. Each academic year, each program assesses data generated by institutional research, and then writes a description of the program and its goals (program learning outcomes) in an Annual Review of Program Data (ARPD) analysis ([I.B.4](#), [I.B.36](#), [I.B.37](#), [I.B.38](#), [I.B.39](#), [I.B.40](#)). This report reviews assessments of program effectiveness in reaching those goals. This report is reviewed by the deans and becomes the basis for supplementary funding requests. (*See Standard I.A.2; I.A.3*)

Every five years a program goes through (on a revolving basis) a more comprehensive review built upon the ARPD. This review summarizes the program success in meeting program learning outcomes (PLO) and charts a long-term plan for program improvement and change if necessary. University of Hawai'i Community Colleges (UHCC) system uses common data sets for annual assessments and program reviews.

A Program Review process has been in existence at Honolulu CC since 2005. The Program Review information and data collected is available to the public, and drives the processes of program funding and program improvements by "closing the loop." The Program Review process is the end result of assessment done at every level in instructional, non-instructional, and administrative units of the College organizational structure. Faculty use Student Learning Outcomes linked to Program Learning Outcomes to design curriculum and evaluate its effectiveness. Non-instructional units use Service Area Outcomes to determine their service objectives and measure those objectives.

The Process of Program Review is used to evaluate the success of those objectives from the point of view of student success during college, student retention, transferability, and employability. These are all rolled into the Program Review process, through which each unit of the College has the opportunity to analyze its direction and rate of success and propose changes, as well as request resources to meet the needs of those changes. The Program Review process is an integral to the way the College works on a daily, semester-by-semester, and academic year basis.

Q22 HonCC uses program review to assess its accomplishment of its mission.

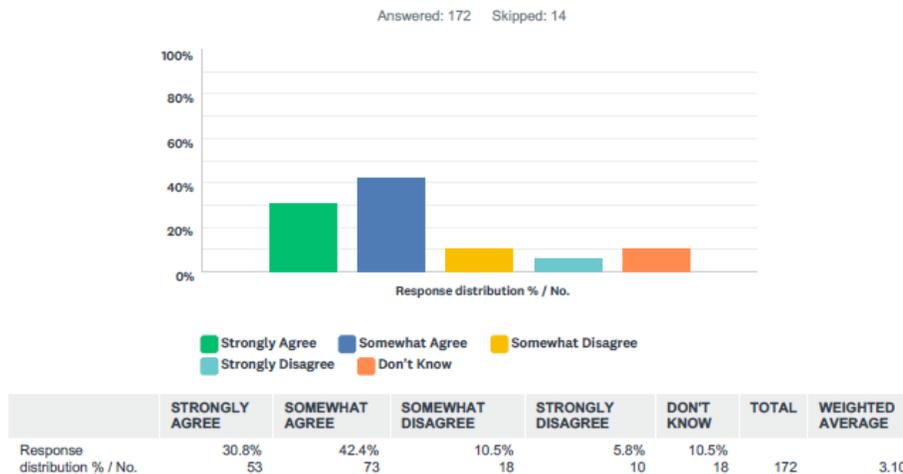

Illustration-Standard-I.10 Survey results – using program review

A majority of faculty and staff participating in the campus survey agree that the campus uses program review and SLOs to assess the accomplishment of the institution’s mission.

Q23 HonCC uses student-learning outcomes to assess its accomplishment of its mission.

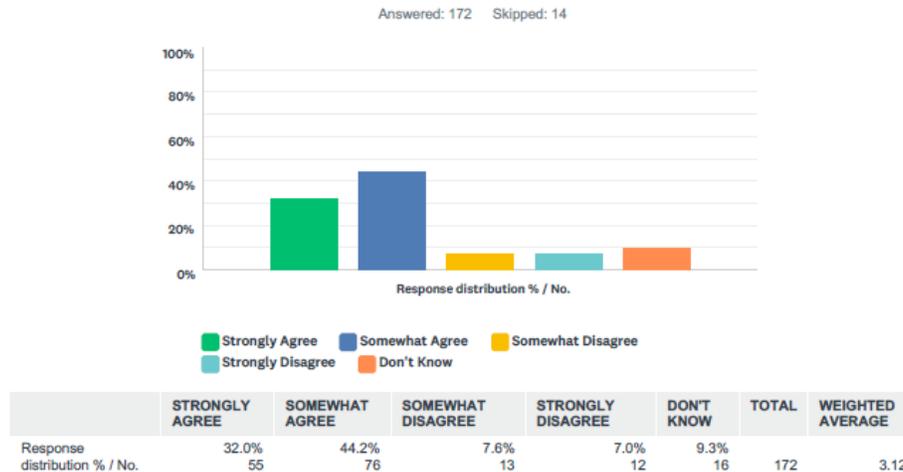

Illustration-Standard-I.11 Survey results – using student learning outcomes

The college has a two-tiered approach to planning, approval, evaluation, and review of courses offered in DE mode. The college does not offer correspondence education. The first review process is the standard curriculum review system designed and led by the faculty at Honolulu CC. Each division plans its courses, and all course additions, changes, and deletions are processed first through Division Curriculum Committees (DCC). Those courses are then sent to the Committee on Programs and Curricula (CPC), which is a campus-wide committee where final decisions on course changes and inclusion in the catalog are made along with decisions on campus-wide curriculum policy.

Once the course has passed through the CPC and therefore officially exists as a course at the college, it can be proposed as a DE course. Such courses must be reviewed and accepted by the Distance Education Advisory Committee (DEAC). This committee meets several times at the beginning of each semester to review and evaluate courses. Courses are subject to members of the DEAC auditing through the first semester so that the committee can see the course in action, and can be recommended for review again at any time. Courses must be re-evaluated every five years to continue to be a part of the DE catalog.

Faculty teaching DE courses evaluate SLOs just as any face-to-face class. The assessment of the SLOs are gathered and can be compared with results of face-to-face classes.

The college has established and uses program review processes for ongoing evaluation of program services using student learning and student achievement data. The processes are used for continual improvement.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution assesses accomplishment of its mission through program review and evaluation of objectives and goals, SLOs, and student achievement. Quantitative data are disaggregated for analysis by the program type and mode of delivery. Qualitative data helps discover new areas and phenomenon facing students as they progress towards their educational goals. The mission of the college drives all of the program and support services and progress on the mission is assessed and changes are made to meet the institution's purpose.

**I.B.6 Institutional Effectiveness: The institution disaggregates and analyzes learning outcomes and achievement for subpopulations of students. When the institution identifies performance gaps, it implements strategies, which may include allocation or reallocation of human, fiscal, and other resources, to mitigate those gaps and evaluates the efficacy of those strategies.**

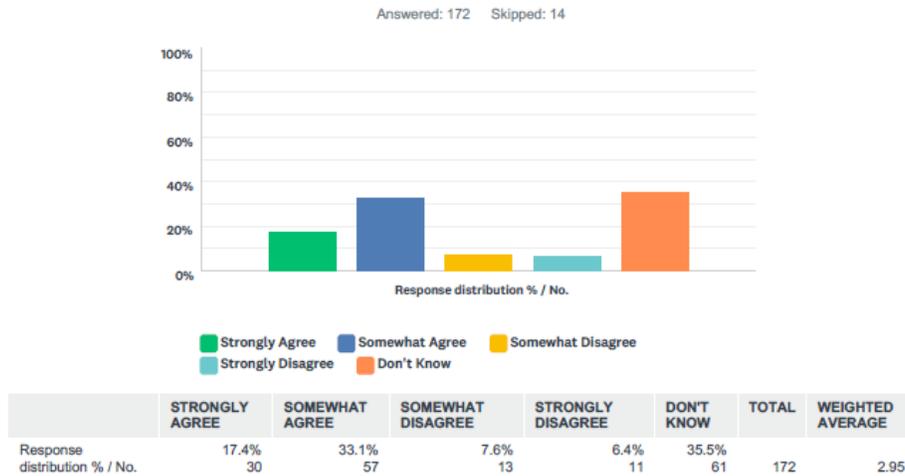

---

### Evidence of Meeting the Standard

The college identifies significant trends among subpopulations of students disaggregated by gender, age range, and ethnicity, among other criteria. Native Hawaiians, PELL recipients, STEM majors, and transfers to 4-year institutions are subpopulations for which key performance indicators have been established ([I.B.24](#)). PPIR updates the data on subpopulations and provides advice on interpreting the data for use in program review and institutional planning purposes ([I.B.31](#), [I.A.2](#)).

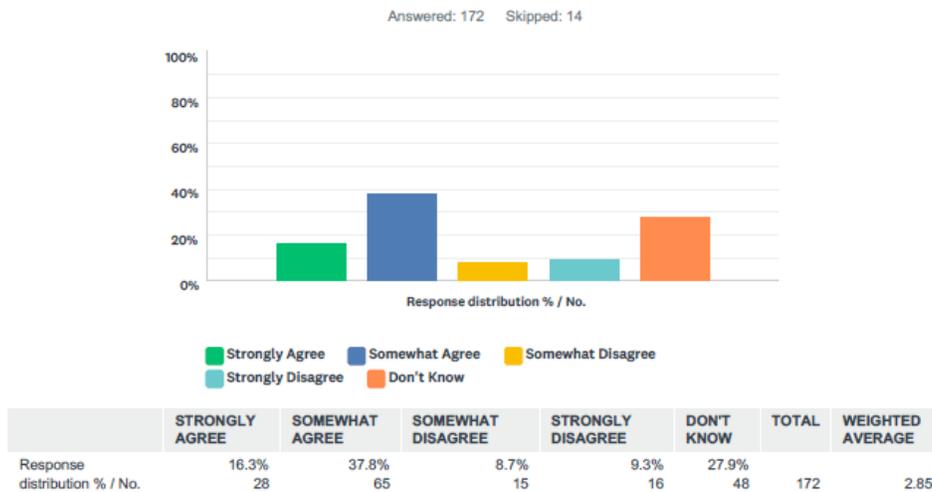

When asked in a survey, a majority of respondents agreed that the campus uses disaggregated data to address performance gaps.

**Q24 HonCC disaggregates data in its analysis of learning outcomes and achievement to analyze its performance.**

*Illustration-Standard-I.12 Survey results – disaggregating data*

**Q25 HonCC addresses performance gaps it finds in these analyses.**

*Illustration-Standard-I.13 Survey results – addressing performance gaps*

After identifying the needs of various sub-populations of students, the College uses the data and college resources to address achievement gaps. Initiatives to improve the achievement of Native Hawaiian students have produced results exceeding targets, as discussed in previous sections. The enrollment and achievement of Pacific Island students was identified as another gap from disaggregated data and addressed by offering a summer English program for students graduating from high school.

The College also analyzes data to identify the needs of other underserved groups such as veterans and students with disabilities. Data-driven assessment helps improve the

success for all students. The institution disaggregates and analyzes learning outcomes and achievement for Native Hawaiian, Filipino, Pacific Island, and low-income students, breaking down the gap analysis further for degrees and certificates in general as well as for STEM fields.

### Analysis and Evaluation

Honolulu CC meets this standard. When the institution identifies performance gaps, as it has in the case of the graduation success rate and academic performance of Native Hawaiian students, the College further closes the loop by assessing the methods used to addressing the gaps. *(Note: This section is no longer needed.)*

**I.B.7 Institutional Effectiveness:** The institution regularly evaluates its policies and practices across all areas of the institution, including instructional programs, student and learning support services, resource managements, and governance processes to assure their effectiveness in supporting academic quality and accomplishment of mission.

---

### Evidence of Meeting the Standard

The College regularly evaluates its policies and practices, assuring effectiveness in maintaining academic quality and accomplishment of the mission. The Chancellor reviews all policies within a five-year cycle as noted in a separate policy for this purpose ([I.B.33](#)). The policies are available to the campus on the Intranet.

The College also is governed by University of Hawai'i, which include system-wide Executive Policies that encompass all 10 campuses in the UH System, system-wide administrative procedures, and system-wide administrative rules. Some of the policies and procedures affect only UH Mānoa, UH West Oahu, or UH Hilo campuses. Also governing the 10 campuses are the Board of Regents policies.

More pertinent to just the seven community colleges are the UHCC policies, which focus on transfer degrees, review of established programs, employee performance evaluations, contract renewal and promotion procedures, financial operation oversight, among other areas. All the UH, Board of Regents, UHCC policies and procedures are available to the

campuses at the UHCC website. These policies also are reviewed regularly, the review dates noted on the policies.

In addition to the policies and procedures, Honolulu CC regularly reviews its programs. All programs provide yearly analysis of their program data (ARPD) and more comprehensive analysis in their five-year reviews.

For campus governance, the Planning Council reviews each academic year the mission statement, institution set standards, institutional learning outcomes, strategic plan, and provides dates to the campus for program review since it is tied to supplementary funding.

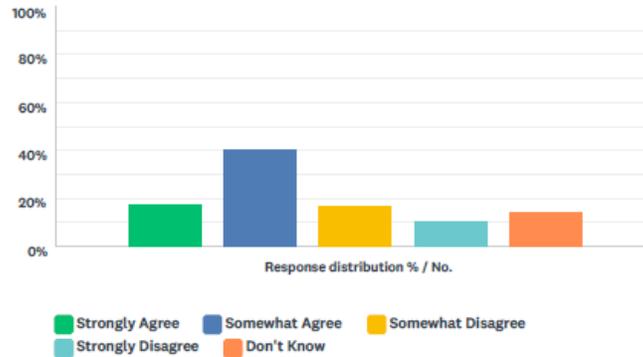

The supplementary program funding process, overseen by the Planning Council, takes place each academic year. All programs or departments, such as learning support services, are eligible to apply for funds that support academic quality. Proposals are tied to the mission, strategic plan, and program reviews to focus on student success and achievement to improve academic quality. The proposals are ranked by the other four governing bodies – Faculty Senate Executive Committee (FSEC), Staff Senate Executive Committee (SSEC), Kupu Ka Wai Council (KKW), and Student Government, ensuring representation by the whole campus. Funds are then allocated in order of the rankings.

The Institutional Assessment Specialist gathers and reviews course learning outcome assessment to promote course and program improvement, which the Committee on Programs and Curricula (CPC) continually discusses and implements new and modified courses and programs to improve academic quality.

The Assessment Task Force meets monthly to review the assessment process, including learning outcome data, data evaluation and similar issues. Assessment workshops provide the College with an understanding of assessment activities in other units, and stimulate discussion in the Deans and Division Chair committee (DDC), FSEC, Planning Council, CPC, and other committees.

**Q26 HonCC regularly re-evaluates its policies and practices across all areas and makes changes where necessary.**

Answered: 172 Skipped: 14

	STRONGLY AGREE	SOMEWHAT AGREE	SOMEWHAT DISAGREE	STRONGLY DISAGREE	DON'T KNOW	TOTAL	WEIGHTED AVERAGE
Response distribution % / No.	17.4% 30	40.7% 70	16.9% 29	10.5% 18	14.5% 25	172	2.76

*Illustration-Standard-I.14 Survey results – evaluates policies and practices*

Analysis and Evaluation

Honolulu CC meets this standard. The College regularly reviews its policies and practices and uses its institutionalized assessment processes at all levels to evaluate its policies and practices. Assessment practices are followed across all areas of the institution, including instructional programs, student and learning support services, resource management, and governance processes.

**I.B.8 Institutional Effectiveness: The institution broadly communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities.**

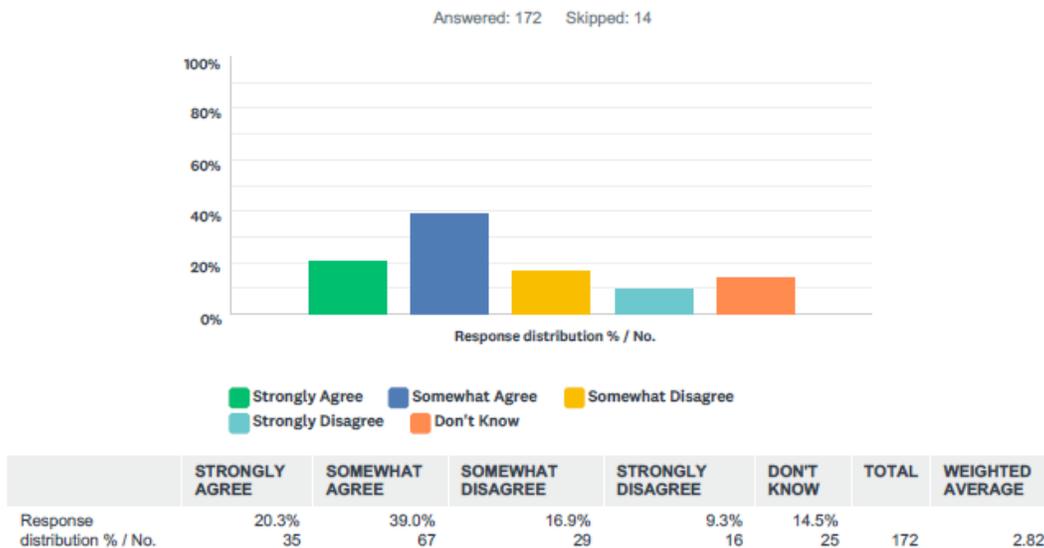

Evidence of Meeting the Standard

Institutional effectiveness metrics are communicated to the campus at the General College meetings at the beginning of the fall and spring semesters. These presentations are all posted on the Intranet for the campus to view ([I.B.2](#)). Each semester the Vice President of Community Colleges visits the campus to discuss the metrics and results, comparing them to the other community colleges, and providing deeper understanding of how they play into the objectives of the UHCC, detailing strengths and weaknesses.

The discussions help the campus focus on improving shortcomings and pushing on with strengths. The visit also allows the campus to ask questions and provide feedback to the UHCC (I.B.34, I.B.25).

Program Reviews occur annually and are made available on the UHCC website. Even past reviews are archived (I.B.4). The Annual Review of Program Data (ARPD) provide 'health calls' that show the degree to which each program is achieving stated objectives. The programs evaluate the health calls and the data, and they provide a narrative explaining what the numbers indicate about the success or weaknesses of helping students achieve academic success.

**Q27 HonCC communicates the results of all of its assessment activities and changes it makes in response.**

*Illustration-Standard-I.15 Survey results – communicating results and changes*

College’s Council on Institutional Effectiveness (CCIE) appointed a subcommittee, the Assessment Task Force, with the task of analyzing the institution’s strengths and weaknesses as reflected in the Program Reviews. The results are disseminated to the campus through the committee’s web link and to governance bodies and committees for further action (I.B.7, I.B.8). These reviews also are discussed for program and division planning and used for supplementary program funding requests. Each year the Planning Council holds a town hall meeting for funding requests where the campus can ask questions about methods or practices that can affect the achievement of the programs to determine whether to support funding.

In Fall 2017 the College conducted a comprehensive survey that included questions about the College's communication and use of assessment results. The data provided by that survey was used to gauge planning of further communication efforts to improve awareness of assessment activities and results across all parts of the campus, including strengths and weaknesses.

The survey indicated that faculty, staff, and administrators generally agree that dialog regularly occurs about student success, student equity, academic quality, and institutional effectiveness. There is also a display of information and data on the main college website (I.B.31).

### Analysis and Evaluation

Honolulu CC meets this standard. The institution communicates the results of all of its assessment and evaluation activities so that the institution has a shared understanding of its strengths and weaknesses and sets appropriate priorities. The survey concurs that faculty, staff, and administrators are aware of the assessment and evaluation communication to improve the institution.

I.B.9 Institutional Effectiveness: The institution engages in continuous, broad-based, systematic evaluation and planning. The institution also integrates program review, planning, and resource allocation into a comprehensive process that leads to accomplishment of its mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources.

---

### Evidence of Meeting the Standard

Honolulu CC has a systematic evaluation and planning of programs and services in a process to accomplish its mission, improve institutional effectiveness, and attain academic quality. Three basic processes achieve these goals through program review, strategic plan, and supplementary program funding.

#### *Program Review*

For program review, both instructional and service units go through evaluations each year. The Annual Review of Program Data (ARPD) for analysis by program is provided to the program and department leaders from the UHCC (or UH System) institutional research office. Instructional programs analyze demand indicators, efficiency indicators, effectiveness indicators, and performance measures, among other data. These evaluations note the strength and deficiencies of the programs and propose action plans to address them. The action plans typically include discussion of resources needed to achieve the goals and the supplementary funding that would be required. These reviews, including the data, are available on the UHCC website ([I.B.4](#)).

As part of the program review process, programs consider both the mission of their department and the mission of the institution with an eye towards continuous improvement. In their process of reflection, review, and planning, program leaders consider both systems and processes changes as well as resource needs to help the program improve.

Importantly, program review also encompasses student services as well as academic support. Data (ARPD) are provided in a similar format for student services review and includes academic advising, career counseling, job placement assistance, financial aid advising, student organization, transfer credit assistance, and student services for people with disabilities. Academic support reviews the APRD for library, technology resources, testing services, and tutoring services.

These reviews are carried out annually and work to improve institutional effectiveness and academic quality. Programs also provide five-year reviews to evaluate longer-term needs. In their reviews, the units also address short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources.

### *Educational and Strategic Planning*

The Educational and Strategic Plan 2016-2021 is the basis for planning for the campus and focuses on student success, enrollment, training and workforce development, campus community, and infrastructure, sustainability and technology. The strategic plan looks over a five-year span when it was last developed and reviewed every year by the Planning Council. The plan addresses both short-term and long-term goals for the institution.

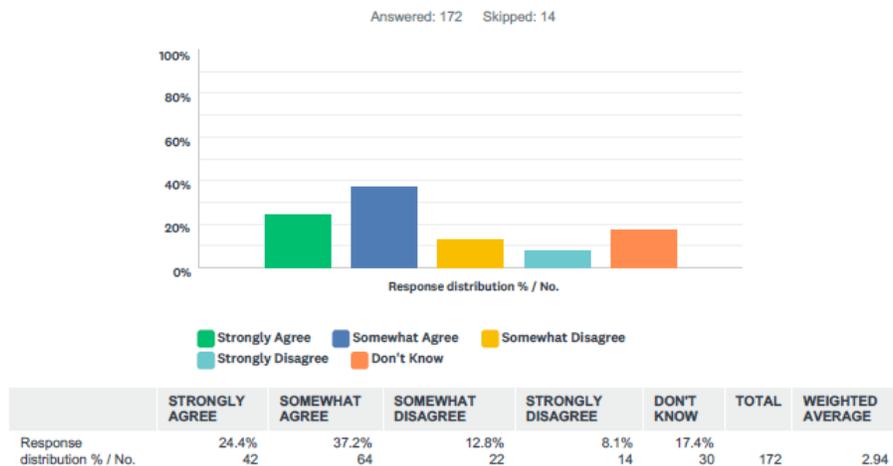

### *Supplementary Funding*

The strategic plan, mission, and program reviews are used to justify the requests for supplementary program funding. The proposals must explain how the request is in line with the mission, detail how the request supports the strategic plan, and show justification from the program’s ARPD ([I.B.35](#)). Governing committees then rank the requests. The process integrates program review, planning, and resource allocation through a comprehensive procedure that guides the College to accomplish its mission and improve its effectiveness and academic quality. Plans are prioritized for funding based on the improvement to existing processes and the ways the plan helps the college meet the college mission.

The Integrated Planning, Resource Allocation and Assessment Policy ([I.A.4](#)) guides the above process. The policy calls for planning and resource allocation to be consistent with the mission, that it follow the strategic plan, consider the community, and be based on the assessment of programs and services.

Programs and services have been using the results from their assessments to make action-oriented modifications towards program improvement. This is evidenced through various changes in degree programs and student support services. Two examples are the College's Fire Science program and the establishment of the Campus Student Success Council to assist in the implementation of the Student Success Pathway. As a result of the evaluation we have significantly redesigned our developmental math and English courses, reducing the amount of time students spend in remedial work and moving them into college level programs. Introduction of the new STAR guided pathway system aids students in registration and minimizes course repetition. The pathway requires instructional, student and academic support programs to work more collaboratively toward increasing student success and completion.

Q28 HonCC makes a priority of systematic evaluation and planning in order to continuously improve.

*Illustration-Standard-I.16 Survey results – prioritizing systematic evaluation*

The campus survey results indicate that a majority of faculty and staff agree that the institution makes a priority of systematic evaluation and planning for continuous improvement.

The APRD for instructional programs also collect and provide faculty with data for distance education courses. Not all programs, particularly those working with CTE, offer on-line classes, but those that do include analyses in their reports. The analyses look at the fill rate of classes, successful completion, and persistence. The Liberal Arts program, which offered over 80 DE courses in academic year 2015-16, noted a fill rate higher than face-to-face courses but saw a lower completion rate. This would be addressed by providing additional support services for students.

Besides programs, the Distance Education Advisory Committee (DEAC) also endeavors to promote high quality instruction, aiming for it to equal or surpass traditional classroom delivery. The committee also provides support for distance learning offerings including instruction, assessment, student services, technology support, and faculty development training.

The DEAC, which works under the Committee on Programs and Curricula (CPC), aims to ensure clear policies, procedures, and guidelines so all courses have appropriate content and rigor. It also ensures that course assessment is consistent and aligned with face-to-face instructional standards.

Analysis and Evaluation

Honolulu CC meets this standard. The College has a systematic evaluation and planning framework. The program reviews, strategic planning, and resource allocation is geared to accomplishing the mission and improvement of institutional effectiveness and academic quality. Institutional planning addresses short- and long-range needs for educational programs and services and for human, physical, technology, and financial resources. Program review is the key driver for change keeping decision making closest to where decisions are being made.

## **Standard I.C: Institutional Integrity**

**I.C.1** The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status with all of its accreditors. (ER 20)

---

### Evidence of Meeting the Standard

Through regular review, Honolulu CC ensures that information provided to students, stakeholders, and public is clear and accurate in regards to mission, learning outcomes, educational programs, student support services, and accreditation status. The College uses a variety of media platforms to inform its constituents about its mission, educational programs, learning outcomes and services. Publications are updated annually to provide timely and accurate information to current and potential students, including the College Catalog ([I.A.1](#)), which features the mission statement, institutional and program learning outcomes, accreditation status, descriptions of educational programs as well as student support services. The catalog is updated on the College website to reflect recent changes.

### *THE COLLEGE MISSION*

The Honolulu CC mission is the very purpose for the college, and information on the mission is kept current, displayed prominently, and reviewed regularly by the college's Planning Council on an annual basis. The mission statement is included in the College Catalog ([I.A.1 \[p. 15\]](#)), on the College website ([I.A.19](#)) and on posters hung throughout the campus in high traffic areas and classrooms ([I.C.1](#)).

The Chancellor works with the College's Planning Council to ensure the integrity of information related to the mission. Whenever the mission is revised, the Planning Council engages in a comprehensive effort to seek campuswide input on any proposed revisions. The Chancellor takes any approved revisions to the mission statement to the University of Hawai'i Board of Regents. In Academic Year 2017, Honolulu CC revised its mission statement, and the revised mission was translated into the Hawaiian language and is available alongside English versions. The Board of Regents approved the mission statement in May 2017 ([I.A.18](#)), and noted in the Planning Council minutes ([I.A.11](#), [I.C.2](#), [I.A.17](#)).

### *LEARNING OUTCOMES AND SERVICE AREA OUTCOMES*

Student learning and student success are the foundations of the college. To realize these goals, the college assesses outcomes at all instructional levels (institution, program, and course) as well as in student services and service areas in general. The college mandates Student Learning Outcomes (SLO) for all courses as well as Program Learning Outcomes (PLO for all programs, certificates, and degrees on both credit and non-credit programs. The Committee on Programs and Curricula (CPC) requires all instructional programs to maintain and publish SLOs for every course. SLOs for all courses are inventoried as a regular part of the curriculum process. All new course proposals must include SLOs as well as be mapped to PLOs in order to be approved by the CPC.

All course syllabi at Honolulu CC include SLOs. Syllabi for all courses offered at the College can be accessed through the College's Assessment Learning Outcomes webpage ([I.C.3](#)). The official source of SLOs are stored in Quali CM, the electronic curriculum management system, which all faculty are able to access. The SLO for courses also are available on the Assessment Learning Outcomes webpage ([I.C.4](#)).

The College also mandates that all non-instructional and administrative units have Service Area Outcomes. All College SAOs can be found on the same webpage ([I.C.4](#)).

### *EDUCATIONAL PROGRAMS*

The College catalog is the most comprehensive source of knowledge about the College's educational programs and student support services. The catalog is updated every year to make sure that its content is current and that it reflects the latest changes to the curriculum. Educational program information is listed in the catalog by program and includes required course work and sequences, program learning outcomes, career/transfer information, and certificate information ([I.A.1 \[pp. 72-157\]](#)).

Although the catalog is an in-depth source, additional information on programs is available through the College website's Programs of Study. These include the Liberal Arts degree programs, Career and Technical Education programs, and Special Programs and Courses. The website also has outlines for Continuing Education and Lifelong Learning programs, which include courses for Advanced Technology, Early Childhood Educations, and Introduction to College English. Overviews of educational programs also are publicly shared through brochures and other literature. Distance Education information is available through Services for Students ([I.C.5](#)) and includes a link to DE classes offered ([I.C.6](#)).

### *STUDENT SUPPORT SERVICES*

The Honolulu CC catalog contains general information about the College's student support services, including current information about financial aid, tutoring, academic counseling, health services, support information for Native Hawaiian students as well as services for students with disabilities.

The website provides comprehensive Student Support Service information through a link on the main page [\(I.C.7\)](#).

### *ACCREDITATION STATUS*

Honolulu CC communicates its accreditation status to students and the public through a link on the College's website [\(I.C.8\)](#). The College's accreditation webpage links to the ACCJC website and includes relevant accreditation reports, news, committees, contacts, and certified programs.

Related to the activities, and Institutional Learning Outcomes, Program Learning Outcomes, Service Area Outcomes, and links to individual Course Descriptions and Student Learning Outcomes.

The College fulfills Eligibility Requirement 20. Clear and accurate literature and information about the institution are provided to the campus community, going through comprehensive and systematic review procedures for printed and electronic catalog publications. General information about the college as well as details about courses, programs, degrees, financial, aid, admissions, fees, regulations, acceptance and transfer of credits, grievance and complaint procedures, sexual harassment, and other information, requirements, and policies affecting students are included in the college catalog. The electronic version of the catalog is available through the institution's main webpage.

The Communications and External Affairs office and the office of the Vice Chancellor for Academic Affairs are responsible for creating and maintaining procedures for communication.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution assures the clarity, accuracy, and integrity of information provided to students and prospective students, personnel, and all persons or organizations related to its mission statement, learning outcomes, educational programs, and student support services. The institution gives accurate information to students and the public about its accreditation status. All information about the College's accreditation status is noted on the website as well as the catalog.

I.C.2 The institution provides a print or online catalog for students and prospective students with precise, accurate, and current information on all facts, requirements, policies, and procedures listed in the “Catalog Requirements” (see endnote). (ER 20)

---

### Evidence of Meeting the Standard

The college catalog is the most comprehensive source of knowledge about the institution including detailed descriptions of educational programs and student support services. The catalog is updated every year to insure that its content is current and that it reflects the latest changes to the curriculum. To further ensure the currency of content, the catalog is available through a link at the bottom of the College website.

The college catalog contains general information about the institution, including the addresses and maps of the main campus and offsite locations, telephone numbers, and the website. Also included are the mission, accreditation status, names and degrees of administrators and faculty, and names of governing board members.

The publication additionally provides information about course, program, and degree offerings, the academic calendar, program lengths, academic freedom, financial aid, learning resources, and learning outcomes for programs and degrees. It also spells out the requirements for admission, student fees, other financial obligations, degrees, certificates, graduation, and transfer (I.C.9).

The catalog also notes the major policies affecting students, such as academic regulations, academic honesty, nondiscrimination, acceptance and transfer of credits, transcripts, grievance and complaint procedures, sexual harassment, and refunding of fees. The publication is available in printed form as well as on the College website. It provides integrity in communication with the public and meets ER 20 (I.C.9).

The Office of the Vice Chancellor for Academic Affairs ultimately ensures the accuracy and currency of all information published in the catalog through a system of regular review and approval each semester.

The college catalog undergoes a rigorous review process. The Registrar is responsible for assembling the catalog, soliciting changes for non-curriculum edits, and setting deadlines for Division Chairs, Program Coordinators, Administrators, and all who

contribute to creating the catalog annually. All changes to the catalog involving programs or curriculum are made through the Committee on Programs and Curricula (CPC). Since the faculty have primary responsibility for curriculum content, subject matter, and methods of instruction, the CPC represents the faculty's interest in maintaining the quality of curriculum at Honolulu CC. Information on the CPC itself as well as a record of CPC actions can be found on the College's intranet ([I.C.10](#)).

All curriculum changes to the catalog are kept for future review if necessary. The record of these changes can be accessed by using a curriculum management system, Quali CM. These protocols ensure that the catalog presents accurate, current, and detailed information about programs and policies. Other course specific information, such as delivery mode, expected interaction between faculty and staff to students, and accessibility is detailed in course syllabi.

The annual catalog for Honolulu CC provides precise, accurate, and current information. The electronic catalog is a mirror of the printed version. Both versions make it accessible to all interested parties.

### Analysis and Evaluation

Honolulu CC meets this standard. The catalog includes all of the information required in ER 20 and serves as an accurate, clear, and complete source of information about the college and its programs. The catalog is regularly reviewed and updated to reflect changes in academic, regulatory, and administrative policy and procedures.

[I.C.3](#) The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public. (ER 19)

---

### Evidence of Meeting the Standard

The College's Office of Institutional Policy, Planning, and Institutional Research (PPIR) is responsible for collecting, analyzing, and publishing student achievement data, available to the campus and the public, including current and prospective students. PPIR's fact book ([I.A.2](#)) is available on the campus website as well as data briefs that focus on enrollment, transfers, majors of incoming students, or other analyses ([I.B.31](#)).

Among the data PPIR analyzes are course success rates, persistence, full-time/part-time status by major, degree and certificate completion, degree and certificate completion by program, changes in enrollment, and transfer to four-year institutions. The data are viewed by gender, ethnicity, age, distance education, and so on, depending upon the data.

The fact book also includes data for each program showing demand, efficiency, effectiveness of the programs as well as the success of distance education courses (if offered), Perkins core indicators, and performance measures. These Annual Reviews of Program Data (ARPD) are generated by institutional research of UHCC (or UH System) and provided to all the community colleges ([I.B.40](#)).

Each program assesses the ARPD and writes a description of how the program is meeting the goals. This report assessing the program's effectiveness is reviewed by the deans and the Assessment Task Force and is the basis for budget requests for each program. In addition, every five years every program must go through a Program Review that assesses program success in meeting Program Learning Outcomes (PLO) and that charts a long-term plan for improvement if necessary. The reviews are posted on the UHCC website, with links from the College website ([I.B.4](#)).

Honolulu CC also uses student learning and achievement data as key sources to communicate the quality of its programs and services to the public. The College produces an Annual Report ([I.C.12](#)), which contains information on performance measurement, specifically data on student achievement in order to communicate to the public progress on the College mission. It also communicates to the public the College's budget and planning activities and relevant state and federal initiatives ([I.C.13 \[pp. 36-43\]](#), [I.C.14 \[pp. 28-35\]](#)).

The Institutional Assessment Specialist compiles and publishes a report on SLO monitoring and makes it available to the campus each semester. This report includes "Closing the Loop" information showing specific methods of course improvement ([I.C.15 \[SLO Spreadsheet\]](#)).

The College fulfills Eligibility Requirement 19. Student achievement and success reports for outside agencies, the state and federal government, the public, and students are complete and accurate. Data is available through links on the College's website and Intranet. The College annually reviews institution-set standards and assesses the College's performance on those standards and the College's strategic plan. The College regularly reviews and makes available to the public information on learning and achievement outcomes.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution uses documented assessment of student learning and evaluation of student achievement to communicate matters of academic quality to appropriate constituencies, including current and prospective students and the public. Information about student learning is housed in a database system which provides access to faculty and others for discussion and dialog and inclusion in program review. Student learning outcomes for courses are shared with students at the beginning in class and program outcomes are shared in public documents for students to access.

1.C.4 The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes.

---

### Evidence of Meeting the Standard

The college catalog is the most comprehensive source about certificates and degrees offered at Honolulu CC ([I.A.1 \[pp. 69-84\]](#)). The catalog details the purpose, content, course requirements, and the program learning outcomes (PLO) for each degree and certificate ([I.A.1 \[pp. 85-160\]](#)).

The catalog also includes descriptions for all courses in the programs ([I.A.1 \[pp. 170-241\]](#)) and the Institutional Learning Outcomes (ILOs) ([I.A.1 \[p. 15\]](#)). The Office of the Vice Chancellor for Academic Affairs (VCAA) and the Registrar ultimately ensure the accuracy and currency of all information published in the catalog through a system of regular review and curriculum approval each semester.

The primary goal of most students at Honolulu CC is the pursuit of a degree, certificate, or transfer; the expectations and requirements of each pathway in attainment of this objective, including program and student learning, and course descriptions are described in the Catalog and instructional and support literature.

The complete college catalog is on the College's website and viewable by distance education students.

Student Learning Outcomes (SLOs) for specific courses are included on syllabi, which

are distributed at the beginning of each class. Division chairs keep copies of syllabi for courses offered in their units. SLOs for currently offered courses also are available on the College website ([I.C.15](#)).

In Fall 2017 the Institutional Assessment Specialist reviewed syllabi of all offered courses to insure SLOs were included and were current. Some discrepancies were discovered, largely due to the transition between paper files and the online curriculum management system Quali CM. The Institutional Assessment Specialist, VCAA, division chairs, Committee on Programs and Curricula (CPC), and faculty have worked to update the course SLOs in Quali CM, which is to become the main source.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution describes its certificates and degrees in terms of their purpose, content, course requirements, and expected learning outcomes through its college catalog, available in print and online. The programs and awards are created by faculty and meet the University of Hawai'i system requirements. The contents and expectatons are included in the web version of the catalogue and in program literature.

1.C.5 The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services.

---

### Evidence of Meeting the Standard

In keeping with best practices, Honolulu CC reviews all its policies at least every five years. The Chancellor initiates the five-year policy and procedure review. Policies or procedures are updated if necessary or eliminated if they no longer apply to the College's mission.

The College's has a policy to regularly review of policies and procedures ([I.C.16](#)). The purpose of this policy is to measure the language and intent against the outcomes and actual functioning of the policy, using data where relevant, based on assessment measures where applicable.

The College also follows policies and procedures issued by the UHCC and the UH System, which are reviewed by those entities.

Honolulu CC uses a variety of media platforms to inform its constituents about its mission, educational programs, learning outcomes and services. In order to provide timely and accurate information to current and potential students. The college catalog is the most comprehensive source of knowledge about the College including detailed descriptions of educational and student support services. The catalog is updated every year to make sure that its content is current and that it reflects the latest changes to the curriculum. To further ensure the currency of the catalog content, the catalog also available on the campus website ([I.C.17](#)).

The college catalog undergoes a rigorous review process. The College Registrar is responsible for assembling the catalog, soliciting changes for non-curriculum edits, and setting deadlines for division chairs, program coordinators, committees, administrators, and others who contribute to creating the catalog annually. All changes to the catalog involving programs or curriculum are made through the Committee on Programs and Curricula (CPC). Since the faculty has primary responsibility for curriculum content, subject matter, and methods of instruction, the CPC represents the faculty's interest in maintaining the quality of curriculum at Honolulu CC. Information on the CPC itself as well as a record of CPC actions can be found on the College's intranet ([I.C.10](#)).

Past catalogs are archived on the institution's website ([I.C.17](#)).

The College updates publications on an annual basis. Such material includes marketing and outreach information such as brochures, fact sheets, and program rack cards. The website also reflects these changes on an on-going basis. The publications include an Annual Report for Honolulu CC. The Annual Report contains information on the College's Educational and Strategic Plans, performance measurement outcomes, financial information, and efforts at community relations and outreach ([I.C.12](#)).

The institution regularly reviews and evaluates its policies and procedures according to review policy ([I.C.16](#)). Key publications such as the College catalog and annual reports are reviewed and updated on a regular basis.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution regularly reviews institutional policies, procedures, and publications to assure integrity in all representations of its mission, programs, and services. The UHCC system also has a regular calendar and process for review of the system policies and updates and amendments are shared with

the colleges in communications and in dialog at system meetings.

1.C.6 The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials.

---

### Evidence of Meeting the Standard

Honolulu CC informs current and prospective students of the total cost of education, including tuition, fees, textbooks, and other required instructional materials. Information is provided through a variety of online and printed resources.

The college catalog provides details about tuition, other costs, tax credits, and financial aid ([I.A.1 \[pp. 30-40\]](#)). The College's webpage on Services for Students ([I.C.7](#)) includes a section on Tuition and Fees ([I.C.7 \[Paying for College\]](#)).

Required textbooks and other costs that may be associated with courses are available to students when registering for classes through the online registration system. The College's Services for Students webpage also has a link to the College bookstore ([I.C.7 \[Other Resources\]](#)), where students can check textbook prices. In addition, students have the ability to rent books in person at the bookstore and online through the bookstore's website.

Honolulu CC has twenty-two Career and Technical Education (CTE) programs. Sixteen of these programs have additional expenses beyond textbooks. All of these programs have information about additional costs on program webpages, such as for the Diesel Mechanics program ([I.C.18](#)).

Not all courses require textbooks or materials. Many faculty are working with Open Educational Resource (OER) initiative to help reduce costs to students.

Additional information on financial support to students is available on the Financial Aid webpage ([I.C.19](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. The institution accurately informs current and prospective students regarding the total cost of education, including tuition, fees, and other required expenses, including textbooks, and other instructional materials. Fees and tuition are set by the system and documented in the catalogs and schedules. Additional fees for laboratory classes or other incidental learning costs are typical for the subject matter taught and included in student disclosures.

I.C.7 In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution's commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students. (ER 13)

---

#### Evidence of Meeting the Standard

The University of Hawai'i Board of Regents (BOR) policy on the Right to Investigate and Disseminate ([I.C.20](#)) requires all campuses of the University of Hawai'i system to recognize "the right of the scholar to inquire and disseminate the results of inquiry according to the established forms of academic freedom."

The College, under this policy, "guarantees the freedom to inquire of each member of the academic community." The college catalog notes the BOR policy under General Rights and Responsibilities ([I.A.1 \[p. 63\]](#)).

Additionally, University of Hawai'i policy on Faculty and Staff Renewal and Vitality Directive stipulates that all UH chancellors and vice presidents create educational cultures of intellectual vitality that include an "unwavering commitment within the faculty and staff, the administration, and the governing board to academic freedom" ([I.C.21](#)).

The college catalog also clarifies the institution's commitment to intellectual freedom for students and faculty:

Honolulu CC embraces those aspects of academic freedom that guarantee the freedom to teach and the freedom to learn. Free inquiry and free expression for both students and faculty are indispensable and inseparable. Students, whether

from the U.S. or from foreign countries, as members of the academic community are encouraged to develop a capacity for critical judgment and to engage in a sustained and independent search for truth ([I.A.1 \[p. 65\]](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. In order to assure institutional and academic integrity, the institution uses and publishes governing board policies on academic freedom and responsibility. These policies make clear the institution's commitment to the free pursuit and dissemination of knowledge, and its support for an atmosphere in which intellectual freedom exists for all constituencies, including faculty and students.

1.C.8 The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty.

---

### Evidence of Meeting the Standard

The College has established policies on academic honesty, student conduct, and faculty professional conduct.

All constituencies of Honolulu CC are subject to the University of Hawai'i Administrative Rules on Rights and Responsibilities of the University of Hawai'i Community ([I.C.22](#)). "The purpose of the university is to pursue the truth through teaching, learning, and research, all in an atmosphere of freedom of body and mind."

Honolulu CC follows University of Hawai'i Community Colleges policy on Professional Ethics (Faculty) ([I.C.23](#)), based on professional ethics from the American Association of University Professors (AAUP). This policy requires that UHCC faculty strive to "accept the obligation to exercise critical self-discipline and judgment in using, extending, and transmitting knowledge. They practice intellectual honesty."

The college catalog specifically addresses honesty and conduct in the section on Student Regulations: Academic Integrity, which outlines the responsibilities of students to demonstrate academic integrity by adhering to the University of Hawai'i Student

### Conduct Code:

The integrity of a university depends upon academic honesty, which consists of independent learning and research. Academic dishonesty cannot be condoned by the University. Such dishonesty includes cheating and plagiarism, which violate the Student Conduct Code and may result in suspension or expulsion ([I.A.1 \[63\]](#)).

The Student Conduct Code is clearly communicated in both the college catalog and available on the website under College Policies ([I.C.24](#)). Listed along side the conduct code are Student Conduct Code Procedures, which explain the process when the code is violated. The UH policy ([I.C.25](#)) also covers student conduct for all the colleges in the system. The policy addresses honesty, safety, plagiarism, discrimination, among other behaviors.

Honolulu CC faculty are also subject to University of Hawai'i policy for Responding to Allegations of Research and Scholarly Misconduct ([I.C.26](#)). This policy specifically addresses integrity and ethics for research and scholarly work.

All policies above include specifics relative to honesty, responsibility and academic integrity for all constituencies as well as specifics relative to ethical behavior, academic honesty and consequences for dishonesty.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution establishes and publishes clear policies and procedures that promote honesty, responsibility and academic integrity. These policies apply to all constituencies and include specifics relative to each, including student behavior, academic honesty and the consequences for dishonesty. Student codes of conduct and faculty codes are shared and displayed in college documents.

[1.C.9 Faculty distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively.](#)

---

### Evidence of Meeting the Standard

All Honolulu CC faculty are subject to the ethical guidelines established in UHCC policy on Professional Ethics (Faculty) ([I.C.23](#)). This policy obligates faculty members to

“encourage the free pursuit of learning in their students.” Faculty must “demonstrate respect for students as individuals, and adhere to their proper roles as intellectual guides and counselors. Faculty members make every reasonable effort to foster honest academic conduct.” All new UHCC faculty members are given a copy of this policy as part of their orientation.

According to the 2017-2021 labor contract between the University of Hawai‘i Professional Assembly (UHPA) and Board of Regents (BOR), “Faculty Members are expected to set forth justly and without suppression the differing opinions of other investigators, and in their conclusions provide factual or other scholarly sources for such conclusions.”

The contract also states that “Faculty Members should be careful not to introduce into their teaching controversial matters that have no relation to their subject. In the conduct of research, Faculty Members shall adhere to legal and ethical standards and procedures” ([I.C.27](#)).

As employees of the State of Hawaii, faculty are subject to the State Ethics Code established by the Hawaii State Ethics Commission. Among the guidelines, faculty are prohibited from using their positions “to secure or grant unwarranted privileges, exemptions, advantages, contracts or treatment for yourself or others” ([I.C.28](#)).

In addition to the policies, Honolulu CC has an Institutional Learning Outcome (ILO) for Information Literacy requiring that information be evaluated and applied in such a way as to demonstrate awareness of ethical issues ([I.A.1 \[p. 15\]](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. Faculty follow guidelines and policies to distinguish between personal conviction and professionally accepted views in a discipline. They present data and information fairly and objectively. Opportunities to practice these concepts are included in courses aligned with the general education and institutional level learning outcomes.

[1.C.10 Institutions that require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views, give](#)

clear prior notice of such policies, including statements in the catalog and/or appropriate faculty and student handbooks.

---

#### Evidence of Meeting the Standard

Honolulu CC strives to provide students with an engaging learning environment that values academic excellence and personal growth with a responsibility to Native Hawaiians and our community, as stated in the mission ([I.A.1 \[p. 15\]](#)), but it does not advocate specific beliefs or worldviews to students. The College does not require codes of conduct for faculty, staff, students and administration.

#### Analysis and Evaluation

Honolulu CC meets this standard. The college does not require conformity to specific codes of conduct of staff, faculty, administrators, or students, or that seek to instill specific beliefs or world views. The college is an open enrollment, public institution.

1.C.11 Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.

---

#### Evidence of Meeting the Standard

Honolulu CC operates within the state of Hawai'i and does not conduct instructional sites outside of the state or outside of the United States. The college has not made a request to the Commission to operate in a foreign country.

#### Analysis and Evaluation

Honolulu CC meets this standard. Institutions operating in foreign locations operate in conformity with the Standards and applicable Commission policies for all students. Institutions must have authorization from the Commission to operate in a foreign location.

1.C.12 The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting responsibilities. (ER 21)

---

### Evidence of Meeting the Standard

Honolulu CC is accredited by the ACCJC ([I.C.29](#)) and complies with commission policies, Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, insitutional reporting, team visits, and prior approval of substative changes.

Reports and commission actions are disclosed on the website. A webpage is dedicated to accreditation and includes reports, news, ACCJC documents, and other information available to the campus and the public ([I.C.8](#)). The College also complies with all actions directed by the ACCJC to meet its requirements.

Honolulu CC has an Accreditation Liaison Officer (ALO) who regularly reviews policies and announcements for public disclosure of information. All required language of the Commission is included on the website ([I.C.8](#)).

The college catalog also notes: “Honolulu CC is a member of the American Association of Community Colleges and the Western Association of Schools and Colleges, and has been continuously and fully accredited since 1970 by Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges” ([I.A.1 \[p. 14\]](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. The institution agrees to comply with Eligibility Requirements, Accreditation Standards, Commission policies, guidelines, and requirements for public disclosure, institutional reporting, team visits, and prior approval of substantive changes. When directed to act by the Commission, the institution responds to meet requirements within a time period set by the Commission. It discloses information required by the Commission to carry out its accrediting

responsibilities.

1.C.13 The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. (ER 21)

---

#### Evidence of Meeting the Standard

Honolulu CC maintains honest and effective relationships with several external agencies and complies with all regulations and statutes. The College is consistent in how it represents itself to all external agencies, including the Commission. The College Accreditation webpage ([I.C.8](#)) has copies publicly available of interactions between the Commission and the College such as the Commission's yearly Action Letters and copies of the 2015 Midterm Report, and additional Follow Up Reports.

The College produces an Annual Report that contains information on performance measurement, budgeting as well as the College's process for educational and strategic planning. The Annual Report also includes information on the College's interactions with important community constituencies ([I.C.12](#)).

Furthermore, several of the College's Career and Technical Education (CTE) programs work closely with outside licensing and certification organizations, and all of the College's CTE programs are in good standing with these outside organizations:

- Aeronautics Maintenance Technology (AERO) provides FAA and Federal certification for an Aviation Maintenance Technician. (Mechanic: Airframe, Power Plant, or A&P as appropriate) Instructors must maintain certification ([I.A.1 \[p. 89\]](#)).
- Automotive Technology (AMT) Program is certified by NATEF National Automotive Technicians Education Foundation. NATEF certifies the program and instructors. The upon completion, students are eligible for admission to the Automotive Service Excellence (ASE) licensing exam ([I.A.1 \[p. 99\]](#)).

- Cosmetology (COSM) is regulated by the State of Hawai'i; Department of Commerce and Consumer Affairs, Professional Vocation Licensing Division. Cosmetology offers preliminary qualification for admission to three different licensure examinations. All program instructors must have maintained two licenses, one in the profession and the other to train ([I.A.1 \[pp. 110-112\]](#)).
- Early Childhood Education (ECED) offers specific preparation to meet the formal training requirement of the National Child Development Associate (CDA) Credential ([I.A.1 \[p. 115\]](#)).

Program descriptions can be found in the catalog ([I.A.1 \[p. 85\]](#)).

Honolulu CC employs multiple methods to describe itself to external agencies, including the catalog, website, annual and midterm reports, program-specific self-studies, and planning documents. Information regarding this compliance is communicated consistently to all external agencies.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution advocates and demonstrates honesty and integrity in its relationships with external agencies, including compliance with regulations and statutes. It describes itself in consistent terms to all of its accrediting agencies and communicates any changes in its accredited status to the Commission, students, and the public. The college maintains a constant and open dialog with the commission about its institutional quality and issues regarding accreditation and federal compliance.

[1.C.14 The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests.](#)

---

### Evidence of Meeting the Standard

Honolulu CC has adopted a mission that prioritizes student learning and student achievement. The College's policies, practices, and ethical guidelines demonstrate that delivering high quality education to a diverse community of learners is our paramount

objective. As a publicly funded, open-access institution, Honolulu CC does not have external investors or parent organizations, nor does the college support any external interests aside from serving our local community and the State of Hawai'i.

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution ensures that its commitments to high quality education, student achievement and student learning are paramount to other objectives such as generating financial returns for investors, contributing to a related or parent organization, or supporting external interests. The College is a publicly funded and regulated post-secondary institution.

## **Standard II: Student Learning Programs and Support Services**

The institution offers instructional programs, library and learning support services, and student support services aligned with its mission. The institution's programs are conducted at levels of quality and rigor appropriate for higher education. The institution assesses its educational quality through methods accepted in higher education, makes the results of its assessments available to the public, and uses the results to improve educational quality and institutional effectiveness. The institution defines and incorporates into all of its degree programs a substantial component of general education designed to ensure breadth of knowledge and to promote intellectual inquiry. The provisions of this standard are broadly applicable to all instructional programs and student and learning support services offered in the name of the institution.

### **Standard II.A: Instructional Programs**

II.A.1 All instructional programs, regardless of location or means of delivery, including distance education and correspondence education, are offered in fields of study consistent with the institution's mission, are appropriate to higher education, and culminate in student attainment of identified student learning outcomes, and achievement of degrees, certificates, employment, or transfer to other higher education programs. (ER 9 and ER 11)

---

#### Evidence of Meeting the Standard

All instructional programs at Honolulu CC are offered in fields of study consistent with the institution's mission (I.C.1), providing educational opportunities for all students through liberal arts, technology, career, transfer, and professional training, as outlined in the College's catalog 2017-18 (I.A.1). Honolulu CC, as part of the University of Hawai'i system, is a key entry point for students pursuing post-secondary education through the two-year pathway. The degrees, certificates and other awards offered by the institution are in line with the overarching mission of the University of Hawaii. (See *Standards I.A.1-3*).

#### *The Awards Offered*

The college offers the following degree programs:

- **Associate in Arts (AA) Degree** - A two-year liberal arts degree transfer pathway designed to provide students with (1) skills and perspectives fundamental to undertaking higher education; and (2) a broad exposure to different domains of academic knowledge. A Hawaiian Studies degree is also available.
- **Associate in Science (AS) Degree** - A two-year Career and Technical-Professional degree consisting of at least 60 semester credits, which provides students with skills and competencies for gainful employment, entirely at the baccalaureate level.
- **Associate in Applied Science (AAS) Degree** - A two-year Career and Technical-Professional degree consisting of at least 60 semester credits, which provides students with skills and competencies for gainful employment. This degree is not intended nor designed for transfer directly into a baccalaureate program. AAS programs include some baccalaureate level course offerings.
- **Associate in Technical Studies (ATS) Degree** - A two-year Career and Technical-Professional degree consisting of at least 60 semester credits, which provides students with skills and competencies for gainful employment. This degree must be customized by using courses from two or more existing approved programs and is intended to target emerging career areas which cross traditional boundaries. The ATS degree must have educational objectives that are clearly defined and recognized by business, industry, and employers who have needs for specialized training for a limited number of employees. This degree must have advanced approval, and cannot be requested based upon previously completed coursework.

Six certificates and competencies may be granted to students ranging from course or activity participation to advanced professional achievement.

The College also offers these non-degree programs:

- Apprenticeship program training for those already in the workforce.
- Pacific Center for Advanced Technology Training and Continuing Education (PCATT) training in advanced technology, continuing education, and lifelong learning.
- Professional and Career Education for Early Childhood (PACE) workshops for training and enrichment needs of early childhood practitioners.
- Introduction to College English (ICE) for second-language learners who are not ready for college-level courses.

Courses are primarily taught at its main campus close to downtown Honolulu, including the nearby Kokea Street facilities for its automotive technology and diesel mechanics technology programs. The College has two other campus locations, one at facilities by Honolulu International Airport for its aeronautics maintenance program, and one at Sand Island for its small vessel fabrication and repair program.

The College also offers courses at the Navy facilities at Pearl Harbor for the Applied Trades program and at neighboring high schools for the Early College programs. The AVIT (Commercial Aviation) program at Kalaeleoa Airfield (Kapolei) was discontinued and the offering of accelerated courses (primarily in liberal arts) at the Air Force facilities at Hickam has been temporarily suspended.

The College also offers online courses. Correspondence courses are not offered.

#### *Institution within the University of Hawaii System*

All instructional programs are appropriate for higher education. Degrees and certificates follow the guidelines of the University of Hawai'i Community Colleges system (UHCC) policy on Program Credentials Degrees and Certificates ([II.A.1](#)) for the establishment and issuance of degrees and certificates. (See *Standard I.A.2*).

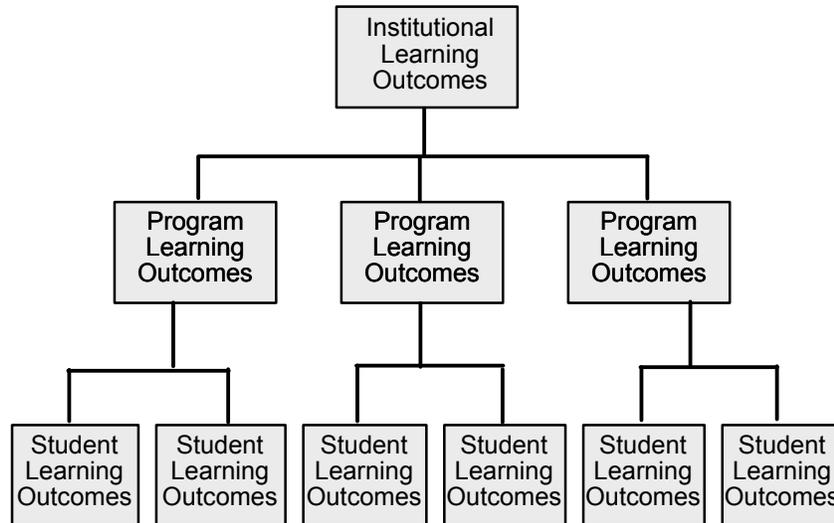

Honolulu CC is one of 10 colleges in the University of Hawai'i system. As stipulated by the UHCC policy ([II.A.2](#)), the colleges have regular assessment of the effectiveness of degree programs, of significant non-credit programs, of areas of major curricular emphasis, and of major education and administrative support funds. UHCC provides quantitative indicators yearly to each Honolulu CC program for review. The indicators show the demand, efficiency, and effectiveness of the program ([II.A.3](#), [II.A.4](#)).

All programs of study have identified learning outcomes (PLO), which are specified in the college catalog ([I.A.1](#)) and listed under Programs of Study on the college website ([II.A.5](#), [II.A.6](#)). The PLOs relate to institutional learning outcomes (ILOs) ([II.A.7](#)), which are tied to the mission of the college.

All courses are designed with identified student learning outcomes (SLOs). The SLOs are included in course syllabi ([II.A.8](#)) and listed by course on the College website ([II.A.9](#)).

Regardless of location or delivery, courses follow approved SLOs, which are linked to program learning outcomes (PLOs).

Hierarchy of ILOs, PLOs, SLOs

*Illustration-Standard-II.1 Hierarchy of ILOs, PLOs, SLOs*

The Committee on Programs and Curricula (CPC) reviews PLOs and SLOs to be pertinent, adequate, and assessable before programs or courses are approved or modified, as detailed in the CPC Reference Manual ([II.A.10](#)).

Courses taught online go through the same approval process as face-to-face courses. In addition to approval by the CPC, courses must be vetted by the Distance Education Advisory Committee (DEAC) to ensure the online version equals or surpasses traditional classroom delivery. These courses go through the DEAC approval process ([II.A.11](#)).

By successfully completing courses, degrees, and certificates, students are prepared to transfer to baccalaureate programs or be successful for employment. Many transfer students attend one of the UH four-year colleges ([II.A.12](#), [II.A.13](#), [II.A.14](#)). Honolulu CC has 22 programs that offer AAS degrees, AS degrees, or certificates that provide job skills ([II.A.15](#)).

For each course, instructors provide students with syllabi that designate SLOs, course description, course objectives, course requirements, and course assessment. Faculty provide students with syllabi in either print or electronic form at the beginning of the classes ([II.A.16](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. The College ensures that courses are consistent with the institution's mission and appropriate to higher education regardless of location or means of delivery, such as online. Through curriculum approval review, the College requires SLOs to be developed and included in all courses as well as linked to PLOs for degrees and certificates. PLOs are also linked to ILOs, to ensure that the overall mission of the College fills every thread of the academic fabric. By fulfilling SLOs, students achieve degrees and certificates and are prepared for employment or transfer. The College, to allow easy transfer of student credits, coordinates curriculum guidelines with the other institutions of the University of Hawai'i system.

II.A.2 Faculty, including full time, part time, and adjunct faculty, ensure that the content and methods of instruction meet generally accepted academic and professional standards and expectations. Faculty and others responsible act to continuously improve instructional courses, programs and directly related services through systematic evaluation to assure currency, improve teaching and learning strategies, and promote student success.

---

#### Evidence of Meeting the Standard

Faculty, including full-time and part-time faculty, ensure that the content and methods of instruction meet generally accepted academic and profession standards and expectations through well-established systems of academic and professional rigor and review. Discipline faculty, hired based on their education, experience and training, are responsible for course content and methods of instruction as well as the continuous improvement of courses. (*See, Standard II.A.11*).

#### *The Curriculum Review Process*

The Committee on Programs and Curricula (CPC), which is a faculty committee operating under the Faculty Senate Executive Committee (FSEC), oversees the curriculum process of programs and courses, including new proposals, modifications, deactivations, activations, and deletions ([II.A.10](#)).

The curriculum process, though, extends beyond just one committee. New or modified program or course curriculum is generated by faculty, reviewed by division chairs, the

General Education Board (if applicable), the Distance Education Advisory Committee (if applicable), and the division curriculum committees, before reaching the CPC (II.A.17).

Curriculum Proposal Flow Charts

EPC format Jan 2018

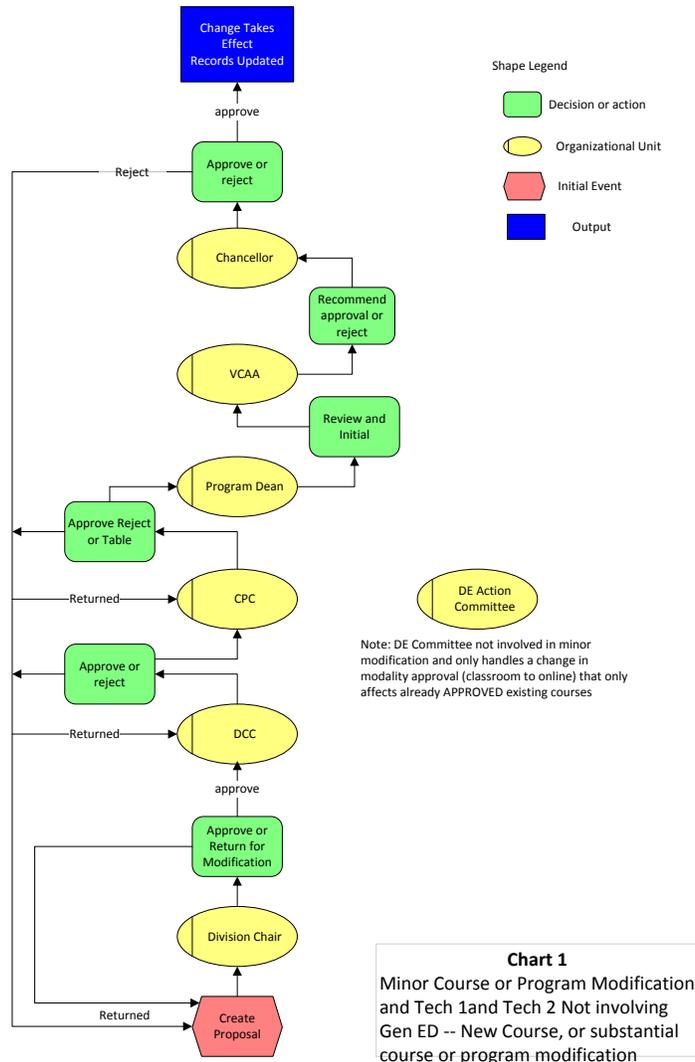

Illustration-Standard-II.2 Curriculum proposal flow chart

Through this process, programs and courses are checked for appropriate descriptions, learning outcomes, content, credit hours, pre-requisites, co-requisites, course syllabi,

and articulation with the other UH colleges. The CPC Reference Manual ([II.A.10](#)) sets guidelines for the process. The manual is periodically reviewed for currency and relevance.

After CPC approval, new and modified course and program proposals route to the Vice Chancellor of Academic Affairs for review, and subsequently to the Chancellor, who may forward them to the Vice President for Community Colleges and the Board of Regents when appropriate. Courses and programs are evaluated through program review and assessment to ensure that the curriculum is designed properly and implemented effectively.

### *The Role of Faculty*

Within the curriculum process, the General Education Board reviews courses intended to meet the general education course requirements for Foundations (global/multicultural, symbolic reasoning, communication), Diversification (arts/humanities/literature, natural science, social science), and Focus areas (writing intensive, oral communication, contemporary ethical issues, Hawaiian/Asian/Pacific, and sustainability). The General Education Board includes sub-boards and committees focusing on each of the requirements, as detailed in its charter ([II.A.18](#)).

In Fall 2016, the College adopted the Quali CM electronic review process, which manages all course and program proposals in an expedited, online platform. The software allows those in the approval process to review, provide comment, and approve or reject proposals online. Quali CM also retrieves and archives course information, including course data of all UH community colleges. Despite training and testing, the implementation of the new platform came with glitches, which have been addressed and are being tested. Faculty have voiced positive comments about the system, noting that it speeds up the curriculum process and eliminates hard copy/paper forms, as detailed in the CPC minutes ([II.A.19](#), [II.A.20](#)).

It also helps to streamline course changes in the Banner registration system and for the course catalog. Production deployment was in July 2016.

Career and technical education (CTE) programs may also follow additional guidelines for their programs for certification, such as the Automotive Maintenance Technology (AMT) program by the National Automotive Technology Education Foundation (NATEF) that prepares students for employment as automotive technicians. The AMT program is certified in all eight Automotive Service Excellence (ASE) areas: engine repair, automotive transmission and transaxle, manual drive train and axles, suspension

and steering, brakes, electrical/electronics systems, heating and air conditioning, and engine performance.

The Distance Education Advisory Committee (DEAC) oversees the process for courses taught remotely. Faculty must be approved by the committee to teach courses via distance, and specific courses must be approved to be taught via distance as well. The board holds mandatory meetings prior to each semester for faculty using this mode of instruction, as noted in the DEAC's approval procedures and charter ([II.A.11](#), [II.A.21](#)).

As discussed in I.B.2, the College maintains a database of SLOs and SLO assessment for all courses and programs available to faculty, staff, students, and the community.

### Analysis and Evaluation

Honolulu CC meets this standard. Academic and professional matters rest solely with the faculty with curriculum design and implementation led by qualified discipline instructors, whether full-time or adjunct. The College, through its systems of faculty hiring and evaluation, ensure that subject matter experts lead the analysis of courses and programs for relevance, currency and innovation. The College provides an environment for faculty to engage and participate in the review and improvement of course and program curricula. Quali CM furnishes an efficient electronic means for curriculum review and approval, while there exists a process to collect SLOs and SLO assessment for all courses and programs that is available to faculty, staff, students, and the community.

[II.A.3](#) The institution identifies and regularly assesses learning outcomes for courses, programs, certificates and degrees using established institutional procedures. The institution has officially approved and current course outlines that include student learning outcomes. In every class section students receive a course syllabus that includes learning outcomes from the institution's officially approved course outline.

---

### Evidence of Meeting the Standard

The College has a process for identifying and assessing learning outcomes for courses and programs.

### *Course and Program Assessment*

First, for all new course proposals, the curriculum process requires student learning outcomes (SLOs) to be specific, measurable, and appropriate for the course. Course SLOs are included in syllabi and stored in a curriculum management system Quali CM. SLOs also are made available to students in syllabi that are distributed in paper or electronic form at the beginning of classes. In Fall 2017, syllabi of all courses taught that semester were gathered by the Institutional Assessment Specialist, who confirmed that SLOs were included ([II.A.9](#)).

Second, all instructional units have Program Learning Outcomes (PLO) that are included in the college catalog, for example ([I.A.1 \[p. 76\]](#)). The SLOs for courses are developed to align with the program learning outcomes so that upon award completion students achieve skills and knowledge congruent with their degrees.

Third, PLOs are linked to Institutional Learning Outcomes (ILO) to guarantee that each academic program serves the overall objectives of the college ([I.B.15](#)). The ILOs also guide the general education requirements for degrees. The ILOs are mapped to general education for each degree ([I.B.43](#)).

As discussed in [II.A.1](#), the Committee on Programs and Curricula (CPC) monitors learning outcomes for both courses and programs. Program faculty also evaluate the demand, efficiency, and effectiveness of their courses and programs in reports each year, using quantitative indicators provided by the University of Hawai'i Community Colleges (UHCC) system ([I.B.40](#), [I.B.36](#), [I.B.37](#), [I.B.38](#), [I.B.39](#) ).

### *The Assessment Process*

The College has demonstrated its commitment for assessment by providing assessment showcases for the campus at least once a year ([II.A.22](#), [II.A.23](#), [II.A.24](#)). The showcases comprise presentations, demonstrations, and workshops on assessment strategies for faculty. They provided a space for faculty to discuss assessment methods?/preferences and best practices across disciplines. Pedagogical and methodological improvements are made to courses and programs based on review of assessment findings and dialog among peers.

The College has also developed a methodic system to streamline SLO assessment. Over the years, instructors have addressed key questions around the SLOs in their courses, including:

- When was the SLO assessed?

- How was the SLO delivered (i.e., in face-to-face, online, or hybrid formats)?
- How was the SLO measured?
- How many students met the SLO?
- What actions has the instructor taken to improve the SLO?
- What recommendation could be implemented to improve the SLO?

A 2014-2017 assessment report details instructor evaluations of SLOs and planned course improvements (when necessary) over the recent seven semesters ([II.A.9](#)). The report shows the commitment of faculty to improve student learning through SLO assessment.

### *College Commitment to Assessment*

In fall 2017, the College hired a full-time Institutional Assessment Specialist, who supports faculty and staff on any matters that related to SLOs, PLOs, and ILOs. Support has included campus presentations, departmental workshops, and one-on-one consultations. The specialist also is chair of the Assessment Task Force committee.

SLO assessment has stimulated improvement across the campus. For instance, both English and math have implemented recent changes in curriculum—moving from developmental education course sequences to co-requisite course models to accelerate student success. In 2016, Construction Management merged with Architectural, Engineering and CAD Technologies because of many crossover courses that emerged through SLO assessment. The College identifies assessment to be key to decision-making ([II.A.59](#)). (*See Changes and Plans Arising from Self-Evaluation*).

### Analysis and Evaluation

Honolulu CC meets this standard. The examination of learning takes place at all levels of learning; course, program and institutional. Pedagogical and methodological improvements are implemented based on a review of the findings and reflection in faculty discussions, including program review. When potential resources are identified to improve student learning, faculty include allocation requests for technological, physical, financial or personnel supports. The requests are prioritized as part of the resource allocation process, and funded and reviewed under the integrated planning systems at the college. Moreover, students are made aware of learning expectations in course syllabi and in the college catalog. The College has incorporated SLOs, PLOs, and ILOs through its curriculum process and assessment procedures. The SLO assessment is used for continuous improvement of courses and programs.

II.A.4 If the institution offers pre-collegiate level curriculum, it distinguishes that curriculum from college level curriculum and directly supports students in learning the knowledge and skills necessary to advance to and succeed in college level curriculum.

---

### Evidence of Meeting the Standard

Many of the students who attend Honolulu CC are not college ready and the college recognizes that a viable pre-collegiate curriculum is essential for these students to transition to college level work. (*See Introduction, Student Achievement Data*). Honolulu CC offers pathway courses that bridge learning.

#### *The College Readiness Pathway*

The college distinguishes “non-transfer to baccalaureate degree colleges” (pre-collegiate level) curriculum from “eligible for transfer to baccalaureate degree institutions” (college-level) curriculum through course numbering. Courses numbered 1-99 are generally those non-transferrable to baccalaureate degree institutions, while those 100-399 credits are eligible for transfer, subject to the receiving institution’s program requirements ([I.A.1 \[p. 170\]](#), [II.A.25](#)).

However, courses numbered 1-99 are transferable within the UH Community College System and may fulfill requirements for Certificates of Achievement, Competence, and Completion.

The English department eliminated all its 1-99 developmental education courses in Fall 2016 when it moved to a co-requisite model that allows all students to enroll in a college-level English 100 course. The Math department implemented some co-requisite courses, but continues to discuss ways of improving student acceleration. It still offers pre-college level courses and non-transferable courses designed with numbers below 100.

#### *Accelerating Pathway Completion*

Preliminary Institutional Research data has shown a remarkable improvement of student success with co-requisite courses for English and math. For English, 60-64% percent of students completed college-level English 100 in one semester with the

co-requisite model, whereas in the prior years, only 25-35% were successful after two or three semesters in a developmental education sequence.

The co-requisite course success is helped by extended time in the classroom and embedded student tutors assisting instructors. Student support services also have an impact, such as the writing tutoring and retention assistance.

In further efforts to accelerate students out of developmental education, the College has moved away from relying on test scores such as Compass for placement. Along with the other six community colleges in the UH System, Honolulu CC has adopted assessment measures tied to high school performance for placement, such as overall grade point averages or grades in key English or math classes. The assessment measures did away with placement testing, which was an added barrier for students coming to the college and did not accurately place students.

The College offers both credit and non-credit English for non-native speakers. The credit English as a Second Language (ESL) instruction carries course numbers below 100 and leads through a sequence to college-level English Composition. Non-native speakers with skills below the credit courses enroll in the non-credit Introductory to College English (ICE) classes ([I.A.1 \[p. 201\]](#)).

Within the UH System, credit for courses numbered 100 - 499 will transfer as baccalaureate-level credit. Credit may not always be applicable to specific degree or program requirements.

To accommodate the demand for pre-collegiate courses, instructional leadership, through enrollment management, trend analysis and other techniques, identify appropriate times, days and section counts to provide a balanced schedule considering classroom efficiency and student needs. (*See Standard II.A.6*).

Student support services provide the out-of-classroom assistance to students on the college pathway, such as tutoring, writing support and counseling. (*See Standard II.C*). The college uses grant funded projects and statewide initiatives, such as TRIO, Po'i Nā Nalu to aid underserved student groups, especially Native Hawaiian students. (*See Standards II.B, II.C*).

### Analysis and Evaluation

Honolulu CC meets this standard. As an open access two-year institution, the college recognizes the need to offer a viable pre-collegiate curriculum to assist students on the degree or certificate pathway. Through assessment procedures that use multiple

methods to triangulate student present levels of learning, the college makes every effort to properly place students along the English and math pathways. Efforts are made to tailor learning methods to accelerate students to transfer level or degree applicable courses. Faculty dialog in program review and learning assessment keep course offerings current and relevant to contemporary student needs. The examination of data drives decision making in the pre-collegiate course sequencing.

The College endeavors to reduce non-transferrable courses that may be bottlenecks for students in achieving success and graduation. The initial results of replacing non-transferable developmental English and math classes with co-requisite courses are evidence of assisting students.

II.A.5 The institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. The institution ensures that minimum degree requirements are 60 semester credits or equivalent at the associate level, and 120 credits or equivalent at the baccalaureate level. (ER 12)

---

### Evidence of Meeting the Standard

The College degrees and programs follow practices common to higher education. Policies establish the appropriate length, breadth, depth, and curriculum for degrees and certificates.

The College follows UHCC policy (II.A.1 [III F]) to “Assure that high-quality instruction and appropriate breadth, depth, rigor, sequencing, time to completion, and synthesis of learning characterize all program credentials.”

### *Degree Requirements and Expectations*

All degrees at the associate level require a minimum of 60 credits (I.A.1 [pp. 73, 76]). The College does not offer degrees at the baccalaureate level. UHCC policy (II.A.1 (IV B2]) requires that the Associate in Arts (AA) degree be “A general and pre-professional education degree, consisting of at least 60 baccalaureate-level semester credits, which provides students with skills and competencies essential for successful completion of a

baccalaureate degree. The issuance of an AA degree requires that the student's work has been evaluated and stated outcomes have been met.”

For general education, the College requires a minimum of 15 credits for Career and Technical Education degrees and 31 credits for the Liberal Arts transfer degree (I.A.1 [pp. 74, 76]).

The College’s degrees and programs follow this System policy, utilizing the Committee on Programs and Curricula (CPC) to ensure each new or revised course meets the rigor, course sequencing, time to completion, and synthesis of learning, as noted in the CPC Charter (II.A.26).

The CPC has multiple sub-committees to help with course review, including the Division Curriculum Committees (DCC), one per division, which include faculty members within the division who initiate the proposals. The department faculty must provide the DCC with a proposal that meets the conditions for curriculum as stated in the above policy.

### *The Role of General Education*

Another sub-committee of the CPC is the General Education Board, which oversees the course requirements for foundations (global/multicultural, symbolic reasoning, communication), diversification (arts/humanities/literature, natural science, social science), and focus areas (writing intensive, speech, ethics, Hawaiian/Asian/Pacific issues, and sustainability) (I.A.1 [pp.77-80], II.A.18).

The General Education Board also double-checks the campus certification of courses and instructors, certification procedures, and system-wide articulation requirements and status. Additionally, it acts as the central hub for the distribution of application materials for articulation and certification (II.A.18). (See Standard II.A.12).

Another sub-committee of the CPC is the Distance Education Advisory Committee (DEAC). The DEAC is responsible for certifying and recertifying distance education curriculum to maintain high quality instruction and curriculum that is equivalent to the traditional classroom course. Additionally, the DEAC coordinates instruction, assessment, student services, technology support, and faculty development for instructors of distance education courses (II.A.21). Online courses follow University of Hawai'i system policy (II.A.27).

### *Curriculum Review*

Part of the college's curriculum review provides an overall sequence and synthesis of learning by tying curriculum and Student Learning Outcomes (SLOs) to the Program Learning Outcomes (PLOs) to the Institutional Learning Outcomes (ILOs). There are six core competencies embedded in the degree and certificate programs of the college. These include Critical Thinking, Information Literacy, Effective Communication, Quantitative Reasoning Career Preparation, and Community Awareness and Social Responsibility (I.A.1 [p.15]). (See Standard II.A.11).

The College, through the CPC and its sub-committees, ensures the institution's degrees and programs follow practices common to American higher education, including appropriate length, breadth, depth, rigor, course sequencing, time to completion, and synthesis of learning. (See Standard II.A.13).

### Analysis and Evaluation

Honolulu CC meets this standard. All degrees and programs following standard practices for higher education, including the attainment of at least 60 credits for associate degrees. Each degree offered at the college has a general education core that provides broad learning expected as part of higher education. In addition, degrees contain subject matter concentrations that either further expand the breadth of knowledge and skills learned or provide key career, technical or professional curriculum. The colleges lower division courses are articulated with the sister colleges of the systems and with the University of Hawai'i and private institutions in Hawaii and on the mainland. The curriculum review process and use of advisory boards make sure that the degree offerings are current and relevant to present and emerging economic needs of the state. The College does not offer baccalaureate degrees.

II.A.6 The institution schedules courses in a manner that allows students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. (ER 9)

---

### Evidence of Meeting the Standard

The College schedules courses based on student needs, course sequencing, and scheduling data. The underlying goal of scheduling courses is to provide students with pathways that do not delay attainment of transfer and graduation.

The College has implemented several ways to achieve this.

First, many career and technical education (CTE) programs specify courses students must take each semester to complete degrees. Carpentry Technology, for example, designates three specific carpentry courses and math for the first semester, a carpentry course and English for the second semester, and so on, as in the college catalog (I.A.1 [p.101]). This schedule keeps the student on track for four semesters to achieve the AAS degree and graduation.

The second method is the newly implemented STAR Registration, a web-based software customized for each student to see his or her pathway to graduation. The web pages visually provide a list of courses completed and those needed to keep on the pathway. The software alerts a student if a course selected would not apply toward the graduation requirement for the major and delay transfer and degree completion, thus preventing a student from taking unnecessary courses.

Honolulu CC has been a pioneer in STAR Registration.

The College also worked with Ad Astra Information Systems, an enterprise that uses a class-scheduling platform that integrates with campus student information systems. The data predicted the fill rate of courses to help figure out how many sections of a course may be needed, so enough courses can be offered or how many sections can be reduced so faculty can put focus on other courses. With this information, the College makes sure enough courses are offered to fill the needs of the students, as well as prevent a surplus of too many sections without concentrating on essential classes.

The College, along with other UH community colleges, implemented Exploratory Majors that define pathways for transfers to four-year institutions. These exploratory majors guide students to specific courses that will be of transfer benefit for health, business, social science, or other degrees, so they will not gather credits that they may be unable to use toward baccalaureate degrees once they transfer (II.A.28). Honolulu CC had a number of students register for the Business, Health Sciences, and Social Sciences Exploratory Majors in spring 2018, the first semester they were offered.

### Analysis and Evaluation

Honolulu CC meets this standard. Courses are scheduled to allow students to complete certificate and degree programs within a period of time consistent with established expectations in higher education. Most of the students who attend the institution are part time students with different trajectories for completion of the educational goals. However, schedules are built to assure that full-time students who take requisite loads as called for in the program plan, complete their programs in the normal time stated.

II.A.7 The institution effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs of its students, in support of equity in success for all students.

---

#### Evidence of Meeting the Standard

The College is very involved in support of equity in success for all students. The College's 2015-21 strategic plan calls for efforts to improve the success and graduation for Native Hawaiians and Pacific Islanders (I.A.3). The graduation rate for Native Hawaiians has improved remarkably over the past years.

20) tracking enrollment of Native Hawaiians students at each campus in an attempt to eliminate success gaps for Native Hawaiians. Native Hawaiian enrollment on campus exceeds the percentage of Native Hawaiians in the community by a third. Over a three-year period (2014-2017), Honolulu CC has increased enrollment to 359% of the goal that was set for the campus. This increase was the highest across the entire system, with the next highest campus at 157% of their goal, as shown in the College's performance initiatives (I.B.25).

With the strategic goal to support equity in success for all students, the campus has developed a wide range of initiatives. The campus offers disability accommodations for face-to-face courses, online courses for distance learners, and hands-on teaching as part of many technical and elective courses, among other modes. The campus provides continual professional development opportunities for faculty to improve teaching methodologies, particularly in the use of technology, which is becoming more important for incoming Generation Z students.

One initiative for supporting diversity is the Hulili Ke Kukui Hawaiian Center. The Center is committed to actively preserving and perpetuating Hawaiian culture and values. Through an array of comprehensive services, it aims to strengthen the college's educational programs and enable students of Hawaiian ancestry to succeed in their academic, career and individual endeavors.

Despite the emphasis on the underserved Hawaiian population, the center provides educational support for all students on campus by providing study spaces, peer mentoring, a computer lab, cultural enrichment workshops, Malama 'Aina Days (service-learning activities with hands-on opportunities to learn about Hawaiian culture and traditional sustainability practices), guest speakers, counselors, and scholarship application assistance.

As another campus initiative, the grant-funded Po'i Na Nalu prepares Native Hawaiian students with options for careers in the global economy through the completion of a vigorous and culturally appropriate career and technical education degree program. Resulting degrees and certificates serve as preparation for employment in high demand, high skill or high wage careers in Hawai'i's sectors of the global economy.

Among the services this program provides are career development, cultural enhancement, financial literacy workshops, tutoring and peer mentoring, academic advising, free summer bridge courses, and paid internships.

### *Initiative and Grant Supports*

Ho'āla Hou, the college's Title III program, is another initiative that proposes to increase access, enrollment and successful completion of academic credentials of Native Hawaiian students. The first goal of the program is to establish an enrollment pathway and create a sense of place at the college for Native Hawaiians that is culturally significant and relevant. This will be done through a series of four activities which include: (1) developing and implementing a culturally appropriate outreach and recruitment plan focused on increasing access and enrollment to the college by Native Hawaiians, (2) creating a team of peer mentors to outreach to the community and establish community based partnerships, (3) erecting a *halau* (community gathering space) through traditional community building practices, and (4) creating a digital cultural and historical bilingual (Hawaiian and English) tour of the campus and native plant species.

The second goal is to create a culture and place-based training program for faculty, staff, and administrators aimed at infusing Hawaiian culture, traditions and values in teaching, learning and service in order to support student success and completion. This

will be done through a series of three activities which include: (1) creating a culture and place-based training program based on the Hawaiian resource management system of *ahupua'a* and *Ike 'Aina*, (2) establishing a cohort of mentors to sustain what is learned through the training program, and (3) using technology to deliver the training materials for future use (II.A.29), as on the website (II.A.30).

As a standard practice, hiring committees include questions about working and supporting needs and equity of the diverse students at our campus. Commonly, candidates are asked what they know about the College's student population and ways to help them be successful.

The College's Student ACCESS program provides equal access to facilities, programs, activities, and services for students with disabilities. Its goals are to provide reasonable accommodations to qualified students, promote an informed and hospitable learning community, and advocate for campus-wide ADA/Section 504 compliance. Information is on the website (II.A.31).

TRIO-SSS provides a range of support services including academic support, career guidance, transfer planning, and professional development opportunities to qualifying community college students who are first-generation in college, have a financial need and/or disability, and demonstrate strong academic potential. Students receive guided individualized assessment and planning, small group tutoring, mentoring, cultural and educational workshops, club and community service activities, and other academic support. TRIO-SSS is designed to increase the retention and graduation rates of eligible students, increase the transfer rates of eligible students from two-year to four-year institutions, and foster an institutional climate supportive of the success of students (II.A.32).

### *College Training*

In academic year 2016-17, all faculty and staff were required to complete a comprehensive online course on Title IX. The training aims for the campus to fully understand ways to prevent anyone from being excluding anyone from participation in campus activities, being denied benefits of campus services, or being subjected to discrimination on the basis of sex.

The campus Committee on Social Equity (COSE) works with students, staff, and faculty to improve equity on the campus by providing a voice to discuss bias issues related to age, culture, gender, language, race, religion, sexual orientation, social stratification, and special populations. The committee seeks to pro-actively disseminate information

on diversity. Periodically, COSE has presented thoughtful films on topics of equity (II.A.33).

The campus makes available workshops for faculty to improve delivery modes and teaching methodologies. One major event is the three-day Apple Summer Institute held each spring at our campus by the College's non-credit group Pacific Center for Advanced Technology Training (PCATT), which is open to faculty, staff, and students. Participants come from all over Hawai'i to attend the event (II.A.34).

The Hawai'i Student Success Institute (HSSI) each March is a major event for faculty to improve teaching methodologies (II.A.35, II.A.36). Faculty and administrators from all seven community college campuses attend these annual events. The HSSI theme for 2018 was "Becoming a Student Ready College." The event includes lectures, panel discussions, and presentations on a wide range of topics such as college readiness, integrated student services, diversity, leadership, services, and teaching methodologies.

Other opportunities for faculty development, especially for English and math, include the UHCC-wide English and math retreats and the CTE English and Math Colloquium each April (II.A.37).

### Analysis and Evaluation

Honolulu CC meets this standard. Equity of access and outcomes is at the heart of the Honolulu mission. Programs at the college are designed to improve educational opportunities to underserved groups by increasing enrollment, educating faculty and staff, and designing supports that encourage student retention. In addition to out of classroom supports, faculty use modern teaching methods and practices that consider the varied cultures and traditions of all student populations. Events on the campus increase awareness and sensitivity to diverse cultures and practices. The College supports equity in success for all students by effectively uses delivery modes, teaching methodologies and learning support services that reflect the diverse and changing needs.

II.A.8 The institution validates the effectiveness of department-wide course and/or program examinations, where used, including direct assessment of prior learning. The institution ensures that processes are in place to reduce test bias and enhance reliability.

### Evidence of Meeting the Standard

For credit programs, the College does not use department-wide course and/or program examinations, but some programs provide opportunities for students to take external industry qualifying exams for licenses or certification. The exams do not affect student grades or placement.

Although prior learning assessment is offered, the evaluation is by division chairs or panels. Department or program examinations are not used.

### Analysis and Evaluation

Honolulu CC meets this standard.

II.A.9 The institution awards course credit, degrees and certificates based on student attainment of learning outcomes. Units of credit awarded are consistent with institutional policies that reflect generally accepted norms or equivalencies in higher education. If the institution offers courses based on clock hours, it follows Federal standards for clock-to-credit-hour conversions. (ER 10)

---

### Evidence of Meeting the Standard

The College awards course credit based on the attainment of student learning outcomes. Outcomes are developed by College faculty to determine the knowledge and the skills students will have attained by successfully completing the course. Grades are determined by the assessment of these outcomes via a variety of methods and show the level of competency students achieve in the course.

Student Learning Outcomes are required for every course by the CPC (II.A.10 [pp.16-17]). The curriculum manual requires that syllabus descriptions given to each class include SLOs consistent with those in the officially approved course outline. Furthermore, Program Learning Outcomes and Competencies for degrees and certificates, approved by the Board of Regents, are published in the college catalog under each program description (II.A.38, II.A.1).

Graduation requirements for certificates and associate degrees are determined by Board of Regents and UH policies (II.A.38, II.A.1, II.A.39), and the requirements, competencies and, learning outcomes are documented in detail in the catalog (I.A.1 [pp. 72-80]).

The types of certificates offered range from non-credit Certificates of Participation (CP) and Professional Development (CPD) to a designated short-term credit or non-credit Certificate of Competence to a credit Certificate of Achievement (CA) or Advanced Professional Certificate (APC). The requirements for these certificates vary greatly depending on the type, but are detailed in the catalog (I.A.1 [p. 72]).

The requirements for Career and Technical Education Associate Degrees – Associate in Science (AS), Associate in Applied Science (AAS), and Associate in Technical Studies (ATS) – include completion of at least 60 semester credits with an overall grade point average of 2.0 (“C”) or better. Competencies and requirements for the AS, AAS, and ATS degrees are likewise detailed in the catalog (I.A.1 [pp. 73-25]).

The requirements for the liberal arts Associate in Arts (AA) Degree include completion of at least 60 semester credits of courses numbered at the 100 and 200 levels, a General Education core of a minimum of 31 credits, and a minimum of 12 credits of program courses in the degree/major with an overall grade point average of 2.0 (“C”) or better (I.A.1 (pp. 76-80)). A Hawaiian Students degree also is offered.

The College adheres to guidelines set forth in both Federal Code of Regulations section 600.2 and institutional policies to define a credit hour. The UHCC policy (II.A.46) states that one credit hour must be represented in intended student learning outcomes and verified by evidence of student achievement. It approximates to 50 minutes to one hour of class or direct faculty instruction and minimum of two hours of out-of-class student work each week for approximately 15 weeks for one semester. A credit is defined as 45 hours of direct and indirect instructional, student work within a standard semester or equivalent term of study.

Established instructional programs are also systematically assessed to assure currency, improve teaching and learning, and enhance achievement of student learning outcomes (II.A.40 [p. 2]). This is accomplished through the Annual Reports of Program Data as well as comprehensive reviews of programs every five years (II.A.41).

### Analysis and Evaluation

Honolulu CC meets this standard. The requirements for assessing student learning at the course, program and institutional levels are listed in the catalog and consistent with

college, community college system, and federal policies governing standard practices in higher education. Faculty consider the larger exit learning in courses and programs with the objectives for student mastery. Furthermore, all student learning outcomes and types of assessments are on the syllabus descriptions for every class and distributed to every member of the class each semester. Honolulu CC awards course credit by student achievement of these approved outcomes.

II.A.10 The institution makes available to its students clearly stated transfer-of-credit policies in order to facilitate the mobility of students without penalty. In accepting transfer credits to fulfill degree requirements, the institution certifies that the expected learning outcomes for transferred courses are comparable to the learning outcomes of its own courses. Where patterns of student enrollment between institutions are identified, the institution develops articulation agreements as appropriate to its mission. (ER 10)

---

### Evidence of Meeting the Standard

Through inter-campus articulation, the University of Hawai'i System is committed to making transfer a smooth and transparent process for students. UH policy stipulates that completing the AA from a UHCC fulfills admission and lower division general education care requirements at all UH baccalaureate degree-granting institutions ([II.A.42](#)).

This policy reflects Board of Regents' view that all university and campus policies and practices are designed to facilitate the smooth flow of students toward successful completion of their postsecondary educational goals. "As a unified system of postsecondary education, it is important that the maximum degree of coordination and cooperation exists among campus instructional units in order to ensure the efficient utilization of available resources " ([II.A.43](#)).

### *Course Articulation with Other Institutions*

The University Council on Articulation works to facilitate these policies. Students may transfer course credit (courses numbered 100 and above) to other colleges in the UH System.

The College also endorses the Ka'ie'ie (Degree Pathway Partnership), a program that allows dual-admission, dual-enrollment for students pursuing a four-year undergraduate degree at UH Mānoa but choosing to begin their degree at a community college.

Students also may transfer courses from Honolulu CC to colleges and universities outside the UH System in Hawai'i and on the mainland, but the institution to which the student transfers determines what courses will transfer. In Hawai'i, the College has articulation agreements with the two major private institutions – Hawai'i Pacific University and Chaminade University ([I.A.1 \[p. 77\]](#)).

### *Role of the Catalog*

The college catalog ([I.A.1 \[p. 54\]](#)) notes policies for granting credits for coursework outside the UH System. Transfer credits may be granted (a) if they are from a regionally accredited U.S. institution, and meets the transfer credit requirements in effect at the time of approval, (b) if non-credit training has been evaluated by the American Council of Education (ACE), (c) if the College has a formal agreement with an institution/organization, or (d) if students prepare documentation and provide evidence of learning from outside the traditional classroom, which can be evaluated by a panel.

Students with college credit can submit official transcripts to the Admission and Records Office ([I.A.1 \[pp. 52-59\]](#)) and counselors validate courses that are transferrable from accredited institutions. To determine whether courses are equivalent, division chairs or other faculty review course descriptions or syllabi to verify corresponding learning outcomes. International students, veterans, and others follow the same process, as outlined in the catalog. Prior learning assessment (as noted above) and credit by examination ([I.A.1 \[pp. 54-56\]](#)) options are available.

### Analysis and Evaluation

Honolulu CC meets this standard. The UH System has transfer-of-credit policies among the 10 campuses to facilitate student mobility without penalty. The institution also has articulation agreements with two major private institutions in Hawai'i and continues to develop articulation agreements. The policies are publicized in the catalog to be clear to students. For granting credit for coursework outside the UH System to fulfill degree requirements, division chairs or other faculty insure the learning outcomes and are equivalent to the learning outcomes of the institution's courses.

II.A.11 The institution includes in all of its programs, student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

---

### Evidence of Meeting the Standard

Learning outcomes are integrated throughout the College. The institutional learning outcomes (ILO) are the culmination of all program and student learning outcomes. The ILOs include critical thinking, information literacy, effective communication, quantitative reasoning, career preparation, and community awareness and social responsibility ([I.A.1 \[p. 15\]](#)).

The design of the general education coursework for associate degrees ensure students meet the institutional learning outcomes that include critical thinking, information literacy, effective communication, quantitative reasoning, career preparation, and community awareness and social responsibility ([II.A.1](#)). The College revised its ILOs in 2014 ([II.A.44](#)) in an effort to align all its learning outcomes as a strategy for student success.

Each program has learning outcomes, which are published in the college catalog and on the website ([I.A.1 \[pp. 86-157\]](#), [II.A.5](#), [II.A.6](#)). The program learning outcomes are mapped to the ILOs, showing the relevance of the program to the ultimate outcome goals of the College ([I.B.15](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. In all its programs, the College includes student learning outcomes, appropriate to the program level, in communication competency, information competency, quantitative competency, analytic inquiry skills, ethical reasoning, the ability to engage diverse perspectives, and other program-specific learning outcomes.

II.A.12 The institution requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences. (ER 12)

---

### Evidence of Meeting the Standard

Board of Regents policies ([II.A.45](#), [II.A.38](#)) and UH System policies ([II.A.46](#), [II.A.47](#)) provide guidelines for general education and awarding Associate degrees.

All degrees for Career and Technical Education (CTE) programs require a minimum of 15 credits of general education courses that include Communications, Quantitative or Logical Reasoning, Humanities and Fine Arts, Natural Sciences, and Social Sciences. [[I.A.1 \[pp. 73-75\]](#)]. The CTE degrees include the Associate in Science (AS), Associate in Applied Science (ASS), and Associate in Technical Studies (ATS).

Five of the Institutional Learning Outcomes (Critical Thinking, Information Literacy, Effective Communication, Quantitative Reasoning, and Community Awareness and Social Responsibility) are embedded in these general education requirements. The sixth, Career Preparation, is developed through the specific program coursework.

The Liberal Arts degree requires 31 credits of general education credits in writing communication, symbolic reasoning, and global and multicultural perspectives, and 19 credits that include diversification (arts/humanities/literature, natural sciences, and social sciences), and focus areas (writing intensive, speech, ethics, Hawaiian/Asian/Pacific issues, and sustainability) ([I.A. \[pp. 76-80, 144\]](#)).

Through the general education requirements, the College strives for all its graduates to have the basic skills to be successful in their careers and understand ethics and social responsibility so they have the potential to become knowledgeable leaders in their communities.

The Committee on Programs and Curricula (CPC) has the responsibility of overseeing general education curriculum ([II.A.10](#), [II.A.18](#)). The General Education Board, a sub-group of the CPC, certifies courses fill the hallmarks of the general education categories so that those courses can be included in general education lists outline in the catalog. The CPC is a faculty group and its expertise determines the appropriateness of each course for inclusion in the general education curriculum. The CPC vets all programs and courses to ensure learning outcomes and competencies are appropriate to the degrees.

### Analysis and Evaluation

Honolulu CC meets this standard. The College requires of all of its degree programs a component of general education based on a carefully considered philosophy for both associate and baccalaureate degrees that is clearly stated in its catalog. The institution, relying on faculty expertise, determines the appropriateness of each course for inclusion in the general education curriculum, based upon student learning outcomes and competencies appropriate to the degree level. The general education philosophy aims to enhance learning outcomes for critical thinking, information literacy, effective communication, quantitative reasoning, career preparation, and community awareness and social responsibility. These learning outcomes include a student's preparation for and acceptance of responsible participation in civil society, skills for lifelong learning and application of learning, and a broad comprehension of the development of knowledge, practice, and interpretive approaches in the arts and humanities, the sciences, mathematics, and social sciences.

[II.A.13](#) All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.

---

### Evidence of Meeting the Standard

The College's degree programs include a requirement for either a general education interdisciplinary core or an area of inquiry. The institution follows UHCC policy ([II.A.1](#)

[III D]), which states, that all degree programs include a focused study in at least one area of inquiry or in an established interdisciplinary core.

The College's degrees – Associate in Arts (AA) degree, Associate in Science (AS) degree, Associate in Applied Science (AAS) degree, and Associate in Technical Studies (ATS) degree – contain a general education core (I.A.1 [pp. 73-80]). The College follows UHCC policy (II.A.47 [III A, B]), which states that the general education core relies on the expertise of its faculty who determine the appropriateness of each course by examining the stated learning outcomes. The process includes a “broad dialog on how student learning outcomes are used to analyze courses.”

The UHCC policy (II.A.47 (IV E]) also says that through the degrees students will have demonstrated technical and professional competencies and other applicable standards for external licensure and certification. The specialized courses in an area of inquiry are based upon competencies and include mastery of key practices within the field of study.

Each program specifies learning outcomes for degrees that are detailed in the college catalog (I.A.1 [pp. 85-157]). The programs also specify the courses that lead to the mastery of the program learning outcomes for the field of study.

Programs and courses are approved by the faculty Committee on Programs and Curricula. The CPC ensures all courses are developed with student learning outcomes (SLO) so that students achieve specified competencies. These course SLOs are mapped to programs and demonstrate mastery of skills and knowledge that apply to the various degrees (II.A.16).

The development of SLOs and their assessment ensure that programs have the appropriate level of rigor for students to be successful in their careers or transfer to four-year colleges.

### Analysis and Evaluation

Honolulu CC meets this standard. All degree programs include focused study in at least one area of inquiry or in an established interdisciplinary core. The identification of specialized courses in an area of inquiry or interdisciplinary core is based upon student learning outcomes and competencies, and include mastery, at the appropriate degree level, of key theories and practices within the field of study.

II.A.14 Graduates completing career-technical certificates and degrees demonstrate technical and professional competencies that meet employment standards and other applicable standards and preparation for external licensure and certification.

---

### Evidence of Meeting the Standard

Graduates completing the College's career and technical education programs meet industry standards and external licensure and certifications. The College facilitates this in two ways.

The first is through advisory boards composed of both faculty and industry representatives. Through these advisory board, programs are aware of trends in the industry for both the requirements for specific skills and competencies as well as job availability. As examples, the Early Child Education advisory group includes members from the Department of Human Services in addition to other industry professionals (II.A.48, II.A.49). The Music & Entertainment Learning Experience (MELE) program includes in-state and out-of-state representatives in the music industry, both in industry and government (II.A.50).

These boards keep the programs abreast of industry needs.

The second method for tying these majors with employment opportunities is through an innovative website created by the UHCC, which matches all majors in the community colleges to the demand for jobs in Hawai'i, the trend for demand, positions available, salaries paid, and current advertisements (II.A.51, II.A.52).

Every year, programs review the quality of their programs and demand in the industry. Based on UHCC data, the programs analyze and comment on the health of their programs. The Annual Review of Program Data (ARPD) is completed by all programs. The analysis stimulates discussions about the effectiveness of the programs and application for additional funds to maintain aspects of the programs (I.B.35, II.A.53).

Data on external licensure exam pass rates for programs are included in annual reviews provided by the UHCC (I.B.40) in addition to campus Intranet (II.A.54). The Aeronautics program data (line 21), for example, shows an external exam pass rate of 100% (II.A.55) and the Cosmetology program data (line 21) an external exam pass rate of 92% (II.A.56).

### Analysis and Evaluation

Honolulu CC meets this standard. The College's graduates completing career-technical certificates and degrees meet technical and professional competencies and preparation for external licensure and certification. Advisory groups with experts from the field provide critical insight in current industry practices and employment needs. Feedback from the groups inform curriculum changes to courses and programs that go through the College's curriculum process. Learning skills and knowledge focus on content knowledge of the subjects as well as practical skill development that leads to immediate employment. Continued professional development is encouraged and promoted to students as they contemplate advancement of their careers.

[II.A.15](#) When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

---

#### Evidence of Meeting the Standard

The College follows the Board of Regents policy ([II.A.40](#)) when programs are terminated. Established programs deemed to be out-of-date or nonproductive based on a program review may be terminated. However, the institution will remain committed to students already officially enrolled in the programs for up to two years for associate degrees.

The College also follows policy ([II.A.2](#)) for instructional and non-instructional programs to undergo a comprehensive review at least once every five years. Through this review, the College determines resource allocation.

Effective Spring 2016, the College closed its Commercial Aviation program. Although there were no more intakes of students into the program, current students were held to prior catalog year program requirements ([II.A.57](#)). Students already enrolled were allowed to continue their programs, based on the college catalog when they first enrolled.

Assessment of the Construction Management (CMGT) and the Architectural, Engineering and CAD Technologies (AEC) programs initiated a merging of the two in summer 2016 because of many crossover courses ([II.A.58](#)). As with the AVIT program,

enrolled students could continue their programs based on the catalog when first enrolled.

Classes offered at the Hickam Air Force facilities were suspended in fall 2017 for evaluation of the operations there. The offerings there were liberal arts courses, which can be taken at the main campus or through distance education. The suspension does not prevent students from achieving degrees.

### Analysis and Evaluation

Honolulu CC meets this standard. Program viability is a component of the review process and programs which cease to be relevant or which sustain enrollment declines due to employment saturation are examined for discontinuance. New programs are added as fields change and evolve and as demand for the degree increases. When programs are eliminated or program requirements are significantly changed, the institution makes appropriate arrangements so that enrolled students may complete their education in a timely manner with a minimum of disruption.

II.A.16 The institution regularly evaluates and improves the quality and currency of all instructional programs offered in the name of the institution, including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.

---

### Evidence of Meeting the Standard

The College maintains processes to evaluate instructional programs for effectiveness and currency, including curriculum, program review, scheduling, hiring, and professional development.

Each instructional program goes through an evaluation each year to determine its quality and currency. This Annual Program Review Data (ARPD) serves as a tool to analyze how a program performs in an academic year. The analysis is based on program data provided by UHCC (or UH System) institutional research. Program faculty review the data, which includes details on demand, effectiveness, efficiency, and industry

demand, among other areas that lead to student success. The evaluation reports are made public on the UHCC website ([I.B.40](#), [I.B.37](#), [I.B.38](#)).

The ARPD evaluations are used to improve the quality and currency of all instructional programs. In the evaluations, program faculty specify the need for further support because of student or industry demand, action plans to address deficiencies, possible funding required, program or course modified to become more efficient, among other action plans. The evaluations impact the direction for staffing, funding, and other needs.

### *Program Review and Effectiveness*

All the College's 56 career-and-technical education and liberal arts programs are evaluated each year. Distance education success rate and related information are included in the ARPD and evaluated by the programs.

Some programs also work with advisory boards to keep abreast of trends and needs in their related industries. These advisory boards provide important feedback for program assessment and by tying job demand to the effectiveness and purpose of the programs.

Through the ARPD evaluations, the institution systematically strives to improve its programs to enhance learning outcomes and achievement for students.

All courses, including pre-collegiate, are assessed each semester. Math and English as a Second Language (ESL) are the two main disciplines offering pre-collegiate courses. The English department eliminated pre-collegiate courses in Fall 2016. Math and ESL faculty provide student learning outcome (SLO) assessment.

### *Data Driven Decisions*

Program review data at the college consists of three categories of information; student success and achievement, student learning, and program key performance indicators such as enrollment, class efficiency and other ratios of effectiveness. The SLOs for distance education courses, like those of face-to-face courses, are evaluated by faculty each semester and included in the campus SLO report ([I.B.3](#)).

The College is committed to improve all its programs and its courses, including pre-collegiate and distance education. The institution has processes to gauge appropriateness and currency of its programs and courses to fulfill its mission.

### Analysis and Evaluation

Honolulu CC meets this standard. The College regularly evaluates and improves the quality and currency of all instructional programs including collegiate, pre-collegiate, career-technical, and continuing and community education courses and programs, regardless of delivery mode or location. The institution systematically strives to improve programs and courses to enhance learning outcomes and achievement for students.

## **Standard II.B: Academic Support**

II.B.1 The institution supports student learning and achievement by providing library and other learning support services to students and to personnel responsible for student learning and support. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education and correspondence education. Learning support services include, but are not limited to, library collections, tutoring, learning centers, computer laboratories, learning technology, and ongoing instruction for users of library and other learning support services (ER 17).

---

### Evidence of Meeting the Standard

The College provides learning services to promote student learning and achievement, including the Library and multiple tutoring programs. Among the tutoring programs are the Writing Center, Math Lab, embedded tutoring, the Hulili Ke Kukui Hawaiian Center, Testing and Tutoring, and computer labs that are committed to provide services sufficient in quality, currency, depth, and variety to support the educational programs for all students throughout their college pathway. The Library provides ongoing instruction and support for users of its services.

All learning support services are physically situated on campus and student learning is thoroughly supported as students have the opportunity to interact with multiple services across campus. Honolulu CC's mission, as stated, is to provide a high-quality learning environment that is "Student-Centered and Student Focused" and the college is dedicated to supporting student learning as part of that mission.

### *Library*

The Honolulu CC Library provides services to support the campus' educational programs. These services are sufficient in quantity, currency, depth, and variety. In providing services, the faculty librarians and paraprofessional staff are guided by the Library's mission, which is to support "the mission of the college by assisting students, faculty and staff in obtaining and using information resources effectively to enable and promote student learning" (II.B.1). In this way, the Library's mission is aligned with the larger institutional mission. (See *Standards I.A.1-3*). Library services include information literacy instruction, library presentations, reference assistance, access to the physical and digital collections, and access to computers, printers, scanner and other equipment. The Library assesses its services, as well as all aspects of its operations, as

included in its annual reports (II.B.2, II.B.3, II.B.4). Information regarding access to equipment and services are more fully addressed in sections II.B.2 and II.B.3.

All students, faculty, and staff regardless of their programs or location are equally supported by the Library and can learn about the services and resources available to them via its homepage (II.B.5). The webpage is the access point to the Library's catalog and electronic resources but also provides information about its services, policies, and general information.

While the Library is open, students, faculty, and staff have access to all its services, equipment, and resources. The Library is open 51 hours per week during the fall and spring semesters and 35 hours a week during the summer and semester breaks. During the fall and spring semesters, the Library hours are posted at the front door and are available on its webpage and brochure.

In addition to regular business hours when Library professionals provide face-to-face support services, students always have online access to its research databases and other research tools.

To ensure that additional support is available for online and off-campus locations, the Library has a designated Distance Education (DE) librarian. At the beginning of every semester, the DE faculty attend a mandatory meeting at which they are reminded of the Library's resources and services and given the opportunity to collaborate with the DE librarian to meet their needs and the needs of their students. In addition to the Library's webpage, an online guide is available to direct DE students, faculty, and staff to services and resources (II.A.6). Electronic resources, including periodical database e-books, and streaming video are available online. The DE guide also provides contact information for the Library, the DE librarian, as well as other DE support services available on the campus and through the UH System. *(See QFE 2 – Enhanced Distanced Education Support Initiative. Library support may be include in year 2.)*

Students, faculty, and staff at off-site locations as well as those involved with DE courses are encouraged to call or email the Library or DE librarian with any questions or needs that they may have.

#### *Library Services: Information Literacy Instruction*

Information literacy instruction classes are provided upon request from the instructional faculty. Librarians also reach out to the campus at the beginning of each semester to encourage faculty to schedule their library sessions. Faculty librarians collaborate with instructors to determine the needs for each individual class. This

includes working with faculty to provide instruction and additional support as necessary for academically at-risk students and for students in gatekeeper and development education courses. Instructors’ assignments, course content, learning objectives, and dialog with the librarians help determine the best resources and teaching methods for the classes. Sometimes this means that the librarians teach multiple library sessions for the same courses so that the content is paced at the appropriate speed for the students, especially those in first-year writing courses. Locating resources and materials, search strategies, and resource evaluations are some of the topics covered in the sessions. Various disciplines on campus request instruction via the Library so the librarians are adept at showing resources for classes in various disciplines such as Botany, Carpentry, Hawaiian Studies, Early Childhood Education, English, and Psychology, to name a few. A snapshot of instruction numbers are noted in the table below. For a complete list of courses taught and number of attendees in each class, please refer to the Library Instruction Statistics 2014-2017 documents ([II.B.7](#), [II.B.8](#), [II.B.9](#), [II.B.10](#), [II.B.11](#), [II.B.12](#)). All the librarians also provide in-depth and personalized instruction for students who ask for help at the reference desk, via email, or over the phone.

Library Instruction	FY 2014	FY 2015	FY 2016	FY2017
Presentation Sessions	126	121	130	153*
Number of Participants	1,963	1,680	1,837	2,070

\*Tours accounted for 43 sessions, 453 students of the total ([II.B.2 \[p. 5\]](#), [II.B.3 \[pp. 4-5\]](#), [II.B.4 \[p. 5\]](#))

*Illustration-Standard-II.3 Library instruction statistics*

The DE librarian provides instruction to off-campus locations, including military bases and high schools, by request of the instructors. The Library also subscribes to LibGuides, which are online guides that direct students to physical and online resources for specific subjects and disciplines. LibGuides assist librarians to tailor guides for specific courses, assignments, or topics to help students in learning information literacy and guide them to useful resources.

To further assist DE and off-campus student and faculty, the DE librarian created a LibGuide about DE services and resources ([II.B.6](#)), created LibGuides for specific DE courses and assignments, recorded instructional videos for specific classes, and offers an embedded librarian service for a few courses via the class Laulima site.

*Library Services: Library Lecture Series & Makerspaces*

Since spring 2015, the Library has hosted and co-hosted presentations for the campus, as noted in the Library Annual Reviews 2015-2017 (II.B.2, II.B.3, II.B.4). The Library's motivation for providing this service is to enrich the students, faculty, staff, and the community with four goals in mind:

- The Library aims to create a sense of community on campus that builds relationships among students, faculty, staff, and guests;
- The Library seeks to provide interesting, timely, and informative presentations that will increase critical thinking skills and expand people's worldviews;
- The Library provides professional development opportunities for faculty to learn about their counterparts' research and interests; and
- The Library provides Honolulu CC faculty and outside presenters the ability to share their knowledge with the campus community (II.B.13).

The Library has hosted over twenty presentations on many topics, including comic books, romantic love, poetry, Halloween, gender roles, time management, emergency preparedness, and the Hokulea voyaging vessel, among others. The presentations have been highly attended and received highly favorable evaluations (II.B.2, II.B.3, II.B.4).

The Library recognizes that part of supporting student success is not only providing services, resources, a physical space, and equipment, but also ways to help students de-stress. In view of this, the Library created a space on its first floor that allows students to mentally relax with hands-on activities such as coloring, crossword puzzles, word searches, and mazes. For special occasions, activities are organized for students to create gift bags and tags for Christmas, decorate treats for Halloween, construct Valentine's cards, and so on (II.B.3 [p. 9], II.B.4 [p. 10]).

#### *Library Services: Reference Service*

The librarians provide reference service during Library hours. All librarians rotate shifts on the reference desk and field questions in person, over the phone, and via email. Questions vary from how to find a book to finding primary sources for a research paper. Reference interactions are recorded in Gimlet, a subscribed software to record and analyze transactions, which also helps librarians refer to answers quickly and ensure continuity of service for helping students with research questions. Librarians can review the help a student received from a previous librarian and pick up the interaction from where it left off so as not to start from the beginning (II.B.2 [p. 6], II.B.3 [p. 5], II.B.4 [p. 6]).

Reference Questions Answered	FY 2014	FY 2015	FY 2016	FY 2017
	3,617	2,774	2,325	1,928

*Illustration-Standard-II.4 Reference questions asked*

The decline in reference questions can be attributed to several factors: lack of diligence in recording questions, a decrease in enrollment, and availability of other student support services on campus. Librarians have recognized the need to improve the loggings for queries.

The DE librarian provides reference service to students and faculty while on location at the off-campus sites and communicates with DE and off-campus students over the phone and through email. Periodically faculty also request return visits to off-campus classes to assist with research and address student questions. The LibGuides also serve as a reference tool to help DE and off-campus students to navigate the Library’s resources.

*Library Services: Library Collections*

Honolulu CC’s Library collection contains the following items for the fiscal year 2016 (II.B.14 [p. 2]).

Number of:	FY 2016
Print Monographs	63,772
eBooks	140,901
Journals	158,485
Print Serial Subscriptions	150
Electronic Databases	91
Microform Pieces	1,336
Audiovisual Items	1,366

*Illustration-Standard-II.5 Library reference materials*

Previous years statistics are included in UHLC Statistics (II.B.15 [p. 2], II.B.16 [p. 2]).

The Library provides access to an ample variety of quality resources in the physical and electronic collections that support all Liberal Arts and CTE programs offered by the college. The Library's physical collection of materials includes but is not limited to books, reserve textbooks, periodicals, DVDs, and other multimedia. Access to the physical collection is during business hours, but the Library's vast online collection is available 24 hours a day to all students, faculty, and staff through remote login via the Library's webpage. Electronic library materials are available as long as the patron has access to a device with Internet access, is currently affiliated with Honolulu CC, and has less than \$10 in library fines.

The Library's online resources cover all disciplines offered on campus, at our off-site locations, and online. Patrons have access to subscribed databases that cover a variety of subject areas and types of resources, such as e-books, articles, streaming films, and images. The Honolulu CC Library purchases some databases, while others are acquired through the Hawai'i Library Consortium and UH Libraries. Additionally, and not included in the statistics, are links to open access or feed databases such as Bishop Museum Publications, Directory of Open Access Journals, and 'Ulu'ulu: Henry Ku'ualoa Giugni Moving Image Archive of Hawai'i. The Library also uses LibGuides, which are online guides, to direct students to the physical and online collections as well as credible sources available on the Internet. If students have trouble connecting to the electronic resources, they are directed to call or email the Library.

#### *Library Services: Equipment & Physical Space*

All equipment is accessible in the Library, which is located on the first two floors of Building 7, with approximately 34,200 square feet of space. The entrance is on the first floor of building 7, which is where the reference desk, circulation desk, two group study rooms, student computers, research terminals, reference and periodical collections, individual and collaborative study space, and instruction area are located. The second floor of the Library is the quiet study area that provides tables and carrels for individual study. Additionally, on the second floor are three group study rooms as well as the circulating collection. Most of the tables and carrels in the Library have outlets available for students to charge their personal devices. Further discussion of Library equipment is in section II.B.2.

#### *Learning Support and Tutoring Services*

College Achievement and Retention Experience (CARE)			X			X
Career Services			X		X	X
Computer Lab			X	X	X	X

*Illustration-Standard-II.6 Learning support services*

*Writing Center*

The Writing Center (II.B.17) serves the whole Honolulu CC student body with tutoring in all aspects of writing for all courses offered at the college. The Writing Center also

trains and manages its own tutors as well as embedded coaches. The Writing Center aligns with student learning outcomes (II.B.17):

- Students will have a clearer understanding of specific writing tasks as a result of supplemental learning.

The Writing Center provides walk-in and appointment tutoring Monday through Thursday. Students can also book appointments on Friday. Online services are available by appointment for distance education and other students.

#### *Embedded Tutors: English*

The English 100/100S and English 100/100T embedded coaches are assigned classes to assist students with writing. They attend all classes during the semester.

The English 100/100S and English 100/100T courses include embedded coaches to help students with their writing assignments. The embedded coaches attend all classes during the semester and assist the instructor by providing individual or group writing assistance during the classes. The embedded coach initiative is deemed to be integral to the student success of 100/100S and English 100/100T courses and has been emulated to some degree at other UHCC campuses (II.B.18).

#### *Math Lab*

The Math Lab (II.B.19) is designed to support all Honolulu CC students with tutoring in mathematics skills. Tutoring is offered, free of charge and on a walk-in basis, to students enrolled in the College's math courses. The Math Lab tutoring is not a replacement for attending class or instructor consultation. Tutors can assist with odd-numbered textbook problems and ordinary computerized homework but will not assist with problems that will be turned in for grading without specific instructor approval. When there is any doubt, tutors will refer student questions to their respective instructors.

Instructors also may conduct organized math study groups in the Math Lab (II.B.19).

#### *Embedded Tutors: Math*

There are embedded tutors in co-requisite level classes Math 75/24/25. Tutors provide additional instruction during class time and act as assistants to math instructors. Tutors provide supplemental instruction and also assist students in using tools such as MyMathLab.

#### *Hulili Ke Kukui Hawaiian Center*

Hulili Ke Kukui Hawaiian Center maintains a computer lab, study space, lounge space, and tutoring for the campus (II.B.20). Although the center is committed to actively preserve and perpetuate Hawaiian culture and values, it is open to all students.

The University of Hawai‘i supports access and success of Native Hawaiians, and Honolulu CC created the center in addressing the “societal and educational challenges facing Native Hawaiians as a political entity.” Through an array of comprehensive services, the College strengthens educational programs and enables students of Hawaiian ancestry to succeed in their academic, career and individual endeavors.

#### *Po‘i Nā Nalu (Native Hawaiian Career and Technical Education Program)*

Po‘i Nā Nalu is housed in Hūlili Ke Kukui Hawaiian Center and provides Hawaiian students in Career and Technical Education Programs with support services to successfully navigate through higher education and beyond (II.A.21). This Native Hawaiian Career and Technical Education Program (NHCTEP) is funded by a Federal Grant from the United States Department of Education and is sponsored by ALU LIKE Inc, an organization promoting Hawaiian values.

Po‘i Nā Nalu provides tutoring to the indigenous native Hawaiian population for all course subjects. It offers a variety of services for program participants including annual orientations, staff classroom presentations, social media and website announcements, and outreach information tables. The services are available for individuals or groups via drop-in or appointment. Tutoring is encouraged for participants who have been identified during mid-semester with grades below 2.0 GPA in any course. Tutors offer academic success workshops on topics including, but limited to math, time management, and poetry and writing skills. Tutors annually complete the College Reading and Learning Association’s International Tutor Program Certification Training.

During the Kau Wela Summer Bridge Program, tutors are embedded in the classroom (for English 100 and Math 100 courses) and students have access to a computer lab (II.B.22).

#### *Student Success Center Programs*

The Student Success Center (SSC) supports the students, instructional faculty and the College by providing the coordination and implementation of student success initiatives to promote student retention and persistence. Programs and services offered through the SSC are to enable students to successfully attain their academic, career, and personal goals. The SSC is committed to:

- Promoting an environment that develops and engages a diverse community of learners.
- Empowering students to take responsibility and become accountable for their learning.
- Providing students with services and activities that develop the skills necessary for academic success and personal growth.
- Leading and collaborating with the campus community in the areas of student success, engagement, and retention.

Programs in the SSC include Testing and Tutoring, TRIO-SSS, College Achievement and Retention Experience (CARE), and Career Services:

- **Testing and Tutoring:** Testing services include placement testing, distance education testing, on-campus make-up, and non-UH testing. Tutoring services (II.B.23) include placement preparation and help with subjects across all the disciplines on campus, both on a drop-in and scheduled basis. Testing and Tutoring (TNT) provides access to the skills necessary for students to become responsible, self-directed learners.
- **TRIO-SSS:** TRIO-Student Support Services is a federally funded program through the U.S Department of Education. Honolulu CC has been awarded for the 2005-2010, 2010-2015, and 2015-2020 grant cycles. As stated on the website (II.B.24), TRIO-SSS strives to provide a range of academic support, career guidance, transfer planning, and professional development opportunities to qualifying community college students who are first-generation in college, have a financial need and/or disability, and demonstrate strong academic potential. Students receive guided individualized assessment and planning, small group tutoring, mentoring, cultural and educational workshops, club and community service activities, and other academic support.
- **College Achievement and Retention Experience (CARE):** The CARE program provides proactive, innovative, and high touch outreach to keep students attending Honolulu CC. When students are admitted and have yet to register, CARE calls to offer information about how the College can best meet their needs. For students who are registered and are struggling academically, CARE strives to aid them in keeping their eyes on achieving their educational and career goals. The CARE program (II.B.25) provides a variety of learning support to incoming students and those at risk through study-skills workshops and peer coaching.

- **Career Services:** Career Services provides a variety of resources to assist students and graduates from the beginning to the end of the academic journey. The center helps students define their place in the world of work through career and occupational exploration. The center offers career counseling, career assessments and assistance in selecting the right major. Career Services is also dedicated to assisting students with both campus and off-campus employment referrals. The center is committed to helping students with pre-employment services, such as resumes and cover letter writing, interview skills, and job preparation inquiries. Career Services conducts career assessments and action plans, user satisfaction surveys/evaluations (individual, group presentations, and after events), service counts (including gate counts of services provided, attendance at events, and utilization of SECE student employment and JCO job services).

Each individual program has its own defined goals and objectives, maintains individual budgets, and service area outcomes, but works collaboratively on student support initiatives to meet the SSC objectives above. Collectively the programs have worked on joint initiatives such as the iKEA student success workshops, the Interdisciplinary Studies (IS 103) courses, and College Experience Week, to name a few. The programs meet twice a month to continuously discuss and improve the coordination of services. SSC is located in Building 7, 3<sup>rd</sup> floor ([II.B.26](#), [II.B.27](#), [II.B.28](#), [II.B.29](#)).

### *Computer Labs*

The College has multiple computer labs accessible to students attending Honolulu CC. The college provides a variety of Computer Labs and Computer Classrooms for various subject areas and programs. These include Computer Labs for Information and Computer Science as well as computer-assisted drafting and design (CADD) (Building 2, 6<sup>th</sup> Floor), Math (Building 7, 4<sup>th</sup> Floor), and Writing Center (Building 7, 5<sup>th</sup> Floor).

Honolulu CC also supports student learning and achievement with the main Computer Lab (Building 2, 4<sup>th</sup> Floor). The Computer Labs also provides students with technical expertise. The Library also has a number of computers and printing services.

Tutoring centers also have computers and can function as computer labs to support student learning. There are computer labs in the Student Success Center (Building 7, 3<sup>rd</sup> Floor) and Hawaiian Center (Building 5, 2<sup>nd</sup> Floor), and for more specific use at the Writing Center (Building 7, 5<sup>th</sup> Floor), Math Lab (Building 7, 4<sup>th</sup> Floor), Information and Computer Science, Communication Arts as well as computer-assisted drafting and design (CADD) (Building 2, 6<sup>th</sup> Floor).

Distance education students are informed about physical campus resources and the variety of computers, printers and other equipment available through the distance learning webpage. Computer services are sufficient in providing a breath of computer access with current, updated software to the student body at Honolulu CC. The College does not offer correspondence courses.

College tutoring services are sufficient in supporting student learning across all disciplines. Tutoring centers are located in various locations campus-wide and offer a depth of support. Tutoring centers are consistently updated with training techniques and approaches and tutors are trained each semester to ensure currency of student support. The College has a strong commitment to improve student success by providing academic support.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution supports student learning and achievement by providing library and other learning support services. These services are sufficient in quantity, currency, depth, and variety to support educational programs, regardless of location or means of delivery, including distance education (ER 17). Learning support services include library services and resources, tutoring, learning centers, computer laboratories, learning technology, and continued instruction for users of library and other learning support services throughout the academic pathway.

II.B.2 Relying on appropriate expertise of faculty, including librarians and other learning support services professionals, the institution selects and maintains educational equipment and materials to support student learning and enhance the achievement of the mission.

---

### Evidence of Meeting the Standard

The Library consults with faculty whose expertise ensures that the informational, research, and collection needs are sufficiently met for the entirety of the institution and its mission statement. The Library and learning support services employ the professional expertise of faculty and staff members for learning outside of the classroom environment. The Library and student learning support services are dedicated to

providing ease of accessibility of information and maintenance of educational equipment for all students at Honolulu CC.

*Library*

The Library provides an array of materials and various equipment to support student learning and enhance the achievement of the mission (ER 17). The faculty librarians rely on their expertise to determine the needed materials and equipment.

The Library has a vast collection of physical and online materials. All students, faculty, and staff have access to its physical collection during business hours and to the online collection of streaming videos, e-books, periodicals, and more 24 hours a day. The librarians select materials to support the various programs at Honolulu CC. Each librarian is responsible for the collection development of specific areas, but recommend books for any area if they find something that might be of interest and support for students, faculty, or staff. Additionally, librarians learn about subject areas in the collection that should be expanded or specific books that should be added to the collection during reference interactions, collaborations with instructors or programs, instruction sessions, and at library events. The Library also utilizes Intrasystem Loan with UH Mānoa if needed materials are not available at Honolulu CC, such as print books or articles (II.B.14 [p. 1]). In this case, the librarians assess if adding certain materials to the collection is necessary. To further build a relevant collection, instructional faculty are encouraged to discuss collection needs with the faculty librarians (II.B.4 [p. 6])

Materials Added	FY 2016	FY 2017
Books	460	412
Media	23	21
Total	483	433

*Illustration-Standard-II.7 Library materials added*

There are also occasions when the instructional faculty and the librarians work together on grants to purchase materials for the Library. To better support CTE students, the Library offers an article database specific for vocational programs (Vocational Studies Complete) (II.B.5), a collection of CTE films in Films on Demand, as well as updated books for all of the CTE programs on campus. Faculty are also given an opportunity to provide suggestions on the annual user survey (II.B.30, II.B.31, II.B.32). Students are also encouraged to provide suggestions to the librarians or in the annual user survey.

Librarians assess the results of the survey as well as the usage statistics of the databases and circulation statistics to make changes to the Library’s collection as necessary.

The faculty librarians select equipment for the Library based on what is necessary for student learning and achievement. One of the key items students need for their success is computers with software and Internet access. The Library has thirty-eight computers available for student use. Two of the computers are available to any library patron for the purpose of using the Library’s electronic resources as well as the catalog. One computer is available on the second floor to access the catalog. The remainder of the computers are for student, faculty, and staff of Honolulu CC and the UH System. They are equipped with Microsoft Office, an Internet connection, and connected to color and black and white printing. Twenty-five of the computers are primarily for library instruction classes, but are available for students to use while class is not in session. Ten computers are always available for students whether or not class is in session. Students and other library users can find information about the Library’s computers and computer use policies on the Library’s webpage (II.B.33).

Students actively use the Library’s computers (II.B.3 [p. 6], II.B.4 [p. 7]).

Computer Usage	FY 2015	FY 2016	FY 2017
Users	30,882	30,848	26,662
Print Copies	53,811	54,953	49,631

*Illustration-Standard-II.8 Student usage of Library computers*

Other equipment in the Library goes a long way in helping the students succeed. Beyond the computers, the Library also has two color photocopiers, a scanner, two microfilm/microfiche machines, a mobile clear dry erase board, a TV with a VHS and DVD/Blu-Ray player hook-up, two charging stations that provide cables for various types of devices, and wireless Internet access for those who have their own devices. The Library also provides space for the students to study and collaborate. There are ample individual study carrels available on the second floor of the Library, plus tables, chairs, and group study rooms available on both floors.

The Library evaluates its equipment and materials with its various surveys, discussed more thoroughly in II.B.3. Based on comments received by students, faculty, and staff via the surveys, interactions at the reference and circulation desks, and observations, the Library has been able to make changes to the Library’s equipment and physical spaces. For example, the Library leased two color copiers instead of black and white copiers. Also, the Library was able to purchase a KIC Scanner that makes scanning more efficient

and provides more options such as text to speech capabilities, instant image editing, and direct downloading to phones and tablets.

Additionally, students commented on the old appearance of the Library and that the computers were constantly crashing or working slowly, so the librarians applied for two grants. In Spring 2014, the Library received two Achieving the Dream Innovation Awards. One of the awards for was \$25,200, with an additional \$5,000 from the campus, which helped the Library transform the first floor into a more modern space for students. The space now has open seating for collaborative or individual work and a place to sit and relax between classes. Previously the first floor was furnished with individual study carrels. The grant allowed the Library to purchase easily movable and brightly colored tables and chairs to reinvigorate the first floor, window shades to block out the hot afternoon sun, and two charging stations to provide cables for various types of devices. The new furniture also made it possible for the Library to provide programming to enhance student learning and a makerspace area. A second grant for \$14,000, with an additional \$5,000 from the campus, helped to purchase new computers for students (II.B.2 [p. 4]).

### *Tutoring Centers*

The Writing Center (II.B.17), Math Lab (II.B.19), Po‘i Nā Nalu (II.B.21), and Computer Lab (II.B.34) are situated in various locations across the campus. The Tutoring Center (II.B.23) provides math, English, and various content tutoring subjects. Students can either schedule appointments or drop in for tutoring services. The majority of students drop in. The college offers a variety of sites in which the students are able to access supplemental instruction to accommodate their various needs.

Locations where students are able to use technology are listed below:

Name of Service	Location	Number of PC stations/study workshop rooms	Focus
Writing Center	7-520	14 computer stations	Writing Tutoring
Math Lab	7- 421	17 stations	Math Tutoring

Po'i Nā Nalu	5-203	20 stations	CTE Student Tutor
Computer Lab	2-405	20 stations	General computer use and help
Library	7-1st floor	35 stations	General computer use and information literacy instruction

*Illustration-Standard-II.9 Technology locations*

The hardware and software utilized in the writing, math, and Po'i Nā Nalu centers, as well as the computer lab reinforce all classroom instruction and provide quality support for students. Computer hardware and software are maintained and updated by the College's Information Technology Services (ITS).

### *Writing Center*

The Writing Center houses fourteen desktop computers (with two laser printers) loaded with up-to-date versions of Microsoft Office 365 as well as being able to access Google Drive and related products. The computers are maintained and updated by ITS on a regular basis.

The Writing Center serves the whole of the student population of Honolulu CC. The majority of students served by the Writing Center and the embedded coaching initiative are from first-year composition courses of English 100/100S and 100/100T. The Writing Center is peer coach oriented with a faculty member also present to provide guidance, administration, and leadership.

The Writing Center frequently works with faculty in order to streamline student support materials in a more effective and efficient way. For example, some ENG 100/100S and ENG 100/100T instructors often collaborate with Writing Center personnel to refine approaches to their students in order to make their college experience deeper, more enriching, and relevant to their personal and academic roles.

Peer coaching is available to help students with organizing essays, editing for content, correcting grammar, understanding grammatical concepts, reading comprehension, interpreting assignment sheets, formatting essays in Microsoft Word, formatting quotes

and inserting research into essays. Students can also print essays, staple essays and use the various tools, such as hole-punches and highlighters (II.B.18).

### *Proactive Embedded Tutor English Programs*

The college, realizing that students may be reluctant to visit tutoring centers on their own, began proactive embedded tutor programs in the fall semester of 2016. Student tutors receive training prior to each semester and assist students in the English co-requisite courses, one-below or two-below college level. Both these courses allow underprepared students to complete ENG 100 in one semester. The tutors work with students in the classroom, along with the instructors. The embedded tutor program has improved English completion rates dramatically (I.B.47).

### *Math Lab*

The Math Lab serves the whole campus community. Students provide the math topics they need tutoring. The Math Lab has 13 tutors are students, trained each semester.

Students are served on a walk-in basis and formal appointments are not needed. The Math Lab has 17 computers equipped with math software such as MyMathLab, ALEKS, and WebAssign. Other materials available for students are calculators and copies of math textbooks.

All math faculty either inform students of the location and hours of the Math Lab or walk their students to the Math Lab during the first week of school. Hours and location are provided during the first day of instruction.

### *Hulili Ke Kukui Hawaiian Center*

The Hawaiian Center hosts a computer lab with twenty computer stations as well as study and lounge areas. Students can study, use the lab computers, visit friends, learn about Hawaiian culture, sign up for events on campus, receive academic counseling, get information about financial aid and scholarship information, use the Hawaiian reference library, obtain career counseling, and meet with peer coaches for tutoring in subjects offered across campus (II.B.35).

### *Po'i Nā Nalu*

Po'i Nā Nalu's (Native Hawaiian Career and Technical Education Program) educational equipment and materials are selected to promote student success by including materials that are not only required by instructors, but are recommended by faculty and staff to provide a greater depth of understanding of the subject matter. The purchase of

computer equipment is based upon recommendations from IT staff. The purchase of Native Hawaiian books, tools, and other implements is based upon recommendations from Hawaiian Programs faculty and staff. Distance education participants who are able to commute to Honolulu CC may take advantage of Po‘i Nā Nalu’s tutoring services and use or borrow computers or other equipment to support their student learning (II.B.36).

Po‘i Nā Nalu services are not available electronically.

Student Success Center Programs

Name of Service	Location	Number of PCs	Focus
TRIO-SSS	7-309	7 PC Stations	Tutoring for students in the TRIO Program
Testing and Tutoring	7-313	15 PC Stations	Tutoring in all subjects for all students
CARE	7-325	N/A	Retention Support

*Illustration-Standard-II.10 Student success center programs*

*TRIO-SSS*

TRIO-SSS strives to provide a range of academic support, career guidance, transfer planning, and professional development opportunities to qualifying community college students who are first-generation in college, have a financial need<sup>9</sup>, and/or disability and demonstrate strong academic potential. The TRIO-SSS program is fully funded by the grant, including the loaning out of textbooks, laptops, calculators, and voice recorders to students. Assessment of the TRIO-SSS program is managed by the U.S. Department of Education, since it is federally funded program (II.B.37).

*Testing and Tutoring Center*

The College’s Testing and Tutoring Center assesses its services and learning support equipment by evaluations and feedback from students and staff. The center consults with ITS for equipment and software upgrades and recommendations. The Testing and Tutoring Center computers are available for computerized tests and exams. In addition,

---

<sup>9</sup> See, Checklist on Compliance with Federal Regulations and Policies, Title IV

seating is available for pencil/paper tests and exams. Students with disability accommodations have access to testing rooms that meet Americans with Disability Act requirements (II.B.26).

### *College Achievement and Retention Experience (CARE)*

The CARE Retention Specialists and CARE coaches attend annual conferences, workshops, and webinars to be kept abreast of current student success initiatives and best practices. All coaches are trained and are required to attend workshops that will assist them with their skill sets. The information gathered from these opportunities are used to enhance and promote new materials in facilitating study skills workshops, applying best practices within the CARE program, and support college initiatives focused on student success and retention (II.B.38).

### Analysis and Evaluation

Honolulu CC meets this standard. All materials and resources are carefully considered and tailored by faculty and staff for student support. The learning support services rely on collaboration between faculty and staff to refine these materials for classroom support. Evaluation of the quality, currency and relevance.

II.B.3 The institution evaluates library and other learning support services to assure their adequacy in meeting identified student needs. Evaluation of these services includes evidence that they contribute to the attainment of student learning outcomes. The institution uses the results of these evaluations as the basis for improvement.

---

### Evidence of Meeting the Standard

*(Pearl Harbor Naval Shipyard?)*

#### *Library*

The Library evaluates all resources, services, materials, and equipment via multiple means to ensure their adequacy in meeting student needs. First, the Library collects data through various surveys during the year: 1) the Annual User Survey (II.B.39, II.B.40, II.B.41), 2) the Faculty Instruction Survey, 3) the Student Assessment of

Instruction Session, and 4) Library Lecture Series Survey. The Library also collects statistics such as database usage, circulation numbers for materials, computer logins, printing totals, a gate count, reference desk interactions, and attendance at presentations or information literacy sessions. Statistics are detailed in the Library Annual Reports (II.B.2, II.B.3, II.B.4), including Library Instruction Survey, the Faculty Survey, and the Library User Survey. More details are available in University of Hawai'i Library Council Statistics (II.B.14, II.B.15, II.B.16).

The Library's collective mindset is focused on what students need to be successful. The librarians and paraprofessional staff constantly evaluate and adjust services to meet the needs of patrons based on survey results or interactions in the Library. Based on survey results and interactions with students, the Library added a scanner, color photocopiers, suggested presentations as part of the Library lecture series, and included or expanded hands-on activities during information literacy sessions, to name a few.

The Library also provides analyses for Annual Reports of Program Data (II.B.39, II.B.40, II.B.41). The data for each year indicates that the Library is "healthy." Library data along with assessment are also contributed to US Department of Education Integrated Postsecondary Education Data System (IPEDS), and to the Association of College and Research Libraries (ACRL) Trends and Statistics Survey.

Furthermore, all evaluations done by the Library are framed with meeting the Library's student learning outcomes (SLO) and Service Area Outcome (SAO) (II.B.2 [pp. 1-2], II.B.3 [pp. 1-2], II.B.4 [pp. 1-2]). Additionally, the Library incorporates the following two institutional learning outcomes (ILO) into their SLOs:

- Information Literacy – Form strategies to locate, evaluate, and apply information, and know the ethical and legal issues surrounding information and information technology. (I.A.1 [p. 15])
- Critical Thinking – Effectively analyze arguments, assumptions, and problems and draw conclusions. (I.A.1 [p. 15])

### *Learning Support Services*

Learning Support Services are comprised of multiple centers on campus geared toward student success. Each learning support service creates its own student learning outcomes and assesses its program based on its particular goals, student populations, and the specific services. Collectively, Learning Support Services are proactive in assessing potential student needs and providing services in alignment with learning outcomes in advance of implementing services. The result of action from assessment can be seen in the English embedded tutor program. Both the Writing Center and Math Lab

were implemented before changes to developmental education took place in fall 2016. Learning support services are dedicated to serving students and improving student learning outcomes and assessment of service usage in each center based on annual reporting and semester data.

### *Writing Center*

The Writing Center regularly evaluates student learning to implement or modify procedural and practical outcomes. These outcomes fall within the Student Learning Outcomes illustrated on the Writing Center website page (II.B.17) which is accessible through the main Honolulu CC website. The Center is open to all students of the Honolulu CC student body and the usage reflects this demographic.

The Writing Center's student learning outcome:

- Students will have a clearer understanding of specific writing tasks as a result of supplemental learning.

According to semester reports generated from the MySuccess (Starfish) support and retention system, students utilize the Writing Center from many courses placed within the Honolulu CC campus. Students also make use of the Writing Center to cover topics such as résumé writing for personal, professional, and career aspects of their lives (II.B.18).

The Spring 2017 Writing Center semester report also exemplifies how students acquire and hone self-reliance of their writing process through their visits to the center. The students identify what specific section(s) of their writing they feel need addressing. To be proactive in their learning, the Writing Center staff is in the process of creating “infographic-based” worksheets that address specific issues with grammar, writing, structure, etc. in a concise form for students to take home and promote an independent approach (II.B.42).

The Writing Center manages the embedded tutor program and has significant impact on the success of the ENG 100/100S and ENG 100/100T co-requisite model. With peer tutors embedded in classes, students get extra assistance in writing assignments and in asking questions. The college-level composition completion rate jumped to 60% in just the fall 2016 semester, when the co-requisite classes were implemented for the first time in a redesign of developmental education. The previous completion rate was 32% over four semesters from Fall 2013 (I.B.47).

In assessing the results, English faculty noted two main reasons for the success. One was the additional class time, double from the past, and the importance of the embedded tutors (II.B.43).

The embedded tutor program grew out of the idea of making the Writing Center more proactive. Instead of waiting for students to come to the center for help, tutors go into the classrooms to work with students on their writing assignments. As an effect of the embedded tutor program, more students have been coming to the Writing Center for additional help.

The Writing Center trains personnel periodically throughout the semester in order to better serve the student demographic in more effective ways. The training encompasses methods for addressing writing issues, managing center procedures, addressing students from diverse backgrounds and abilities. Training is often coordinated with other student support services such as ACCESS, CARE, and TRIO (II.B.44).

### *Math Lab*

Usage and outcomes are not currently tracked at the Math Lab, but an end-semester eCafe survey consisting of six questions revolving around the Math Lab's efficacy as it relates to student success will be implemented in fall 2018.

Online tutoring is not directly available in the Math Lab, but students can access several math-related software tutoring packages like MyMathLab, ALEKS, and WebAssign.

While the Math Lab serves the student demographic and is adequate to meet identified student needs, the lab is not currently active in assuring adequacy and identifying student needs through formal data collection.

Assessment for the Math Lab is based on improving its institutional initiatives.

### *Hulili Ke Kukui Hawaiian Center*

Hulili Ke Kukui Hawaiian Center uses several tools to assure adequacy in meeting student needs from intake and exit surveys. All visitors to the Center, including students, staff, faculty, and community members, complete a short check-in survey (II.C.47). This survey is used by the center to track access, use of services, and services highest in demand (II.C.48). A usability survey (II.C.49, II.C.50, II.C.51) is also sent to faculty, staff, and students at the end of the year to the entire campus to determine overall satisfaction with services and suggestions for future cultural activities. At each cultural event, attendance is monitored (II.C.52) and evaluations collected (II.C.53).

Currently, Hulili Ke Kukui Hawaiian has developed student learning outcomes, which will be assessed from 2018.

### *Po‘i Nā Nalu*

Po‘i Nā Nalu (Native Hawaiian Career and Technical Education Program) is funded through a Carl Perkins grant and assesses the effectiveness of its learning support equipment and materials each semester. Each participant’s use of equipment and materials is tracked to determine if the use has had a positive effect on student persistence and GPA compared to the previous semester. At the completion of each tutoring session or academic success workshop, each participant completes an evaluation. The evaluation assesses the effectiveness of each activity.

The depth and variety of materials used by Po‘i Nā Nalu is limited by budgetary constraints and grant regulations. Using faculty and staff recommendations, funds are expended as cost-effectively as possible to meet the learning needs of participants. Funds cannot be expended to override what is already available to participants by campus resources. Po‘i Nā Nalu works closely with Alu Like Inc, one of the sponsoring organizations, to track student process and grant initiatives (II.B.36). More information on assuring adequacy in meeting student needs can be found in II.C.2.

### *Student Success Center Programs*

Program and services under the Student Success Center continue to assess its service area outcomes (SAO) each year through an annual report (for all programs regardless of an ARPD requirement or not) and create action plans to address the evolving needs of students. Departments compile assessment information into a common annual report template. Reports are used for program modifications and discussions on budget requirements for the following year (II.B.26, II.B.27, II.B.28, II.B.29).

Recent modifications through annual assessments included adding more seats in the testing center to reduce student wait times, better scheduling of peer tutors, participation in outreach activities, and modification of workshops.

To ensure exemplary student success support, the CARE program evaluates the quality of services on an annual basis to determine if the program is fulfilling the service area outcomes. The feedback from the assessments are essential in determining whether program changes are needed in order to continue to meet the needs of students (II.B.45). All the programs continue to meet and exceed SAO, program expectations, and goals in servicing the academic support needs of students. There is ongoing assessment for tutor centers and embedded tutors to improve services to students.

Learning support services show a commitment to consistent improvement in the attainment of student learning outcomes by assessing the quality of service providers campus-wide. Tutors from the Writing Center, Math Lab, Hulili Ke Kukui Hawaiian Center's Po'i Nā Nalu, and Testing and Tutoring are trained each semester in their specific fields. Student Success Center Programs provide workshops led by dedicated TRIO, College Achievement and Retention Experience (CARE), and Career Services faculty.

### Analysis and Evaluation

Honolulu CC meets this standard. The Library and academic services assess programs to ensure they adequately support student needs. Evaluation of student learning outcomes drive decisions on improving services.

II.B.4 When the institution relies on or collaborates with other institutions or other sources for library and other learning support services for its instructional programs, it documents that formal agreements exist and that such resources and services are adequate for the institution's intended purposes, are easily accessible and utilized. The institution takes responsibility for and assures the security, maintenance, and reliability of services provided either directly or through contractual arrangement. The institution regularly evaluates these services to ensure their effectiveness (ER 17).

---

### Evidence of Meeting the Standard

#### *Library*

The Library has formal agreements, contracts, and leases with various vendors for resources such as the Library Management System (LMS) and equipment such as copy machines (ER 17). These contracts are entered into directly through the Honolulu CC Library or the Honolulu CC campus, or procured by the Hawaii Library Consortium or the UH System Libraries. All of the resources intended for direct use by the Library's patrons are either available via the Library's homepage or in the Library during business hours. The librarians also regularly use other contracted services and resources, such as Gimlet, LibShield, and SurveyMonkey, to ensure the usefulness of and accessibility to the Library, its collection, equipment, and services. These resources provide usage

statistics for the Library to review. Some services such as SurveyMonkey are specifically for the purpose of capturing data for analysis.

In most cases, the vendor is responsible for the security, maintenance, and reliability of their services or products. The UH System Libraries, for security purposes, maintains a proxy login for users to ensure the Library complies with requirements outlined in specific contracts, such as databases. This limits the use of resources to those physically in the Library or on campus as well as gives currently enrolled students, faculty, and staff remote access to the Library's electronic resources.

The Library has an assessment process to evaluate resources, services, and equipment, which was discussed in section II.B.3.

The College retains direct control of the Library, the math and writing tutor centers, the student success centers and the computer lab. These services belong to a network supported by ITS to provide security, maintenance, and reliability.

Honolulu CC also uses external vendors such as the Online Learning Academy at the University of Hawai'i at Mānoa, as well as Brainfuse, Accuplacer, MyMathLab, and ALEKS, but these are supplemental instructor options and the college does not rely on them as sole resources for instructing or tutoring students. At all times, the college maintains authority and control over termination of contacts and services. Evaluation of vendor performance is a standard procedure at the college and areas of improvement in the delivery of services are identified with the student interest as paramount.

#### Analysis and Evaluation

Honolulu CC meets this standard. The Library periodically evaluates each service through campus surveys and program reviews, which is a basis for data collection, analysis, and implementation of initiatives. These results from campus surveys and reviews are directly connected to other services of the college that align with its mission statement and strategic plan. The college is responsible for the service, maintenance, security, and reliability of each program.

## **Standard II.C: Student Learning Programs and Support Services**

**II.C.1.** The institution regularly evaluates the quality of student support services and demonstrates that these services, regardless of location or means of delivery, including distance education and correspondence education, support student learning, and enhance accomplishment of the mission of the institution (ER 15).

---

### Evidence of Meeting the Standard

The College regularly assesses and reviews the quality of its student support services to ensure strength of its mission and to continuously improve efforts that strengthen students' personal, academic, and professional development. Given the College's mission to provide accessible educational opportunities in a diverse and changing island community, support services are evaluated with a focus on equity, educational opportunity, and accessibility. (*See Sections I.A.1-4*).

### *Program Review for Improvement*

The College evaluates all of its student services through annual program reviews and five-year program reviews (II.C.1, I.C.2) and each support service also does its own additional assessments each year. These collective assessments account for all learning formats--on campus, off campus, and distance education classes. Feedback from students in these various learning formats is continually collected and utilized for devising program improvements.

Regardless of the format--on campus, off campus, or distance education--for delivering education, the College ensures that access to adequate and sufficient student services exists for all students, and that all support services are evaluated regularly. The main campus is the hub for student services, but it also serves facilities near the Daniel K. Inouye International Airport and at Sand Island. The College additionally provides a full-time coordinator and staff for the Apprenticeship Program at the Pearl Harbor Naval Shipyard. Although the students have access to all the student support services at the main campus, the Navy also provides services.

The neighboring high schools furnish their own support services for Early College High School (ECHS) and Running Start (RS) programs, though Honolulu CC academic counselors dispense scheduled direct on-site service to students for registration, pre-graduation sessions, and other activities.

At the Pearl Harbor Naval Shipyard Apprenticeship Program, the College provides a full-time coordinator and a full-time Education Specialist to provide assistance with admissions, registration, academic counseling, and graduation.

The College's student services are organized to provide ongoing assistance from pre-application to completion of coursework, in career, liberal arts, technology, transfer, and professional training programs. With support from the American Association of Community College's Pathways Project, the institution has been developing Student Success Pathways, (II.C.3, I.B.45), which are designed to create academic and career pathways for all students from pre-entry through completion and beyond.

The College provides a wide array of student services that are accessible and publicized to all students attending on campus, off-campus, or online programs of study. A number of services aim for holistic support, connection to the campus, and campus enrichment, such as the Outreach Office, Wellness Center, Student Life and Development, Health Office, and the Keiki Hau'oli Children's Center.

Supporting academic development are Advising/Academic Counseling, Admissions and Records, ACCESS, and Financial Aid. Services collectively reinforce support for students, and specialized programs include-Veterans Counseling, Po'i Nalu (Native Hawaiian Career and Technical Education Program), and Hulili Ke Kukui Hawaiian Center.

### *Outreach and Grants*

Outreach provides counseling and registration support to Early College High School and Dual Credit programs. Related to these services are CARE, which focuses on student retention, and TRIO, which assists first-generation students who have financial need and/or disabilities.

Information about student services is delivered to all students, whether they attend the main campus or the satellite campuses or study through distance education. Delivery of this information has been greatly enhanced in the past five years by restructuring and expanding the College's website under "Services for Students" and "Important Dates" (campus calendar). In addition, the College now provides information updates through social media, virtual campus tours, and direct email blasts. Upon request, scheduled chats can be arranged and conducted online (Google Chat or Skype) or by phone. The College also provides face-to-face communication about its support services through welcome booths and events to answer students' questions and invite them to get involved in sports, campus organizations, campus jobs, community service, and campus event planning. Throughout the year support services also are communicated through

on-campus orientation tours, brief in-class presentations, and campus campaigns. Each semester, faculty also refer students to support services on their own initiative and through online surveys (e.g. MySuccess) that are monitored by academic counseling.

All students may come to the main campus to utilize the student services, but they can also access these services via phone, email, Skype, or Google Chat. Most student business (e.g. applications, registration, payments, transcript orders) can be conducted online (I.C.7). Appointments are recommended for accessing academic or wellness counseling services. The Wellness Center does not have the capacity to offer online mental-health counseling that is compliant with HIPAA (Health Insurance Portability and Accountability Act), so it only provides confidential in-person counseling to individuals and groups.

Various on-campus services help to support the general well-being of the students and their ability to achieve academic and professional success. The Wellness Center posts flyers and collaborates with the College's trade academies to create displays about issues that challenge students, such as suicide, domestic violence, and depression, and the displays provide information about community resources for seeking help. Additionally, events are hosted about topics relating to emotional health, stress, and overall student well-being.

The Student Life and Development (SLD) office also organizes recreational student activities and intramural sports to promote a sense of campus community among students. The cafeteria was newly renovated and faces a new attractive courtyard where students, faculty, and staff can gather. The main campus thoroughfare is lined with food trucks and a coffee kiosk for refreshment.

The Keiki Hauoli Children's Center enables students with infants, toddlers, or preschool children to have access to affordable, high-quality childcare on site. The Health Office provides students with non-emergency care, first aid, health and medical insurance information, and provides email and posted notices about upcoming health events on campus (e.g. flu shot clinics or blood drives). Some services, such as the Hulili Ke Kukui Hawaiian Center, organize events and offer resources that can address particular needs and interests of specific constituents of students.

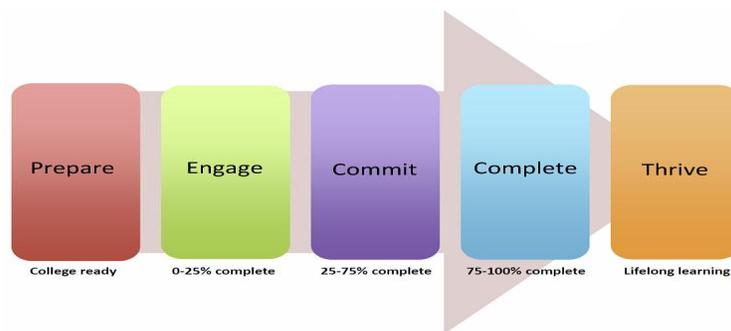

Similarly, the Veterans' counselors connect students with resources and host the Mobile Vet Center for interested students. A military and veterans counselor (II.C.4) provides counseling relevant to veterans and their families. For 2016, the College was named a Military Friendly School (II.C.5).

All student services are in compliance with Gainful Employment Disclosure requirements of the federal government and provide documented information to new incoming certificate students about affected programs for specific populations (II.C.6, II.C.7, II.C.8).

For purposes of assessment, all student services complete Annual Report of Program Data (ARPD) (II.C.1, II.C.2) assessments. These evaluations are done yearly and included in the student services report. All service units also contribute to a larger 5-year program review (II.C.9, II.C.10). The ARPD allows units to analyze quantitative and qualitative data concerning services, student learning outcomes assessments, and the connection between support services and the College's strategic plan and mission. Qualitative and quantitative data derived from the ARPD are used to evaluate student services and to drive meaningful change for program improvement and resource allocations. Each service area completes additional assessments by using student learning outcomes (SLOs) or service area outcomes (SAOs), surveys, and focus groups (II.C.9, II.C.10, II.C.11, II.C.12).

The College strives to integrate student services into the campus culture. To assess and evaluate whether support services are helping students to achieve their academic goals, the College particularly looks at persistence and retention. In particular, Student Success Pathways guide these efforts and overseen by the College Student Success Council (II.C.13). Within this framework are the iPASS and STAR initiatives, which create opportunities to engage and support students in a more comprehensive manner (II.C.14, II.C.15).

### *Student Success Pathways*

*Illustration-Standard-II.11 Student success pathways*

By focusing on each phase of the pathway (II.C.18), campus stakeholders identify existing barriers and discuss solutions to create better opportunities for students. For example, realization of barriers in the application process led to substantive changes in

how the Admissions Office provides assistance to students who apply. In response to student questions about the application, an information checklist was created and shared with students applying. To lessen academic challenges, outreach became more proactive and students are connected to academic advising support.

Assessment improves student support services overall and contributes to the fulfillment of the College mission. Student services have helped the campus achieve its performance goals for awarded degrees and certificates (II.A.34). Part of this success came through Reverse Transfer and auto-conferral of Certificates, which allowed the campus to confer degrees for additional students who have completed coursework, while transfer support through partnerships such as Ka'ie'ie (Degree Pathway Partnerships) and articulation agreements with four-year campuses within our system have helped to increase the percentage of transfer students.

To increase enrollment, the College targeted partnerships with Kupu (a non-profit organization focused on sustainability) and 3P (Pasefika Passion Pipeline). These have helped increase enrollment of Native Hawaiians and Pacific Islanders. Through high school partnerships, Early College High School has increased tremendously since its inception in Fall 2014. By the end of 2017, the campus will have serviced approximately 1000 students in Early College High School programs conducted by Honolulu CC.

Additional support for veteran students is now available since a second full-time veteran's counselor was hired through a TAAACCCT IV grant, which runs until spring 2018.

Through assessment, support services better understand the student experience and can determine whether services are fulfilling student needs. Regardless of location or means of delivery, support services are committed to enhancing student learning and student achievement, in line with the mission of the institution.

### Analysis and Evaluation

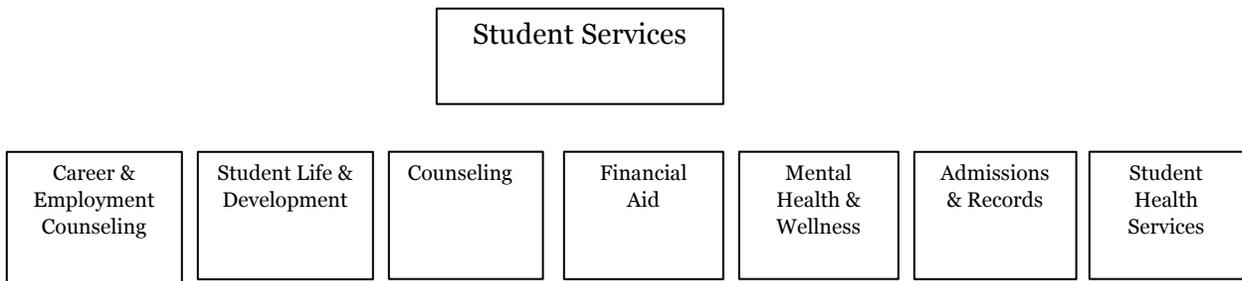

Honolulu CC meets this standard. The College offers a web of quality student support services to bolster student achievement. These services are designed to focus on equity, educational opportunity, and accessibility. All of the different services utilize assessment to help determine how to better fulfill the College's mission and further students' personal, academic, and professional development. Plans for improvement are created annually and also in five-year cycles. Identified needs are incorporated into the college resource allocation process and prioritized based on making progress on the college mission.

II.C.2. The institution identifies and assesses learning support outcomes for its student population and provides appropriate student support services and programs to achieve those outcomes. The institution uses assessment data to continuously improve student support programs and services.

---

### Evidence of Meeting the Standard

The College identifies and assesses learning support outcomes and provides appropriate services to students to ensure educational opportunities and academic success for all students. The Student Service departments regularly assess data to improve student support practices. A culture of evidence has been established in student services through the systematic development of student learning outcomes and assessments, to guide the division's resource requests and decision-making.

*Illustration-Standard-II.12 Student success pathways*

All areas of Students Services submit yearly program evaluations as part of the Annual Report of Program Data (ARPD) process (II.C.1). The ARPD for Student Services (II.C.2, II.C.16) encompasses a five-year review (2011 to 2016). The ARPD uses the following indicators to assess student services: staffing, resources, student enrollment, financial aid disbursement, persistence rates, degrees and certificates awarded, transfer rates (including transfers of Native Hawaiian students), and length of enrollment.

Each unit provides detailed information in the ARPD report about its efforts in meeting outcomes. The ARPD Report also includes analysis of student services results from the

Community College Survey of Student Engagement (CCSSE), which is administered every two years. The CCSSE (II.C.17) polls educational practices directly related to student retention and outcomes. As part of the ARPD and five-year review process, each unit reviews assessment data and creates an action plan to address areas in need of improvement. Yearly, since 2013, departments within Student Services have collected and evaluated assessments to provide quality support to students.

In 2015-16, the College began the Student Success Pathway (I.B.5, II.C.18) initiative to advance student success and completion. The pathway is a framework for the campus to facilitate student achievement, especially from the viewpoint of student services. The initial focus was on the “Prepare” phase, which supports student preparation and success from the date of admission to the first day of instruction. It encompasses outreach, developmental education, and enrollment management. Both the iPASS and STAR GPS initiatives are part of this framework and have helped support students in a more comprehensive manner (II.C.14, II.C.15). The Campus Student Success Council is the working group that drives the pathway by making recommendations and helping to implement initiatives related to student success.

Within the pathway framework, the student services units have developed assessment methods to measure achieved outcomes, which are described below:

#### *Admissions & Records*

Admissions & Records is responsible for providing admission services (II.C.19), maintaining student records (II.C.20), and dispensing and tracking Veterans Affairs benefits (II.C.4). The office disseminates a survey to students using its services. Survey results (II.C.21, II.C.22) are used to identify ways to make procedures can be made more user-friendly and efficient. In response to the survey, an online application was launched (in conjunction with the UH System) to streamline the application process (II.C.23), and the college catalog was put online (II.C.24). In further response to student feedback, coursework from transfer evaluations began to be enabled to work with STAR registration. Assessment is included in the annual reports for student services (II.C.9, II.C.10)

#### *Counseling*

Academic Counseling provides services for prospective, new, and continuing students and assists them in assessing and selecting their educational needs, career interests, academic qualifications, and appropriate degree programs (II.C.25). Additionally, information on program requirements, program status and eligibility, course placement, course sequencing, course selection, registration, transfer, credit by exam, and

graduation are provided (II.C.26). Counselors can further assist with financial aid academic certification, course waiver/substitution, STAR Graduation Pathways set-up and review, transcript evaluation, and academic success advising. Academic counselors are instrumental in providing support for students from registration through graduation. Counselors try to educate students about program requirements, registration processes, and course selection, so they can be self-sufficient, which is essential to academic success.

Many liberal arts students transfer to the University of Hawai'i at Mānoa (UHM) to earn four-year degrees. To facilitate transfers, the Ka'ie'ie pathway program has been available since 2014 (II.C.28). A UHM Transfer Specialist visits the campus every Monday but also can be contacted by email for an in-person, phone, or Google Chat appointments. The academic counselors refer students to the specialist, but students know about the pathway program from classroom presentations, posters, handouts, email blasts, and word of mouth.

Counselors use assessments to improve effectiveness. Assessment led to the transition from traditional paper advising to online STAR (II.C.15). This process required extensive inter-campus communication to ensure that various stakeholders were informed and able to provide feedback. Honolulu CC led the community colleges with this initiative and piloted the program with a group of students to ensure ease of use before being launched officially. The colleges created an online video tutorial (II.C.25, II.C.28) to make STAR GPS user-friendly for all students, and the video had a positive impact on facilitating use of the new registration interface (II.C.29). This new system informs students how to develop and follow the best pathway to complete their degrees.

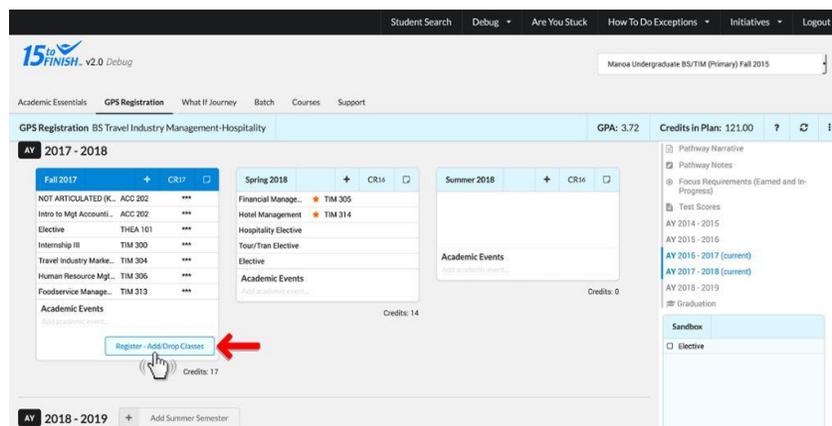

Illustration-Standard-II.13 STAR GPS

In addition to STAR GPS, counselors also employ MySuccess (II.C.30, II.C.31) to improve retention by tracking student progress. The student support and retention

system interfaces with the CARE office, which itself focuses on retention and student academic success. The use of new tools continues to be assessed and improved. After advising appointments, students are asked to complete a short satisfaction survey, which is used to improve delivery of services. From this, Counseling developed a procedure (II.C.26) to ensure that students understand their responsibilities and the services available to them. Assessment of Counseling also is included in the annual reports for student services (II.C.9, II.C.10).

### *Career And Employment Counseling*

Career Services provides programs and resources to facilitate the career development and employment objectives for students and alumni, in partnership with faculty, staff, employers, and community partners (II.C.32). To provide guidance through the on- and off- campus job search process, Career Services works to connect with students, connect with employers, and connect the two with each other. The services are available to students or alumni seeking part-time or full-time jobs.

To improve its services, Career Services employs several tools, including assessment of its SAOs each year to determine how well it is addressing student needs (II.C.33). It also tracks the counts of individual contacts and attendees at workshops, presentations, and other activities for career counseling. Service counts also are monitored for on- and off-campus jobs through SECE (Student Employment & Cooperative Education) and JCO (Job Center Online) (II.C.34).

Quantitative data is used to help Career Services gauge the effectiveness of efforts with students and employers and determine how to improve them. The data may lead to adjusting scheduling to boost workshop attendance, adding incentives to improve turnouts at job fairs and events, or refining communication methods to involve more students and employers. Qualitative feedback from students and employers may also be used to decide content and delivery strategies for workshops, career fairs, and training sessions.

### *Financial Aid*

Financial Aid helps students with monetary needs to attend college by assisting with the application process and helping with the disbursement of aid and scholarships (II.C.35). Financial Aid assesses outcomes primarily from data collected on aid disbursement and results from ARPD reports (II.C.9, II.C.10).

Financial Aid has taken great steps to improve processing of applications, and through its improved efficiency, has consistently met all Pell disbursement benchmarks set forth

by the University of Hawai'i System Office. Financial Aid also implements surveys and tally sheets to track student learning outcomes. They use the data to modify services. Consistent Financial Aid webpage updates and improvements have resulted from the assessment. The webpage provides critical and time-sensitive information to students about Financial Aid opportunities.

### *Student Health Services*

Student Health Services promotes a healthy and safe college community (II.C.36). A Registered Nurse provides first aid assistance, health education, and referrals to community agencies and services. The Health Office conducts a regular blood drive, established through a partnership between the University of Hawai'i and the Blood Bank of Hawai'i. Evaluations at the blood drives are administered to assess donors' experience, satisfaction, and knowledge of blood donation facts. Information helps in planning future blood drives and in informing students about their roles in saving lives. The Health Office also assesses training and educating student assistants. Through the training, new procedures were developed to streamline delivery of services. Assessment is included in the annual student services report (II.C.9, II.C.10).

### *Mental Health & Wellness*

Mental Health & Wellness offers students confidential personal and crisis counseling (II.C.37). The Wellness Center helps students manage personal life issues and navigate their college experience. A full-time Licensed Clinical Social Worker (LCSW) offers mental health and wellness services in-person only because the center does not have the proper setup or training to provide online counseling that is HIPAA compliant. Services, though, are available for students on campus or off-site. The LCSW supervises and trains two graduate students from the UH Mānoa School of Social Work two days a week at the center. With the assistance of these graduate students, the center is able to serve more students.

The Wellness Center also provides education about mental health and violence prevention to the campus through classroom presentations, enrichment groups and activities, online mental health screenings, and other methods. Each semester, the center hosts open houses and workshops to make faculty and staff aware of the Center's services available to them and all registered students, who may be referred to the Center.

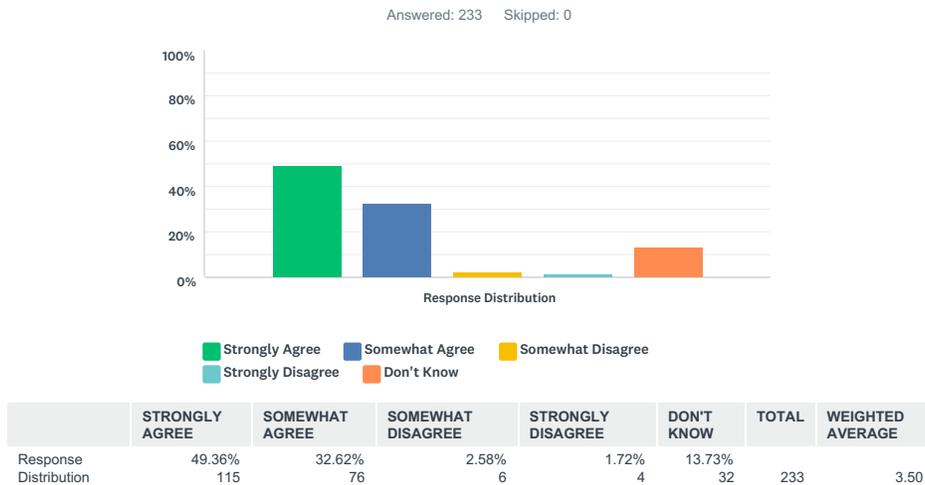

The Wellness Center strives to continually improve its services based on quantitative and qualitative feedback it gathers. The center tracks appointments, tracks attendance at educational events, administers evaluations, and conducts surveys. Assessment is

included within the annual reports for student services (II.C.9, II.C.10). As a result of the assessment, the Wellness Center moved to a more private space.

*Student Life and Development*

Student Life and Development (SLD) provides students with enrichment through social, cultural, recreational, and leadership opportunities (II.C.38). The College encourages students to be active in college governance and out-of-classroom activities. SLD activities add a dynamic dimension to the college experience by providing new learning experiences and opportunities.

Q6 HCC is a student-centered campus.

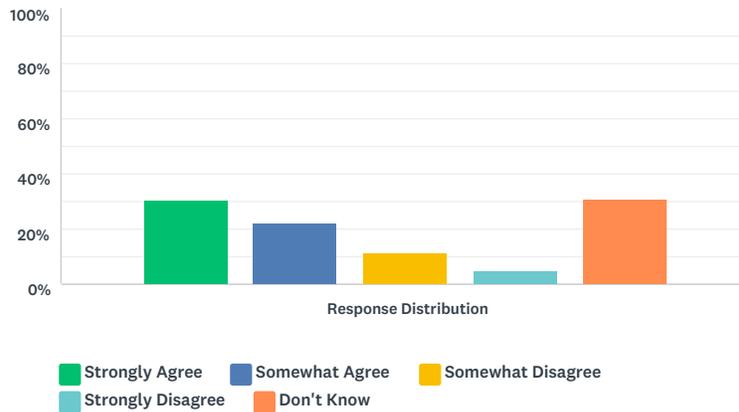

*Illustration-Standard-II.14 Student survey on campus*

To assess its effectiveness, especially its communication with students, the campus conducts surveys to students (I.A.21). In general, students enjoy participating in the numerous campus events organized by SLD (I.A.21). SLD also obtains feedback from students during monthly meetings of student government.

**Q26 Student events and intramural sports contribute to your educational experience as a student.**

	67	48	25	11	68		

*Illustration-Standard-II.15 Student survey on campus activities*

Assessment of Student Life and Development is included in the annual reports for student services (II.C.9, II.C.10).

*Outreach*

Outreach implements campus enrollment strategies and provides activities to support student’s successful transition to college (II.C.39). Key endeavors are to implement consistent messaging and branding, through training of faculty and staff, and to encourage strategic partnerships within the community. Outreach conducts recruitment communications, intake processes, campus tours, and campus fairs.

Outreach regularly collects information through informal discussions with partners, including high school counselors of feeder schools to determine satisfaction with the services and processes. Assessment of Outreach is included in the annual reports for student services (II.C.9, II.C.10). From assessment, Outreach switched in spring 2014 to web-based orientation (II.C.40), which is continually being updated and improved.

*Disability Services*

Disability Services offers coordinated services for students with documented disabilities (II.C.41). Disability service information and forms are available to all students on the

website. Disability ACCESS works in accordance with Section 84.4 of the Federal rules and regulations governing Section 504 of the Rehabilitation Act of 1973, which stipulates academic equity for qualified individuals with disabilities. Students can communicate by phone or online (email, Google Chat/Skype). Disability ACCESS is not required to be HIPAA compliant.

The office collects informal feedback from students, faculty and staff, and conducts regular classroom and service observations. Disability ACCESS provides assessment of SAOs (II.C.33) and is included in the annual reports for academic support (II.C.34).

### *Other Services For Students*

Hulili Ke Kukui Hawaiian Center has a role (besides academic support) in student services by designing services that cater to the Native Hawaiian population and to improve recruitment and retention. The center tracks Native Hawaiian enrollment each semester by high school and program major and holds events to encourage student involvement in the campus (II.C.43).

Po‘i Nā Nalu Native Hawaiian Career & Technical Education Program also has a second role (besides academic support) of preparing Native Hawaiian students with options for careers. The program is sponsored by ALU LIKE, Inc. and funded through a Carl Perkins Grant from the US Department of Education (II.C.44). The goal of the program is for Native Hawaiian students to obtain degrees and certificates for areas of employment in Hawai‘i with strong demand, advanced skills, or high wages.

Po‘i Nā Nalu implements several assessments throughout the year and works closely with the grant sponsor, ALU LIKE, Inc. to track student progress and grant initiatives. The Resource Management Report (II.C.45) is submitted to the grant sponsor each quarter to track progress of meeting the grant objectives. For events, sign-in sheets are used to track attendance and evaluations are administered to measure satisfaction and knowledge gained. The program uses a database to track detailed information about participating students’ progress, including classes passed, tutoring hours, GPA, graduation, and further education/training and employment after graduation (II.C.46).

At 3-month and 6-month increments after graduation, a staff member contacts each participating student to determine their progress after receiving a certificate or degree. Finally, an external evaluator is contracted by the grant sponsor to conduct a comprehensive study of the program’s progress. Collectively, these evaluations are used to create action plans to address any existing areas in need of improvement. For example, internship sites were diversified as a direct result of the external evaluator’s recommendations.

The Keiki Hau'oli Children's Center offers care and learning for children of students, faculty, staff, and the community (when space is available) (II.C.47). The center also is a training site for Early Childhood Education (ECE) students enrolled in certificate and degree programs at the College. The Center is nationally accredited by the National Association for the Education of Young Children (NAEYC).

The center hires ECE students to work as aides, and it surveys staff each semester to see if they are receiving the training, support, and knowledge essential to maintaining a licensed and nationally accredited (NAEYC) program. The surveys are analyzed to improve staff training and the operation of the care to children. The Center conducts formal and non-formal training. Lead teachers provide one-on-one mentoring to students. The center's advanced lab assesses student learning outcomes (SLO) every semester for students who are completing their practicum hours. The assessments of SLOs are used to enhance their course curriculum and redesign assignments as required. Assessment is included in the ECE program annual review ARPD (II.C.1).

#### Analysis and Evaluation

Honolulu CC meets this standard. The College has identified appropriate student services to support learning outcomes for its student population and assesses its services to achieve those outcomes. Each unit continually collects and evaluates data to assess their services and participate in annual reviews of their services. The assessments help refine the services provided to students to help them achieve their academic goals.

II.C.3 The institution assures equitable access to all of its students by providing appropriate, comprehensive, and reliable services to students regardless of service location or delivery method (ER 15).

---

#### Evidence of Meeting the Standard

The College provides equitable access to all students no matter the location or delivery method. Support services are housed on the main campus, where most students have classes, but students at other campus locations or studying through distance education can view information about the services on the website and can access and communicate with specific services online or by phone.

As noted above in the previous section, admissions, orientation, registration, counseling, financial aid, disability, records, transfer to four-year college, and other information is available online. Services are offered the same way to all students – in-person, by phone or email, or via Skype or Google Chat. Appointments also can be arranged for services such academic advising or mental health counseling. Continual assessment of these services aim to ensure support to students is appropriate, comprehensive, and reliable.

All students have access to the College’s policies and procedures, which are on the main website (II.C.48) and in the catalog (I.A.1 [pp. 65-68]). These policies and procedures explain students’ rights and responsibilities regarding issues such as academic grievances, alcohol, illegal drugs, tobacco product, weapons, sexual assault, and anti-discrimination.

Student complaints since the last comprehensive evaluation are available at Records and the office of the Dean of Student Services. In handling each case, the College follows its policies and procedures accurately, and maintains records of both academic grievances and behavior violations. Students can also file grievances through the College’s website link to the Accrediting Commission for Community and Junior Colleges, Western Association of Schools and Colleges.

Title IX coordinators help support a safe and nondiscriminatory environment, The University of Hawai’i system required all faculty and staff to complete an online Title IX training program called, “Intersections: Anti-Harassment -Title VII - Title IX - VAWA Section 304.” New students are also encouraged to complete online Title IX training.

### Analysis and Evaluation

Honolulu CC meets this standard. Student services are accessible to all of its students, including students in distance education and off-campus programs. Through assessment, the institution ensures these services are appropriate, comprehensive, and reliable.

II.C.4 Co-curricular programs and athletics programs are suited to the institution’s mission and contribute to the social and cultural dimensions of the educational experience of its students. If the institution offers co-curricular or athletics programs, they are conducted with sound educational policy and standards of integrity. The institution has responsibility for the control of these programs, including their finances.

### Evidence of Meeting the Standard

The College's co-curricular programs are geared to provide educational opportunities for students through an engaging learning environment, in line with the mission of the institution. These co-curricular activities also develop personal growth, which also aligns with the mission. Student Life and Development (SLD) encourages all students to be involved in social and cultural events and other activities that enhance engagement in the higher education experience. The College does not have an athletic program, but it does provide opportunities for students to participate in some intramural sports. SLD manages student activities, including the finances.

Also, in line with the mission, SLD seeks to engage students of diverse backgrounds and identities in the events and activities to help their experience and knowledge beyond the classroom. Among the campus events that students have organized with oversight by the SLD office are those focusing on Filipino, Japanese, Polynesian, Scandinavian, and Nepalese cultures. These events feature posters, discussions, demonstrations, and cuisines (II.C.49). The SLD also supports Student Government, the Student Activities Board, Student Media Board, and a variety of clubs for students to join. The Student Media Board produces a campus newspaper and an art magazine, which allow students to communicate a voice to the campus, particularly to other students. The newspaper, the *Ka Lā*, has won awards of excellence. Such activities create a sense of belonging and community for students attending Honolulu CC, a feeling of connection that works to improve students' persistence to graduation.

In addition to the SLD, the Hulili Ke Kukui Hawaiian Center is committed to actively preserving and perpetuating Hawaiian culture and values. It fosters activities and events to broaden understanding of the indigenous culture, in line with the College's mission and the University of Hawaii's Na Papa O Ke Ao initiative (II.C.50), which aims to develop, implement, and assess strategic actions to make the university a leader in indigenous education. The center also provides services that enable students of Hawaiian ancestry to succeed in their academic, career, and personal endeavors.

Each semester, the center helps to coordinate five Mālama 'Āina Days for students, staff, and faculty to provide hands-on learning opportunities about Hawaiian culture and traditional sustainability practices, such as water management, taro cultivation, and traditional food preparation.

### Analysis and Evaluation

Honolulu CC meets this standard. Co-curricular programs and athletics programs are suited to the institution's mission and contribute to the social and cultural dimensions of the educational experience of its students. The institution has responsibility for the control of these programs, including their finances.

II.C.5 The institution provides counseling and/or academic advising programs to support student development and success and prepares faculty and other personnel responsible for the advising function. Counseling and advising programs orient students to ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.

---

#### Evidence of Meeting the Standard

The College provides counseling and academic advising programs to support student development and success. Through certifications and continuous training, workshops, and conferences, all personnel responsible for advising, including instructional and non-instructional faculty, are prepared to help students understand requirements of their programs of study. Students receive timely, useful, and accurate information about academic requirements, including graduation and transfer policies.

The College's biggest step in this direction is STAR Graduation Pathways (II.C.15), which is an online program available to all admitted students to track their coursework to graduate without taking superfluous credits. Valuable for registration each semester, the program displays courses students need to stay on the pathways to degree or certificate completion, or transfer to a four-year institution. STAR was implemented for all students in fall 2016.

Students receive an orientation from advising staff on how to use the STAR, so they understand their program of study requirements and achieve their academic goals. Useful and accurate information about relevant academic requirements, including graduation and transfer policies, are disseminated to students in a timely manner.

Additionally, web-based STARFISH/MySuccess (II.C.30) provides a mechanism by which instructors can proactively provide students with feedback about attendance,

grades, and overall progress. The program is linked to student support faculty and staff, giving them information to proactively assist students.

STAR includes a number of features: Academic Essentials, GPS Registration, What If Journey, Transcripts, and Scholarships. The Academic Essentials feature of STAR allows students to see their progress towards their degree program at a glance. Students also can view graduation requirements, financial aid status, academic requirements, non-applicable course listings, advisor notes, events or actions on their records, and graduation goals. Students are also kept informed about their progress towards general education requirements and degree requirements. Progression towards satisfying a general education requirement and a degree requirement is indicated as complete, tentatively complete, or incomplete ([II.C.28](#), [II.C.29](#)).

STAR keeps students informed of progress towards attaining their degrees. Students see their graduation requirements, such as grade point average and focus requirements, and when courses are non-applicable or may not transfer, advisor notes, and Events and Actions are viewable by the student and are encouraged to meet with an academic counselor. Students see advisor notes and Events and Actions inform students of issues that may impact their pathways.

The GPS Registration feature of STAR displays required degree requirements. Courses required for a degree are listed as suggestions for student to consider when registering for a particular semester. Based on the students' particular needs, the students may need to modify their pathways to reflect part-time status, personal choices, summer course possibilities, and other factors. Students can view classes available during the registration period.

For a student who is considering transferring to another University of Hawaii campus, the What If Journey feature of the STAR gives the student an overview of what progress would look like if another major were chosen. The What If Journey feature takes into account the student's academic history.

An additional STAR feature is the ability to view transcripts, including course credits from other institutions if students transferred into Honolulu CC. Students can view these unofficial transcripts by semester or in department layout. Transcripts provide students with important information, including placement test results, that is specific to a University of Hawaii campus attended.

The Scholarship feature of STAR helps students search and apply for scholarships that are administered by the University of Hawaii System. For example, scholarships can be

searched for a certain demographic profile. To enter the Scholarship search engine, students log in with their unique UH username and password.

At any time while using the STAR, a student may request assistance from the STAR System Team by utilizing the Are You Stuck feature. This feature allows for students to email questions, suggestions, or comments regarding STAR. Follow up by a STAR System Team member is done within twenty-four hours. In the event that the STAR System Team member is unable to respond the student's question, notification is sent to the designated campus GPS Director so it can be addressed. For technical difficulties, students are instructed to contact the STAR System Office. Additional assistance is offered by way of tutorial videos and help docs on the STAR Help Website (II.C.15).

Academic counselors hold new student registration sessions to inform students how to utilize the STAR and select features of STARFISH/MySuccess. These sessions also educate students as to what to expect when entering college. Student registration sessions are mandatory for all incoming new students.

Academic Counselors also meet individually with new and continuing students to assist with educational and career planning, to guide them through the registration process, and to review and understand their degree pathways.

Online students may schedule in-person or online counseling sessions and can view their classes and pathways to graduation through STAR, which is available anytime through the campus website.

A specialist of the Ka'ie'ie transfer pathway program (II.C.30) is available on the main campus once a week but can be contacted by email for an in-person, phone, or Google Chat appointment.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution implemented STAR as a comprehensive counseling and academic advising program for all students, including those on off-site locations and online students. In addition to STAR, counselors provide training, workshops, and other methods to prepare faculty and staff for to advise students and ensure they understand the requirements related to their programs of study and receive timely, useful, and accurate information about relevant academic requirements, including graduation and transfer policies.

II.C.6 The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate, and transfer goals (ER 16).

---

#### Evidence of Meeting the Standard

The College's admission policies and practices are consistent with its mission by providing accessible educational opportunities as an equitable, open-door institution. The institution particularly has a responsibility to its Native Hawaiian community, being an indigenous serving institution, and to its underserved populations, such as Pacific Islanders.

The College's open-door admissions policy allows accessible to educational opportunities to all students who can provide proof of satisfying one of the following admissions requirements:

- high school diploma
- high school equivalent, such as a General Education Diploma
- 18 or more years of age by the start of the semester the student is applying for admission

The College also participates in the Early College, Running Start, and Jumpstart programs that allow high school students to take college courses for credit. To participate, students must meet minimum grade point averages.

The College invested in building and maintaining a comprehensive, fully online, and student-oriented tool called STAR, which provides students with individualized degree pathway information. STAR provides comprehensive academic information on the pathways to graduation.

For each program degree or certificate offered by the College, a corresponding STAR pathway has been built to identify a student's graduation and major course requirements. Within STAR, the Guided Pathway System (GPS) Registration tab suggests courses each semester to fulfill program requirements and reach an expected graduation date. If a student fails a required course, STAR recalculates the student's pathway and estimated graduation date. If the student enrolls in a course not needed for the major, STAR alerts the student.

Prior to each academic year, academic counselors revise pathways based on approved curriculum or program changes, such as for prerequisites or course prerequisites and co-requisites. To ensure accuracy, each pathway is tested for multitude situations. Because the University of Hawai'i system has adopted STAR, it can provide students with transfer information to any UH campus the student may select.

STAR allows a student, for example, to review the remaining degree requirements at one of the UH four-year institutions for any major. Additionally, courses taken at another UH campus will automatically transfer to Honolulu CC through the Automated Transfer Articulation Process- SZPARTI. SZPARTI runs the courses through the articulation database and then populates the courses into the student's academic history.

For students transferring courses from outside the University of Hawai'i system, records are updated after receiving official transcripts and confirmed transferrable in the College's database. If the course from an institution is not listed in the database, an appropriate division chair advises if the course can transfer as equivalent to one the College offers, transfer as an elective, or not transfer at all. The decision is then updated in the transfer database.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution has adopted and adheres to admission policies consistent with its mission that specify the qualifications of students appropriate for its programs. The institution defines and advises students on clear pathways to complete degrees, certificate, and transfer goals.

[II.C.7 The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.](#)

---

### Evidence of Meeting the Standard

The College is an open-door institution, providing accessible educational opportunities to all students. It regularly evaluates its placement practices to validate their effectiveness and to minimize biases.

In fall 2016, the College revamped its English and math placement tools used by Admissions and Academic Counseling. The campus phased out COMPASS for placement, moving to multiple measures that included high school Smarter Balance scores, high school grade point averages, and high school subject grades, among others. The new placement procedures dramatically reduced biases to achievement, particularly for underprepared students. In the past these students would have placed in developmental class sequences where they often failed to advance to college level English or math, required for graduation.

The placement measures went into effect for all the UH community colleges (II.C.51).

Along with these changes, the College eliminated its developmental education sequence for English, moving to co-requisite classes. Any students not placing into ENG 100 enroll in an ENG 100 co-requisite class, which allows them to complete the college-level English requirement in one semester instead of as many as four for the previous developmental sequence. The co-requisite courses provide more class time for underprepared students. Remarkably, the success rates have improved dramatically (Intro.9, Intro.10). Honolulu CC's Language Arts division has been a leader in implementing the co-requisite model.

The Math department also implemented accelerated math models to improve student success, eliminating many of its developmental, pre-collegiate classes.

Working with UHCC, placement criteria are evaluated each year.

Along with implementing multiple placement measures, the UHCC Enrollment Management group, which included among other representatives from admissions, records, and counselors, agreed to allow students to self-report placement criteria. This change eliminated a former barrier that required students to provide official copies of high school transcripts and other documents. Despite some concerns among faculty, the UH System Institutional & Research Office found overwhelming evidence that students report fairly and accurately.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution regularly evaluates admissions and placement instruments and practices to validate their effectiveness while minimizing biases.

**II.C.8** The institution maintains student records permanently, securely, and confidentially, with provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies for release of student records.

---

#### Evidence of Meeting the Standard

The College maintains student records permanently, securely, and confidentially, regardless of the form in which those files are maintained. The College additionally provides backup of all files through the Banner system maintained by the University of Hawaii System Office ([III.C.34](#), [III.A.68](#)).

The Registrar manages the security and access of all student records for the campus, including electronic and physical files. The access also is governed by internal Standard Operating Procedures ([II.C.52](#)). Hard copy student records are kept in a locked, fire-safe storage room maintained by the department, and can only accessed by select staff members ([II.C.53](#)).

Students must complete a confidential release form in person at the Records office to authorize third parties to have access to their college information ([II.C.110](#)).

The institution publishes and follows established policies for release of student records for all student support programs. Students and family members are informed of FERPA policies and required release forms. Students, family members, and the community are able to access information regarding FERPA by referring to the college catalog ([I.A.1 \[pp. 60-62\]](#)) or visiting the Admissions webpage ([II.C.19](#)).

The Student Employment Office requires all student employees to complete a FERPA agreement prior to being hired. FERPA policies are re-enforced during the mandatory student employee training conducted by the Student Employment office.

#### Analysis and Evaluation

Honolulu CC meets this standard. The College maintains student records permanently, securely, and confidentially, and has a provision for secure backup of all files, regardless of the form in which those files are maintained. The institution publishes and follows established policies in its catalog for release of student records.

## **Standard III: Resources**

The institution effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Accredited colleges in multi-college systems may be organized so that responsibility for resources, allocation of resources, and planning rests with the district/system. In such cases, the district/system is responsible for meeting the Standards, and an evaluation of its performance is reflected in the accredited status of the institution(s).

### **Standard III.A: Human Resources**

III.A.1 The institution assures the integrity and quality of its programs and services by employing administrators, faculty and staff who are qualified by appropriate education, training, and experience to provide and support these programs and services. Criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and address the needs of the institution in serving its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.

---

#### Evidence of Meeting the Standard

The College places precedence on employing qualified administrators, faculty, and staff to assure the integrity and quality of its programs and services. Each employee is screened to confirm appropriate education, training, and experience. Since administration, faculty and staff work together in this process, the use of the mission statement of the College and the developing needs of the students and community are crucial in determining necessary qualifications for each new employment opportunity.

The College maintains employees in the following classifications: (a) Administration or Executive and Managerial (E/M), (b) Faculty, (c) Administrative, Professional and Technical (APT), and (d) Civil Service. The Board of Regents (BOR) sets forth policy regarding all appointments in the UH System, including faculty promotion and tenure as well as the status of other personnel (III.A.1). In accordance with UH System-wide policy, faculty, APT staff, and E/M personnel are BOR appointees, subject to classification and qualification rules established for these employees (III.A.2). Clerical, grounds and maintenance, and other support staff are State of Hawai'i Civil Service employees, and therefore, job descriptions for these positions are subject to Civil Service

classification and qualification rules, administered by the state's Department of Human Resources Development (DHRD) (III.A.3). All employees, except E/M, are subject to collective bargaining agreements.

Qualifications for each position offered are determined by needs of programs, divisions, departments, and offices of the institution. The College follows UH and Regents policy (III.A.4, III.A.5) to recruit and select qualified candidates for E/M positions. Position descriptions for these positions are developed by the College but must be reviewed and approved by the UH System Office of Human Resources and/or the Office of the Vice President of Community Colleges to ensure that they are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.

In the search for qualified candidates for faculty positions, both faculty and administration draft job descriptions, incorporating minimum qualifications (MQs) as approved by the Office of the Vice President of the Community Colleges (III.A.6) and desirable qualifications (DQs).

For APT positions, administrators work with department managers to develop job descriptions that accurately reflect the duties and responsibilities of the position in addition to MQs, DQs, and required years of experience, in compliance with UH policy (III.A.7).

The institution advertises open positions through venues, such as the Work at UH website, that will attract quality candidates. The University is transitioning to a new on-line recruitment, application, and screening system entitled NEOGOV with an expected implementation date of Spring 2019. All job descriptions and postings include the publication of duties and responsibilities that support institutional mission and goals as well as the required education, experience, and training (III.A.8).

For all positions, selection committees develop interview questions, rubrics for the answers, and ratings forms. Questions typically address understanding of the student population the campus serves, reinforcing the duties and responsibilities to support the mission of the College. These committees include faculty or staff of the disciplines or departments seeking to hire. The screening process is detailed in a memo distributed to each committee member at the onset of the recruitment and is tailored to the specific classification of the vacant position. The process supports consistency and confidentiality in the recruitment process, which extends to applicant and committee information, materials, ratings, questions/responses, comments and discussion, and recommendations (III.A.9).

Applications received are initially screened by the campus Equal Employment Opportunity (EEO) Officer to ensure that all application packets contain the required documents as stated in the job advertisement. Complete applications are then forwarded to the screening committee to determine which candidates meet MQs and DQs for the position. The committee selects the candidates to interview, and upon completion, makes recommendations to the appropriate administrator, who conducts a second level of questions to determine the most qualified candidate for the position.

Positions are not offered until reference checks are conducted, and the EEO Officer reviews the entire recruitment file for validation of MQs and that all EEO/AA policies and procedures were followed.

For all candidates and selectees, the College requires transcripts of degrees, certificates, and other documents are mailed from the institutions conferring them to verify qualifications. If degrees are from non-US institutions, the College checks the equivalency of degrees by referring to the National Association of Credential Evaluation Services (III.A.10).

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution complies with BOR, UH, federal, and state policies and procedures governing personnel classification, recruitment, and appointment. To ensure the integrity and quality of its programs and services, the College employs administrators, faculty and staff who are qualified with appropriate education, training, and experience. The criteria, qualifications, and procedures for selection of personnel are clearly and publicly stated and they address the needs of the institution to serve its student population. Job descriptions are directly related to institutional mission and goals and accurately reflect position duties, responsibilities, and authority.

III.A.2 Faculty qualifications include knowledge of the subject matter and requisite skills for the service to be performed. Factors of qualification include appropriate degrees, professional experience, discipline expertise, level of assignment, teaching skills, scholarly activities, and potential to contribute to the mission of the institution. Faculty job descriptions include development and review of curriculum as well as assessment of learning.

### Evidence of Meeting the Standard

Faculty evaluate and recommend applicants for teaching positions, particularly for their own departments. To maintain integrity and quality of new hires, they serve on screening committees to ensure applicants have subject knowledge and requisite skills to perform the services for the position they would be hired to fill. The advertisements for the positions list minimum qualifications (MQs), desired qualifications (DQs), and expected duties and responsibilities (III.A.11, III.A.12). These advertisements are developed by department faculty.

Applicants are required to submit an application, resume, cover letter, and transcripts to establish their qualifications. The advertisements (announcements) describe teaching requirements but also often include responsibilities of contributing to the department, participating in campus committees, engaging in other campus activities, and partaking in community service.

The MQs specify degrees, professional experience, and discipline expertise. The DQs include expected skills to be proficient in the position, and include proficiency in assessing student learning, experience in curriculum development and curriculum review, knowledge of the College's mission, and comprehension of the College's student population (III.A.13, I.A.19). Applicants are asked to demonstrate their teaching methods during most interviews.

The faculty serve as subject experts to ensure newly appointed faculty have appropriate degrees, professional experience, and discipline expertise. To confirm, the committee creates interview questions with rubrics to assess answers. The EEO/AA Officer reviews the interview questions and rubrics, and provides the screening committee with directions about the process.

Once the committee recommends applicants, the dean or administrator will interview them in a second round. Upon completion of the second level interviews, the administrator will contact the applicants' references to validate further, before making a recommendation to the Chancellor via the Vice Chancellor of Academic Affairs. The EEO/AA Officer performs the final check of documents of the applicant to be appointed (III.A.14).

Included in faculty reappointment, promotion, and tenure applications are the requirements for curriculum development, curriculum review, and student learning outcomes assessment (III.A.15).

### Analysis and Evaluation

Honolulu CC meets this standard. The process for recruiting, screening, and selecting faculty is well defined. Faculty as content experts review the position advertisements, create interview questions, and interview candidates. They select candidates through a comprehensive process that includes rubrics, interviews, evaluations for professional experience, expertise in the discipline, teaching skills, and potential contribution to departments, the institution, mission of the institution, and student population, among others.

III.A.3 Administrators and other employees responsible for educational programs and services possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

---

### Evidence of Meeting the Standard

The College has a process to ensure the necessary qualifications of administrators it hires, so they will be able to perform duties to sustain institutional effectiveness and academic quality.

For all recruitments, the institution follows a competitive recruitment process based on appropriate education, training, and experience. The College ensures that the minimum and desirable qualifications for all personnel positions responsible for educational programs and services are reflected in the job descriptions (III.A.16, III.A.17). Job descriptions are updated and reviewed by the Human Resources Manager and managerial personnel prior to the job posting and as needed to support the changing needs of the college and division.

All positions at the College are aligned with the institution's mission, and job descriptions ensure positions support the principles of the mission, which include assessment, teaching and learning, diversity, personal development, career development, and community development (III.A.18).

To comply with EEO/AA standards and to ensure that the hiring procedures are consistently applied, Human Resources oversees the hiring process. Applicants are evaluated in the selection process and consistent with current Board policy (III.A.18,

[III.A.19](#), [III.A.20](#), [III.A.21](#)). The process verifies that applicants possess qualifications necessary to perform duties required to sustain institutional effectiveness and academic quality.

Human Resources ensures application packets are complete and applicants meet the minimum qualifications. Executive/Managerial (E/M) as well as faculty and Administrative, Professional and Technical (APT) position applications require official transcripts from an accredited institution recognized by US accrediting agencies. The transcripts and other training certifications must be received at the time of employment to satisfy the academic credentialing for the position. Other required documents include a cover letter (outlining how applicants meet the minimum and desirable qualifications), resume, and three references.

The job advertisements outline duties related to the mission of the college, student success, diversity, and professional and personal growth, and require documents needed to effectively assess these areas ([III.A.22](#), [III.A.23](#)). Prior to reviewing applications and conducting interviews, the EEO/AA Coordinator or respective administrator reviews the hiring process with the screening committee. This includes noting the responsibilities of the screening committee, conveying the importance of ensuring confidentiality of the screening process (including applicant and committee information, materials, ratings, questions/responses, comments and discussion, and recommendations), EEO and AA policies, guidelines for pre-employment inquiries, and minimum qualification guidelines. Currently, Human Resources is developing an on-line tutorial for this process so it will be easily accessible to all screening committee participants for reference and to ensure that the process is consistently applied for all campus recruitments.

To sustain institutional effectiveness, Honolulu CC offers competitive compensation (salary and benefits) that is comparable to the local market, including higher education, to attract and retain competent and experienced personnel ([III.A.4](#)).

#### Analysis and Evaluation

Honolulu CC meets this standard. Administrators and other employees responsible for educational programs and services are selected after determining that they have the necessary qualifications to sustain institutional effectiveness and academic quality. Position advertisements specify minimum and desirable qualifications. To find the best qualified applicants for the position, the College follows a competitive recruitment process based on appropriate education, training, and experience. Descriptions of all positions overseeing educational programs and services are aligned with the mission

and require assessment, teaching and learning, diversity, personal development, career development and community development.

III.A.4 Required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been established.

---

#### Evidence of Meeting the Standard

The College authenticates that administrators, faculty, and staff are hired through a detailed and systematic selection process that includes a review of the qualifications of candidates and past employment verification. Degree requirements are specified in job advertisements (III.A.12).

Once an applicant is selected, Human Resources reviews the applicants' submitted documents to review qualifications, such as meeting the minimum requirements of the position. If official transcripts were not submitted at the time of the application, official transcripts must be received directly from the granting institution by the time of hire. The transcripts are maintained in the personnel files of employees. Human Resources conducts periodic spot checks of personnel files to ensure that this procedure is met.

A minimum of a Master's degree is typically required for all faculty positions in liberal arts areas regardless of whether the faculty is hired for distance education or on-campus instruction. Vocational, technical and occupational instruction areas may require less than a Master's degree. All degrees and credits must be earned from regionally accredited postsecondary colleges and universities (III.A.24). Degrees from non-U.S. institutions are recognized only if equivalence has been established. Transcripts from a non-U.S. institution requires an evaluation through the National Association of Credential Evaluation Services or similar service to verify candidates meet the minimum required degree to be qualified for the position (III.A.10).

The requirement of official transcripts is part of the standard operating procedure on Application Review Guidelines for Administrator, Faculty and/or APT Recruitment (III.A.25).

#### Analysis and Evaluation

Honolulu CC meets this standard. The College follows procedures to ensure required degrees held by faculty, administrators and other employees are from institutions accredited by recognized U.S. accrediting agencies. Degrees from non-U.S. institutions are recognized only if equivalence has been validated.

III.A.5 The institution assures the effectiveness of its human resources by evaluating all personnel systematically and at stated intervals. The institution establishes written criteria for evaluating all personnel, including performance of assigned duties and participation in institutional responsibilities and other activities appropriate to their expertise. Evaluation processes seek to assess effectiveness of personnel and encourage improvement. Actions taken following evaluations are formal, timely, and documented.

---

#### Evidence of Meeting the Standard

Employees are evaluated systematically and at regular intervals to assess their effectiveness and to determine areas for improvement. State of Hawaii, Board of Regents (BOR), University of Hawai'i Community College (UHCC) policies, and collective bargaining agreements provide clear guidelines for the criteria and procedures specific to employee groups. The BOR sets forth policy (III.A.26) regarding evaluation of all Executive and Managerial (E/M), faculty, and Administrative, Professional and Technical (APT) employees.

#### *Executive and Managerial*

All Executive and Managerial (E/M) employees must be evaluated annually for performance and accomplishments based on criteria established by the UH President and described in Board policy (III.A.18). A confidential performance evaluation of the College's E/M employees is conducted through the 360 Degree Feedback online system, gathering evaluations from subordinates, peers, and constituents. Results of the assessment, as well as of a self-assessment is discussed between the executive and managerial employee and the Chancellor. The Vice President of the Community Colleges conducts the evaluation of the Chancellor (III.A.27).

#### *Faculty*

Faculty are evaluated in accordance with BOR policy (III.A.26). The University of Hawaii Professional Assembly (UHPA), in agreement with the BOR, sets forth the procedures for contract renewal for probationary and temporary faculty as well as tenure and promotion for eligible faculty in the 2017-2021 collective bargaining agreement (III.A.28).

Additionally, in accordance with the UHPA contract, the UHCC sets forth guidelines for tenure and promotion (III.A.15) as well as contract renewal (III.A.29). These guidelines ensure that faculty are evaluated consistently and fairly by providing the framework for both the applicant and reviewer.

Faculty submit a dossier, a self-assessment of teaching ability, accomplishments, professional development, professional activities, public service, learning outcome assessment, student evaluations, peer observations, and goals and objectives for the coming contract period. A formal process is prescribed depending on the action, such as contract renewal, tenure, or promotion. This is done by appropriate departmental and administrative personnel, including division chairs or unit heads, division personnel committees, tenure and promotion review committees, and/or administrators. The faculty evaluation process provides an employee with recommendations for improvement and serves as the basis for goals to be achieved during the next evaluation period.

Tenure-track faculty must submit a dossier for contract renewal in the second and fourth years of a five-year probationary period. Tenure-track faculty who are in their final year of probationary service are required to apply for tenure or be subject to a terminal contract year. Temporary or non-tenure-track faculty are required to submit annual contract renewals.

Division chairs (or equivalent) review dossiers during the evaluation process and meet with non-tenured faculty to discuss recommendations before submitting a report. Should there be a need for improvement, the division chairs work with the faculty members to develop a plan.

Post-tenure, faculty may apply for promotions after completing three years of service. Promotion dossiers are reviewed for performance at the rank to which the faculty are applying. Tenured faculty who have reached the rank of Professor (C5) or who choose not to apply for promotion are evaluated every five years based on the faculty classification plan, which documents faculty expectations at each rank per UHCC policy on the faculty five-year review (III.A.30).

Faculty who teach distance education (DE) courses must participate in a mandatory orientation at the beginning of every semester. DE courses must be peer-reviewed by other faculty members every two years utilizing the peer evaluation form (III.A.31). Students provide evaluations of DE courses every semester.

### *Lecturers*

Since lecturers must meet the same academic qualifications as faculty members, they are evaluated at specified intervals based on their step placement as stated in the UHCC policy (III.A.32) and campus' standard operating procedure (III.A.33).

Lecturers at Step A are evaluated once each year, at Step B once every two years, and Step C once every four years. Evaluations may be done more frequently if there are concerns with a lecturer's performance. At minimum, lecturer evaluations must include one peer evaluation, results of student evaluations, and a self-analysis. These documents are submitted to the division chairs, who provide feedback to the lecturers. By April 30 of each academic year, division chairs will provide recommendations to the Vice Chancellor for Academic Affairs for re-hire.

The initial step placement of lecturers starts at Step A. New lecturers may be credited with 25 credits for an advanced degree and for 25 credits taught outside the UH System with accompanied verification. Application for advancement to Step B can be submitted when a lecturer has reached 75 teaching credits and to Step C at 150 credits.

The procedures in place ensure that evaluations of faculty and faculty lecturers lead to improvement of job performance.

### *Administrative, Professional, and Technical (APT) Employees*

Administrative, Professional, and Technical (APT) employees are evaluated on an annual basis using the APT Broadband Performance Evaluation System (III.A.34). The standard evaluation period for all APT employees is November 1 through October 31.

At the beginning of the evaluation period, a supervisor discusses job expectations with the employee(s). The expectations are entered by the supervisor and acknowledged by the employee in the online system. Throughout the evaluation period, feedback is entered and acknowledged to document employee progress, accomplishments and areas of improvement. At the end of the rating period, the supervisor enters a final assessment of performance, also acknowledged by the employee. Should areas of improvement be identified, an improvement plan is documented for the next evaluation period.

An APT employee serves an initial three-year probationary period during which they may be released from their position if they do not meet expectations of the position as documented in the online system. Once past probation, the evaluation is used to determine continued service. Upon appointment to a new APT position, a current APT employee who has passed the initial three-year probation period must serve a new six-month probation period. APT employees who obtain and exceed rating in all areas may be eligible for special compensation awards in accordance with BOR policy (III.A.34).

The college completion rate of APT evaluations has increased from 87% in the 2014 fiscal year to 100% in the 2016 and 2017 fiscal years. The campus Human Resources Manager manually tracks the status of evaluations for all APT employees and sends reminders as needed to respective supervisors to ensure completion.

#### *Civil Service Employees*

Civil Service employees are evaluated by their supervisors during the six-month initial probationary period which may be extended to address deficiencies in employee performance that are identified during the initial period. Supervisors must discuss and document expectations with employees, then document performance feedback during the evaluation period. Once past probationary status, employees are evaluated yearly. Employees appointed to a new civil service position must complete a new six-month probationary evaluation. Evaluations are done through the Civil Service Performance Appraisal System (PAS) (III.A.35).

The college completion rate of Civil Service evaluations has increased from 78% in the 2014 fiscal year to 100% in the 2016 and 2017 fiscal years. The campus Human Resources utilizes a spreadsheet to manually track the status of evaluations for all civil service employees and sends reminders as needed to respective supervisors to ensure completion.

The regular evaluations provide a process to measure the effectiveness of Civil Service employees in their duties that help improve job performance.

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution ensures that all personnel are evaluated systematically and at stated intervals utilizing existing written criteria to effectively evaluate performance of assigned duties as well as participation in institutional responsibilities. The College has formal, timely and documented processes to assess personnel and encourage improvement.

III.A.6 The evaluation of faculty, academic administrators, and other personnel directly responsible for student learning includes, as a component of that evaluation, consideration of how these employees use the results of the assessment of learning outcomes to improve teaching and learning.

---

#### Evidence of Meeting the Standard

Assessment of learning outcomes to improve teaching and learning is included in position advertisements for all faculty, academic administrators, and other personnel directly responsible for student learning. In addition, included in the professional responsibilities of faculty is the requirement to assess student learning, as stated in the collective bargaining agreement with the University of Hawaii Professional Assembly (UHPA) (I.C.27 [p. 4]). Furthermore, under the UHCC faculty classification plan, faculty at all ranks have responsibility to “design measurable or observable learning outcomes and assess and provide evidence of student learning ... to improve student achievement and success” (III.A.36 [A3]).

A faculty member’s responsibilities may encompass a combination of instruction, academic support, and economic development, and customized training (III.A.36).

For lecturers, UHCC stipulates that they follow the course, program, and institutional student learning outcomes and assessment methodologies as adopted by faculty members for the courses they are teaching (III.A.32).

#### Analysis and Evaluation

Honolulu CC meets this standard. Faculty, lecturers, and others involved with student learning are required to assess measurable outcomes to improve teaching and student success.

III.A.7 The institution maintains a sufficient number of qualified faculty, which includes full time faculty and may include part time and adjunct faculty, to assure the fulfillment

of faculty responsibilities essential to the quality of educational programs and services to achieve institutional mission and purposes.

---

### Evidence of Meeting the Standard

The College evaluates each of its programs to ensure they operate with sufficient faculty to fulfill teaching responsibilities that maintain the quality of the education and services. Instructional programs are evaluated each year through the program review process. The programs receive Annual Review of Program Data (ARPD), which include specifics on class average sizes, class fill rates, majors to faculty ratios, and other statistics to evaluate the efficiency of the educational quality (I.B.5). Every 5 years, each program undergoes a comprehensive program review process which addresses program assessments in a more detailed level. The data also encompasses ratios that include lecturers (adjunct faculty). During each review process, the program reviews data sets to ensure the number and quality of faculty are sufficient to ensure student learning and to ensure the institutional mission and purpose are being met.

Data sets such as number of majors, number of student semester hours taught, number of sections taught, number of appointed full time faculty, and majors to full time faculty are included and discussed as part of the review process. The academic dean regularly monitor through the student registration system, the demand of seats in courses and the amount of faculty available to teach. Adjustments are made to course schedules to ensure seats are available for students moving through the pipeline of courses to fulfill graduation requirements. Lecture pool are maintained with vetted, qualified part-time faculty to augment when adjustments are needed to ensure proper faculty availability.

The programs review and report on the data. Through the reports, administration is alerted whenever programs may be affected by insufficient faculty to teach essential courses for the program. The College's mission and institutional learning outcomes guide each program (I.B.13).

The college maintains a healthy number of faculty vacancies. This allows for programs to request additional board appointed faculty member based upon size and student demand of needed course work. When the program review data indicates a shortfall of full-time faculty in any program, a request is made by the respective dean to fill additional positions. Administration has a process to review requests for positions, working with deans, Human Resources, and finance utilizing the Request for Position Action and Request to Fill Critical Position/Amendment to Staff Plan forms so departments can provide justification for additional positions (III.A.47, III.A.48).

The request is then vetted through the campus process and a determination is made if a reallocation of positions is deemed needed. If so, the program moves forward with re-describing positions to fit the new need. Of 176 total full-time faculty positions on campus 160 or 91% of the total allocated positions are filled, with 16 either in recruitment or being reviewed for re-description or reallocation prior to recruitment.

Should there be a need for additional position counts that exceed the current number allocated to the College, a request can be made to the UHCC Budget Office for a vacant position from the Community College System position pool or via the state legislative process.

### Analysis and Evaluation

Honolulu CC meets this standard. Honolulu Community College meets this standard. The College performs regular reviews of its programs to ensure that the sufficient number of qualified full-time and part-time faculty is maintained to assure fulfillment of duties to support quality educational programs and services that are aligned with the college's mission and purpose.

III.A.8 An institution with part-time and adjunct faculty has employment policies and practices which provide for their orientation, oversight, evaluation, and professional development. The institution provides opportunities for integration of part time and adjunct faculty into the life of the institution.

---

### Evidence of Meeting the Standard

Lecturers and part-time faculty are fully supported by the College. Similar to full-time faculty, lecturers and part-time faculty are provided with procedures, policies, sample syllabi, student learning outcomes (SLO) for courses, and understanding of the institution's mission.

Division chairs or designated division faculty mentor lecturers and encourage them to be involved with committees and campus activities. Campus professional development activities routinely are open to participation by lecturers and part-time faculty. The Professional Development Committee provides announcements of events and activities

to all faculty. Lecturers can apply for funding from the committee if they taught 6 credits or more per semester during the last two academic years at Honolulu CC.

The College, for example, supports lecturers to participate in the annual Hawaii National Great Teachers Seminar, which takes place for several days in Hilo. Their attendance celebrates and inspires good teaching and helps to renew their commitment to student learning. Lecturers who are employed at least half-time (teaching 8 credits or more) are considered members of the faculty collective bargaining union and as such, can take advantage of the University of Hawaii Employee Tuition Waiver, offered as an employee benefit for full-time employees, for a maximum of 6 credits per applicable term.

A representative of lecturers is a member of the Faculty Senate Executive Committee (FSEC) (I.B.41 [p.5]).

On the Intranet webpage organized by the Faculty Development Committee, lecturers are able to view campus information, faculty resources, emergency information, policies and procedures, communication. Important documents and information pertaining specifically to lecturers are located along with the information for instructors (III.A.37). The site includes documents such as lecturer conditions of employment, lecturer evaluation information, and professional obligations (III.A.38).

Lecturers and part-time faculty are evaluated regularly, as stipulated by the UHPA collective bargaining agreement, including that they have completed assessment of SLOs. They are required to provide results and assessment for all classes taught. Full-time faculty observe classes taught by lecturers, the frequency depending upon lecturer classification. Lecturers each April submit evaluation packets that include the observations, self-evaluations, student assessments, and so on, following UHCC policy (III.A.32, III.A.33).

Lecturers are encouraged to subscribe to the general campus, lecturer specific, department, and other email distribution lists, to receive announcements and notifications. Lecturers are also welcome to attend the General College Meeting at the beginning of each semester, and new employee orientation.

### Analysis and Evaluation

Honolulu CC meets this standard. The College has employment policies and practices, which provide lecturers with orientation information, procedures for evaluation, and professional development opportunities.

III.A.9 The institution has a sufficient number of staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations of the institution.

---

#### Evidence of Meeting the Standard

The College has sufficient staff with appropriate qualifications to support the operations of the institution, including educational, technical, physical, and administrative capacities. The staff positions are classified as Administrative, Professional, and Technical positions (APT) or State of Hawai'i Civil Service.

Campus surveys in 2017 and 2018 showed that the majority of those surveyed strongly agreed or agreed that the College maintains a sufficient number of qualified staff and administrators (III.A.39, III.A.40). The College has about 150 staff. These cover the institution for security, grounds maintenance, secretarial support, and so on.

To ensure staff have the appropriate qualifications to support departments they are hired for, the advertisements for the positions lists minimum qualifications (MQs), desired qualifications (DQs), and the duties and responsibilities (III.A.41, III.A.12). Screening committees, which include members of the department, review applications and create interview questions with rubrics to assess answers. The EEO/AA Coordinator provides the screening committee with directions during the process (III.A.42).

The screening committee will forward recommended applicants for second-level of interviews by a dean, director, vice chancellor, and/or the Chancellor for final selection. With the exception of Civil Service employees, APT appointees are formally approved by the Chancellor through delegated authority from the Board of Regents.

Civil Service employees are hired in accordance with established policies of the UH System that address position descriptions (III.A.43), class specifications, and minimum qualifications (III.A.44).

The policies and procedures ensure staff have qualifications for the position whether educational, technical, physical, or administrative.

For the community colleges, staff positions are managed by the UHCC through legislative appropriation. When the College determines need for additional positions, the Chancellor puts in a request to the office of the Vice President of Community Colleges. For example, in 2014, several community colleges requested additional support for security of their campuses and UHCC received additional legislative appropriated positions for additional security. The UHCC also has an established procedure to reallocate positions that have gone unfilled by the college for more than two years (III.A.45, III.A.46). The College may also reallocate positions within their authorized number of position counts.

Although there are no formal staffing ratios, staffing levels for various classifications of employees are reviewed and compared across the UH Community Colleges.

Programs may request additional APT or Civil Service staffing, based on their ARPD reviews, through an established process initiated on their campuses (I.B.40, III.A.47, III.A.48, III.A.49). The College abides by the UH System policies in hiring APT and Civil Service staff (III.A.2, III.A.17).

### Analysis and Evaluation

Honolulu CC meets this standard. The College has sufficient staff with appropriate qualifications to support the effective educational, technological, physical, and administrative operations. The institution works within the UHCC to allocate staff positions as needed and following UH System policies on hiring for APT and Civil Service positions. Departments base any staffing needs on program reviews.

III.A.10 The institution maintains a sufficient number of administrators with appropriate preparation and expertise to provide continuity and effective administrative leadership and services that support the institution's mission and purposes.

---

### Evidence of Meeting the Standard

College administrative as well as other staffing is dependent on the executive and legislative branches of the State of Hawai'i, the UH System, and the UHCC. The allotments for staffing are categorized as Executive and Managerial, Faculty, APT, and

Civil Service. Job descriptions for these positions follow the system wide qualification guidelines to ensure compliance.

Currently, Honolulu CC's executive and managerial positions are filled permanently or on interim basis while undergoing recruitment for permanent appointments. To maintain sufficient administrators to provide continuity and effective leadership to support the institution's mission and purposes, executive and managerial staffing is reviewed by the Vice President of Community Colleges.

The institution has policies and practices to determine the appropriate number of qualifications and organization of administrators (III.A.50).

UH and BOR policies (III.A.4, III.A.5) govern executive and managerial positions for the UH System. These policies stipulate the hiring process to recruit and hire qualified candidates who support the mission of the University and who respect and promote excellence through diversity. Minimally required (MQ) degrees and experience of the position ensure effective leadership. For example, a Vice Chancellor of Academic Affairs must have a Master's degree and the academic rank of C-5 or equivalent. Knowledge of the community college mission is a desirable qualification (III.A.51).

A fall 2017 survey showed that 68.9% of those responding agreed that the College maintains sufficient qualified administrators to provide an effective educational programs, operations, services, and leadership for the institution. This is an increase from 53.27% reported in a spring 2017 survey (III.A.39, III.A.38).

#### Analysis and Evaluation

Honolulu CC meets this standard. The College maintains sufficient administrators to provide continuity and effective leadership and services. Policies and practices are in place to ensure that the College hires administrators who have the necessary qualifications and experience to support the institution's mission and purpose.

III.A.11 The institution establishes, publishes, and adheres to written personnel policies and procedures that are available for information and review. Such policies and procedures are fair and equitably and consistently administered.

#### Evidence of Meeting the Standard

The College follows established and published policies and procedures for personnel that are available for information and review. These policies and procedures are fair, and equitably and consistently administered.

To ensure equitable personnel actions, the institution's Human Resources follows the policies, procedures, laws, or agreements of the Board of Regents, UH System, UHCC, applicable laws, government codes, and collective bargaining agreements. Human Resources also works in conjunction with the UH System's Office of Human Resources (OHR). Policies and procedures for the BOR, UH, System, UHCC, and the College are accessible by all personnel on websites. Collective bargaining agreements are distributed to respective employees by their bargaining unit.

The College's Human Resources Manager also serves as an equal employment opportunity/affirmative action coordinator (III.A.52). This assigned duty ensures that personnel policies are administered equitably and consistently and results in fair treatment of personnel.

The core values in the Honolulu CC mission include "Diversity and Equity--maintaining an equitable multicultural environment where all aspects of diversity are appreciated and respected" (I.A.19).

The UHCC's Nondiscrimination Policy is included in all new hire packets and covered during the mandatory new employee orientation training sessions (required for new employees but open to all employees) in the Fall and Spring (III.A.53).

The College administers personnel policies and procedures consistently and equitably. Personnel policies are publicized.

### Analysis and Evaluation

Honolulu CC meets this standard. The College adheres to established fair and equitable policies and procedures that are written and published. These policies and procedures are consistently administered.

III.A.12 Through its policies and practices, the institution creates and maintains appropriate programs, practices, and services that support its diverse personnel. The institution regularly assesses its record in employment equity and diversity consistent with its mission.

### Evidence of Meeting the Standard

The College is an equal employment opportunity and affirmative action employer, committed to a policy of nondiscrimination in accordance with federal and state laws and UH policies (III.A.54, III.A.55). The College maintains programs, practices, and services that support our diverse personnel. UHCC conducts formal Equal Employment Opportunity (EEO)/Affirmative Action (AA) analysis on a regular basis to ensure it is incorporated into the recruitment and hiring process.

The College has an affirmative action program that complies with federal contractor requirements for data collection, workforce analysis, identification of problem areas, placement goals or benchmarks, outreach and recruitment, measuring affirmative action efforts, and taking remedial action when necessary.

As part of the affirmative action program, the UHCC director of EEO/AA develops affirmative action plans (AAP) each year for the seven community colleges for minorities and women, in accordance with federal contractor requirements. In addition, the director of EEO/AA develops a separate affirmative action plan for protected veterans and individuals with disabilities (Part II), prepared in accordance with federal contractor requirements.

The UHCC director works closely with the EEO/AA coordinators at each campus to monitor and oversee employment practices, including recruiting and hiring decisions, and ensure compliance with laws and policies and with AAP. Compliance encompasses reviewing job announcements, reviewing for underrepresentation, monitoring recruitment, ensuring equitable treatment of applicants, ensuring diverse screening committees, and briefing search committee members on recruiting practices, which include nondiscrimination, equal opportunity, implicit bias awareness, and accessible interviews. The director also reviews the receiving, investigating, and resolving of complaints.

In a similar fashion, the campus EEO/AA coordinator ensures recruiting practices follow policies and guidelines to promote equitable treatment of applicants by providing EEO briefing to screening committees and receiving, investigating and resolving EEO complaints.

The institution regularly assesses its employment equity and diversity, in line with its mission's core values: "Diversity and Equity – maintaining an equitable multicultural environment where all aspects of diversity are appreciated and respected" (I.A.19). The

campus EEO/AA Coordinator oversees the employment practices, including recruiting and hiring decisions, and ensures compliance with laws and policies (III.A.2) and with the AAP.

The AAP contains workforce analysis. This analysis identifies Honolulu CC employees by gender and race/ethnicity in each job title, and also incorporated, by job title, into the UHCC's compilation of employee data on gender and race/ethnicity. The workforce tables are kept in the campus EEO/AA office as evidence of the annual analysis. These tables also contain individual salaries of APT and Civil Service employees. Such information is confidential and cannot be publicly shared but does provide data on the diversity among the College's employees to identify underrepresented groups for hiring and recruitment.

Diversity and equity also are promoted through by the UH System Title IX and the Office of Institutional Equity (III.A.56), UH Commission on Lesbian, Gay, Bisexual, Transgender and Queer+(LGBTQ+) Equality (III.A.57), and UH President's Commission on the Status of Women (III.A.58).

The campus offers workshops and training for the faculty, staff, and administrators to increase awareness of the institution's diverse population. Workshops and presentations are provided by the Title IX Coordinator, the Committee on Social Equity (III.A.59), the Faculty Development Committee, and the Hulili Ke Kukui Hawaiian Center. Examples include a SafeZone workshop, Dr. Anthony Ocampo's presentation on the Filipino American identity (III.A.60), Culture Day and Bridging Persia, and Title IX workshops and mandated biennial online training for current employees and initial training for new employees.

Title IX training is a requirement by the College for all employees.

The institution's policies and practices are geared to promote understanding of equity and diversity. The College regularly evaluates these policies and practices to ensure that personnel are treated fairly, in line with its mission.

### Analysis and Evaluation

Honolulu CC meets this standard. The College adheres to policies and practices to create and maintain appropriate programs, practices and services that support its diverse personnel. The College regularly assesses its record in employment equity and diversity consistent with its mission through an annual workforce analysis as part of its affirmative action program.

III.A.13 The institution upholds a written code of professional ethics for all of its personnel, including consequences for violation.

---

Evidence of Meeting the Standard

Honolulu CC upholds a written code of professional ethics for all of its personnel, including consequences for violation. Formal ethics policies and procedures are established by the UH System for specific employee classifications, and all employees are subject to State of Hawai'i ethics rules and regulations.

The institution fosters ethical behavior in its employees by providing clear statements of policies and codes, both at the UH System and the College level. These policies and codes are available on the Intranet and the UHCC website.

These procedures include pathways to report ethical violations, support personnel to answer questions and address issues or possible violations, employee requirement to sign statements yearly to verify compliance with ethics and conflict of interest, and notifications that remind employees the mission and goals of the College to maintain a high quality learning environment that values academic excellence.

The State of Hawai'i Ethics Commission reviews possible ethical violations and provides guidance to state government organizations. Article XIV of the Hawai'i State Constitution mandates codes of ethics for state workers (III.A.61). In the Hawai'i Revised Statutes, Chapter 84: Standards of Conduct sets forth general provisions and guidelines (III.A.62), and notes disciplinary action for code of ethics violations such as reprimand, probation, demotion, suspension, or discharge.

The Human Resources office provides the campus with email reminders and updates from the State Ethics Commission that includes regularly offered ethics training opportunities. Newly hired employees receive ethics information in personnel hire documents and in new employee orientation sessions. In election years, employees are reminded of guidelines concerning political campaigns and employees running for political office.

The Board of Regents (BOR) sets forth policies to address research and scholarly activities (III.A.63), for response to allegations of research or scholarly misconduct

(III.A.64), for use of research monies and conflicts of interest (III.A.65), and for fiscal responsibilities within the university (III.A.66).

Concerning the appropriate use of technology with the UH System, a number of ethics policies cover the proper use of information technology, especially those with system and network administrator responsibilities (III.A.67). Information Technology (IT) specialists who manage email, databases, and file servers must sign an acknowledgment of their responsibilities (III.A.67), and IT employees working with student-related information are required to sign an agreement to preserve confidentiality before receiving access to sensitive data (III.A.68).

In addition, to promote integrity and objectivity in instruction, research and other scholarly activities, employees must annually submit a conflict of interest disclosure as required by UH policy (III.A.69, III.A.70). These policies establish a mechanism to recognize, disclose, manage, and eliminate potential or existing conflicts of interest that may violate federal and state laws and regulations and University policies and procedures. Failure to comply could be grounds for disciplinary action up to and including termination for cause.

For the community colleges, UHCC policy sets forth expectations for all faculty members to strive to make recognized standards of the profession an integral part of their professional lives to ensure academic and professional ethics (III.A.71).

### Analysis and Evaluation

Honolulu CC meets this standard. The College follows all current policies and procedures at the state and university levels to maintain a code of professional ethics and enforces consequences for ethics violations.

III.A.14 The institution plans for and provides all personnel with appropriate opportunities for continued professional development, consistent with the institutional mission and based on evolving pedagogy, technology, and learning needs. The institution systematically evaluates professional development programs and uses the results of these evaluations as the basis for improvement.

---

### Evidence of Meeting the Standard

Faculty, Staff and Administrators have opportunities for professional development through the UH System and the College. Eligible employees are able to apply tuition waivers to attend UH classes with the opportunity to earn AA, BA and advanced degrees. Personnel can apply for sabbatical leaves of six months to a year for professional development (III.A.72). The State Department of Human Resources and Development and the UH Office of Human Resources offers a variety of training sessions to improve employee skills.

Professional development at the UH System level include the President's Emerging Leaders Program (III.A.73), the Community College Leadership Champions (III.A.74), Wo Learning Champions (III.A.75), UHCC Hawaii Student Success Institute (HSSI) (III.A.76), and the Great Teachers' Seminar (III.A.77). College personnel have an opportunity to interact with colleagues from across the community colleges to share programs and activities that focus on student success.

Professional development at the campus is provided through conferences, workshops, and activities that add personal growth, self-improvement, training, health and wellness, and teambuilding. Opportunities are provided through the Faculty Development Committee, the Staff Development Committee, the Hulili Ke Kukui Hawaiian Center, and the Health and Wellness Committee. Generally, workshops are open to all campus personnel.

Each academic year, the faculty development coordinator surveys the faculty about their interests in programs. Presentations and workshops are publicized through email and flyers and are usually open to all campus personnel. Attendees are asked to complete a survey at the end of each presentation. A few examples of activities are Safezone training, Laulima distance education training, and presentation on the history of Kapōlama, the location of the campus (III.A.78). Assessments of these activities provide insight as to what was learned and suggestions for future presentations.

The Staff Development Committee (SDC) sponsors events that bring people together to foster teambuilding and collegiality. Events are aimed at creating a positive work environment. In 2015, the Chancellor formed the Staff Development Task Force (SDTF) to review the Charter (III.A.79) and Bylaws (III.A.80) for the Staff Development Committee (SDC), a subcommittee under the Staff Senate Executive Committee (SSEC). The SDTF sponsored "Think Nui" for Civil Service and APT staff as an "on-campus alternative to the Hawaii Student Success Institute (III.A.81), which is more focused on faculty and administrators. It represented more focused programs and activities for staff, including a keynote speaker and presentations on computer software, hula,

cooking demonstrations, and crafts. Other SDC events have included Soup Day, Salad Day, the Ice Cream Social, and fundraising to support future SDC activities.

The College also supports other activities for faculty and staff development, such as for health and nutrition, exercise and caring for the elderly (III.A.82), and Hawaiian culture related events, such as Malama Aina Days, genealogy workshops, native Hawaiian plant propagation, and traditional Filipino tattoos (III.A.83).

### Analysis and Evaluation

Honolulu CC meets this standard. In alignment with our mission, professional development opportunities and activities enable college personnel to provide academic excellence and support our students. Professional development needs are identified through surveys, training requirements, i.e. Title IX, and requests from personnel. Assessment of activities provide insight on the impact of what was learned by the participants, how they apply knowledge gained, and suggestions for future programs and activities.

**III.A.15 The institution makes provision for the security and confidentiality of personnel records. Each employee has access to his/her personnel records in accordance with law.**

### Evidence of Meeting the Standard

The College follows records retention policies, including the security and confidentiality of sensitive information, established by the UH System in accordance with law and collective bargaining agreements (III.A.84). The procedure ensures the College is in compliance with the Fair Information Practice Act, which governs an individual's access to their personal records and access to those records by public and governmental agencies.

The College also follows UH System policy on providing a uniform system for the maintenance of personnel records (III.A.85). This policy mandates the Human Resources Manager, as Custodian of the Official Personnel Records for faculty and APT employees, to be responsible for keeping files accurate, complete, up-to-date, in accordance with applicable provisions of the appropriate collective bargaining agreements.

As the Custodian of Records for E/M and Civil Service employees, the UH Office of Human Resources is guided in maintaining official files for these classifications of employees by the State of Hawaii (III.A.86). Shadow files of the official files stored at the UH Office of Human Resources for E/M and Civil Service employees are maintained at the campus level to allow the campus HR Office to daily access to copies of personnel documents for such employees.

Campus personnel records of employees are secured in locked cabinets within the Human Resources area, which are only accessible to Human Resources staff. Keys to such cabinets are locked in the Human Resources Manager's office. In accordance with collective bargaining agreements, employees may request by appointment to review their personnel records. Review of personnel records by employees is restricted to the Human Resources area. Administrators at the level of deans and higher may also request access to employee records. Access may be granted if the administrator has direct supervision of the faculty member and if there is sufficient justification.

The College also follows UH System policy that provides the framework for specific practices and procedures associated with systems and files that contain sensitive, personal, and confidential information within the UH System (III.A.68). The College has designated stewards and data custodians who are responsible for managing the security of sensitive information in the areas of finance, human resources, student services, and information technology.

The retention of records on campus is mandated by a further UH System procedure that prevents the unauthorized release of information, by ensuring that the College adheres to time limits for record retention (III.A.87). For employees who were terminated, transferred, or retired, official personnel files are stored on the campus for three years, after which they are transferred and archived at the State Records Center.

### Analysis and Evaluation

Honolulu CC meets this standard. The college continues to follow policies and procedures for the security and confidentiality of personnel records. In addition, all employees at the college have access to their personnel records in accordance with the law.

### **Standard III.B: Physical Resources**

III.B.1 The institution assures safe and sufficient physical resources at all locations where it offers courses, programs, and learning support services. They are constructed and maintained to assure access, safety, security, and a healthful learning and working environment.

---

#### Evidence of Meeting the Standard

The College strives to ensure that all physical resources are accessible, safe and secure, and provide a healthful learning and working environment. Ongoing and long-term planning and assessment are tied directly to the Administrative Services' annual program review (III.B.1) in addition to the College's mission and its Educational and Strategic Plan 2016-2021 (I.A.3). The College works collectively with University of Hawai'i Community Colleges' (UHCC) efforts to assure that physical resources meet program needs and support and promote student learning. Strategic goals and objectives identify and address areas in need of growth and development, and the College is working towards these physical resource improvement goals through open dialog with all constituents via committees, governance practices, and campus meetings.

The main campus of Honolulu Community College, a short distance from the heart of downtown Honolulu, occupies over twenty acres on Dillingham Boulevard in the Kalihi-Palama area. The College also has facilities near Honolulu International Airport for the Aeronautics Maintenance program, on Kokea Street for automotive and heavy equipment shops, and at Sand Island for the Marine Education and Training Center.

The College is a few years away from celebrating its 100<sup>th</sup> anniversary, and while scheduled maintenance and renovation projects have begun to modernize the campus, its aging infrastructure remains a challenge with budget restrictions across the community colleges. Major capital projects are managed by the UHCC; the College manages minor projects, including all repair and maintenance and health and safety repairs. Recent facility improvements (completed and ongoing) include renovation of the cafeteria, areas of Building 5 and its central courtyard, and elevator replacements at multiple building locations. The efforts below address how the College's physical resources address the teaching and learning needs of students, faculty, and programs, and assures that the mission of the College is achieved.

ACCESS

The College ensures access to the main campus and all off-site locations to meet the needs of its students, employees, and the public during day and evening hours when classes are in session. Access to facilities on the main campus are ensured by posted hours of operation on map kiosks situated across the mall walkway and the campus website (III.B.2); parking is available, requiring a permit or pass for students, employees, and visitors. Campus parking permits designate entry to specified parking lots, which have respective hours of access. As part of daily operations at all site locations, building occupants, custodial and maintenance staff, as well as security personnel monitor campus buildings and grounds.

During times that Honolulu CC is officially closed, buildings are locked and the Vice Chancellor of Administrative Services (VCAS) must authorize access. Space allocation and access to facilities for individuals and organizations with and without college affiliation for activities beyond the regular educational functions are available. UH System-wide policy (III.B.3) sets priorities and procedures for use of university-owned facilities and grounds. Facilities requests are reviewed and approved with the submission of appropriate forms through campus Administrative Services (III.B.4).

The College and the UH System are committed in providing equal access to physical resources by following all applicable title regulations of the Americans with Disabilities Act (ADA) and the Rehabilitation Act of 1973, Section 504. Accessible pathways, elevators, and designated disability parking are available and noted on the campus map, which can also be found on the campus website (III.B.2).

Annual facilities inspections to ensure ADA compliance are conducted by a Disability Specialist. ADA compliant resources and furniture (desks, chairs, tables, keyboards, specialized software, etc.) are made available across campus to support students and employees that require accommodation. The Disability Specialist chairs the Committee on Disability Access, which meets every other month as a campus wide group to improve information sharing and coordination of efforts to meet the needs and requirements of students with documented disabilities for compliance with ADA and Section 504 (III.B.5).

In 2015 the College underwent a CTE Civil Rights Review of its programs and facilities, which was conducted in accordance with the state's Methods of Administration Program under the direction of the US Department of Education, Office for Civil Rights (OCR). OCR inspected the main campus and off-site locations to ensure compliance with applicable federal ADA regulations. Findings of the compliance review indicated areas requiring corrective action, such as improvements to building and facility accessibility among other items. The College addressed and completed a majority of required areas of

compliance in the review, and remaining items are due to be resolved in accordance with timelines in a voluntary compliance plan (III.B.6).

### *Safety and Security*

The College places importance on maintaining a safe learning and working environment for its students and employees. Campus safety and security are managed by the College with UHCC providing training and oversight for compliance with the federal Clery Act and workplace violence reporting and training.

The Health and Safety Committee meets once at the beginning of each semester and includes constituents from all campus departments and divisions including the administration (VCAS) and student representatives. The committee also includes liaisons from all off campus locations. Meetings provide information on safety issues and facility improvements; members are also informed about health, wellness, security, and emergency preparedness issues. Feedback from safety liaisons is solicited. The committee has been instrumental in creating and providing health and safety resource documents that pertain to emergency preparedness, hazard communication, blood-borne pathogens, among other campus safety issues (III.B.7). Health & Safety Bulletins are emailed monthly to the campus community, highlighting diverse topics such as the safe use of prescription opioids, mumps vaccinations, window safety, use of extension cords and surge protectors, and much more (III.B.8).

The College's Health and Safety Program documents extensive direction for employees and students regarding safety education, responsibility, and accountability, especially in regards to accident prevention and eliminating hazards (III.B.9). The program conforms to appropriate practices of a technical occupational institute and is in compliance with the health and safety requirements issued by the Hawaii Occupational Health and Safety Division. Additionally the Environmental Health and Safety Officer for UHCC conducts periodic hazard communication training for employees who deal with hazardous materials and substances (III.B.10). Communication and involvement by administrators, faculty, and staff ensures safety planning and prevention and sustains a healthful teaching and learning environment.

Under the direction of the VCAS, the Administrative Services Group meets at least monthly as an information sharing committee that discusses safety and security issues as well as other operational topics such as parking, facilities use, and construction and renovation updates. Members represent a wide range of constituents from across the campus (III.B.11).

Honolulu CC is committed to providing a safe and secure campus environment for all of its key constituents. Detailed campus security information and protocols, in addition to the College's comprehensive Annual Security Report (III.B.12), are available online (III.B.13) in the college catalog, to address the needs of the campus community and the Crime Awareness and Campus Security Act of 1990 (III.B.12).

Campus Security is responsible for providing 24/7 security service and is staffed by a Security Manager and six Security Officers. Security personnel ensure compliance with federal, state, and local laws, as well as the rules and regulations of the College. They patrol the campus by vehicle and on foot, and perform the full range of public safety services dealing with incident reports, campus investigations, medical and fire emergencies, traffic accidents, enforcement of laws regulating the use of alcohol, drugs, and weapons, and all other situations requiring Campus Security assistance. The College has installed blue emergency telephones across the main campus that provide 24-hour direct communication to Campus Security.

The College's Security Manager along with the VCAS coordinates and communicates periodic campus emergency exercises, such as active shooter training and evacuation drills (III.B.14). The Emergency Action Plan provides policy and procedures for addressing natural and man-made emergencies for all Honolulu CC locations (III.B.15). Emergency response and notification along with evacuation and training guidelines are clearly set forth in the event such occurrences take place.

The College partners with the Honolulu Police Department in planning, training, and implementation of emergency exercises. The UH Alert emergency notification system is utilized to inform subscribed users (students and employees) of emergency events, drills, and campus closures through timely text or email messaging (III.B.16). Campus Security announcements ("Timely Warning and Campus Safety") and crime and emergency reports/statistics are made available campus-wide via email and are accessible on the College website and in the Annual Security Report (III.B.17).

Safety and security measures are ensured at all off-site locations; elevators, air conditioning, fire alarm, and building alarm protection systems are inspected and maintained, and security patrols are routine. Contracts and maintenance agreements are in place. State and federal airport security provides oversight at the Airport Training Center for the Aeronautics Maintenance Technology program. Campus Security patrols facilities for both the Automotive and Diesel Mechanics Technology programs located on Kokea Street. Safety and security resources and services for the Pearl Harbor Apprenticeship Program are managed and provided by the US Department of the Navy where the instruction takes place.

During fall 2017 the main campus began a series of facilities improvements that included building alarm upgrades and replacement and installation of 22 security cameras at various interior and exterior locations. Through a UHCC-wide initiative, the College will shortly undergo a rekeying project. This upgraded system will enhance buildings with high security keys and allow for lock down capabilities if there is a potential threat on the campus. These special proprietary keys will prohibit duplication and ensure enhanced security and safety for all building occupants.

### *Facilities Constructed and Maintained*

The College assists the UHCC in conducting and coordinating the planning, budgeting, construction, repair, and maintenance of physical resources. Small-scale repairs and maintenance are undertaken by the College's personnel and financial resources; however, larger projects, typically requiring professional design consultants, are managed by the UHCC Office of Facilities and Environmental Health (FEH). The FEH, when appropriate, assigns its Environmental Safety Specialist to investigate and recommend remediation of code and safety needs. The FEH informs the UHCC administration of the projects' scope, cost estimate, and schedule.

The College participates in the annual UH Facilities Renewal Reinvestment Model (FRRM) that documents the backlog of maintenance and estimating the annual funding required for on-going capital reinvestment. The FRRM uses campus building information (e.g., building name, gross square feet, construction date), and life-cycle methodology based on building sub-system and campus infrastructure life-cycles and replacement costs to estimate deferred maintenance and future capital repair needs (III.B.18 [p. 1]). The UHCC also supports the College by acquiring and allocating Capital Improvement Program (CIP) funding and the implementation of construction projects on the campus (III.B.19).

The College's Operations and Maintenance Department (O&M) is responsible for the management of buildings and services, which include grounds keeping, custodial services, and utility infrastructure. O&M personnel perform daily inspections and preventative maintenance of facilities and grounds to ensure access, safety, and security. For programs located off the main campus, custodial staff is assigned at all facilities and grounds keepers are scheduled once week on a rotation for the Marine Education and Airport Training Centers and the automotive and diesel facilities. All campus personnel regardless of location are able to submit facility work requests online through the eFacilities AiM Work Order Management System (III.B.20).

In fall 2015 the College welcomed its first dedicated Facilities Manager, who has been instrumental in managing oversight of all physical resource services, projects, and improvements in a professional and timely manner. Current facility service priorities embrace a culture of active communication with all members of the campus community through frequent email notification and status alerts of pending repairs and renovations. Faculty and staff can also access campus utility updates for electrical, air conditioning, and plumbing matters in addition to submitting AiM facility work requests directly from the Facilities Management webpage (III.B.21). The Facilities Manager is currently working with the VCAS in drafting a formalized Facilities Plan to fully support and enhance the College's academic programs and educational experience.

### *Healthful Learning and Working Environment*

The College promotes a healthful learning and working environment through its commitment to sustainability. The Chancellor recently appointed a Sustainability Coordinator to ensure that current campus practices are aligned with the sustainability goals of the University of Hawai'i and UHCC (III.B.22, III.B.23). Faculty, staff, and students are not only educated on best practices, but actively participate in the campus efforts to reduce waste, improve energy efficiencies, and lower utility costs. The College has representation on two system-wide sustainability committees; one directed at curriculum and sustainability course designation and the other for facilities management. The Honolulu CC Sustainability Implementation Plan is a guided pathway to fulfilling the System's goal of minimizing greenhouse emissions and becoming carbon neutral by 2050 (III.B.24).

The Health and Wellness subcommittee promotes, advocates, and educates faculty and staff in maintaining a healthful lifestyle through resources and workshops. Recent activities and presentations address stress management, dementia and caregiving, healthy cooking, hurricane preparedness, and participation in the annual Great Aloha Run (III.B.25).

The College provides additional measures to ensure a safe and healthful environment such as Campus Security escort services during evening hours, annual hazardous waste training, information on chemical safety requirements and practices, improved exterior lighting, and an e-waste recycling program for outdated electronic equipment. Students and employees have access to gender neutral and family restrooms at various locations designated on the campus map.

### Analysis and Evaluation

Honolulu CC meets this standard. The College has sufficient physical resources supporting all programs and support services regardless of location. Facilities are constructed and maintained to assure access, safety, and security for all members of the college community. Operations and maintenance needs are promptly identified and addressed in a timely manner. Inclusive sustainable initiatives and practices are in place to provide a healthful learning and working environment.

While meeting the Standard, the College recognizes that leadership changes have impacted Administrative Services' ability to update and maintain policies, procedures, and relevant documentation pertaining to physical resources. Since the last accreditation, the College has transitioned through three individuals for Vice Chancellor of Administrative Services. The College and the current VCAS have identified that facilities planning and process documents are important in assuring smooth and functional operation of the department. The VCAS is drafting a comprehensive Facilities Plan that will guide the physical campus through future planning and decision-making.

[III.B.2 The institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission.](#)

---

### Evidence of Meeting the Standard

#### *Facilities Planning and Equipment Replacement*

UHCC centrally drives planning for the College's physical resources through its Strategic Plan 2015-2021 along with a 6-Year Capital Improvement Projects (CIP) Plan 2018-2023 ([III.B.26](#)). To accomplish its goals for a modern teaching and learning environment, the UHCC will seek to address three key components: (1) instructional classrooms, laboratories, and support facilities; (2) capital equipment replacement; and (3) high-speed digital infrastructure. Learning space standards are adopted to evaluate physical layout in addition to digital/media, furniture, laboratory and shop requirements. The strategic directives come with the understanding that some improvements will require major renovations while others will have lower cost solutions.

Sustaining and acquiring sufficient physical resources to support programs and services are defined within the College's Educational and Strategic Plan 2016-2021 as well, which details the goals and objectives and provides guiding principles for facilities planning. "Goal E" of the plan (I.A.3 [p. 11]) identifies opportunities where the Campus will make progress in addressing areas related to infrastructure (facilities), sustainability, and technology. The College aims to eliminate its deferred maintenance, replace and upgrade program equipment, and ensure facilities are designed and maintained to meet teaching and laboratory learning. Strategic directions for the College are aligned with those from UHCC and the University of Hawai'i (I.A.7, I.A.25).

UHCC is committed to a planned equipment replacement program that will take into account the expected life span, the cost, and a system-wide budget for capital equipment replacement. Currently, campus programs and services that seek budget allocation requests for large-scale physical resources, such as new or replacement equipment, must justify and submit a formal annual budget request, which must address program needs and align with the College's mission (I.A.19). This process, however, does not guarantee that needed new or replacement equipment will be acquired, since College funding is dependent on many factors including enrollment tuition and obtaining performance-based funding. By approaching the replacement of equipment as a system through its new strategic planning goals, the impact on the College's budget will be modulated so that large items do not impact the budget in unexpected ways.

While UHCC has created a high-speed digital network connecting all campuses, proposed guidelines are aimed to ensure that on-campus networks are constructed and maintained in a manner that takes full advantage of this intercampus network.

Campus projects will be prioritized at UHCC level by weighing the relative importance of each project against the needs of the seven UHCC campuses. Project priorities are determined by considering multiple factors, which include work order occurrences, failure of systems, complaints from users, Sightlines backlog/useful life information, long-range plans for the campuses, and space needs (III.B.26).

Planning at the College level entails utilizing information from its Annual Review of Program Data (ARPD) reports (III.B.27). Program reviews are one of the primary tools used by the College to identify resource needs and facilities planning. Instructional programs, student services, and academic support services submit ARPD information and analyses, which guides the institution in its Long Range Development Plan (LRPD) (III.B.28). Administrative executive summaries are also included in ARPD documentation. Special non-credit programs such as the Pacific Center for Advanced

Technology Training (PCATT) provide annual report data for future planning needs and assessment (III.B.29).

Program information and resource needs are included in each ARPD report as well as their relationship to the campus' strategic plan and mission. An annual systematic program funding process is conducted each spring where cross-campus participation by the four major governance bodies (Faculty Senate Executive Committee, Staff Senate Executive Committee, Kupu Ka Wai, and Student Government) takes place. All campus stakeholders participate in the budget decision-making process; transparency ensures that program and service area needs are communicated accordingly to achieve the College's mission of providing physical resources that are "accessible...through an engaging learning environment." The supplementary program funding process is documented on the campus Intranet under Funding (I.A.26).

#### *Facilities Planning and Funding: New Construction & Renovations*

Long-range building and land-use planning is managed by UH System and UHCC with input from the campus. CIP funding is appropriated by the State Legislature in three categories: (1) Capital Renewal and Deferred Maintenance; (2) Minor CIP; and (3) Line Item Projects. For capital renewal and deferred maintenance, the University of Hawai'i System utilizes Sightlines' Facilities Renewal Reinvestment Model (FRRM). FRRM is a web-based budget-modeling tool designed to support campuses in documenting the backlog of maintenance and estimating the annual funding required for on-going capital reinvestment. The FRRM's 2016 executive summary presents information on the Current Replacement Value (CRV) for buildings on each campus, provides an overview of the maintenance backlog, an estimate of capital repair needs over the next ten years, and an estimate of probable costs with an assumed inflation rate (III.B.18). Minor CIP implies that projects are relatively small in scope. For the current budget, Minor CIP includes projects that are estimated at less than \$5 million, where priority is focused on modernization of classrooms and learning environments.

New construction and renovations of existing facilities exceeding \$5 million are typically budgeted and appropriated as line item projects. In 2013 the University of Hawai'i Board of Regents adopted a resolution supporting a moratorium on new construction projects; however, the Regents specifically exempted several CIP projects for the community colleges, which included Honolulu CC's Advanced Technology Training Center (ATTC). The new building is slated to house the campus' science and technology programs. The \$30 million-plus allocation approved by the State Legislature to fund construction is currently on hold while the City and County of Honolulu upgrades and installs water, sewer, and drainage systems, which will soon be underway along the

Kokea Street side of the main campus. The ATTC's building plan specification will achieve a minimum rating of Silver in the LEED Certified Green Building Rating Systems (III.B.30 [p. 12]).

The College's Long Range Development Plan (LRDP) guides physical development based on academic needs and objectives (III.B.28). Program planning in the document identifies space needs for the growth of the Campus. As noted in the LRDP, most student support and service areas are dispersed among multiple buildings. Plans to centralize two key student services (Financial Aid and Academic Counseling) as well as relocate the Hūlili Ke Kukui Hawaiian Center materialized in 2014 when the College received a \$2 million US Department of Education Title III Program Grant. The two-year renovation project has allowed the center to re-imagine its programming and expand capacity to directly support Native Hawaiian programs on Campus. The co-location of these critical services and instructional programs allow the College to maximize critical functions that support student success (III.B.31).

The UH System, UHCC, and the College have been collaborating closely with the Honolulu Authority for Rapid Transportation (HART), since the city's current rail development project is expected to have a station stop built on Honolulu CC property at the corner of Dillingham Boulevard and Kokea Street. Construction of the station platform will require several buildings on the campus property to be demolished. Project plans will be reviewed by the UH Office of the Vice President for Administration and will require UH Board of Regents approval. Existing overhead electrical power lines along Dillingham will be moved underground, which will require a 10-foot wide utility power easement on the Campus property. The HART rail construction project will definitely impact the College, its students, employees, and the neighboring community; however, all parties involved are working at minimizing disruption. Key stakeholders at the University of Hawai'i and the College attend periodic HART meetings to keep abreast of the latest project developments. Campus parking, traffic conditions, health, safety, and security are issues with the ongoing project that has an expected completion date of 2030 (III.B.32).

### *Maintenance*

Operations and Maintenance provides preventative maintenance and routine or emergency repairs to facilities and grounds. Energy and emissions management of building systems including HVAC and lighting are implemented through a Johnson Controls contract that began in 2011 and assists with the College's sustainability efforts (III.B.33). The eFacilities AiM Work Order Management System enables the Facilities Manager to identify problem sub-systems and their rate of occurrence, including

planning and tracking of maintenance issues for effective utilization of resources thus ensuring quality service to campus programs and services.

### Analysis and Evaluation

Honolulu CC meets this standard. UHCC and the College plans, builds, maintains, and replaces its physical resources through prioritizations that align with its strategic directives and missions to fully support academic programs and services.

[III.B.3 To assure the feasibility and effectiveness of physical resources in supporting institutional programs and services, the institution plans and evaluates its facilities and equipment on a regular basis, taking utilization and other relevant data into account.](#)

---

### Evidence of Meeting the Standard

Strategic planning documents for the University of Hawai'i System, UHCC, and the College articulate and guide the campus to ensure the feasibility and effectiveness of its physical resources support programs and services. All levels of administration within the UH System engage in planning and assessment practices, both in the short and long-term, to provide and maintain sufficient facilities and equipment ([I.A.3](#), [I.A.25](#), [I.A.7](#)).

The College participates in the System's annual Facilities Renewal Reinvestment Model (FRRM) that documents the backlog of maintenance and estimates the annual funding required for on-going capital reinvestment. The FRRM uses campus building information (e.g., building name, gross square feet, construction date), life-cycle methodology based on building sub-system and campus infrastructure life-cycles, and replacement costs to estimate deferred maintenance and future capital repair needs. ([III.B.18 \[p. 1\]](#))

The Campus undergoes continuous review of its physical resources by building tenants, custodial and maintenance staff, and security personnel, who routinely assess and report any needed repair or modification to the campus administration. Facilities at all locations are monitored on a regular maintenance schedule, including planning for deferred maintenance by UHCC and the UH System. Priorities are established for

addressing both regular and deferred maintenance as well as a consistent program of review and replacement for capital equipment for the College.

The Facilities Manager is the primary point of contact for campus facility needs. Use of the computerized maintenance management system by all campus personnel in submitting AiM eFacilities work order requests assists the Facilities Manager and the Operations and Maintenance Department (O&M) in its annual program review and future planning (III.B.34). Service area outcomes (SAO) and assessment are assigned for O&M and help it to identify needs and effectively allocate resources. SAOs include: (1) providing consistent, accurate, and timely facility support services, and (2) maintaining a system of continual improvement for all processes. In assessing its SAOs, the department has been successful in implementing changes to improve operations and services (III.B.35). Campus wide surveys are periodically administered to students, faculty, and staff in assessing satisfaction with physical resources and services, and areas of concern are acknowledged for immediate correction or further evaluation (III.B.36, III.B.37).

Effectiveness of physical resources related to the College's energy management system is performed by Johnson Controls, whose partnership with UHCC provides energy savings performance reports (III.B.33). Johnson Controls performs facilities evaluation and condition assessment including verification and operation of HVAC mechanical units. The integration of an innovative finance program with capital improvements funded from operating expenses allows the College to pay for facility improvements through its operational budget. As a result of the System's contract with Johnson Controls, replacement of obsolete energy management systems, central plant equipment, and campus wide efficient lighting and plumbing fixture upgrades were accomplished.

Program analyses in Annual Review of Program Data (ARPD) reports provide instructional, student, and support services a means of communicating facilities issues and needs. Campus programs and services also submit comprehensive reviews on a cyclical 5-year rotation (III.B.38). Division chairs, deans, and the College's administration use these reports to develop plans to readily resolve physical resource shortcomings or make recommendations for future facilities planning. Campus planning and evaluation at the program level ensures that relevant information and data is utilized on a regular basis to ensure that physical resources, including equipment, is maintained and upgraded.

The College's CTE Tech 1 Division, which encompasses transportation and trades programs, completed a thorough equipment inventory and inspection in 2014. This assessment effort was a means of determining the short and long-term repair and

servicing of equipment. In addition to inspection, operation, and testing, the division sought input from instructors and users as well as review of current manufacturer literature and industry standards. Ranked service notes indicated equipment in need of service, repair, or replacement due to obsolescence. Funding for equipment replacement could be handled through program and/or division support or the Campus' annual supplemental program funding requests (III.B.39, I.A.26). UHCC provides funds for equipment replacement annually; stipulations are set in place for malfunctioning or obsolete equipment. Replacement costs must be over \$5,000 and cannot be furniture, vehicles or computers.

The College utilizes relevant data and space utilization analysis to make informed decisions regarding campus facilities. For classroom use and efficiency, Ad Astra Information Systems analyzed campus space in relation to the scheduling of the College's courses over a series of semesters. Division chairs used the data in fall 2016 to maximize classroom use and arranged classes to meet student access and demand. The aim was to effectively allocate classroom space and faculty resources according to student demand to accelerate student course and program completion (III.B.40).

For its academic scheduling process, the College uses Resource 25, known also as R25, to optimize general classroom and event space usage. R25 provides specific information about the capacity and facilities of the room to optimize scheduling for classes, conferences, meetings or special events. The software is particularly useful in locating unscheduled rooms with specific criteria.

#### Analysis and Evaluation

Honolulu CC meets this standard. The College provides practical and effective use of its physical resources in supporting programs and services. Through support of UHCC and the UH System, the institution improves and upgrades its facilities. The campus also maximizes effective utilization of its facilities through plans, evaluations, and relevant data.

IIIB.4 Long-range capital plans support institutional improvement goals and reflect projections of the total cost of ownership of new facilities and equipment.

---

### Evidence of Meeting the Standard

The aligning of strategic plans across the UH System, UHCC, and Honolulu CC has created a shared framework for its institutional vision and planning. An important priority to move the System forward in achieving its educational goals is modernizing facilities for the 21<sup>st</sup> century. Embedded within each strategic plan are facilities objectives to address its deferred maintenance backlog with a building and grounds maintenance program that supports modern teaching and learning environments (I.A.3, I.A.25, I.A.7).

While UHCC, partly because of the side benefit of its energy efficiency programs, has a lower deferred maintenance backlog than other University of Hawai'i campuses, the UHCC Strategic Directions commits the community colleges to developing an on-going program of regular maintenance that eliminates the existing backlog and ensures that no significant new backlog will develop (III.B.41).

Several tactics to assist UHCC and the College include:

- Develop transparent, accountable, efficient and effective processes and supportive organizational structures for construction, renewal and maintenance of facilities to include all phases from planning and procurement through project management and acceptance.
- Reallocate current funding and seek new funding to properly address renovation, redesign, and maintenance for 21<sup>st</sup> century positioning avoiding in the process a buildup of deferred maintenance.

The UHCC Strategic Directions also commits to developing a system of planned equipment replacement, similar to the building maintenance plan that accounts for the expected life of equipment, the cost of replacement, and a system-wide budget for capital equipment replacement. The clear identification of a replacement schedule also provides a clearer picture of the amount of “deferred” equipment within the system.

Working with UH Information Technology Services and drawing on the planning work of the Modern Facilities Task Force, UHCC assesses all of its internal campus networks to assure that they provide the required high-speed connectivity to teaching and learning spaces, to business operations, and to students in general. Necessary upgrades will be implemented based on this assessment.

The University of Hawai'i System produced a new long-range capital plan, which serves as a guide for capital project priorities, timelines and budgets. Principles of the 6-Year Capital Improvement Projects (CIP) Plan 2018-2023 include the following: target

facilities with the highest utility and poorest conditions through upgrades, improve efficiency and utilization of facility space, and prioritize functional space for improved modern teaching and learning (III.B.26).

Projections, planning, and standards for new facilities and equipment, including total cost of ownership, are managed by UHCC and the UH System for major new projects. The UHCC Office of Facilities and Environmental Health (FEH) considers the total cost of ownership when implementing projects. The design specifications ensure that improvements are made with materials and equipment that are cost effective, efficient, and serviceable for long-term use.

In 2016, the UH Board of Regents (BOR) signaled their intent to have a system-wide shared approach to academics and facilities planning. Shortly thereafter the UH President provided system governance groups the draft of its “vision,” which documented operating principles and aspirations moving forward. Approved by the BOR in April 2017, this plan became the Integrated Academic and Facilities Plan (IAFP) for the University of Hawai‘i System (III.B.42). Outlined within are facilities planning directives that will evolve within the campus strategic and facilities plans in accord with the IAFP and coordinated across the system. Institutionalized implementation will be coordinated into biennium budget planning, annual operating budget, 6 year CIP plans and academic program approvals and reviews.

A global strategic initiative for the UH System is improving the sustainability and resource conservation of its physical resources. To that end, the UHCC entered a performance contract with Johnson Controls to implement multiple conservation measures. Energy solutions designed to reduce the amount of electricity, water, wastewater, and Syngas usage were implemented at the College. Energy efficient plans called for HVAC replacements, solar hot water, lighting retrofits, a full-time energy manager and electrical car charging stations to reduce fossil fuel usage. Additionally, the College’s new science building plan specification will achieve a minimum rating of Silver in the LEED Certified Green Building Rating Systems. Cost of ownership includes determining energy efficiency performance alongside project allocation and funding options for new construction.

### Analysis and Evaluation

Honolulu CC meets this standard. Systematic planning and budget oversight of long-range capital plans are defined through the UH System and UHCC with assistance from the College. Strategic goals and directives have been aligned to strengthen coordination and ongoing efficiencies. Controlling and reducing costs are calculated in

the total cost of ownership of new construction and equipment, with significant weight placed on sustainable practices that support institutional improvement goals.

### Standard III.C: Technology Resources

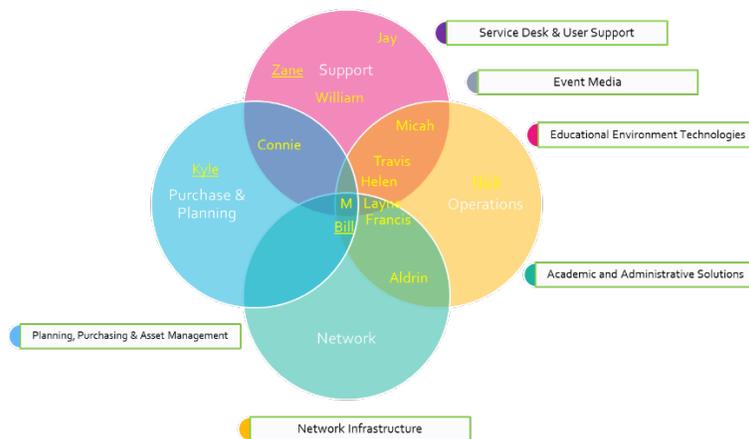

III.C.1 Technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution’s management and operational functions, academic programs, teaching and learning, and support services.

#### Evidence of Meeting the Standard

The Honolulu CC Information Technology Services (HON ITS) provides technology planning, purchasing, support, and operational requirements for the institution. HON ITS supports the college mission by providing the technical infrastructure to sustain an engaging learning environment that values academic excellence.

HON ITS operates in conjunction with the University of Hawai’i, allowing the technology of the campus to be fully integrated with the other UH campuses. UH manages the system-wide infrastructure, including identification authentication, Laulima (learning management platform), Banner (student information system), PeopleSoft (human resources management system), and KFS (Kuali Financial System).

HON ITS is structured as four departments (Network, Support, Operations, Planning and Purchasing) with six overlapping functional areas (Asset Management, Infrastructure, Academic & Administrative Solutions, Educational Technologies, Event Media, Service Desk). The services are designed to address the evolving needs of the campus, particularly academic programs, teaching and learning, support services, and management and operation function.

The staff of thirteen full-time employees and four part-time student assistants of the HON ITS division are managed by a Chief Information Officer.

The UH ITS Help Desk provides 24-7 support to assist faculty and students with Laulima (Sakai) learning management system (III.C.1). Faculty use Laulima for communication with students, providing assignments, tracking grades, administering exams, and other services related to course management.

Google is the service provider for all University of Hawaii (UH) institutions and provides email, scheduling, cloud storage, and productivity tools, such as for documents, spreadsheets, and presentations. These are available to all students, faculty, staff, and administrators.

The Google login is customized to use the @hawaii.edu domain, which is the primary account and used for authentication for Laulima (III.C.2), online registration (III.C.3), and MyUH for student and faculty services (III.C.4). Faculty and staff use the login to access online pay statements, online leave requests, eCafe course evaluation information, and Halawai Web Conferencing.

The Honolulu CC campus operates approximately 2,300 desktop, laptop, and virtual desktop computing devices, and over fifty virtual and physical host servers with extensive Unified Threat Management coverage of the entire campus. Voice communication includes 437 VOIP campus phones plus UH System integration with its PBX.

Campus wireless networks provide 130 access points overlapping with high speed wired networking in all buildings including all campus classrooms. The networks extend to off-campus sites of Kokea Street (Automotive Technology and Diesel Mechanics programs), Airport Training Center (Aeronautics Maintenance), and the Marine Education and Training Center (Small Vessel Fabrication and Repair). The military supervises its own network at Pearl Harbor Navy Shipyard (Applied Trades) for security reasons.

The majority of software products utilized are accessed online. To ensure this functionality, HON ITS reviews, updates, and approves a network plan that is published at least two times per year (III.C.5), and follows its technology guidelines outline in the HON ITS Strategic Plan (III.C.6).

For the teaching environment, HON ITS provides reliable and enhanced technology in the classroom and develops technology plans required by divisions, departments, programs and students. The goal is to meet the instructional needs of faculty.

Over 75% of current classrooms are now standardized for connectivity and media. Students and faculty benefit from the standard media classrooms, which dependent on sizes, will have digital projections or minimum 60” LCD displays, white walls for writing and projection, standard presentation virtual desktop appliances, and wireless access to the campus high-speed Wi-Fi networks. Classrooms are maintained and upgraded on a five-year cycle along with all campus networking, core routing, and Unified Threat Management systems.

HON ITS initiated a five-year plan to enable all course content to be accessible online regardless of teaching modality (III.C.7). The availability of course content online, including lectures, allows repetition and review of materials that hopefully leads to better student success and retention rates.

HON ITS surveys faculty every fall and spring to evaluate its support, seeking an approval goal of 90% (III.C.8). HON ITS also identifies technology needs of the campus with various surveys, including an annual poll of divisions and program directors to determine both current technology needs and potential opportunities requiring technology (III.C.9, III.C.10).

All buildings are wired for fiber optic with gigabit capacity for both wired and wireless networks. Off campus programs, in campus-owned buildings, have fiber optic connectivity via UH networks, while the airport facility has a direct wireless network accessed through the Marine Education Technology Center facility that is fiber-linked to the main campus.

HON ITS also provides reliable campus voice systems, files services, and vendor solutions. It also develops and implements information solutions for services that are requested by administration, divisions, departments and programs. When a project is completed, an online, satisfaction survey is used to assess successful achievement, with a goal of a 95% positive response (III.C.15).

IT also measures the number of completed projects, delayed projects, and upgraded and degraded ITS services with goals of 90% on-time delivery and with asset losses of less than 5% (III.C.12).

HON ITS provides support 7:00 AM to 6:00 PM Monday through Friday and 8:00 AM to 12:00 PM on Saturday. Extended services are provided for campus or community events as needed.

All faculty and staff technology support requests are handled via the online GLPI ticketing system (III.C.11). This structure greatly improved campus support as shown by the GLPI statistics (III.C.12, III.C.13, III.C.14).

As mentioned above, HON ITS tracks support requests through its online GLPI ticketing system and strives to provide a prompt and effective response to each reported incident or request. HON ITS has a goal of a 95% successful response rate within 24 hours of ticket submission and reviews the data annually. In addition to this, HON ITS maintains and updates any ITS Services Catalog changes and notifies the campus within thirty days (III.C.16).

Sufficient controls and protection mechanisms are utilized to minimize disruption or attack to sensitive data networks and to assure secure and consistent functionality. The number of campus outages and data breaches (itemized by type) measures achievement of this outcome with the target goal of zero data breaches and 99% uptime excluding external power failures (III.C.17). University of Hawai'i Informational Technology Services provides technical updates (alerts) for all 10 campuses (III.C.18). These provisions ensure security, privacy, and reliability in addition to emergency recovery.

### Analysis and Evaluation

Honolulu CC meets this standard. HON ITS works in conjunction with UH ITS to provides comprehensive and adequate technology services for the College. Technology services support the institution's management and operational functions as well as academic programs, including teaching, learning, and support services. Technology services are appropriate for the institution, including support, facilities, hardware, and software.

III.C.2 The institution continuously plans for, updates and replaces technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.

---

### Evidence of Meeting the Standard

The College's technology is continuously updated and replaced to improve the quality and capacity of infrastructure for operations, programs, and services to support an

engaging learning environment for students, which is the mission of the institution. The quality and improvements of the technology are based in the HON ITS Strategic Plan. The plan focuses on providing technology to improve student learning outcomes, assisting faculty with integration of information, and enhancing technical efficiency (III.C.6).

Among the efforts to improve student learning is integrating cloud technology in the classroom and encouraging migration of course content to cloud services for constant availability. To assist faculty, IT has been installing interactive media in all standard classrooms and providing technical training for adaptive learning, among others. Technical operations are being improved by migrating information from drives to more reliable cloud storage, migrating the virtual data center to UH Mānoa to circumvent campus power issues due to construction, and so on. The strategic plan covers guides technology decisions through 2021.

The campus technology is closely aligned with the UH Information Technology Services (ITS), which works to integrate all 10 campuses. UH ITS follows its strategic plan to promote engagement, deliver a high-performance infrastructure, demonstrate technology leadership, promote efficiency, expand reach to research and other activities, innovate, and continuously improve (III.C.19). Among its eight key aims are to support student success, build innovative environments, and enhance value of data assets.

To keep the campuses abreast of its initiatives, UH ITS provides a full-day workshop each year (III.C.20, III.C.21).

While UH ITS supports technology that expands to all UH campuses, HON ITS provides the support for the local campus. With an annual budget of around \$400,000, HON ITS has been able to build an intelligent, high-speed campus network, with hybrid cloud services replacing very expensive campus data centers. Technology is prioritized, based on the goals of its own plan.

The HON ITS Virtual Data Center is based on a hybrid cloud strategy and provides campus-wide Unified Threat Management, three layers of network security for student, personal, and health data, and security for expanding Internet of Things operation of building systems, security cameras, mobile devices, and encrypted remote access. The result is security, availability of services, limiting redundancy of systems, scalability for new services, and convenience for administration, faculty, staff, and students.

The campus Virtual Data Center and all levels of the IT infrastructure are designed for long-term reliability and continuous upgrading. Elements of this are significantly different than legacy systems based on standalone computing devices. Overall policy for

active components is eight years and replacement of standalone hardware computing devices (desktops and laptops) every five years.

All networking equipment, physical and virtual, is monitored with lists of age and service history (III.C.22). This IT inventory tracking helps with asset planning purposes. IT Inventory for asset planning is updated and published on the ITS intranet twice a year.

The HON ITS core routing and Virtual Data Center are current hardware with less than five years of an eight-year policy. The manufacturer and system supplier support policies are maintained for Threat Management systems. As these are steadily evolving systems the College is already evaluating new technologies to replace these systems as of summer 2017.

Physical host servers (the hardware component for both virtual servers and virtual desktops) are currently at five years for end user and primary production systems. Older host hardware is maintained for testing, support, and non-critical network system redundancy.

Procedures are in place to ensure the campus wired and wireless networks are secure and reliable all year round. HON ITS annually reviews its products and services provided to the campus in its annual reports (III.C.23, III.C.24, III.C.25).

For planning, purchasing, and asset management, all computing equipment, excluding program or discipline specific systems, is provisioned by HON ITS, allowing faster replacement of legacy hardware with VDI (virtual desktop interfaces) and hybrid cloud systems for higher reliability and availability from any Internet connected computing device, campus owned or personal.

Through its purchasing policy and procedures, IT has been able to minimize technology waste and redundant technology purchases. Previously, hardware and software were purchased directly by departments or programs with only general specifications provided for the campus. Since 2016, to insure technology fits within the IT plan, purchases of equipment and software have been centralized, each with approval by the Chief Information Officer (III.C.26).

The upgrade to virtual desktops has allowed replacement of general computer lab equipment for continuous upgrade and efficient replacement. This is now being expanded to faculty offices with approximately two hundred VDI are in service on the campus. Faculty and staff are being directed to submit GLPI ticket requests to HON ITS for any office computer older than five years. Traditional desktop systems are replaced

on request with VDI for new clients or by conversion of existing hardware to client status. Replacement of laptop computers requires justification for a laptop and is replaced on the same schedule. Unless required, HON ITS provides current equipment to published specifications and imaging from identified manufacturers, currently Dell, Lenovo, and Apple.

One current project is to install backup power generation for the IT infrastructure on campus. Campus construction and power related activities often are planned for after hours, weekends, and holidays, limiting campus-based logins when power is turned off. While our hybrid cloud infrastructure is increasingly replacing campus-based systems, identity management and security are limited during these power outages. Since this is not acceptable for students and faculty, this problem is being addressed by building a fully redundant HON ITS facility at the UH Mānoa campus' Information Technology Center that includes staffing and full backup power capabilities. This project will be particularly important as class offerings need to be online and campus physical facilities need uninterrupted security.

To help students stay up-to-date with software on their devices, all enrolled in the College are able to receive, without charge, Microsoft Office 365 with storage, cloud applications and downloadable applications, for up to five computers. This same benefit applies for all campus faculty, staff, and administrators. Currently the campus maintains approximately 7,000 licenses for the campus community and is upgraded automatically as required.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution keeps track of its campus technology and monitors age of equipment for replacement. Plans for updating technology are included in the HON ITS strategic plan, to ensure infrastructure, quality and capacity are adequate to support its mission, operations, programs, and services.

III.C.3 The institution assures that technology resources at all locations where it offers courses, programs, and services are implemented and maintained to assure reliable access, safety, and security.

---

### Evidence of Meeting the Standard

Honolulu CC off-campus facilities and sites are technically integrated, three with high capacity fiber optic networking and one by broadband. These were completed within the last four years.

The off-campus sites include Kokea Street (Automotive Technology and Diesel Mechanics programs), the Marine Education and Training Center (Small Vessel Fabrication and Repair), and the Airport Training Center (Aeronautics Maintenance). The Airport Training Center uses broadband because the building is not UH property and federal law precludes the installation of fiber optic cabling.

The College provides courses at the Pearl Harbor Navy Shipyard for the Applied Trades program, but the military supervises network there for security reasons. Access to campus applications is restricted by the Naval base network firewalls.

Otherwise, all technology products and services on the main campus are available to faculty, staff and students at remote facilities. The College allocates resources for the management, maintenance, and operation of its technological infrastructure and equipment (III.C.27).

For security, UH ITS manages a Google login customized for use of the @hawaii.edu domain, which is the primary account and used for authentication for the learning management system Laulima (Sakai), online registration, and MyUH for student and faculty services. The Google login is also used by faculty and staff to access online pay statements, online leave requests, eCafe course evaluation information, and Halawai Web Conferencing.

The UH Help Desk provides round-the-clock support for students and for faculty (III.C.1). Specific problems related to Honolulu CC courses and faculty are forwarded to HON ITS.

Laulima is the same learning management system used by faculty for face-to-face classes and provides cloud applications, collaboration, storage, and communication. For reliability, the College upgraded the campus networks, both wired and wireless, to support high-speed Internet connectivity to Laulima.

In 2016, to provide faculty with tools for distance education courses, HON ITS began training faculty in its new Faculty Content Development Studio. The studio is designed to provide both audio and video technology for narration of presentation slides applications and studio video production of course lectures.

Audio recording is linked to Honoulu CC Office 365 PowerPoint Mix cloud services to provide universal client delivery of presentation with interactive component and assessment quizzes via the Microsoft Mix site. Regular web streaming via HTML 5 is also available as is upload to Laulima.

The facilities utilize virtual studio sets and is almost completely automated for faculty use. The classroom sets include screens for presentation materials, e.g, PowerPoint with live annotation as well as white board annotation. Tablet icons manage camera controls, without technical support. HON ITS currently operates this studio and provides the training and support for faculty who wish to use it.

In addition to the benefits for online courses, putting course content online can help students in face-to-face classes to view or review class materials, including those requiring additional assistance. Course content online, regardless of the teaching modality, may improve student retention.

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution maintains and provides reliable, secure, and safe technology resources at all locations where it offers courses, programs, and services, except at base facilities restricted by the military. These resources include those for online students.

III.C.4 The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.

---

#### Evidence of Meeting the Standard

The College provides appropriate instruction and support for faculty, staff, students, and administrators for effective use of technology for programs, services, and institutional operations.

The Laulima learning management system used by students and faculty provide comprehensive visual help screens for all aspects of using the software, from getting started to working with assignments, taking quizzes, navigating through course modules

(III.C.28). For faculty, there are more help screens for complex uses such as communicating with students, importing quizzes, handling grading, managing forums, using clickers, among many others (III.C.29).

Various technology training is available to students, faculty, and staff. Many training materials and services are available through HON ITS, including the Training Toolbox that provides video presentations on technology and services (III.C.30).

Academic Support also provides training services in conjunction with the general campus computer labs that they operate.

Microsoft Office 365 provides a large library of training videos for both students and faculty in the educational uses of their technology. Microsoft provides the general Office Training Center (III.C.31), the Office 365 Basics Video Training (III.C.32) and the Microsoft Virtual Academy (III.C.33).

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution provides appropriate instruction and support for faculty, staff, students, and administrators, in the effective use of technology and technology systems related to its programs, services, and institutional operations.

III.C.5 The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

---

#### Evidence of Meeting the Standard

The College follows UH System policy on the appropriate use and management of information technology resources (III.C.34), to provide effective protections, equal access, and administrative guidelines for use of these resources. This policy applies to students, faculty, staff, and authorized guest users.

The College also complies with other UH System policies and procedures, including the institutional data governance policy establishing system-wide standards to protect the privacy and security of data and information under the stewardship of the University (III.C.35).

Students are obligated to abide by the code of conduct policies stipulated by the UH System (I.C.24) and the Honolulu CC (I.C.25). These policies cover plagiarism, including through the use of technology.

As a procedure, unauthorized materials that infringe on copyrights will be taken down from UH System webpages (III.C.36) in accordance with the Digital Millennium Copyright Act. These infringements also violate the policy on use and management of information technology resources (III.C.34).

The College also follows copyright and file sharing policies (III.C.37). These policies are published on the UH website.

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution has policies and procedures that guide the appropriate use of technology in the teaching and learning processes.

### **Standard III.D: Financial Resources**

III.D.1 Financial resources are sufficient to support and sustain student learning programs and services and improve institutional effectiveness. The distribution of resources supports the development, maintenance, allocation and reallocation, and enhancement of programs and services. The institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability. (ER 18)

---

#### Evidence of Meeting the Standard

Honolulu CC coordinates its financial resources with the Office of the Vice President, University of Hawai'i Community Colleges (UHCC), which oversees the seven Hawai'i community colleges. Honolulu CC is one of its members. UHCC is committed to support and sustain student learning programs and services and improve institutional effectiveness. Sufficient revenue streams are maintained to cover base operations as well as support initiatives that innovate and enhance programs and services. Institutional priorities are identified through goals and objectives established during the strategic planning process and funding sources are provided to help realize some of these priorities. The budget process is managed with integrity to ensure that financial stability is maintained.

The institution has sufficient revenues to support improvements and innovation in education at the College, and the campus budget for the past three years shows sound fiscal management. Fiscal years begin on July 1 ([III.D.1](#), [III.D.2](#)). (*See sections III.D.4 on institutional planning and III.D.3 program funding through program review.*)

There are two basic funds supporting the institution: General Funds (GF), provided by the state, and Tuition and Fees Special Fund (TFSF), generated from student enrollment. General Funds helps cover the bulk of operating expenses, which payroll for faculty and staff account for about 80%.

The state appropriated revenues (General Funds) subsidize a significant portion of the operating costs of the community colleges to keep post-secondary education within reach of target populations. The Vice President for Community Colleges and the Community College Chancellors determine the General Fund allocations to the individual community colleges, normally maintaining established levels of current service funding.

Current service funding is equal to the prior year General Fund appropriation, plus any collective bargaining augmentations, minus based budget reductions, plus funds for new initiatives (such as program changes). General Fund base budget reductions are normally driven by downturns in the state economy; however, it should be noted that there have been no significant budget reductions since FY 2011.

The General Funds combined with tuition generated from credit instruction comprise the general operating fund or unrestricted operating budget of the campus. In 1995, the Hawai'i Legislature authorized the establishment of the Tuition and Fees Special Fund (TFSF) and permitted the University of Hawai'i system to retain and expend revenues from tuition in order to "...maintain and improve the University's programs and operations" (Act 161, SLH 1995). Prior to this action, tuition revenues were retained by the state, and the UH System received General Fund appropriations for all general operating expenses.

This change afforded the Community Colleges the means to implement planned tuition increases designed to sufficiently cover base operations as well as fund initiatives supporting educational improvement and innovation. But, in spite of consecutive tuition increases over the past twelve years, the UH Community Colleges remain affordable. According to the 2016 College Affordability Diagnosis by the University of Pennsylvania Graduate School of Education, the UHCC campuses were identified as the most affordable two-year public higher education institutions in the nation ([III.D.3](#)).

The Board of Regents (BOR) has the authority to set tuition and fees ([III.D.4](#), [III.D.5](#)). When tuition and fees are increased, the University provides timely notice and explanation to students ([III.D.6](#)).

The combination of General Funds and TFSF provide a significant stabilizing effect on campus funding operations. Even when enrollment contracts, General Fund allocations remain relatively stable, mitigating the impact of the loss of TFSF revenue. Conversely when enrollment grows, campuses generate additional revenue to meet increased costs. As mentioned previously, reductions to the General Fund base itself usually coincides with downturns in the state economy; however, these periods are often associated with increases in enrollment as students leave the workforce to further their education ([III.D.7](#)).

Honolulu CC manages its finances with integrity to ensure stability, abiding by the policies of the BOR ([III.D.8](#)), UH, and UHCC ([III.D.9](#)). In line with these policies, the College follows administrative procedures to make certain financial resources are used tactically to achieve the College mission.

The framework of financial planning begins with a comprehensive operating financial plan submitted to the BOR for its approval prior to the start of each fiscal year. The plan provides the BOR with oversight to ensure that the University is managing its resources in a fiscally responsible manner.

The plan includes all appropriated funds including the general operating budget and other special and revolving funds. The primary underlying assumption of the approved plan is that projected expenditures do not exceed projected revenue, except for planned one-time expenditures. These budgets are broken down on a quarterly basis and variances exceeding established thresholds at the UHCC level must be explained to the BOR at the close of each quarter. The Board requires a budget review, and the UH campuses develop the plan ([III.D.10](#)).

General operating budgets (GF plus TFSF) are formulated for the BOR using the following budget tools:

- General Fund projections are based on anticipated allocations ([III.D.9](#)).
- TFSF revenue projections are based on prior year collections plus/minus changes in projected enrollment and plus BOR approved rate increases. TFSF projections are carefully monitored and adjusted according to actual fall and spring enrollment ([III.D.11](#)).
- Regular and lecturer payrolls are projected based on labor ledgers and personnel data contained in financial management and personnel information systems to ensure accuracy of projections, such as those provided from the labor ledger information in the university's Quali Financial System.
- Non-payroll budgets (other current expenses) are evaluated against historical averages of expenditures to determine appropriateness of current year allocations ([III.D.12](#)).
- Cash balances are projected and reviewed to ensure compliance with reserve policy requirements ([III.D.13](#)).

All other special and revolving fund programs implement cost-center-based budgeting for revenues and expenses through the development of financial plans that are submitted to the business office. A UHCC policy was adopted to provide additional guidance to the campuses on executing financial oversight of these revenue-generating programs ([III.D.14](#)).

General operating information is entered into the Quali Financial System at the individual account level by major category of expenditure (regular payroll, lecturer

payroll, casual hire payroll, student help payroll, other current expenses and equipment). These budgets are monitored monthly by the UHCC.

The College adjusts general operating budgets (GF plus TFSF) throughout the year as needed, taking into account payroll budget updates from UHCC. Variances indicate what is to be adjusted:

- Regular and lecturer payroll requirements are re-projected every month and compared against budgets to determine if revised projections require budget changes.
- Other payroll and non-payroll budget balances are reviewed on a regular basis to determine if budget balances are adequate or require budget changes ([III.D.15](#), [III.D.16](#)).
- Internal general operating budget financial plans are produced and updated to ensure that campus revenue and expenditure plans are current ([III.D.7](#)).
- General operating budget status reports are reviewed at UHCC Vice Chancellor of Administrative Services (VCAS) meetings ([III.D.7](#)).
- The College's VCAS meets with heads of each division or program review their budgets and requirements. (*See section III.D.4*)

For other special and revolving funds, financial plans are monitored to track revenue and expenditure projections ([III.D.11](#)). Best practices for cash management are followed to ensure that cash flow requirements, long-term obligations and other unanticipated costs can be covered as they arise.

The resource allocation process provides a means for setting priorities for funding institutional improvements. Allocations are provided with priority for development, maintenance, and enhancement of programs and services that strategically support important initiatives. (*See section III.D.3; section I.B.3*).

The College also may receive performance-based funding. Performance-based funding aims to generate greater institutional productivity, accountability, and educational attainment. Through funding incentives, performance based funding is designed to encourage efficient resource allocation, greater awareness and attention to strategic priorities and a results-oriented campus culture ([I.B.26](#)).

The UHCC currently earmarks approximately \$6.5 million of its base budget for this purpose. Starting from FY 2016, the University of Hawaii System began providing performance-based funding that contributed an additional \$2.0 million. Combined,

performance-based funding represents over 4% of the total UHCC operating budget ([III.D.17](#)).

The Hawai'i Graduation Initiative (HGI) is one example of a high priority initiative. The HGI aims to increase the percentage of educated citizens within the state. The strategy for HGI reflects the UHCC's commitment to support increased student enrollment and completion, particularly for students from underserved populations and regions, and to expand workforce development opportunities across the state. Performance-funding allocations support the HGI by linking funding to the successful attainment of goals that promote the initiative.

The College also receives UHCC Innovation and strategic initiative funding allocations to address critical needs identified through the strategic planning process and support of goals. Some of the initiatives include subsidizing the cost of new classes associated with enrollment growth, reforming developmental education, improving retention and persistence through guided pathways and early intervention systems, expanding financial aid support, supporting Native Hawaiian achievement, replacing equipment, and so on ([I.A.7](#), [III.D.18](#)).

Examples of some of the major initiatives are as follows:

**Enrollment Growth** funding is designed to provide the community colleges with the resources needed to meet student demand for instruction. Since tuition revenue alone historically has been insufficient to cover all costs associated with offering additional classes, the enrollment growth fund was established to cover the differential cost (additional costs net of tuition revenue) for additional credit classes/credits required to meet student demands. This has successfully eliminated the financial "disincentive" for adding new sections and allowed UHCC campuses to become more aggressive in their decisions to add classes that students need to complete their degree requirements.

**Developmental Education Reform** funding supports the UHCC's large-scale approach to accelerate students through college-level math and English. National data through such organizations as Complete College America consistently show that incorporating the co-requisite model, rather than the pre-requisite model, results in many more students successfully passing gatekeeper courses. Given the large number of underprepared students that require support to successfully complete college-level courses, the initiative is anticipated to have a significant impact on retention, persistence, and graduation.

**Guided Pathways** funding supports efforts to improve timely completions by providing every student entering the community colleges with a clear individualized

guided pathway to their credential with associated student support structures. The initiative expands the University's capacity to track and advise students using an intuitive online academic mapping and advising tool that links with student registration.

**Achieving the Dream** funding supports the participation in the national effort to help more community college students succeed, with a special focus on students of color and students with low-income.

**Financial Aid Support** funding supports efforts to eliminate financial barriers to the community colleges by improving access to financial aid among low-income students, and those from underserved regions and populations.

**Equipment replacement** funding supports campus efforts to maintain an inventory of properly functioning and technologically current equipment. Career and Technical Education (CTE) programs in particular require a substantial investment in equipment to provide students with meaningful hands-on training, ensure student safety and maintain currency with industry standards and expectations.

Institutional resources are sufficient to ensure financial solvency.

#### Analysis and Evaluation

Honolulu CC meets this standard. The financial resources of the College are sufficient to support and sustain student learning programs and services and sufficient to improve institutional effectiveness. The basic funds supporting the institution are General Funds coming from the state and Tuition and Fees generated from student enrollment. The College plans and distributes funds for development, maintenance, allocation and reallocation, and enhancement of programs and services. Through layers of oversight, including that of the Board of Regents and the UHCC, the institution plans and manages its financial affairs with integrity and in a manner that ensures financial stability.

III.D.2 The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning. The institution has policies and procedures to ensure sound financial practices and financial stability. Appropriate financial information is disseminated throughout the institution in a timely manner.

---

### Evidence of Meeting the Standard

The College's mission and strategic goals are the foundation for all financial planning. The institution identifies goals for achievement, establishes priorities, and ties institutional plans to financial plans both for the short-term and long-term.

The College's mission is to provide accessible educational opportunities that values academic excellence and personal growth of all students. This goal coincides with the strategic directions of the University of Hawai'i and the UHCC. To support the goals, measures are used to support funding allocations (performance funding).

These measures are aligned with the UH Strategic Directions, the UHCC strategic plan, and the College strategic plan. On a wider scale, these strategic goals drive budget priorities in an effort to achieve the outcomes directed by the UH Board of Regents (BOR).

The University of Hawai'i (UH) has identified guiding principles in establishing its formal Strategic Directions for 2015-2021 ([I.A.25](#)). The UH Strategic Directions, approved by the BOR in January 2015, provides the framework, objectives, and priority targets for the University. Honolulu CC's strategic plan ([I.A.3](#)) and the UHCC strategic plan ([I.A.7](#)) align with the UH Strategic Directions ([I.A.10](#)).

The University of Hawai'i strategic planning process provides a direction and the focus for the budget development process. Strategic planning was the basis for development of a Budget Policy Paper issued by the University President during the biennium budget cycle ([III.D.19](#)). The Policy Paper sets forth the environmental context for budget building, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget. The emphasis of the Budget Policy Paper is on proposals that can be framed to support the major strategic directions of the University of Hawai'i. As such, strategic planning and budget development are closely linked processes as budget priorities are based on the achievement and advancement of strategic planning goals.

On the UHCC level, the Strategic Planning Council (SPC) is the primary body for assuring participation in the strategic planning process ([I.A.5](#)). The council consists of the chancellors, faculty senate chairs, student government leaders from the campuses, and vice president and associate vice presidents for the community colleges. The SPC evaluates and finalizes outcomes and performance measures and meets twice a year in full session to review progress made toward the goals and to make adjustments as needed over the planning period ([III.D.20](#), [III.D.21](#), [III.D.22](#)). The SPC uses the outcomes of the strategic planning process to set goals and priorities that are reflected in

program planning, budget planning and resource allocation decisions. The SPC also makes recommendations on the allocations and broad purposes of the innovation funds described earlier. *(See section III.D.1)*

On the institution level, the campus Planning Council is the primary group for overseeing the strategic planning process ([I.A.8](#)). The committee is made up of faculty, staff, and administrators from key areas of the College. The Council meets monthly to discuss strategic campus issues, specifically developing and reviewing the strategic plan, the college mission, institutional learning outcomes, and managing the supplementary program funding process by involving other four governing committees to provide feedback on budgeting priorities. The strategic plan and the college mission are reflected in the resource allocation for that program funding ([I.A.13](#), [I.A.26](#)). All programs are encouraged to participate in the process and allocation is determined by priorities from rankings by campus governance committees ([III.D.23](#), [III.D.24](#), [III.D.25](#)).

The following are measures that are tied to funding allocations upon the successful achievement of established goals:

UH performance funding goals (\$2.0M):

- Degrees and certificates awarded
- Degrees and certificates awarded to Native Hawaiian students
- Degrees and certificates awarded to students in Science, Technology, Engineering, and Math (STEM) fields
- Degrees and certificates awarded to Pell recipients
- Transfers from the community colleges to UH baccalaureate campuses
- Success rates (150% time-to-degree)

UHCC performance funding goals (\$6.5M):

- Degrees and certificates awarded
- Degrees and certificates awarded to Native Hawaiian students
- Degrees and certificates awarded to students in Science, Technology, Engineering, and Math (STEM) fields (including UHCC students that go on to receive UH awarded baccalaureate degrees)
- Degrees and certificates awarded to Pell recipients
- Transfers from the community colleges to UH and non-UH baccalaureate campuses.

There is strong evidence that past expenditures have supported the achievement of institutional plans based on the achievement of goals for measures that are tied to funding ([I.B.25 \[p. 24\]](#)). Goals are established through FY 2021 to provide a framework for both short-term and long-term budget planning.

Other specific UHCC goals that are not tied to funding were also established to eliminate access and success gaps for targeted populations. These goals reflect the commitment to address achievement gaps for populations normally considered underrepresented in higher education (Native Hawaiian, Filipino, Pacific Islander, and low-income students). The goals relate to enrollment, graduation, STEM graduation, and transfer for the targeted underrepresented populations. There is evidence to suggest that expenditures have supported progress toward achieving these goals; however, it should be noted that these are relatively new measures and that additional time is needed to fully realize these goals ([III.D.20](#), [III.D.21](#), [III.D.22](#)).

As noted earlier, the College's financial planning process relies on UH System, UHCC, and campus plans for direction. The UH and UHCC strategic plans set the overall direction and performance benchmarks. Institutional standards for achievement and the methods of assessing these standards are set by UHCC policy ([I.B.24](#)). Campus plans operationalize the methods to meet these standards ([I.A.3](#)).

The timing of the financial planning process at the College is tied to the state budget and UH System budget processes. The UH System President prepares a budget, which includes all elements of the University for submission to the Board of Regents.

The Board has a fiduciary obligation to ensure that the University is managing its resources in a fiscally responsible manner ([III.D.26](#)). The University also adheres to its policy of fiscal responsibility ([III.D.27](#)).

Upon approval by the Board, the University's budget is submitted to the Governor for review and incorporation into the executive budget request. The executive budget request for the state is then submitted to the legislature in December for consideration in its regular January session. Appropriations by the Legislature are usually passed in May and transmitted to the Governor for approval. Upon approval in June by the Governor, allocation notices are transmitted to the University, including any restrictions imposed on legislative appropriations. The UH President determines distributions of General Funds including a UHCC level distribution. The Vice President for Community Colleges (VPCC) and the community college chancellors determine the General Fund allocations to Honolulu CC and the other community college campuses, normally

maintaining established levels of current service funding. The College then manages the appropriation based on operations needs and strategic priorities ([I.A.3](#)).

### Analysis and Evaluation

Honolulu CC meets this standard. The institution's mission and goals are the foundation for financial planning, and financial planning is integrated with and supports all institutional planning ([I.A.5](#)). The institution's strategic plan links to the strategic plans of UH and UHCC ([I.A.10](#)). The institution has policies and procedures to ensure sound financial practices and financial stability ([III.D.26](#), [III.D.27](#), [I.A.5](#)). Appropriate financial information is disseminated throughout the institution at the beginning of each fiscal year, when funds are available.

[III.D.3](#) The institution clearly defines and follows its guidelines and processes for financial planning and budget development, with all constituencies having appropriate opportunities to participate in the development of institutional plans and budgets.

---

### Evidence of Meeting the Standard

The institution establishes priorities among needs so that it can predict future funding requirements. Institutional plans are based on the UH strategic plan, UHCC strategic plan, and the Honolulu CC strategic plan and are closely linked to financial plans, both short-term and long range. The financial planning process also relies primarily on institutional plans for content and timelines.

The institution defines and follows guidelines and processes for financial planning and budgeting ([I.A.5](#)) (*See section I.B.9*). Budgeting is in conjunction with the UHCC.

UHCC has clearly defined guidelines and processes for financial planning and budget development. The budget development process is outlined in the Budget Policy Paper and budget instructions. The Policy Paper sets forth the environmental context for budget construction, the general program policy and management objectives, and the institutional priorities that guide the preparation of the budget ([III.D.28](#)).

The budget instructions establish the budget philosophy, major budget assumptions, expectations, and timeline. The instructions also address operating budget revenue and

expenditure assumptions, including enrollment and tuition revenue projections, payroll cost assumptions, and utility cost projections. Assumptions for developing CIP revenue and expenditure projections also are provided. Finally, the instructions outline the expectations for increased efficiencies and productivity ([III.D.28](#)).

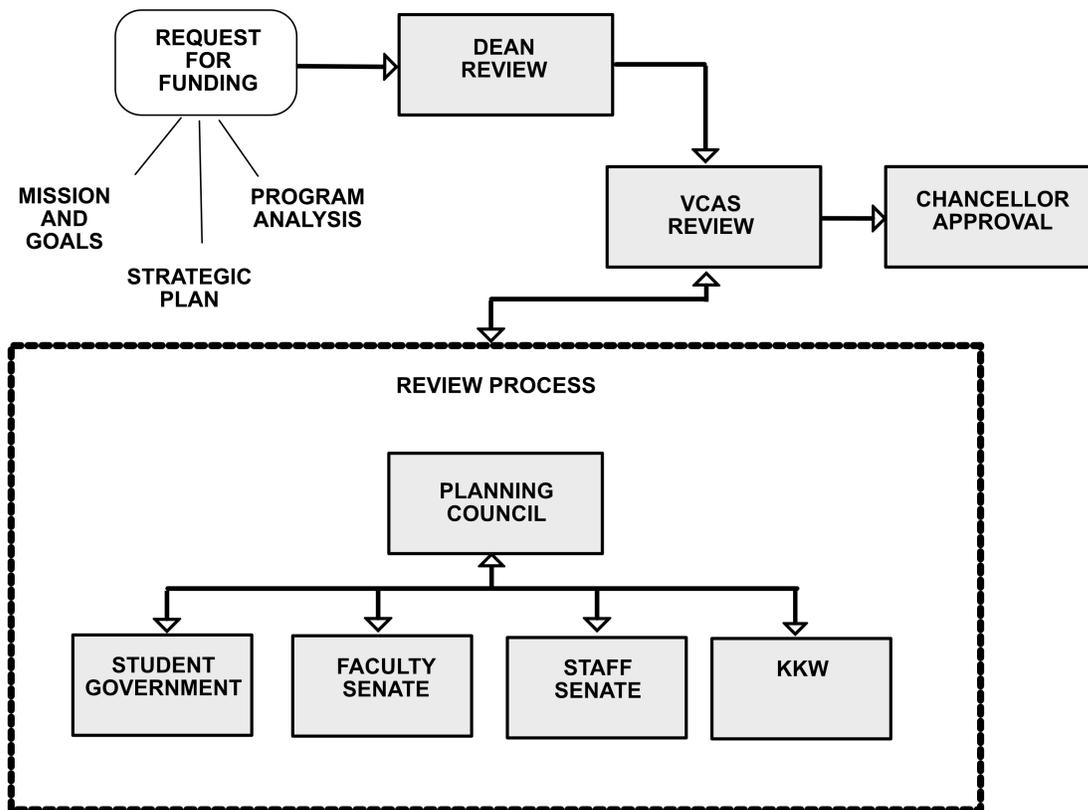

Budget development details are posted on the UHCC website ([III.D.29](#)). A proposed budget request is submitted to the Board of Regents. UHCC budget execution documents are distributed during monthly Vice Chancellor of Administrative Affairs meetings and posted on the UHCC website ([III.D.30](#)). Key documents include general operating budget allocations, general operating budget financial plans and general operating budget status reports.

Honolulu CC's budget development is consistent with UHCC's allocation process ([III.D.1](#)).

The College follows a policy for planning, resource allocation, and assessment process that integrates components into a system that assures that academic and facilities planning is consistent with the established mission for the college ([I.A.4](#), [I.A.19](#)). The policy specifies the strategic plan, the mission, planning context, assessment, priorities, and resource requirements. The strategic plan and the mission were developed with full campus involvement, and they are the guiding principles for fund allocation.

The College also bases its financial planning on analyses of program effectiveness. Each year programs receive data from UHCC to analyze the effectiveness of their programs. The data and subsequent analyses are called Annual Reports on Program Data (ARPD) ([I.B.40](#), [I.B.36](#), [I.B.38](#)). The APRD help programs determine their strengths and weaknesses for financial and academic planning and these use these analyses to request additional funds for projects that benefit students.

The requests for additional funding involves the whole campus through a process managed by the Planning Council and the Vice Chancellor for Administrative Services (VCAS). As mentioned, funding proposals describe how the funds apply to the mission and goals, the College's strategic plan, and the assessment of program data ([I.A.13](#), [I.A.26](#)). ARPD assessment also influence decisions on a program's existing funding, such as move to close the Construction Management Program and incorporating its courses into the Architectural, Engineering and CAD Technologies program.

*Illustration-Standard-III.1 –Review Process*

Requests are reviewed by deans and the VCAS and then forwarded to the Planning Council, which distributes them to be ranked by the other four governance committees – Faculty Senate Executive Committee (FSEC), Staff Senate Executive Committee (SSEC), Kupu Ka Wai Council (KKW), and Student Government. The proposals also are made available on the Intranet for the campus to view.

The process incorporates a town hall meeting where proposers present and answer questions about their proposals. This meeting is open to faculty, staff, and students, who can provide input to their representatives on the governance committees. The process allows participation from the whole campus.

As noted, the Planning Council oversees this budget process, working closely with the VCAS. The rankings are consolidated and presented to the Chancellor, who makes decisions on the funding based on campus funds available ([III.D.31](#), [III.D.23](#), [III.D.32](#)).

Because of the complexity with recurring costs and staffing limitations, programs request positions initially through deans. These requests must be supported by the ARPD analyses, the goals of the College mission, and the strategic plan. Human Resources and the VCAS review requests for positions and advise the Chancellor before being approved.

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution defines and follows guidelines and processes for financial planning and budget development. Faculty, staff, and students have opportunities to participate in the development of institutional plans and budgets.

III.D.4 Institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

---

#### Evidence of Meeting the Standard

Institutional planning at Honolulu CC reflects a rational assessment of resource availability, development of financial resources, and expenditure requirements. These are in line with its strategic goals.

Proposals for tuition increases take into account the needs of keeping college affordable, meeting immediate campus needs, and achieving the goals of the strategic plan. UHCC has successfully maintained this delicate balance for all the community colleges. The established tuition rate schedule ensures adequate resources for the ongoing needs and new funding to meet strategic objectives, yet the tuition still allows the colleges to remain affordable when compared to other two-year institutions.

One of the strategic directions is to diversify the resource base beyond state appropriations and tuition to support student education. The tactics to achieve this goal include:

- Improving revenue streams associated with other revenue-generating programs that will ultimately help cover campus overhead expenses.

- Spearheading efforts to pursue external funding for projects that relate to strategic priorities. UHCC is in the process of establishing a Grants Office that will target state- or system-wide appeal to accelerate long-term strategic goals. One example of tremendous potential is the recent 5-year award in September 2015 for the whole system of \$24,653,118 in federal Trade Adjustment Assistance Community College and Career Training Grants Program (TAACCCT) funding.
- Executing successful fundraising campaigns across all campuses to provide additional support for students, faculty, facilities, priorities, and programs.
- Executing coherent strategies for international and non-resident recruitment and enrollment, including partnerships, that advances revenue goals as well as the educational benefits to Hawai'i students of a globally diverse student body.

Financial planning information is distributed throughout UHCC via Board of Regents' (BOR) reports, Vice Chancellor of Administrative Services (VCAS) meetings, the UH Budget Office website, the UHCC website, and the Honolulu CC website ([III.D.33](#), [III.D.29](#), [III.D.34](#)).

The BOR quarterly reports provide financial reports that show budget to actual performance, along with explanations for significant deviations from the approved budget. VCAS meetings include detailed analysis of revenue budget to actuals, expenditure budget to actuals, cash balances and end-of-year cash projections. Financial information is updated and posted on the UHCC website with that of the community colleges consolidated ([III.D.33](#)).

As noted in section III.D.3, the institution establishes funding priorities in a manner that helps the institution achieve its mission and goals, which focus on student learning. The financial planning process relies on the UH System, UHCC, and campus plans for content. The UH strategic planning documents establish the overall strategic goals and the funding priorities that can be requested during the budget development cycle to help achieve these goals. UHCC strategic planning documents further articulate the planning assumptions and provide specific tactics to attain strategic objectives. UHCC budget allocations include funding for some of these objectives ([I.A.25](#), [I.A.7](#), [I.A.3](#)).

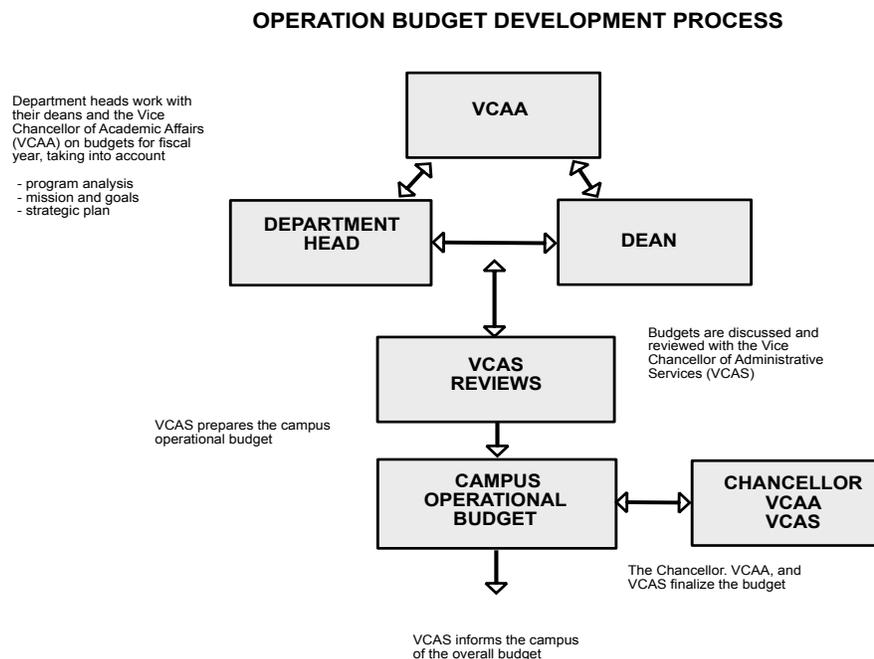

Financial or internal reports provide budgets, historical or current year revenues, expenditures, transfers, legislative or executive restrictions, enrollment trends, carry-forward cash balances, reserve balances, and cash projections to college staff at various levels. Information is communicated via written memorandum, reports, or meetings, specifically at the beginning of the year during development of budgets, and

periodically during the year to monitor the financial status. The financial status includes assessing the need for budget adjustments due to changes to initial plans, unanticipated savings, or new requirements. Projections are revised if necessary.

Identification of funds that can be reallocated, or projected unallocated balances can be available for filling of vacant positions or other needs. Filling of vacancies are prioritized by campuses, based on various factors, such as enrollment, student outcomes, the student going rate, and positions to address audit deficiencies.

UH System policy requires the College follow budgeting and accounting methods. Fiscal Administrators (FA) are responsible for controlling program expenditures within the funding authorization in accordance with University policies and procedures and sponsor funding requirements (III.D.27).

The process for operational budget development on campus begins with department heads providing expenditure requirements to their deans (or administrators) and the Vice Chancellor of Academic Affairs (VCAA). These funding needs then are discussed with the Vice Chancellor of Administrative Services (VCAS) (III.D.35).

*Illustration-Standard-III.2 – Budget Development Process*

After discussions, the VCAS prepares a campus operational budget. The budget is then finalized in conjunction with the Chancellor and the VCAA.

Program administrators of non-extramural funds provide financial or internal reports, budgets, historical or current year revenues, expenditures, transfers, legislative or executive restrictions, enrollment trends, carry-forward cash balances, reserve balances, and cash projections to college staff at various levels. Information is communicated via written memorandum, reports, or meetings when budgets are developed and when budget adjustments are made from changes to initial plans, unanticipated savings, or new requirements.

The VCAS then analyzes projected revenues from sources described in III.D.1 to determine the distribution of campus funds.

The College annually reviews its budgetary needs to support instructional and non-instructional programs and support services. This review process is based on reviews among the vice chancellors, deans, division chairs, and program coordinators. The review process takes into account program reviews, the strategic plan, campus initiatives, and the mission of the college.

### Analysis and Evaluation

Honolulu CC meets this standard. The College's institutional planning reflects a realistic assessment of financial resource availability, development of financial resources, partnerships, and expenditure requirements.

III.D.5 To assure the financial integrity of the institution and responsible use of its financial resources, the internal control structure has appropriate control mechanisms and widely disseminates dependable and timely information for sound financial decision making. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

---

### Evidence of Meeting the Standard

The institution has internal control and fiscal policies and procedures in place ([III.D.27](#), [III.D.9](#)). These policies provide a framework for financial responsibility, while the

internal controls for financial management are maintained through its financial software, the Kualii Financial System (KFS), which was implemented system-wide financial in July 2012. KFS provides a system for department heads and administrator to approve expenditures through each level of authority. KFS keeps track and manages all of the financial transactions and fiscal activity for all of the UH campuses. KFS provides real-time accounting and interfaces with other UH Systems, such as Banner Student, PeopleSoft Human Resources, and eTravel.

KFS is integrated through University system to make financial information available to those needing access. KFS keeps a record of transactions and information for financial decisions, allowing financial officers, the business office, department heads, division chairs, deans, and other managers to view their current budgets and expenditures to control their finances. The system also is used for approval and management of expenditures and payments, including those with layers of managers involved. Guidelines were implemented to protect the integrity of the system ([III.D.36](#)).

Department heads and administrators are responsible for the development and management of their budgets. KFS allows them to keep vigilant over their accounts and make real-time decisions.

To manage accounts, UH implemented eThORITY, which allows queries of financial data from KFS. Over the past two fiscal years, designated teams from the Fiscal Services Office (FSO) visited business office staff on each of the 10 campuses for feedback on user satisfaction of KFS and eThORITY ([III.D.37](#)). The suggestions were prioritized to determine which changes could feasibly be implemented in the system. While some suggestions have already led to changes in the system, this is an on-going process.

### Analysis and Evaluation

Honolulu CC meets this standard. The College, along with the other colleges in the system, uses KFS to assure financial integrity of the institution and responsible use of its financial resources. Those managing budgets as well as officers, who oversee financial operations for sound financial decision-making in a timely and dependable manner, access the software. The institution regularly evaluates its financial management practices and uses the results to improve internal control systems.

III.D.6 Financial documents, including the budget, have a high degree of credibility and accuracy, and reflect appropriate allocation and use of financial resources to support student learning programs and services.

---

#### Evidence of Meeting the Standard

The College's financial documents maintain creditability and accuracy, including the budget, which are developed so financial resources support student learning programs and services. Department heads have access to accounts through the KFS software to help them manage their budgets. These department heads are involved in the budget process and responsible for development and management of their budgets. The Vice Chancellor of Academic Affairs works with the department heads, respective deans or administrators, and Vice Chancellor of Academic Affairs in formulating an overall campus budget, ensuring that the financial resources support learning programs and services. All accounts are viewable at the system level as well.

As discussed in III.D.2, the College bases its financial planning on its mission, strategic plan, and program reviews. All are aimed at bolstering the institution's learning programs and services to help students achieve educational goals.

For fiscal responsibility, the College follows Board of Regents (BOR) policy, which addresses the fiscal management and budget process. The policy notes the Board's "fiduciary obligation to ensure that the University is managing its resources in a fiscally responsible manner" (III.D.26).

Audits are used to ensure creditability and accuracy of funds. The Board of Regents bylaws (I.A.6) mandate an independent audit of the quality and integrity of the University's compliance with legal, regulatory and policy requirements, financial report and financial states, and internal controls related to risks.

The audits are governed by University policy, which provides a framework and guidance for reviewing financial reporting (III.D.26). University management establishes and maintains effective internal financial controls and preparation of financial statements. The Vice President for Budget and Finance/Chief Financial Officer works with the BOR's Committee on Independent Audit, made up of board members, and Office of Internal Audit in planning and coordination of audits.

The Office of Internal Audit assists the BOR and University Management in fulfilling their oversight, management, and operating responsibilities. It also provides

independent, objective assurance, and consulting services designed to add value and improve the University's operations ([III.D.38](#)).

The Vice President for Budget and Finance/Chief Financial Officer liaises and coordinates follow-ups with vice presidents and chancellors who are responsible for responding to and implementing remedies for recommendations, as stipulated by the BOR policy.

The Office of Internal Audits provides audits to attest the fairness, accuracy, and reliability of financial data as well as for controls on management risks, compliance, and follow-up.

Through the BOR, an audit of the University takes place with a certified public accountant ([III.D.39](#)). A report on the December 2016 audit is captured in the minutes of the BOR committee ([III.D.40](#)).

#### Analysis and Evaluation

Honolulu CC meets this standard. The University system incorporates internal and external audit to ensure responsibility for the accuracy of budgets and financial documents. The program review process, the strategic plan, the college mission provide the means for appropriate allocation and use of financial resources to support student learning programs and services.

[III.D.7 Institutional responses to external audit findings are comprehensive, timely, and communicated appropriately.](#)

---

#### Evidence of Meeting the Standard

The Board of Regents conducts an external audit with an independent accounting firm each year.

The auditors provide to the university any observed weaknesses in financial or internal controls in an Internal Control and Business Issues Report. The report also discloses whether findings from the prior audit are resolved and if findings are repeat findings in the current year.

Audit findings are discussed with affected units to ensure units have an understanding of the reason for the finding and the regulations or other requirements upon which the finding is based. Findings are also communicated to campus administrative staff and campus or system support units if they are affected or may be involved with corrective action.

Affected units and administrative or support unit staff discuss and develop corrective action plans, which may include correcting errors, changing existing procedures, developing new procedures, making staff changes, training, implementing of new systems (e.g. Destiny) to improve compliance with regulations, increasing or enhancing financial or programmatic data available for monitoring and decision making, or improving internal controls.

Corrective action plans are communicated to the auditor in accordance with deadlines set by the auditor or coordinating office such as the Office of Research Services (ORS) ([III.D.41](#), [III.D.42](#), [III.D.43](#)).

Corrective action plans identify the program and individuals responsible for implementing corrective action, actions taken to correct the audit finding or deficiency (if applicable), actions taken to prevent reoccurrence (if applicable), and the date corrective actions were taken.

For the annual financial audits, corrective actions are confirmed by the auditor in the subsequent annual audit or by management letter ([III.D.44](#), [III.D.45](#), [III.D.46](#)).

For audits by UH Internal Auditor or other external auditors, corrective actions may be confirmed by review of operations or follow-up audits.

The independent auditors report for the 2016 consolidated financial statements contains an unqualified opinion, meaning the auditors have no reservations concerning the financial statements over the past six years.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution's responses to external audit findings are comprehensive, timely, and communicated appropriately. The independent auditors report for the 2016 consolidated financial statements contains an unqualified opinion, meaning the auditors have no reservations concerning the financial statements over the past six years.

III.D.8 The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement.

---

#### Evidence of Meeting the Standard

The College's consolidated financial statements are prepared in accordance with generally accepted accounting principles on an annual basis. These financial statements are audited along with UH funds including all special funds. The audit informs the university of weaknesses in financial or internal controls that are observed and it discloses whether findings from the prior audit were resolved or still unresolved and if findings are repeat findings in the current year.

The independent Accuity auditors report for the 2016 consolidated financial statements contains an unqualified opinion, meaning the auditors have no reservations concerning the financial statements. It states: "In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the University of Hawai'i, as of June 30, 2016 and 2015, and the changes in financial position and cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America ([III.D.47](#)).

In addition to the audit of the financial statements, the University is required to have a financial and compliance audit since it expends \$750,000 or more in federal awards during the fiscal year.

The audit provides a report on internal control over financial reporting and compliance with provisions of laws, regulations, contracts, and award agreements, noncompliance with which could have a material effect on the financial statements. This report describes the scope of testing of internal control and compliance, as well as the results of the tests. Where applicable, the report refers to a separate schedule of findings and questioned costs.

For 2016, with respect to internal control over financial reporting, the auditor reported that "[W]e did not identify any deficiencies in internal control that we consider to be material weaknesses."

For 2016, with respect to compliance with provisions of laws, regulations, contracts, and award agreements, the auditor reported, “The results of our tests and the report of other auditors disclosed no instances of noncompliance or other matters that are required to be reported under Government Auditing Standards.”

The audit also provides a report on compliance for each major program and a report on internal control over compliance. The report includes an opinion or disclaimer of opinion as to whether the audited complied with federal compliance requirements that could have a direct and material effect on each major program and refer to a separate schedule of findings and questioned costs if applicable.

For 2016, with respect to compliance for each major program, the auditor reported, “In our opinion, the University complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major federal programs for the year ended June 30, 2016.”

With respect to internal control over compliance for 2016, the auditor reported, “We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, we identified certain deficiencies in internal control over compliance, as described in the accompanying schedule of findings and questioned costs as Finding Nos. 2016-001 through 2016-003 and 2016-005 that we consider to be significant deficiencies.”

There were no findings that were directed at Honolulu CC.

The audit also provides an opinion (or disclaimer of opinion) as to whether the financial statements are presented fairly in all material respects in accordance with generally accepted accounting principles and an opinion (or disclaimer of opinion) as to whether the schedule of expenditures of federal awards is fairly stated in all material respects in relation to the financial statements as a whole.

For 2016, the auditor reported, “In our opinion, the schedule of expenditures of federal awards, as prepared on the cash basis of accounting, is fairly stated in all material respects in relation to the basic financial statements as a whole.”

All UHCC special and revolving funds are financially audited by external audit organizations. The University’s Office of Internal Audit reports audit findings directly to the Board of Regents’ Committee on Independent Audit to ensure appropriate oversight, management and operating responsibilities.

Hawai'i Revised Statutes §23-12 requires the State of Hawai'i's Office of the Auditor to conduct a review of University of Hawai'i special, revolving, trust funds and accounts once every five years. Honolulu CC, a member of the UH System, is included in this review.

The State of Hawai'i's Office of the Auditor's Report 14-18, *Review of Special Funds, Revolving Funds, Trust Funds, and Trust Accounts of the University of Hawai'i*, examined 65 University special funds, revolving funds, trust funds, and trust accounts. The report was completed in December 2014. As noted above, audits are conducted every five years.

Hawai'i Revised Statutes §23-12 specifies that the Office of the Auditor's review include:

1. An evaluation of the original intent and purpose of each fund, both as expressed by the Legislature and as understood by the expending agency;
2. The degree to which each fund achieves its stated and claimed purposes;
3. An evaluation of the fund's performance standards as established by the agency; and
4. A summary statement reflecting total fund transactions in the preceding five fiscal years, including the fund balance at the beginning of each fiscal year, total deposits and withdrawals, amount of interest earned, total expenditures made from the fund, and the ending fund balance for each fiscal year.

Report 14-18 stated that the Community Colleges Special Fund, established by §304A-2162, "continues to serve the purpose for which it was created, but it functions as, and meets the criteria for, a revolving fund and should be reclassified as such."

Report 14-18 was presented to the 2015 Hawai'i State Legislature; however, the legislature, through further consultation with UHCC, determined that the special fund classification was appropriate.

UHCC participates in annual surveys to ensure that revenue bond expenditures and uses of spaces improved by revenue bonds remain consistent with regulatory and legal restrictions.

Internal control systems are considered when developing procedures, deciding staff assignments (separation of duties), and implementing improvements to the financial system or sub systems (e.g. Banner, Destiny).

Internal control systems may also be reviewed in response to any deficiencies identified by the management letter from the annual financial audit. Reviews are conducted by the UH central offices, such as General Accounting (GAL) or Financial Management Office (FMO). There were no findings for Honolulu CC in 2015-17 management letters.

UH internal audits are conducted to ensure the quality and integrity of the University's compliance with legal, regulatory and policy requirements, financial reporting and financial statements, and internal controls. Internal audits are not conducted on a regular cycle. The UH Internal Auditor performs audits of selected programs (e.g. petty cash, culinary program) and may identify internal control deficiencies.

The University may hire an external audit firm to conduct an audit of a specific department or program and may identify internal control deficiencies.

The legislative auditor may conduct an audit of a specific department, program, or fund and may identify internal control deficiencies.

Honolulu CC follows the guidelines for internal controls set by UHCC and the University. Financial responsibilities are outlined in the policies of UHCC ([III.D.9](#)) and the UH System ([III.D.27](#)).

Corrective action plans in response to audit exceptions or deficiencies in an auditor's management letter are implemented when identified during the audit or after completion of the audit. Corrective action plans identify the program, individuals responsible for implementing the plans, actions taken to ameliorate audit findings or deficiencies, actions taken to prevent reoccurrence if applicable, and the date corrective actions are taken.

For annual financial audits, corrective actions are confirmed by the auditor in the subsequent annual audit or management letter ([III.D.44](#)). There were no corrective actions for Honolulu CC.

For audits by the UH Internal Auditor or other external auditors, corrective actions may be confirmed with a review of operations or a follow-up audit by auditors, if any.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution's financial and internal control systems are evaluated and assessed for validity and effectiveness, and the results of this assessment are used for improvement. In past audits, there have been no findings or corrective actions pertaining to Honolulu CC.

III.D.9 The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management, and, when necessary, implement contingency plans to meet financial emergencies and unforeseen occurrences.

---

#### Evidence of Meeting the Standard

The College has sufficient cash flow and reserves to ensure stability, support strategies for appropriate risk management, and meet financial emergencies and unforeseen occurrences. This is reinforced by the UH System, which requires each campus to maintain adequate financial resources ([III.D.48](#)).

Financial sustainability and integrity is upheld through the maintenance of adequate reserves. A UHCC policy requires that sufficient reserve targets be met and maintained ([III.D.49](#)) and the Board of Regents stipulates a similar policy ([III.D.8](#)). Although the UH System and UHCC calculate reserves differently, in both cases, sufficient balances are maintained.

In November 2013, the University as a whole adopted a financial reserve policy to establish system-wide operating reserves from non-general fund revenue in amounts sufficient to provide continued operations for at least two months with a minimum of five percent unencumbered cash from all tuition and fee funds, special funds, and revolving funds. At June 30, 2016, 2015 and 2014, operating reserve amounted to \$261.5 million, \$234.4 million, and \$210.8 million, respectively, for the University ([III.D.47 \[p. 7\]](#)).

All community college campuses maintain sufficient cash reserves to address emergencies (5% minimum reserve) and other operating contingencies, such as temporary downturns in enrollment or significant one-time investment opportunities that support educational improvement and innovation (10% targeted reserves) ([III.D.50](#)).

Honolulu CC meets both the 5% minimum and 10% targeted reserve requirements.

The cash reserve is defined as unrestricted funds set aside to ensure the long-term financial stability of UHCC programs by providing resources to address emergency situations, unanticipated shortfalls in revenue, increases in expenditures, and other

one-time funding opportunities that help campuses meet goals for continuous improvement.

Cash Reserves are made up of a Minimum Reserve (5% of prior year expenditures) and a Target Reserve (5%-10% of prior year expenditures):

- The minimum reserves are defined as unrestricted funds set aside to address critical, one-time, unforeseen, non-discretionary items that require immediate funding. Minimum reserves may be applied to these needs only when target reserves are fully exhausted.
- Target reserves are defined as unrestricted funds set aside to address requirements that are non-recurring in nature. The target reserve cannot be used to address long-term funding requirements or financial structural deficiencies.
- If campus cash reserve balances fall below the minimum reserve level of 5%, the campus will be required to prepare a financial plan that details how the minimum reserve levels will be restored.

All UHCC campuses have consistently met and exceeded both the minimum and targeted reserve levels ([III.D.50](#)).

Approximately one-quarter of General Funds are provided by the state prior to the beginning of the fiscal year and the remaining full-year allocation is provided prior to the end of the first quarter. Tuition is collected prior to the beginning of fall and spring terms and is expended over the course of each term. Tuition revenue projections are adjusted according to actual enrollment, and budgets are adjusted accordingly. Self-sustaining, non-state funds maintain sufficient balances to accommodate working capital needs. Careful monitoring of revenues, expenditures and cash are conducted to prevent cash-flow problems.

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution has sufficient cash flow and reserves to maintain stability, support strategies for appropriate risk management. Although there has not been any need, the College is prepared with reserves to implement contingency plans to meet financial emergencies and unforeseen occurrences.

III.D.10 The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

---

#### Evidence of Meeting the Standard

The institution effectively manages all finances, including financial aid, grants, special and revolving funds, extramural funds, and capital improvement funds.

The College's Financial Aid Office oversees compliance with Federal Title IV regulations and requirements, maintaining documentation to demonstrate compliance with regulations and requirements, such as student eligibility based on need, financial aid awards that do not exceed unmet need or maximum award limits, adjustment of awards when unmet need changes or student withdraws, repayment of federal program for over-award/adjustments, reporting of awards, adjustments, withdraws to federal agency, exit interviews for students with loans, and so on. A further discussion of this compliance is in III.D.15.

Special and revolving funds finance certain aspects of campus operations; however, unlike General Funds and TFSF that support general operations, these funding sources are used to support specific program activities. Administrators, who submit business plans, budgets, and revenue projections to the Business Office, manage funds of the programs.

These program activities include non-credit instruction, summer session instruction, conferences, and student activities. The individual funds are established by statute and operate on a self-sustaining basis. In addition to covering direct costs, programs are required to generate an administrative cost fee to cover their equitable share of general campus operating expenses.

Extramural funds are project-based funds from federal, state, and private sources, which relate to research and training grants or contracts. These funds are obtained through competitive grants or contracts and are focused on specific improvements or on services provided to the contracting agency. Principal investigators take responsibility to manage the extramural funds within compliance and regulations as specified in grant documents. The University Office of Research Services (ORS) assists to facilitate stewardship of the extramural funded activities, such as for submission of proposals and acceptance of awards ([III.D.51](#)).

The budgets and expenses for extramural funds can be monitored through KFS and eThORITY reports ([III.D.51](#)). The principal investigators and fiscal staff comply with federal or state regulations and requirements, grant or contract terms and conditions, maintain documentation to demonstrate compliance with regulations and requirements, deliverables, and so on. Grant funds are managed by private investigators in compliance regulations and requirements.

For loan funds, KFS provides monitoring of the financial status, such as available funds affected by new federal capital contributions for the year, institutional matching capital contributions for the year, loan repayments, new loans, or administrative allowance charges, if there are any. The financial aid office manages loan programs to ensure compliance with regulations and requirements for various loan programs. (*See section III.D.15.*) Federal student financial aid loans (Perkins), for example, have requirements for eligibility, loan limits, institutional matching, notifying students that loans must be repaid, and exit interviews.

The College follows Board of Regents and UH policies for contractual agreements ([III.D.52](#), [III.D.53](#), [III.D.54](#), [III.D.55](#)).

As for protecting and updating the College's assets, UHCC supports all campuses by securing and allocating Capital Improvements Program (CIP) funding. The primary source of revenues for University CIP projects come from state issued general obligation bonds where debt service payments to retire the bonds are funded by the state. Individual campuses are not obligated to pay for these long-term obligations.

There are three major categories of CIP projects:

- New Construction – The construction of new facilities and major renovations of existing facilities (renovations exceeding \$5 million) are budgeted and appropriated as separate line item projects. Planning for the development of new facilities is guided by campus long-range development plans ([III.D.56](#), [III.D.57](#), [III.D.58](#), [III.D.59](#)).
- Funding for new facilities and major renovations are provided as line items in the authorizing statutes. These appropriations are limited to the scopes of work described in the authorizing statutes.
- Capital Renewal and Deferred Maintenance – Capital Renewal and Deferred Maintenance (CRDM) projects are comprised of two parts: (a) Capital Renewal and (b) reduction of Deferred Maintenance.

Capital Renewal – All buildings are comprised of different sub-systems that have predictable lifetimes. The Facilities Renewal Reinvestment Model (FRRM) identifies roofs, building exteriors, elevators and conveying systems, air conditioning, lighting, electrical equipment, plumbing, fire protection and detection systems, built-in specialties and equipment, and interior finishes. Capital Renewal requirements are sub-systems that are at the end of their useful lives and need to be replaced. In other words, the failure to implement Capital Renewal projects results in a commensurate increase to the deferred maintenance backlog. Capital renewal requirements are detailed on the Sightlines report for budget planning purposes ([III.D.60](#)).

Deferred Maintenance – Buildings with Deferred Maintenance are facilities that have failing sub-systems or sub-systems that are operating beyond their useful lifetime. The Facilities Renewal Reinvestment Model on the sightlines report guides campus evaluations of deferred maintenance needs; however, onsite evaluations conducted by the campuses on an ongoing basis ultimately identify specific deferred maintenance projects that require funding ([III.D.61](#)).

Minor CIP – The Minor CIP project category is for the modernization of learning environments to enhance the delivery of priority instructional programs. Funding priorities are placed on improving classrooms and other spaces that directly support educational improvement and innovation ([III.D.62](#)). This funding source, typically \$10 million a year, has been a major factor in campus plans to keep instructional spaces up-to-date.

Funding for CRDM and Minor CIP are provided as state-funded lump sum appropriations, which means that the community colleges can determine the specific projects that are funded through the lump sum appropriations. UHCC conducts an annual CRDM and Minor CIP budget meeting to allocate the lump sum appropriations. Each campus formulates prioritized lists of CRDM and Minor CIP projects for consideration. Projects are prioritized at the UHCC level by weighing the relative importance of each project against the needs of the seven UHCC campuses. This process ensures that the highest CRDM and Minor CIP needs are met by allowing the funds to flow to the most critical projects in the UHCC ([III.D.63](#)).

The UH Foundation is a separate entity that supports the University and follows its own fund-raising guidelines. The primary source of funds is from private donors. Programs ensure gifts and donation are utilized in accordance with any restrictions specified by donors and the UH Foundations policies. Policies, for example, do not allow funds to be used to hire employees.

The College's VCAS oversees the finances of the campus, including financial aid, grants, donations, contracts, and capital improvement projects. In addition, principals are assigned to manage financial aid, grants, and donations with integrity.

### Analysis and Evaluation

Honolulu CC meets this standard. The institution practices effective oversight of finances, including management of financial aid, grants, externally funded programs, contractual relationships, auxiliary organizations or foundations, and institutional investments and assets.

III.D.11 The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.

---

### Evidence of Meeting the Standard

The College considers both short-term and long-range financial priorities to assure financial stability and solvency, working closely with UHCC and the UH System. The UHCC assists the community colleges to formulate yearly campus financial plans. The College identifies, plans, and allocates resources for payment of liabilities and future obligations.

The community colleges have long-term debt instruments (revenue bonds) for various energy conservation and alternative energy projects on each campus (except for Hawai'i CC). Bond funds are used for purchase, and installation of new or replacement fixtures and equipment, which consume less energy or generate electricity resulting in lower utilities cost for campuses.

Debt service is paid centrally by the Community Colleges Systemwide Support (CCSWS) unit with annual reimbursement from campuses based on energy savings for each campus. Funds are allocated for the debt service reimbursement annually as part of the budget planning and execution process for each campus. The percentage of the operating budget used for debt service reimbursement for Honolulu CC is based on

operating budgets of prior years, which amounted to 1.112% for 2017 and 1.196% for 2016.

University policies and procedures require that the funds be used in accordance with state and federal requirements, the mission and goals of the University, and the purpose of the funding source ([III.D.26](#)).

These long-term obligations are considered before programming budgets for discretionary items in the annual financial plans of the campus. These non-discretionary obligations are considered and are reflected as line items in the campus financial plans ([III.D.1](#), [III.D.11](#), [III.D.12](#)). The plans demonstrate that the campus is financially solvent, and identify, plan, and allocate resources for payment of liability and future obligations in the short-term and the long-term.

Long-term debt in the form of debt service on revenue bonds held by the community colleges to finance new construction and facility improvements is considered for both short-term and long term financial planning ([III.D.64](#), [III.D.79](#)). The community colleges, including Honolulu CC, identify, plan, and allocate resources for payment of liabilities and future obligations.

The community colleges do not issue debt for Other Post-Employment Benefits (OPEB) (which is funded by the state), insurance costs (which is an operating budget item), or repairs and maintenance projects (which is funded by the state). The items currently financed with long-term debt (listed in [III.D.14](#)) are limited to projects that directly create cost savings that offset debt service costs.

### Analysis and Evaluation

Honolulu CC meets this standard. The level of financial resources provides a reasonable expectation of both short-term and long-term financial solvency. When making short-range financial plans, the institution considers its long-range financial priorities to assure financial stability. The institution clearly identifies, plans, and allocates resources for payment of liabilities and future obligations.

[III.D.12](#) The institution plans for and allocates appropriate resources for the payment of liabilities and future obligations, including Other Post-Employment Benefits (OPEB), compensated absences, and other employee related obligations. The actuarial plan to

determine Other Post-Employment Benefits (OPEB) is current and prepared as required by appropriate accounting standards.

---

### Evidence of Meeting the Standard

The employers' share of Other Post-Employment Benefits (OPEB) obligations for general funded positions is centrally paid for by the state's general fund for all state agencies. As such, employer OPEB obligations for general funded positions are not part of the University of Hawai'i operating budget.

The University is, however, obligated to cover the OPEB requirements for the relatively small number of non-general-funded positions employed by the University. The University's contributions are calculated as part of the state's total contribution requirements and are reimbursed to the state's General Fund as part of the fringe benefit rate on the University employees' actual salaries.

The University's annual OPEB cost for non-general funded employees is calculated based on the annual required contribution of the employer Annual Required Contribution (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and to amortize any unfunded actuarial liabilities over a period not to exceed 30 years. The employers' OPEB obligations for non-general funded positions are fully recognized and accounted for in UHCC non-general fund financial plans. Payroll costs in non-general fund financial plans include salary and fringe benefit costs.

Long-term debt in the form of debt service on revenue bonds held by the community colleges to finance new construction and facility improvements is considered for both short-term and long-term financial planning ([III.D.62](#)). The community colleges, including Honolulu CC, identify, plan, and allocate resources for payment of liabilities and future obligations.

### Analysis and Evaluation

Honolulu CC meets this standard. OPEB obligations for general funded positions are managed by the State of Hawai'i. For a small number of non-general funded positions, the University reimburses the state annually as part of a fringe benefit rate.

III.D.13 On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

---

#### Evidence of Meeting the Standard

In the annual budget development, the College identifies and assesses short-term and long-term financial obligations and allocates resources to meet debt agreements. As noted in III.D.12, the College works with UHCC when formulating annual financial plans for the campus. The planning ensures resources are allocated for repayment of debt that might affect the financial condition of the institution. Long-term debt in the form of debt service on revenue bonds held by the community colleges to finance new construction and facility improvements is considered for both short-term and long-term financial planning (III.D.62). The community colleges, including Honolulu CC, identify, plan, and allocate resources for payment of liabilities and further obligations. The multi-year projection demonstrates that the campus is financially solvent and can meet future obligations.

#### Analysis and Evaluation

Honolulu CC meets this standard. On an annual basis, the institution assesses and allocates resources for the repayment of any locally incurred debt instruments that can affect the financial condition of the institution.

III.D.14 All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

---

#### Evidence of Meeting the Standard

The College follows policies of the Board of Regents and the UH System in using financial resources for the intended purposes of the funding sources.

It is the Board of Regents' intent that the University's policy, practices, and decision-making regarding real property and interests in real estate, shall: (1) promote and support the mission and goals of the University in education, research, service, and economic development; (2) advance principles and practices of sound environmental stewardship and sustainability; (3) ensure that alternative actions are considered, investigated and analyzed; (4) be fairly priced in the context of applicable fair market values and other relevant factors; (5) generate revenue from real property not critical to long range plans for the University to support the University's core mission; and (6) be consistent with and support long-range plans that have been approved by the BOR ([III.D.65](#)).

For bond servicing, the UH System policy states that the University Bond System (UBS) office shall: (1) provide managerial oversight to ensure compliance with federal and state requirements; (2) coordinate bond principal and interest payments, annual audits, and financial management reporting; (3) coordinate and implement the reallocation of resources between UBS projects, as approved by the University President or designee; (4) manage cash flows; (5) coordinate and facilitate communication among UBS Projects; (6) coordinate post issuance compliance efforts; and (7) monitor reserve levels ([III.D.66](#)).

Auxiliary Activities are self-supporting activities that provide non-instructional goods or services funded by a user charge or fee. Auxiliary Activities include those operations such as a bookstore, food services, and parking, which are conducted for the benefit of students, faculty, and staff. The bookstore operations are administered by the UH Mānoa Bookstore unit rather than Honolulu CC. Other Auxiliary Activities are reviewed annually to ensure activities are not operating in deficit or accumulating excess cash or profits.

Since FY2016, the campus has prepared business plans, budgets, and procedures for each revenue-generating program. The responsible authorities and the Fiscal Administrator meet with the VCAS each year to discuss business plans, which are maintained by the Business Office.

The UHCC Budget, Planning and Finance team coordinates and manages the multi-million dollar Operating Budget and Capital Improvement Program (CIP) of the community colleges by working closely with the campuses in the budget development/legislative process and the budget execution process.

UHCC also supports the financial planning and fiscal processing requirements of all Community College Systemwide Support (CCSWS) units as well as the CIP fiscal processing requirements of all community college campuses.

The UHCC debt was \$45.752 million for 2016 and \$47.002 million in 2015, but includes that of all the community colleges, not Honolulu CC alone. The reimbursement of energy conservation and alternative energy debt service payment from campuses to CCSWS is made one year in arrears. The percentage of the operating budget used for the 2016 debt service reimburse for Honolulu CC is 1.2%.

University policies and procedures, as noted above, require that the funds be used in accordance with state and federal requirements and the purpose of the funding source ([III.D.27](#)). University policies and procedures govern acceptance of gifts and fundraising activities and provide guidelines to ensure funds are properly expended in compliance with donor restrictions and the usual and common business and regulatory practices ([III.D.67](#), [III.D.68](#)).

Fund-raising procedures are in place to ensure integrity of the funding, including strict compliance of who is able to raise funds in the institution's name. All fund-raising is overseen by the Vice President for Budget and Finance ([III.D.69](#), [III.D.70](#), [III.D.71](#)).

As noted previously, the UH Foundation is a separate entity that supports the University and follows its own fund-raising guidelines. The primary source of funds is from private donors. Grant funds are managed at the campus level by private investigators.

### Analysis and Evaluation

Honolulu CC meets this standard. All financial resources, including short- and long-term debt instruments (such as bonds and Certificates of Participation), auxiliary activities, fund-raising efforts, and grants, are used with integrity in a manner consistent with the intended purpose of the funding source.

[III.D.15](#). The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act, and comes into compliance when the federal government identifies deficiencies.

---

### Evidence of Meeting the Standard

The Financial Aid Office monitors and manages student loans so that the College is in compliance with federal requirements. The College follows the policies of Title IV of the Higher Education Act ([I.A.1 \[pp. 60-62\]](#)).

Honolulu CC is an institutional member of the National Association for Student Financial Aid Administrators (NASFAA) and the three employees in the office receive daily newsletters to keep abreast of change in regulations, upcoming deadlines, and updates about NASFAA's efforts to advocate for aid administrators. All staff have access to the Federal Student Aid Resource web page ([ifap.ed.gov](http://ifap.ed.gov)) to review regulations and attend various state and regional association training.

The Financial Aid Officer is responsible to ensure that changes to procedures and institutional policies are made in a timely manner to maintain compliance. Also, the Financial Aid Office goes through a Federal A-133 Compliance Audit every other year to ensure that Title IV aid is being administered in accordance to Federal Regulations. Should the campus have a finding, the campus would be audited the following year for that compliance issue to ensure that the campus has corrected its procedures and policy. The Honolulu CC Financial Aid Office's last Federal A-133 Audit was completed for the 2015-2016 award year and no audit findings were noted.

Honolulu CC is also responsible for submitting a Program Participation Agreement (PPA) Application every 3-5 years to the U.S. Department of Education to receive approval to administer Title IV aid. Honolulu CC's current Program Participation Agreement is expected to expire on March 31, 2017 and the campus submitted an application to renew the PPA on December 21, 2016.

The default rates are well within federal guidelines ([III.D.72](#), [III.D.73](#), [III.D.74](#)).

Honolulu CC is not required to have an official Default Prevention Plan since the campus' Cohort Default Rate has not been close to 30%; however, if students ask for additional student loans beyond what was originally offered or declined their loans and then decide that they would like to borrow with a student loan, the campus requires students to complete a Loan Request Form and to itemize the expenses and amounts. If students are requesting loan funds for expenses that are not part of their financial aid cost of attendance (tuition, books, supplies, average living cost, and transportation costs), the student must provide documentation (e.g. child care agreement to assist them with child care costs) before the loan is processed. If the student requests funds for expenses that are not allowable (e.g. purchase a car), the loan request is not approved ([III.D.75](#)).

Student loan default rates, revenues, and related matters are monitored and evaluated for compliance with federal regulations. The Financial Aid Officer whose program responsibility is student loans and the Financial Aid Manager reviews the Draft Cohort Default Rate that is provided in February of each year and the Official Cohort Default Rate, as well as reviewing the reports that the campus receives from the Federal Loan Servicers. These reviews are in regard to managing revenue streams and assets to ensure compliance with federal requirements.

The Financial Aid Manager works with the Fiscal Administrator to ensure that the mandatory institutional capital contribution (ICC or institutional matching share of 33-1/3% of federal capital contribution) for any new federal capital contribution (FCC or Federal Perkins Loan Program funds provided to a school for an award year from the federal government) is deposited into the Perkins loan fund at the same time as the FCC. The Financial Aid Manager ensures that the amount and timing of the ICC transfer to the Perkins loan fund is correct to comply with Title IV regulations.

The Financial Aid Manager also manages need-based and non-need-based financial aid awards to students from institutional funds. A minimum of 8.8 percent of the College's tuition revenues is dedicated to need-based financial aid ([III.D.8o](#)). As part of the College's annual budget, additional tuition revenues are dedicated to other financial aid programs that serve need and non-need students. In total, as much as 16 percent of the College's FY 2018 tuition revenue will be dedicated to student financial assistant programs. The Financial Aid Manager considers student resources and financial aid awards from multiple sources in determining the amount of need-based federal financial aid grants, work study, or loan amounts that students are eligible for in compliance with federal financial aid regulations.

#### Analysis and Evaluation

Honolulu CC meets this standard. The institution monitors and manages student loan default rates, revenue streams, and assets to ensure compliance with federal requirements, including Title IV of the Higher Education Act. The institution also complies when the federal government identifies deficiencies.

[III.D.16. Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate](#)

provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.

---

### Evidence of Meeting the Standard

The College's contractual agreements follow the guidelines of Board of Regents and UH System policies. The policies cover purchase of goods and services, extramurally funded grants, and contracts. Contracts over \$25,000 are reviewed by the UH System Procurement Office, which ensures they conform to requirements and procedures ([III.D.53](#), [III.D.54](#), [IIID.52](#)).

The UH campuses have various contractual agreements for procurement of goods or services, affiliation agreements, sponsored class or sheltered class contracts with external agencies, and extramural contract agreements to perform training or other activities for sponsoring agencies. Campuses may also enter into contracts for construction projects, consulting services, or settlement agreements for claims against the University.

The extramural contract and grant ethics and procedures are governed by a number of policies including those of the Board of Regents ([III.D.76](#)). Other policies are described below.

Extramural funds are audited annually as part of the consolidated financial statement audit and compliance audit. Extramural funding agencies may perform program or financial audits of grants or contracts at any time during or after the funding period for any reason, including normal programmatic or financial monitoring or in the event of suspected fraud or criminal activity.

Board policy dictates that the privilege to serve as principal investigator is on the condition that the proposed program or activity is desirable and compatible with the mission of the respective academic unit ([III.D.77](#)).

UH System policy ensures that administrative and financial management requirements for extramural contracts and grants are understood and complied with by all appropriate UH personnel. Special emphasis is placed on full compliance with applicable federal requirements, which is mandatory ([III.D.78](#)).

University policies and procedures govern acceptance of contracts and provide guidelines to ensure all fiscal resources are expended in accordance with the goals,

objectives and mission of the University and in compliance with federal and state laws and regulations, University policies and procedures, sponsor terms and conditions of the contract, and common business and regulatory practices.

The Office of the Vice President for Community Colleges (OVPCC) also conducts post-audit reviews of affiliation agreements and sponsored or sheltered class agreements to ensure agreements comply with University policies and procedures and reasonable risk tolerance, and reviews Affiliation Agreement Reports and Sponsored/Sheltered Class Reports to determine if the affiliation agreements and sponsored or sheltered class memorandum of agreements are consistent with the academic and instructional direction of the community colleges for mission and goals.

### Analysis and Evaluation

Honolulu CC meets this standard. Contractual agreements with external entities are consistent with the mission and goals of the institution, governed by institutional policies, and contain appropriate provisions to maintain the integrity of the institution and the quality of its programs, services, and operations.

## **Standard IV: Leadership and Governance**

The institution recognizes and uses the contributions of leadership throughout the organization to promote student success, sustain academic quality, integrity, and fiscal stability, and continue improvement of the institution. Governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness, while acknowledging the designated responsibilities of the governing board and the chief executive officer. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. In multi-college districts or systems, the roles within the district/system are clearly delineated. The multi-college district or system has policies for allocation of resources to adequately support and sustain the colleges.

### **Standard IV.A: Decision-Making Roles and Processes**

IV.A.1 Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff and students, no matter what their official titles, by taking initiative for improving the practices, programs, and services in which they are involved. When ideas for improvement have policy or significant institutional-wide implications, institutional leaders enact systematic participative processes to assure effective planning and implementation.

---

#### Evidence of Meeting the Standard

College leadership promotes inclusive and collaborative campus processes to encourage creativity and innovation, and provides support for ideas to enhance institutional excellence. Campus culture is based on adherence to the institution's mission and core values, which emphasize an engaging learning environment that values and promotes academic excellence and the personal growth of instructors and students (IV.A.1).

The College's Educational and Strategic Plan emphasizes maintaining excellence through ongoing institutional improvement and ensuring currency in campus programs (IV.A.2). *Hawai'i Papa O Ke Ao* is a system plan to enable UH institutions better meet the needs of indigenous students through leadership development, community engagement, and improving Hawaiian language and cultural parity. Meeting these goals

is another measure of institutional excellence, reflecting the institution's commitment to all campus stakeholders (IV.A.3).

Under the guidance of the Chancellor, the College is recognized as a leader in meeting performance goals, pioneering Star Registration, redesigning developmental education, implementing Student Pathways, among other initiatives improving student success and student achievement. All these efforts were achieved through leadership at many levels within the institution.

The Chancellor along with the administration team cultivates participation by listening to the voices of faculty, staff, and students in improving the practices, programs and services of the institution. The College also encourages involvement in policy changes and new initiatives by actively informing the campus and providing venues for collaborative decision-making.

Through collaborative campus efforts, the College exceeds all UHCC performance initiatives for achieving student success (I.B.25). Honolulu CC is one of the two community colleges meeting all the targets, and in all cases more than doubled or tripled the outcomes. This performance illustrates the cooperation of faculty, staff, and administrators in improving student achievement for the institution.

One of the guiding documents is the institution's Educational & Strategic Plan 2016-2021 (I.A.3) that was developed through a campus effort. The plan encompasses five goals that include (1) student success, (2) enrollment, (3) training and workforce development, (4) campus community, and (5) infrastructure, sustainability and technology.

The development of the plan initially began with a town hall meeting for inclusive campus participation, convened by the Chancellor (IV.A.4). For each of these goals, the campus members present provided suggestions as to how the College might accomplish them (IV.A.5, IV.A.6). The plan highlights the participation and leadership of the campus in promoting innovation leading to institutional excellence (IV.A.7).

The revision of the mission also exemplifies the institution's collaborative approach to decision-making. Once the Planning Council revised the outdated mission statement and core values, they were passed to the Faculty Senate Executive Committee (FSEC), Staff Senate Executive Committee (SSEC), Kupu Ka Wai Council, and Student Government for review and suggestions. The five committees represent all stakeholders of the campus. The revised mission was approved in January 2017 (I.C.1, IV.A.8).

The mission and the strategic plan lay the framework to encourage innovation, identifying the goals and areas of improvement that can enhance the effectiveness of the institution. The institution's planning processes and performance reviews are discussed in a variety of campus forums. The Planning Council, which advises administration, reviews the mission, strategic plan, institutional set standards, institutional learning outcomes, accreditation process, program supplementary funding process, among other things that lead to innovation. The council includes the Chancellor, other administrators, division chairs, department heads, student government, and other campus representatives.

The College carries out ongoing revision and creation of new program curriculum to prepare students to be global citizens who can meet 21<sup>st</sup> century workforce needs and realize individual professional goals. Annual and 5-year program review results and other gathered evidence enable campus leaders to identify areas for program improvements. (IV.A.9, IV.A.10).

Campus achievements result from participatory decision making structures, which promote individual and departmental innovations. In addition to governance bodies, other committees provide venues for faculty, staff and administrators to propose and pursue innovative changes (IV.A.11).

The College participates in UH system initiatives implementing technological and structural responses to improve student retention and success including: Star GPS system, iPASS Mobile-optimized MyUH Services for students/faculty/staff (IV.A.12 [p. 10]). Honolulu CC faculty, staff, and administrators participate in UHCC initiatives as representatives reporting to appropriate campus committees (IV.A.13 [p. 2]). Several Honolulu CC representatives serve on the UHCC Student Success Council to implement changes in developmental education, including student placement policies, enrollment management, and other initiatives (IV.A.14). Other examples of campus participation in system discussions include reevaluation of teaching equivalencies (IV.A.15) and a proposed new course evaluation system (IV.A.16).

When necessary, the Chancellor and other campus leaders form groups to respond to campus needs such as improving graduation outcomes in STEM fields. In this case, the Chancellor established an ad hoc group to brainstorm ideas on how to support students in the STEM fields (IV.A.17). The College now meets those strategic measures, and the STEM Working Group is currently identifying how a physical STEM space can support cross-major learning and how the institution can support multiple STEM grants.

The institution promotes innovation through the supplemental program funding process. Programs can request funds for improvements and upgrading, then the governance committees rank the proposals, involving input from the entire campus.

In support of continuous improvement and innovation, the Faculty Development Committee organizes professional improvement events and distributes monetary awards for professional development opportunities (IV.A.18). The Staff Development Council funds development and improvement activities for staff members (IV.A.19). The College administration provides much of the fiscal support for these professional development opportunities). Direction of internal funding and grant awards is also used to support campus innovations (IV.A.20).

Students are involved in institutional innovation through representatives on campus committees and regular meetings with the Chancellor. The director of Student Life Development communicates with student leaders on the Student Activities Board, Student Media Board, and RISOs on topics directly impacting students (IV.A.21). Student leaders have a voice in directing funds for projects that benefit student life, such as a digital sign project to enhance the visibility of student government and improve communication with constituents.

The college administration informs Honolulu CC faculty, staff, and stakeholders of institutional achievements as an integral part of promoting a culture of innovation. College achievements are publicized to foster continued community partnerships and support. Methods of sharing campus innovations and initiatives include:

- Annual Reports: Annual issues provide information on college planning priorities, program initiatives, campus performance measures, as well as program and student success stories (IV.A.12).
- Semi-annual General College Meetings: At the start of each semester, the administration updates the campus community regarding achievements as well as challenges and opportunities for the coming year. PowerPoint presentations from these meetings are sent out to the campus and archived on the intranet (IV.A.22).
- Chancellor's Messages: The Chancellor sends out periodic email announcements to the entire campus (including student leaders) with information about current initiatives, goals, and priorities (IV.A.23).
- Talk Story Hours: The Chancellor holds regularly scheduled monthly talk story hours, where updates are provided on community initiatives, legislative issues, donors and other topics. The meeting allows ample time for questions' and

answers, and ad hoc topic discussions faculty and staff may have questions about (IV.A.24).

- Town Hall meetings: The Chancellor or administrative representative facilitates open town hall meetings when broad based campus discussions are needed. Examples of these would include activities around particular grants, such as the current iPASS and Native Hawaiian Serving Institutions grant (Title IV). Other examples have been campus wide discussion on campus reorganization, sustainability and planning for accreditation documentation and report writing (IV.A.25).

For a sample list of campus achievements, see (IV.A.26).

### Analysis and Evaluation

Honolulu CC meets this standard. The institution has formal and informal practices and procedures, which encourage input from all campus personnel to improve the College, leading to effective planning for and implementation of program and institutional improvement. Honolulu CC leadership, institutional structures, and campus culture support innovation and continuous improvement in academic programs, support for students, campus outreach, and community connections and partnerships. Campus committees' review, implementation, and evaluation processes include Honolulu CC faculty, staff, students and administrators. Honolulu CC's continuous enhancement ~~in~~ of academic programs, student learning opportunities, and the demonstrated achievements of campus staff and students all reflect a commitment to institutional excellence. The College prides itself on its strong links to community, state, and national organizations reflected in strong scholarship support and active student engagement and success.

IV.A.2 The institution establishes and implements policy and procedures authorizing administrator, faculty, and staff participation in decision-making processes. The policy makes provisions for student participation and consideration of student views in those matters in which students have a direct and reasonable interest. Policy specifies the manner in which individuals bring forward ideas and work together on appropriate policy, planning, and special purpose committees.

### Evidence of Meeting the Standard

The College has established policies and procedure authorizing administrators, faculty, and staff participation in decision-making processes. Honolulu Community College policy HCCP # 1.101 Participation in College Decision-Making Processes stipulates that “faculty, staff, and students have the opportunity to participate in the collegial governance of the college through formally established and recognized bodies, and that the established decision-making structures and processes are regularly evaluated to assure their integrity and effectiveness for the purpose of improvement” (IV.A.27). The College promotes campus involvement of administrators, faculty, staff, and students based on HCCP # 4.101 on integrated planning, resource allocation, and assessment of the institution (IV.A.28). These policies are based on policies of the UH Board of Regents, UH System, and UHCC that have been established for integrated and strategic planning and review of established programs UH system and campus policies also make explicit the established role of faculty, staff and students in decision-making related to academic planning and to academic policies and curricular matters development (IV.A.29, IV.A.30, IV.A.31, IV.A.32).

#### *Faculty Senate Executive Committee*

For faculty specifically, the College follows Board of Regents policy # 1.210 (IV.A.30 [III.B.1]), establishing faculty involvement in academic decision-making and academic policy development. Faculty have a specific voice in decision-making through the Faculty Senate Executive Committee (FSEC) which meets each month through the academic year. Policies make clear the role of faculty in advising administration and participating in collegial governance. The faculty also play a role in policy development and decisions related to curriculum and instructional matters.

UHCC policy # 1.102 outlines the role of faculty governance body in advising administration on matters relating to the development and maintenance of academic policy and standards. This policy establishes an All Campus Council of Faculty Senate Chairs to advise the Vice President for Community Colleges (IV.A.31).

Honolulu CC policies HCCP # 1.101 Participation in College Decision-Making Processes (IV.A.27) and HCCP # 4.101-1 Integrated Planning, Resource Allocation, and Assessment (IV.A.28) explicitly identifies the role of faculty in advising administration and participating in collegiate governance.

The FSEC Constitution and Charter identifies responsibilities of this committee and establishes the inclusive representation of faculty from all sectors of the campus. These documents also defines the scope of authority and procedures by which review, discussion, and approval of policies takes place (IV.A.33).

#### *Staff Senate Executive Committee*

HCCP # 1.101 Policy Participation in College Decision-Making Processes (IV.A.27) mandates inclusion of staff representation as a part of College governance processes. Staff representatives on the Staff Senate Executive Committee (SSEC) participate in review of campus policies as well as budget and planning decisions (IV.A.34 [I]). The SSEC Charter and Bylaws outline representation and processes by which this body deliberates. Given challenges for some staff to be released from duties, the Chancellor issued a memo asserting the need for supervisors and peers to support staff participation in the SSEC (IV.A.35).

#### *The Planning Council*

The Planning Council (PC) has responsibility for coordination of planning and budgeting decisions on campus. It is made up of faculty, staff, administrator and student representatives from across the campus. HCCP # 4.101 on Integrated Planning, Resource Allocation, and Assessment (IV.A.28 [4]) establishes the authority of the PC as the campus strategic planning body. The PC Charter makes explicit its role in formulating recommendations in conjunction with other governing committees. The PC is tasked with overseeing and coordinating communication between key governance committees and submits recommendations to the Chancellor for approval and implementation (IV.A.36).

#### *The Kupu Ka Wai Council*

The Kupu Ka Wai Council (KKW) is made up of faculty, student, staff and administrative representatives; its mission is to nurture and sustain Honolulu CC as an Hawaiian place of learning. UHCCP 1.104 Community College Council of Native Hawaiian Chairs sets forth the institutional role of this body (IV.A.37). The KKW Charter explicitly states its unique responsibility to provide a forum for input into campus decision making and priorities from the perspective of Native Hawaiian constituencies (IV.A.38 [Article 5.1], IV.A.39) The University of Hawai'i's Hawai'i Papa O Ke Ao Plan guides the KKW Council as it implements programs on campus to meet plan goals and outcomes

#### *Students*

HCCP # 1.101 Participation in College Decision-Making Processes expressly includes students as part of College decision making processes. Students have a clear role through participation in student government and as representatives on committees carrying out academic planning and curriculum review (IV.A.33, IV.A.34, IV.A.36, IV.A.38). The Planning Council includes one student representative from Student Government as a voting member participating in coordination of institutional planning, policy setting, strategic planning, and budget prioritization. The FSEC includes a student representative as a non-voting member, while students interested in supporting the campus as a Hawaiian place of learning can join Kupu Ka Wai.

Student Government representatives are selected through a process of applications and interviews rather than elections; the resulting leadership body is structured as a collective leadership (IV.A.40). Student leaders created a set of video to explain these changes to Honolulu CC students and formally adopted a new Constitution in April 2017 (IV.A.41, IV.A.42).

The Chancellor and the Dean of Students Services meet for discussions with student leaders to give them a voice in campus directions (IV.A.43). The Student Life and Development (SLD) director helps communicate with and solicit feedback from student leaders through the SLD, the Student Activities Board, and Student Media Board.

#### *Administrators*

Administrators serve on all faculty and staff governance bodies in an ex officio capacity, so information is shared, but voting remains the purview of faculty and staff on these representative bodies (IV.A.33, IV.A.34, IV.A.36, IV.A.38).

#### *Campus Wide Committees*

In addition to the FSEC, SSEC, Planning Council and Student Government, other campus-wide committees made up of faculty, staff, administrators and student representatives facilitate participation in decision-making, for example the Committee on Student Affairs (IV.A.44).

#### Analysis and Evaluation

Honolulu CC meets this standard. Existing policies (system and campus) and committee charters make explicit an established and substantial role in decision making for faculty, staff, and students in conjunction with administration. Policies and charters frame and ensure collaborative processes of decision-making. Minutes from governance bodies reflect the participatory process of discussion and decision-making. The College has

identified the need for and is working on formalizing committee member responsibilities through an orientation document for committee chairs and members.

[IV.A.3 Administrators and faculty, through policy and procedures, have a substantive and clearly defined role in institutional governance and exercise a substantial voice in institutional policies, planning, and budget that relate to their areas of responsibility and expertise.](#)

---

The HCCP # 1.101 identifies five campus governance bodies with clear and substantive roles in policy making, planning, and budgeting – the Faculty Senate Executive Committee (FSEC), the Staff Senate Executive Committee (SSEC), the Kupu Ka Wai Council (KKW), Student Government, and the Planning Council ([IV.A.27](#)). The institution’s policy on participation is founded on Board of Regents # RP 1.210 policy on faculty involvement in academic decision-making and policy development ([IV.A.30 \[III.B.1, III.B.3.b\]](#)) and UHCC policy # 4.101 on strategic academic planning ([IV.A.32 \[III.A\]](#)). Additional Honolulu CC and UH System policies also make explicit faculty role in institutional governance ([IV.A.45, IV.A.28, IV.A.46](#)).

Each body contributes to the institution’s decision-making process and plays a specific role. This structure ensures wide-ranging and comprehensive campus input and representative perspectives relating to institution policies.

Constitutions and/or Charters make explicit the participatory roles and responsibilities of these governance bodies. Charters and/or Constitutions outline representation, duties, and the scope of responsibilities for these bodies ([IV.A.33, IV.34 \[Statement of Purpose\], IV.A.36 \[Scope of Work\], IV.A.38 \[Articles 5- 9\], IV.A.42](#)).

The Planning Council focuses on institutional planning, policy setting, strategic planning, budget prioritization, and accreditation. The committee oversees the communication with the other four governing bodies. The Planning Council members include the Chancellor, Vice Chancellors, Deans, department heads, and faculty, staff and student representatives. Member composition provides a voice from all areas of the campus.

The council leads in developing strategic planning for the communicates with the other four committees in review of important decisions for the institution. For example, revisions of the mission statement, institutional learning outcomes, and the strategic plan were disseminated by the council to the other governance bodies for review and approval (IV.A.47).

Each year, the council oversees the supplementary program funding process, soliciting input from all governance committees, which represents all the areas of the campus – faculty, staff, students, and Hawaiian interests. Based on its charter, established procedures, and College policy (IV.A.28) the Planning Council in conjunction with the Vice Chancellor of Administrative Services (VCAS) gathers supplemental budget requests, publicizes them to the campus through email and town hall meetings, and compiles the ranking results of the four other committees. An established timeline and flow chart outline the participation of campus governance representatives in the final priority ranking and email announcements are made to the campus. Student representatives sitting on governance committees are given the opportunity to provide feedback on prioritizing budget requests. Honolulu CC’s Supplemental Program Funding Website posts budgeting process flowchart, budget request application forms, and explanations of final budget decisions for all campus members to review. This established process allows participation of the full campus in the final prioritization of rankings (IV.A.48, IV.A.49, IV.A.50, IV.A.51, IV.A.52).

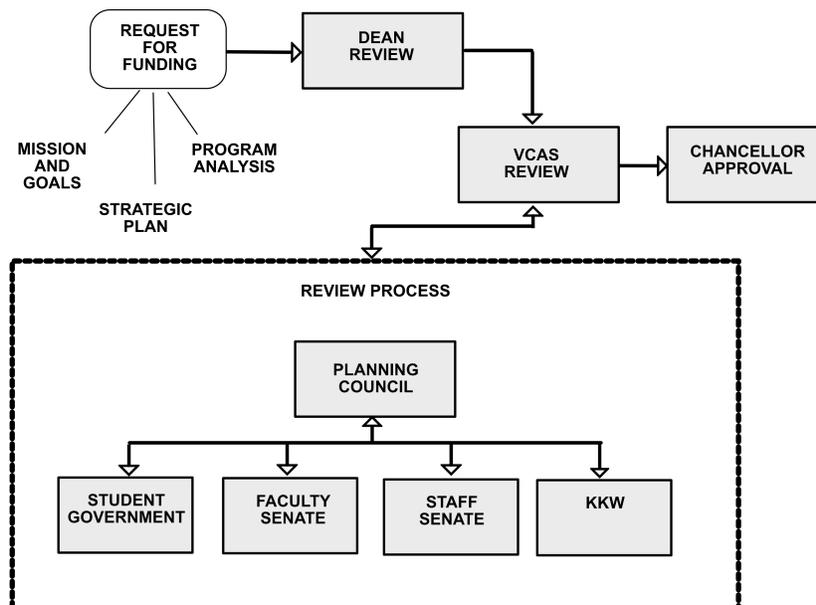

Illustration-Standard-IV.1 – Review Process

The final rankings are submitted to the Chancellor for funding decisions, who informs the campus through the Planning Council, an email to the campus, and posting on the Intranet (IV.A.53, IV.A.54).

Campus wide involvement in developing and revising the campus Strategic Plan is accomplished through campus governance bodies. The Planning Council has primary responsibility for coordinating review of the campus strategic plan by governance bodies and provides forums for campus community review and input. The plan was discussed by governance bodies and campus members participated through a town hall planning session (IV.A.5).

The campus is kept informed of planning and budgeting discussions and decisions via email, minutes, and town halls. The College publishes and archives relevant budget and strategic planning documents on its Strategic Directions and Funding intranet sites (IV.A.55, IV.A. 56).

In a campus employee survey conducted in Spring 2017, 75% of the campus agreed that faculty have a substantive role in governance (IV.A.57 [p. 88]).

### Analysis and Evaluation

Honolulu CC meets this standard. Clearly established policies and procedures ensure participation of faculty, staff, and student voices in decisions related to planning, policies, and budgeting. Committees carry out duties as participatory and representative bodies as defined in their Charters.

IV.A.4 Faculty and academic administrators, through policy and procedures, and through well-defined structures, have responsibility for recommendations about curriculum and student learning programs and services.

---

### Evidence of Meeting the Standard

The Committee on Programs and Curricula (CPC) has primary responsibility for all matters involving curriculum, course, and program approvals. This committee operates under the authority of the Faculty Senate Executive Committee (FSEC) and includes faculty, administrative, and student members (IV.A.58). CPC membership represents

faculty from all academic programs as well as the Vice Chancellor for Academic Affairs (VCAA) and deans, among others. The CPC is the final curricular and program authorizing body, making its decisions after initial reviews carried out by division sub-committees. Division Curriculum Committee (DCC) members are elected by divisional faculty and carry out division level-curriculum reviews. Division chairs also play a critical role in curricular processes through assisting “faculty in planning and updating curriculum, courses, and programs” (IV.A.59).

In addition, the General Education Boards are made up of faculty who oversee certification of courses as meeting the general education core for the Liberal Arts and Career and Technical Education programs (IV.A.60, IV.A.61). General Education Boards and sub-boards review specific foundation and diversification certifications as part of the curricular process. (IV.A.62) The General Education Boards coordinate their certifications with the CPC. The campus policy on general education (IV.A.63) stipulates that the CPC and its relevant subcommittees will establish and maintain the general education framework in consultation with faculty in all programs.

Also operating under the CPC is the Distance Education Advisory Committee, made up of faculty representatives and academic leaders. This committee reviews and certifies curriculum already approved by the CPC that is offered through distance education modalities (IV.A.64).

Honolulu CC maintains a well-established process of curriculum proposal submission, review, and approval. The roles and responsibilities of subcommittees in the review processes are outlined in the CPC Handbook (IV.A.65). Through the CPC master calendar, as well as through messages from chairs of the CPC and subcommittees, the campus is kept aware of CPC and subcommittee submission deadlines (IV.A.66).

In 2016, the CPC began migrating the curriculum process from paper to the web-based Quali CM. Although CPC and subcommittee meeting continue to take place, the electronic process makes it easier for faculty and administrators to keep abreast of curriculum actions (IV.A.67).

Curriculum Proposal Flow Charts  
EPC format Jan 2018

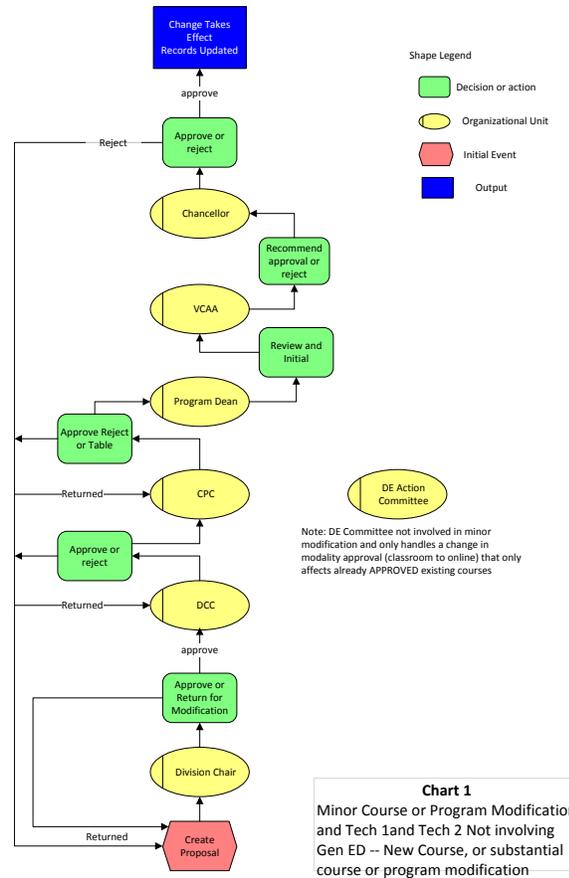

Illustration-Standard-IV.2 – Curriculum Process

To ensure equitable educational access for all students, specifically tasked committees contribute to formulation of policies and procedures impacting instruction and student services. These committees include the Committee on Student Affairs (COSA) and Committee on Disability Access (CDC) (IV.A.68, IV.A.69).

Minutes of curricular and student services committees document inclusive participation of faculty, administration, student representatives and staff in ensuring the quality of academic programs and services (IV.A.70).

Faculty involvement in academic policy is specified in UH Board of Regents policy RP 1.210, EP 1.201 and HCCP 5.213 (IV.A.30, IV.A.71, IV.A.62). Policies governing curriculum are periodically evaluated including the recent review of RP 1.210 in August

2017. Honolulu CC has established a policy requiring review of College policies at least once every five years. The CPC reviews its procedures and practices regularly.

### Analysis and Evaluation

Honolulu CC meets this standard. Policies clearly state the primary role of faculty and academic administrators in curriculum actions and decisions. Established committees and processes carry out curriculum review and approval as well as ensure the primary role of faculty in curricular decision-making. Stated procedures, flowcharts, committee charters, and minutes make evident the effective, inclusive, and timely functioning of these processes.

IV.A.5 Through its system of board and institutional governance, the institution ensures the appropriate consideration of relevant perspectives; decision-making aligned with expertise and responsibility; and timely action on institutional plans, policies, curricular change, and other key considerations.

---

### Evidence of Meeting the Standard

The spirit of collaboration is manifest in institutional shared governance. The College is committed to widespread participation of constituency groups in decision-making and planning. Decisions are made openly, inviting participation and conferring with those affected.

The campus has five key governance committees – Planning Council, Faculty Senate Executive Committee (FSEC), Staff Senate Executive Committee (SSEC), Kupu Ka Wai Council (KKW), and Student Government – which represent all campus constituencies and collaborate on policies.

Several policies and procedures frame the College’s participatory system of institutional governance, which includes relevant and diverse perspectives and ensures timely decision-making by those with expertise (IV.A.30, IV.A.31, IV.A.37, IV.A.59). HCCP # 1.101 on Participation in College Decision-Making Processes (IV.A.52) provides a framework for this collaboration. For decisions on curriculum or other academic issues, RP 1.210 outlines the role of faculty (IV.A.30).

Collaboration in decision-making extends beyond the College. The Board of Regents, UH System, and UHCC are committed to the participation of relevant constituency groups in decision-making, integrated planning, and resource allocation. The Council of Faculty Senate Chairs (IV.A.31), the UHCC Strategic Planning Council (IV.A.72), the Student Success Council (IV.A.73) and the Council of Native Hawaiian Chairs (IV.A.37) keep the community colleges involved in UHCC decisions that affect them.

Elected members of the Faculty Senate Executive Committee (FSEC) act as the representative body of the Faculty Senate; the FSEC “is the formal voice of the faculty. It is responsible for developing and maintaining campus academic policy and providing a means for improved communication among the faculty, administration, students, and community. While it serves in an advisory capacity to the administration, its vigilance over campus affairs is integral to the provision, preservation, and improvement of quality education at the college” (IV.A.74). The FSEC consists of voting faculty members from each College academic division, academic support, and student service departments. The charter also includes an elected lecturer representative, a non-voting SSEC liaison, a student government and an administrative representative. FSEC members are responsible for informing constituents of debated issues, and for soliciting and representing their feedback. Minutes of all meetings are kept on the intranet (IV.A.33).

The SSEC “... functions in an advisory capacity to the HCC Chancellor and administration with the express goal of promoting the general welfare of the College through advocacy and inclusion of staff perspectives” (IV.A.34). The SSEC is made up of representatives of APT and Civil Service staff members from contractual based units on campus. The SSEC posts and publicizes its minutes on the Intranet.

The Kupu Ka Wai Council “... serves as a source and conduit for information to the administration and the University community on issues that have particular relevance for Ka Pae `Āina o Hawai`i and Native Hawaiians” (IV.A.38). Membership consists of faculty, staff, administrators, and students committed to promoting inclusion of Native Hawaiian perspectives and Native Hawaiian concerns in College decision-making.

The Planning Council in “support of the campus mission, is to serve as Honolulu Community College’s major mid-to-long-term planning committee. The PC also serves as a primary communication point that links the planning functions of existing College governance bodies” (IV.A.36). Representatives from governance committees, Deans and Division Chairs, the Accreditation Liaison Officer, and Assessment Coordinator serve on this committee. They have as primary duties to maintain inclusive dialog and to represent respective constituents in discussions and decisions related to College

planning and budgeting. The Planning Council includes chairs from the FSEC, SSEC, KKW, and Student Government who relay information from the PC to their respective constituents, and share their respective committees' perspectives with the PC.

Members of Student Government and other Chartered Student Organizations represent student interests and provides input in campus decision-making through the Student Media Board and Student Activities Board (IV.A.42). In addition, Charters of all major decision making committees expressly include a student representative who takes back important documents for review and feedback.

Honolulu CC's Student Life and Development office recruits, trains, and supports student representatives for Student Government (ASUH-HCC). Student representatives serve on several committees including the Faculty Senate Executive Committee (FSEC), Staff Senate Executive Committee (SSEC), Planning Council (PC), and Kupu Ka Wai Council (KKW).

The governance structure provides campus members representational input into discussions related to institutional improvements including strategic planning. Planning documents, annual reports, program funding prioritization processes, and other communication is available on the Intranet to ensure the campus is informed.

In addition to governance bodies, the FSEC and the SSEC authorize sub-committees to foster more extensive faculty and staff involvement in discussions and decision-making. One example is the Committee on Programs and Curricula (CPC), which, as its name suggests, ensures the integrity and relevance of curricular and program offerings (IV.A.58).

To further broaden opportunities for inclusive discussion of issues impacting all college constituents, administration creates a number of campus-wide committees (IV.A.75). Broad-based campus representation provides diverse perspectives in discussions, decisions, policies, and campus directions. Two examples of administrative committees include the Campus Council on Institutional Effectiveness (CCIE) (IV.A.76) and the Administrative Services Group (ASG), a group that discusses operational topics such as parking, facilities use, fiscal issues, safety and security, marketing, information technology, and other campus resource topics (IV.A.77).

Examples of student-centered improvements from this inclusive process include improvements to developmental education programs (ENG 100/100S, ENG 100/100T and Math accelerated courses) and the recent Ho'ala Hou grant– Renewing a Pathway to Student Success Through Culture-Based Learning 2015 – 2020 (IV.A.12 [pp. 9]).

### *Administration*

Regularly scheduled administrative meetings of administrators and faculty leadership ensure inclusive discussion of campus issues and initiatives.

- Chancellor Retreats - The Chancellor holds single and multi-day retreats twice a year, which allow the administrative staff the opportunity to organize and plan activities for upcoming semesters and allows for executives to be assigned particular duties. Agendas are established by the entire administrative team, and results are documented and followed up on during weekly chancellor's staff meetings. When retreat items call for outside assistance, guests are invited to present and collaborate in discussions.
- Chancellor's group - Meetings of all Executive level Deans and Directors with the Chancellor and Vice Chancellors occurs on a regular basis. Guests routinely join the meeting to provide updates and take part in collaborative discussions. Weekly meeting agendas include system updates, department updates, community updates and legislative updates (IV.A.78).
- The Deans and Division Chairs group, made up of all Deans and academic units' division chairs, meets bi-monthly to discuss topics related to campus operations, campus planning, and campus initiatives (IV.A.79).

### *Timely and Inclusive Decision Making*

Governance committees meet monthly throughout the academic year. A comprehensive monthly committee meeting schedule calendar is provided to the campus at the beginning of the academic year (IV.A.80). Established timelines facilitate campus community awareness and participation in discussion and decision-making through representatives in a timely manner.

Among the timetables the campus follows are the Curriculum Process Timeline (IV.A.66), the Strategic Plan Timeline (IV.A.81), Annual Mission Review (IV.A.36) and the Supplemental Program Funding Timeline (IV.A.82).

In a Spring 2017 survey of College employees, 83% of those surveyed agreed they have the opportunity to work collaboratively on campus wide issues (IV.A.83 [p. 90]).

### Analysis and Evaluation

Honolulu CC meets this standard. Policy based systemic governance structures and processes ensure involvement in decision-making by representatives from all stakeholders on campus (faculty, staff, students, administrators, and Native Hawaiian

programs). The College committee structure provides for inclusion of diverse perspectives that set institutional priorities and foster timely actions. Processes are in place for faculty, staff, and students to receive information necessary for their informed participation in discussions on meeting institutional goals. Established timelines ensure efficacious decision-making. Campus members, through direct participation or communication with representatives on faculty, staff, and administration authorized committees, have the means to provide input based on specific responsibilities and expertise, and to learn about and provide input regarding campus strategic planning, budgeting, and issues pertinent to the campus.

#### IV.A.6 The processes for decision-making and the resulting decisions are documented and widely communicated across the institution.

---

##### Evidence of Meeting the Standard

All policies of the College are provided to appropriate campus governance committees or other pertinent groups for review prior to becoming final. The Policy on Policies guides the review of each campus policy at least once every five years. The policy ensures that all policies remain current and effective for the institution (IV.A.84). Two policies outline the expectations of committees to be involved in the decisions of the institution, one address the role of participation (IV.A.27) and the other the role for integrated planning (IV.A.28). All policies are posted on the website (IV.A.85) for campus reference.

Committees communicate with members through agendas prior to meetings and minutes after meetings to provide opportunities for members to confer with constituents. The five governance committees represent the full campus providing a voice for faculty, staff, students, administrators, and Hawaiian cultural interests to develop comprehensive collaboration.

Committee minutes are posted on the Intranet for the campus to view. These minutes document the actions and decisions made (IV.A.70). Committees additionally share end-of-the-year reports summarizing major actions taken through the academic year (IV.A.86). Charters are posted on the College Intranet.

FSEC representatives email agendas prior to meetings to enable constituents to contact committee representatives with input (IV.A.87). Prior to some discussions, FSEC Campus Chairs send messages to inform the campus community and facilitate constituent communication with representatives.

The FSEC System Chair keeps the campus informed of ongoing discussions at the UHCC system level, solicits input on discussions directly from the campus, and sends updates of decisions through email announcements (IV.A.88). System Chair reports to the FSEC are part of publicized Committee minutes (IV.A.89) and are summarized in the FSEC end of year report (IV.A.90).

The Committee on Programs and Curriculum publishes a timeline to identify when decisions are made on curriculum proposals. The CPC Chair sends out periodic messages to inform the campus of pending discussions and deadlines (IV.A.91). CPC minutes are posted on the campus intranet site (IV.A.70).

The Planning Council and administration inform the campus of processes and deadlines for supplemental budget allocation requests and prioritization, strategic planning as well as Mission Statement review and revision. Campus members are kept informed of committee processes through emails, committee minutes, and materials posted on the College Intranet (IV.A.92). Campus constituents are engaged in the process through representatives. The Chancellor's final decisions, based on budget availability, are sent to the PC Chair, archived on the intranet, and sent out to the campus through email. (IV.A.54).

Additional methods of informing the campus of decisions and the bases of those decisions include:

- General College Meetings. At the start of every semester, the Chancellor leads a required campus meeting where administration provides updates on personnel (new hires, promotions, retirements), and important system initiatives. This review includes an overview of recent VPCC visits and reports on College performance measures outcomes. Other topics addressed include pending campus projects and initiatives, facilities updates, and grant updates. PowerPoints of General College presentations are emailed to the campus and posted on the intranet (IV.A.93).
- Chancellor Announcements sent via email (IV.A.94).
- Chancellor 'Talk Story' hour: Monthly coffee hours are open meetings where anyone can drop in to discuss matters with the Chancellor (IV.A.24).

- Town Hall/ Campus Meetings: Periodic campus meetings are held to inform campus members of projects and/or decisions, and to solicit feedback, clarify questions, and enable discussion on changes occurring on campus. There are a number held during duty period to inform the campus of institutional status and goals (IV.A.95).
- Periodic meetings between the Chancellor and student representatives (IV.A.96).
- Data reports produced by the PPIR office are available to the College community on the Intranet and new publications are announced via email (IV.A.97, IV.A.98, IV.A.99, IV.A.100).
- College wide emails from other Administrators as well as committee chairs are periodically sent announcing directions, decisions, and justifications (IV.A.101).

#### Analysis and Evaluation

Honolulu CC meets this standard. System and campus policies outline decision making participants, structures and processes. Committee Charters establish decision making processes and appropriate representation. Decisions are publicized through email announcements, posted minutes, committee reports, and campus meetings. Ensuring all committee representatives and committees adhere to established expectations and policies is an important area of improvement the College is pursuing. Additionally, the College has adopted a new system of ensuring personnel records and email listserv software are synchronized to ensure all campus members receive accurate and current information. The College is currently revising and restructuring the Intranet page to facilitate more effective sharing and archiving of information.

IV.A.7 Leadership roles and the institution's governance and decision-making policies, procedures, and processes are regularly evaluated to assure their integrity and effectiveness. The institution widely communicates the results of these evaluations and uses them as the basis for improvement.

---

#### Evidence of Meeting the Standard

Evaluation to insure the integrity and effectiveness of policies, procedures, and processes is embodied in the decision-making framework of the College. Draft policies

and initiatives are channeled regularly through the governance committees for discussion and evaluation to assure integrity and effectiveness.

Existing policies are reviewed once every five years through governance and other appropriate committees to make certain there is collaborative discussion. Members of the committees disseminate information and confer with their constituents, to provide wide campus discussion. The Policy on Policies (IV.A.84) establishes that all policies remain current and updated.

The College evaluates the effectiveness of structured governance processes and outcomes of decisions and policies for integrity and effectiveness. Results of assessment activities and resulting responses are published and available as hard copies and online through the College Intranet.

### *Planning Council*

The Planning Council carries out periodic surveys of its effectiveness (IV.A. 102). In addition, the College assesses campus success in meeting established strategic goals and campus performance outcomes as required under HCCP 4.101 Integrated Planning, Resource Allocation, and Assessment (IV.A.28 [2.d.]). These outcomes measure campus success in meeting goals established through PC processes. Reporting on College achievement of Strategic Plan performance goals are publicized via:

- Annual Reports: The College publishes online an annual report that includes College performance measure goals and outcomes (IV.A.103).
- The Vice President of the UHCC system visits the campus semi-annually to provide updates on campus performance in meeting Honolulu CC and UHCC strategic goals. His presentation is open to all on campus, and accompanying PowerPoints are shared with the campus via email and posted on the intranet. (IV.A.104).

### *FSEC*

The FSEC surveys the campus community to determine effectiveness of committee communication and outcomes. The FSEC evaluates survey results for areas of needed improvement and shares the summary reports with the campus (IV.A.105).

### *SSEC*

The SSEC carries out periodic assessment of this governing body as well as SSEC sponsored events. The most recent survey of the SSEC was carried out in Spring 2017 (IV.A.106).

### *Kupu Ka Wai Council*

Kupu Ka Wai carries out data analysis of the effectiveness of Native Hawaiian programs and initiatives (IV.A.107). In Spring 2017, the Council carried assessed the Honolulu CC community regarding the effectiveness of the Council and integration of Native Hawaiian culture as part of College functioning (IV.A.108). Results of surveys and analyses of initiatives undertaken by the Council are summarized in the end of year report (IV.A.109).

### *Student Leadership*

Student leaders surveyed active student leaders and the general student body in Fall 2015 and 2016. Survey results guided the decision to restructure student government and have helped guide other student initiatives. Periodic updates are shared with students on activities and they are given the chance to give feedback (IV.A.110). At the recent campus Ho'olaule'a event, student leaders asked students to provide direct feedback to several questions, gathering valuable feedback from hundreds of students who attended. Student leaders reported to the administration these results and intended follow up plans at a May meeting (IV.A.111).

### *Administration*

Annual assessments of administrators include 360 performance reviews and evaluation of outcomes addressed during the course of the year. These plans are then combined into a list of accomplishments completed by the entire administrative team annually.

The Chancellor meets with all governance leaders each month during the academic year.

Meetings between the Chancellor and governance body chairs are forums where discussions address needs and areas for improvement related to committee outcomes.

### *PPIR Reports*

The Office of Policy, Planning and Institutional Research (PPIR) generates reports and research briefs on campus performance measures related to student enrollments,

transfers, and retention. These are published and shared with the campus through quick facts (IV.A.98) and its annual fact book (IV.A.103).

### *Self-Study Activities*

The campus carries out periodic surveys of governance processes to inform self-study investigation and improvement responses. As part of self-study fact finding, the Standard Four committee also conducts focus groups and surveys faculty, staff and student leaders, basing questions and discussions on accreditation criteria. Discussion results were summarized and used to identify needed improvements in campus processes and functioning (IV.A.112). Results from a campus survey led to the effort to restructure the campus Intranet site as well as formalization of committee chair orientation (IV.A.113). Student leaders also identified areas for improvement based on survey results (IV.A.110).

### *Communication of Results*

In addition to General College Meetings and email announcements, the College intranet is a primary means for sharing assessment results. The College undertook a major redesign to improve the Intranet as a forum for archiving and sharing materials. Surveys are posted on the intranet under Committee website headings. PPIR reports, including Annual Reports, Quick Facts reports, and the Honolulu CC Annual Fact book, are all posted on the Intranet. The College shares performance measures with the community through Annual Reports published on the Intranet (IV.A.103).

The College recognizes the need to better ensure continuity of assessment efforts when committees undergo turnover in membership and leadership. Honolulu CC administration, with input from past members, is creating an orientation document to ensure Chairs of governance bodies carry out assessment in a timely manner.

### Analysis and Evaluation

Honolulu CC meets this standard. The College compiles and shares data from surveys and results are the bases for identifying strengths and needed improvements. Governance bodies, administrative outcomes, policies' effectiveness, and College performance outcomes are assessed and results are shared with the campus via email and posted on the Intranet. The College reports assessment results to the broader community through documents and annual reports posted on the public Internet site.

## **Standard IV.B: Chief Executive Officer**

**IV.B.1** The institutional chief executive officer (CEO) has primary responsibility for the quality of the institution. The CEO provides effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness.

---

### Evidence of Meeting the Standard

The Chancellor has primary responsibility for the quality of the institution, as delegated by the Board of Regents, UH President and the Vice President for Community Colleges (IV.B.1, IV.B.2), and plays an active role in multiple efforts demonstrating effective leadership in planning, organizing, budgeting, selecting and developing personnel, and assessing institutional effectiveness. The Chancellor also has the primary authority for financial management of the college in accordance with Executive Policy EP # 1.102 (IV.B.3). The UHCC System functional map outlines delegation of duties to the College chancellor (IV.B.4).

Campus policies HCCP # 1.101 and # 4.101 outline the Chancellor's primary role to develop, maintain, and evaluate a policy framework that integrates the planning, implementation, resource allocation, and assessment processes into an integrated well-functioning system (IV.B.5 [4]). Policies also state the Chancellor's responsibilities for ensuring faculty, staff, and student participation in governance and approving proposed and revised organizational charters, constitutions, and bylaws of organizations in a manner consistent with University policy (IV.B.6 [4]).

The Chancellor provides direct and effective leadership of the College's planning and budgeting processes as a member of the Planning Council, which is delegated with guiding planning and budgeting processes. This committee also guides the campus in Strategic Planning discussions and revisions, supplemental budgeting prioritization activities, and Mission Statement review (IV.B.7). The Chancellor is a non-voting member of the Planning Council and the committee charter makes explicit the Chancellor is the final acting authority on recommendations regarding planning and resource allocation decisions (IV.B.8).

The Chancellor also sits as a non-voting member on the Faculty Senate Executive Committee (FSEC) and Staff Senate Executive Committee (SSEC), providing reports to these bodies and participating in discussions related to system and campus policies (IV.B.9, IV.B.10). The Chancellor is invited to attend the monthly Kupu Ka Wai Council (KKW) meetings (IV.B.11) and has periodic meetings with Student Government and

student leaders (IV.B.12). The Chancellor regularly communicates institutional values, goals, institutional-set standards, and other information at the General College meetings at the beginning of each semester through email announcements (IV.B.13).

Under the Chancellor's leadership, the Human Resources office carries out personnel actions based on established procedures and in compliance with EEO and UH System requirements. The Chancellor has a direct role in selection of personnel, conducting final campus interviews, and approving all staff, faculty and administrative hires. The Chancellor also reviews and approves faculty promotions.

The Chancellor provides support for personnel development by providing significant support for the Faculty Development Committee (FDC), including release time for the FDC Chair and funding Committee-directed monetary grants which support faculty attendance at conferences and other activities (IV.B.14). The Chancellor also supports the Staff Development Council (SDC) projects by providing funds for activities and compensation time off for those who participate in leadership roles of the SSEC (IV.B.15). In Spring 2018, the Chancellor encouraged staff to participate in the UHCC Staff Development Day (IV.B.16). The Chancellor ensures ongoing professional development and improvement for administrators through retreats and support for administrative leadership to participate in national organizations (IV.B.17).

The Chancellor ensures assessment data from the Office of Planning, Policy, and Institutional Research (PPIR) is disseminated and utilized as the basis for campus discussions, reinforcing a campus culture of evidence-based decision-making. The data helps in the planning processes and resource allocations that help enhance student learning. The Chancellor or designated administrative representative sits on the Campus Council on Institutional Effectiveness (CCIE), which is responsible coordination of activities related to assessment and accreditation (IV.B.18).

Campus data and outcomes measures are shared by the Chancellor with the campus at semi-annual General College meetings and through periodic reports published in print and online for internal and public access. (IV.B.19, IV.B.20, IV.B.21, IV.B.22). The Chancellor's office, through email updates, shares all UHCC system reports on College performance measures (IV.B.23).

The Chancellor utilizes multiple means of communication to report to the campus decisions and initiatives. In a Spring 2017 campus survey, 69% felt the Chancellor effectively facilitates collegial campus communications to set institutional values, goals and directions (IV.B.24 [p. 93]).

### Analysis and Evaluation

Honolulu CC meets this standard. The Chancellor effectively provides direct leadership of the institution's programs and activities in accordance with established policies and College processes. College policies, Charter-based membership in key committees, and campus practices and procedures establish the primary role of the Chancellor in planning, budgeting, assessment, and personnel development.

IV.B.2 The CEO plans, oversees, and evaluates an administrative structure organized and staffed to reflect the institution's purposes, size, and complexity. The CEO delegates authority to administrators and others consistent with their responsibilities, as appropriate.

---

#### Evidence of Meeting the Standard

The Chancellor plans, oversees, and evaluates the administrative structure, using appropriate staff to manage the institution's purpose, size, and complexity. The Chancellor delegates authority to administrators and others consistent with responsibilities. The Chancellor delegates authority over academic and institutional functions to the Vice Chancellor of Academic Affairs (VCAA) and the administrative and finance functions to the Vice Chancellor of Administrative Services (VCAS). The VCAA has authority over all deans of instructional programs, student services, and academic support services. Information Technology Services is also under the authority of the VCAA. The VCAS has authority over the Business Office, Human Resources, Operations, Maintenance, and Security.

In addition to the vice chancellors, the director of the Pacific Center for Advanced Technology Training (PCATT), who also oversees non-credit technology training programs, continuing education, and lifelong-learning also reports directly to the Chancellor.

Also directly reporting to the Chancellor is the Executive Assistant (EA). The primary duties of the EA include coordinating external affairs conducted through the Chancellor's office (e.g. donor activities, marketing functions, international agreements) as well as public information and promotional activities for the campus.

Official job descriptions delegate and identify specific duties for each administrator. The College has a chart delineating administrator roles and duties (IV.B.25, IV.B.26). There are also established policies and procedures for academic deans and division chairs (IV.B.27, IV.B.28).

The Chancellor conducts weekly scheduled administrative meetings. Weekly meeting agendas include system updates, department updates, community updates, legislative updates, and discussion of campus issues and initiatives (IV.B.29). The Chancellor also holds single and multi-day retreats twice a year to give the administrative staff the opportunity to organize and plan activities for upcoming semesters and be assigned to particular duties.

Shared committee service enables coordination between administration, and faculty and staff leaders. The Chancellor or delegated administrative representative sit on several campus committees as voting or nonvoting members to ensure consistent two-way flow discussion on campus initiatives and goals. Committees on which the Chancellor or an administrative delegate sit include: PC, FSEC, SSEC, CPC, CCIE, Accreditation Task Force, Assessment Task Force, CSSC, Campus Technology Committee, and Sustainability Committee.

Under the Chancellor's leadership, the College underwent a substantive reorganization in 2011-2012 intended to better meet campus needs and institutional strategic goals.

Restructuring included:

- Consolidation of academic support services under a newly created Dean of Academic Services and creation of Student Success and Design Services units within this group
- Consolidation of IT activities under a Chief Operations Officer reporting to the VCAA
- Consolidation of all non-credit activities under leadership of a Director of PCATT
- Consolidation of services and programs serving Native Hawaiian students
- Addition of a new Music & Entertainment Learning Experience (MELE) program
- Consolidation of Admissions and Records functions into one division
- Alignment of security personnel directly under the Vice Chancellor for Academic Services
- Elimination of the Pacific Aerospace Training Center

- Replacing the Campus Leadership Team in 2016 with two new bodies, the Administrative Services Group (ASG) for operational decisions and the Campus Student Success Council (CSSC) for improving student achievement and engagement (IV.B.30, IV.B.31, IV.B.32)
- Creation of the Deans and Division Chairs (DDC) committee also came with the change in the leadership structure. The DDC, under the leadership of the VCAA, meets twice monthly to discuss academic matters (IV.B.33).

### *Evaluation of Administrators*

The Chancellor uses 360 performance reviews for an annual evaluation of administrators. The survey is anonymous and polls those who work closely with the administrator, including those who are supervised. The Chancellor discusses outcomes and improvement goals with each administrator. There also is an annual analysis of achievement of administrative outcomes.

The Chancellor meets with the Vice President of Community Colleges (VPCC) for a performance review.

The institution regularly evaluates its administrative structure to assess organizational effectiveness and determine that staff is aligned to the purposes of the institution. In a Spring 2017 survey of the campus, 70% of those responding thought the Chancellor maintains an administrative structure enabling the college to fulfill the institutional mission. Furthermore, 87% of the campus thought their deans and supervisors were providing effective leadership (IV.B.34 [pp. 87, 92]).

To further improve, the College is working on clarifying administrative roles and responsibilities to all campus constituents with a 'go to' chart, mapping out roles and responsibilities and lines of authority, and making it clear whom to go to for specific issues.

### Analysis and Evaluation

Honolulu CC meets this Standard. The Chancellor plans, oversees, and evaluates an administrative structure to reflect the institution's purposes, size, and complexity. The Chancellor delegates authority to administrators and others consistent with their responsibilities.

IV.B.3 Through established policies and procedures, the CEO guides institutional improvement of the teaching and learning environment by:

- establishing a collegial process that sets values, goals, and priorities;
  - ensuring the college sets institutional performance standards for student achievement;
  - ensuring that evaluation and planning rely on high quality research and analysis of external and internal conditions;
  - ensuring that educational planning is integrated with resource planning and allocation to support student achievement and learning;
  - ensuring that the allocation of resources supports and improves learning and achievement; and
  - establishing procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution.
- 

#### Evidence of Meeting the Standard

The Chancellor guides improvement of teaching and learning through established policies and procedures. These procedures and policies set through a collegial process values, goals and priorities for student success, including institutional-set performance standards, evaluation and planning based on analysis on external and internal conditions, strategic resource allocation, educational planning integrated with academic support, allocation for learning and achievement, and efforts for the institution to achieve its mission.

Campus policies HCCP # 1.101 and #4.101 on involvement in decision processes (IV.B.5) and on integrated planning (IV.B.6) outline the institution's collegial model for participation in improvement of teaching and learning. The culture of shared decision-making also is guided by the Board of Regents, Executive and UHCC policies stipulating faculty involvement in academic decisions and policy development (IV.B.35, IV.B.36, IV.B.37).

The Planning Council, on which the Chancellor sits, initiates and guides the participatory processes overseeing the mission, institutional learning outcomes, strategic plan, institution set standards, supplemental program funding requests, planning and budgeting initiatives, campus communication, and accreditation.

The Chancellor and PC Chair keep the campus informed of strategic planning processes by posting information, timelines, and drafts for faculty, staff, student leaders, and administrators. The Chancellor conducted a town hall meeting in April 2015 to foster discussion and input for the most recent iteration of the strategic plan (IV.B.38). The Chancellor has periodic meetings with Student Government representatives to discuss campus goals and hear student input (IV.B.39). The College recently reviewed and revised its Mission Statement based on a participatory process (IV.B.40). These processes allow interested parties to remain informed and participate in revisions prior to final approval by governance bodies and the Chancellor.

Prior to Chancellor's decision on supplemental program funding, the Planning Council guides a process for other governance committees to rank proposals. A published timeline enables the campus to participate, both with proposals and with discussion on ranking them (IV.B.41). A town hall session is part of the process, allowing proposers to provide reasons for their requests (IV.B.42).

The program funding process is a means for the Chancellor to ensure that educational planning is integrated with resource planning and allocation to support student achievement and learning and ensures that the allocation of resources supports and improves learning and achievement (IV.B.43).

The Chancellor directs the College toward meeting set institutional performance standards for student achievement and other measures based on UH System and UHCC targets (IV.B.44, IV.B.45). The College establishes its own performance standards as part of its strategic planning process. The College recently exceeded all its FY 2018 UHCC performance goals and most of the UH System performance measures. The Chancellor, along with the Planning Council, reviews the performance goals established in its strategic plan (IV.B.46).

To improve student learning and achievement, the Chancellor has instituted assessment town hall events to educate and train the campus in utilizing methods to evaluate course, program, and institution outcomes (IV.B.47). These showcase events include opportunities for programs to share ideas learned from departmental and program assessment (IV.B.48, IV.B.49). A new Assessment Coordinator was hired to facilitate efforts in understanding and analyzing assessment results for continuous institutional improvement. This Coordinator recently led multiple campus meetings to keep the campus updated on assessment activities (IV.B.50).

The Chancellor ensures that evaluation and planning rely on high quality research and analysis of external and internal conditions. Planning processes are based on

institutional data reports generated by the Office of Policy, Planning and Institutional Research (PPIR). These reports provide foundational evidence for evaluating campus performance and identifying new initiatives (IV.B.51). PPIR reports analyze the efficacy of College initiatives and are regularly shared through campus meetings (IV.B.52) and campus email updates. Publications of Annual Reports, which include student performance and fiscal data, share campus performance achievements with the campus and general public (IV.B.22).

The Chancellor ensures that educational planning is integrated with resource planning and allocation to support student achievement and learning and ensures allocation of resources supports and improves learning and achievement in the following ways:

Annual Program Review Annual and Five Year Reports require campus programs to assess success in meeting the institutional mission and strategic goals for student achievement. Programs rely on data from the UHCC system office, the PPIR, and Course and Program SLO assessment as bases for Program Review reports (IV.B.53). These Program Review reports inform College academic planning decisions and are tied to budget prioritization. Programs seeking supplemental funding for program improvement or expansion must base applications on program review assessments and findings. Supplemental budget request submissions must demonstrate links to the College's Mission and Strategic Plan goals. Criteria for ranking budget items include explicit links to the College Mission and justifications based on program review findings and priorities (IV.B.54, IV.B.55). The Chancellor decides funding priorities based on prioritization of reviewing governing bodies and institutional fiscal conditions (IV.B.56).

Administrative initiatives are based on data and meeting strategic goals. For example, to better meet College performance goals for student success, the UHCC system and College established a Student Success Pathway. This initiative was based on data analysis, and outcomes are currently being measured to assess effectiveness (IV.B.57). The College was the recipient of an iPASS funded grant, which has helped College implementation of an Integrated Student Support initiative. The purpose of this initiative is to incorporate different technology platforms to improve how students are advised, serviced, tracked and supported on campus. The campus is using a combination of data in Banner, an academic GPS system, STARFISH, and Predictive Analytics to better support student learning and progression to graduation (IV.B.58).

The Chancellor and Deans of CTE programs aid technical programs by applying for Perkins Grants monies using program review data and justifications (IV.B.59). Proposals are ranked based on how they support meeting College strategic outcomes. Campus proposals are presented to a system group for discussion and funding decisions.

In addition to Perkins funding, the College has received several other grants and awards aimed at improving student learning and student services, including National Science Foundation, TRIO-SSS and Title III grant monies, as well as UHCC system performance based funding and targeted monetary awards (IV.B.6o).

The Chancellor establishes procedures to evaluate overall institutional planning and implementation efforts to achieve the mission of the institution. The College has a participatory process to periodically review and update the Mission Statement, coordinated by the Planning Council in conjunction with other governance bodies. Periodic reviews also result in revisions in the Strategic Plan as well as committee processes. The College (has adopted) a policy review cycle to ensure the currency of policies (IV.A.84).

In the Spring 2017 campus survey, 71% of respondents agreed that “...the Chancellor demonstrates leadership to ensure institutional planning is integrated with use of resources to promote student learning” (IV.B.34 [p. 94])

In response to focus group concerns about increasing the visibility of fiscal sources and distribution, the College has improved its intranet fiscal page with information regarding funding bases, awards and spending.

#### Analysis and Evaluation

Honolulu CC meets this standard. The Chancellor plays a primary role in ensuring ongoing institutional improvements in teaching and learning. In compliance with UH System and College policies, the College has in place participatory processes linking planning activities, resource allocation, and use of data to foster ongoing institutional improvements in support of student achievements and learning.

IV.B.4 The CEO has the primary leadership role for accreditation, ensuring that the institution meets Eligibility Requirements, Accreditation Standards, and Commission policies at all times. Faculty, staff, and administrative leaders of the institution also have responsibility for assuring compliance with accreditation requirements.

---

#### Evidence of Meeting the Standard

The Chancellor takes the lead role in accreditation, ensuring the College meets or exceeds Eligibility Requirements, Accreditations Standards, and Commission policies.

The Chancellor appoints and works closely with the Accreditation Liaison Officer (ALO) to coordinate activities during and between accreditation self-study report cycles and promotes campus awareness about accreditation requirements and compliance.

The Chancellor sits on the Accreditation Steering Committee, receives weekly status reports on the accreditation process from the ALO, and provides information to accreditation questions. The Chancellor promotes the involvement of faculty, staff, and administrators in preparing the self-study report. Over 70 have participated in the evaluation process. All other administrators serve as co-Chairs and/or members of all Standard Committees. Faculty and staff are also directly involved as members of self-study committees ([IV.B.61 \[list of committee members\]](#)).

The Chancellor also participates as co-chair of the Standard IV team, while all other administrators serve as co-chairs or members of standard teams. The Chancellor and the ALO keep the campus apprised of the accreditation process through email updates and town hall meetings ([IV.B.62](#), [IV.B.63](#), [IV.B.64](#)).

The Chancellor and ALO ensure continued compliance with ACCJC requirements by submitting all necessary reports due to the Commission. These include Annual Reports, Midterm and Progress reports, and Substantive Change Approvals. Eligibility Requirements are include this accreditation oversight of the College. Both the Chancellor and ALO stay informed on accreditation through service on comprehensive ACCJC evaluation site visits. The Chancellor has chaired several teams.

The College designated an Accreditation Oversight Committee to ensure campus compliance with Accreditation requirements and standards between self-studies. In 2014, the College reorganized committee oversight by disbanding the Accreditation Oversight Committee and creating a new body – the Campus Council on Institutional Effectiveness. This body oversees and coordinates two sub committees – the Accreditation Task Force ([IV.B.65](#)) and the Assessment Task Force ([IV.B.66](#)). The Chancellor, or administration designee, sits on the CCIE along with faculty and staff. ([IV.B.18](#)). These groups are charged with overseeing assessment activities, ensuring ongoing campus response to recommendations from past self study reports, and maintaining campus awareness of current ACCJC accreditation standards. The Chancellor and the ALO also keep the campus apprised of Commission findings and College activities aimed at meeting Standard criteria through email updates, newsletters and Town Hall meetings.

To prepare the campus for the current self-study, in particular Standard Committee members, the ALO and Chancellor conducted focused Town Hall sessions were held to inform the campus of standards and criteria (IV.B.67, IV.B.68). The Chancellor and ALO also organized participation of Standard committee members in a system Kick-Off exercise led by an independent consultant, who was then invited to Honolulu CC for sessions open to the campus at large (IV.B.69).

### Analysis and Evaluation

Honolulu CC meets this Standard. The Chancellor takes a leading role in accreditation processes and fosters a culture of ongoing institutional improvement. The Chancellor collaborates with the Accreditation Liaison Officer to guide accreditation efforts and facilitate campus awareness of accreditation processes and requirements. The Chancellor provides leadership ensuring the College meets all eligibility and accreditation requirements, standards and policy obligations by participating actively on key committees, by promoting awareness across the campus of accreditation activities and obligations through the Intranet and emails, and ensuring that structures exist and leadership is identified to meet these obligations.

Additionally, through representation on key bodies responsible for meeting Accreditation requirements (Committee on Institutional Effectiveness, the Accreditation Task Force, the Assessment Task Force, Standard Committees and subcommittees), faculty and staff leaders also have clearly demonstrated roles in and responsibilities for compliance with standards and requirements.

IV.B.5 The CEO assures the implementation of statutes, regulations, and governing board policies and assures that institutional practices are consistent with institutional mission and policies, including effective control of budget and expenditures.

---

### Evidence of Meeting the Standard

The Chancellor ensures College compliance with all relevant statutes, regulations and governing board policies. BOR Policy RP # 2.202 makes explicit this responsibility stating, “the board’s policy is to exercise control over the university through its executive officer, the president of the university, includes the understanding that the president

has the principal responsibility to apply the policies, rules and regulations adopted by the Board of Regents” (IV.B.1). Other BOR policies authorize the Chancellor with the power to regulate Public Health and Safety (RP 11.205) (IV.B.70) and ensure compliance with all relevant laws related to Hazardous Materials Management (RP 11.207) (IV.B.71).

UH Executive Policy EP 1.102 delegates primary authority for financial management to the Chancellor, who maintains effective control of budget and expenditures of the College.

The policy also stipulates that the Chancellor manages the institution’s administration and operations within applicable federal and state statutes, rules and regulations, and University policies and procedures (IV.B.3).

The College is bound by Hawaii State Laws specifically related to the University of Hawai’i (IV.B.72). The Chancellor is a member of the University of Hawaii Council of Community College Chancellors, which oversees system-wide coordination and individual campus compliance with all system and BOR policies (IV.B.2). Honolulu CC has several specific policies mandating practices to ensure the College meets all legal requirements and obligations (IV.B.73).

As specified in the College’s policy on integrated planning (I.A.5), the Chancellor maintains that the institution aligns policies, budgeting, expenditures, and procedures with the mission. The Chancellor further ensures practices are consistent throughout the campus through membership on planning and governance committees. These committees also are responsible for revision and approval of the mission statement and strategic plans.

The College’s Human Resources office has taken several actions to ensure the campus community is aware of and in compliance with obligations related to Title IX, including mandatory online training and posting of resources (IV.B.74, IV.B.75). Required language is issued to faculty for inclusion in course syllabi to ensure students are aware of statutory rights and options related to disabilities access, Title IX protections, and the student conduct code (IV.B.76). The UH Nondiscrimination Policy (translated into several languages) is posted on the College Internet site (IV.B.77). The Human Resources Office, under oversight of the VCAS and Chancellor, guarantees the College complies with all obligations based on contractual agreements and EEO obligations.

The College demonstrates institutional commitment to meeting safety and security requirements by posting relevant information on its public Internet site (IV.B.78). The College’s Safety and Security Manager ensures College compliance with the Clery Act

through periodic publishing of campus safety policies and incident statistics (IV.B.79). The campus is informed through email alerts when these reports are issued and posted online (IV.B.80). The College carries out required drills to test the effectiveness of the campus Emergency Response and Evacuation Plan.

### Analysis and Evaluation

Honolulu CC meets this Standard. The Chancellor maintains an institutional presence on key committees, participates in UH system meetings, and complies with all BOR and University system policies to ensure the College meets statutory obligations. Under the Chancellor's leadership, College policies, practices, and proactive information campaigns ensure College members are aware of and comply with legal mandates. Fiscal decisions are made based on institutional needs and linked to institutional goals.

### IV.B.6 The CEO works and communicates effectively with the communities served by the institution.

---

#### Evidence of Meeting the Standard

The Chancellor pursues active engagement with the community by serving on a number of local boards and committees. Participation in these committees create a two-way communication with the neighborhood and local partners. Building links with the community is an important responsibility, and the Chancellor pursues active engagement with community partners in several ways. The Chancellor's membership on community boards is a visible and important means of establishing relations and communication. The Chancellor interacts at various levels: campus, university, local community, and national boards.

At the campus level, the Chancellor is a member of every major governance committee and regularly attends the monthly meetings and/or provides updates to:

- Planning Council (member)
- Faculty Senate Executive Committee
- Staff Senate Executive Committee

- Kupu Ka Wai Governance Council
- Student Government
- Campus Student Success Council

At the University system level, the Chancellor serves on:

- Council of Chancellors
- Community College Council of Chancellors
- President's Emerging Leaders Program (PELP) - Advisory Board Member
- Commission on the Status of Women
- UHCC Student Success Council
- UH Council on Data Governance
- UHCC Strategic Planning Council

At the community level, the Chancellor serves on these boards and committees:

- EPIC Ohana - Foster Youth Advisory Board
- Women Leaders in Higher Education, Hawaii Chapter, Board Chair
- Hawaii (Oahu) Chamber of Commerce - Workforce Development Commission
- State of Hawaii - Transit Oriented Development Council
- City and County of Honolulu - Kapālama Redevelopment Advisory Committee

At the national level, the Chancellor serves on these boards, committees and commissions:

- Northwest Accrediting Commission on College and Universities, Current Commissioner
- ACCJC, Visiting Member and Team Chair
- Pacific Post-Secondary Education Council
- American Association of Community Colleges, Commissioner on the Commission for Structure Pathways and Commissioner on the Commission for Academic, Student, and Community Development

The Chancellor also works with the community through the programs to outreach to potential students, alumni, potential donors, community supporters, and the broader community. The outreach campaigns focus on raising the visibility of the College (IV.B.81, IV.B.82, IV.B.83). News reports of College events and achievements are shared

with the UH news office (IV.B.84), tweeted, and blogged (IV.B.85). Ongoing communication includes an Alumni web page with announcements of events, alumni achievements, and celebrations (IV.B.86).

### *Community Partnerships*

The Chancellor works closely with leaders in the community Honolulu CC serves and solicits feedback periodically through meetings and ad hoc groups.

Pearl Harbor Naval Shipyard Apprenticeship program: The College is contracted by the Federal Navy to provide all the support to train those who repair and maintain all Naval ships, these include battleships, aircraft carriers, and submarines. The College provides academic and workforce related training and educational offerings, and serves as one of the premier apprenticeship programs in the state.

Apprenticeship: The College meets a critical workforce development need of the state through its Apprenticeship program. The Chancellor works with the Apprenticeship Coordinators to ensure the College fulfills its obligations in supporting ongoing professional training for apprentices in CTE fields (IV.B.86).

The campus is currently very active in coordinating with planners regarding the new Honolulu rail system under construction, especially as it relates to transit based development plans on and around the campus.

The College's website also shares information with students and the broader community. It contains news updates and a blog site publicizing events on campus. The College publishes Annual Reports, which summarize achievements, initiatives, honors and awards, and institutional performance outcomes. Annual Reports showcase the important role the College plays in the community (IV.B.21).

### Analysis and Evaluation

Honolulu CC meets this Standard. The Chancellor ensures the community is informed about, and provided meaningful input regarding the College's service to the community. This is accomplished through the Chancellor's membership on several University, state and national organizations. In addition, diverse membership on the Chancellor's Advisory Board ensures close connections with important community stakeholders. The College's Office of Communication and External Affairs works to expand communication with a growing number of community partners and potential students. And under the Chancellor's leadership, the College is an active partner in a number of important workforce and infrastructure State and city initiatives.

## **Standard IV.C: Governing Board**

**IV.C.1** The institution has a governing board that has authority over and responsibility for policies to assure the academic quality, integrity, and effectiveness of the student learning programs and services and the financial stability of the institution.

---

### Evidence of Meeting the Standard

The Board of Regents (BOR) of the University of Hawai'i is established under Hawai'i Revised Statutes HRS§304A-104. The fifteen-member board is responsible for the general management and control of the University that incorporates all of public higher education, including the University of Hawai'i Community College System. The Regents are appointed to five-year terms (with one exception noted below), and represent either one of the four counties in the State or the public at large. Regents may be appointed to a second consecutive five-year term. One regent must be a student of the University. The student regent is appointed for a two-year term, and may be reappointed (IV.C.1, IV.C.2).

Members of the Board, drawn from a slate of nominees submitted by the Regents Candidate Advisory Committee (RCAC), are appointed by the Governor and confirmed by the State Senate. The RCAC consists of seven members, with four members appointed by the Governor and one member each appointed by the President of the State Senate, the Speaker of the House, and the Association of Emeritus Regents. The RCAC solicits nominations for the Regents, qualifies and screens the applicants, and presents to the Governor a slate of nominees for each vacant Regent position (IV.C.3, IV.C.4).

The By-Laws of the Board of Regents include the specific organization and responsibility of the Board and its committees for academic matters, financial oversight, and general control of the University. This authority is further delineated through Regents Policies (RP) (IV.C.5, IV.C.6). Several policies, including *RP 4.201: Mission and Purpose of the University*, focus on assurance of academic quality and integrity and effectiveness as integral to the institution, a focus echoed in different ways in individual institutional mission statements. The Board executes these responsibilities through regular reporting and deliberation at Board and committee meetings. The Board also may elect to create special task groups to address specific issues, such as the recently created Integrated Academic and Facilities Plan (IAFP) (IV.C.7, IV.C.8).

### Analysis and Evaluation

Honolulu CC meets the standard. The governing board is established in State statute and the Board is appointed through a process of open recruitment for Board member candidates followed by gubernatorial appointment and Senate confirmation.

The authority of the Board for the governance of the University is established in the State constitution and statute, and the Board has organized its by-laws, policies, and processes to carry out the full measure of Board governance, including the oversight of academic programs, student success, and fiscal integrity of the institutions. The authority of the Board encompasses all components of the University, including the University of Hawai'i Community College System and the individual community colleges.

IV.C.2 The governing board acts as a collective entity. Once the board reaches a decision, all board members act in support of the decision.

---

### Evidence of Meeting the Standard

The primary policy governing board interaction among board members and with the broader University community is Regents Policy, *RP 1.202: Relationship of the Board to Administration and University*. Specifically, Section III.A.2.B of the policy states that:

“Except as specifically authorized by formal action, no member of the board can represent the board within the university and no member shall interfere, engage in, or interact directly with the campuses without prior authorization from the chairperson. All meetings between board members and any member of the administration, including the president, shall be authorized by the board’s chairperson and arranged through the secretary and/or with the full knowledge of the secretary. In addition, no unilateral action of a member of the board has the authorization nor support of the board; and the authority of the board reposes in the board as a whole. Likewise, all communication from the president and any members of the administration to the members of the board must flow through the secretary unless otherwise authorized.”

The policy also delineates and structures the communication between the Board and the University administration, including the requesting and providing of information to and from the Board and the administration (IV.C.9).

The policy is further emphasized through the Board of Regents handbook that is made available to all incoming Regents and published on the Board website. The handbook is based on best practices drawn from the Association of Governing Boards, and includes expectations of Regents, including the responsibility of individual Regents to “Serve the institution or system as a whole. Individual trustees have a responsibility to support the majority action, even when they disagree” (IV.C.10).

The 2017 Board Self Assessment includes several items focused on “Acting as a Unit.” Responses to the self-assessment questionnaire indicate that Regents feel that there is effective communication and mutual trust, leading to a “high-performing group that works well together” (IV.C.11, IV.C.12)

#### Analysis and Evaluation

Honolulu CC meets the standard. As noted, Board policy RP 1.202 specifically addresses and seeks to ensure the collective nature of its decisions and actions. A review of Board minutes did not disclose any instances of Board members acting outside the policy guidelines.

IV.C.3 The governing board adheres to a clearly defined policy for selecting and evaluating the CEO of the college and/or the district/system.

---

#### Evidence of Meeting the Standard

As the governing body of the University of Hawai‘i System, the Board of Regents selects and evaluates the University President. *RP 2.203: Policy on Evaluation of the President*, establishes the evaluation protocols for the University President, including an annual self-assessment by the President, additional data collection by the Board, a preliminary meeting between the Board and the President, and a final evaluation after the President responds to the preliminary assessment (IV.C.13).

#### *System CEO Selection*

There has not been a search for the Vice President for Community Colleges (VPCC) since the position was re-established in 2005, and the current Vice President was appointed to oversee the re-organization of the community college system. Should the position of Vice President become vacant, the President would follow the recruitment and other procedures outlined in *RP 9.212: Executive and Managerial Personnel Policies*. In a two-step process that differentiates the functions of appointment and approval, the President would make a recommendation for VPCC to the Board of Regents, which has the final approving authority for that position (IV.C.14).

### *Campus CEO Selection*

The process for selecting the Chancellor (CEO) of a college is managed by the Vice President for Community Colleges. The search process involves the creation of a 15 to 20-member committee, the Chancellor Search Advisory Committee (CSAC), composed of representatives from various college constituencies and the community that the College serves. Nominations for members of the screening committee are solicited from governance groups. The Vice-President determines the final composition, based on ensuring broad and equitable representation within the advisory committee.

A formal policy for the selection of Chancellors, *UHCCP 9.210: Recruitment, Selection, and Appointment of Community College Chancellors*, was drafted in Spring 2018, and vetted and approved by the Chancellors and campus governance bodies (IV.C.15). A detailed set of procedures, which has been used consistently for several years in this process, has also been codified.

The authority for appointment of the college Chancellor is delegated to the Vice President for Community Colleges, with final approval of the appointment by the President of the University. A public announcement is made, and the selected candidate is also placed on the agenda of the Board of Regents to ensure that the Regents are fully informed of the selection process and the selected candidate.

### *UH CEO Evaluation*

Evaluations are conducted in executive session at a public Board meeting with the summary results of the evaluation also made public and included in Board minutes. The posted agenda items and subsequent minutes for the past three Presidential evaluations are provided as evidence (IV.C.16, IV.C.17, IV.C.18).

### *UHCC and CC Campus CEO Evaluation*

The Board delegates the evaluation of the Vice President for Community Colleges to the University President, and the evaluation of the individual college Chancellors is further delegated to the Vice President for Community Colleges. The annual evaluation of both the Vice President for Community Colleges and the Chancellors is governed by Executive Policies, *EP 9.203: Evaluation of Board of Regents Appointees*, and *EP 9.212: Executive/Managerial Classification and Compensation (IV.C.19, IV.C.20)*.

Executive Policies establish an annual review that includes a 360-degree assessment by the individual, as well as his/her peers, subordinates, and constituents, of the executive's performance. The individual self-assessment also includes a review of accomplishments and goals set for the review year, and the establishment of goals for the upcoming year. The evaluation information is then discussed between the supervisor and the executive being evaluated. The results of the evaluation impact both continued employment and compensation increases.

The University of Hawai'i Community Colleges system further refines the annual evaluation of executive personnel, including Chancellors, through *UHCCP 9.202: Executive Employees Performance Evaluation*. This policy delineates the requirements for the respondents in the 360 evaluation, and also adds the college's attainment of its strategic goals as a component of the Chancellor's evaluation (*IV.C.21*).

The evaluation system is reviewed on a periodic basis. In the 2016-2017 review, two changes were adopted. First, an additional item was added to the 360 instrument to allow respondents to assess the performance of the executive in furthering the student success agenda (*IV.C.22*). Second, the categories of performance rating were changed to better reflect the gradations in overall performance. Each executive/managerial employee is now rated as exceptional, exceeds expectations, meets expectations or does not meet expectations (*IV.C.23*).

### Analysis and Evaluation

#### *CEO Selection*

Honolulu CC meets the standard.

The procedures used to recruit and select the Vice President for Community Colleges and the college chancellors involve a broadly representative screening committee, extensive solicitation of applicants, multiple levels of interviews, and public visitations by the finalists to the campus. The President of the University makes the final selection of the Vice President, subject to approval by the Board of Regents. The Vice President

for Community Colleges makes the final determination of the Chancellor, subject to approval by the President.

### *CEO Evaluation*

Honolulu CC meets the standard.

Annual evaluations involving 360 evaluations, assessment of goal attainment, and progress toward strategic goals have been conducted for the Vice President and all college Chancellors each year. The results of the evaluation are used to set goals for the upcoming year, establish performance ratings on which continued employment may be based, and in determination of merit-based salary increases, when available.

[IV.C.4. The governing board is an independent, policy-making body that reflects the public interest in the institution's educational quality. It advocates for and defends the institution and protects it from undue influence or political pressure.](#)

---

### Evidence of Meeting the Standard

The autonomy of the University and related independent authority of the Board of Regents is embodied in Article X of the State Constitution. Section 6 of Article X specifically states that:

“There shall be a board of regents of the University of Hawaii, the members of which shall be nominated and, by and with the advice and consent of the senate, appointed by the governor from pools of qualified candidates presented to the governor by the candidate advisory council for the board of regents of the University of Hawaii, as provided by law. At least part of the membership of the board shall represent geographic subdivisions of the State. The board shall have the power to formulate policy, and to exercise control over the university through its executive officer, the president of the university, who shall be appointed by the board. The board shall also have exclusive jurisdiction over the internal structure, management, and operation of the university. This section shall not limit the power of the legislature to enact laws of statewide concern. The legislature shall have the exclusive jurisdiction to identify laws of statewide concern” (IV.C.24).

In carrying out its responsibilities, the Board leadership often testifies at legislative hearings on matters relating to the University, and meets with key State legislators on various bills and budget matters. These legislative communications are coordinated and consistent between the Board and the University's administrative legislative coordinator.

### Analysis and Evaluation

Honolulu CC meets the standard.

The autonomy of the University is established in the State constitution. Given the authority of the Legislature to enact laws of statewide concern, the Board remains attentive to whether such laws might impede the University and Board from exercising its constitutional authority.

In 2012, a fraudulent fundraising event for University athletics led to extensive legislative hearings and bills introduced relating to management and control within the University. The Board of Regents responded by creating an Advisory Task Group on Operational and Financial Controls Improvement (ATG) to conduct its own audit of University operations. The ATG, comprised of both Regents and respected community members, conducted an audit of policies and practices, evaluated the processes against best practices in higher education, and made recommendations in several areas for improvement. The Board considered the reports, and made governance and policy changes in accordance with some of those recommendations ([IV.C.25](#), [IV.C.26](#), [IV.C.27](#), [IV.C.28](#), [IV.C.29](#)).

By taking the initiative to address the issues raised by the Legislature in a comprehensive and very public manner, the Board exercised not only its responsibility for oversight and management of the University, but also its authority to act on matters relating to the University, and protecting the institution from undue influence and political pressure.

[IV.C.5. The governing board establishes policies consistent with the college/district/system mission to ensure the quality, integrity, and improvement of student learning programs and services and the resources necessary to support them. The governing board has ultimate responsibility for educational quality, legal matters, and financial integrity and stability.](#)

### Evidence of Meeting the Standard

Both by the structure of and responsibilities established for its standing committees, and by its Regents Policies, the Board acts to fulfill its responsibilities as the single provider of public higher education in the State. Board policies and strategic plans are aligned and guide the University in fulfilling its overall mission. The role of community colleges within the University System is further defined in *RP 4.207: Community College System (IV.C.30)*.

The board has modified the University mission statement twice in the past several years. In 2009 the Regents adopted a change in the mission that made explicit the University's responsibility and commitment to the success of Native Hawaiian students and the desire for the University to be a model indigenous serving institution (*IV.C.7*). In 2014 the Regents acted in response to a student initiative to expand the mission to include sustainability as a core responsibility and value for the University. This subsequently led to the creation of a new policy on Sustainability, *RP 4.208*, illustrating the alignment of mission and policy (*IV.C.31*). Work on a new policy focused on alignment of programs with the mission is currently in progress.

As stated in *RP 4.201, Section C.b*, "The Board approves a mission statement that elaborates the basic system mission, articulating those qualities common to the system as a whole. At a minimum, the system mission incorporates the vision, purpose, and common values of the university system, emphasizing the fundamental commitment to access and quality." Policy *RP 4.201, Section C.a* also differentiates the basic unit missions (four-year and two-year institutions), which are further articulated in individual campus mission statements (*IV.C.7*).

### Analysis and Evaluation

Honolulu CC meets the standard.

Board of Regents Bylaws and Policies, committee structure and responsibilities, and meeting minutes are aligned with the overall mission of the system, and reflect the broad compliance with the overall expectations of Board management, quality control, and fiscal oversight.

IV.C.6. The institution or the governing board publishes the board bylaws and policies specifying the board's size, duties, responsibilities, structure, and operating procedures.

---

#### Evidence of Meeting the Standard

The Board of Regents home page (IV.C.2) includes links to the Board Bylaws and Policies. The Bylaws include sections defining the Board membership and organization, the officers and duties of each officer, the standing committee structure of the Board and the scope of each committee, the meeting requirements for both committees and the Board, and other operating procedures including parliamentary procedures, establishment of quorum, voting rules, access to legal counsel and outside consultants, and procedures for modifying the bylaws, which may be done through a two-thirds vote of the Board. The Bylaws also include the conflict of interest requirements for Board members (IV.C.32).

#### Analysis and Evaluation

Honolulu CC meets the standard.

The Bylaws are published and made available to the public, and include all required elements of the standard.

IV.C.7. The governing board acts in a manner consistent with its policies and bylaws. The board regularly assesses its policies and bylaws for their effectiveness in fulfilling the college/district/system mission and revises them as necessary.

---

#### Evidence of Meeting the Standard

Board of Regents policies are reviewed on a staggered three-year cycle, with current iterations posted at the Board's home page. As a result of a recommendation from the previous comprehensive accreditation review, the University and Board developed and implemented the UH Systemwide Policies and Procedures Information System (PPIS). The PPIS documents all of the Board policies and the related University executive policies and administrative procedures (IV.C.33).

The features of the PPIS include:

- Description of the PPIS with frequently asked questions on the PPIS home page
- Easy public access to all policies, including from the Board of Regents home page
- Policy header that includes the effective date of each policy, the dates of all prior amendments to the policy, and the next scheduled review date. While Regents Policies may be amended on as-needed basis, the board policies are also on a staggered three-year review cycle
- Links from the executive policy and/or administrative procedure to the related Regents policy
- Automatic notification to interested parties of any change in policy (IV.C.33)

When the PPIS was implemented in 2014, all policies were re-codified to be consistent with the new system. The policy review dates were set as August 2017 for Chapters 1-4, August 2018 for Chapters 5-9, and August 2019 for Chapters 10-13 (IV.C.34).

The review of Chapters 1-4 was conducted beginning in Summer 2017 with a review of the twenty-eight policies included in those chapters. Policies were reviewed for both content and format under the aegis of the Committee on Personnel and Board Governance Committee. Recommendations were made as to whether a policy would a) remain unchanged; b) be subject to editing for clarity or alignment with current practice; c) undergo substantive review and modification; or d) be repealed. Based on this assessment, one policy will be repealed and six will undergo substantive review. One new policy may be created. The Board will complete this cycle by the end of the academic year, before a next cycle begins. A report was presented first to the Committee on Personnel and Board Governance on November 1, 2017, and subsequently provided to the Board at its November 16, 2017 meeting (IV.C.35, IV.C.36). A further update was given to the Committee on Academic Affairs and Board Governance on April 5, 2018 (IV.C.37).

### Analysis and Evaluation

Honolulu CC meets the standard.

The Board policies are publicly available through the Board of Regents home page and are managed through the comprehensive PPIS. The PPIS system provides timely notification to all interested parties of policy changes and establishes a review cycle for all policies.

The review cycle for Chapters 1-4 was initiated as scheduled in Summer 2017 and resulted in the review of twenty-eight policies. Six policies were substantively updated through the review process.

All policies are current with their review cycle. It is understood that a policy may be reviewed and revised at any time, should the need arise; a new policy may also be created as needed. A review of Board minutes confirmed that board actions were in compliance with policies. Policy changes were also compliant with all consultation requirements established by Chapter 89 of the Hawaii Revised Statutes, the public employee collective bargaining law.

[IV.C.8. To ensure the institution is accomplishing its goals for student success, the governing board regularly reviews key indicators of student learning and achievement and institutional plans for improving academic quality.](#)

---

#### Evidence of Meeting the Standard

The Board has established strategic goals for the University and its component colleges in four key areas:

- Hawai'i Graduation Initiative focusing on student success
- Hawai'i Innovation Initiative focusing on research and innovation and commercialization of University research endeavors
- Twenty-first century facilities, including eliminating the deferred maintenance backlog, modernizing teaching and research facilities, and sustainability
- High performing, mission-driven system, including developing efficiencies and effective strategies taking advantage of the University's role as the single system of public higher education in the state.

These key goals, endorsed by the Board in 2015, are further articulated in and aligned with the strategic goals of the UH Community College system and of the individual community colleges and other campuses. When feasible, the goals are quantified with targeted incremental growth or improvement measures ([IV.C.38](#), [IV.C.39](#), [IV.C.40](#), [IV.C.41](#)).

The Board regularly receives updates on the University's progress in meeting these strategic goals through data on established metrics and trends, and presentations at either board meetings or meetings of the academic and student affairs committee. The Board has instituted policies such as performance funding that are directly related to the student success goals. Additionally, the Board has sought to gain a better understanding of the issues impacting student success through a series of reports that explore topics such as financial aid, enrollment management, workforce planning, and student pathways (I.A.7).

The Board meets on a rotating basis at the campuses in the system; it receives a briefing from the host campus on its progress toward meeting the student success agenda.

### Analysis and Evaluation

Honolulu CC meets the standard.

The Board has adopted strategic goals related to student success with specific metrics and targets for each major unit, including the community colleges. The community colleges have adopted strategic goals that are consistent with these system goals and that extend the goals and targets to the individual community colleges.

IV.C.9. The governing board has an ongoing training program for board development, including new member orientation. It has a mechanism for providing for continuity of board membership and staggered terms of office.

---

### Evidence of Meeting the Standard

All new Board members receive a full-day orientation that consists of two major components. The first is an introduction to University functions, governance, and strategic directions. The second component deals with Board governance, processes, ethics, and conduct. All new Board members receive a copy of the Board of Regents General Overview as a part of the orientation, as well as a substantial New Regent Orientation Book. Additionally, beginning in 2017, new Board members are paired with a more experienced Board member, who serves as a mentor to the incoming member (IV.C.42, IV.C.43, IV.C.44).

Board members regularly participate in governing board professional development through attendance at conferences of the Association of Governing Boards and the Association of Community College Trustees (IV.C.45).

The Board also organizes training for its members as a part of regular Board retreats or Board committee meetings. For example, during the 2016-2017 academic year, the University external auditor conducted a four-part training session for the Board independent audit committee, drawn from the American Institute of Certified Public Accountants (AICPA) handbook, covering the primary duties of an audit committee, expertise, understanding processes and controls, federal government implications, and roles and responsibilities of the external auditor, the internal auditor, and management (IV.C.46). The Vice President for Budget and Finance also provides an overview of the State of Hawai`i budget as it pertains to the University system (IV.C.47).

### Analysis and Evaluation

Honolulu CC meets the standard.

New Board members are provided with a comprehensive orientation and related materials, and with a mentor from among the experienced board members. Professional development is provided through attendance at national board professional associations and through training provided at Board meetings.

In 2017 the Board updated its committee structure to modify the personnel committee to also include board governance. Among the added responsibilities for the committee is ensuring that education and development pertinent to Board service is provided for Board members.

IV.C.10. Board policies and/or bylaws clearly establish a process for board evaluation. The evaluation assesses the board's effectiveness in promoting and sustaining academic quality and institutional effectiveness. The governing board regularly evaluates its practices and performance, including full participation in board training, and makes public the results. The results are used to improve board performance, academic quality, and institutional effectiveness.

---

### Evidence of Meeting the Standard

Regents Policy (RP) 2.204 establishes the process for Board self-evaluation. In 2017, the Board bylaws were amended to expand the role of the Personnel Committee to a Committee on Personnel Affairs and Board Governance, with explicit responsibility for managing the Board evaluation process (IV.C.48, IV.C.49).

Pertinent to the current accreditation cycle, the Board has conducted annual evaluations since 2014 (IV.C.50, IV.C.51, IV.C.52). Additionally, in 2012-2013, the Board undertook a comprehensive audit of the University operations, including Board functions and structure, and implemented significant changes in response to the audit recommendations (IV.C.53, IV.C.54, IV.C.55, IV.C.56, IV.C.57). The Board has drawn from the Association for Governing Boards as a guide to structuring and evaluating its operations (IV.C.58).

### Analysis and Evaluation

Honolulu CC meets the standard.

The Board uses the results of its evaluation to improve its operations. For example, in 2015 the Board evaluation included an assessment of whether the Board committee structure adequately aligned with the strategic directions of the University. The concern was that the then-current structure of having an academic affairs committee, a student affairs committee, and a community college committee resulted in un-coordinated conversations about student success. After debate and consultation, the Board acted to consolidate the three committees and focus the committee responsibilities on the student success agenda. At the same time, the Board acted to create a committee on research and innovation, also in alignment with the University's strategic directions (I.A.25).

While the Board has actively engaged in self-evaluation and acted in response to those evaluations, the evaluation schedule has not been scheduled in a formal, regular manner. Partly in response to this assessment, the Board acted to expand the personnel committee to include governance. Among the described responsibilities of the expanded committee are oversight of the evaluation process and the regular review of Board policies. The policy on Board Self Evaluation, RP 2.204, is one of those undergoing substantive review.

IV.C.11. The governing board upholds a code of ethics and conflict of interest policy, and individual board members adhere to the code. The board has a clearly defined policy for dealing with behavior that violates its code and implements it when necessary. A majority of the board members have no employment, family, ownership, or other personal financial interest in the institution. Board member interests are disclosed and do not interfere with the impartiality of governing body members or outweigh the greater duty to secure and ensure the academic and fiscal integrity of the institution.

---

#### Evidence of Meeting the Standard

Article X of the Board of Regents Bylaws establishes the conflict of interest policies and procedures for Regents. Regents are informed of the ethics requirements during their initial orientation (IV.C.59).

Regents Policy. *PR 2.206: Policy on Regents as Employees*, also describes the conflicts of interest that may arise when Regents are also active employees of the University and the conditions under which such Regents need to recuse themselves from actions impacted by their employment status (IV.C.60).

Regents are also subject to public laws governing ethics behavior. Regents must file annual financial disclosure forms with the Hawai'i State Ethics Commission. These disclosures are open to the public. The Board has also included a Board education presentation by the State Ethics Commission Executive Director as an agenda item at its regular meetings (IV.C.61).

#### Analysis and Evaluation

Honolulu CC meets the standard.

The Board is subject to both State ethics laws and to its own bylaws and policies relating to ethics and conflicts of interest. The laws and policies cover all of the potential conflicts identified in the Standard. Board members are informed of the ethics requirements through their initial orientation, and through regular Board professional development.

Potential ethics concerns are routinely identified during Board meetings and the Regent in question is either recused from action and deliberation on the agenda item, or the potential conflict is determined not to preclude participation. The University General

Counsel is available at Board meetings to help resolve the determination of potential conflicts of interest.

No evidence exists for Board members having acted in a manner inconsistent with the established ethics bylaws and policies.

IV.C.12. The governing board delegates full responsibility and authority to implement and administer board policies without board interference and holds the CEO accountable for the operation of the district/system or college, respectively.

---

#### Evidence of Meeting the Standard

Regents Policy, *RP 2.202: Duties of the President*, clearly documents the relationship between the Board of Regents and the University system President, and establishes the authority of the President to implement and administer Board policies (IV.C.62).

The general policy on duties of the President is further refined in specific actions. For example, Regents Policy, *RP 9.218: Delegation of Personnel Actions*, describes those hiring actions reserved by the Board, those delegated to the President, and those that may be further delegated by the President (IV.C.63).

The structure of the University of Hawai'i System establishes this line of authority with the University System President, and through the President to the Vice President for Community Colleges, and the individual college Chancellors.

When the Board does feel that a matter needs additional oversight, it may elect to create a task group to work on the issue. Task groups may be established by the chairperson upon authorization by the Board, and with such powers and duties as determined by the Board. The tenure of a specific task group shall expire at the completion of its assigned task.

An example of such a task group was focused on creating an integrated academic and facilities plan (IAFP) for the University System (IV.C.64). The task group included both Regents and University administrative officials. Several meetings were held that led to the final recommendation to adopt a plan governing academic program planning and

related facilities construction across the ten-campus University system ([IV.C.65](#), [IV.C.66](#), [IV.C.67](#)).

### Analysis and Evaluation

Honolulu CC meets the standard.

While the Board maintains its responsibility for establishing overall strategic direction, university policies, and fiduciary management of the University system, the Board does not actively engage in direct or detailed management of the community colleges or individual campuses.

[IV.C.13](#). The governing board is informed about the Eligibility Requirements, the Accreditation Standards, Commission policies, accreditation processes, and the college's accredited status, and supports through policy the college's efforts to improve and excel. The board participates in evaluation of governing board roles and functions in the accreditation process.

---

### Evidence of Meeting the Standard

The Board is routinely informed about the status of accreditation at each of the community colleges.

In preparation for the 2018 Institutional Self Evaluation Report (ISER), the Board Committee on Academic and Student Affairs was presented with an overview of the accreditation process, including those standards relating to the governing board. Following this briefing, the Board acted to create a permitted interaction group to assist in the evaluation of board-related standards ([IV.C.68](#)). A permitted interaction group is comprised of a sub-set of the regents and is allowed to engage in conversation and dialog about an issue without being subject to open meeting provisions. The permitted interaction group may not take any action but may only report to the larger Board or one of its committees. The permitted interaction group included Board leadership, the chair and vice chair of the Committee on Academic and Student Affairs, and Regents representing all the islands with community colleges. A further briefing on preparing for accreditation was provided to the Board at its March 2017 meeting ([IV.C.69](#)).

Members of the permitted action group were provided an early draft of Standard IV.C in August 2017, and met with representatives from the community colleges (ALOs and ISER chairs/co-chairs) in November 2017 to refine the document, provide clarification where needed, and suggest additional items of evidence. The group was provided a final opportunity to review this section, pertaining to the Governing Board, before the completed ISERs from the six campuses were presented for review by the Committee on Academic and Student Affairs, the Board of Regents, and the President of the University of Hawai`i in early Summer 2018.

#### Analysis and Evaluation

Honolulu CC meets the standard.

The Board was fully informed of the accreditation requirements, the process of ISER preparation, and was directly involved in the assessment of board-related standards.

## **Standard IV.D: Multi-College Districts or Systems**

IV.D.1 In multi-college districts or systems, the district/system CEO provides leadership in setting and communicating expectations of educational excellence and integrity throughout the district/system and assures support for the effective operation of the colleges. Working with the colleges, the district/system CEO establishes clearly defined roles, authority and responsibility between the colleges and the district/system.

---

### Evidence of Meeting the Standard

The University of Hawai`i (UH) system is the sole provider of public higher education in the state of Hawai`i. The overall structure of the UH system is established in Board of Regents policy, *RP 3.201: Major Organizational Units of the University of Hawai`i*. The ten-campus UH system as a whole includes the University of Hawai`i Community College System (UHCC), which is comprised of seven community colleges. The UHCC is further established in Regents policy *RP 4.207: Community College System*. UH Maui College is accredited by the Western Association of Schools and Colleges (WASC), Senior division. The other six community colleges are accredited by the Accrediting Commission of Community and Junior Colleges (ACCJC), and function as the multi-campus system now being evaluated (IV.D.1, IV.D.2).

As an outcome of the reorganization in 2005, overall leadership of the University of Hawai`i Community College System is now provided by the Vice President for Community Colleges (VPCC), the CEO of the system. The VPCC is a member of the senior administration of the UH system, reporting directly to the UH system President (IV.D.3). The UHCC office, which oversees the management of and provides support in several areas including academic support, planning, personnel, facilities, and fiscal resources, is located on the island of O`ahu at a central site near the flagship campus in Mānoa. The VPCC works with an Associate Vice President for Academic Affairs (AVPAA) and an Associate President for Administrative Services (AVPAS) to ensure support for the effective operation of the colleges at the system level (IV.D.4, IV.D.5).

The VPCC further works with the Chancellors (CEOs of the individual colleges), delegating to them the authority for campus leadership (IV.D.6). (See also Section IV.D.4.) The CC Chancellors may report through the Vice President for Community Colleges to the President of the UH System for University system-wide policy-making and decisions affecting all campuses, and to the Vice President for Community Colleges

for leadership and coordination of community college matters. This flow of communication preserves the Board of Regents' actions in supporting both individual campus autonomy and system-wide coordinated operations (IV.D.7).

The delineation of functions and the differentiation of responsibilities between system and campus level is summarized in the UHCC-System Functional Map, most recently reviewed by the community colleges, and updated in Fall 2017. The Functional Map shows alignment with both the major accreditation topics (IV.D.8), as well as the detailed parts of Standards (IV.D.9).

### Analysis and Evaluation

As part of the University of Hawai`i system, the College meets this Standard.

Established policies and procedures clearly identify the positions of CEO for both the UHCC system (Vice President for Community Colleges) and individual campuses (Chancellors), and identify their authorized roles in providing leadership at multiple levels.

IV.D.2 The district/system CEO clearly delineates, documents, and communicates the operational responsibilities and functions of the district/system from those of the colleges and consistently adheres to this delineation in practice. The district/system CEO ensures that the colleges receive effective and adequate district/system-provided services to support the colleges in achieving their missions. Where a district/system has responsibility for resources, allocation of resources, and planning, it is evaluated against the Standards, and its performance is reflected in the accredited status of the institution.

---

### Evidence of Meeting the Standard

The Vice President for Community Colleges (VPCC, the system CEO) provides primary leadership in ensuring that the colleges function effectively in fulfillment of their respective missions, and in support of educational excellence and student success. The VPCC provides system-level support for campus operations through both a centralized system office, and through several bodies comprised of campus representatives.

The operations of the Office of the Vice President for Community Colleges (OVPCC) are overseen by two Associate Vice Presidents who coordinate centralized support services in the areas of Academic Affairs and Administrative Affairs. The Associate Vice President for Community Colleges Academic Affairs (AVPCCAA) provides leadership in operational policy-making pertinent to the development and implementation of CC system-wide academic plans, goals and assessment. Specific areas of assistance and coordination include academic support services; academic planning, assessment and policy analysis; career and technical education; student affairs and workforce development. The office also supplies the system with strategic data on a number of measures that contribute to more refined assessment of the success of various programs and initiatives (IV.D.10).

The Associate Vice President for Community Colleges Administrative Services (AVPCCAS) provides leadership in supporting all aspects of administrative services that contribute to the effective and efficient functioning of the colleges. Specific areas of assistance and coordination include budget and finance; compliance and Title IX; Equal Employment Opportunity; facilities and environmental health; human resources; and marketing and communications (IV.D.11). Facilities management is one area that requires an additional level of coordination and prioritization. Capital improvement projects (CIP) for all campuses are managed at the UH-system level through the UH Office of Capital Improvements (OCI; now designated as the Office of Project Delivery), established by the Board of Regents. General CC repair and maintenance and minor CIP projects are managed by the AVPCCAS, and individual colleges have responsibility for routine maintenance, and health and safety issues. Individual colleges have Long Range Development Plans (LRDP), which are used by the CC and UH systems to develop and justify minor and major CIP (IV.D.12, IV.D.13).

The VPCC also meets regularly and works with several councils comprised of representatives of specific leadership constituencies at the community colleges: Council of Community College Chancellors (IV.D.14); Community College Council of Faculty Senate Chairs (IV.D.15); and Community Council of Native Hawaiian Chairs (IV.D.16).

Each campus also mirrors the system level structure in having executive leadership for academic affairs and administrative services; where student services functions are coordinated under the Associate Vice President for Academic Affairs (AVPCCAA) at the system level, the Colleges maintain separate executive management for Student Services with either Vice-Chancellors or Deans. Vice-Chancellors for Academic Affairs (VCAAs), Vice-Chancellors for Administrative Services (VCASs), and Vice-Chancellors for Student Affairs (VCSA) or Deans for Student Services (DOSS) also meet with their counterparts

from other campuses on a regular basis, extending the network of collaborative planning and decision-making, and mutual support (IV.D.17).

In addition to these councils based on administrative positions, the CC system has also developed several system-level initiatives in support of student success and achievement. Primary among these is the Student Success Council, created in 2014 as an outgrowth of the UHCC system having joined the Achieving the Dream Initiative in 2006 (IV.D.18). The system-level Council is mirrored in campus-based committees, which are focused on four key initiatives: developmental education; college pathways; just-in-time, customized support services; and graduation and transfer. Coordination at the system level, balanced with campus-based activities, ensures that the colleges adhere to consistent standards, benefit from sharing of resources and best practices, and have support for developing models for implementation that fit best with the individual campus culture and mission.

Emerging initiatives that will require additional system-level coordination and effective interface with the individual colleges are a) Sustainability and b) Distance Education. With reference to Sustainability, an Executive Policy (EP 4.202) and a new Regents Policy (RP 4.208) signal a system-level commitment that will impact all campuses as they develop and share ideas and practices that best fit their individual needs and environmental conditions. Secondly, while the community colleges have utilized the modality of distance learning for quite some time, recent discussion has now focused on developing a coordinated and fully online Associate in Arts (Liberal Arts) degree at the CC system level, which will require renewed and proactive commitment from the CC system office and the individual campuses (IV.D.19, IV.D.20, IV.D.21).

### Analysis and Evaluation

As part of the University of Hawai`i system, the College meets this Standard.

The UHCC System is well-structured as a system to delineate the roles and responsibilities for the system as a whole on the one hand, and the individual colleges on the other. It provides for the benefits of the economies and efficiencies of scale through the coordination of academic and administrative functions in the system-level OVPC (See also Standard III), while supporting the autonomy of individual campuses, the management structure of which significantly mirrors that of the system office.

Additional structures exist that further provide for equal access to participation among the campuses, founded on regular communication and collaborative discussion and decision-making, including the Councils that meet with the VPCC, the committees of Vice-Chancellors, and the system-level initiatives such as the Student Success Council.

IV.D.3 The district/system has a policy for allocation and reallocation of resources that are adequate to support the effective operations and sustainability of the colleges and the district/system. The district/system CEO ensures effective control of expenditures.

---

#### Evidence of Meeting the Standard

The University system's budget preparation and receipt of and further distribution of resources are governed by State law, primarily Chapter 37 of the Hawaii Revised Statutes (HRS) (IV.D.22). Biennial budget requests, financial plans and program performance reports are provided to the Governor and the Legislature in odd-numbered years; supplemental budget requests (to amend any appropriation for the current fiscal biennium) may also be submitted in even-numbered years. Operating and Capital Improvement Projects (CIP) funds for the UH system are appropriated by major organizational units, of which the UH Community Colleges system is one.

The UHCC System Office, under the guidance of the Associate Vice-President for Administrative Services, coordinates the budget development and request process for the community colleges, based on the strategic plans of the UH system, the UHCC system, and the individual College Strategic Plan (IV.D.23). The Community College Strategic Planning Council (SPC) is the primary body for ensuring system-wide participation in the UHCC strategic planning process. The membership of the SPC includes the Chancellor, Faculty Senate Chair, and Student Government Chair from each college; and the Vice President and the Associate Vice Presidents for the community colleges (IV.D.24). The SPC provides a planning context to ensure that system budget request categories and priorities are consistent with and align appropriately with UHCC Strategic Plan goals and objectives. The guiding principles of the Community College Strategic Academic Planning Process, which defines the role of the SPC, are codified in *UHCCP #4.101: Strategic Academic Planning*. The Vice President for Community Colleges has a functional responsibility for providing a fair distribution of resources that are sufficient to support the effective operations of the colleges (IV.D.25).

Each college develops its own budget request (as described in more detail in Standard III.D.) At the UHCC system level, the seven CC Chancellors, with support from the Associate VPs and their staff, collectively review, categorize, and prioritize the individual

college budget requests. A key criterion in approving campus budget requests is the extent to which they align with and support strategic planning goals. The individual college budgets remain intact at the campus level, but are consolidated at the UHCC system level for purposes of further integration in the overall UH system budget, which is ultimately submitted to the State Legislature.

While State general funds, allocated by the Legislature, provide the most significant funding source for the colleges, tuition revenues also constitute a major component of college budgets. Other sources of internal and extra-mural funds (e.g., Special funds, Revolving funds, grant funds, UH Foundation) may also be generated and retained by each college. The management of sources of funding other than general funds is guided by two UHCC Policies: *UHCCP # 8.000: General Fund and Tuition and Fees Special Fund Allocation*, and *UHCCP # 8.201: Unrestricted Fund Reserve—General, Special, Revolving Funds*. Each College's budget reflects a different combination of revenue sources and expenditures; all campuses maintain the Reserve required by accreditors ([IV.D.26](#), [IV.D.27](#), [IV.D.28](#)).

Campuses have also had access to additional funds from the OVPCC, and more recently from the Office of the UH President, providing additional incentive for the meeting of certain goals linked to performance measures focused on student achievement. These are in turn associated with system and campus strategic objectives ([IV.D.29](#)). Campuses have specific targets for incremental growth; meeting or exceeding them results in earning this additional funding. Unallocated funds are redistributed by the OVPCC for other campus or system initiatives, such as those associated with Student Success.

In addition to fiscal resources, the UHCC system has also been attentive to the more effective use of vacant positions throughout the system. Since requests for new positions are subject to legislative approval and appropriation, the system must often reallocate a position from one unit or program to another, in order to be more responsive to such factors as enrollment growth, changing workforce needs, and program requirements. Another UHCC Policy was developed in November 2012 to more objectively and equitably manage and reassign vacant positions. This policy created a system pool of those positions, from which campuses may request reallocation, based on documented need ([IV.D.30](#)).

With reference to effective control of expenditures, recent actions taken between 2013-2016 provide an example of the controls in place to ensure accountability and sound fiscal management, as well as the way in which corrective action may lead to the creation and implementation of new policy and procedural guidelines. In the fiscal year ending June 30, 2013, the UH Office of Internal Audit (OIA) conducted operational

reviews of the Culinary Arts programs at two community college campuses. The reports identified “operational and financial risks” and presented recommendations relating to the inventory management, financial analysis and reporting and other aspects of these programs. In Spring 2014 OIA conducted follow-up reviews to ensure implementation of recommendations (IV.D.31). The Internal Audit report was on the agenda of the May 12, 2015 meeting of the Board of Regents’ Committee on Independent Audit. Subsequent to the December 15, 2016 of that same committee, findings from the Internal Audit report were included in the UH system’s Annual Report on Material Weaknesses and Fraud, presented to the 2017 Legislature (IV.D.32, IV.D.33, IV.D.34). As one outcome of this case, the OVPCC created a new policy in March 2016 to provide better management and oversight for revenue-generating programs (IV.D.35).

### Analysis and Evaluation

As part of the University of Hawai`i system, the College meets this Standard.

Allocation of key resources (particularly funding and personnel) is guided by clearly established policies. Procedures allow all campuses to participate in collective decision-making about resource allocation. Budget requests are tied to strategic planning goals and objectives to ensure that resources are used most effectively to support colleges’ missions in service to student learning and achievement. Fiscal controls are in place to further ensure accountability in the allocation and use of resources.

IV.D.4 The CEO of the district or system delegates full responsibility and authority to the CEOs of the colleges to implement and administer delegated district/system policies without interference and holds college CEOs accountable for the operation of the colleges.

---

### Evidence of Meeting the Standard

The University of Hawai`i System has a President, a Vice President for Community Colleges (among several Vice Presidents responsible for differentiated areas of UH-System functions), and Chancellors for each of the ten universities or colleges in the system. As noted, the Vice-President for Community Colleges (VPCC) is the CEO of the

system of the seven UH community colleges. Each college has a Chancellor, the CEO of the institution. Board of Regents Policy BP 4.207 established the Community College System in 2002, although the colleges have been functioning since 1965 as part of the UH System (IV.D.36). In 2005, the Board of Regents approved the reorganization of the Community College System and created the new Executive position of Vice President for Community Colleges (IV.D.37). A subsequent memo to the college Chancellors provided detailed organizational charts as well as a Functional Statement for the Office of the Vice President for Community Colleges (OVPC) (IV.D.38). Key among the Major Functions delineated in that memo is the following:

“Ensures that the community college chancellors have full responsibility and authority to implement and administer delegated system policies without interference and holds the chancellors accountable for the operation of the colleges.”

The authority and responsibility of Community College Chancellors for the overall management and governance of their campuses is further affirmed in *Executive Policy 1.102: Authority to Manage and Control the Operations of the Campus*, which states, “Primary authority for financial management has been delegated by the President to the Chancellors. Chancellors may sub-delegate authority to qualified, responsible program heads” (IV.D.39). University of Hawai`i Community Colleges Policy, *UHCCP # 8.000: General Fund and Tuition and Fees Special Fund Allocation*, also specifies the Chancellor’s responsibility “...to develop a methodology to allocate funds to the campus units consistent with budget planning and resource allocation standards of the accrediting commission” (IV.D.40). Responsibility for a broad range of personnel actions has also been delegated to the Chancellors in Executive Policy 9.112 (Attachment B) (IV.D.41).

In line with the need for accountability in the fulfillment of their duties, Chancellors (and other Executive-Managerial personnel) are subject to annual performance evaluation, with final assessment by the VPCC. This process is thoroughly codified in *UHCCP #9.202: Executive Employees Performance Evaluation* (IV.D.42, IV.D.43).

### Analysis and Evaluation

As part of the University of Hawai`i system, the College meets this Standard.

It is clearly documented in several policy and procedural documents that both the delegation of authority to the campus CEOs, as well as mechanisms to ensure their accountability, are clearly established in the UHCC system. The trend of delineation and delegation has generally given more autonomy to the Chancellors in making campus-level decisions, particularly in the areas of personnel and finance.

#### IV.D.5 District/system planning and evaluation are integrated with college planning and evaluation to improve student learning and achievement and institutional effectiveness.

---

##### Evidence of Meeting the Standard

The community colleges in the Hawai`i statewide system of public higher education operate within a three-tiered system: the University of Hawai`i (UH) system as a whole (including seven community colleges, two baccalaureate institutions, and the flagship research university); the UH Community College system; and the individual community college campuses located on the four major islands in the state. Satellite Learning Centers, providing additional outreach across the state, are managed by the community colleges and UH-Maui College (IV.D.44). A commitment to the parity of access for students and to the continuous improvement of conditions contributing to student learning and success, as well as a commitment to the equitable allocation of resources in support of that ultimate goal, require effective planning of operations that are coordinated and integrated across the system.

As noted, there are multiple structures in place at the UH- and the CC-system level (e.g., committees of administrative counterparts from individual campuses, councils of campus governance representatives) that facilitate the dialog and decision-making essential to the processes of planning and implementation. In addition, each tier of the system is grounded in a comprehensive Strategic Plan that provides the conceptual guidance for mid-range planning. These currently include the *UH Strategic Directions 2015-2021*, the *UHCC Strategic Directions 2015-2021* (intentionally developed to be aligned with the overall UH plan), and the individual campus strategic plans, also developed in alignment with the UHCC plan (IV.D.45, IV.D.46, IV.D.47).

A crosswalk of these three levels of planning further corroborates the high degree of congruity and integration (IV.D.48). In some cases, goals and objectives of strategic planning have been quantified or operationalized to provide a basis for evaluation of institutional effectiveness. Several of these measures are further linked to performance-based funding provided at both the UH- and the CC-system level, as seen in the Crosswalk of UH System and UHCC System Performance Funding cited in IV.D.3. (IV.D.49).

Most recently, on April 20, 2017, the Board of Regents approved the Integrated Academic and Facilities Plan (IAFP) for the University of Hawai`i System. Recognizing the critical interdependence between the academic missions of the ten campuses and the physical and other resources required to support those missions, the IAFP states that it is “...intended to provide a comprehensive plan for how the campuses will develop and work together to ensure that the entire mission of the UH system is addressed without undue duplication or inter-campus competition” (IV.D.50 [p. 2]). The IAFP provides an overview of current conditions and emerging needs and prospects for the four major units in the system (the three universities and the CC system) and affirms the further integration of planning in noting that “The principles of this plan will be incorporated into biennium budget planning, annual operating budgets, 6-year CIP plans and academic program approvals and reviews” (IV.D.50 [p. 18]).

### Analysis and Evaluation

As part of the University of Hawai`i system, the College meets this Standard.

The UH System, the UHCC System and the individual community colleges develop strategic plans that are closely aligned in support of institutional missions focused on student learning and achievement. In many cases, the goals articulated in the plans result in measurable objectives that are used as the basis of evaluating institutional and system effectiveness.

IV.D.6 Communication between colleges and districts/systems ensures effective operations of the colleges and should be timely, accurate, and complete in order for the colleges to make decisions effectively.

---

### Evidence of Meeting the Standard

Multiple modes and avenues of communication exist in the UH system to facilitate and support the effective operation of its constituent institutions. Within the UHCC System, the Vice President for Community Colleges (VPCC) and the administrative staff in the Office of the Vice President for Community Colleges (OVPCC) are key liaisons in the ongoing process of the flow of information.

The VPCC is a member of the UH President's senior leadership team (Executive Council) as well as a member of the ten-campus Council of Chancellors. The VPCC serves as the Administrative Representative to the Board of Regents (BOR) Standing Committee on Academic and Student Affairs, and items forwarded from the colleges for BOR approval (e.g., Strategic Plans, Institutional Self Evaluation Reports) are presented under the signature of the VPCC. In addition to publicly posted minutes of BOR committee and Board meetings, the VPCC is provided with memos summarizing BOR approved actions (IV.D.51). Campuses are also informed of updates to the policies and procedures that constitute the institutional infrastructure through notification from the Policies and Procedures Information System (PPIS) (IV.D.52).

The VPCC also meets regularly with three Councils representing different aspects of college governance: The Council of Community College Chancellors, the Community College Council of Faculty Senate Chairs, and the Community College Council of Native Hawaiian Chairs. Meetings of these Councils are documented, and each Council completes an annual self-assessment (IV.D.53, IV.D.54, IV.D.55).

The VPCC makes semi-annual visits to each CC campus, with information pertinent to both CC-system and individual campus performance. Typically, Fall semester visits focus on major initiatives and budget for the current academic year as well as campus score-cards in the context of performance-based funding based on data from the prior academic year. Spring semester visits generally provide a summary, as well as a prospective view of upcoming work (IV.D.56).

As noted, the community colleges function within a three-tiered system: The UH system, the UHCC system and the individual community colleges. Communication between the top two tiers (UH system and UHCC system) is structurally more stable and often articulated in specific policy or procedure. Communication between system and individual campuses is predicated on the expectation that campus representatives who sit on or are present at system-level meetings (e.g., the Councils identified above, or meetings of functional counterparts such as Vice-Chancellors for Academic Affairs) will report back to their campuses or constituents for informational or decision-making purposes. Individual campus perspectives on communication between campus and system indicate that there are varying degrees of effective campus- and constituent-focused reporting. With the goal of improving timely access to information documenting discussion and decision-making at the system level (e.g., agendas and minutes of Councils and other deliberative bodies), specific steps have been taken to address communication-related concerns: 1) as needed, orientation is provided to those serving as campus representatives to system committees so they are more fully aware of

their reporting duties; and 2) the OVPCC is engaged in a comprehensive update of its own website to enhance accessibility and currency of the information posted there.

### Analysis and Evaluation

As part of the University of Hawai`i system, the College meets this Standard.

Just as the VPCC serves as an important point of connection between the UH System and the CC System (OVPCC), and between the OVPCC and the individual colleges, the Chancellors of the individual colleges are responsible for coordinating with the OVPCC, and for extending lines of communication to their respective executive teams, faculty, and staff. The OVPCC has recognized the need to maintain access to up-to-date documentation of system-level meetings, and is updating its own website to ensure better access to that information.

IV.D.7 The district/system CEO regularly evaluates district/system and college role delineations, governance and decision-making processes to assure their integrity and effectiveness in assisting the colleges in meeting educational goals for student achievement and learning. The district/system widely communicates the results of these evaluations and uses them as the basis for improvement. (IVB3g)

---

### Evidence of Meeting the Standard

The process of evaluating role delineations, governance, and decision-making processes can best be described as organic and ongoing, in the sense that while there is not a formal instrument of evaluation or assessment, there are multiple established policies and procedures in place at the UH, the UHCC, and campus levels that are intended to ensure the stable, consistent, and effective functioning of systems and individual colleges. Such policies and procedures serve both to a) set standards of best practices; and b) minimize the likelihood of actions that do not uphold expectations of integrity and effectiveness. Policies are regularly reviewed (IV.D.57), new policies are created when need is recognized (e.g., new UHCC policy on selection process for Chancellors), roles and responsibilities are delineated in the Functional Map, and personnel are

regularly evaluated on their performance in supporting and achieving educational goals (IV.D.58).

Of specific importance in this last context is the role of the Community Colleges' Strategic Planning Council (SPC), the primary body for assuring system-wide participation in the UHCC strategic planning process, as codified in *UHCCP #4.101: Strategic Academic Planning*. The policy identifies roles and responsibilities in the process of campus academic planning, which provides much of the critical infrastructure for the effective functioning of the colleges (IV.D.59).

### Analysis and Evaluation

As part of the University of Hawai`i system, the College meets this Standard.

Established policies and procedures as well as documentation of governance and decision-making that operationalize those policies and procedures are subject to ongoing review. Where appropriate, colleges are evaluated on the basis of performance-based measures that support their efforts to meet goals linked to student achievement and learning.

## **Distance Education Supplement**

### *Introduction*

The Distance Education Supplement is designed to specifically highlight the efforts at Honolulu CC to meet the standards and the eligibility requirements regardless of mode of instructional delivery. The College recognizes the increased role that online education is playing in postsecondary education in general and for the students the College serves in particular.

In this Supplement, each standard is separately addressed and relevant references to the eligibility requirements are also noted. The content of the narrative herein is intended to be read parallel with the coverage in the standards and eligibility requirements sections of the institutional self-evaluation report. Accordingly, the sections of the Distance Education Supplement follow the same structure of the institutional self-evaluation report, identifying the Evidence of Meeting the Standard and Analysis and Evaluation sections. Finally, references to compliance with the ACCJC Policy on Distance Education and the Checklist for Compliance with Commission Policies and Federal Regulations are included.

### *Honolulu CC's Distance Education Mission*

Honolulu CC's Distance Education program is committed to providing the highest quality distance education courses and programs to meet the changing needs of the 21<sup>st</sup> century learner. Distance Education is dedicated to ensuring student achievement of learning outcomes, increasing educational resources, acquiring innovative technology, and providing support and equitable services to faculty and DE students.

### *Core Values*

Four core values serve as the means to guide Honolulu CC's distance education:

- Learning –all students can achieve student learning outcomes
- Support – faculty, staff, and students will receive ongoing training and technical assistance
- Innovation – search continues for inventive ways to use technology for effective learning and efficient course delivery
- Accountability –evaluation of distance education courses is maintained to ensure that they are the highest quality, with resources and services that meet the needs of students, faculty, and staff

*DE Student Demographics*

## **Standard I.A: Mission**

### Evidence of Meeting the Standard

In 2017, Honolulu CC finalized its new mission statement that commits the College, in part, to establishing “accessible educational opportunities through an engaging learning environment that values academic excellence and personal growth of all students.” In fulfilling its mission, the College has adopted the Core Value of being “Student-Centered and Student Focused –offering a supportive, high quality learning environment.”

To ensure that the College’s distance education meets the College mission of accessibility as well as an “engaging learning environment that values academic excellence” (I.A.19) (I.A.1), the College’s DE adheres to the University of Hawaii system policy on distance and online learning, which states, “The primary goal for distance learning at the University of Hawaii is to provide a window of opportunity to the rich array of quality instructional resources available to on-campus students to students anywhere in the state who are committed to higher education but are unable to attend the UH campus offering their program of choice. The primary purpose of our distance learning effort is to provide increased access to higher educational opportunity for the people of Hawaii” (DE.1)

The standards expect that colleges demonstrate a “strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services.”

The use of data on students in face-to-face classes as well as distance education classes direct institutional priorities and connect these efforts to the mission can be seen primarily in long- and mid-range planning for the College. Basic data collected regularly by the Office of Policy, Planning, and Institutional Research (PPIR), which publishes the *Honolulu CC Fact Book 2017* (I.A.2). The fact book provides information on many aspects of the College, but important for distance education teaching faculty is data regarding student demographics and performance. This data is shared with the DE teaching faculty at the start of each semester as part of the required DE orientation. Specific information about DE courses, students and assessment also can be found on DE Faculty Orientation Documents located on the College Intranet (DE.2). (I.A.2).

Both distance education (DE) courses and face-to-face courses require approval from the College’s Committee on Programs and Curricula (CPC). The CPC, which is a faculty committee operating under the Faculty Senate Executive Committee (FSEC), oversees the curriculum process of courses and programs, including new proposals,

modifications, deactivations, activations, and deletions (II.A.10). In addition to approval by the CPC, DE courses must be certified by the Distance Education Advisory Committee (DEAC) to ensure the online version equals or surpasses traditional classroom delivery in terms of student learning (II.A.11).

In addition to regular assessment and program review for all courses and programs, the College demonstrates its commitment to evaluation and improvement for Distance Education by having a faculty Distance Education (DE) Coordinator and an active Distance Education Advisory Committee (DEAC). Working together, DEAC and the DE Coordinator mandate rigorous certification and assessment for all Distance Education courses (II.A.11).

The DE Coordinator prepared the College's five-year Distance Education Strategic Plan (2013 – 2018). The DE Strategic Plan established targeted goals and desired outcomes in order to deliver high quality DE courses. This plan enabled the college to align strategic objectives with financial and human resources and provided mechanisms to continually review and ensure the highest quality distance education experience for students (DE.3).

The current Distance Education Advisory Committee (DEAC) has been an evolving mechanism since the committee was first authorized by the Faculty Senate Executive Committee (FSEC) in 2007. The DEAC's initial responsibilities and tasks included searching and soliciting information from multiple sources on new technology, software, and teaching methods to improve the delivery of DE courses, determining personnel support needs and establishing processes for assessing DE courses in order to compare instructional effectiveness between DE courses and courses delivered via the classroom. DEAC has refined its duties in order to respond best to the needs of both students and faculty. (I.A.3). The current DEAC membership includes diverse representation from educational programs and services across campus:

Members of this committee are appointed, as follows:

- Three (3) faculty teaching distance education (DE) courses (2 UC, 1 CTE)
- One (1) representative from Academic Support
- One (1) representative from Student Services
- One (1) representative from ITS
- Distance Education Coordinator
- Assessment Specialist or Assessment Task Force Chair

- Dean of University College
- Dean of Tech I
- Dean of Tech II
- Disability Specialist
- Additional members may be appointed as needed from year to year

The current charter for DEAC stipulates the following operating procedures: (DE.12)

- search and solicit information from multiple sources on new technology, software, and teaching methods that may improve delivery of DE courses.
- Determine if personnel support is adequate in number and function.
- Coordinate with Faculty Development and ITS to determine and provide the necessary training for instructors and support personnel.
- Ensure that DE is assessed annually using approved assessment methods. Such assessment will include a determination as to whether the quality of a DE course is equal to the same classroom-based course.
- Prepare budget requests for the College's planning cycle if it is determined that new equipment, software or personnel are required to adequately support Distance Education.
- Keep DE instructors advised of all major developments and findings. For new courses, advise faculty on requirements for certification, and establish a timeline for that process.

In addition to the DEAC Charter and minutes for all DEAC meetings, since 2013, the DEAC has produced annual reports summarizing activities involving distance education at the College (DE.4).

To inform faculty, the DEAC, provides approval procedures for new DE courses (DE.5) and guidelines for DE course development (DE.6). Faculty can use the DE Course Proposal and Review form to submit to the DEAC (DE.7).

Faculty, already teaching online courses, are required to recertify courses every five years (DE.8).

Each semester, the DE Coordinator provides a mandatory orientation for faculty teaching DE courses. The orientation provides a discussion of faculty resources, data metrics, DE survey results, course assessment, student support, exam proctoring, among other topics (DE.9, DE.10).

The mission of the institution is reviewed for currency and relevance, and the College strives for accessible education for all students, including distance education students. (1.A.4).

### Analysis and Evaluation

Honolulu CC meets the distance education component of the standard. The College's mission accurately describes the role of distance education in meeting the College's broad educational purposes, intended student population, types of degrees and certificates offered, and its commitment to student learning and achievement. (1.A.1). Data is used to assess and evaluate the current and emerging role of distance education in the College mission. (1.A.2). The programs and support services particular to distance education in both instructional pedagogy and methodology as well as the student services are aligned with the mission. (1.A.3). The University of Hawaii Board of Regents has approved the mission with the role of distance education, and when the mission is reviewed for currency and relevance, distance education is considered. (1.A.4) (*Eligibility Requirement 6, Mission Compliant*) (*See Standard I.A in the main report for further information.*) Given the role that distance education plays in meeting the unique institutional mission at Honolulu CC, the college has identified a an action project in the quality focus essay to bolster student services and supports for online students. The goal of the action project is two-fold. First, to increase the specific outcomes of distance education students in course success and progress to degree or certificate. Additionally, the focus is to make progress on the aspirational goals under the Hawaiian initiatives and the institutional set standards. (*See, QFE 2, Enhanced Support for Distance Education Students*).

## **Standard I.B: Assuring Academic Quality and Institutional Effectiveness**

### Evidence of Meeting the Standard

The College uses assessment data and organizes its institutional processes to support student learning and student achievement.

Using specific Achieving the Dream measures, the success rate for distance education students in online courses was 64% from fall 2011 to spring 2016 (ten semesters), while the success rate for DE students in television courses was 60%. Over the same, period of time, the success rate for students in face-to-face courses was 81%. While it is not uncommon for success rates in DE courses to lag behind success rates in face-to-face courses, nationally the gap is often estimated at an average of 10%.

Although the data looks troubling, when these figures exclude withdrawals (W) and incompletes (I), the data demonstrates a student success rate of 87% for face-to-face courses and 78% for distance education courses. Although this second set of data is more encouraging, the College strives for students in distance courses to be as successful as students in face-to-face courses.

Therefore, the College has taken specific action to decrease the gap between student success in DE courses compared to students in face-to-face courses by identifying performance gaps and implementing strategies to improve achievement. Television courses were declining in popularity, expensive to produce, and generally not worth the effort in terms of student success. In the future, these courses will not be offered.

A substantial means of addressing this difference in success rates is Honolulu CC's policy on distance education (DE.11). This policy was issued by the Chancellor in Spring 2018 and mandates that the college monitor success rates and take action on courses "when success rates for DE students fall twelve points behind the success rate for face-to-face classes for consecutive semesters."

The deans and division chairs, in consultation with the authoritative body overseeing distance education, will ensure that courses not be scheduled if these courses do not receive necessary DE certifications and re-certifications.

Assessment takes place at the instructional level for both distance education (DE) and face-to-face classes in order to ensure that courses align with program and institutional outcomes. The Annual Review of Program Data (I.B.4) process is designed to ensure that programs and services are consistent with its mission.

Data collected from these reviews guide the institution in making necessary improvements in student learning and achievement. Student learning outcome (SLO) assessment results influence decision-making, planning, and resources allocation. Program Review assessment results are factored into budget requests, which must demonstrate alignment with the College's mission (I.A.26). *(See Standard I.B in the main report for discussion of program review.)*

All DE courses are approved by the College's Committee on Programs and Curricular (CPC) and are assessed by the College's process of Program Review. However, DE courses are subject to additional oversight. The Distance Education Advisory Committee (DEAC), and Distance Education Coordinator oversee the development of courses offered in Distance mode (I.B.22). Distance course descriptions, student learning objectives, and Diversification and Foundation designations (the University of Hawaii

System Core Curriculum) are subject to the same policies and institutional processes that guide the development and evaluation of traditional courses.

However, distance courses are also subject to an application and evaluation process specific to the mode of delivery (I.B.23). This process is designed to ensure that faculty teaching courses using distance mode of instruction fulfill both the SLO and assessment requirements of the relevant discipline, but also offer courses via Distance Education that are substantially the same as classroom-based courses in terms of content, interaction, teaching methods, and outcomes.

To do this, the DEAC monitors all newly approved courses for an entire semester to be certain that they are operating according to DEAC set standards for delivery and interaction. Courses that do not meet the standard are removed from the Distance mode offerings at the College. (I.B.2, I.B.3). (ER 11)

Initial DE certification is for a period of five years with recertification after that period. However, the College has lagged behind in the regular recertification of DE courses. Going forward, the DE Recertification Plan will require instructors to describe how they are meeting the policy for regular and substantive interaction with students. Instructors will also need to provide evidence of course SLO assessment. The new DE Recertification Plan will require that courses not receiving recertification will not be offered on the College schedule of classes until the recertification requirements are met for all courses (DE.13).

#### *Program Review, Planning, and Resource Allocation*

Since student learning outcomes for distance education courses are the same as face-to-face courses, instructional programs offering distance education courses receive feedback on their work on student learning outcomes as part of the Annual Review for Program Data (ARPD) (I.B.4). The College's Distance Education Advisory Committee (DEAC) also requires assessment data as part of the process for DE recertification.

As noted earlier, the student learning outcomes for distance education courses are the same as face-to-face courses. Through the SLO review at department level as well as the ARPD, faculty review student achievement data and make the necessary improvements for success. Differences in performance are reviewed and discussed by department. (I.B.5, I.B.6).

Honolulu CC's policy on Distance Education (DE.11) formalizes the existing certification and recertification process for instructors of distance education courses, specifically the role of the Distance Education Advisory Committee's (DEAC) in ensuring the quality of

instructor contact with students as part of the DE certification process. Instructors must initiate regular and substantive interaction with students. Instructor contact with students is part of the DE certification process.

The policy also requires DE instructors to engage in regular assessment of courses, so they are equivalent in substance and rigor to face-to-face delivered instruction.

The Distance Education Advisory Committee (DEAC) is integrated into the governance process, since the committee includes a faculty representative from each academic area. Minutes for DEAC meetings are posted on the Intranet (DE.4).

Dialog initiated by the Distance Education committee is often processed through other groups like the Faculty Senate Executive Committee (FSEC) or the Committee on Programs and Curricula (CPC), which oversee DEAC.

The representative nature of DEAC ensures that the recommendations and discussions are broadly communicated with minutes of each meeting posted on the College Intranet. Additionally, the DE Coordinator makes available summary reports regarding DE activity, and the Vice Chancellor of Academic Affairs and academic deans sit on the CPC and participate in discussions regarding DE issues. Institutional Research is also an active partner in the dialog about distance education, and all groups have relied heavily on data in order to develop a shared understanding of the implications on students (DE.2).

For program reviews, distance education is included within the program data (I.B.4) and analyzed by the specific program. The Honolulu CC policy on program review (I.B.8) stipulates that:

- Each instructional and non-instructional program shall undergo comprehensive review at least once every five years
- Program reviews shall result in improvement plans that are linked to the Honolulu CC Integrated Planning and Resource Allocation process

DE course assessment also is completed individually per instructor, in line with assessment of all courses. The results include data and analysis of student learning outcomes and suggestion for subsequent changes made to the course if needed. Assessment of SLOs for distance education courses follow the same method as face-to-face courses but are analyzed separately as a whole after all assessment data for all courses are compiled (I.B.20).

### Analysis and Evaluation

Honolulu CC meets the distance education component of the standard. Robust, sustained, and collegial dialog about student outcomes, equity, quality, success and continuous improvement of student learning and achievement for distance education students takes place as part of the systematic assessment and evaluation processes at the College. *(I.B.1)*.

Regular institutional processes, reports, and actions provide the College with significant opportunities to discuss all aspects of these topics. *(I.B.2)*. Data for distance education students is reviewed and compared to institution-set standards. *(I.B.3)*. Student learning outcomes for distance education courses and programs are in place and guide improvements to teaching and learning. *(I.B.4)*. Distance education programs and courses are included in the College's regular Program Review and form the basis for resource allocation decisions. *(I.B.5)*. Distance education learning outcomes are examined and included in the feedback loop. *(I.B.6)*.

The College applies an accurate and consistent application of the policies and procedures for determining that DE courses include regular and substantive interaction with the instructor. *(See Standard I.B in the main report for further information.)*

## **Standard I.C: Institutional Integrity**

### Analysis and Evaluation

Students can easily identify distance education classes from the Schedule of Classes published on the College website. Under Services for Students on the College website, a Distance Education (DE) webpage also provides useful information for students [\(DE.13\)](#), including a separate schedule for all College DE classes [\(DE.14\)](#). *(I.C.1, I.C.2)*.

On the DE webpage are useful links on how to accomplish specific College processes and expectations, such as Netiquette, and information about how to develop skills that will make online success more likely. The page includes links that serve as a helpful general introduction to the challenges of distance education, information on campus and system resources well as a FAQ page and information about how to access courses. Information includes that for prospective students as well as current students. Faculty also can find useful information on the same page.

The College's responses to Standards I.C.3 through I.C.13 with respect to distance education are the same as for face-to-face courses and not discussed here. *(I.C.3 through I.C.13)*.

In order to receive initial certification from the College's Distant Education Advisory Committee (DEAC), instructors are required to specify the frequency and nature of structured instructor-to-student interaction as well as the frequency and nature of structured student-to-student interaction. Recertification of DE courses require evidence that instructors have implemented their commitment to structured instructor-to-student interaction and structured student-to-student interaction (DE.8).

Honolulu CC has the most rigorous approval process for distance education in the University of Hawaii Community College (UHCC) System. Arguably, the College's approval process has kept the College from increasing its DE offerings at the rates shown by other UHCC campuses. The commitment to a rigorous review process demonstrates the College's desire to offer DE classes that are genuinely equivalent in both rigor and quality to face-to-face classes at the College. Honolulu CC distance education policy (DE.11) demonstrates the College's willingness to take action to improve success in distance education classes. (I.C.14).

### Analysis and Evaluation

The College meets the distance education component of this standard. Information about the distance education courses and programs are made available to students in accurate, accessible, and open formats. (I.C.1, I.C.2, I.C.3). Policies for distance education are regularly reviewed for accuracy and relevance. (I.C.4, I.C.5). The College engages with online students in a fair and open manner with the goal of success and learning as the prime objectives. (See Standard I.C in the main report for further information.)

## **Standard II.A: Instructional Programs**

### Evidence of Meeting the Standard

All of the programs offered in distance learning are connected to fields of study approved and offered at Honolulu CC. They meet the same rigor, approval processes, and review as all courses. As noted earlier, DE courses go through a separate approval process through the Committee on Programs and Curricular (CPC) to demonstrate their appropriateness for students and the College mission. That process is captured in Quali CM. All DE courses must receive a separate certification from the College's Distance Advisory Committee (DEAC), a process requiring instructors to undergo a DE Faculty Orientation, commit to appropriate student interaction and assessment that exceeds department-level assessment. Furthermore, Honolulu CC policy on review of

established programs (I.B.8) stipulates that each instructional and non-instructional program shall undergo a comprehensive review at least once every five years.

Each semester, the DE Coordinator provides a mandatory faculty orientation for people teaching DE courses (DE.9, DE.10).

Academic departments and programs review all courses within the required five-year period, although the Annual Review of Program Data (ARPD) often dictates review happening more frequently than the required time period of five years. The evaluation of program health, especially as it relates to student achievement and program completion, occurs in the ARPD (I.B.4). *(See Standard II.A in the main report for more on course assessment.)*

Current and approved student learning outcomes (SLO) for all courses, including DE classes, are maintained on the electronic curriculum management system Quali CM. Instructors conduct SLO assessment for all courses, whether face-to-face or online, and results and analyses of courses are discussed departmentally. The College does not offer correspondence education.

### *Rigor in Instructional Delivery*

Because each online course is reviewed as comparable to its face-to-face counterpart, distance learners can be assured the same articulation rights and degree and certificate applicability as every course in the College's catalog (Eligibility Requirement 9, Educational Programs Compliant). The College considers any online course the same as the face-to-face in content and expectations—only the delivery is distinct. *(II.A.1)*.

The College goes to great lengths to ensure that all faculty, full-and part-time, have access to quality professional development and departmental participation. This participation results in the assurance of the implementation of academic and professional standards, subject matter currency, and practices that result in greater student success. Course outlines and syllabi detail the expectations of the course, regardless of delivery. Division chairs maintain syllabi for all courses, but the course descriptions and SLO for each course are maintained in the electronic curriculum software Quali CM. In order to assure that faculty have the opportunity to expand their practices and approaches, all part-time and full-time faculty are invited to participate in the opportunities through the Faculty Development Committee. *(III.A.14, II.A.2)*.

In conjunction with the Faculty Development Committee, the DE Coordinator offers a number of workshops on technical skills for instructors. The workshops are open to all faculty and staff and cover a wide-range of topics.

- Create Audio Lectures & Narrated PowerPoint Slides - Spring 2014
- Laulima 101 - Fall 2014
- Laulima Gradebook Techniques - Fall 2014
- Laulima Strategies to Promote Student Engagement - Spring 2015
- Cloud Computing - Spring 2015
- Classroom to DE Conversion - Fall 2015
- PDF Studio Pro - Fall 2015
- Vizia - Fall 2016
- Laulima 101 - Fall 2016
- Google Forms - Spring 2017
- Laulima Meetings Tool - Spring 2018
- Demystifying the DE Application Process - Spring 2018

Faculty also have access to a distance education faculty handbook that can be used for reference ([DE.15](#)).

As with face-to-face classes, course syllabi contain student learning outcomes. The ARPD process also require programs to assess courses and teaching. Student learning outcomes for distance education are exactly the same as those for the parallel face-to-face iteration of that course (Eligibility Requirement 10, Academic Credit Compliant).

All instructors are required to provide students with syllabi. Syllabi are reviewed regularly by division chairs or department heads to ensure that the most current SLOs are included. Online instructors distribute syllabi through the College's learning management system Laulima. (*II.A.3*).

In Spring 2015, in an effort to respond to student concerns, the DE Coordinator undertook a project to determine what tools in the College's learning management system (Laulima) were being used across all DE courses. After a rigorous examination of DE courses offered by the College, the DE Coordinator in consultation with DEAC concluded that the most necessary three tools for student success were Announcements, Syllabus, and Gradebook. Subsequently, DE instructors at the College are now required to use these three standard tools in Laulima. New DE instructors are informed by the DE Coordinator of this requirement and receive training when necessary. All DE instructors are reminded of this requirement at the bi-annual DE Faculty Orientation.

*The College's response to Standards II.A.4 and II.A.5 for distance education is the same as noted for face-to-face instruction and not discussed here.*

In order to assure that online offerings will provide students with ample opportunity to complete requirements, the deans and division chairs coordinate DE offerings with the goal of offering courses most useful to students completing requirements quickly. However, since Division Chairs schedule classes independently, the College recognizes that it may be necessary to increase the involvement of the DE Coordinator and DEAC in constructing offerings of DE classes that are more strategically aimed at student success and specific degree completion. It may be necessary to include a more active role in scheduling in the next five-year DE Strategic Plan currently being prepared by the DE Coordinator (DE.3).

Specifically to address the needs of online learners, the DE Coordinator works with the College's Disability Specialist to ensure that accessibility information is disseminated widely. Any necessary training on accessibility is organized by the DE Coordinator. Accessibility information and training are critical to ensure that the College is ADA compliant for distance education courses. Disability services work with self-identified students on a one-to-one basis on individualized access services. Guidelines regarding ADA compliance are integrated into training for all faculty teaching distance education courses. The DE Coordinator is also willing to make necessary accommodations in resolving issues with accessibility.

In addition to the College's learning management system, Lulima, the College incorporates the UH support software My Success to increase student success. My Success allows instructors to raise flags about concerns, and the College Achievement and Retention Experience (CARE) will contact the student about the concern raised by the instructor. The College DE Coordinator conducted a pilot program with use of the third party tool Remind.com, but this tool did not achieve the desired results because students resisted using it. The College plans to address this issue. (See QFE 2, *Enhanced Support for Distance Education Students*).

The DE website for students features a special section of orientation for Prospective DE to guide students step-by-step through the process of achieving success as a DE student (DE.13)

*The College's response to Standards II.A.8 through II.A.15 is the same for distance education as noted for face-to-face instruction and not discussed here.*

As previously described in Standard I of the Distance Education Supplement, the College has made an ongoing commitment to ensure that the quality of instructional

programs is continuously evaluated and improved. The review process described earlier illustrates the College's commitment to evaluating the efficacy of distance education courses offerings. These endeavors showed that the College needs to reduce the success gap between students in distance education courses and students in face-to-face courses. In addressing this area, the College has discontinued courses offered in the modality of television.

More importantly, Honolulu CC policy on Distance Education requires the college take formal action whenever a twelve-point difference exists between success rates for distance education and face-to-face courses for consecutive semesters (DE.11). The systemic evaluation of outcomes related to individual courses is sustained through the College's process of ARPD, assessment by the division or department, and additional assessment by the Distance Education Advisory Committee (DEAC). (II.A.16).

The College also assures the integrity of distance education instruction through an authentication process through the College's learning management system, Lulima. The authentication process maps to the College's LDAP directory requiring students to input unique user names and passwords. (Policy on Distance Education Compliance. See Checklist for Compliance with Commission Policies and Federal Regulations.)

The DE Coordinator conducts a DE student survey bi-annually to examine particular factors that may impact how well we implement our DE course offerings as well as student success. Some factors that have been examined include students' self-assessment of their technology skills, students' perceptions of proctored exams, and students' perception of their instructor's communication with them over the semester. Results of these surveys are disseminated on the DE page of the College intranet as well as in the DE Faculty Orientation presentations.

### Analysis and Evaluation

The College meets the distance education component of this standard. The College's distance education programs are conducted at levels of quality and rigor appropriate for higher education and on par with the face-to-face and other learning formats and venues. (II.A.1, II.A.2, II.A.3, II.A.4). The institution assesses its educational quality through methods accepted in higher education, makes the results of its distance education programs available to the public as part of its regular communication, reports, and plans. (II.A.5, II.A.6, II.A.7). The College uses the results to improve student learning, achievement, educational quality, and institutional effectiveness. (II.A.8, II.A.9, II.A.10). The College defines and incorporates into all of its programs larger institutional learning and distance education programs are mapped from course

to program to institutional level learning. *(II.A.11)* (Eligibility Requirement 11, Student Learning and Achievement Compliant). Degree programs have a substantial component of general education, and distance education courses in general education are evaluated in the same manner as traditional face-to-face methods. *(II.A.12)*. The major component of degrees also includes distance education courses that are evaluated for student learning and achievement. *(II.A.13)*. Career technical education courses offered as DE are designed to show skill competency and maximize success for licensure passage and employment. *(II.A.14)*. (See Standard II.A in the main report for further information.)

## **Standard II.B: Library and Learning Support Services**

### Evidence of Meeting the Standard

To ensure that additional support is available for online learners and off-campus locations, the library has a designated Distance Education (DE) librarian *(II.B.6)*. The Distance Education Advisory Committee includes a librarian among its members in order to integrate library services to meet the needs of DE students and instructors. At the beginning of every semester, the DE faculty are required to attend a campus DE meeting at which they are reminded of the library's resources and services and given the opportunity to collaborate with the DE librarian to meet their needs and the needs of their students. In addition to the library's website, an online guide is available to direct DE students, faculty, and staff to services and resources. *(II.B.6)*. The DE guide also provides contact information for the library, the DE librarian, as well as other DE support services available on the Honolulu CC campus and through the UH System. Students, faculty, and staff involved with DE courses and at off-site locations are encouraged to call or email the library or DE librarian with any questions or needs that they might have. All students, DE or in face-to-face courses, can find the contact information for the library on the library homepage. *(II.B.1)*.

The library provides access to an ample variety of quality resources in the physical and electronic collections that support all Liberal Arts and Career and Technical Education (CTE) programs offered by the college. The library's physical collection of materials includes but is not limited to books, reserve textbooks, periodicals, DVDs, and other multimedia. Access to the library's physical collection is during business hours, but the library's vast online collection, which includes access to Films on Demand, is available 24 hours a day to all students, faculty, and staff through remote login via the library's website. Electronic library materials are available as long as the patron has access to a

device with Internet access, is currently affiliated with Honolulu CC, and has less than \$10 in library fines.

The library's online resources cover all disciplines offered on campus, at our off-site locations, and online. Patrons have access to subscribed databases that cover a variety of subject areas and types of resources, such as ebooks, articles, streaming films, and images. Some databases are individually purchased by the Honolulu CC library and others are purchased through the Hawai'i Library Consortium or the UH Libraries. Additionally, and not included in the statistics, are links to open access or free databases such as Bishop Museum Publications, Directory of Open Access Journals, and 'Ulu'ulu: The Henry Ku'ualoha Giugni Moving Image Archive of Hawai'i. The library also uses LibGuides, which are online guides, to direct students to the physical and online collections as well as credible sources available on the Internet. If students have trouble connecting to the electronic resources, they are directed to call or email the library. From the library's home page, the library provides links to other UH System Libraries and the Hawai'i State Public Library System home pages so that students can inquire about access to resources and services. (II.B.5). (Eligibility Requirement 17, Information and Learning Support Services).

DE students also participate in the annual Library User Survey (II.B.30, II.B.31, II.B.32).

The Writing Center provides walk-in and appointment tutoring Monday through Thursday. Students can also book appointments on Friday. Online services are available by appointment for students in distance education and other students. For DE students who are unable to visit campus, these students can work with tutors online outside of the Writing Center's normal operating hours.

The Quality Focus Essay details the Writing Center's strategies to increase effectiveness in serving DE students. (See *QFE-2 Enhanced Distance Education Support Initiative*.)

Students can currently use Brainfuse, a free online tutorial service for community college students. Students may access Brainfuse through the College DE website. Brainfuse offers online tutoring 24 hours a day for a number of subjects below, including Math, Writing, Reading, Nursing, Biology, Chemistry, Physics, Economics, Statistics, History, among others.

Ongoing instruction in relation to educational technology takes place through technical help and computer access. Distance education students are informed about physical campus resources and the variety of computers, printers and other equipment available

through the DE website. Computer services are sufficient in providing a breath of computer access with current, updated software to the student body at Honolulu CC.

The CARE program provides a variety of learning support to incoming students and those at risk through study-skills workshops and peer coaching. *(II.B.2.)* Career services on campus offers career counseling and assistance in selecting the correct major for enrolled students as well as graduates of the college. The DE Coordinator provides training and support for DE students and faculty informed by the best practices for distance learning courses.

The Quality Focus Essay details the strategies that CARE will implement in order to increase effectiveness in serving DE students. *(See QFE-2 Enhanced Distance Education Support Initiative.)*

### Analysis and Evaluation

The College meets the distance education component of this standard. The College supports student learning and achievement in the online environment by providing library and other learning support services to students that provide solid access to the curriculum and supports course and program success. *(II.B.1)*. These services are sufficient in quantity, currency, depth, and variety to support educational programs for distance education through the use of the College Library, tutoring services, and access to support services. *(II.B.2)*. *(See Standard II.B in the main report for further information.)* In the context of the online education, the college will conduct directed study on how to better provide library and learning support services to students in exclusively online environment. *(See QFE 2, Enhanced Support for Distance Education Students)*.

## **Standard II.C: Student Support Services**

### Evidence of Meeting the Standard

All students, including those enrolled in distance education, can access the needed services online through the College website on the page *Services for Students*. This page serves as one-stop shop for all student needs, either face-to-face or students in distance education. For example, on the College website on the Services for Students page, under the heading *Getting Started*, students are shown step-by-step how to apply and register for classes as well as including the portal for Academic Advising/Counseling. On the same page, under the heading *Paying for College*, there is a section on how to apply for

financial aid, most of which is web-based. Additionally, the Disability Services department is available to self-identified students with disabilities to ensure equal access.

The bulk of counseling services, however, can be accessed through the Services for Students page on the College website or by using the student portal for the University of Hawaii: MyUH. The following services are provided:

- Steps to registration (a step-by-step guide that helps students navigate the application and registration processes).
- Educational planning which allows students to begin the process of creating a comprehensive educational plan and checking their progress .
- Career planning, which helps students explore different industries to decide on an appropriate career path.
- Transfer planning, which informs students about transfer agreements and provides information on associate degrees for transfer.
- Graduation planning from which students can apply electronically for graduation.

Although the College does not have online counseling, students can make appointments for counseling through the College's website. Additionally, as noted earlier, since many online students are also enrolled in face-to-face courses, this population of students is perhaps more informed about the counseling services available at the campus. *(II.C.1)*.

*The College's response to Standards II.C.2 through II.C.4 is the same for distance education as noted for face-to-face instruction and not discussed here.*

Faculty in Student Services have contributed to the development of the *Services for Students* page on the College website. They have also been at the forefront of the implementation of an electronic educational resource *MySuccess* ideal for use with distance education students across the UH system. The program is accessible to students online and can be viewed from either a computer or hand held device.

Faculty and staff in Student Services have received ongoing training on maximizing use of the College website as well as *MySuccess*. As such, the faculty and staff are working to integrate this program as a key component of services provided to all students seeking online counseling services.

Although the College has all of its counseling services available for DE students, these students may be less aware of the services available for support them in their courses

and in their college experience than those taking class on campus. *(II.C.5)*. The Quality Focus Essay details the strategies that counseling will implement in order to increase effectiveness in serving DE students. *(See QFE-2 Enhanced Distance Education Support Initiative.)*

*The College's response to Standards II.C.6 through II.C.8 is the same for distance education as noted for face-to-face instruction and not discussed here.*

### Analysis and Evaluation

The College meets the distance education component of the standards. Evaluation of the student services programs occurs through the Annual Review of Program Data (ARPD) and College initiatives during which the College examines effectiveness for distance education students. *(II.C.1)*. Outcomes assessments in student services areas consider distance education offerings and services for effectiveness. Access to scheduling counseling and other services are offered to students through the College's website. *(II.C.2, II.C.3, II.C.4, II.C.5)*. The Quality Focus Essay details the strategies that counseling will implement in order to increase effectiveness in serving DE students. *(See Standard II.C in the main report for further information.)* The college will conduct focused study on other out of classroom resources that will help students for within course achievement and persistence and retention towards award completion. *(See QFE 2, Enhanced Support for Distance Education Students)*.

## **Standard III.A: Human Resources**

### Evidence of Meeting the Standard

All faculty at the College must meet the minimum discipline mastery as stipulated by Human Resources for the University of Hawaii. In order to teach distance education (DE) courses, faculty also undergo orientation provided by the DE Coordinator. *(III.A.1, III.A.2)*. As part of receiving DEAC certification, instructors are required to demonstrate the specific means of assessing student learning outcomes.

All DE Faculty participate in the DE Faculty Orientation every fall and spring semester. The orientation covers various topics from discussing DE-related metrics on enrollment, withdrawal, and success rates to talking about student survey results on our DE course offerings. In addition to this, we also remind DE Faculty of the importance of course

assessment and provide tips on issues like increasing communication and interactivity with their students. Presentations for DE Faculty Orientations are available for faculty on the DE webpage (DE.2).

In addition, the DE Coordinator individually trains any faculty member, whether they teach a DE course or not, on how to utilize various tools for the course management system, Lulima, to perform tasks such as posting the syllabus, creating password-protected exams, utilizing the grade book, and creating modules and lessons. The DE Coordinator also provides supplemental material for DE instructors to distribute to their students that covers the breadth and depth of technology and student support resources available to all Honolulu CC students. In addition to DE faculty receiving personal instruction from the DE Coordinator, the Faculty Development webpage has additional information on Lulima as well as other material important for faculty success in distance education (DE.2).

*The College's response to Standards III.A.3 and III.A.4 is the same for distance education as for face-to-face instruction and not discussed here.*

Faculty teaching online are evaluated as part of the regular process for evaluation. Students complete course evaluations using online software for the University of Hawaii: ecafe.com. For lecturers teaching DE courses, completed student evaluations are examined by their respective Division Chairs. For full-time faculty teaching DE courses, student evaluations are included as part of the regular review probationary faculty and faculty applying for promotion. This process is more fully addressed in III.A of the College's Self-Evaluation report. Furthermore, the DE coordinator audits courses to see that they are fulfilling the requirements stipulated in the DE certification process. Additionally, Honolulu CC policy on Distance Education establishes that "DE courses must be peer-reviewed by other faculty members every two years" (DE.11). These evaluations ensure that the quality and rigor are supported in online courses and that instructors receive feedback from peers about how to improve. (III.A.5).

*The College's response to Standards III.A.6 through III.A.13 and III.A.15 is the same as noted for face-to-face instruction and not discussed here.*

In order to assure that faculty have the opportunity to expand their practices and approaches, all part- and full-time faculty are invited to participate in the many opportunities through Faculty Development, especially the resources on the Faculty Development DE webpage (DE.2).

This web page includes a plethora of resources developed by the College, the University of Hawaii System as well as substantial links to national DE resources.

While there is information concerning professional development specifically related to developing DE courses on the Faculty Development DE web page, the more general Faculty Development page features offerings that address engagement, equity, and motivation are also applicable to online learning environments, and instructors who participate in these sessions can further discuss the applicability to online learning. Also, DEAC meetings may address such topics in meetings, and the DE Coordinator may address such topics in training sessions. (III.A.14).

### Analysis and Evaluation

Honolulu CC meets the distance education component of the standard. Faculty and support staff are hired based in part on experience in distance education training. (III.A.1, III.A.2). Additionally the College provides all personnel with appropriate opportunities for continued professional development, consistent with the College mission and based on evolving pedagogy, technology, and learning needs. The College evaluates professional development programs and uses the results of these evaluations as the basis for improvement. (III.A.14).

### **Standard III.B: Physical Resources**

*The College's response to Standard III.B is the same for distance education as for face-to-face instruction and not discussed here.*

### **Standard III.C: Technology Resources**

#### Evidence of Meeting the Standard

The College's Information Technology Services (ITS) and the Distance Education (DE) program work cooperatively to ensure that students and faculty are well served. Online course content is provided by the course management system, Lulima. This includes a help desk that provides phone and email support seven days a week from 7:00am – 11:00pm. Help desk provided from the UH-Mānoa University campus (UH ITS) to all students and faculty using Lulima. Specific problems related to Honolulu CC courses and faculty are forwarded to Honolulu CC ITS with the UH ITS helpdesk primarily communicating regarding student concerns with the extended hours help desk. (See Standard III.C.1).

The Honolulu CC Distance Education Strategic Plan 2013-2018 outlines the following seven action items:

- 1) Network upgrade including the installation of a new, student focused wireless network (completed).
- 2) Core network redundancy and Unified Threat Management (completed).
- 3) Conversion to Active Directory for network policy management (completed).
- 4) Student Computer Lab Virtualization (completed).
- 5) Campus Virtual Data Center and VDI for faculty and staff (completed).
- 6) Provisioning of Microsoft Office 365 for Education to faculty and students (completed).
- 7) Campus based multimedia and Secure Storage (completed).

The Honolulu Community ITS (HON ITS) Strategic Plan 2016-2021 has several items that relate directly to distance education. One of the more important goals involves “assisting faculty with integration of information technology.” Another ongoing goal is to “extend Virtual Desktops to faculty/staff off campus for content development and collaboration.” Furthermore, the HON ITS strategic goal of enabling course content to be online is being successfully implemented with the technology currently available to faculty as well as the necessary training to help faculty use the technology available. (III.C.2, III.C.3). The goal is outlined in the HON ITS Strategic Plan 2016-2021 (III.C.6).

Honolulu CC provides cloud applications, collaboration, and storage, communication for all students. This can be linked to Lulima by faculty for students. In addition full database and collaborative applications with unlimited storage are available to faculty for course delivery through Honolulu CC’s cloud services. In addition, these services provide reliability to support campus operations. The College provides an appropriate system for reliability and emergency backup. (III.C.1, III.C.3).

The College’s ITS works with faculty to provide online course content, regardless of the modality, and strives to provide students with easy access to the information necessary for success. For example, in 2016 Honolulu CC ITS installed and began training faculty in a new Faculty Content Development Studio. This studio provides both audio and video technology for narration of presentation slides and studio video production of course lectures. Audio recording is linked to Honolulu CC Office 365 PowerPoint Mix cloud services to provide universal client delivery of presentation with interactive component and assessment quizzes via the Microsoft Mix site. Regular web streaming via HTML 5 is also available as is upload to Lulima (Sakai) for the university system

LMS. Video lecture studio production utilized virtual studio sets and is almost completely automated for faculty use. The classroom sets include screens for presentation materials, e.g, PowerPoint with live annotation as well as white board annotation and camera control via simple tablet icons. HON ITS currently operates this studio and provides the training and support for faculty who wish to use it and is one of the goals of its strategic plan (III.C.6).

Additionally, the DE Coordinator provides regular individual training to faculty and students on the learning management system as well as other technological aids from word processing to third party tools (apps) in order to maximize success in distance education. (III.4).

The technological backbone of any Distance Education (DE) program is the Internet. HON ITS has upgraded the campus networks, both wired and wireless, to support high-speed Internet connectivity to Lulima, the learning management system used to deliver online courses as well as instructional material for face-to-face courses. Lulima is an open-source learning management system and is utilized by all 10 campuses in the University of Hawaii system. It is centrally supported from UH ITS. The Lulima support team responds within 24-hours to troubleshooting requests from any UH student, faculty, or staff member. (III.C.3).

As with all campuses in the University of Hawaii system, the College follows its policy on Distance Education and Online Learning (DE.1). This policy states that “[w]hen deploying technologies to support distance learning, the University strives to select and invest in technologies that have broad applicability to support campus-based learners and to general collaboration within academic communities as well.” (III.C.5).

*The College’s additional responses to Standards III.C.4 and III.C.5 are the same for distance education as for face-to-face instruction and not discussed here.*

### Analysis and Evaluation

Honolulu CC meets the distance education component of this standard. The College provides platforms and systems that provide the most fluid learning experience for online students. (III.C.1, III.C.2). Student information is kept secure and safe, and backup systems ensure that critical student data are protected and not subject to loss. Student confidential information is protected. (III.C.3, III.C.4).

## **Standard III.D: Financial Resources**

### Evidence of Meeting the Standard

With respect to planning and resource allocation, the Distance Education (DE) program participates in the College's Budget processes to ensure that the needs of the DE program are incorporated into budget development and planning. The majority of distance education infrastructure costs are disbursed throughout various College budgets. For example, the budgets for academic divisions ~~include~~ are used to support the faculty costs for instruction and the budget for Academic Support pays for resources for student support.

Since 2012, the College has had a full-time DE Coordinator that is a faculty position.

The College is currently recruiting for a full-time Instructional Designer faculty position. The Instructional Designer will be called the Educational Technology (ET) Coordinator. The ET Coordinator will provide campus-wide support to classes and programs to ensure effective use of educational technologies to enhance student achievement. The ET Coordinator will work directly with faculty, staff, and programs on the design, specification, and requests for appropriate technology. The ET Coordinator will provide the additional one-on-one, small and large group training and support for all faculty, DE and face-to-face classes that will allow the College to grow its DE program. Moreover the ET Coordinator will monitor the effectiveness of educational technologies in the program/curriculum/class by analyzing assessment results and observing educational technology in use. (III.D.1).

The College's annual budgeting process allows for the application and review of new allocations for program improvements. Examples of current proposals include proposal from Academic Support to purchase laptop computers in order to loan to students to work on assignments for both DE classes and face-to-face classes, access Lualima and for use of other educational platforms such as STAR and online tutoring services. (III.D.4).

*The College's additional responses to Standards III.D.2 through III.D.16 are the same for distance education as noted for face-to-face instruction and not discussed here.*

### Analysis and Evaluation

Honolulu CC meets the distance education component of the standard. Sufficient financial resources are purposed for the role of distance education at the College. (III.D.1, III.D.2, III.D.3). New allocations are linked to program review and prioritized based on the College's goals and mission. Funding is allocated for supporting storage,

software, infrastructure access, and the maintenance and upgrade of resources. (III.D.4, III.D.5).

### **Standard IV.A: Decision Making Roles and Procedures**

Distance education at the College is overseen by the Distance Education Advisory Committee (DEAC), Faculty Senate Executive Committee (FSEC), Committee on Programs and Curricula (CPC), DE Coordinator, Disability Specialist, and Academic Deans. The College has developed a robust infrastructure of support, innovation, and decision-making that works hard to improve student achievement. Each month the Distance Education Advisory Committee, with representation from faculty, staff, and administration, meets to discuss, decide, and implement programmatic improvements and continuously nurture an aspirational environment for learning. Minutes from meetings illustrate the evolution of this infrastructure and document the College's efforts to strengthen distance education. As outlined in the DEAC charter, the purpose for the committee is to "provide a mechanism for maintaining a coordinated effort of the various campus units affecting the delivery of distance education offerings including instruction, assessment, student service, technology support, and faculty development." (IV.A.1, IV.A.5).

The College's willingness to have a faculty DE Coordinator and a faculty Educational Technology Coordinator demonstrates the commitment of resources for success in distance education as well as demonstrating that the College is committed to providing the necessary training, use of online tools, and increased student support. The identification of these needs are processed using evidence and representative dialog before implementation. (IV.A.1, IV.A.2, IV.A.5).

*The College's response to Standards IV.A.3 through IV.A.7 is the same for distance education as noted for face-to-face instruction and not discussed here.*

*The College's response to Standards IV.B and IV.C is the same for distance education as noted for face-to-face instruction and not discussed here.*

### Analysis and Evaluation

Honolulu CC meets the distance education component of this standard. The role of distance education at the College is overseen by a Distance Education Advisory Committee with membership from all constituent groups. (IV.A.1, IV.A.2). Leadership is provided by the Distance Education Coordinator. Distance education is a relevant topic

for faculty, administrative, and classified dialog. Student input on distance education is gathered directly from evidence such as surveys. Student input into governance decisions impacting Distance Education is carried out by student representatives on the relevant governance bodies.

## Changes and Plans Arising Out of the Self-Evaluation

Changes Arising Out of the Self-Evaluation Process				
<i>Change, Improvement, and Innovation</i>	<i>Standard</i>	<i>College Leads</i>	<i>Timeline</i>	<i>Outcome</i>
Revised mission statement	I.A.1	Planning Council	Spring 2017	Mission better focuses on student learning and achievement and includes core values
Increase international students	I.A.2	Administration, Faculty, Student Services	Spring 2019 and ongoing	Higher capture rates of college going students from underserved groups
Increase enrollment of Native Hawaiian and other students from underserved populations	I.A.2 I.B.6	Administration, Outreach, Hulili Ke Kukui, Po'i Na Naru, Faculty, Student Services	Spring 2019 and ongoing	Higher capture rates of college going students from underserved groups
Strengthened sustainability efforts at the College	I.B.9 III.B.4	Sustainability coordinator	Spring 2018 (ongoing)	Increase the awareness and action about sustainability and connection to the strategic plan
Increase culture of assessment at the College	I.B.1-4 I.B.5 II.A.3 II.A.4	PPIR, Assessment Task Force, CCIE, CSSC, Administration	Spring 2019 (ongoing)	Elevate the level of discussion and engagement in data for decision-making
Improved alignment of general education and ILO outcomes	I.B.5, II.A.1	General Education Committee, CPC	Spring 2018	Improved connection of the role GE learning plays in program and certificate completion
Implemented Kualii Curriculum Management system	II.A.2	Committee on Programs and Curricula	Fall 2016	Moved curriculum process online for better record keeping and curriculum management
Consolidated SLO assessment documentation	II.A.3	Institutional Assessment Specialist	Fall 2017	Ensured documentation of all courses SLO assessment
Standardize format of SLO assessment reporting using assessment database	II.A.3	Institutional Assessment Specialist, CPC, VCAA, division chairs,	Spring 2019	More comprehensive assessment of courses and programs

Implement web database for all course syllabi	II.A.3	VCAA, CPC, division chairs	Spring 2019	Allow students to view syllabi for any course
Designed program to attract returning students	II.A.6	Counselors, Deans, VCAA	Spring 2018 (ongoing)	Unable to recruit enough students so rethinking approach
Improved focus on student pathways	II.C.1 II.C.5	Counselors, Deans, VCAA	Spring 2018	Coordinated discussions about discipline areas to move students to transfer and degree completion
Policy on policy review established	IV.B.5	Chancellor	Spring 2018	More systematic review of policies and procedures

## Quality Focus Essays

### *Introduction*

The Quality Focus Essay captures two key areas that Honolulu CC has identified for further study and innovation to improve student learning and achievement. As part of the self-evaluation process, college leaders, and Accreditation Steering Committee examined the institution's programs and services to identify areas where there is possibility for change, development, expansion and institutionalization of existing efforts that are producing positive results.

At the conclusion of the dialog and reflection on the evidence of meeting the standards, the accreditation team identified the following areas for a multi-year focus to improve student learning and achievement:

- Purposeful Engagement for Student Success
- Enhanced Support for Distance Education Students

The areas of focus were vetted with the college constituent group leaders for input and recommendations for action. The college supported a mindset of continuous improvement when drafting the action projects. The projects reflect a realistic review of present conditions at the college and a prioritized set of steps for improvement. All outcomes measuring progress on the projects were tailored to be observable and measurable. To the maximum extent possible, the college team connected the action projects to goals and outcomes that are part of the college strategic plan. In this way, progress on the areas of focus will also provide actionable evidence on progress on the college mission. The goal of the QFE is to discover good educational practices and identify areas in which the college can improve its programs and services for students.

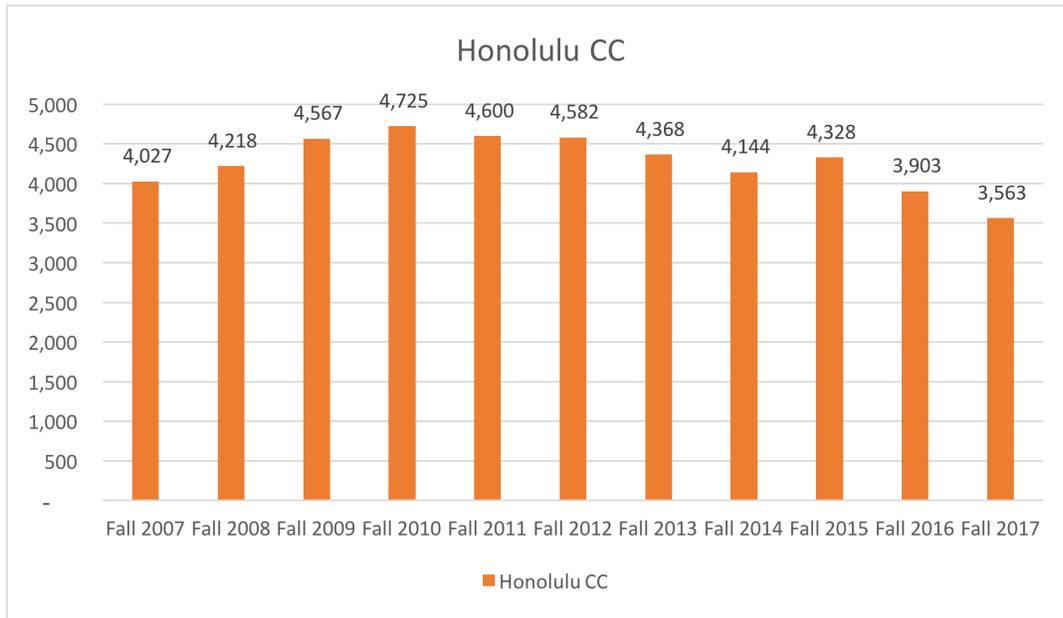

## **QFE 1 – Purposeful Engagement for Student Success**

### *Introduction*

Research shows that greater student engagement in their college experiences both within and outside of the classroom yield greater likelihood of reaching educational objectives. In addition, greater connection by employees in a learning organization increases self-efficacy and participation in institutional mission and purpose.

This connection of engagement with retention and persistence to goal attainment serves as the foundation for the institution's first action project. Honolulu CC already has participated in several national initiatives designed to increase success by students in obtaining post-secondary education credentials, all with the goal to contribute to the University of Hawaii's Hawaii Graduation Initiative and to reach our state's "55 by '25" goal, in which 55% of Hawaii's working age adults would have a 2 or 4-year college degree by the year 2025. For example, Honolulu CC first piloted student course registration through the degree audit system, STAR, in a proactive effort to have students register more easily. Honolulu CC also revamped their New Student Registration and Orientation to closely tie course-taking to work and career relevance. Although Honolulu CC has experienced tremendous success in meeting success goals in student graduation numbers and rates, including in disaggregated populations such as in Native Hawaiian students, STEM students, and transfer students, the college has also seen declining enrollment - both in new students entering the college as well as in continuing students seeking to persist in their studies.

Due in large part to the nature of the types of degrees and curriculum offered by the campus, Honolulu CC's enrollment has fluctuated over the past ten year period, directly impacted by the state's economic and employment trends. As Hawaii's economy has improved, more students and potential students have chosen to join the workforce instead of remaining in college.

Moreover, Honolulu CC has been challenged by low fall-to-fall persistence rates with programs ranging from 14% to 40% (average) to 93%. For some students, the low persistence rate indicates the opportunity for living wage jobs even after just one or two semesters in a career or technical field, such as in the sheet metal industry. For other students, however, leaving college without an industry-recognized credential or degree can be very detrimental, saddling them with tuition debt without the opportunity for economic mobility. Thus, in the completion pathway, clear goal identification and measured progress in the face of barriers are key areas of interest for the college.

### *The Role of Student Achievement Data*

The first action project has been informed by the progress and completion data reported in the student achievement data reported in the ISER as well as the institution set standards discussion. (See *Introduction, I.B.3, ER 11*). It is informed by the student success pathway initiative, which the State of Hawaii has adopted as ways to accelerate students towards attainment of their educational objectives.

Many of the students who attend Honolulu CC are first generation and may not be college ready. The focus on not just engagement, but purposeful engagement will increase success in the key momentum points of unit attainment, completion of gateway courses, and progress on general education requirements. In addition, population trends and demographics in the Honolulu service area are exhibiting a general decline in enrollment over time. Therefore, the successful capture of college-bound students and supporting their progress in the educational pathway are very important. As a result, the

focus of the work of this action project will address the importance of the retention of students with a subsequent focus toward degree/certificate attainment and finally program completion.

**Therefore, the desired goal of QFE #1 is to increase student persistence and success through *purposeful engagement* of faculty, staff, administrators, and students.**

The college recognizes the need to be a “student-ready college” in order to consistently enable all students to obtain a post-secondary education credential. As a result, Honolulu CC embarked on a pilot initiative in 2016 called Integrated Student Support (ISS) through *Achieving the Dream* to engage both teaching faculty as well as student services and academic support professionals in identifying students who could benefit from wrap-around support services in order to improve their retention and success in college. The initiative uses technology called Starfish to identify, flag and track students through the services provided to them. It also calls for consistent and involved engagement of all personnel throughout the college. Honolulu CC is now ready to provide wide-scale collective and purposeful engagement by all parts of the college to improve student success.

The *Honolulu CC Purposeful Engagement Model* is an extension of the ISS initiative - one that opens and integrates communication and referrals by and to teaching faculty, student affairs staff, and academic support staff in order to holistically address the academic, emotional, financial, and career needs of students with the goal to increase course, program, and degree completion. It will include curricular and degree development as well ([I.A.3](#), [I.B.44](#)).

**Goal #1:** Develop plans to document and increase faculty-to-student engagement strategies in both curriculum content and pedagogy

**Steps to be Taken**

- Inventory and document current student engagement strategies by faculty
- Create a comprehensive orientation for new faculty focused on Hon CC’s motto of being “student centered, student focused” philosophy that provides professional development on student engagement, including instructional designs and non-instructional support such as the ISS approach
- Develop new opportunities for professional development for current teaching faculty to learn to incorporate topics and content that purposefully engage students, which could include areas such as

- Culture-based education, Native Hawaiian principles such as those delivered through the Ho'ala Hou Title III grant (II.C.42)
- Sustainability (I.A.12)(Intro.18)
- Science research (Intro.19)
- Provide and promote successful teaching strategies for teaching faculty identified through assessment results and through research to promote retention. These strategies can help faculty members customize curricula to accommodate individual differences and learning preferences
- Provide training opportunities for lecturers to become engaged in the numerous campus initiatives that promote student success, including the ISS model and standardized use of the StarFish/MySuccess technology tool
- Cultivate links to community partners to foster service learning, internships and job placement opportunities related to certificate and credentialing options in these curricular focus areas
- Explore innovative practices to promote faculty-to-student relationship-building and early communication and feedback
- Actively promote use of the Starfish/MySuccess technology tool by all instructional and non-instructional faculty to identify and track student needs
- Share output and outcome data regularly with the focus on examining the impact of interventions and campus changes on various student populations. Encourage whole campus dialog about impacts and critically examine any disparate impacts

**Goal #2:** Increase strategic and integrated communication amongst and beyond student affairs and academic support professionals to provide comprehensive services to students

**Step to be Taken**

- Expand usage in Starfish/MySuccess technology tool to all student services offices so that instructional faculty can refer students to an array of support services (such as counseling/advising, retention services, library support services, career services, tutoring) as needed
- Explore opportunities for better and regular face-to-face and electronic communication amongst instructional and non-instructional faculty to discuss needs of specific students and to provide points of improvement

- Align assignments and teams by student or by program area to facilitate cross area relationships, sharing of information and a united approach to servicing students. This will assist in the management of in-class servicing, communication regarding service referrals and the overall understanding by students of supports as part of a holistic college experience
- Share output and outcome data regularly with the focus on examining the impact of interventions and campus changes on various student populations. Encourage whole campus dialog about impacts and critically examine any disparate impacts

**Goal #3:** Engage students early and continuously in academic, extra-curricular, socio-emotional, and work-based learning in and around the campus. Remove barriers to student entry and retention to promote learning and engagement.

### **Steps to be Taken**

- Continue existence of the newly formed Onboarding Committee to review and suggest improvements to existing practices as well as initiate new onboarding practices that promote student enrollment and persistence. These include the review and improvement of
  - the online application and application process
  - the medical vaccination policy
  - the orientation content and delivery
  - the new student registration content, timing, and delivery
  - the communication of math and English placement policies
- Review and analyze disaggregated populations of students (ex: returning adult students, Pacific Islanders, those requiring remedial/developmental education, etc.) who may need extra support services and develop targeted interventions
- Work with current students to explore new solutions to persistent barriers to student success, such as parking constraints, training for online course tools, testing center policies, etc.
- Increase student participation in leadership and extra-curricular clubs and organizations on campus
- Increase student employment on campus
- Provide formal opportunities for students who have successfully transferred from Honolulu CC to a baccalaureate institution to return and mentor current Honolulu CC students

- Deploy student engagement leaders to introduce students to a variety of campus services
- Explore use of non-credit and summer outreach programs as intentional recruitment and retention opportunities

**Goal #4:** Delete, revise and add infrastructure and policies with the goal to support student success via the purposeful engagement initiatives

**Steps to be Taken**

- Institute policy that has been proven to engage students based on research and best practice, such as mandating entry-level English and mathematics in the first year and completion of 30 credits in one year.
- Review real-time student-level data and predictive analytics to proactively reach out to students at high risk for not being retained
- Regularly review current communication and onboarding processes to students and develops practices to streamline communication in order to strategically engage students on only relevant and timely information
- Working with student services professionals, engage students early and continuously by linking their long-term career goals to their educational pathway
- Develop a student intake survey to strategically matching incoming students with engagers and other support offices early
- Drive system-wise policies that enable students to transfer to baccalaureate programs seamless and articulate courses from Honolulu CC

**Assessment**

*Measures of Performance*

- Collect annual numbers of students engaged in service learning, internship and independent studies opportunities
- Gather annual numbers of students attending Orientation and New Student Registration Workshops
- Measure increases or decreases in the use of the Starfish/MySuccess tool by instructional faculty, student services professionals, and others

- Number of professional development workshops related to teaching and content strategies
- Number of faculty attending the workshops
- Number of courses improved to include various teaching pedagogies and relevant, engaging content

*Measures of Effectiveness*

- Collect and analyze course completion rates, disaggregated by courses taught by trained faculty or by courses with altered content created to engage students
- Evaluate semester-by-semester retention rates
- Evaluate year-to-year persistence rates
- Conduct annual studies of continuing students to gain qualitative feedback to understand the impact and make improvements to Purposeful Engagement Model
- Conduct annual follow-up studies (e.g., interviews, focus groups, surveys) with faculty to understand issues and barriers to successful implementation of the Purposeful Engagement Model and to explore improvement strategies

**Timeline:**

**Year 1 Focus:**

<b>Tasks</b>	<b>Accreditation standard</b>	<b>Start date</b>	<b>Completion</b>	<b>Responsible parties</b>	<b>Resources</b>
Determine strategies, action steps, assessment	I.A.1, I.A.2, I.A.3 I.B.4 II.B II.C	Jul 2018	Oct 2018	Campus Student Success Council (CSSC), Dean of Student Services, Vice Chancellor of Academic Affairs, Planning Council	Allocations of resources may be necessary for professional development for discovery of new methods and pedagogies.  Time for assessment coordinator and coaches.
Identify resources needed	I.B.1, L.B.4, I.B.5, I.B.9 III.A, III.B, III.D	Jul 2018	Oct 2018	CSSC, Dean of Student Services, Vice Chancellor of Academic Affairs, Planning Council	Needs assessment of the human, financial, physical and technology resources.
Inventory and document current student engagement strategies by faculty				Vice Chancellor of Academic Affairs, Academic Deans, FSEC	Dedicated time for administration to document current practices
Plan specific student engagement strategies	II.B II.C.1, II.C.2, II.C.3, II.C.4, II.C.5, II.C.6, II.C.7, III.C	July 2018	Oct 2018	CSSC, Onboarding Committee, Student Affairs and Academic Support Faculty, Student Council	Time for faculty and educational to develop course and program strategies.
Plan specific instructional faculty strategies	II.A.7 II.B, II.C III.A.6, III.A.7, III.A.14	July 2018	Oct 2018	Faculty Senate, VC Academic Affairs, Academic Deans, CSSC, Onboarding Committee	Time for faculty and educational to develop pedagogical and methods improvement.
Convene Onboarding Committee to	II.C,	Aug 2018	Dec 2018	Onboarding Committee	The College anticipates no additional

continue review and improvements of onboarding practices					resources needed to complete this task.
Plan support services strategies (review of barriers to success, increase of student participation, increase of student employment)		July 2018	Oct 2018	CSSC, Onboarding Committee, Student Affairs and Academic Support Faculty	Dedicated space and time for the discussion of out of class engagement strategies.
Plan admin strategies (review of best practices policy, review of student level data and predictive analytics, review of communication practices, etc.)		July 2018	Oct 2018	Chancellor, Vice Chancellor of Academic Affairs, Vice Chancellor of Administration, UHCC representatives	Most aspects of this task will be met by existing administration time and resources.
Recruit faculty to begin initial phase of engagement strategies	III.A.6, III.A.7, III.A.14	Aug 2018	Nov 2018	Faculty Senate, Deans/Division Chairs	Resources might include time for faculty to conduct the discussion and locating faculty participants.
Orientation for new faculty and lecturers, focused on best practices in student engagement	II.A.7 II.B, II.C III.A.6, III.A.7, III.A.14	Aug 2018	Apr 2019	Chancellor, Vice Chancellor of Academic Affairs, Dean of Student Services, FSEC, CSSC	Resources for stipends, food, and other supports.
Begin Implementation of engagement strategies and guidance	I.C.1	Sep 2018	May 2019	CSSC, Onboarding Committee, Student Affairs and Academic Support Faculty, Instructional Faculty	Resources may include assigned time by faculty, possible funding for tools, supplies, other supports.

Offer instructional faculty professional development (ongoing)	II.A.7 II.B, II.C III.A.6, III.A.7, III.A.14	Aug 2018	Ongoing	Faculty Development Coordinator, ISS Coordinator, FSEC, Dean of Academic Support	Resources for possible stipends, food, and other supports.
Expand usage of the StarFish tool to all student services/academic support offices		Sep 2018	May 2019	Dean of Student Services, Dean of Academic Support, ISS Coordinator	The College anticipates no additional resources needed to complete this task.
Begin training in ISS model and use of the StarFish tech tool		Oct 2018	May 2019	ISS Coordinator, CSSC	The College anticipates no additional resources needed to complete this task.
Align student assignments to student support services by teams	II.C.2, II.C.3	Dec 2018	May 2019	Dean of Student Services, Dean of Academic Support, Vice Chancellor of Academic Affairs	The College anticipates no additional resources needed to complete this task.
Explore use of non-credit and summer outreach as intentional recruitment and retention opportunities	II.B. 3, II.B. 6	Nov 2018	May 2019	Non-Credit Programs Director, Dean of Student Services, Vice Chancellor of Academic Affairs	The College anticipates no additional resources needed to complete this task.
Gather assessment and feedback, and then document, with improvements planned	I.B.1, I.B.4, I.B.8, I.B.9	Sep 2018	May 2019	Institutional Assessment Specialist, PPIR, Dean of Academic Support	The College anticipates no additional resources needed to complete this task.
Prepare a report on the success of the program	I.B.4, I.B.5, I.B.7, I.B.8	May 2019	Jun 2019	Chancellor, Vice Chancellor of Academic Affairs, Dean of Student Services, FSEC, CSSC	Allocated time for administrators
Provide a town hall	I.B.8	Aug 2019	Aug 2019	Chancellor, Vice Chancellor	The College anticipates no

discussion on the program				of Academic Affairs, Dean of Student Services, FSEC, CSSC	additional resources needed to complete this task.
---------------------------	--	--	--	---	--

**Year 2 Focus:**

<b>Tasks</b>	<b>Accreditation standard</b>	<b>Start date</b>	<b>Completion</b>	<b>Responsible parties</b>	<b>Resources</b>
Review strategies, action steps, assessment	I.A.1, I.A.2, I.A.3 I.B.4 II.B II.C	May 2019	Aug 2019	Campus Student Success Council (CSSC), Dean of Student Services, Vice Chancellor of Academic Affairs, Planning Council	Allocations of resources may be necessary for professional development for discovery of new methods and pedagogies.  Time for assessment coordinator and coaches.
Determine if additional resources are needed	I.B.1, I.B.4, I.B.5, I.B.9 III.A, III.B, III.D	May 2019	Aug 2019	CSSC, Dean of Student Services, Vice Chancellor of Academic Affairs, Planning Council	Needs assessment of the human, financial, physical and technology resources.
Include improvements in student engagement leader strategies	II.B II.C.1, II.C.2, II.C.3, II.C.4, II.C.5, II.C.6, II.C.7, III.C	May 2019	Aug 2019	CSSC, Onboarding Committee, Student Affairs and Academic Support Faculty, Student Council	Time for faculty and educational to develop course and program strategies.
Include improvements in faculty strategies	II.A.7 II.B, II.C III.A.6, III.A.7, III.A.14	May 2019	Aug 2019	Faculty Senate, VC Academic Affairs, Academic Deans, CSSC, Onboarding Committee	Time for faculty and educational to develop pedagogical and methods improvement.
Recruit additional faculty to expand engagement	III.A.6, III.A.7, III.A.14	July 2019	Aug 2019	Faculty Senate, Deans/Division Chairs	Resources might include time for faculty to conduct the discussion and

strategies					locating additional faculty participants.
Continue expansion usage of the StarFish tool to all student services/academic support offices		Aug 2019	May 2020	Dean of Student Services, Dean of Academic Support, ISS Coordinator	The College anticipates no additional resources needed to complete this task.
Cultivate community partners to foster service learning, internships, job placement opportunities	II.C.6	Aug 2019	May 2020	Career Services Coordinator, Dean of Academic Support, Faculty Members	Resources might include funding for transportation, meetings, food
Institute policies proven to engage students and increase retention and graduation	I.B.6, I.B.7, I.B.9	Nov 2019	May 2020	Chancellor, Vice Chancellor of Academic Affairs, Vice Chancellor of Administrative Services	Time to plan, coordinate, consult, implement policies
Orientation for student engagement leaders and participants	II.B II.C.1, II.C.2, II.C.3, II.C.4, II.C.5, II.C.6, II.C.7, III.C	Aug 2019	Sep 2019	Academic Deans, CSSC, Onboarding Committee	Possible resources to compensate students
Drive systemwide policies that enable students to transfer to baccalaureate programs	II.A.10	Aug 2019	May 2020	VC Academic Affairs, Academic Deans, ISS Coordinator	The College anticipates no additional resources needed to complete this task.
Gather feedback, and document, with improvements made	I.B.1, I.B.4, I.B.8, I.B.9	Sep 2019	Apr 2020	Assessment Coordinator, PPIR, Dean of Academic Support	The College anticipates no additional resources needed to complete this task.
Prepare a report on the success of the program	I.B.4, I.B.5, I.B.7, I.B.8	Apr 2020	May 2020	Academic Deans, CSSC, Onboarding Committee	Allocated time for administrators
Provide a town hall discussion on	I.B.8	May 2020	May 2020	Academic Deans, CSSC, Onboarding	The College anticipates no additional

the program				Committee	resources needed to complete this task.
-------------	--	--	--	-----------	---

**Year 3 Focus:**

<b>Tasks</b>	<b>Accreditation standard</b>	<b>Start date</b>	<b>Completion</b>	<b>Responsible parties</b>	<b>Resources</b>
Review strategies, action steps, assessment from Years 1 and 2	I.B.4 II.B II.C	May 2020	May 2021	Chancellor, VC Academic Affairs, CSSC, Onboarding Committee, Faculty	Time allotted for review and analysis of interventions
Determine if adequate resources are available	III.A, III.B, III.D III.C	May 2020	May 2021	Chancellor, VC Academic Affairs, CSSC, Onboarding Committee, Faculty	Time allotted for review and analysis of interventions
Further involvement by more faculty across the campus in engagement strategies	II.A.7 II.B, II.C III.A.6, III.A.7, III.A.14	August 2020	May 2021	Faculty Senate, VC Academic Affairs, Academic Deans, CSSC, Onboarding Committee	Time for faculty to develop pedagogical and methods improvement.
Continued review of emerging best practices and improvement of current student and faculty strategies to improve success	II.B, II.C	May 2020	May 2021	Chancellor, VC Academic Affairs, CSSC, Onboarding Committee, Faculty	Time allotted for review and analysis of interventions

## **QFE 2 – Enhanced Support for Distance Education Students**

### *Introduction*

The role, scope and access to online and virtual learning environments will only increase over the coming decade as students use technology to access postsecondary education. The desire to attend college through distance education is particularly challenging for students from traditionally underserved groups and for first generation students in general. Thus, the college finds itself at a critical balance point: offer online and distance education to meet increased student need and to implement support services in order to meet the needs of students in distance education courses.

### *The College Mission*

The Honolulu CC mission states that the College will provide “accessible educational opportunities through an engaging learning environment.” In addition, one of the College’s core values is that we are “Student-Centered and Student Focused –offering a supportive, high quality learning environment.” Therefore, the second goal for our Quality Focus Essay is to enhance student learning of students in Distance Education (DE) courses. The campus will be creating processes to improve support services for DE students, especially those students who do not come to campus in order to ensure that these students receive the necessary student support services. These efforts are primarily aimed at students enrolled in distance education courses, although evening students on campus should also benefit.

### *Supporting Student Services*

In the DE Supplement, the College indicates our desire to improve the success rates for students in DE courses. Using different measures, the student success rate for DE courses is either 64% or 78%. In both measures, however, the success rates for DE students lag behind students in face-to-face courses. Nationally, this gap in success is often estimated at an average of 10%. The College will enhance the support services accessible to students who do not come to campus in order to improve success in DE courses. Although the College has all its support services available for DE students, this initiative focuses on a more proactive approach to facilitate communication to and access by these students.

### *The Role of Student Achievement Data*

The current action project has been informed by the access and use of the student achievement data reported in the ISER. (*See Introduction*). Of particular note are the successful course completion rate differences between traditional and online/hybrid settings. Additionally, the uneven persistence/retention from term to term between students who take online courses and those of traditional modes of delivery. Finally, the college has selected as the focus of this study the extent to which outside supports for online courses could impact the within term success and across semester progress. The theory behind the analysis is that increased dedication to these tipping point measures will increase the likelihood of success in the college's terminal outcomes of degrees and certificates completion. Moreover, the focus on the distance education students will assist the college improve the aspiration goals in the institution set standards under the Hawaii community college taxonomy of indicators.

**Therefore, the desired goal of QFE is to increase use of support services and increase successful DE course completion.**

In the first year, the College will focus efforts in three areas of support for DE students:

- Counseling,
- College Achievement and Retention Experience (CARE),
- Writing Center.

In year two, the College will assess results, and based on these results, incorporate successful strategies to enhance other areas of support for DE students.

In year three, the goal will be to integrate necessary improvements in increasing accessibility to student support services as regular campus practice.

**Goal #1:** It is crucial that the College develop a reliable method to track the use of support services by students in distance education (DE). While the College uses MySuccess, a student support and retention system, the use of MySuccess is not standardized across all areas of the College that support students. The College will explore instituting a card-swipe system across campus areas offering student support that meets campus needs and is fiscally viable.

**Goal #2:** Develop and implement plans to increase use of support services for DE students and other off campus students such as evening students.

## COUNSELING

### **Outcomes**

Improve retention and student success of DE students. Increase the number of counseling sessions with DE students.

### **Steps to be Taken**

- Identify an online communication tool to support DE advising such as “Google hangouts”
- Department training on identified online communication tool to support DE advising
- Identify technology hardware needs
- Secure identified technology needs to support DE advising
- Department training on using identified technology hardware
- Provide professional development for Academic Counselors specific to strategies relating to student engagement and retention for DE Advising
- Investigate the merits of revamping Academic Counseling Website to enable students to connect to appropriate student support resources available to students in addition to counseling
- Investigate updating online New Student Registration to reflect best practices in DE advising trends and meeting student needs. Will include online modules to reflect pertinent content and material impacting student success that is covered in face-to-face New Student Registration sessions

## **College Achievement and Retention Experience (CARE)**

### **Outcomes**

Improve retention and student success of DE students. Increase the number of CARE interventions with DE students as well as coaching for DE students.

### **Steps to be Taken**

- Call all students enrolled in DE classes prior to the start of the semester in Fall 2018 and Spring 2019. CARE staff will provide outreach support discussing with students campus resources, preparing for success in DE courses, and opportunities to receive peer coaching
- Survey DE faculty regarding how to best support DE faculty and students. Based on survey results, CARE will provide additional support

## **COLLEGE WRITING CENTER**

### **Outcomes**

Improve retention and student success of DE students. Identify and increase the number of Writing Center appointments with DE students.

### **Steps to be Taken**

- Create a portal on Lualima through which DE students needing additional writing support will be able to access materials and services that are offered face-to-face in the Writing Center
- Explore using web conferencing tools with whiteboard features such as Zoom or Go-To Meeting, which have the added benefit of dedicated mobile apps that students can use with their phones

\*The target for the initiative is to serve at least 25 students in the Fall 2018 semester and an additional 25 in the Spring 2019 semester.

## **ASSESSMENT**

### *Measures of Performance*

- MySuccess Speed Note Data on student support referrals
- Website Counts on student support web pages
- Surveys from services provided by CARE
- Surveys from services provided by Writing Center

### *Measures of Effectiveness*

- Analyze results of standard department survey emailed to DE students after DE Advising session.
- Collect and analyze DE course completion rates
- Evaluate semester-by-semester retention rates for DE students
- Evaluate year-to-year persistence rates for DE students
- Conduct focus groups for DE students
- Conduct focus groups for DE faculty

UNIVERSITY of HAWAII®

**KAPI'OLANI**  
COMMUNITY COLLEGE

**INSTITUTIONAL SELF EVALUATION REPORT 2018**  
*for* REAFFIRMATION OF ACCREDITATION

Kapi'olani NāpelakapuoKaka'e  
(December 31, 1834–June 24, 1899)

## QUEEN KAPI'OLANI

King David Kalākaua and Queen Julia Kapi'olani were the reigning monarchs of the Kingdom of Hawai'i from February 12, 1874, to January 20, 1891. Kapi'olani Community College bears the name of Queen Kapi'olani, and the College embodies her motto, “Kūlia i ka nu'u”, which means, “Strive for the highest.”

Queen Kapi'olani served the people of Hawai'i with deep commitment, especially in the areas of education and health. She established the Kapi'olani Home for Girls and the Kapi'olani Maternity Home, which thrives today as the Kapi'olani Medical Center for Women and Children. The College continues her legacy in education with a unique emphasis on preparing students to be health care providers for the State of Hawai'i and beyond.

To: Accrediting Commission for Community and Junior Colleges,  
Western Association of Schools and Colleges

From: Louise Pagotto, Interim Chancellor, Kapi'olani Community College

Kapi'olani Community College  
4303 Diamond Head Road  
Honolulu, Hawai'i 96816

This Institutional Self-Evaluation Report is submitted to the ACCJC for the purpose of assisting in the determination of the institution's accreditation status.

I certify there was effective participation by the campus community, and I believe the Self Evaluation Report accurately reflects the nature and substance of this institution.

**Signatures:**

## Preamble

### Our Student Success Culture: *No Ke Kauhale Ke Kuleana*

As champions of student success, we invite all students to experience a campus culture that truly supports their exploration, understanding, and achievement of their academic pursuits and their personal aspirations; a campus culture that models attitudes, behaviors, and values that foster a sense of belonging; and a place that provides access to a wealth of opportunities and resources for students to develop, thrive, and succeed.

Our student success culture derives from a long-standing commitment to that success, beginning with our adoption of Queen Julia Kapi‘olani’s motto as our own: *kūlia i ka nu‘u*, strive for the highest. The focus on that commitment was sharpened through the endeavors of the Student Success Council, launched in 2012-2013. Over the course of nine months, approximately 40 faculty members from different departments and disciplines researched best practices; visited exemplary institutions; conducted "talk story" sessions, surveys, and focus groups; convened committee meetings; facilitated sessions; and held an all-day retreat/work session. The broad based dialogue and rich conversations yielded a comprehensive report with 14 recommendations, 32 objectives, and 83 actions. However, and more importantly, the culmination of these extensive and intensive endeavors was the recognition that student success does not occur in a “center” or physical structure, but in a place, a community, where everyone is responsible for helping students succeed in their learning and in their lives.

For the past five years, our College has refocused its efforts on creating a student success campus and culture, where all members take responsibility, work together, and build a community that supports and celebrates students’ engagement, learning, achievement, and success - **No Ke Kauhale Ke Kuleana** (the responsibility of the community).

We are guided by the Student Success Council’s vision of *ne‘epapa*, transforming our campus community toward a collective culture that moves in unison to advance student success. We acknowledge that student success exists in a dynamic milieu, a community, where everyone takes responsibility for inspiring and supporting students to be successful in their learning and in their lives. Student success is found within the strong fibers that bind our community and encircle and uplift our students.

## **Introduction**

Kapi‘olani Technical School was established in central Honolulu in 1946, thirteen years before Hawai‘i statehood. In 1965, the technical school added a liberal arts program and became an open-door community college within the University of Hawai‘i (UH) System. It was renamed Kapi‘olani Community College and added the health sciences to its career education offerings.

In 1974, the University of Hawai‘i Board of Regents approved a relocation of the campus to 52 acres on the slopes of Lē‘ahi (Diamond Head). Eight acres were later designated for the Hawai‘i Film Studio, leaving the campus with 44 acres. The College serves primarily the City and County of Honolulu, but some career programs as well as distance education offerings attract students throughout the state, including some from underserved rural communities.

The College offers health programs at Leeward and Hawai‘i Community Colleges and at UH Maui College. The College has 19 programs with specific programmatic accreditations ([Intro-1](#)).

### **Four Major Developments at the College**

The College experienced four major developments since the last comprehensive review:

- 1) New Strategic Plan for 2015-2021
- 2) Alignment of Student Success Pathways with Strategic Plan measures
- 3) Enrollment declines
- 4) Chancellor’s unexpected departure in 2016

### **New Strategic Plan for 2015-2021**

First, in fall 2013, the College in conjunction and collaboration with the UH and UH Community College (UHCC) System, began a new Strategic Planning process ([Intro-2](#)).

This process included the development and publication of new mission, vision, and values statements in both Hawaiian and English and was completed in fall 2016 (see below):

#### **‘Ōlelo Nu‘ukia – Vision**

**He Kula Nui Kāko‘o ‘Ōiwi ‘o Kapi‘olani Kula Nui Kaiāulu a na kā lākou mau haumāna puka e ho‘oikaika i ke kaiāulu o ko Hawai‘i mau kaiāulu like ‘ole ma ka honua e loli mau.**

Kapi‘olani Community College is a model indigenous serving institution whose graduates strengthen the social, economic, and sustainable advancement of Hawai‘i and the world.

#### **Ala Nu‘ukia – Mission**

**He hale hāmama ‘o Kapi‘olani Kula Nui Kaiāulu no nā ‘ano kaiāulu like ‘ole, e ho‘olako i nā kānaka ho‘ākea ‘ike e hiki aku i ka pahuhopu ‘imi na‘auao, ‘imi ‘oihana, a ho‘olaulā**

**‘ike. He loa‘a nā palapala a‘o, nā kēkelē mua puka, me nā polokalamu ho‘ili kula he kilohana wale e ho‘omākaukau i nā haumāna maoli, kūloko, kaumoku‘āna, kau‘āina no ka mua he lako.**

Kapi‘olani Community College provides open access to higher education opportunities in pursuit of academic, career, and lifelong learning goals to the diverse communities of Hawai‘i. Committed to student success through engagement, learning, and achievement, we offer high quality certificates and associate degrees, and transfer pathways that prepare indigenous, local, national, and international students for their productive futures.

### **Nā lawena waiwai – Values**

**Ho‘ohanohano ‘ia ka ho‘ilina a ka Mō‘iwahine o Kapi‘olani e Kapi‘olani Kula Nui Kaiāulu ma o kēia mau lawena waiwai:**

Kapi‘olani Community College honors the legacy of Queen Kapi‘olani through these values:

**Kūpono:** Practicing honesty and integrity with clarity in all relationships.

**Kuleana:** Sharing a common responsibility to support the future of our students, college, community, land, and sea.

**Mālama:** Protecting and perpetuating ancestral knowledge.

**Kūloa‘a:** Ensuring that the needs of our students are met with support and service.

**Kūlia:** Creating meaningful curricula and learning experiences that serve as a foundation for all to stand and move forward.

Alaka‘i ‘ia mākou e kā mākou nu‘ukia like, lawena waiwai like, a me ka ho‘okō kuleana haumāna like ma o ke kāko‘o ‘i‘ini, ke a‘o, ka ho‘okō pahuhopu, me ka palapala ‘o Hawai‘i Papa o Ke Ao.

*We are guided by our shared vision, values and commitments and by the recommendations of Hawai‘i Papa O Ke Ao ([Intro-3](#)).*

### **Alignment of Student Success Pathways with Strategic Plan Measures**

Another major development was the alignment of Student Success Pathways (SSP) with the four strategic directions and 50 performance measures in the Strategic Plan for 2015-2021. In summer 2016, the UHCC system adopted the Student Success Pathways (SSP) model to organize the seven community colleges around a cohesive and unified agenda to maximize and scale efforts for student success. The College’s SSP model was shared with the Chancellor’s Advisory Council (CAC) in fall 2016. The Council was given an opportunity to provide feedback, and revisions were made. Additionally, in spring 2017, all departments, units, programs, and authorized governance organizations (a total of 53) completed a SSP template that delineates how each of these entities is contributing to student success and how their contributions align with the Strategic Plan.

## **Enrollment Declines**

The third major development was a decline in total enrollment from 7,816 in fall 2015 to 7,095 in fall 2017.

Enrollment patterns by ethnicity show some variation:

- 1) The African American or Black population decreased by 14, but remained 1.4 percent of total student population.
- 2) The American Indian or Alaskan Native population decreased by 6, but remained 0.3 percent of total student population.
- 3) The Asian student population decreased by 357 but, as a percent of total student population, increased slightly from 51.0 to 51.2 percent.
- 4) The Filipino student population increased by 12, and increased from 13.4 to 14.9 percent of total student population.
- 5) The Caucasian or White student population decreased by 72 but, as a percent of total student population, increased from 12.1 to 12.4 percent.
- 6) The Hawaiian/Pacific Islander student population decreased by 123 but, as a percent of total student population, increased from 18.7 to 18.8 percent.
- 7) The Native Hawaiian or Part-Hawaiian student population decreased by 136, and decreased slightly from 16.9 to 16.7 percent of total student population.
- 8) The Hispanic student population decreased by 29, and decreased from 1.8 to 1.5 percent of student population.
- 9) The Mixed Race student population decreased by 75 but, as a percent of total student population, increased from 13.8 to 14.1 percent.

### Change in Leadership

The fourth major development was the unexpected departure in spring 2016 of the Chancellor after more than 35 years of campus leadership as Dean of Instruction, Senior Academic Dean, Vice Chancellor for Academic Affairs, and Chancellor. The UHCC System administration decided on the change and selected an internal candidate, a long-time faculty member and campus leader to guide the college as interim chancellor during this transition period. The change in leadership represented a pivot of the College to respond to calls from the campus for new directions.

On April 17, 2018, at a campuswide meeting, the Vice President for Community Colleges announced that he had recommended to the University President, the appointment of the Interim Chancellor as the next permanent Chancellor for Kapi‘olani Community College. The effective date of appointment is June 8, 2018.

### Summary Data on Service Area: Labor Market, Demographic, and Socioeconomic Context

The demographics of the Kapi‘olani CC service area indicate that the population comprising the pool from which traditional-aged transfer students and potential students would be drawn, now in high school, will decline between 2015 and 2020. The population between 25 and 54, typically the age group in which students may be focused on job skills retraining, is projected to decline as well. This trend will put negative pressure on enrollment. The population aged 55 and above is forecast to rise by ten percent between 2015 and 2020, which might indicate increasing demand for lifelong learning programs in the next decade. The population growth of those under 15 is forecast to be almost entirely in the group currently between the ages of five to nine. These potential students are not likely to have an effect on Kapi‘olani CC enrollment before 2030.

<b>Table 2: Honolulu County Population Estimates for 2015 and 2020</b>			
<b>Age Group</b>	<b>2015</b>	<b>2020</b>	<b>%Δ</b>
0-14	177,103	183,007	3.3
15-24	128,461	125,003	-2.7
25-54	381,938	377,612	-1.1
>=55	288,690	318,084	10.2

Source: Hawai‘i DBEDT Long Range Forecasts Table A-13

Figure 1 shows that the unemployment rate for the service area of the College, broadly defined as the City and County of Honolulu, has been steadily falling since the winter quarter of 2012. The Honolulu County unemployment rates declined from 6.6 percent in the first quarter of 2012 to 2.8 percent in the first quarter of 2017.

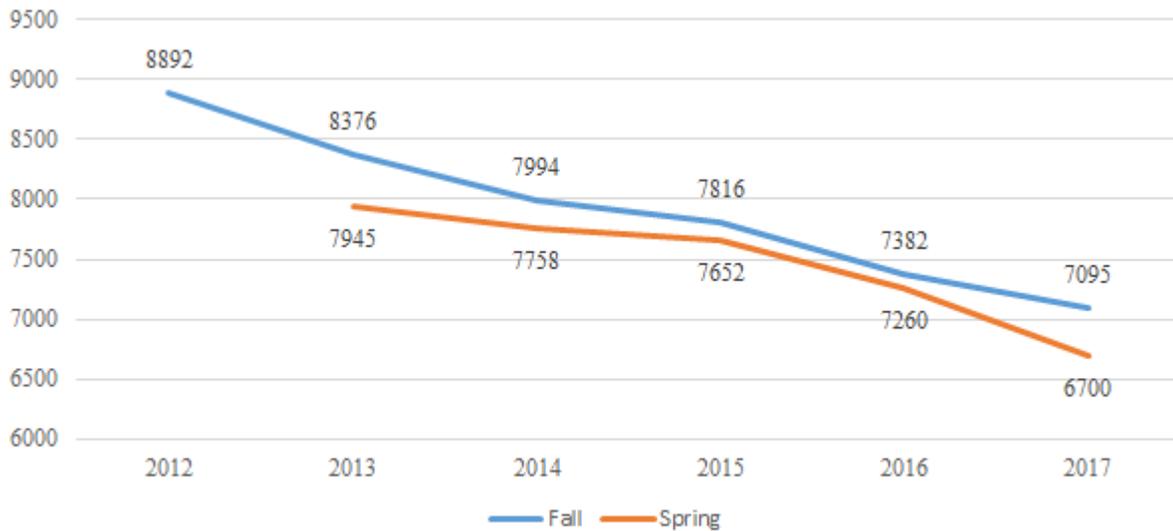

Falling unemployment rates and low unemployment also exert downward pressure on enrollment. Comparing Figure 1 to Figure 2 immediately following, it can be seen that enrollment at the College closely tracks the unemployment rate for Honolulu County.

**Figure 1: Honolulu County Unemployment Rate by Year and Quarter (2012-2017)**

Source: Hawai'i Department of Labor & Industrial Relations monthly and annual data. Table A4 Fig 1.

**Figure 2: Kapi'olani CC Enrollment by Year and Semester (2012-2017)**

Source: University of Hawai'i IRAO Fall and Spring 10 year Historical Headcount

The College serves a population that is diverse, with a majority self-identifying as solely Asian. Nearly 20 percent of the population is foreign born. Approximately eight percent of O'ahu residents are veterans, reflecting the large number of military installations and personnel stationed on O'ahu.

<b>Table 3: Honolulu County Demographic and Socioeconomic Profile</b>	
2016 Population Estimate (as of July 1, 2016) *	992,605
2015 ACS 5-Year Population Estimate	984,178

The Honolulu job market is highly dynamic and dominated by a tourism-oriented service industry, government, and health services. Students swirling in and out of part-time work and college is a common life course strategy, whether intentional or unintentional. As Table 4 below indicates, more than one job in four (27 percent) in the Honolulu county workforce is in “services” work, counting Retail Trade, Eating and Drinking, Other Services, Hotels, Food Processing, and Agriculture jobs. As Figure 3 shows, more than one-fourth (28 percent) of Honolulu job postings require only a high school diploma or some vocational training, and of those requiring vocational training, 75 percent require only 0-2 years of experience.

<b>Table 4: Honolulu County Civilian Total Jobs by Sector</b>			
	<b>2015</b>	<b>2020</b>	<b>2025</b>
<b>Total civilian jobs</b>	587,750	611,770	633,060
Government	113,570	116,450	119,340

Utilities	2,260	2,350	2,420

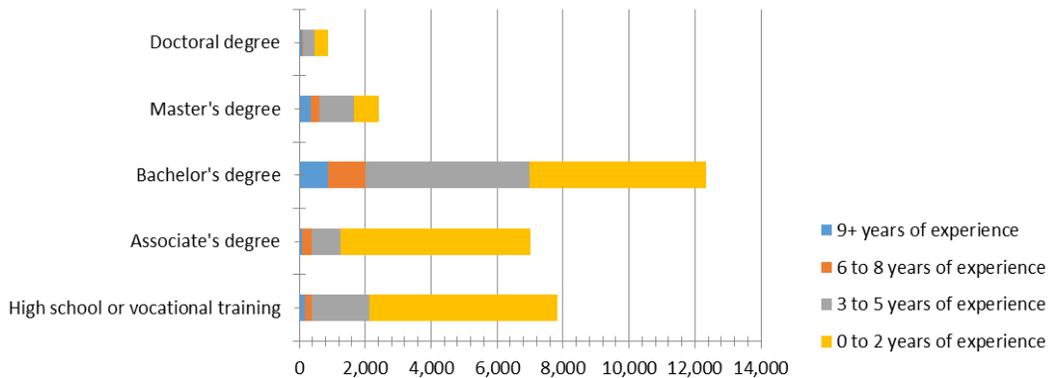

Source: Hawaii DBEDT Long Range Forecast 2010-2040 Table A-44.

The fastest growing job areas in Honolulu County are professional services and construction, in which occupations requiring scientific, math, and technology skills are predominant. In 2010, professional services and construction are two of the three industries that had 65 percent of the state's "green" jobs ([Intro-4](#)).

6 to 8 years of experience	199	290	1,126	252	36
3 to 5 years of experience	1,741	886	4,997	1,065	343
0 to 2 years of experience	5,714	5,740	5,339	732	428

Source: Labor Insight Jobs (Burning Glass Technologies)

Kapi‘olani Community College is part of the gateway to living wage jobs in Honolulu. A living wage in Honolulu for a single adult in 2017 was approximately \$33,000 per year using the MIT living wage calculator. Approximately 68 percent of entry-level job postings (0-2 years of experience required) in the Urban Honolulu Metropolitan Statistical Area (MSA) required either an associate degree or bachelor’s degree for employment. The health care, professional and scientific fields, finance, and information sectors comprised the majority of these jobs.

### **Evidence for Introduction**

- Intro-1 Kapi‘olani CC website, Program accreditation
- Intro-2 Strategic plan
- Intro-3 Hawai‘i Papa O Ke Ao plan
- Intro-4 Hawai‘i’s Green Workforce: A Baseline Assessment, 2010

## *Presentation of Student Achievement Data and Institution-set Standards*

The College focuses on student achievement at the institutional level through three data systems:

- 1) Institution-Set Standards
- 2) UHCC and UH Performance-Based Funding
- 3) Institutional Effectiveness Measures with Greater Disaggregation of Groups

The College also focuses on student achievement at the program level through the Annual Report of Program Data (ARPD), especially the effectiveness measures in that report.

Additionally, college innovations in STEM focus on achievement for Native Hawaiian and other underrepresented student groups in STEM degree completion and STEM transfer. College innovations in Civic Engagement focus on achievement for Service-Learning students.

As part of the UHCC system strategic planning process, the institution-set standards for student achievement were developed through an extensive dialogic process in collaboration with the colleges. The College was represented by the Student Congress president, the Faculty Senate chair, the director of the Office for Institutional Effectiveness, and the Chancellor in these once-per-semester discussions. The baseline numbers in the campus strategic plan for degrees and certificates awarded, Native Hawaiian degrees and certificates awarded, Pell Recipient degrees and certificates awarded, transfers to baccalaureate institutions, and IPEDS student success rates serve as the College's institution-set standards for student achievement. The institutional standard for course completion was set by an analysis of actual current course success at each campus.

The use of the selected metrics was informed by the ACCJC white paper on Standard I.B.3, which contemplates the creation of standards used by colleges that are part of an overall systemwide model. The UHCC model includes metrics at the institutional and program levels ([ISS-1](#)). Importantly, the measures include both baseline or floor levels of expected performance, as well as aspirational (stretch goals) for improvement. The College has integrated the accreditation expectations, state mandates and local success measures to make maximum meaning of the goal-setting process. (See I.B.3)

<b>Table 6: Successful Course Completion (Institutional-set Standard 1)</b>			
<b>Category</b>	<b>Reporting Years</b>		
	<b>Fall 2015</b>	<b>Fall 2016</b>	<b>Fall 2017</b>
Institution-set Standard	70.0%	70.0%	70.0%
Stretch Goal	75.0%	75.0%	75.0%
Actual Performance	71.6%	73.7%	72.2%
Difference Between Standard and Performance	1.6%	3.7%	2.2%
Difference Between Stretch Goal and Performance	-3.4%	-1.3%	-2.8%

*Applies to all students: Successful course completion, grade C or better if graded, over the number of students enrolled when the general enrollment period ends.*

Source: OFIE IEMs at a Glance ([ISS-2](#))

The College exceeded its Successful Course Completion Standard but this measure has stabilized over the last three years. The College is further examining the relationship between the course success rate and fall-to-spring re-enrollment rates.

The College met the Degrees and Certificates Completed ISS in FY 2016 and FY 2017.

<b>Table 7: Degrees and Certificates Completed (Standard 2)</b>			
<b>Category</b>	<b>Reporting Years</b>		
	<b>FY 2015</b>	<b>FY 2016</b>	<b>FY 2017</b>
Institution-set Standard	1,347	1,347	1,347
Stretch Goal	N/A	1,414	1,485
Actual Performance	1,335	1,383	1,356
Difference Between Standard and Performance	-12	36	9
Difference Between Stretch Goal and Performance	N/A	-31	-129

*Associate degrees and certificates of achievement completed in one fiscal year.*

Data from UHCC Strategic Directions ([ISS-3](#), p. 13)

The College has renewed, through the Student Success Council, its focus on the degree and certificate completion of Native Hawaiian and Pell Grant students, as these completion numbers (See Tables 8 and 9 below) are below the ISS. (See, Checklist for Compliance with Federal Regulations and Related Commission Policies, Student Achievement.)

The College has had mixed success meeting the larger ISS goal of Transfers to Baccalaureate Institutions in FY 2016 with strong performance in two of the last three academic years, see Table 10 below. The measure is a volume measure as opposed to a percentage rate and impacted by college enrollments. Given the College's enrollment trends the variations might be explained by the trend tendencies. The College has begun conversations about whether the volume-based standards are properly set given current enrollment trends.

Table 10: Transfers to Baccalaureate Institutions (Standard 5)			
Category	Reporting Years		
	FY 2015	FY 2016	FY 2017
Institution-set Standard	1,327	1,327	1,327
Stretch Goal	N/A	1,349	1,397
Actual Performance	1,364	1,272	1,350
Difference Between Standard and Performance	37	-55	23
Difference Between Stretch Goal and Performance	N/A	-77	-47

*To UH and all 4-year campuses.*

Data from *UHCC Strategic Directions* ([ISS-3](#), p. 22)

As is shown in Table 11, the College has improved its IPEDS student success rate; however, the actual performance misses the target established by the institution-set standards by 0.5 percent.

Table 11: IPEDS Student Success Rate (Standard 6)			
Category	Reporting Years		
	FY 2015	FY 2016	FY 2017
Institution-set Standard	38.5%	38.5%	38.5%
Stretch Goal	41.1%	42.5%	43.9%
Actual Performance	37.8%	36.6%	38.0%
Difference Between Standard and Performance	-0.7%	-1.9%	-0.5%
Difference Between Stretch Goal and Performance	-3.3%	-5.9%	-5.9%

*Denominator of first-time, full-time freshmen enrolled in credit programs in a given fall semester. Numerator includes those in the denominator who earned a degree in 150% of program time, or transferred to another institution, or are still enrolled at institution.*

Data from *UHCC Strategic Directions* ([ISS-3](#), p. 23)

The institutional standard for licensure and certification examination success rates was initially established as the average pass rate for the various exams. This standard was modified during the development process to be either the average pass rate or the pass rate required by program accreditation standards, whichever is higher. According to UHCCP Policy 4.203 ([ISS-4](#)), “[t]he Perkins target is based on a negotiated level of placement within the state plan for Career and

Technical Education that includes an expectation of continuous improvement.” Typically the rate has a small incremental annual increase in value.

The UHCC System has established the licensure and certification examination success rate as the minimum required pass rate to meet accreditation requirements for programs or the average national or state pass rate for the programs that are not accredited. These rates can be found in Table 21.

Perkins IV core indicators include student placement in employment. The standard is set for the State of Hawai‘i for all programs and that is further discussed in Standard II.A. The established placement rate for the State of Hawai‘i in AY 2016 is 69 percent. Perkins target is based on a negotiated level of placement within the state plan for Career and Technical Education that includes an expectation of continuous improvement.

In 2015, the University of Hawai‘i Community Colleges formed a Student Success Council that organized the seven community colleges around a unified agenda to maximize and scale efforts for student success. The Council developed a Student Success Pathway based on intentionally-designed, clear and structured educational experiences that guide students from their point of entry to graduation, transfer and career.

**Figure 1. UHCC Student Success Pathway**

## UH Community Colleges' Student Success Pathway Model

Kapi'olani Community College's SSP model consists of six phases that provide benchmarks or pivot points in students' college journey where they need the most supports to succeed.

**Figure 2. Kapi'olani Community College Student Success Pathway**

“Connect” is part of the systemwide SSP model, so no changes have been made to that phase. “Prepare” has been added to focus on the UHCC student success initiatives: co-requisite models for math and English as well as Purpose First, which engages students early on in their college experience to select a career pathway. The College, in collaboration with the UH Institutional Research and Analysis Office (IRAO), also tracks the completion rates in the new College-Level Co-requisite model designed to advance a higher percentage of students through college-level math and English in their first academic year. “Engage, Learn, Achieve” has been included to align with the College’s brand. “Thrive” has been added to place emphasis on the students who complete their journey at the College and to ensure that the College is still supporting them in their successes and *for their productive futures* (from the Mission Statement [\(ISS-5\)](#)).

### Student Achievement and Performance-Based Funding Measures

The UHCC (Table 12, see below) and the UH System (Table 13, see below) provide additional funding to the College if it meets annual achievement targets. Note that in Table 12, degrees and certificates, Native Hawaiian degrees and certificates, Pell grant recipient degrees and certificates, and transfers are also measures for which the College has institution-set standards. While the institution-set standards establish a floor for the measure, the performance funding measures set improvement targets for each year of the Strategic Plan out to 2021. Note in Table 13 that the IPEDS measure is also a performance-based funding measure. Also, the transfer measure includes only transfers to UH baccalaureate campuses.

For the UHCC performance funding measures in the most recent year, the College earned an additional \$523,001, but had an unearned amount of \$876,147. For the UH performance measures, the College earned \$225,832 but had an unearned amount of \$362,286.

<b>Table 12: Performance-Based Funding for FY 2017 (Kapi'olani Community College)</b>						
<b>University of Hawai'i Community College Funding</b>						
<b>Measure</b>	<b>Base</b>	<b>Target</b>	<b>Actual</b>	<b>%</b>	<b>Weight</b>	<b>Amount</b>
Degrees & Certificates	1,347	1,414	1,356	53.7	35	\$263,179
Native Hawaiian Degrees & Certificates	191	201	191	0.0	10	\$0
STEM Degrees & Certificates	196	206	257	100.0	10	\$139,915
Pell Grant Recipient Degrees & Certificates (Include 4 Year Degrees)	556	584	580	85.7	10	\$119,907
Transfers to 4 Year (UH & Non UH)	1,327	1,349	1,273	0.0	35	\$0
Total Allocation						\$523,001
Unearned						(\$876,147)

## The Degrees and Certificate Completion

The baseline was set by averaging the completion numbers for FY 2013, 2014, and 2015.

<b>Table 13: Performance Funding for FY 2017 (Kapi‘olani Community College)</b>						
<b>University of Hawai‘i System Funding</b>						
<b>Measure</b>	<b>Base</b>	<b>Target</b>	<b>Actual</b>	<b>%</b>	<b>Weight</b>	<b>Amount</b>
Degrees & Certificates	1,347	1,414	1,356	54.0	30	\$81,454
Native Hawaiian Degrees & Certificates (Include 4 Year Degrees)	191	201	191	0.0	10	\$0
STEM Degrees & Certificates	92	97	127	200.0	10	\$101,066
Pell Grant Recipient Degrees & Certificates	556	584	580	86.0	10	\$43,312
Transfers to UH 4 Year	862	879	815	0.0	10	\$0
IPEDS Success Rate	38.5%	42.5%	36.6%	0.0	30.0%	\$0
Total Allocation						\$225,832
Unearned						(\$362,286)

## Student Achievement and Institutional Effectiveness Measures

Because the College is committed to the research-based finding that student engagement positively impacts student achievement and student learning, the institution tracks institutional effectiveness measures (IEM) for engagement, using results from the Community College Survey of Student Engagement (CCSSE) administered in even-numbered spring semesters, and achievement for all students, compared with Native Hawaiian, Filipino, Pacific Islander, and Pell Recipient students ([ISS-6](#)). (See I.B.5)

In fall 2015, 2016, and 2017, for all courses and college-level courses, success rates for All, Filipino, and Pell students are above the College’s ISS while Native Hawaiian and Pacific Islander success rates are below the College’s ISS.

<b>Table 14: Kapi'olani Community College Aggregate Course Success Rates</b>							
<b>Term</b>	<b>Demographic</b>	<b>All Courses</b>			<b>College-Level Courses (100 and above)</b>		
		<b>All</b>	<b>Pass</b>	<b>%</b>	<b>All</b>	<b>Pass</b>	<b>%</b>
<b>Fall 2015</b>	All Students	22,194	15,893	71.6	20,507	14,810	72.2
	Filipino	2,955	2,150	72.8	2,707	1,976	73.0
	Native Hawaiian	3,719	2,349	63.2	3,450	2,227	64.6
	Pacific Islander	418	235	56.2	362	209	57.7
	Pell	5,606	4,180	74.6	5,066	3,832	75.6
<b>Fall 2016</b>	All Students	21,010	15,496	73.8	19,890	14,709	74.0
	Filipino	3,020	2,290	75.8	2,885	2,196	76.1
	Native Hawaiian	3,401	2,225	65.4	3,248	2,140	65.9
	Pacific Islander	411	238	57.9	392	228	58.2
	Pell	4,827	3,675	76.1	4,534	3,467	76.5
<b>Fall 2017</b>	All Students	20,476	14,785	72.2	19,472	14,139	72.6
	Filipino	2,936	2,185	74.4	2,794	2,097	75.1
	Native Hawaiian	3,515	2,209	62.8	3,359	2,135	63.6
	Pacific Islander	460	249	54.1	430	237	55.1
	Pell	4,801	3,473	72.3	4,525	3,308	73.1
<p><i>*Successful grades (Pass) are A, B, C, CR and CR+. All grades exclude audits, credit by exam and record delays. Except for the exclusions, all Pacific Islander students (except Native Hawaiians and Part Hawaiian) enrolled at Kapi'olani Community College are included.</i></p>							

In spring 2016 and 2017, fall-to-spring re-enrollment rates, excluding graduates and/or transfers, increased for All, Filipino, Native Hawaiian, and Pacific Islander students, while Pell student re-

enrollment declined. In spring 2017 and 2018, fall-to-spring re-enrollment rates, excluding graduates and/or transfers, decreased for All, Filipino, Native Hawaiian, Pacific Islander, and Pell students.

<b>Table 15: Kapi'olani CC Re-enrollment from Fall to Subsequent Spring</b>					
<b>Term</b>	<b>Demographic</b>	<b>Fall Headcount</b>	<b>Re-enrollment Headcount</b>	<b>Percent Re-enrolled</b>	<b>Adjusted Percent Re-enrolled</b>
<b>Fall 2015</b>	All Students	6,399	4,546	71.0	75.2
	Filipino	875	652	74.5	77.9
	Native Hawaiian	1,033	699	67.7	71.0
	Pacific Islander	124	86	69.4	70.5
	Pell	1,405	1,153	82.1	87.0
<b>Fall 2016</b>	All Students	5,959	4,187	70.3	76.1
	Filipino	843	639	75.8	80.9
	Native Hawaiian	926	616	66.5	71.6
	Pacific Islander	107	79	73.8	75.2
	Pell	1,194	957	80.2	86.1
<b>Fall 2017</b>	All Students	5,804	4,028	69.4	74.7
	Filipino	871	648	74.4	77.9
	Native Hawaiian	917	612	66.7	70.2
	Pacific Islander	139	100	71.9	74.6
	Pell	1,148	913	79.5	85.1

*\*Fall headcount is defined as students enrolled and home-based at Kapi'olani CC. Percent re-enrolled is calculated by dividing fall semester headcount by re-enrollment headcount. Adjusted percent re-enrolled excludes graduates and/or transfers from fall headcount.*

For fall 2016 and 2017, fall-to-fall enrollment percentages, excluding graduates and transfers, increased for All, Filipino, Pacific Islander, and Pell students, while Native Hawaiian re-enrollment declined.

<b>Table 16: Kapi‘olani Community College Re-enrollment from Fall to Next Fall</b>					
<b>Term</b>	<b>Demographic</b>	<b>Fall Headcount</b>	<b>Re-enrollment Headcount</b>	<b>Percent Re-enrolled</b>	<b>Adjusted Percent Re-enrolled</b>
<b>Fall 2015</b>	All Students	6,399	3,058	47.8	58.3
	Filipino	875	460	52.6	62.5
	Native Hawaiian	1,033	462	44.7	52.6
	Pacific Islander	124	44	35.5	41.5
	Pell	1,405	728	51.8	64.6
<b>Fall 2016</b>	All Students	5,959	2,795	46.9	59.6
	Filipino	843	446	52.9	64.3
	Native Hawaiian	926	389	42.0	52.2
	Pacific Islander	107	55	51.4	59.1
	Pell	1,194	588	49.2	64.7

*\*Fall headcount is defined as students enrolled and home-based at Kapi‘olani CC. Percent re-enrolled is calculated by dividing fall semester headcount by re-enrollment headcount. Adjusted percent re-enrolled excludes graduates and/or transfers from fall headcount.*

For fall 2013 and 2014 cohorts, the percent of students earning a degree or certificate of achievement in a three-year period increased for all students and for Filipino and Native Hawaiian students but declined for Pell students.

<b>Table 17: Degrees and Certificates of Achievement Earned by Fall Kapi‘olani Community College Cohorts Within Three Academic Years</b>					
<b>Cohort Year</b>	<b>Demographic</b>	<b>Number in Cohort</b>	<b>Number in Revised Cohort</b>	<b>Number of Degrees/Certificates Awarded</b>	<b>%</b>
<b>Fall 2013</b>	All Students	1,297	1,234	209	15.5
	Filipino	146	143	18	12.6
	Native Hawaiian	231	225	18	8.0
	Pacific Islander	29	28	*	*
	Pell	475	457	69	15.1
<b>Fall 2014</b>	All Students	1,257	1,201	202	16.8
	Filipino	134	133	18	13.5
	Native Hawaiian	207	204	20	9.8
	Pacific Islander	25	24	*	*
	Pell	398	375	56	14.9
* Indicates populations with counts <10.					
<i>UH 4-Year Institutions include UH Mānoa, UH Hilo, UH West O‘ahu, and UH Maui College BAS Programs. Students in cohort are new, first-time students enrolled and home-based at Kapi‘olani CC. The revised cohort is the original cohort minus students who transferred to UH 4-Year institutions.</i>					

In Table 18 below, for the Fall 2013 and 2014 cohorts, the number of Filipino, Native Hawaiian, and Pacific Islander students who transferred to a UH four-year campus in a three-year period was less than 10. (Due to UH data governance policies, data are suppressed when the number of students is less than ten.) The percent of all students who transferred declined, while the percent of Pell students who transferred more than doubled from 7.2 to 14.9 percent.

<b>Table 18: UH 4-Year Transfers by Fall Kapi‘olani Community College Cohorts</b>				
<b>Within Three Academic Years</b>				
<b>Cohort Year</b>	<b>Demographic</b>	<b>Number of Students in Cohort</b>	<b>Number of Transfers from Cohort</b>	<b>%</b>
<b>Fall 2013</b>	All Students	1,297	120	9.3
	Filipino	146	*	*
	Native Hawaiian	231	*	*
	Pacific Islander	29	*	*
	Pell	475	34	7.2
<b>Fall 2014</b>	All Students	1,257	113	9.0
	Filipino	134	*	*
	Native Hawaiian	207	*	*
	Pacific Islander	25	*	*
	Pell	398	56	14.9
* Indicates populations with counts <10.				
<i>Number of transfers to UH 4-Year Institutions include the following: UH Mānoa, UH Hilo, UH West O‘ahu, and UH Maui College BAS Programs.</i>				
<i>Fall 2015 cohort data not available until fall 2018.</i>				

Between 2013-14 and 2016-17, the number of degrees and certificates completed by All, Filipino, Native Hawaiian, and Pacific Islander students decreased, but the number of degrees and certificates completed by Pell students increased.

<b>Table 19: Kapi‘olani Community College Degrees and Certificates of Achievement Awarded per Fiscal Year</b>				
<b>Demographic</b>	<b>FY 2013-2014</b>	<b>FY 2014-2015</b>	<b>FY 2015-2016</b>	<b>FY 2016-2017</b>
All Students	1,513	1,335	1,383	1,356

Native Hawaiian	76	105	77	106
Pacific Islander	12	13	*	11
Pell	143	225	197	199

### **Student Achievement in Annual Reports of Program Data**

Twenty-three academic programs track student achievement through their annual program effectiveness measures, which include:

- 1) Course Success (also an ISS)
- 2) Fall to Spring Persistence (re-enrollment in IEMs) (also a Strategic Plan measure)
- 3) Fall to Fall Persistence (re-enrollment in IEMs) (also a Strategic Plan measure)
- 4) Certificates and Degrees Awarded (also an ISS) (also a Strategic Plan measure)
- 5) Transfers (also an ISS) (also a Strategic Plan measure) (See, I.B.7)

In Table 21 below, eight academic programs track student achievement through licensing exam pass rates. In AY 2014-15, four programs achieved pass rates of 100 percent, one achieved a 97 percent pass rate and another achieved an 89 percent pass rate. In AY 2015-16, all five reporting programs achieved a 100 percent pass rate. In AY 2016-17, all programs achieved a 100 percent pass rate with the exception of Medical Assisting, which had a 71 percent pass rate.

<b>Table 21: Licensing Exam Pass Rates for 8 Academic Programs at Kapi‘olani Community College</b>			
<b>Program</b>	<b>AY 2014-2015</b>	<b>AY 2015-2016</b>	<b>AY 2016-17</b>
Medical Assisting	89%	100%	71%
Medical Laboratory Technician	100%	93%	100%
Mobile Intensive Care Tech	100%	100%	100%
Nursing: Associates Degree in Nursing	88%	N/A	100%
Nursing: Practical Nursing	97%	N/A	100%
Occupational Therapist	80%	76%	100%
Physical Therapist Assistant	69%	100%	100%
Radiologic Technologist	100%	100%	100%
Respiratory Care	100%	93%	100%

\* Annual Reports of Program Data ([ISS-7](#))

**Student Achievement: National Community College Benchmark (NCCB) Reports**

The College participates in the NCCB Project in order to avail itself of comparative data on student achievement derived from 242 colleges nationally. Table 22 below summarizes strengths and weaknesses identified in the College’s 2017 NCCBP report.

<b>Table 22: NCCBP Identified Strengths and Weakness, 2017</b>			
<b>Strengths</b>	<b>Kapi‘olani Rank</b>	<b>Weaknesses</b>	<b>Kapi‘olani Rank</b>
Percent of Full-time, First-Time Students who Completed or Transferred in Six Years	93 <sup>rd</sup> Percentile (higher is better)	Percent of Students that Received a Passing Grade of those that Completed English Composition II	4 <sup>th</sup> percentile (higher is better)
Percent of Part-time, First-Time Students who Transferred in Six Years	92 <sup>nd</sup> Percentile (higher is better)	CCSSE Student Effort Benchmark	4 <sup>th</sup> percentile (higher is better)
Percent of Part-time, First-Time Students who Completed or Transferred in Six Years	87 <sup>th</sup> percentile (higher is better)		
Tuition and Fees as Percentage of Median Service Area Income	13 <sup>th</sup> percentile (lower is better)

## *Organization of the Institutional Self-Evaluation Process*

In August 2016, the Interim Chancellor assigned the College's Accreditation Liaison Officer and the Interim Chancellor's Executive Assistant, Ms. Joanne Whitaker, and Dr. Sunyeen Pai, Digital Initiatives Librarian, to co-chair the 2018 Institutional Self-Evaluation Report (ISER).

During the months of August and September, the co-chairs visited the four Authorized Governance Organizations (AGOs), the Faculty Senate, the Staff Council, the Student Congress, and 'Aha Kalāualani (Native Hawaiian Council) to inform them of the ACCJC self-evaluation process and to request their support for the effort. An open meeting was held for the entire campus to talk about the two-year report-writing process for which the College was preparing.

During the planning of the ISER effort, the report co-chairs facilitated discussions about the positive aspects and lessons learned in the process of writing the 2012 ISER. Some of the recommendations for the 2018 report writing process were:

- Create smaller teams
- Have standard team leaders build their own teams to encourage commitment
- Design a flatter organizational structure to increase communication
- Inform the team members as to how their drafts are edited as their voices are crafted into a single report voice

Ten teams were created to address the standards. The team leads/principal writers were asked to join the report-writing effort. The co-chairs worked with the team leaders to add writers and investigators to their teams, resulting in an overall team of almost 40 volunteers. This number of volunteers was in great contrast to the 2012 team of 120 participants.

Weekly report meetings started in August 2016. The teams were asked to analyze their standards and use the guiding prompts to investigate how well the College was performing the functions addressed by the standards. Administrators, program heads, and others served as subject matter experts.

By January 2017, the report had identified a number of areas for improvement, and the co-chairs facilitated the starting of conversations that were needed for the College to continue its self-evaluation and process of continuous improvement.

The co-chairs felt strongly that faculty and staff on the ISER team needed to develop a deeper knowledge about accreditation. From fall 2016 through fall 2017, team members were sent to ACCJC trainings in Guam, Kapolei (on O'ahu, Hawai'i), San Francisco, the ACCJC Conference in Irvine, California, and the day-long ACCJC site visit training for colleges in the Pacific held at

Kapi‘olani Community College. Team members and key administrators were strongly encouraged to participate on evaluation teams and faculty, staff, and administrators were sent on over ten evaluation team visits. In September 2016, the assessment consultant Robert Pacheco was invited by the University of Hawai‘i Community College (UHCC) System to give a two-day workshop on accreditation and assessment. In March 2017, the College hosted an assessment workshop given by Linda Suskie, which was attended by over 60 representatives from all of University of Hawai‘i’s community colleges and other Pacific Island colleges.

In October 2016, the Office of Institutional Effectiveness administered a campus climate survey, called *Closing the Loop*, that queried faculty and staff about a number of subjects including leadership, physical resources, and governance. Survey questions related to accreditation matters were noted. This survey was then revised with input from the accreditation writing team and administered again in November 2017. The resulting report issued in spring 2018 is entitled *Getting Better at Getting Better*.

The co-chairs gave updates on the ISER to the Chancellor’s Advisory Council (CAC) at its monthly meetings. This Council is the broadest assembly of leaders from all areas of the College, including administration, departments, units, offices, and Authorized Governance Organizations. The co-chairs reported to the College at all faculty and staff convocations, which take place at the beginning of each fall and spring semester.

During the summer of 2017, as much of the heavy work of assembling evidence and interviewing subject matter experts was over, the tasks of analysis and evaluation and writing across the standards continued with a smaller team. Six members from the original writing team were asked to continue and a copy-editor joined the team.

The report draft, primarily reporting on *Evidence of Meeting the Standard* and identifying areas for improvement, was shared with the College in fall 2017. The second public draft was shared in March 2018. Beginning in March, the Interim Chancellor met with the co-chairs to review the draft for accuracy. In April 2018, the co-chairs led weekly campuswide informational sessions. The final draft was submitted to the Office of the Vice President for UHCC May 15, 2018.

The report was approved by the University of Hawai‘i Board of Regents June 8, 2018.

## *Organizational Information*

The current organizational chart and functional statements are being revised to reflect a change in the structure of the campus developmental education courses and faculty to improve the overall successful completion of mathematics and English for developmental students. The mathematics and English faculty positions in Kahikoluamea (Developmental Education Department), which was under Student Affairs, were moved to the departments of Math/Sciences and Languages, Linguistics, and Literature (LLL), respectively, within the Kapi‘olani Community College Arts and Sciences unit of the Office for Academic Affairs to better reflect the College’s focus on student success and developmental education reform. The Student Affairs practitioners in Kahikoluamea were moved to support other initiatives across the College in the Student Affairs unit such as a counselor for online students.

In September 2012, the former Chancellor appointed a Foundations Taskforce to develop recommendations to improve the quality of student learning outcomes and student success in pre-college math and English courses. The number of students achieving success was declining. In addition, students were expending precious financial aid to complete courses with no college credit. In some cases, financial aid was depleted before students were able to complete their degrees. The Task Force’s recommendation in Spring 2013 was to consolidate the two levels of instruction: “Developmental courses in English and math should be organized in a common department with their college-level counterparts.” The recommendation was not implemented at that time.

In fall 2014, in order to prioritize strategies and implement them consistently throughout the community college system, the UHCC system established the Student Success Council (SSC), composed of representatives from faculty, administration, institutional research, Banner and the State of Hawai‘i public schools. One of the four focus areas to increase student success was developmental education. In AY 2014-2015, the University of Hawai‘i Community College’s Student Success Council redesigned the developmental education structure to include co-requisite models for teaching mathematics and English. Each community college was required to implement campus specific co-requisite courses to be offered in fall 2016. In fall 2016, the Interim Chancellor moved the developmental education faculty into the Arts and Sciences unit. For more information, see II.A.4.

The Administrative Staff Council is made up of ten members, nine of whom are in executive positions (E). The Administrative Staff Council meets on a weekly basis and advises the Chancellor. This group includes the Vice Chancellors for Academic Affairs, Student Affairs, and Administrative Services; the three Academic Program Deans, the Dean for the Office of Community and Continuing Education, the Student Affairs Coordinator, the Chancellor’s Executive Assistant, and the Chancellor. In addition, when appropriate, guests are invited to

inform the Council on specific topics. Any and all issues concerning the College are discussed at the Administrative Staff Council, and members are responsible for the two-way flow of information so that the college community is informed of administrative decisions, and so that these decisions are informed by the needs, ideas, and visions of the college community members. There are ten executive positions at the College. One of the executive's role is primarily to support the development of the Culinary Institute of the Pacific and therefore, is not one of the members of the Administrative Staff Council.

**Table 1. Kapi'olani Community College, Administrative Staff Council, Spring 2018**

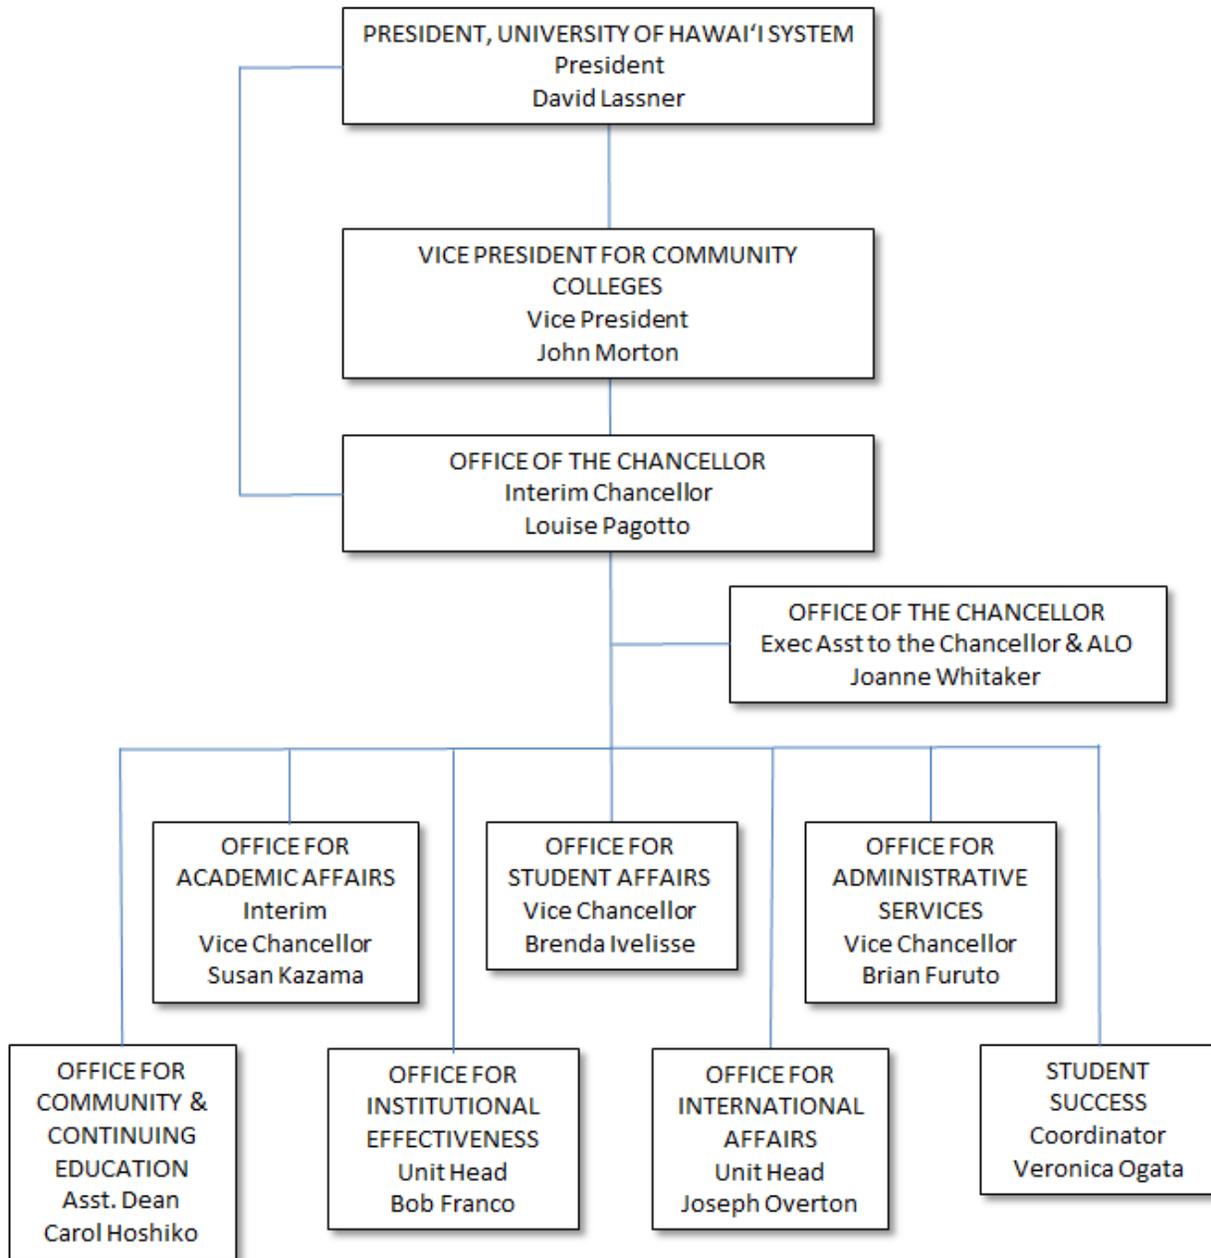

Administrator	Title	Highest Degree
Louise Pagotto (E)	Interim Chancellor <sup>1</sup>	PhD
Joanne Whitaker (E)	Executive Assistant to the Chancellor	MM
Susan Kazama (E)	Interim Vice Chancellor for Academic Affairs	MLS

Carol Hoshiko (E)	Assistant Dean, Office for Community and Continuing Education	PhD
No'eau Keopuhiwa	Interim Student Affairs Coordinator	PhD

---

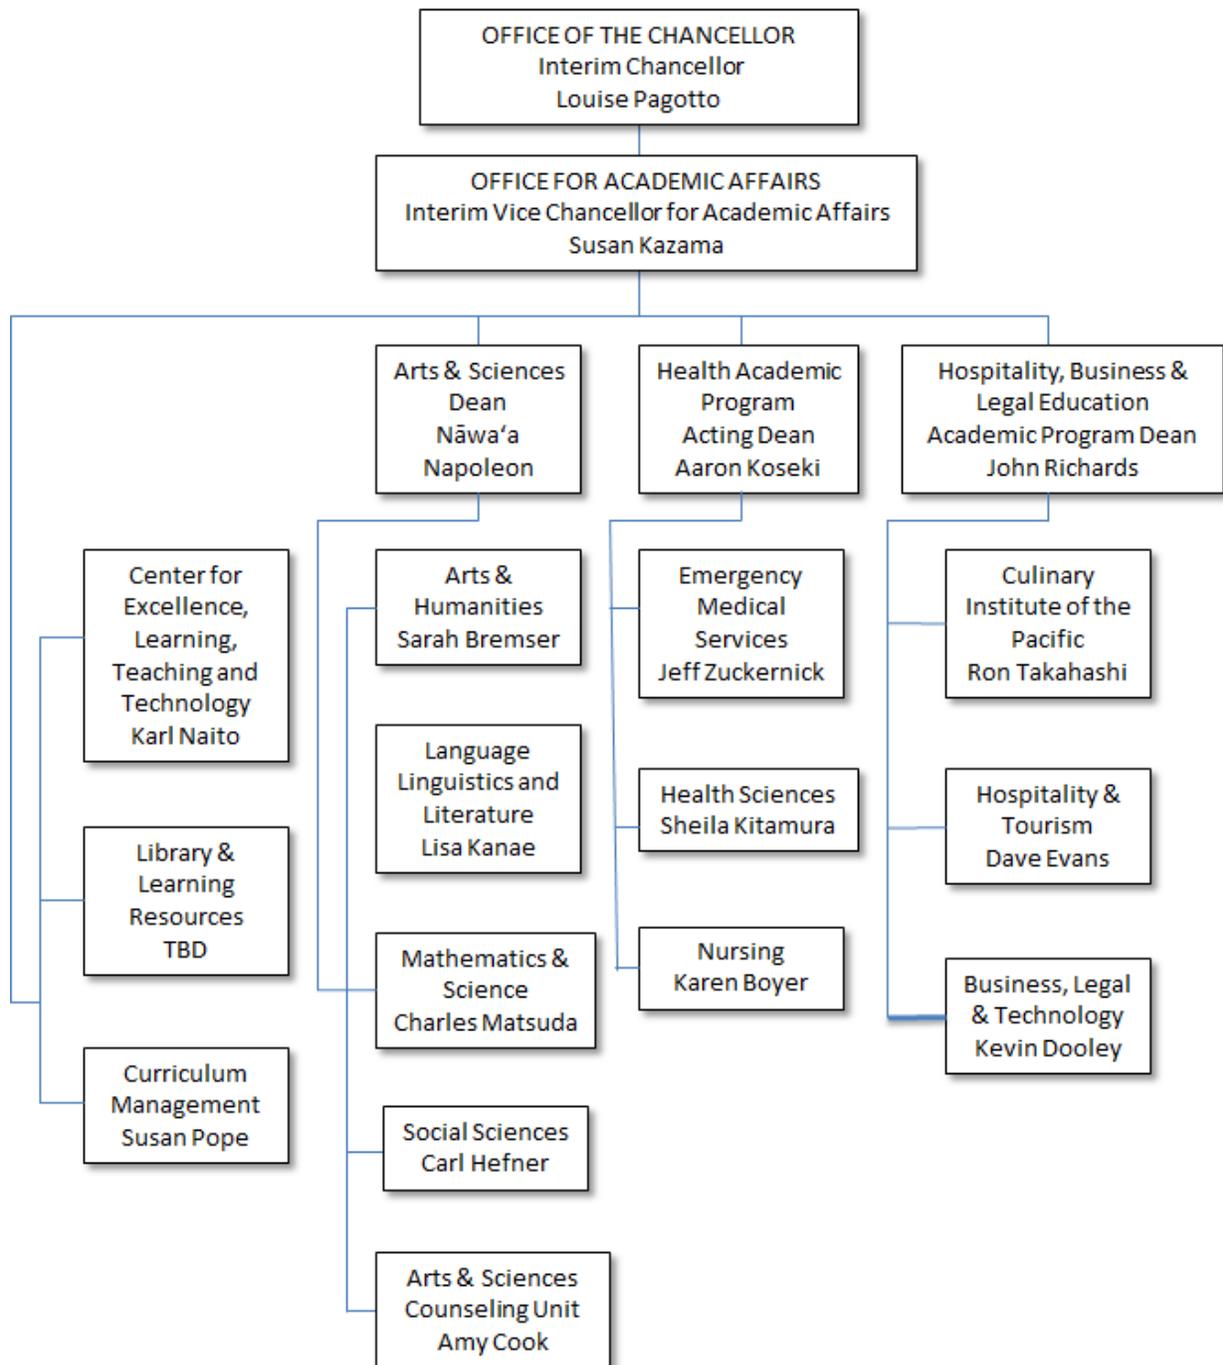

<sup>1</sup> The Vice President for Community Colleges recommended to the University of Hawai'i President the appointment of the Interim Chancellor as the permanent Chancellor for Kapi'olani Community College. The effective date of the appointment is June 8, 2018.

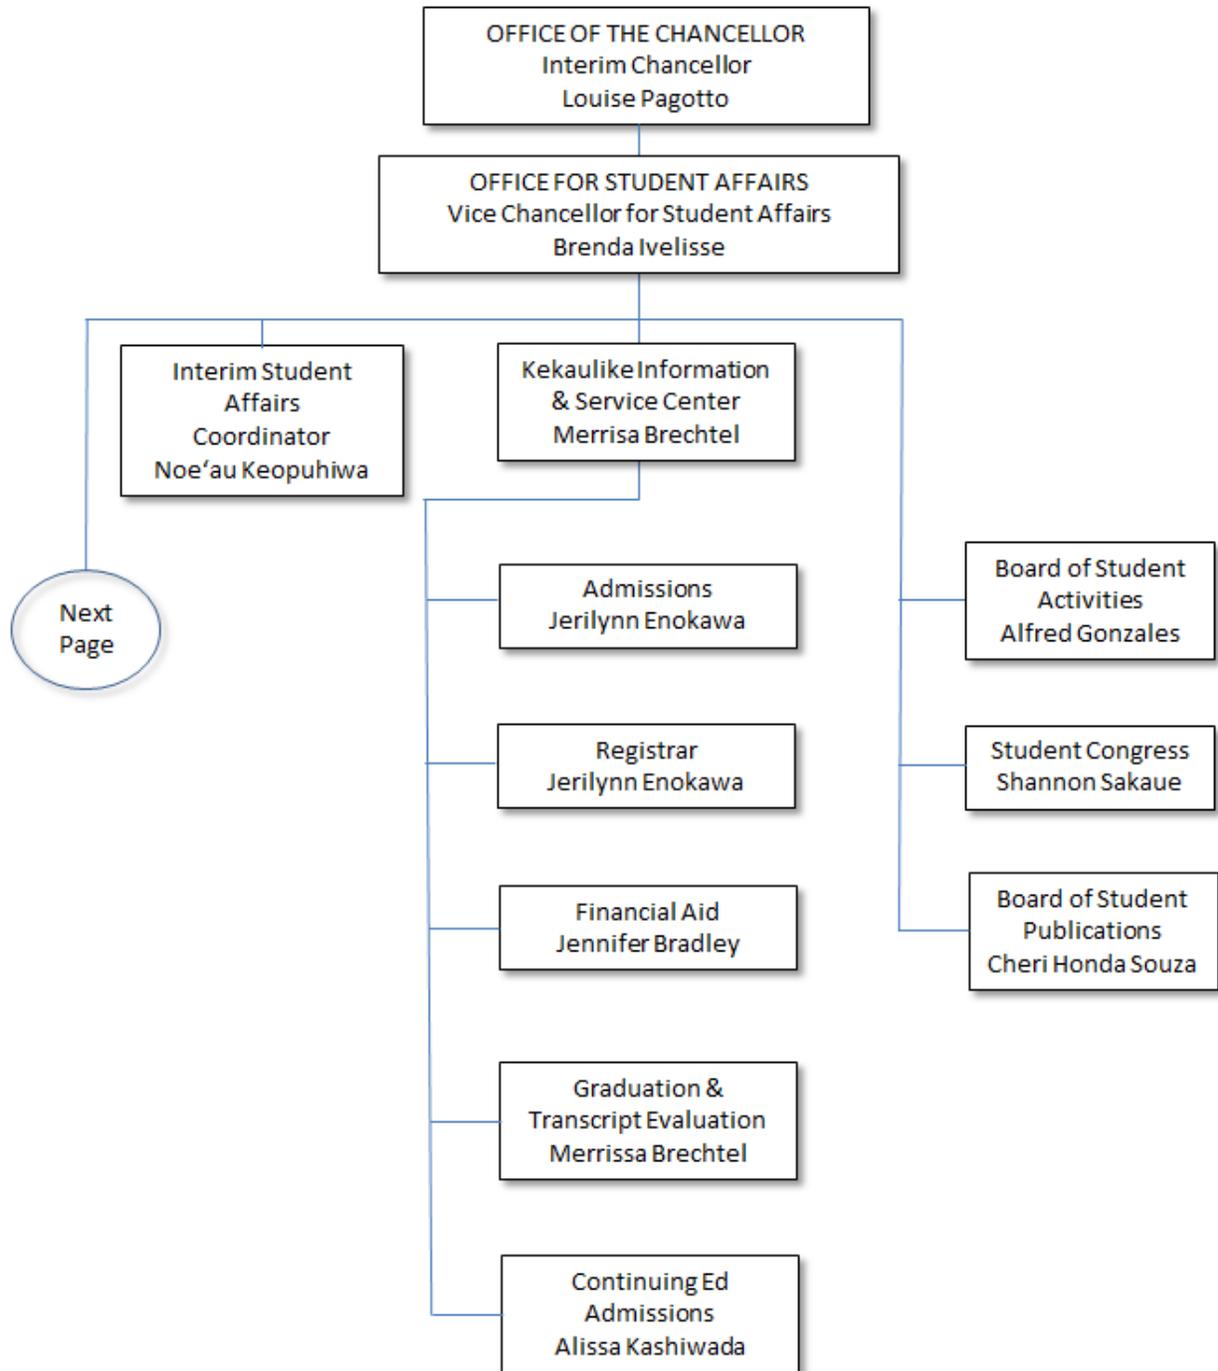

The College's official [organizational chart](#) and [functional statement](#) are listed on the University of Hawai'i Community Colleges' [website](#). The following charts include personnel names.

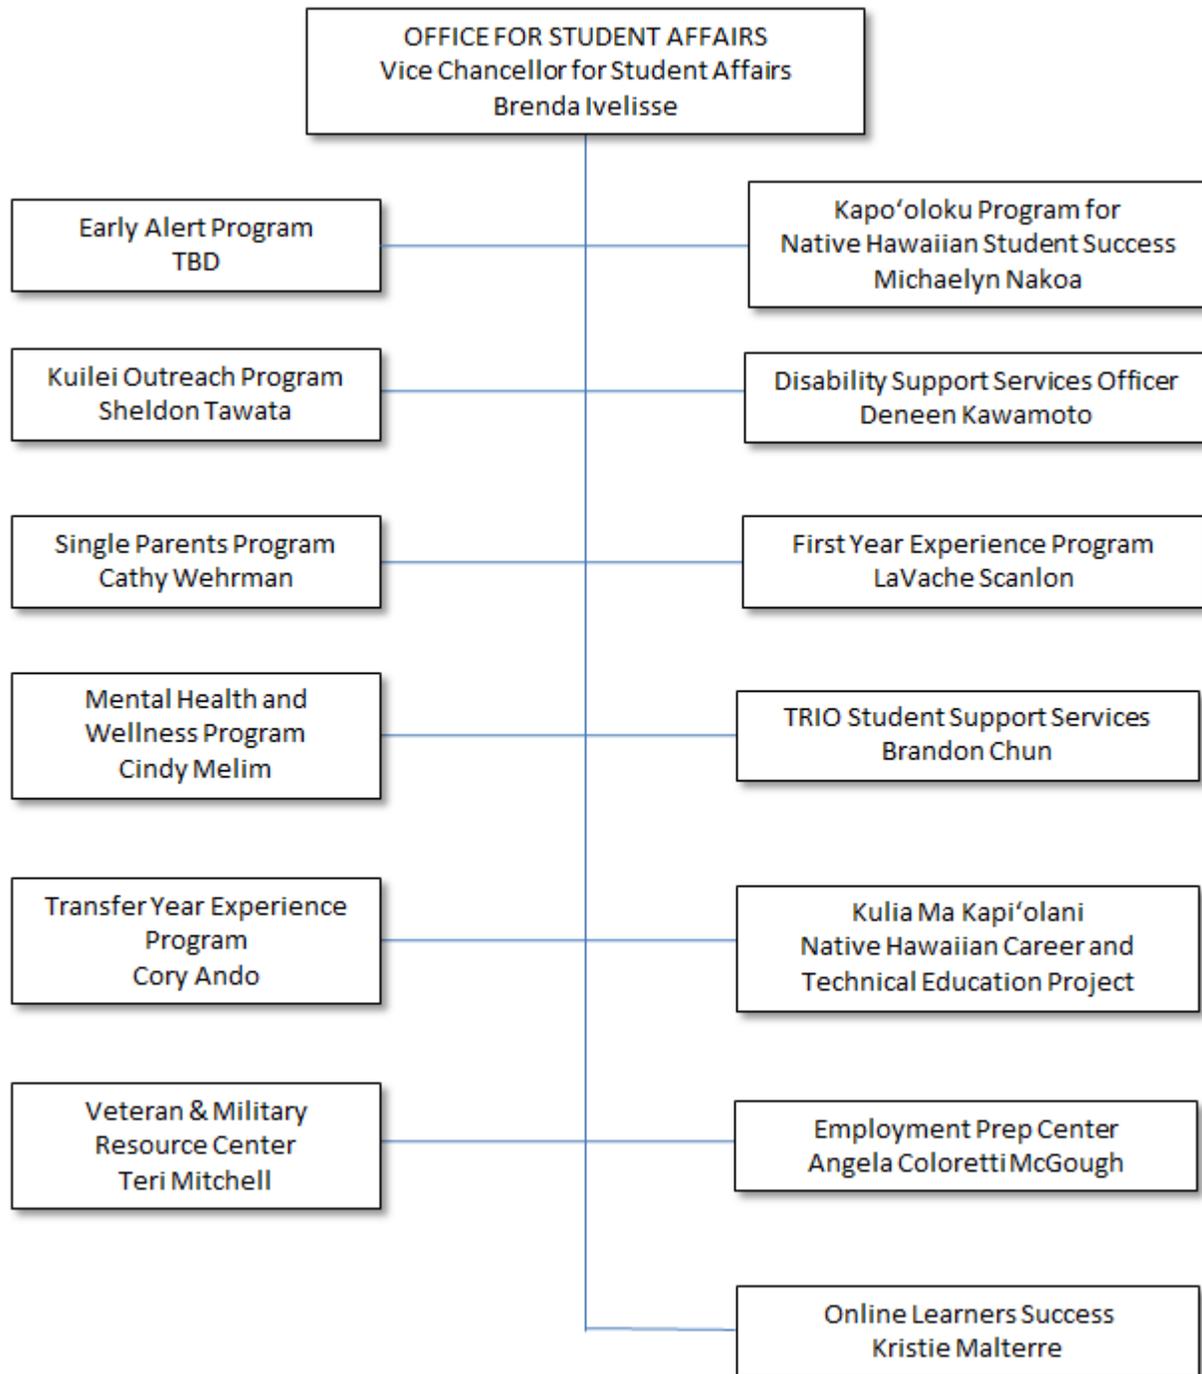

### 2018 Organizational Charts

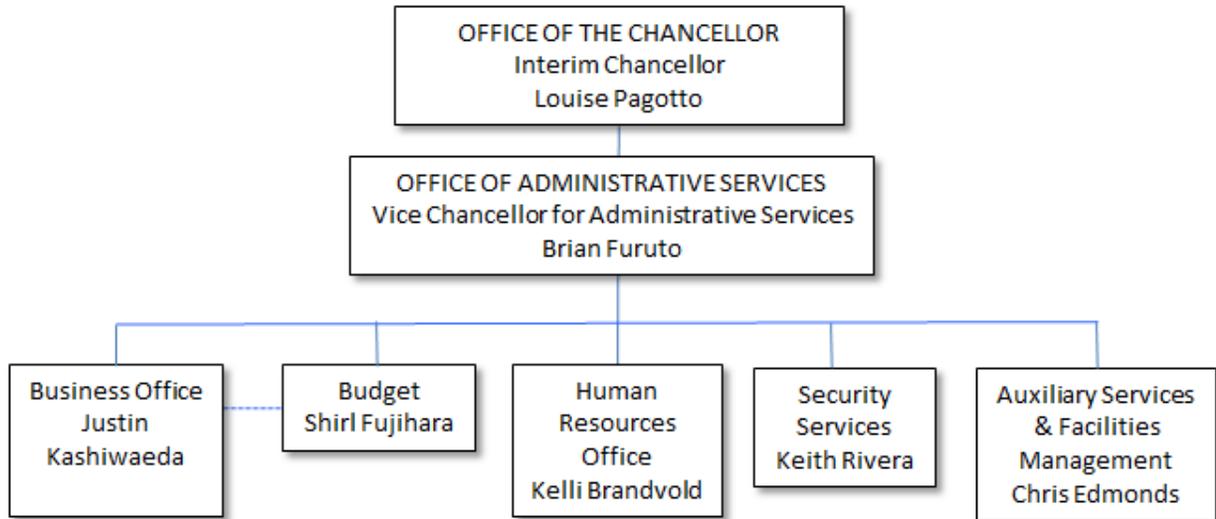

Updated  
4/22/2018

## Employee Profile

The gender profile for all employees is in Table 2 below. The female employees continue to outnumber the male employees slightly, mirroring the student body gender ratio. The faculty to lecturer ratio has generally remained the same with more full-time faculty than lecturers. The number of executives has remained constant since 2013 and the number of APT showing a small increase. APT are Administrative, Professional and Technical staff and civil service employees are clerical and secretarial positions.

**Table 2. Gender Profile for All Kapi‘olani Community College Employees**

## **Certification of Continued College Compliance with Eligibility Requirements 1-5**

Kapi‘olani Community College has examined its policies and practices considering the expectations of the Eligibility Requirements (ERs) as required for the completion of the Institutional Self Evaluation Report. Requirement 1 through 5, inclusive, are summarized separately in this section; the analysis of the remaining ERs is included in the narrative responses to the standards, as relevant. Evidence demonstrating continued compliance with the ERs is included, as relevant.

### **1. Authority**

Kapi‘olani Community College is a public, two-year comprehensive community college operating under the University of Hawai‘i System of Higher Education and duly authorized by the State of Hawai‘i to award degrees and certificates appropriate for two-year institutions. The University of Hawai‘i Community College (UHCC) System is responsible for the quality of the community colleges and operates through a centralized office. All degrees, certificates and other awards granted by the College are duly approved by the College and the Board of Regents.

Kapi‘olani Community College began in 1946 as the Kapi‘olani Technical School at a time when Hawai‘i was still a territory of the United States. The innovative school was administered by the Territorial Department of Instruction with a strong academic focus on food service. But in 1959, as Hawai‘i was entering statehood, three additional programs were added: practical nursing, business education and dental assisting. In 1965 the College realigned its academic mission and joined the University of Hawai‘i Community College (UHCC) System. From its original home at the corner of Pensacola Street and Kapi‘olani Boulevard to its current location on the slopes of scenic Diamond Head, the College has established itself as a flagship institution in the UHCC System.

### ***Conclusion***

The College has continuously complied with Eligibility Requirement 1, Authority. The College is authorized to operate as a community college in the State of Hawai‘i and to award degrees by the UHCC and the Board of Regents, its governing board.

### ***Evidence***

- [E-1](#) Hawai‘i Constitution, Article X
- [E-2](#) HRS 304A-101
- [E-3](#) Board of Regents Policy RP 3.201
- [E-4](#) Board of Regents Policy RP 4.207
- [E-5](#) ACCJC Certificate of Accreditation

## **2. Operational Status**

Since its inception in 1946, Kapi‘olani Community College has been in continuous, uninterrupted operation. The College has a student headcount of 7,095 (fall 2017) and full time equivalent student count of 2,606. The College is a comprehensive two-year institution serving students with a wide variety of educational goals, including the first two years of post-secondary study (baccalaureate transfer pathway), associates degrees in workforce and career technical education fields, pre-collegiate courses to develop college readiness, and noncredit and community education. The pursuit of academic degrees is the principal reason for matriculation to the College.

College operations are robust and organized to best meet the College mission (see I.A). The College has an annual budget of approximately \$44,843,450 (FY17) with 253 full-time faculty and 10 administrative and 163 support staff.

### ***Conclusion***

The College complies and has continuously complied with Eligibility Requirement 2, Operational Status. The College is a viable and robust post-secondary educational institution in Hawai‘i with core faculty and staff to support its institutional mission.

### ***Evidence***

- [E-6](#) College Catalog
- [E-7](#) Class Schedule

## **3. Degrees**

Kapi‘olani Community College awarded 1,356 associate degrees and certificates in the 2016-2017 academic year. Associate degrees comprise traditional two-year courses of study, except for most health programs, which require prerequisite courses. The College maintains a catalog detailing the graduation and certificate unit requirements and student learning outcomes for all courses and programs, for all potential students. The College maintains a curriculum committee that operates under the Faculty Senate and handles all academic and professional matters, including the creation, implementation and evaluation of all curriculum. The College and University of Hawai‘i System’s Board of Regents approve all relevant programs of study through a system of oversight and review. (See II.A.)

### ***Conclusion***

The College complies and has continuously complied with Eligibility Requirement 3, Degrees. The College issues the associates degree as the principal award, which is a two-year course of

study. The College also awards certificates. All curriculum is created and approved through rigorous academic processes led by faculty, approved by the Chancellor. New programs are given final approval by the Board of Regents.

***Evidence***

- [E-8](#) College Catalog
- [E-9](#) Class Schedule

**4. Chief Executive Officer**

The College has a Chief Executive Officer (CEO) duly appointed by the Board with the exclusive and full-time responsibility to execute board policies. The CEO at Kapi‘olani Community College is the Chancellor. The University of Hawai‘i System, which includes seven community colleges and three universities, is led by a President. An interim CEO was appointed from June 2016 to June 2018. On April 17, 2018, the Vice President for Community Colleges announced that he had recommended to the University President, the appointment of the Interim Chancellor as the next permanent Chancellor for Kapi‘olani Community College. The effective date of appointment is June 8, 2018. The College notifies the accrediting commission of all executive leadership changes in a timely fashion. There are established UHCC System policies for the hiring and evaluation of the CEO. Delegation of authority to administer board policies is likewise governed by established board policy. (See IV.B.)

***Conclusion***

The College complies with Eligibility Requirement 4, Chief Executive Officer. The College is authorized to operate as a post-secondary educational institution in Hawai‘i and to award degrees by the University of Hawai‘i System and the State of Hawai‘i.

***Evidence***

- [E-10](#) Board of Regents Policy RP 2.202
- [E-11](#) UH Executive Policy EP 1.102
- [E-12](#) Board of Regents Policy RP 9.201
- [E-13](#) UH Executive Policy 9.212
- [E-14](#) Board of Regents Policy RP 9.212

**5. Financial Accountability**

The College's financial operations and systems are reviewed as part of the UHCC System both internally and via external audit performed by an independent certified public accountant. There were no findings from the external audit (See III.D.5) and findings from the internal audit have

been addressed (see III.D.7) . The UHCC applies generally accepted accounting principles for its operations and for audit. On a biennial cycle, the University of Hawai‘i’s budget is presented to and reviewed by the Board of Regents and presented to the State Legislature. The College’s operating budget approved by the Board of Regents for FY 2017 has a projected \$44,843,450 in unrestricted revenue to fund an unrestricted expenditure budget of \$44,093,544. All financial evaluations include a thorough review of internal financial systems, compliance with state and federal laws and regulations. Since the College is part of the UHCC System, all audits are examined by the UHCC and UH financial offices for further oversight and examination. The last audit was completed on December 15, 2016.

The College is also authorized to award financial aid under federal Title IV. The College follows the required components of the Title IV of the United States Code of Federal Regulations. The College conducts all audits and program or other review activities required by the USDE and addresses any findings. All required financial documents, program records, etc. are appropriately stored and maintained in secure college record keeping systems. The College has the fiscal and administrative capacity to timely address current and future financial obligations. Student loan default rates are well within the acceptable range defined by the USDE for our institution. (See IV.D. and Checklist for Compliance with Checklist for Evaluating Compliance with Federal Regulations and Related Commission Policies, Title IV Compliance)

### ***Conclusion***

The College complies with Eligibility Requirement 5, Financial Accountability. The College is a financially stable state-supported institution that is subject to regular external audits and that has proper systems of internal controls to monitor financial and budgetary requirements.

### ***Evidence***

- [E-16](#) Title IV Authorization for Federal Aid DOE Federal Student Aid listing , code # 001613

## Continued Compliance with Federal Regulations and Commission Policies

As part of its self-evaluation, Kapi‘olani Community College has examined its continued compliance with the ACCJC policies established to implement the eligibility requirements, standards as well as Federal regulations. Special attention was given to the policies related to the college mission.

To report its findings, the College has recreated and embedded the ACCJC Checklist for Evaluating Compliance with Federal Regulations and Related Commission Policies into the ISER to evaluate the policies that must be separately addressed, namely:

- Policy on Rights and Responsibilities of the Commission and Member Institutions
- Policy on Institutional Degrees and Credits
- Policy on Transfer of Credit
- Policy on Distance Education and on Correspondence Education
- Policy on Representation of Accredited Status
- Policy on Student and Public Complaints against Institutions
- Policy on Institution Advertising, Student Recruitment, and Representation of Accredited Status
- Policy on Contractual Relationships with Non-Regionally Accredited Organizations
- Policy on Institutional Compliance with Title IV

The College has also added a matrix that provides a self-evaluation narrative, evidence of compliance, and links to other relevant areas demonstrating compliance. A three-point rubric was used to justify the conclusions: “Meets”, “In Progress,” and “Does Not Meet” the compliance expectation. A score of “Meets” indicates that processes and practices satisfactorily address all the expectations. A score of “In Progress,” on the other hand, notes that processes and practices substantially meet most of the compliance requirements. A score of “Does Not Meet” notes that work is needed to substantially meet policy expectations. After careful analysis, the College was found to be in compliance with all commission policies and federal regulations

Three ACCJC policies are relevant to the re-accreditation process itself:

- Policies Embedded in the Accreditation Standards
- Policies Requiring Separate Coverage
- Policies Relevant to the Accreditation Process.

College compliance with these policies is noted in the ISER, specifically in Standard I.C., Institutional Integrity. The remaining Commission policies are embedded within and referenced substantive standards.

Course completion is included as one of these elements of student achievement. Other elements of student achievement performance for measurement have been determined as appropriate to the institution's mission.</i></p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>● The College, in association and cooperation with the system office, has established institution-set standards at the college level of analysis for planning and institutional improvement.</li> <li>● Successful Course Completion as a metric is one of the measures of institutional performance via Hawai'i System Policy.</li> <li>● The Institution Set Standards were discussed and reviewed by the College governance process in cooperation with the UHCC Vice President's Office.</li> <li>● The College uses floor, or baseline, measures and aspirational goals for college analysis.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard I.A.2, I.B.2; I.B.3, I.B.5</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● See ISER 2018 chapter on Presentation of Student Achievement Data and Institution Set Standards</li> </ul>
<p>Kapi'olani CC Self- Assessment</p>	<p><b>Item Two:</b> <i>The institution has defined elements of student achievement performance within each instructional program, and has identified the expected measure of performance within each defined element. The defined elements include, but are not limited to, job placement rates for program completers, and for programs in fields where licensure is required, the licensure examination passage rates for program completers.</i></p>

<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● The College has included programmatic level analysis for employment using licensure passage, program completion, and employment rates. Goal setting is connected to the floor and aspirational analysis.</li> <li>● Institution set standards for CTE programs are included in the ACCJC Annual Report.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● Standard I.B.2; I.B.3, II.A.1, II.A.13, II.A.14</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● See ISER 2018 chapter on Presentation of Student Achievement Data and Institution Set Standards</li> <li>● <a href="#">F-2</a> ACCJC annual reports</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Three:</b> <i>The institution-set standards for programs and across the institution are relevant to guide self-evaluation and institutional improvement; the defined elements and expected performance levels are appropriate within higher education; the results are reported regularly across the campus; and the definition of elements and results are used in program-level and institution-wide planning to evaluate how well the institution fulfills its mission, to determine needed changes, to allocating resources, and to make improvements.</i></p>
<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● Kapi‘olani CC regularly evaluates progress on its mission through its strategic plan review.</li> <li>● Multiple college settings are used to convey information as well as twice yearly visits to the College by the UHCC Vice President.</li> <li>● Institutional Set Standards are also shared with all College departments and units to connect with the student success pathway work at the College.</li> <li>● Program Review fuels the review of institutional performance.</li> </ul>

	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard I.B.2; I.B.3, I.B.5, I.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● See ISER 2018 chapter on Presentation of Student Achievement Data and Institution Set Standards</li> </ul>
<p>Kapi'olani CC Self-Assessment</p>	<p><b>Item Four:</b> <i>The institution analyzes its performance as to the institution-set standards and as to student achievement, and takes appropriate measures in areas where its performance is not at the expected level.</i></p>
<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● The College has met all but three of the institutional-set standards. Plans have been created for addressing the College performance pursuant to UHCC policy.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard I.B.2; I.B.3, I.B. 6, II.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● See ISER 2018 chapter on Presentation of Student Achievement Data and Institution Set Standards</li> </ul>

<p style="text-align: center;"><b>Credits, Program Length, and Tuition</b></p> <p style="text-align: center;">Regulation citations: 602.16(a)(1)(i); 602.17(f); 602.19 (a-e)</p>	
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item One:</b> <i>Credit hour assignments and degree program lengths are within the range of good practice in higher education (in policy and procedure).</i></p>
<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● The College’s policies and procedures conform to a generally accepted standards for higher education for associates degree pursuant to Hawai‘i and federal regulations.</li> <li>● Credit hour practices are monitored as part of the campus-based curriculum review process.</li> <li>● UHCC policy (UHCCP #5.228) has established administrative procedures to determine a credit hour that generally meets commonly accepted academic expectations.</li> <li>● All programs and courses are approved by the Faculty Senate. The UH Board of Regents approves all new programs.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● Standard II.A.5, II.A.6, II.A.9, II.A.10, II.A.11, II.A.12</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 9, 10, 12</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-3</a> UHCC Policy UHCCP #5.228. Credit Hour.</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Two:</b> <i>The assignment of credit hours and degree program lengths is verified by the institution, and is reliable and accurate across classroom based courses, laboratory classes, distance education classes, and for courses that involve clinical practice (if applicable to the institution).</i></p>
<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● The College has established policies and procedures for the definitions of credit hour that align with commonly accepted practices at the collegiate level and comply with UHCC policy UHCCP #5.228.</li> <li>● All programs and courses are developed and updated by faculty and approved at the College by the Chancellor. New programs are approved by the UH Board of Regents.</li> <li>● The College has an established curriculum committee that reviews the technical requirements and content in all new and existing courses and programs.</li> </ul>

	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Standard II.A.5, II.A.6, II.A.9, II.A.10, II.A.11, II.A.12</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 9, 10, 11, 12</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• <a href="#">F-3</a> UH Executive Policy EP 5.228. Credit Hour.</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Three:</b> <i>Tuition is consistent across degree programs (or there is a rational basis for any program specific tuition).</i></p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Kapi‘olani CC is an open admission two-year institution. Tuition is a uniform rate of \$126 per credit with additional fees for student activities, student government, and student publications.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• See Response to Standard I.B.2; I.B.3, II.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• <a href="#">F-4</a> UH Executive Policy EP 6.202. Tuition-Setting Procedures</li> <li>• <a href="#">F-5</a> Kapi‘olani CC website, Tuition and Fees</li> <li>• <a href="#">F-6</a> Kapi‘olani CC catalog, p. 29</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Four:</b> Any clock hour conversions to credit hours adhere to the Department of Education’s conversion formula, both in policy and procedure, and in practice.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Certain programs include courses that have been designed to follow Federal standards for clock-to-credit-hour conversions. These are typically internships, practica or clinical courses: Respiratory Care (RESP 222), Mobile Intensive Care Technician (MICT 330), Physical Therapy Assistant (PTA 252), and Medical Laboratory Technician (MLT 242). Federal regulations require that one semester/trimester credit hour is equal to at least <b>37.5 clock hours</b> of instruction. The College exceeds federal standards as most courses that are based on</li> </ul>

	<p>clock hours actually conform to the formula used for classroom-delivered laboratory courses, where one credit is equivalent to 45 hours over the semester.</p>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● Standard II.A.9</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Not Applicable</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● N/A</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Five:</b> The institution demonstrates compliance with the <i>Commission Policy on Institutional Degrees and Credits</i>.</p>
<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● The College has established policies and procedures to define credit hour that align with commonly accepted practices for higher education and comply with UHCC Policy UHCCP #5.228.</li> <li>● All programs and courses are approved by faculty and ultimately approved at the College by the Chancellor. New programs are approved by the UH Board of Regents.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard I.B.2; I.B.3, II.A.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 11</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-7</a> Board of Regents Policy RP 5.201. Instructional Programs</li> <li>● <a href="#">F-8</a> UH Executive Policy EP 5.228. Credit Hour;</li> <li>● <a href="#">F-9</a> UH Executive Policy EP 5.201. Approval of New Academic Programs and Review of Provisional Academic Programs</li> <li>● <a href="#">F-10</a> UH Executive Policy EP 5.203, University of Hawai‘i Program Credentials.</li> <li>● <a href="#">F-11</a> UHCC Policy UHCCP 5.203. Program Credentials: Degrees and Certificates</li> </ul>

<b>Transfer Policies</b> [Regulation citations: 602.16(a)(1)(viii); 602.17(a)(3); 602.24(e); 668.43(a)(ii).]	
Kapi‘olani CC Self-Assessment	<b>Item One:</b> <i>Transfer policies are appropriately disclosed to students and to the public.</i>
Meets	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● UHCC and University of Hawai‘i policies on the transfer of credit are current and available in the catalog and college website.</li> <li>● The evaluation process and the necessary information for students to complete the process are included on the college website and catalog.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard II.A.1, II.A.10</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 20</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-12</a> Kapi‘olani CC website, transfer tab</li> <li>● <a href="#">F-13</a> Kapi‘olani CC 2017-2018 catalog, p.14</li> </ul>
Kapi‘olani CC Self-Assessment	<b>Item Two:</b> <i>Policies contain information about the criteria the institution uses to accept credits for transfer.</i>
Meets	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● The College catalog and College website specify the practices and criteria for the transfer and award of credit between the College and other institutions of higher learning and define the guidelines for acceptance of degree-applicable coursework completed at other colleges and for military service transfer credit.</li> <li>● The College establishes the criteria for acceptance of upper-division coursework to meet associate degree requirements and policy on the use of upper-division coursework.</li> </ul>

	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard II.A.1, II.A.10</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 20</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-14</a> Kapi‘olani CC website, Transferring to KCC</li> <li>● <a href="#">F-15</a> Kapi‘olani CC 2017-2018 catalog, p. 50</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Three:</b> The institution complies with the <i>Commission Policy on Transfer of Credit</i>.</p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>● To evaluate and grant transfer credit, College faculty, counselors, students, and staff use articulation practices in place in the University of Hawai‘i Community College system.</li> <li>● The UHCC system office assists in the articulation of Kapi‘olani CC courses with the University of Hawai‘i system and in the streamlining of transfer between institutions.</li> <li>● College counselors and transcript evaluators use evaluation systems for coursework taken within institutions of higher education in the United States.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard II.A.1, II.A.10</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 20</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-16</a> Kapi‘olani CC website, transfer tab</li> <li>● <a href="#">F-17</a> Kapi‘olani CC 2017-2018 catalog, p.14</li> <li>● <a href="#">F-18</a> Kapi‘olani CC website, Transferring to KCC</li> <li>● <a href="#">F-19</a> Kapi‘olani CC 2017-2018 catalog, p. 50</li> </ul>

<p style="text-align: center;"><b>Distance Education and Correspondence Education</b></p> <p style="text-align: center;">[Regulation citations: 602.16(a)(1)(iv), (vi); 602.17(g); 668.38.]</p>	
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item One:</b> <i>The institution has policies and procedures for defining and classifying a course as offered by distance education or correspondence education, in alignment with USDE definitions.</i></p>
<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● All Kapi‘olani CC distance credit courses are distance education, not correspondence education, in alignment with USDE definitions.</li> <li>● The College designed a review procedure to ensure that credit courses are in alignment with USDE definitions of distance education.</li> <li>● The College has a Faculty Senate Distance Education Committee that provides insight and recommendations to the governance bodies on methods to maximize learning in virtual and hybrid settings.</li> <li>● Professional development is in place to teach students and faculty on how best to teach and learn in the virtual environment.</li> <li>● All class offerings, regardless of delivery mode, follow the same course outline of record and the same expected student learning outcomes.</li> <li>● Discipline faculty in academic programs complete program review, which includes program-level success and enrollment metrics disaggregated for online as well as face-to-face modes of delivery.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard II.A.1, II.B.1; II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-20</a> Distance Education Plan</li> <li>● <a href="#">F-21</a> Faculty Senate Distance Education Committee website</li> </ul>

<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Two:</b> <i>There is an accurate and consistent application of the policies and procedures for determining if a course is offered by distance education (with regular and substantive interaction with the instructor, initiated by the instructor, and online activities are included as part of a student’s grade) or correspondence education (online activities are primarily “paperwork related,” including reading posted materials, posting homework and completing examinations, and interaction with the instructor is initiated by the student as needed)</i></p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>● At Kapi‘olani CC, all class offerings, regardless of delivery mode, follow the same course outline of record and the same expected student learning outcomes..</li> <li>● Faculty subject matter experts review content, implementation and design.</li> <li>● Faculty and administration have access to enrollment metrics disaggregated for online as well as face-to-face modes of delivery.</li> <li>● Program review, the venue for dialogue about success in online courses, takes place during faculty meetings and in discussions between faculty department leads, the deans and the vice chancellor for academic affairs.</li> <li>● The College designed a review procedure to ensure that credit courses are in alignment with USDE definitions of distance education and include regular and substantive interaction initiated by the instructor.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard II.A.1, II.B.1; II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-22</a> Distance Education Plan</li> <li>● <a href="#">F-23</a> Faculty Senate Distance Education Committee website</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Three:</b> <i>The institution has appropriate means and consistently applies those means for verifying the identity of a student who participates in distance education or correspondence education course or program, and for ensuring that student information is protected.</i></p>

<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● The College uses software and other internal practices for online, hybrid and web-enhanced classes. Platforms are established for communication, progress tracking and evidence of stored learning.</li> <li>● Distance education faculty use one or more of the following methods to reaffirm identity:             <ul style="list-style-type: none"> <li>○ proctored testing</li> <li>○ virtual face-to-face meetings</li> <li>○ close attention to changes in writing style</li> </ul> </li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard II.A.1, II.B.1; II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-24</a> Distance Education Plan</li> <li>● <a href="#">F-25</a> Faculty Senate Distance Education Committee website</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Four:</b> <i>The technology infrastructure is sufficient to maintain and sustain the distance education and correspondence education offerings.</i></p>
<p>Meets</p>	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>● Distance Education resource needs are captured through program review, departmental analysis and strategic planning. There is also a Distance Education Plan.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>● See Response to Standard II.A.1, II.B.1; II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>● Eligibility Requirement 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>● <a href="#">F-26</a> Distance Education Plan</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Five:</b> <i>The institution demonstrates compliance with the Commission Policy on Distance Education and Correspondence Education.</i></p>

Meets	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>• The College has a Faculty Senate Distance Education Committee and a Distance Education Coordinator that support online instructional programs and support services including online, hybrid, and web-enhanced instruction for both credit and non-credit classes.</li> <li>• The Center for Excellence in Learning, Teaching and Technology (CELTT) supports professional development for the College’s learning management system and platform to enhance online, hybrid, and on-campus instruction.</li> <li>• All class offerings, regardless of delivery mode, follow the same course outline of record and the same expected student learning outcomes.</li> <li>• The College designed a review procedure to ensure that credit courses are in alignment with USDE definitions of distance education.</li> </ul>
	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• See Response to Standard II.A.1, II.B.1; II.C.1</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 9, 15, 17</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• <a href="#">F-27</a> Substantive Changes for Distance Education October 2011, appendices available upon request.</li> </ul>

<p><b>Student Complaints</b></p> <p>[Regulation citations: 602.16(a)(1)(ix); 668.43.]</p>	
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item One:</b> <i>The institution has clear policies and procedures for handling student complaints, and the current policies and procedures are accessible to students in the college catalog and online.</i></p>
Meets	<p><b><i>Analysis and Evaluation</i></b></p> <ul style="list-style-type: none"> <li>• The catalog describes the policy of student grievances on page 62 and directs a student to contact the department chair if the grievance cannot be resolved with the faculty member. It describes next steps and states that copies of the grievance procedures are available at the Office of the Vice Chancellor for Student Affairs. The <i>Academic Grievance Procedures</i> are on the college website and they set forth the grievance process and the methods to resolve and initiate the grievance and other complaint processes.</li> </ul>

	<ul style="list-style-type: none"> <li>• The college catalog is updated for changes, amendments and improvements to the student grievance process.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not Applicable.</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• <a href="#">F-28</a> Kapi‘olani CC 2017-2018 catalog, p. 62</li> <li>• <a href="#">F-29</a> Kapi‘olani CC website, Policies</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Two:</b> <i>The student complaint files for the previous six years (since the last comprehensive evaluation) are available; the files demonstrate accurate implementation of the complaint policies and procedure.</i></p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The student complaint files for the previous accreditation cycle are available to the site team for review.</li> </ul> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not Applicable.</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• Complaint files provided upon request</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Three:</b> <i>The team analysis of the student complaint files identifies any issues that may be indicative of the institution’s noncompliance with any Accreditation Standards.</i></p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• Complaint files and records are safely maintained on the main campus student services division.</li> </ul>

	<p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not Applicable.</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• None</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Four:</b> <i>The institution posts on its website the names of associations, agencies and governmental bodies that accredit, approve, or license the institution and any of its programs, and provides contact information for filing complaints with such entities.</i></p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The College lists all of the required information from the ACCJC on the College’s main accreditation page.</li> <li>• The College lists all the programmatic accreditors and licensing agencies that sanction, approve or license the institution (with complaint links) on the college accreditation page.</li> </ul> <hr/> <p><b>Standards</b></p> <ul style="list-style-type: none"> <li>• Not Applicable.</li> </ul> <p><b>Eligibility Requirements</b></p> <ul style="list-style-type: none"> <li>• Eligibility Requirement 21</li> </ul> <p><b>Additional Evidence</b></p> <ul style="list-style-type: none"> <li>• <a href="#">F-30</a> ACCJC accreditation webpage</li> <li>• <a href="#">F-31</a> Program accreditation webpage</li> </ul>
<p>Kapi‘olani CC Self-Assessment</p>	<p><b>Item Five:</b> <i>The institution demonstrates compliance with the <b>Commission Policy on Representation of Accredited Status</b> and the <b>Policy on Student and Public Complaints Against Institutions</b>.</i></p>
<p>Meets</p>	<p><b>Analysis and Evaluation</b></p> <ul style="list-style-type: none"> <li>• The student complaint process is established by Board policies and college practice, and procedures are found in the College catalog and on the website.</li> <li>• The catalog describes the policy of student grievances on page 62 and directs a student to contact the department chair if the grievance cannot be resolved with the faculty member. It describes next steps and states that copies of the grievance procedures are available at the Office of the Vice Chancellor for Student Affairs. The <i>Academic Grievance Procedures</i> are on the college website and they set forth the grievance process and the methods to resolve and initiate the grievance</li> </ul>

	and other complaint processes.

## Glossary, Acronyms, Cross References

### Table of Terms

Acronym/Term	Definition
AGOs	Authorized Governance Organizations
ARF	Allocation Request Form
ARPD	Annual Report of Program Data
BOR	Board of Regents, the governing board for the University of Hawai‘i System
CAC	Chancellor’s Advisory Council, the College’s most representative standing council advising the Chancellor. This council is composed of department heads, unit heads, members of the Administrative Staff, representatives of Authorized Governance Organizations and other key personnel; the CAC advises the Chancellor on policy and planning and other matters and serves as a communication channel for the Chancellor and the College.
CAAC	Counseling and Academic Advising Council
CPR	Comprehensive Program Review (three year review)
CTE	Career and Technical Education
General Fund	Funds allocated by the State Legislature
ILO	Institutional Learning Outcome
LRDP	Long Range Development Plan. This is a campus physical plant development plan approved by the Board of Regents, unfunded as of 2014 and planned to begin 2020.
OCET	Office of Continuing Education and Training

OFIE	Office of Institutional Effectiveness. This office supports collegewide strategic planning, research on institutional and program effectiveness, and grant applications.
PAIR	Planning and Assessment Integration with Resource Allocation process
PLO	Program Learning Outcome
RTRF	Research Training and Revolving Funds
SAO	Service Area Outcome
SLO	Student Learning Outcome
SSP	Student Success Pathway
TFSF	Tuition and Fees Special Fund
UH BOR	University of Hawai‘i Board of Regents
UHCC	University of Hawai‘i Community Colleges
VCAA	Vice Chancellor for Academic Affairs
VCAC	Vice Chancellor’s Advisory Council. A committee composed of all Vice Chancellors and department chairs, unit heads, and program heads.
VCAS	Vice Chancellor for Administrative Services
VCSA	Vice Chancellor for Student Affairs

## Standard I. Mission, Academic Quality and Institutional Effectiveness, and Integrity

The institution demonstrates strong commitment to a mission that emphasizes student learning and student achievement. Using analysis of quantitative and qualitative data, the institution continuously and systematically evaluates, plans, implements, and improves the quality of its educational programs and services. The institution demonstrates integrity in all policies, actions, and communication. The administration, faculty, staff, and governing board members act honestly, ethically, and fairly in the performance of their duties.

### I.A. Mission

---

**I.A.1. The mission describes the institution’s broad educational purposes, its intended student population, the types of degrees and other credentials it offers, and its commitment to student learning and student achievement. (ER 6)**

---

### Evidence Of Meeting The Standard

#### *History and Purpose*

Queen Kapi’olani (1834–1899) envisioned a thriving Hawai’i that strives for excellence.

The College carries her name with pride. Her motto, Kūlia i ka Nu’u, “Strive for the highest,” unifies the College’s vision, values, and mission statements and sets the standard for student learning. The vision, values and mission statements drive planning and decision-making while serving as a continuously evolving set of ideals against which the effectiveness of the College is measured and improved (I.A.1-1, p. 4). As an indigenous-serving institution, the vision, values, and mission are articulated in both Hawaiian and English, the two official languages of the state of Hawai’i.

#### Kapi’olani Community College Mission

*He hale hāmama ‘o Kapi’olani Kula Nui Kaiāulu no nā ‘ano kaiāulu like ‘ole, e ho’olako i nā kānaka ho’ākea ‘ike e hiki aku i ka pahuhopu ‘imi na’auao, ‘imi ‘oihana, a ho’olaulā ‘ike. He loa’a nā palapala a’o, nā kēkelē mua puka, me nā polokalamu ho’ili kula he kilohana wale e ho’omākaukau i nā haumāna maoli, kūloko, kaumoku’āna, kau’āina no ka mua he lako.*

Kapi’olani Community College provides open access to higher education opportunities in pursuit of academic, career, and lifelong learning goals to the diverse communities of Hawai’i. Committed to student success through engagement, learning, and achievement, we offer high quality certificates and associate degrees, and transfer pathways that prepare indigenous, local, national, and international students for their productive futures.

*UH BOR on March 23, 2017*

To implement the mission, the College sets goals that align with the mission and goals of the larger University of Hawai‘i System and the University of Hawai‘i Community College System (I.A.1-2). The College also sets goals that are unique to the institution. These goals inform the College strategic plan, which takes a longer-term view of the vision. The College monitors its progress in meeting the goals of its mission and regularly evaluates its processes so that the College can meet changing student needs (see I.B.5).

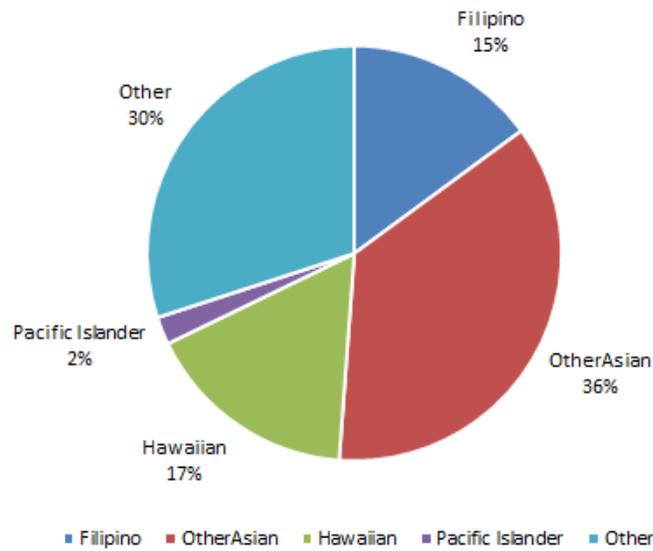

Kapi‘olani Community College, one of the seven community colleges in the University of Hawai‘i Community Colleges (UHCC), is an open-door, community-based institution which enables its diverse students to attain their highest educational potential as they develop a firm foundation for lifelong learning and contributions to their communities. The College is committed to providing a range of academic, career, and technical programs and support services designed to promote student engagement, student learning, and student achievement for success (I.A.1-3). The College measures progress through its strategic plan (I.A.1-4).

### *The Students the College Serves*

Kapi‘olani Community College serves a wide range of students, with particular emphasis on indigenous Native Hawaiian students. For example, approximately 17 percent are Native Hawaiian; 51 percent are Asian, with 15 percent being Filipino. Pacific Islander students comprise 2 percent. Figure 1 displays enrollment at the College by general ethnic category. The College offers a wide range of educational programs, including transfer programs, career and technical education (CTE) and pre-collegiate studies.

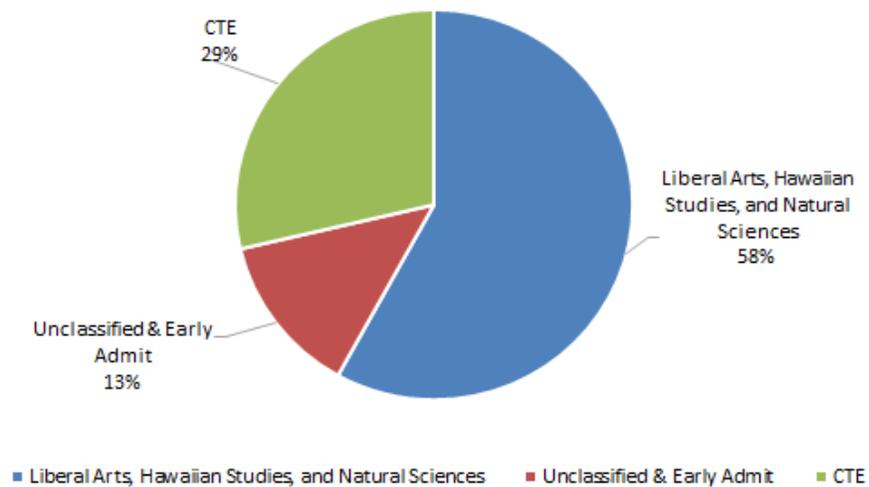

**Figure 1. Fall 2017 Enrollment by Ethnicity**

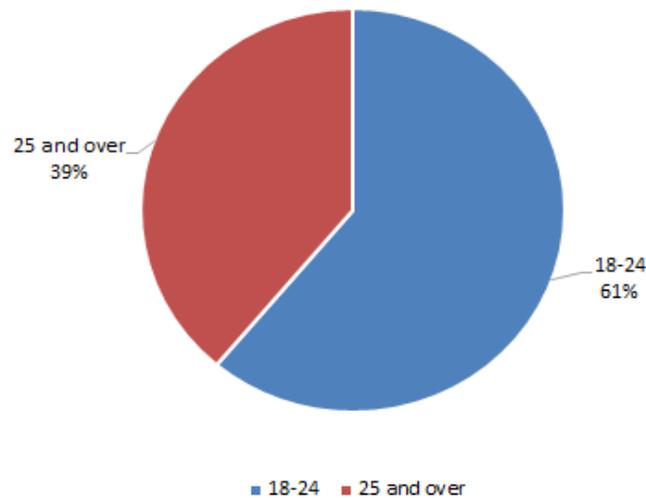

The College Strategic Plan, which operationalizes the College mission, specifically identifies Native Hawaiian, Pacific Islander and Filipino students as underrepresented subgroups. Figure 2 displays the enrollment by educational objective (I.A.1-5).

**Figure 2. Fall 2017 Enrollment by Educational Objective**

Many students who attend the College are recent high school graduates and are traditional community college students. Figure 3 displays enrollment at the College by traditional age categorization.

**Figure 3. Fall 2017 Enrollment by Traditional Age Status**

Additionally, approximately two-thirds of the students are traditional students (under 25 years of age). Mirroring national trends, about sixty percent of students are female.

### ***The Awards the College Offers***

The College offers flexible degrees and certificates to match the educational objectives of students. For systemwide data reports, the community college academic programs are categorized as pre-professional (transfer programs, typically in the Arts & Sciences) and Career and Technical Education (typically entry-level workforce programs, although many CTE programs now also offer transfer pathways to baccalaureate degrees).

There are three pre-professional degrees and sixteen CTE degrees. Over the past three academic years, the College has awarded over 4,200 degrees and certificates. Credit, non-credit, and continuing education programs of study are highlighted on the College’s website ([I.A.1-6](#), [I.A.1-7](#), and [I.A.1-8](#)) and list the degrees and certificates offered. The College prepares students for national licensure or certification in ten fields. Table 1 displays the degrees and certificates awarded and a breakdown by Filipino, Native Hawaiian, Pacific Islander, and Pell students.

**Table 1. Kapi‘olani Community College Degrees and Certificates of Achievement Awarded**

Students	2013-2014	2014-2015	2015-2016	2016-2017
All Students	1,513	1,335	1,383	1,356
Filipino	196	169	191	174
Native Hawaiian	234	189	191	186
Pacific Islander	27	16	19	10
Pell	517	476	527	428

Approximately 1,500 students have transferred to University of Hawai‘i (UH) four-year institutions during the same academic period, as shown in Table 2.

**Table 2. Fall Transfers From Kapi‘olani Community College to UH 4-Year Institutions**

Students	2013-2014	2014-2015	2015-2016	2016-2017
All Students	451	514	490	543
Filipino	43	60	62	61
Native Hawaiian	76	105	77	106
Pacific Islander	12	13	7	11
Pell	159	204	166	199

### *Our Commitment to Student Learning and Success*

The College views student learning as one of three foundational elements to the student experience. The Kapi‘olani Engagement, Learning, and Achievement (KELA) Model depicts the critical importance and interactivity of Student Engagement, Student Learning, Student Achievement, and overall Student Success. It also frames how the College assesses its efforts in supporting its students in achieving student success (ER 6). Figure 4, *Kapi‘olani Engagement, Learning, and Achievement Model* in I.B.1, depicts these relationships.

### **Analysis and Evaluation**

The mission reflects the College’s strong commitment to student engagement, learning, and achievement. The mission describes the institution’s broad educational purposes and its intended student population. The College has created programs and pathways to address the diverse needs of its students by offering numerous degrees and credentials.

---

**I.A.2. The institution uses data to determine how effectively it is accomplishing its mission, and whether the mission directs institutional priorities in meeting the educational needs of students.**

---

## Evidence of Meeting the Standard

### *Actionable Data to Meet the Mission*

The College uses data, both qualitative and quantitative, from a wide variety of sources, to determine whether and to what extent it is meeting its mission (see I.B.2, I.B.3, I.B.5).

Progress on the mission is measured using data to track how the College is meeting the educational needs of the students. The KELA model (see I.B.1) frames the types of data collected to track progress looking at student engagement, student achievement, and learning outcomes.

**Engagement** is the foundation that drives student learning and achievement. The College monitors student engagement by surveying its students every two years with the Community College Survey of Student Engagement (CCSSE). The College analyzes the survey results to look for areas to improve in its services.

Student **learning** outcomes assessment takes place throughout instruction at the course, program, and institutional levels, in student service units such as counseling (see II.C.1, II.C.2), and in academic support units (see II.B.3). Data from outcomes assessment are collected in Taskstream, an assessment management system. Outcomes assessment data are used in reports such as the Annual Report of Program Data (ARPD) and the three-year Comprehensive Program Review (CPR) for evaluation and planning purposes.

Student **achievement** is recorded and measured at the program level through the Annual Report of Program Data (see I.B.5, II.C.1) and at the institutional level through progress on the strategic plan and the UH system and UHCC system performance funding measure levels (see I.A.2, I.B.3). Data tracking strategic plan objectives are reported using the collegewide Strategic Plan Scorecard. Data tracking performance measures set by UH and UHCC are reported annually by the UHCC Vice President (ER 6).

This data reporting structure makes possible institution-wide dialogue regarding the College's progress on meeting its mission, as detailed in the 2015-2021 Strategic Plan ([I.A.2-1](#)). For a complete list of the ways the College tracks student engagement, learning, and achievement see [I.A.2-2](#).

### ***Mission Directs Institutional Priorities to Meet Student Need***

The mission drives the institutional priorities of open access, career and lifelong learning, and student success through engagement, learning, and achievement. The College has dedicated resources to multiple programs supporting access to higher education for broad and diverse populations, such as the Lunalilo Scholars Program, the co-curricular initiative, and the programs for Native Hawaiian students (see II.C). In support of career and lifelong learning, the College has invested heavily in learning pathways, transfer to four-year institutions, and workforce development and continuing education programs. In support of student success through engagement, learning, and achievement, Student Success Pathways has operationalized the KELA model in a way that has engaged the entire campus.

### **Analysis and Evaluation**

The institution measures progress in achieving its mission through an analysis of quantitative and qualitative data from outcomes assessment, Annual Reports of Program Data (ARPD), Comprehensive Program Reviews (CPR), Kapi‘olani CC Strategic Plan Scorecard Reports, University of Hawai‘i Community College system data, and Student Success Pathway reports. The institution uses this analysis to improve how it meets the educational needs of its students. While the College believes it meets this accreditation standard, there is an opportunity to review student learning in more formal and systematic ways to better meet the College mission and has made this goal part of Area

## **STUDENT SUCCESS**

Not many community college students foster five children in their last semester.

\*Makana’s story began seven years ago as a single man on academic probation, struggling to balance a complicated home life and school. Realizing he needed help he contacted a counselor saying, “I am overwhelmed and could use a serious talk. I really want to continue my education.” His counselor referred him to resources for Native Hawaiian students, like Kapo’oloku and Kūlia Ma Kapi’olani, and introduced him to instructors and volunteer opportunities in the community.

Near the end of his Associate Degree program, a family tragedy struck and Makana took custody of five small children. He asked for support and the campus rallied around him, providing extra time in his classes, donations collected by counselors, and childcare provided by staff members. This man with tattoos and a colorful past is loved by instructors, tutors, peers - and the middle school students he mentors! Several years later and despite all odds, Makana proved his commitment to learning with a 4.0 GPA in his Information Technology major.

At commencement all five children cheered as he crossed the stage. He has since received numerous job offers and today he still has custody of the children. Nevertheless, he plans to continue his education and earn a Bachelor’s degree.

Makana inspires peers to persevere in college and to ask for help. His advice to other students: “Make every effort count!” Recently he wrote to his counselor: “You are always there when I need help figuring anything out and I could never thank you enough. I am forever grateful to have you as well as many others help us through the hardest part of our lives.”

\*The student’s name has been changed for privacy.

of Focus One in the Quality Focus Essay (QFE) to foster and increase engagement in learning assessment.

---

**I.A.3. The institution’s programs and services are aligned with its mission. The mission guides institutional decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement.**

---

### Evidence of Meeting the Standard

The College’s programs and services are aligned with its mission, which guides decision-making, planning, and resource allocation and informs institutional goals for student learning and achievement. The mission is included in the Strategic Plan, the document that guides the College.

#### *The Mission*

The mission identifies populations that the College serves, including indigenous, local, national, and international student populations. It highlights open access, career and lifelong learning, and student success.

#### *Open Access to a Broad and Diverse Population*

The College is an indigenous-serving institution that has developed multiple services to support the Native Hawaiian community. The Kapo‘oloku Program ([I.A.3-1](#)) for Native Hawaiian Student Success focuses on the engagement, learning and achievement of indigenous students. Project Olonā ([I.A.3-2](#)) perpetuates cultural knowledge and values and supports an interest in scientific endeavour. The Native Hawaiian Career and Technical Education (CTE) program assists ([I.A.3-3](#)) Native Hawaiian students who are pursuing degrees in CTE programs to both graduate and find employment in their chosen fields.

Our College is a leader in international student education. The Paul S. Honda International Center, funded in part by the Honda Foundation, offers professional services in the areas of

### INTERNATIONAL FESTIVAL

*“It’s always educating to see what other cultures value, and what they find important. It’s important as a student and someone of their own culture to respect and consider other cultures too.”*

academic and transitional support to students from countries throughout the world, with the majority coming from Japan, China, and Korea ([I.A.3-4](#)). The International Café ([I.A.3-5](#)) is an award-winning service learning program where students network, learn about world cultures, and enhance their global competencies and skills.

Other populations identified by the College's mission statement are served by programs such as the Lunalilo Scholars ([I.A.3-6](#)), which provides opportunities for transformative college experiences for students who have not considered higher education as a viable alternative because of financial or other barriers limiting college access. The Center on Responsive Education (CORE; [I.A.3-7](#)) prepares educational professionals and paraprofessionals to be educationally, culturally, and linguistically responsive to individual and group needs—specializing in differentiated instruction and universal design. TRIO ([I.A.3-8](#)) assists students who meet one or more of the following criteria: low-income, first-generation in college, or documented disability. The Kuilei Outreach Program ([I.A.3-9](#)) facilitates the transition of local middle and high school students to the College.

#### *Career and life-long learning goals*

To support students who wish to transfer to University of Hawai'i four-year campuses, the dual admission/dual enrollment Ka'ie'ie Degree Pathway Program ([I.A.3-10](#)) promotes learning and achievement pathways to UH Mānoa. Similar dual admission/dual enrollment agreements have been signed with the other two UH four-year institutions. Transfers to UH West O'ahu are facilitated by Mānanawai ([I.A.3-11](#)), and Ho'omi'i ([I.A.3-12](#)) assists students who wish to transfer to UH Hilo.

Students who are preparing to enter the labor market or refresh job skills can use the services of the Employment Prep Center ([I.A.3-13](#)), which provides students and alumni career preparation

## INTERNATIONAL FESTIVAL (CONT.)

With the largest population of international students among all of the community colleges (approximately 700 international students in fall 2017), the International Festival brings together students, faculty, staff, and local community members for the 4-day annual event. Activities include presentations and demonstrations by international students along with invited guest speakers, artists, and cultural experts. At the 2017 Festival, 2,400 attendees learned how to write their name in Japanese, played the traditional sport of Myanmar, enjoyed a performance of Japanese taiko drums or Balinese dancers, and listened to popular music from Japan, Korea, China, Spain, or Hawaii – and that was just on the first day!

In March 2018, the Kapi'olani Community College International Festival celebrated its 30<sup>th</sup> consecutive year, evidence of the college's ongoing commitment to serving Hawaii's diverse communities and to providing quality international learning experiences for Kapi'olani students.

Festival participants gain a greater understanding of their own culture in relation to other cultures, as reflected in these student comments:

*"Talking about my country was an awesome feeling. This motivated me to go back to my country and look at the problem from a world point of view."*

*"We can learn the cultures in the world at school, but lectures don't tell everything about them. The most precious point of the International Festival is that we can learn the cultures through people who grew up in the cultures and understand them well."*

and employment services. Students' career exploration is supported by the UHCC System's Hawai'i Industry Sectors website ([I.A.3-14](#)), which provides real-time data on industry demands and job opportunities for the state. The College's Office of Continuing Education and Training ([I.A.3-15](#)) provides lifelong learning experiences through Culinary Arts, Global Learning and Development, and Health Education.

### ***Guiding decision-making, planning, and resource allocation***

The College's Planning and Assessment Integration with Resource Allocation (PAIR) policy, KOP #1.111 ([I.A.3-16](#)), ensures that participatory decision making, planning, and resource allocation are aligned with the mission and strategic plan. For a more complete discussion of the resource allocation process, see III.D.

Annually, the Vice Chancellor for Administrative Services sends a budget survey ([I.A.3-17](#)) to department chairs and unit heads to assist in planning and budgeting for the College. This survey ties the planning process to the Allocation Request Form submissions, the Student Success Pathway, the Annual Report of Program Data, and student learning to ensure alignment with the mission. All of these planning processes tie resource allocation to the institutional mission (for more detail, see III.D).

### **Analysis and Evaluation**

The College requires all programs to articulate how they and their respective services are aligned with the mission statement of Kapi'olani Community College as part of Annual Reports of Program Data and the three-year Comprehensive Program Reviews. The mission statement guides institutional decision-making, planning, and resource allocation through policy and budget planning. The mission serves as the foundation that guides the creation of institutional plans and the allocation of resources to address goals for student learning and achievement. Campus resources and practices that support dynamic learning and engagement clearly align with the College mission.

A more distinct timeline and cycle for course, program and general education review would improve the alignment to the learning component of the mission. This goal is included in the College's Quality Focus Essay.

---

**I.A.4. The institution articulates its mission in a widely published statement approved by the governing board. The mission statement is periodically reviewed and updated as necessary. (ER 6)**

---

### **Evidence of Meeting the Standard**

The College articulates its mission in a widely published statement approved by the University of Hawai'i System's Board of Regents (governing board). The College's mission statement is periodically reviewed and updated as necessary.

### ***Publishing the mission statement***

The College's current mission statement was approved by the Board of Regents (BOR) on March 23, 2017, and posted on the College website ([I.A.4-1, live link](#)). The mission and the 2015-2021 Strategic Plan were emailed to the campus' leaders in the Chancellor's Advisory Council (CAC). The members of the CAC shared the mission and the plan with their constituents. The Interim Chancellor announced the BOR approval on her website, "The Chancellor's Corner" ([I.A.4-2, live link](#)). The mission is also articulated on page 4 in the College's Annual Report ([I.A.4-3](#)) and is referred to in campus presentations, both electronic and in print form. The mission and vision statements are also displayed on posters in each classroom.

### ***Periodic Review for Currency and Relevance***

The College began revising the previous mission statement and strategic plan in fall 2013. The new 2015-2021 strategic plan was completed by spring 2016 and the revised mission statement was completed in November 2016. The strategic plan, which directly supports the mission statement, is reviewed regularly and will be next reviewed in April 2018 ([I.A.4-4](#)). (ER 6)

## **Analysis and Evaluation**

The College articulates its mission in a widely published statement approved by the governing board. The College's mission statement is periodically reviewed and updated as necessary.

**1.B.1. The institution demonstrates a sustained, substantive and collegial dialogue about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement.**

---

### **Evidence of Meeting the Standard**

The College holds substantive and collegial dialogues about student outcomes, student equity, academic quality, institutional effectiveness, and continuous improvement of student learning and achievement. These dialogues occur within the Chancellor’s Advisory Council ([I.B.1-1](#)), the Administrative Staff Council, and the Vice Chancellors’ Advisory Council, as well as the four authorized governance organizations. The mission, the campus Strategic Plan, and the Student Success Pathways model guide these discussions. Dialogues also occur at department and discipline meetings, professional development events, and trainings provided by the Assessment Coaches.

### ***Student Learning Outcomes Assessment***

The College is committed to assessing student learning outcomes in all courses and programs on a regular basis. The process for outcomes assessment for instructional faculty and counselors is supported by Assessment Coaches, who foster dialogue among faculty on student learning and success. Through professional development opportunities provided through SLO Fridays, they offer shared discussions of books and articles, and open conversation. They provide face-to-face assistance and online support. The coaches also maintain a website with news, updates, and how-to videos, and other supporting materials ([I.B.1-2](#), [live link](#); [I.B.1-3](#)).

Additional discussions occur at the Faculty Senate Student Learning Outcomes Assessment Committee, where faculty support colleagues' efforts to continuously improve student learning through sound assessment principles, processes and practices ([I.B.1-4](#)). This committee developed the Course Level Assessment Plan ([I.B.1-5](#)) and Course Level Assessment Guide ([I.B.1-6](#)) to guide course assessment.

The Counseling Assessment Leaders Group discusses best practices in counseling assessment, creates shared rubrics, and updates shared student learning outcomes. Share-outs take place amongst counselors to discuss best practices and challenges in assessment (see II.C.2).

Following guidelines established in prior years, the most recent version of the Guidelines for Tenure and Promotion (2017-2018), under Primary Responsibilities for faculty, the UHCC provides guidelines to faculty to discuss, in their dossiers, the assessment and evidence of student learning ([I.B.1-7](#), page 12). The Faculty Senate has also provided guidance to faculty in the reporting of their work on outcomes assessment.

### ***Student Equity***

Kapi'olani Community College is committed to the promotion of student success for all students, regardless of race, gender, age, disability, or economic circumstance. Along with representing the diversity of cultures in the state of Hawai'i, the College has a sizeable international student population with approximately ten percent of students coming from other countries, enriching the already intercultural fabric of the campus. The College continues to strive towards identifying and providing services and resources to address achievement gaps and to provide equal and open access to all students. The College sustains collegial dialogue about student equity among student, faculty, staff, and administration through meetings and initiatives such as SALT (Student Affairs Leadership Team), Student of Concern Reporting System, Student Success Council, LGBTI safe zone training, Title IX training, English as a Second Language C4ward (a professional development community of practice, Collaborative Circle for Creative Change), and Student Congress. Dialogue is sustained through meetings as well as through the assessment process.

The College's Strategic Plan and Institutional Effectiveness Measures (IEMs, see KELA model discussion below) track student achievement for groups historically under-represented in

Hawai‘i higher education: Native Hawaiians, Filipinos, and Pacific Islanders, as well as lower income Pell recipients. IEM data for these groups drill down to course success and fall-to-spring and fall-to-fall re-enrollment rates, and extends to a three-year timeline for certificate and degree completion and transfer rates.

### ***Academic quality***

Student achievement and academic quality are part of the College’s mission and are major discussion topics. The program review reports, the Annual Report of Program Data (ARPD) and the Comprehensive Program Review (CPR), are where programs examine their progress.

In the Annual Report of Program Data (ARPD, [I.B.1-8](#)), instructional, counseling and academic support departments and units provide an annual assessment of program activities, achievements, and plans as they relate to the College’s Strategic Plan Goals and Outcomes.

The Comprehensive Program Review (CPR) draws from ARPDs and reports a three-year view of the program’s health and plans as related to the College’s Strategic Plan Directions and Measures. The CPR analyzes (1) trends in program strengths and weaknesses in demand, efficiency, and effectiveness over the previous three years, and (2) projects the strategies to improve effectiveness and overall program health in the subsequent three years. For example, the Information Technology Program’s CPR discusses program health and examines assessment of program learning outcomes ([I.B.1-9](#)). The CPRs are posted on the Office for Institutional Effectiveness (OFIE) program review website ([I.B.1-10](#), [live link](#)).

The College uses the ARPD and CPR as well as their data-gathering processes for dialogues informed by data and uses analysis of course learning outcomes to inform and analyze program learning outcomes. This assessment in turn is discussed in the ARPD, which frames program planning. The results of the assessment of program student learning outcomes are included in the ARPD to integrate assessment, program planning and evaluation.

A Strategic Plan Scorecard ([I.B.1-11](#)) is produced each spring and provides an at-a-glance view of progress toward annual established benchmarks, strategic directions, and campus mission. Achievement measures are updated on the census freeze dates each semester. These achievement measures are disaggregated for Native Hawaiian, Filipino, Pacific Islander and Pell recipients.
